In December 2004, eight political parties contested parliamentary elections and four parties, including the NPP and NDC, contested presidential elections. This election was reported to have a remarkable turnout of 85.12% according to the Election Commission. Despite a few incidents of intimidation and minor irregularities, domestic and international observers judged the elections generally free and fair. There were several isolated incidents of election-related violence, but the election was generally peaceful in most of Ghana. John Agyekum Kufuor was re-elected president with 52.45% of the vote against three other presidential candidates, including former Vice-President John Atta Mills of the NDC. Thirty constituencies were created in the period between the 2000 and 2004 elections, resulting in a 230-member Parliament. Ghana's next presidential election will be held in 2008, and the race to succeed President Kufuor is well underway, with more than 15 candidates seeking the office.

On March 6, 2007, Ghana celebrated its 50th anniversary since becoming independent. As the first African nation to win its struggle for independence, Ghana hosted delegations from around the world during its year-long Jubilee event.

GOVERNMENT AND POLITICAL CONDITIONS

The 1993 constitution that established the Fourth Republic provided a basic charter for the republican democratic government. It declares Ghana to be a unitary republic with sovereignty residing in the Ghanaian people. Intended to prevent future coups, dictatorial government, and one-party states, it is designed to establish the concept of power sharing. The document reflects lessons learned from the abrogated constitutions of 1957, 1960, 1969, and 1979, and incorporates provisions and institutions drawn from British and American constitutional models. One controversial provision of the constitution indemnifies members and appointees of the PNDC from liability for any official act or omission during the years of PNDC rule. The constitution calls for a system of checks and balances, with power shared between a president, a unicameral parliament, an advisory Council of State, and an independent judiciary.

Executive authority is established in the Office of the Presidency, together with his Council of State. The president is head of state, head of government, and commander in chief of the armed forces. He also appoints the vice president. According to the constitution, more than half of the presidential-appointed ministers of state must be appointed from among members of Parliament.

Legislative functions are vested in Parliament, which consists of a unicameral 230-member body plus the Speaker. To become law, legislation must have the assent of the president, who has a qualified veto over all bills except those to which a vote of urgency is attached. Members of Parliament are popularly elected by universal adult suffrage for terms of 4 years, except in wartime, when terms may be extended for not more than 12 months at a time beyond the 4 years.

The structure and the power of the judiciary are independent of the two other branches of government. The Supreme Court has broad powers of judicial review. It is authorized by the constitution to rule on the constitutionality of any legislation or executive action at the request of any aggrieved citizen. The hierarchy of courts derives largely from British juridical forms. The hierarchy, called the Superior Court of Judicature, is composed of the Supreme Court of Ghana, the Court of Appeal, the High Court of Justice, regional tribunals, and such lower courts or tribunals as Parliament may establish. The courts have jurisdiction over all civil and criminal matters.

The government of John A. Kufuor appears to enjoy broad support among the Ghanaian population as it pursues a domestic political agenda based upon public commitment to the rule of law, basic human rights, and free market initiatives. So far, the government has taken steps to strengthen freedoms of expression by repealing colonial-era criminal libel laws, dropping a number of libel suits against journalists, abolishing sometimes abusive community tribunals, and introducing legislation to establish a juvenile justice system. As part of its anti-corruption efforts the Kufuor government has pursued some high-profile cases, including the prosecution of its Minister of Youth and Sports and several former high-level government officials. On September 3, 2002, Ghana inaugurated its National Reconciliation Commission, a South Africa-style commission established to investigate human rights abuses under Ghana's former military regimes. The National Reconciliation Commission completed its hearings in July 2004 and submitted its final report with recommendations in October 2004. The government responded with a White Paper in April 2005, accepting the recommendation to establish a Reparation and Rehabilitation Fund for victims of abuse, as well as directing security forces to study carefully the various recommendations on recruitment, training and deployment. Narcotics trafficked through Ghana to Western Europe and North America also pose a significant challenge for Ghana.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **John Agyekum KUFUOR**
Vice Pres.: **Aliu MAHAMA**
Min. of Aviation: **Gloria AKUFFO**
Min. of Communications: **Benjamin AGGREY-NTIM**
Min. of Defense: **Albert KAN-DAPAAH**
Min. of Education, Science, & Sports: **Dominic FOBIH**
Min. of Energy: **Joseph Kofi ADDA**
Min. of Finance & Economic Planning: **Kwadwo BAAH-WIREDU**
Min. of Fisheries: **Gladys ASMAH**
Min. of Food & Agriculture: **Ernest DEBRAH**
Min. of Foreign Affairs, Regional Integration, & the New Partnership for Africa's Development (NEPAD): **Akwasi OSEI-ADJEI**
Min. of Health: **Courage QUASHIGAH, Maj. (Ret.)**
Min. of Information & National Orientation: **Stephen ASAMOAH-BOATENG**
Min. of Interior: **Kwamena BARTELS**
Min. of Justice: **Joe GHARTEY**
Min. of Lands, Forestry, & Mines: **Esther Obeng DAPAAH**
Min. of Local Govt., Rural Development, & Environment: **Kwado ADJEI-DARKO**
Min. of Manpower, Youth, & Employment: **Nana OKOMEA**
Min. of National Security:
Min. of Parliamentary Affairs: **Abraham OSEI-AIDOOH**
Min. of Ports, Harbors, & Railways: **Christopher Ameyaw AKUMFI**
Min. for Public Sector Reform: **Paa Kwesi NDUOM**
Min. of Roads & Highways: **Richard ANANE**
Min. of Tourism & Diaspora Relations: **Oboshie Sai KOFIE**
Min. of Trade, Industry, & Private Sector Development: **Joseph BAIDOE-ANSAH**
Min. of Transportation: **Richard ANANE**
Min. of Water Resources, Works, & Housing: **Abubakar Saddique BONIFACE**
Min. of Women's & Children's Affairs: **Alima MAHAMA**
Min. of State in the Presidency: **Yaw BARIMAH**
Min. of State in the Presidency: **Charles BINTIN**
Min. of State in the Min. of Education: **Elizabeth OHENE**
Min. of State for Aviation: **Gloria AKUFFO**
Min. of State for Culture & Chieftancy: **Sampson Kwaku BOAFO**
Min. of State for Finance & Economic Planning: **Anthony Akoto OSEI**
Min. of State for Interior: **Nana OBIRI BOAHEN**
Min. of State for Justice: **Ambrose DERY**
Min. of State for Public Sector Reform: **Samuel OWUSU-ADJEI**
Min. of State for Transportation: **Godfred BONYON**
Min. of State for Water Resources, Works, & Housing: **Cecelia Abena DAPAAH**
Attorney Gen.: **Joe GHARTEY**
Governor, Bank of Ghana: **Paul ACQUAH**
Ambassador to the US: **Kwame BAWUAH-EDUSEI**
Permanent Representative to the UN, New York: **Leslie CHRISTIAN**

Ghana maintains an embassy in the United States at 3512 International Drive, NW, Washington, DC 20008 (tel. 202-686-4500). Its permanent mission to the United Nations is located at 19 E. 47th Street, New York, NY 10017 (tel. 212-832-1300).

ECONOMY

By West African standards, Ghana has a relatively diverse and rich natural resource base. Minerals—principally gold, diamonds, manganese ore, and bauxite—are produced and exported. Exploration for oil and gas resources is ongoing. Timber and marine resources are important but declining resources.

Agriculture remains a mainstay of the economy, accounting for more than one-third of GDP and about 55% of formal employment. Cash crops consist primarily of cocoa and cocoa products, which typically provide about one-third of export revenue, timber products, coconuts and other palm products, shea nuts (which produce an edible fat), and coffee. Ghana also has established a successful program of nontraditional agricultural products for export including pineapples, cashews, and peppers. Cassava, yams, plantains, corn, rice, peanuts, millet, and sorghum are the basic foodstuffs. Fish, poultry, and meat also are important dietary staples.

Ghana's industrial base is relatively advanced compared to many other African countries. Industries include textiles, apparel, steel (using scrap), tires, oil refining, flour milling, beverages, tobacco, simple consumer goods, and car, truck, and bus assembly. Industry, including mining, manufacturing, construction and electricity, accounts for about 25% of GDP.

Gold shares the top export revenue spot with cocoa, each bringing in about $1 billion in 2006. Tourism has become one of Ghana's largest foreign income earners (ranking third in 2005 at $836 million), and the Ghanaian Government has placed strong emphasis on further development of the sector. The country's largest

source of foreign exchange is remittances from abroad, which totaled about $4 billion in 2006.

Ghana's post-independence economic story has been a difficult one, but over the last 20 years, stability and growth have increasingly taken hold. Real GDP growth has averaged 4% since the mid-80s and was about 6% 2004-2006. Inflation and interest rates have declined steadily, particularly over the last decade. Ghana's poverty rate has also come down markedly, from 51.7% in 1991 to 28.5% in 2005/2006. Ghana is on track to meet the Millennium Development goal of halving extreme poverty by 2008, well ahead of the 2015 target.

Economic Development

At independence, Ghana had a substantial physical and social infrastructure and $481 million in foreign reserves. The Nkrumah government further developed the infrastructure and made important public investments in the industrial sector. With assistance from the United States, the World Bank, and the United Kingdom, construction of the Akosombo Dam was completed on the Volta River in 1966. Two U.S. companies built Valco, Africa's largest aluminum smelter, to use power generated at the dam. Aluminum exports from Valco used to be a major source of foreign exchange for Ghana, but an investment dispute beginning in 2001, followed by sale back to the government, has led to sporadic operation in recent years, and it was closed again in March 2007 due to the country's energy crisis.

Many Nkrumah-era investments were monumental public works projects and poorly conceived, badly managed agricultural and industrial schemes. With cocoa prices falling and the country's foreign exchange reserves fast disappearing, the government resorted to supplier credits to finance many projects. By the mid-1960s, Ghana's reserves were gone, and the country could not meet repayment schedules. The National Liberation Council responded by abandoning unprofitable projects and selling some inefficient state-owned enterprises to private investors. On three occasions, Ghana's creditors agreed to reschedule repayments due on Nkrumah-era supplier credits. Led by the United States, foreign donors provided import loans to enable the foreign exchange-strapped government to import essential commodities.

Prime Minister Busia's government (1969-72) liberalized controls to attract foreign investment and to encourage domestic entrepreneurship. Investors were cautious, however, and cocoa prices declined again while imports surged, precipitating a serious trade deficit. Despite considerable foreign assistance and some debt relief, the Busia regime also was unable to overcome the inherited restraints on growth posed by the debt burden, balance-of-payments imbalances, foreign exchange shortages, and mismanagement.

Although foreign aid helped prevent economic collapse and was responsible for subsequent improvements in many sectors, the economy stagnated in the 10-year period preceding the NRC takeover in 1972. Population growth offset the modest increase in gross domestic product, and real earnings declined for many Ghanaians.

To restructure the economy, the NRC, under General Acheampong (1972-78), undertook an austerity program that emphasized self-reliance, particularly in food production. These plans were not realized, however, primarily because of post-1973 oil price increases and a drought in 1975-77 that particularly affected northern Ghana. The NRC, which had inherited foreign debts of almost $1 billion, abrogated existing rescheduling arrangements for some debts and rejected other repayments. After creditors objected to this unilateral action, a 1974 agreement rescheduled the medium-term debt on liberal terms. The NRC also imposed the Investment Policy Decree of 1975—effective on January 1977—that required 51% Ghanaian equity participation in most foreign firms, but the government took 40% in specified industries. Many shares were sold directly to the public. Continued mismanagement of the economy, record inflation (more than 100% in 1977), and increasing corruption, notably at the highest political levels, led to growing dissatisfaction. The post-July 1978 military regime led by General Akuffo attempted to deal with Ghana's economic problems by making small changes in the overvalued cedi and by restraining government spending and monetary growth. Under a one-year standby agreement with the International Monetary Fund (IMF) in January 1979, the government promised to undertake economic reforms, including a reduction of the budget deficit, in return for a $68 million IMF support program and $27 million in IMF Trust Fund loans. The agreement became inoperative, however, after the June 4 coup that brought Flight Lieutenant Rawlings and the AFRC to power for 4 months.

In September 1979, the civilian government of Hilla Limann inherited declining per capita income, stagnant industrial and agricultural production due to inadequate imported supplies, shortages of imported and locally produced goods, a sizable budget deficit (almost 40% of expenditures in 1979), high inflation, "moderating" to 54% in 1979, an increasingly overvalued cedi, flourishing smuggling and other black-market activities, high unemployment, particularly among urban youth, deterioration in the transport network, and continued foreign exchange constraints.

Limann's PNP government announced yet another (2-year) reconstruction program, emphasizing increased food production, exports, and transport improvements. Import austerity was imposed and external payments arrears cut. However, cocoa production and prices fell, while oil prices soared. No effective measures were taken to reduce rampant corruption and black marketing.

When Rawlings again seized power at the end of 1981, cocoa output had fallen to half the 1970-71 level and its world price to one-third the 1975

level. By 1982, oil would constitute half of Ghana's imports, while overall trade contracted greatly. Internal transport had slowed to a crawl, and inflation remained high. During Rawlings' first year, the economy was stagnant. Industry ran at about 10% of capacity due to the chronic shortage of foreign exchange to cover the importation of required raw materials and replacement parts. Economic conditions deteriorated further in early 1983 when Nigeria expelled an estimated 1 million Ghanaians who had to be absorbed by Ghana.

In April 1983, in coordination with the IMF, the PNDC launched an economic recovery program, perhaps the most stringent and consistent of its day in Africa, aimed at reopening infrastructure bottlenecks and reviving moribund productive sectors—agriculture, mining, and timber. The largely distorted exchange rate and prices were realigned to encourage production and exports. The government imposed fiscal and monetary discipline to curb inflation. Through November 1987, the cedi was devalued by more than 6,300%, and widespread direct price controls were substantially reduced.

The economy's response to these reforms was initially hampered by the absorption of 1 million returnees from Nigeria, compounded by the decline of foreign aid and the onset of the worst drought since independence, which brought on widespread bushfires and forced closure of the aluminum smelter and severe power cuts for industry. In 1985, the country absorbed an additional 100,000 expellees from Nigeria.

In 1987, cocoa prices declined again; however, infrastructure repairs, improved weather, and producer incentives and support revived output. During 1984-88 the economy experienced solid growth for the first time since 1978. Renewed exports, aid inflows, and a foreign exchange auction eased hard currency constraints.

While the reforms caused substantial shocks in some sectors, particularly agriculture and textiles, the overall effects were positive and helped bring about a measure of economic stabilization and recovery. However, a big drop in world cocoa and gold prices hurt growth and, in the face of pending elections, spurred government spending, leading to an increased deficit, falling currency and high inflation at the time a new government led by John Agyekum Kufuor took office in 2000.

The economy has performed well under the Kufuor administration, but Ghana's fundamental vulnerabilities remain. The new administration continued the economic stabilization begun under the previous administration, and has taken some difficult but necessary steps such as ending subsidies of petroleum prices. Solid macroeconomic management coupled with major debt relief, large inflows of donor resources, and relatively high cocoa and gold prices have been the keys to the steady improvements in real GDP growth, which in 2004 topped 5% for the first time in a decade and reached an estimated 6.2% in 2006. Further debt relief, continued large aid inflows, favorable commodity prices, and $4 billion in gross annual remittances—this figure includes remittances from individuals as well as non-governmental organizations (NGOs) and embassies; individual remittances were estimated at about $1.8 billion in 2006—put Ghana in a stronger balance of payments position.

Ghana was recognized for its economic and democratic achievements in 2006, when it signed a five-year, $547 million anti-poverty compact with the United States' Millennium Challenge Corporation. The compact focuses on accelerating growth and poverty reduction through agricultural and rural development. The compact has three main components: enhancing the profitability of commercial agriculture among small farmers; reducing the transportation costs affecting agricultural commerce through improvements in transportation infrastructure, and expanding basic community services and strengthening rural institutions that support agriculture and agri-business. The compact is expected to contribute to improving the lives of one million Ghanaians. Ghana's stated goals are to accelerate economic growth, improve the quality of life for all Ghanaians, and reduce poverty through macroeconomic stability, higher private investment, broad-based social and rural development, as well as direct poverty-alleviation efforts. These plans are fully supported by the international donor community.

Key economic challenges include: overcoming infrastructure bottlenecks, especially in energy and water; poor management of natural resources; improving human resource capacity and development; establishing a business and investment climate that encourages and allows private sector-led growth, and privatizing remaining state-owned enterprises, several of which are significant budget liabilities.

FOREIGN RELATIONS

Ghana is active in the United Nations and many of its specialized agencies, as well as the World Trade Organization, the Nonaligned Movement, the African Union (AU), and the Economic Community of West African States (ECOWAS). Generally, Ghana follows the consensus of the Nonaligned Movement and the AU on economic and political issues that do not directly affect its own interests. Ghana plays an increasingly active role in subregional affairs. In February 2002, Ghana's former Deputy Foreign Minister, Mohammed Ibn Chambas, assumed the office of ECOWAS Executive Secretary. In February 2003, President Kufuor became the Chairperson of ECOWAS heads of state, taking on a strong role in the Cote d'Ivoire and Liberian peace and reconciliation processes. Kufuor was reelected to a second year in December 2003. His tenure expired in January 2005. Ghana took a nonpermanent seat on the UN Security Council in January 2006. In January 2007, President Kufuor was elected Chairman of the African Union, and Ghana hosted the June 2007 AU Summit, which focused on increasing

African unity. Ghana has been extremely active in international peacekeeping activities under UN auspices in Lebanon, Afghanistan, Rwanda, the Balkans, and Pakistan, in addition to an 8-year subregional initiative with its ECOWAS partners to develop and then enforce a ceasefire in Liberia. In January 2003, Ghana sent a company of troops to Cote d'Ivoire as part of the ECOWAS stabilization force and sent another contingent to Liberia in July of 2003; the United States provided logistical assistance to Ghana in these efforts. Ghana has current deployments to Cote d'Ivoire, Liberia, Sierra Leone, Lebanon, and Congo with numerous small troop deployments in the role of UN observers in many other crisis locations around the world. Additionally, Ghana sent some troops to a French-sponsored RECAMP Exercise in Benin, clearly highlighting the key role that peacekeeping operations have in the Ghana Armed Forces. Ghana maintains friendly relations with all states, regardless of ideology. Ghana has also committed to send a peacekeeping contingent to Somalia.

U.S.-GHANAIAN RELATIONS

The United States has enjoyed good relations with Ghana at a nonofficial, personal level since Ghana's independence. Thousands of Ghanaians have been educated in the United States. Close relations are maintained between educational and scientific institutions, and cultural links, particularly between Ghanaians and African-Americans, are strong.

Through the U.S. International Visitor Program, Ghanaian parliamentarians and other government officials have become acquainted with U.S. congressional and state legislative practices and have participated in programs designed to address other issues of interest. The U.S. and Ghanaian militaries have cooperated in numerous joint training exercises, culminating with Ghanaian participation in the African Crisis Response Initiative, an international activity in which the U.S. facilitates the development of an interoperable peacekeeping capacity among African nations. U.S.-Ghanaian military cooperation continues under the new African Contingency Operations Training and Assistance program; Ghana was one of the first militaries to receive ACOTA training in early 2003. In addition, there is an active bilateral International Military Education and Training program. Additionally, Ghana is the site of a U.S.-European Command-funded Exercise Reception Facility that was established to facilitate troop deployments for exercises or crisis response within the region. The facility is a direct result of Ghana's partnership with the United States on a Fuel Hub Initiative. Ghana is one of few African nations selected for the State Partnership Program, which will promote greater economic ties with U.S. institutions, including the National Guard.

The United States is among Ghana's principal trading partners. The Office of the President of Ghana worked closely with the U.S. Embassy in Accra to establish an American Chamber of Commerce to continue to develop closer economic ties in the private sector. Major U.S. companies operating in the country include ACS, CMS Energy, Coca Cola, S.C. Johnson, Ralston Purina, Star-Kist, A.H. Robins, Sterling, Pfizer, IBM, 3M, Motorola, Stewart & Stevenson, PriceWaterhouseCoopers, and National Cash Register (NCR). Several U.S. firms recently made or are considering investments in Ghana, primarily in gold mining, wood products, and petroleum. U.S. mining giant Newmont entered Ghana's mining sector in 2004 and intends to invest up to $1 billion. In late 1997, Nuevo Petroleum concluded an oil exploration agreement accounting for the last of Ghana's offshore mineral rights zones. Several other U.S. oil companies also are engaged in offshore exploration, but so far with little success.

U.S. development assistance to Ghana in fiscal year 2007 was implemented by USAID, the African Development Foundation, Millennium Challenge Corporation, and others. U.S. development assistance to Ghana in fiscal year 2007 totaled more than $55.1 million, with programs in small farmer competitiveness, health, including HIV/AIDS and maternal child health, education, and democracy/governance. Ghana was the first country in the world to accept Peace Corps volunteers, and the program remains one of the largest. Currently, there are more than 150 volunteers in Ghana. Almost half work in education, and the others in agro-forestry, small business development, health education, water sanitation, and youth development. Ghana's $547 million compact with the Millennium Challenge Corporation is the most recent achievement in the U.S.-Ghanaian development partnership.

TRAVEL

Consular Information Sheet

September 23, 2008

Country Description: Ghana is a developing country on the West Coast of Africa. The capital is Accra. Facilities for tourism are available in the population centers of the greater Accra region, Kumasi in the Ashanti region, and in the Cape Coast area of the Central region, but they are limited in the more remote areas of the country.

Entry Requirements: A passport and visa are required, as is evidence of a yellow fever vaccination. Travelers should obtain the latest information and details from the Embassy of Ghana, 3512 International Drive, NW, Washington, DC 20008; telephone (202) 686-4520. Consular services are also available at the Ghana Permanent Mission to the UN at 19 East 47th Street, New York, NY 10017, telephone (212) 832-1300, and the Honorary Consulate of Ghana, 3434 Locke Lane, Houston, TX, telephone (713) 960-8806. Overseas, inquiries should be made at the nearest Ghanaian embassy or consulate. Visit the Embassy of Ghana web site at www.ghanaembassy.org for the most current visa information.

Safety and Security: Due to the potential for violence, U.S. citizens should avoid political rallies and street demonstrations and maintain security awareness at all times. For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Pick pocketing, purse snatching, and various types of scams are the most common forms of crime confronting visitors. U.S. travelers have reported these types of theft at crowded markets, beaches, parks, and tourist attractions. Incidences of violent crime, such as armed robbery, are on the rise, including reports of armed robberies in expatriate residential areas. Victims who resist attackers run a high risk of serious physical injury. Take security measures, such as traveling in groups and avoiding travel at night. Avoid travel in communal taxis. Travelers who limit their display of jewelry and handle their cash discreetly reduce their vulnerability to crime. Travelers are advised to carry limited amounts of cash and only photocopies of key documents.

Use of credit cards in Ghana should be avoided if possible, as a growing number of travelers have been victims of credit card fraud.

In recent years, U.S. citizens have reported substantial financial losses from questionable transactions involving gold and other precious metals. The Government of Ghana maintains strict regulations on these natural resources. All agents must be licensed and all transactions must be certified. (See Special Circumstances below).

Perpetrators of business fraud often target foreigners, including Americans. Such fraud schemes are now prevalent throughout West Africa, including Ghana. Please refer to the Country Commercial Guide for Ghana at http://www.buyusa.gov.

American citizens frequently consult the Embassy regarding questionable business offers sent by people in Ghana. These are scams and typically begin with an unsolicited communication (usually by e-mail) from an unknown individual who describes a situation that promises quick financial gain, often by assisting in the transfer of a large sum of money or valuables out of the country. A series of "advance fees" must be paid in order to conclude the transaction, such as fees to open a bank account or to pay certain taxes. In fact, the final payoff does not exist; the purpose of the scams is simply to collect money from the victim. The Embassy has also received reports of fraudulent charities soliciting contributions through the Internet or direct mail. If you receive such business offers or charity requests, carefully check them out before you commit any funds, provide any goods or services, or undertake any travel. Check with the U.S. Embassy in Ghana at telephone (233-21) 741-100 for an assessment of the offer's credibility.

Another type of fraud is committed by persons claiming to live in Ghana or who claim to be traveling to Ghana on business, and who profess friendship or romantic interest over the Internet. Once a relationship has been established, the correspondent typically asks the American to send money for living expenses, travel expenses, or visa costs. Sometimes a "hospital" or "doctor" telephones to say that the friend has suffered an "accident" and needs immediate financial assistance to cover medical bills. There are other variations of this scam, but the common goal is to fraudulently obtain as much money as possible from the victim. Americans have reported losing thousands of dollars through such scams. The anonymity of the Internet means that the victim cannot be sure of the real name, age, marital status, nationality, or even gender of the correspondent. In most cases reported to the Embassy, the correspondent turned out to be a fictitious persona created to lure Americans into sending money.

Visitors to Ghana should also be wary of overly-friendly locals offering tours, discounted lodging or other services that seem too good to be true. Tourists are often targeted by touts and scam artists. Some Americans have been the victims of false criminal accusations and have found themselves separated from time, money and trust as they seek to resolve these difficult situations.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immedi-

ately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. Ghana maintains a specialized Domestic Violence Victim Support Unit (DOVVSU) within the Ghana Police Service to assist victims of domestic violence, especially women and children. In addition to its law enforcement responsibilities, the Unit can refer victims to medical providers and counselors, as well as to community support services. Further information is available by following the DOVVSU link at www.ghanapolice.org.

The local equivalent to the "911" emergency line in Ghana is: 191.

Medical Facilities and Health Information: Medical facilities in Ghana are limited, particularly outside Accra, the capital. Travelers should carry adequate supplies of any needed prescription medicines, along with copies of their prescriptions, the generic name of the drugs, and a supply of preferred over-the-counter medications. For information on avian influenza (bird flu), please refer to the Department of State's Avian Influenza Fact Sheet.

Documentation of Yellow fever vaccination is required upon arrival from all countries. There are no HIV/AIDS entry restrictions for visitors to or foreign residents of Ghana.

Motor vehicle accidents, drownings and water-related accidents due to Ghana's rough surf, muggings and other violent attacks, and the development of sexually transmitted diseases—including HIV—are health and safety concerns that have been reported by U.S. citizens and can be at least partially mitigated by using common-sense safety precautions.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Ghana is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Primary roads are generally paved and well maintained. However, some side roads within major cities and roads outside of major cities are in poor condition. The road from Accra to the central region tourist area of Cape Coast continues to be the site of many accidents.

Travel in darkness, particularly outside the major cities, is extremely hazardous, due to poor street lighting and the unpredictable behavior of pedestrians, bicyclists and farm animals, particularly goats and sheep. Aggressive drivers, poorly maintained vehicles and overloaded vehicles pose serious threats to road safety.

The safety standards of the small private buses that transit roads and highways are uncertain. Travelers are encouraged to consider this when making travel arrangements.

Travelers are routinely stopped at police checkpoints throughout Ghana, and vehicles and passengers may be searched. Drivers must possess an international driver's license (available from AAA and the American Automobile Touring Alliance). Foreign nationals should carry documentation of their status, such as a passport and visa.

Visit the website of Ghana's national tourist office at http://www.touringghana.com/default.asp and the national authority responsible for road safety at http://www.mrt.gov.gh.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Ghana's Civil Aviation Authority as not being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Ghana's air carrier operations. For more information, travelers may visit the FAA's Internet web site at www.faa.gov.

Service provided by a number of regional air carriers is reported to be unreliable. The airlines may alter scheduled stops, cancel or postpone flights on short notice, and regularly overbook flights. Travelers may experience unexpected delays even after checking in. Passengers should get the required seat reconfirmation stamped on the ticket, have enough emergency funds for food and lodging in case of unexpected delays, and arrive at the airport at least two hours before the scheduled departure time.

Special Circumstances: Effective July 1, 2007, the Government of Ghana redenominated the local currency, the cedi, introducing new banknotes (Ghana cedi) and coins (Ghana pesewa). 10,000 cedis = 1 Ghana cedi = 100 Ghana pesewas. Both currencies will be in circulation through December 31, 2007, after which date the cedi can be converted only at commercial banks or the Bank of Ghana. Travelers should be alert to persons who may try to defraud them with the old and new bills. The Government of Ghana has established a website, www.ghanacedi.gov.gh, to inform the public about the redenomination exercise. The website includes a useful currency converter. Visitors arriving or departing Ghana with more than $5,000 in cash are required to declare the amount at the border. Currency exchange is available at most banks and at licensed foreign exchange bureaus, but currency transactions with private citizens are illegal. The Government of

Ghana also prohibits departing travelers from carrying more than 5,000,000 cedis (500 Ghana cedis) out of the country. Ghanaian currency must either be spent or exchanged before departure, or it will be confiscated.

Strict customs regulations govern temporary importation into or export from Ghana of items such as gold, diamonds and precious natural resources. Only agents licensed by the Precious Metals and Mining Commission, telephone (233-21) 664-635 or 664-579, may handle import-export transactions of these natural resources. Any transaction without the commission's endorsement is illegal and/or fraudulent. All transactions must be completed through the commission at the price set daily by the London exchange. Any transaction that discounts this price, or includes a previously negotiated price, is either illegal or fraudulent. Export of gold dust is rare as it encourages dangerous and environmentally destructive practices, and transactions involving the export of gold dust are probably fraudulent. Attempts to evade regulations are punishable by imprisonment. It is advisable to contact the Embassy of Ghana in Washington, D.C., or one of the Ghanaian consulates in the United States, for specific information regarding customs requirements. In rare instances, visitors arriving in Ghana with sophisticated electronic equipment (video cameras and laptop computers) may have to deposit 17.5 per cent of the item's value with the Customs and Excise office at the airport. To get the deposit refunded, visitors must apply to the Customs and Excise Office in central Accra 48 hours before departure. Taking pictures near sensitive installations, including military sites and some government buildings, is prohibited. These sites are not always clearly marked and application of these restrictions is subject to interpretation. Permission may be obtained from Ghanaian security personnel. Permission should also be obtained before photographing anyone in uniform (e.g., police officers and military officers). In some cases, film and cameras have been confiscated. It is strictly prohibited to wear any military apparel such as camouflage jackets or trousers, or any clothing or items that may appear military in nature.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Ghana's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Ghana are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Ghana are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Ghana. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy is located at No. 24 Fourth Circular Road, Cantonments, Accra; telephone (233-21)741-000. The public entrance to the Consular Section is No. 19 Fifth Link Road, Cantonments, Accra; telephone (233-21) 741-100; fax (233-21) 741-362 or 741-426; after-hours (233-21) 741-775.

Intercountry Adoption

June 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please note: The Department of Social Welfare may consider an application for intercountry adoption as an alternative means of child care, if a child cannot be placed in a foster or adoptive family in Ghana or cannot in any suitable manner be cared for in Ghana. A court may grant an intercountry adoption order if it is in the best interests of the child.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority:
The Department of Social Welfare
Client Services Unit
P.O. Box M230
Accra, Ghana
Tel: 233-21-662-857

Eligibility Requirements for Adoptive Parents:

- An application for adoption may be made jointly by a husband and wife;
- An application for an adoption order may be made by the mother or father of the child alone or jointly with a spouse;
- An application for an adoption order may be made by a single person, but only if that person is a citizen of Ghana;

- Applicants must be at least 25 years of age and at least 21 years older than the child;
- Applicants must be of sound mind (prospective adoptive parents must undergo a medical exam as part of the pre-approval process).

Residency Requirements: Prospective adoptive parents must be resident in Ghana a minimum of six months prior to adopting a child. The prospective adoptive parents must foster a child for one year in Ghana before the adoption is finalized.

Time Frame: It takes one year to complete an adoption in Ghana. Please note: An additional one to six months may be required for U.S. the immigration petition and visa process.

Adoption Agencies and Attorneys: Prospective adoptive parents will work with a Ghanaian Social Welfare Officer in the region they will adopt from to get pre-approved and matched with a child. Prospective adoptive parents will have to work with an attorney to complete the legal requirements for adoption in Ghana.

Adoption Fees: Cedis 50,000 (approximately $5.00) for initial filing form plus attorney's fees.

Adoption Procedures:

- Applicants purchase the adoption form from the Director of Social Welfare/Representative at any Regional Social Welfare Office for Cedis 50,000;
- Applicants submit the completed form along with the attachments specified in the form (e.g., medical examination, civil documents) to the Director of Social Welfare or his/her representative at the Regional Office for processing;
- The processing of the application begins with visits to the applicants' home by a Social Welfare Officer who interviews applicants and submits the report to the Placement Committee, the head office for adoptions in the Department of Social Welfare for approval (this can take approximately three months);
- Depending upon the availability of children, a suitable child is placed with would-be parents for a trial period of three months, during which time the Social Welfare Officer undertakes monthly visits;
- If the child and would-be parents are determined to be compatible, applicants engage a local attorney to assist with the legal aspects of the adoption;
- The Director of Social Welfare submits the comprehensive report, which covers the social investigation of the applicants, background checks, mental stability, financial stability etc, to the High Court;
- An Adoption Order may then be granted by the High Court upon recommendation from the Director of Social Welfare.

Note: The adoption is incomplete without the granting of an Adoption Order by the Court.

Required Documents: In general, the documents required are the same as for an adoption in the U.S.: birth, marriage and divorce records, medical examination, evidence of finances and employment.

Embassy of Ghana
3512 International Drive, N.W.

Additional Information: Specific questions about adoption in Ghana may be addressed to the U.S. Embassy in Accra. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

GREECE

Compiled from the May 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Hellenic Republic

PROFILE

Geography

Area: 131,957 sq. km. (51,146 sq. mi.; roughly the size of Alabama).

Cities: Capital—Athens. Greater Athens (pop. 3,566,060), municipality of Athens (772,072), Greater Thessaloniki (pop. 1,057,825), Thessaloniki (824,633), Piraeus (182,671), Greater Piraeus (880,529), Patras (170,452), Iraklion (132,117), Larissa (113,090).

Terrain: Mountainous interior with coastal plains; 1,400-plus islands.

Climate: Mediterranean; mild, wet winter and hot, dry summer.

People

Population: (2005 est.) 11,104,000 million. (Immigrants make up approximately 10% of the population.)

Growth rate: (2007 estimated) 0.163%.

Languages: Greek 99% (official); Turkish, others. Albanian is spoken by approximately 700,000 Albanian immigrants. English is the predominant second language.

Religions: Greek Orthodox (approximately 98% of citizens), with Muslim (1.3%), Jewish, Catholic, Protestant, and other religious communities.

Education: Years compulsory—9. Literacy—97.5%. All levels are free.

Health: Infant mortality rate—5.43/1,000. Life expectancy—male 76.72 years, female 81.91 years.

Work force: 4.72 million.

Government

Type: Parliamentary republic.

Independence: 1830.

Constitution: June 11, 1975, amended March 1986, April 2001.

Government branches: Executive—president (head of state), prime minister (head of government). Legislative—300-seat unicameral Vouli (parliament). Judicial—Supreme Court. Council of State.

Political parties: New Democracy (ND), Panhellenic Socialist Movement (PASOK), Communist Party of Greece (KKE), Coalition of the Left (SYNASPISMOS), and Popular Orthodox Rally (LAOS).

Suffrage: universal and mandatory at 18.

Political subdivisions: 13 peripheries (regional districts), 51 nomi (prefectures).

Economy (2007)

GDP: $314.4 billion.*

Per capita GDP: $28,280.

Growth rate: 4.0%.

Inflation rate: 3.0%.

Unemployment rate: (annual average) 8.3%.

Natural resources: Bauxite, lignite, magnesite, oil, marble.

Agriculture: (5.4% of GDP) Products—sugar beets, wheat, maize, tomatoes, olives, olive oil, grapes, raisins, wine, oranges, peaches, tobacco, cotton, livestock, dairy products.

Manufacturing: (21.3% of GDP) Types—processed foods, shoes, textiles, metals, chemicals, electrical equipment, cement, glass, transport equipment, petroleum products, construction, electrical power.

Services: (73.3% of GDP) Transportation, tourism, communications, trade, banking, public administration, defense.

Trade: Exports—$23.5 billion: manufactured goods, food and beverages, petroleum products, cement, chemicals. Major markets—Germany, Italy, France, U.S., U.K. Imports—$75.8 billion: basic manufactures, food and animals, crude oil, chemicals, machinery, transport equipment. Major suppliers—Germany, Italy, France, Japan, Netherlands, U.S.

PEOPLE

Greece was inhabited as early as the Paleolithic period and by 3000 BC had become home, in the Cycladic Islands, to a culture whose art remains among the most evocative in world history. In the second millennium BC, the island of Crete nurtured the maritime empire of the Minoans, whose trade reached from

Egypt to Sicily. The Minoans were supplanted by the Mycenaeans of the Greek mainland, who spoke a dialect of ancient Greek. During the Roman, Byzantine, and Ottoman Empires (1st-19th centuries), Greece's ethnic composition became more diverse. The roots of Greek language and culture date back at least 3,500 years, and modern Greek preserves many elements of its classical predecessor.

Eastern Orthodox Christianity is the dominant religion in Greece and receives state funding. During the centuries of Ottoman domination, the Greek Orthodox Church preserved the Greek language and cultural identity and was an important rallying point in the struggle for independence. There is a centuries-old Muslim religious minority concentrated in Thrace and an estimated 300,000 Muslim immigrants living elsewhere in the country. Smaller religious communities in Greece include Old Calendar Orthodox, Catholics, Protestants, Jews, Jehovah's Witnesses, and Mormons.

Greek education is free and compulsory for children between the ages of 6 and 15. Overall responsibility for education rests with the Ministry of National Education and Religious Affairs. Private colleges and universities (mostly foreign) do have campuses in Greece despite the fact that their degrees are not recognized by the Greek state. Entrance to public universities is determined by state-administered exams.

HISTORY

The Greek War of Independence began in 1821 and concluded in 1830 when England, France, and Russia forced the Ottoman Empire to grant Greece its independence under a European monarch, Prince Otto of Bavaria.

At independence, Greece had an area of 47,515 square kilometers (18,346 square mi.), and its northern boundary extended from the Gulf of Volos to the Gulf of Arta. Under the influence of the "Megali Idea," the expansion of the Greek state to include all areas of Greek population, Greece acquired the Ionian islands in 1864; Thessaly and part of Epirus in 1881; Macedonia, Crete, Epirus, and the Aegean islands in 1913; Western Thrace in 1918; and the Dodecanese islands in 1947.

Greece entered World War I in 1917 on the side of the Allies. After the war, Greece took part in the Allied occupation of Turkey, where many Greeks still lived. In 1921, the Greek army marched toward Ankara, but was defeated by Turkish forces led by Ataturk and forced to withdraw. In a forced exchange of populations, more than 1.3 million refugees from Turkey poured into Greece, creating enormous challenges for the Greek economy and society.

Greek politics, particularly between the two world wars, involved a struggle for power between monarchists and republicans. Greece was proclaimed a republic in 1924, but George II returned to the throne in 1935. A plebiscite in 1946 upheld the monarchy, which was finally abolished by referendum on December 8, 1974.

Greece's entry into World War II was precipitated by the Italian invasion on October 28, 1940. Despite Italian superiority in numbers and equipment, determined Greek defenders drove the invaders back into Albania. Hitler was forced to divert German troops to protect his southern flank and overran Greece in 1941. Following a very severe German occupation in which many Greeks died (including over 90% of Greece's Jewish community) German forces withdrew in October 1944, and the government-in-exile returned to Athens.

After the German withdrawal, the principal Greek resistance movement, which was controlled by the communists, refused to disarm. A banned demonstration by resistance forces in Athens in December 1944 ended in battles with Greek Government and British forces. Continuing tensions led to the outbreak of full-fledged civil war in 1946. First the United Kingdom and later the U.S. gave extensive military and economic aid to the Greek government. In 1947, Secretary of State George C. Marshall implemented the Marshall Plan under President Truman, which focused on the economic recovery and the rebuilding of Europe. The U.S. contributed hundreds of millions of dollars to rebuilding Greece in terms of buildings, agriculture, and industry.

In August 1949, the Greek national army forced the remaining insurgents to surrender or flee to Greece's communist neighbors. The insurgency resulted in 100,000 killed, 700,000 displaced persons inside the country, and catastrophic economic disruption. This civil war left Greek society deeply divided between leftists and rightists.

Greece became a member of NATO in 1952. From 1952 to late 1963, Greece was governed by conservative parties—the Greek Rally of Marshal Alexandros Papagos and its successor, the National Radical Union (ERE) of the late Constantine Karamanlis. In 1963, the Center Union Party of George Papandreou was elected and governed until July 1965. It was followed by a succession of unstable coalition governments.

On April 21, 1967, just before scheduled elections, a group of colonels led by Col. George Papadopoulos seized power in a coup d'etat. The junta suppressed civil liberties, established special military courts, and dissolved political parties. Several thousand political opponents were imprisoned or exiled to remote Greek islands. In November 1973, following an uprising of students at the Athens Polytechnic University, Gen. Dimitrios Ioannides replaced Papadopoulos and tried to continue the dictatorship.

Gen. Ioannides' attempt in July 1974 to overthrow Archbishop Makarios, the President of Cyprus, brought Greece to the brink of war with Turkey, which invaded Cyprus and occupied part of the island. Senior Greek military officers then withdrew their support from the junta, which toppled. Leading citizens persuaded Karamanlis to return from exile in

France to establish a government of national unity until elections could be held. Karamanlis' newly organized party, New Democracy (ND), won elections held in November 1974, and he became Prime Minister.

Following the 1974 referendum, the Parliament approved a new constitution and elected Constantine Tsatsos as president of the republic. In the parliamentary elections of 1977, New Democracy again won a majority of seats. In May 1980, the late Prime Minister Karamanlis was elected to succeed Tsatsos as president. George Rallis was then chosen party leader and succeeded Karamanlis as Prime Minister.

On January 1, 1981, Greece became the 10th member of the European Community (now the European Union). In parliamentary elections held on October 18, 1981, Greece elected its first socialist government, the Panhellenic Socialist Movement (PASOK), led by Andreas Papandreou. In 1985, Supreme Court Justice Christos Sartzetakis was elected

president by the Greek parliament. PASOK under Papandreou was re-elected in 1985.Greece had two rounds of parliamentary elections in 1989; both produced weak coalition governments with limited mandates. In the April 1990 election, ND won 150 seats and subsequently gained 2 others. After Prime Minister Mitsotakis fired Foreign Minister Andonis Samaras in 1992, the rift led to the collapse of the ND government and a victory in the September 1993 elections for Andreas Papandreou's PASOK.

On January 17, 1996, following a protracted illness, Prime Minister Papandreou resigned and was replaced by former Minister of Industry Constantine Simitis. In elections held in September 1996, Constantine Simitis was elected Prime Minister. In April 2000, Simitis and PASOK won again, gaining 158 seats to ND's 125. Parliamentary elections were held March 8, 2004, and ND won 165 seats to PASOK's 117; Konstantinos Karamanlis, ND leader and the nephew of the former prime minister, became Prime Minister. Karolos Papoulias was elected President by Parliament in February 2005. Most recently, parliamentary elections were held September 16, 2007. ND won 152 seats to PASOK's 102; Karamanlis was re-elected Prime Minister. Greece's exemplary success in hosting a safe and secure 2004 Summer Olympics in Athens has enhanced its international prestige. The 2004 Olympics and Paralympics left an impressive and expensive legacy of new roads, spectacular stadiums, and modern public transportation systems, which the PASOK government began in 1997 and the New Democracy government of Karamanlis completed in 2004.

GOVERNMENT AND POLITICAL CONDITIONS

Greece is a parliamentary republic whose constitution was last amended in May 2008. There are three branches of government. The executive includes the president, who is head of state, and the prime minister, who is head of government. There is a 300-seat unicameral "Vouli" (legislature). The judicial branch includes a Supreme Court. Administrative subdivisions include 13 peripheries (regional districts) and 51 nomi (prefectures). Suffrage is universal at 18.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Karolos PAPOULIAS**
Prime Min.: **Konstandinos KARAMANLIS**
Min. of Culture: **Mikhalis LIAPIS**
Min. of Development: **Christos FOLIAS**
Min. of Employment & Social Protection: **Fani PALLI-PETRALIA**
Min. of Environment, Physical Planning, & Public Works: **Yeoryios SOUFLIAS**
Min. of Foreign Affairs: **Theodora BAKOYIANNI**
Min. of Health & Social Solidarity: **Dimitrios AVRAMOPOULOS**
Min. of Interior: **Prokopis PAVLOPOULOS**
Min. of Justice: **Sotiris KHATZIGAKIS**
Min. of Macedonia & Thrace: **Margaritis TZIMAS**
Min. of Merchant Marine & Island Policy: **Anastasios PAPALIGOURAS**
Min. of National Defense: **Evangelos-Vassilios MEIMARAKIS**
Min. of National Economy & Finance: **Yeoryios ALOGOSKOUFIS**
Min. of National Education & Religions: **Evripidis STYLIANIDIS**
Min. of Rural Development & Foods: **Alekos KONDOS**
Min. of Tourism: **Aris SPILIOTOPOULOS**
Min. of Transport & Communications: **Kostis KHATZIDHAKIS**
Min. of State in Charge of Communication: **Theodoros ROUSSOPOULOS**
Governor, Bank of Greece: **Nikos GARGANAS**
Ambassador to the US: **Alexandros MALLIAS**
Permanent Representative to the UN, New York: **Ioannis MOURIKIS**

Greece's embassy in the United States is located at 2221 Massachusetts Ave., NW, Washington, DC 20008; tel: (202) 939-1300; fax: (202) 939-1324. Greece also maintains consulates in Boston, Chicago, Los Angeles, New York, San Francisco, Atlanta, Houston and Tampa.

ECONOMY

Greece adopted the euro as its new common currency in January 2002. The adoption of the euro provided Greece (formerly a high inflation risk country under the drachma) with access to competitive loan rates and also to low rates of the Eurobond market. This led to a dramatic increase in consumer spending which gave a significant boost to economic growth. This credit also led to a more relaxed fiscal policy starting in 2002, which, combined with expenditures associated with the preparation of the Athens 2004 Olympics, resulted in excessive deficits and debt in 2003 and 2004. The government deficit in 2004 is now estimated by the Greek Government to have reached 6.6% of GDP. As a result of lower post-Olympic spending and tight public spending, the government deficit dropped to 2.7% of GDP in 2007, with a government debt to GDP ratio of 93.4% (this is government debt, and does not include debt of municipalities and public enterprises). The ND administration has pledged to the European Commission to achieve a balanced budget by the year 2010.

The Greek economy grew by 4.0% in 2007 and is expected to grow by 3.6% in 2008. These growth rates resulted in a drop in unemployment (to 8.3% in 2007, down from 10.4% in 2004), although it is still significantly higher among women and people under 27. Unfortunately, foreign direct investment (FDI) inflow has also dropped, and efforts to revive it have been only partially successful. At the same time, Greek investment in Southeast Europe has increased, leading to a net FDI outflow in some years.

Greece recently revised upward its GDP by 9.6%. This revision resulted from the first fundamental revision of economic statistics since 1988.

Services make up the largest and fastest-growing sector of the Greek economy. In 2007, 16.3 million tourists visited Greece, with net revenues of $15.6 billion. Remittances from transport (mainly shipping) are grow-

ing, and actually exceeded tourism receipts in the last 3 years, reaching $23.2 billion in 2007. Receipts from tourism and transport have covered a significant portion of Greece's large trade deficit. Industrial activity has shown a mixed performance, with certain sectors such as the food industry and high-tech/telecommunications showing healthy increases, while textiles have declined. Agriculture employs about 12% of the work force and is still characterized by small farms and low capital investment, despite significant support from the EU in structural funds and subsidies. Traditionally a seafaring nation, the Greek-owned merchant fleet totaled 4,173 ships in February 2008, 8.5% of the world merchant fleet and 16.4% of world tonnage.

European Union (EU) Membership

Greece has realigned its economy as part of its transition to full EU membership that began in 1981. Greece last held the rotating EU presidency in the first half of 2003. Greek businesses continue to adjust to competition from EU firms, and the government has liberalized its economic and commercial regulations and practices.

Greece has been a major net beneficiary of the EU budget; in 2007, EU transfers accounted for 3.8% of GDP. From 1994-99, about $20 billion in EU structural funds and Greek national financing were spent on projects to modernize and develop Greece's transportation network in time for the Olympics in 2004. The centerpiece was the construction of the new international airport near Athens, which opened in March 2001 soon after the launch of the new Athens subway system.

EU transfers to Greece continued with approximately $24 billion in structural funds for the period 2000-2006. The same level of EU funding, $24 billion, has been allocated for Greece for 2007-2013. These funds contribute significantly to Greece's current accounts balance and further reduce the state budget deficit. EU funds will continue to finance major public works and economic development projects, upgrade competitiveness and human resources, improve living conditions, and address disparities between poorer and more developed regions of the country.

U.S.-Greece Trade

In 2007, the U.S. trade surplus with Greece was $769 million. There are no significant non-tariff barriers to American exports. U.S. exports to Greece reached $1.7 billion, accounting for 2.3% of Greece's total imports in 2007. The top U.S. exports remain defense articles, although American business activity is expected to grow in the tourism development, medical, construction, food processing, and packaging and franchising sectors. U.S. companies are involved in Greece's ongoing privatization efforts; further deregulation of Greece's energy sector and the country's central location as a transportation hub for Europe may offer additional opportunities in electricity, gas, refinery, and related sectors.

FOREIGN RELATIONS

Greece's foreign policy is aligned with that of its EU partners. Greece gives particular emphasis to its close relations with Cyprus but also has growing political and economic ties with the Balkan countries and the Middle East.

Greece maintains full diplomatic, political, and economic relations with its Southeast European neighbors, except with Macedonia (see below), and regards itself as a leader of the region's Euro-Atlantic integration process. It provides peacekeeping contingents for Bosnia, Kosovo and Afghanistan. Greece has good relations with Russia and has embassies in a number of the central Asian republics, which it sees as potentially important trading partners.

Prominent issues in Greek foreign policy include Greek-Turkish differences in the Aegean, Turkish accession to the EU, the name dispute with Macedonia, the reunification of Cyprus, the international community's recognition of Kosovo's independence, and Greek-American relations. For 2005-2006, Greece held a 2-year, rotating seat on the UN Security Council.

Macedonia

The Greek dispute with its northern neighbor over its constitutional name, Republic of Macedonia, has been an important issue in Greek politics since 1992 and has inhibited the establishment of full diplomatic relations. Greece was adamantly opposed to the use of "Macedonia" by the government in Skopje, claiming that the term is intrinsically Greek and should not be used by a foreign country. Mediation efforts by the UN and the United States brokered an interim agreement whereby Greece recognized the country as the Former Yugoslav Republic of Macedonia (FYROM) in September 1995. At NATO's Bucharest Summit in April 2008, all 26 NATO Allies agreed Macedonia had met the criteria for membership. Consensus on extending a NATO membership invitation could not be reached, due to the unresolved dispute over Macedonia's name. Talks on the name question continue under UN auspices.

Albania

Greece restored diplomatic relations with Albania in 1971, but the Greek Government did not formally lift the state of war, declared during World War II, until 1987. After the fall of the Albanian communist regime in 1991, relations between Athens and Tirana became increasingly strained because of allegations of mistreatment of the Greek ethnic minority by Albanian authorities in southern Albania.

A wave of Albanian illegal economic migrants to Greece exacerbated tensions. In the past several years, however, cooperation between Greece and Albania has improved, with efforts focused on regional issues, such as narcotics trafficking and illegal immigration. However, tensions hover just below the surface. Greece remains host to 600,000-800,000

Albanian immigrants, many of them illegal. Crime in Greece involving Albanians often attracts headlines.

Greece-Turkey-Cyprus Relations

For historical reasons, most Greeks see Turkey as the major potential threat to their security. Greece and Turkey have unresolved disagreements regarding the Aegean maritime boundary, the treatment of the Orthodox Church and Greek minority in Istanbul, and the Muslim (primarily ethnic Turkish) minority in western Thrace. The largest source of tension in their relationship since 1974 has been the Cyprus conflict. Various UN-led efforts over the years to resolve the issue on a bizonal, bicommunal basis have failed. The latest attempt, the Annan Plan, was overwhelmingly rejected by Greek Cypriots in March 2004. Turkish Cypriots voted in favor of the plan and both Greece and Turkey expressed their approval. The Republic of Cyprus entered the EU on May 1, 2004 as a divided island. The UN is currently assessing whether the political will exists among the interested parties to restart negotiations.

At times over the past three decades, tensions between Greece and Turkey have almost reached the point of armed confrontation. In 1996, President Clinton intervened to help avert a possible armed exchange after Greek and Turkish journalists generated a dispute over ownership of a tiny, uninhabited Aegean islet called Imia (Kardak in Turkish.) A significant breakthrough in relations took place when major earthquakes hit Turkey and Greece in 1999. Both countries and peoples responded generously to the other's need, helping turn around official perceptions that rapprochement was too risky politically. Since that time, Greek and Turkish Foreign Ministers have increased the quantity and quality of bilateral exchanges, both official and unofficial.

Greece has endorsed and supported Turkey's bid for candidacy to the European Union since the Helsinki EU Summit in 1999. Despite continuing disagreements with Ankara over Cyprus and the Aegean, Greek opinion leaders across the political spectrum are convinced that Greece's long-term interests are best served by Turkey's successfully fulfilling the requirements for membership and joining the European Union. The EU opened accession talks with Turkey on October 3, 2005. In December 2006, amid continuing dispute over Cyprus, the EU froze talks with Turkey on eight chapters regarding accession and stated that no chapters would be closed until a resolution is found.

The Middle East

Greece claims a special interest in the Middle East because of its geographic position and its economic and historic ties to the area. Greece cooperated with allied forces during the 1990-91 Persian Gulf War. Since 1994, Greece has signed defense cooperation agreements with Israel and Egypt. In recent years, Greek leaders have hosted several meetings of Israeli and Palestinian politicians to contribute to the peace process. Greece has been traditionally supportive of Palestinian claims. However, beginning in the late 1990s, efforts to strike a more balanced relationship with Israel received a boost. Greek-Israeli relations have been complicated by Israel's strategic cooperation with Turkey. Israeli President Moshe Katsav visited Greece in 2006, the first-ever official visit by an Israeli head of state.

U.S.-GREECE RELATIONS

The United States and Greece have longstanding historical, political, and cultural ties based on a common heritage, shared democratic values, and participation as Allies during World War II, the Korean conflict, the Cold War, and now in Afghanistan. The Greek Government responded to the September 11, 2001 attacks with strong political support for the United States, use of Greek airspace, and the offer of Greek military assets in support of the counterterrorism campaign. Its participation in Operation Enduring Freedom included the stationing of a Greek Navy frigate in the Arabian Sea for almost 2 years—the most distant deployment for the Greek Navy since WWII.

In the summer of 2002, Greek authorities captured numerous suspected members of the terrorist group "November 17." In 2003, 15 members of the terrorist organization, which since 1975 had killed many prominent Greeks and five U.S. mission employees, were found guilty and convicted for more than 2,500 crimes, including multiple counts of homicide. In December 2005, a three-judge panel opened an appeals trial for the November 17 convicts, which lasted for 17 months. At its conclusion on May 3, two defendants were acquitted, while at the sentencing for the other 13 terrorists on May 14, 2007, the court largely upheld the results of the initial trial, leaving the leadership of the defunct group serving multiple life sentences and others serving long prison terms. Under the Greek system, however, two of the convicted prisoners were eligible for parole almost immediately (no action taken as mid-November 2007), and another will be eligible 18 months after imposition of the sentence.

In the early morning hours of January 12, 2007, terrorists fired a rocket-propelled grenade through a front window of the U.S. Embassy. A group calling itself Revolutionary Struggle later claimed responsibility for the act. Some see the domestic terrorist organization as a splinter group arising from the remnants of November 17 followers. Revolutionary Struggle also claimed responsibility for attempting to assassinate the Minister of Culture and former Minister of Public Order Georgos Voulgarakis in a bomb blast in May 2006. There is smooth cooperation between U.S. and Greek counter-terrorism officials. Greek and American diplomatic, law enforcement, and intelligence agencies worked closely together in the build-up to and throughout the 2004 Summer Olympic Games in Athens. In January 2006, the United States and Greece signed protocols updating

treaties covering extradition and mutual legal assistance, which further strengthened this cooperation.

An estimated three million Americans resident in the United States claim Greek descent. This large, well-organized community cultivates close political and cultural ties with Greece. There are approximately 90,000 to 100,000 American Citizens resident in Greece. Greece has the seventh-largest population of U.S. Social Security beneficiaries in the world. The United States has provided Greece with more than $11.1 billion in economic and security assistance since 1946. Economic programs were phased out by 1962, but military financial assistance continued until the early 1990s.

In 1953, the first defense cooperation agreement between Greece and the United States was signed, providing for the establishment and operation of American military installations on Greek territory. The United States closed three of its four main bases in the 1990s. The current mutual defense cooperation agreement provides for the operation by the United States of a naval support facility that exploits the strategically located deep-water port and airfield at Souda Bay in Crete.

TRAVEL

Consular Information Sheet

June 27, 2008

Country Description: Greece is a developed and stable democracy with a modern economy.

Entry Requirements: Greece is a party to the Schengen agreement. As such, U.S. citizens may enter Greece for up to 90 days for tourist or business purposes without a visa. The passport should be valid for at least three months beyond the period of stay. For further details about travel into and within Schengen countries, please see our fact sheet. For other entry requirements, travelers should contact the Embassy of Greece at 2221 Massachusetts Avenue NW, Washington, DC 20008, telephone (202) 939-5800, or Greek consulates in Atlanta, Boston, Chicago, Houston, Los Angeles, Tampa, New York, and San Francisco, and Greek embassies and consulates around the world.

Holders of official or diplomatic passports visiting Greece as tourists must obtain visas prior to arrival. Visit the Embassy of Greece web site at http://www.greekembassy.org for the most current visa information.

Safety and Security: The U.S. Government remains deeply concerned about the heightened threat of terrorist attacks against U.S. citizens and interests abroad. Like other countries that are members of the Schengen Agreement for free cross-border movement, Greece's open borders with its European neighbors allow the possibility for terrorist groups entering and exiting the country with anonymity. Greece's long coastline and many islands also heighten the possibility that foreign-based terrorists might try to exploit Greece's borders.

In addition, there are domestic radical organizations that engage in violent acts in Greece. These activities have been against both domestic and foreign targets. On January 12, 2007, at 5:55 AM, the domestic terrorist group Revolutionary Struggle fired a rocket-propelled grenade at the U.S. Embassy. There was minor damage, and no injuries.

Strikes and demonstrations are a regular occurrence. Greece is a stable democracy and these activities usually are orderly and lawful. There have been recent incidents in Athens and Thessaloniki, however, in which unruly protestors engaged in aggressive confrontations with the police, often in areas frequented by tourists. Riot control procedures often include the use of tear gas. Visitors should keep abreast of news about demonstrations from local newspapers and hotel security. When there are demonstrations, visitors should be aware of and avoid places where demonstrators frequently congregate, such as the Polytechnic University area, Exarchion and Syntagma Squares in

Athens, and Aristotle Square in Thessaloniki. Greek police are prohibited generally from entering Greek public university campuses. As a result, the campuses are sometimes exploited as a refuge by people who may engage in petty crime and vandalism. For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Middle East and North Africa Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crimes against tourists (such as purse-snatching and pick-pocketing) have occurred at popular tourist sites and on crowded public transportation. Pick-pocketing is especially common on the Athens metro and in some shopping areas in and around Thessaloniki. Reports of date or acquaintance rape also occasionally occur. The majority of these offenses take place on the islands. The usual safety precautions practiced in any urban or tourist area should be practiced during a visit to Greece.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. The Local equivalent to the "911" emergency line in Greece is: 100-Police, 166 - Ambulance, and 199 for Fire Brigade

Medical Facilities and Health Information: Medical facilities are adequate, and some, particularly the private clinics and hospitals in Athens and Thessaloniki, are quite good. Some private hospitals have affiliations with U.S. facilities, and generally their staff doctors have been trained in U.S. or other international teaching institutions.

Public medical clinics, especially on the islands, may lack resources; care there can be inadequate by American standards, and often, little English is spoken. Many patients, Greeks and visitors alike, are transferred from the provinces and islands to Athens hospitals for more sophisticated care. Others may choose to transfer from a public to a private hospital within Athens or Thessaloniki. Americans choosing to do so would arrange for an ambulance belonging to the private hospital to transport them from the public hospital to the private one. The cost of the ambulance for this transfer, as well as all expenses in a private hospital, must be borne by the patient.

Nursing care, particularly in public hospitals, may be less than adequate. For special or through-the-night nursing care, it is suggested that a private nurse be hired or a family member or friend be available to assist. One parent or a private nurse should always plan to stay with a hospitalized child on a 24-hour basis, as even the best hospitals generally maintain only a minimal nursing staff from midnight to dawn on non-emergency floors or wards.

For information on avian influenza (bird flu), please refer to the Department of State's Avian Influenza Fact Sheet, available at http://travel.state.gov.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Greece is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Drivers and pedestrians alike should exercise extreme caution when operating motor vehicles or when walking along roadways or crossing streets. Visitors to Greece must be prepared to drive defensively. Heavy traffic and poor highways pose hazards, especially at night or in inclement weather. Extreme care is warranted in operating a motorbike. Moreover, tourists who rent motorbikes either on the Greek mainland or its islands must wear helmets and take special precautions on local roads that are typically poorly maintained and frequently pothole-ridden. There are a number of nationwide auto-service clubs and plans similar to those in the U.S., that provide towing and roadside service, which a tourist can call and pay for per service. The largest, quite similar to AAA, is ELPA, nation-wide phone number 10400.

Tourists and temporary residents who will stay in Greece less than 185 days must carry a valid U.S. license as well as an international driver's permit (IDP). Failure to have both documents may result in police detention or other problems. The U.S. Department of State has designated two organizations to issue IDPs to those who hold valid U.S. driver's licenses: AAA and the American Automobile Touring Alliance. Issuance of an IDP is quick, easy, and inexpensive, but must generally be done before a traveler leaves the United States. Vehicles may not properly be rented without the IDP, although sometimes they are. A

driver without one, however, will be penalized for failure to have one in the event of an accident, and may be open to civil suit as well. Fines are high. Small motorbike rental firms frequently do not insure their vehicles; customers are responsible for damages and should review their coverage before renting. Individuals who expect to spend more than 185 days in Greece should either obtain a Greek license or convert their valid U.S. license for use in Greece through their local Nomarchy's Office of Transportation and Communications.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Greece's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Greece's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Greek customs authorities have strict regulations concerning the export from Greece of antiquities, including rocks from archaeological sites. Penalties range from large fines to prison terms. It is advisable to contact the Embassy of Greece in Washington, or one of Greece's consulates in the United States, for specific information regarding customs requirements.

In addition to being subject to all Greek laws affecting U.S. citizens, dual nationals may also be subject to other laws that impose special obligations on Greek citizens. Greek males between the ages of 20 and 45 are required by Greek law to perform military service. This applies to any individual whom the Greek authorities consider to be Greek, regardless of whether or not the individual considers himself Greek, has a foreign citizenship and passport, or was born or lives outside of Greece. If remaining in Greece for more than the 90-day period permitted for tourism or business, men of Greek descent may be prevented from leaving Greece until they complete their military obligations. Generally, obligatory non-voluntary military service in Greece will not affect US citizenship. Specific questions on this subject should be addressed to the citizenship section of the US Embassy in Athens. For additional information, see our information on Citizenship and Nationality. For additional information regarding military service requirements, contact the nearest Greek embassy or consulate as listed above.

Labor strikes in the transportation sector (national airline, city bus lines, and taxis) occur frequently. Most are announced in advance and are of short duration. Reconfirmation of domestic and international flight reservations is highly recommended.

Users of public transportation in Athens should be sure to buy the appropriate ticket and to validate it correctly, mindful that the metro line to the airport is more expensive than other bus and metro services and that ticket inspectors circulate among passengers assuring compliance with ticketing regulations. ; Fines are heavy for passengers without tickets or with the wrong ticket."

The Greek islands are extremely popular tourist destinations in the summer months. With overall tourist numbers markedly up since the 2004 Athens Olympic Games, and with an increased emphasis on ferryboat safety reducing the total number of vessels in daily inter-island service, airline tickets and ferryboat berths to the Aegean Greek islands can be hard to come by in July and August without prior arrangements. Visitors to Greece are urged to book their island travel in these months as early as possible. There are numerous local travel agencies that can provide such bookings; the agents usually speak English and the costs are no higher than if dealing with the carriers directly.

The Government of Greece does not permit the photographing of military installations. In 2001, several foreigners who photograph military aircraft as a hobby were arrested while taking photographs of aircraft taking off and landing at a military base.

Disaster Preparedness: Greece experienced serious forest fires during the summer of 2007; during the summer months, travelers should be particularly mindful of the risk of fires, taking care not to inadvertently spark one through carelessness. Barbecue and camp fires are restricted in many areas during the dry summer season.

Greece experiences frequent seismic activity; tremors are common and serious earthquakes have occurred. Detailed information on Greece's earthquake fault lines is available from the U.S. Geological Survey (USGS) at http://www.usgs.gov.

In 2006, the H5N1 Avian Influenza was found in migratory birds in Greece; no human infections or deaths were reported. For more information on avian influenza, please visit http://travel.state.gov/travel/tips/health/health_2747.html.

Disaster preparedness information and specific suggestions to help mitigate the impact of wildfires, floods, earthquakes, and landslides is available from the U.S. Federal Management Agency (FEMA) at http://www.fema.gov. In any natural disaster, follow the instructions of local authorities. The General Secretariat of Civil Protection which responds to emergencies can be reached at 210-3359932/33 or visited at http://www.civilprotection.gr.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Greek laws, even unknowingly, may be expelled, arrested or imprisoned.

Penalties for possession, use, or trafficking in illegal drugs in Greece are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminat-

ing child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Greece are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site and to obtain updated information on travel and security within Greece. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy in Athens is located at 91 Vasilissis Sophias Boulevard, tel: (30) (210) 721-2951. The U.S. Consulate General in Thessaloniki is located at Plateia Commercial Center, 43 Tsimiski Street, 7th floor, tel: (30) (2310) 242-905. The Embassy's web site is http://athens.usembassy.gov. The e-mail address for the Consular Section is athensamericancitizenservices@state.gov. The web site for the U.S. Consulate General Thessaloniki is http://thessaloniki.usconsulate.gov. The Consulate's e-mail address is info@usconsulate.gr

Intercountry Adoption

October 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. It does not necessarily reflect the actual state of the laws of a child's country of birth, and is provided for general information only. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The government office responsible for adoptions in Greece is the Ministry of Health and Social Solidarity, at the following address:

17 Aristotelous Street
104 33 Athens, Greece
Tel. 210-5232820-9
Fax 210-5234768
E-mail: www.mohow.gr

Eligibility Requirements for Adoptive Parents: Prospective adoptive parents may be married or single and must be residents of Greece. Exceptions for prospective adoptive parents who do not reside in Greece will be made only for children with health problems who live in Greek institutions. There is no religious requirement in order to adopt a child in Greece. At least one parent must be older than the adopted child by at least 18 years, and not more than 45 years old. Only minors can be adopted, except in the case of stepparent adoption. Adoptions done privately are also legal in Greece. In case of a private adoption no restriction applies as to the place of residence of the prospective parents. There are no private adoption agencies in Greece, however children may be adopted with the involvement of an attorney who will act as a facilitator. In any case, a court decision must be issued following the field investigation of the relevant social service.

Adoption Fees: The U.S. Embassy in Athens is aware that there is a 300 euro revenue stamp that a prospective adoptive parent will have to obtain from the Greek government before a child is released to him/her by a local institution. It is the embassy's understanding that court and attorney fees generally do not exceed 1,000 Euros (approximately $1,250.00) for adoptions of children living in local institutions. The embassy is not aware of the expenses involved in private adoptions, although certainly there are some, and they can be substantial.

Time Frame: Due to the limited number of children available for adoption, and a large number of prospective adoptive parents, the waiting period to finalize an adoption is approximately five years for a child living in an institution. An attorney is necessary in order to present the case to court and finalize the adoption. Court decisions concerning adoption cases usually take from 1-6 months before a final decision is issued. For children with health problems it usually takes up to three years.

Adoption Agencies and Attorneys: There are many governmental institutions and orphanages in Greece which care for orphaned or abandoned infants of Greek or other ethnic descent. Jurisdiction over the premises and the services provided to children living in institutions belongs to the Greek Ministry of Health and Social Solidarity, www.mohaw.gr. The following two Greek institutions care for abandoned children:

Mitera Foster Home, 65 Dimokratias Avenue, 131 22 Athens, tel. 210-2627155, email, mitera@otenet.gr.

Agios Stylianos Municipal Home for Foundlings, 99 28th October Street, 546 42, Thessaloniki, email, agstyl1@otenet.gr.

Whether an individual adopts a child from one of the above institutions or privately, a lawyer is required. The embassy maintains a list of English-speaking lawyers, some of whom specialize in Family law, http://www.usembassy.gr/us_citizen/attorneys.pdf. Although attorneys on the list have been chosen with care and enjoy good reputations, the Embassy cannot guarantee their professional integrity or ability.

Adoption Procedures: All petitions submitted to local institutions by the prospective adoptive parents are followed by an extensive and thorough field investigation performed by the social services of the institution, which is supervised by the Greek Ministry of Health and Social Solidarity. When the investigation is over, the case file is forwarded to the local institution's Council, which approves or disapproves the petition of the prospective parents.

The Council of the local institution does the matching of prospective adoptive parents with children, taking into account the specific needs of specific children, and the corresponding ability of prospective parents to meet those needs. Adoptive parents' applications are processed by the local institutions strictly in chronological order, with the exception that priority is given to persons willing to adopt a child with special physical or intellectual needs.If the petition is approved, then the case file is forwarded to the appropriate court for endorsement.

In order for prospective parents who live abroad to initiate an adoption, they must communicate with the respective office of the International Social Services in their country of residence, www.iss-ssi.org (for the Greek branch, issgr@otenet.gr). For private adoptions within Greece, the social service arm of the respective Nomarchy (Prefecture) of the area that the parents reside will conduct the field investigation. The law requires that a home study be conducted by local social services, prior to the court hearing, so that the family and the social status of the adoptive parents can be determined.

There is a 15-20 day fostering period for children living in institutions.

The documents that comprise the legal file submitted to the court in order to issue a final decision for the adoption are:

- Field investigation report by the Institution's social service department;
- Marriage certificate;
- Penal record;
- Family status certificate;
- Written consent of biological parent(s);
- Proof of good financial status of prospective adoptive parents;
- Two reference letters.

Required Documents: an application signed by the adoptive parents is submitted to the institution. In case of an inter-country adoption, the International Social Service in Athens requires the following documents from prospective adoptive parents in order to proceed to the social field investigation:

- An application to show their interest to adopt a child, notarized by the Greek police if they happen to be here in Greece, or sent through their International Social Services office from U.S.A.
- Certified copies of birth certificates, and baptismal certificates if applicable, of the adoptive parents.
- Certified copy of their marriage certificate.
- Medical certificates concerning the general health condition, and separate certificates concerning the mental health of the adoptive parents.
- Evidence of the financial status of the adoptive parents.
- Two letters of recommendation from friends, organizations, or their place of worship.
- Penal records of both adoptive parents. A "penal record" is a document which Greek citizens can obtain from the appropriate area judicial authority regard to their "conviction-free" background. It has been the Embassy's experience that U.S. citizens, whenever required, can submit to the Greek authorities an FBI record, which is considered to serve the same purpose.

The Embassy of Greece
2221 Massachusetts Ave., N.W.
Washington, D.C. 20008
Tel: 202-939-1300
Fax: 202-234-2803

Greece also has Consulates in Atlanta, Boston, Chicago, Houston, Los Angeles, New York, San Francisco and Florida. For detailed contact information, please visit the Greek Ministry of Foreign Affairs website at, www.mfa.gr.

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children,* as well as the Department of State publication, *Intercountry Adoptions.* Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy
91 Vasilissis Sophias Avenue,
Athens 10160, Greece,
Telephone: 30-210-721-2951
athensconsul@state.gov
Telephone: 30-210-721-2951

Additional Information: Specific questions about adoption in Greece may be addressed to the U.S. Embassy in Athens. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International*

Parental Child Abduction section of this book and review current reports online at www.travel.state.gov/childabduction

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

The Hague Convention on the Civil Aspects of International Child Abduction came into force between the United States and Greece on June 1, 1993. Therefore, Hague Convention provisions for return would apply to children abducted or retained after June 1, 1993.

Parents and legal guardians of children taken to Greece prior to June 1, 1993 may still submit applications for access to the child under the Hague Convention.

The Greek Central Authority
Hellenic Republic Ministry of Justice
General Directorate of International Relations and Legislative Competence
Section 4
96 Messoghion Avenue
11527 Athens
Greece
Telephone: 011 [30] (1) 771-4186
Fax: 011 [30] (1) 770-7025

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

GRENADA

Compiled from the August 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Grenada

PROFILE

Geography

Area: 344 sq. km. (133 sq. mi.); about twice the size of Washington, DC.

Cities: Capital—St. George's (est. pop. 33,734).

Terrain: Three volcanic islands (Grenada and the smaller islands of Carriacou and Petit Martinique) with mountainous rainforest.

Climate: Tropical.

People

Nationality: Noun and adjective—Grenadian(s).

Population: (2006) 0.8%

Annual growth rate: (2006) 0.8%.

Ethnic groups: African descent (89%), some South Asians (East Indians) and Europeans, trace Arawak/Carib Indian.

Religions: Roman Catholic, various Protestant denominations, Islam, Rastafarianism.

Languages: English (official).

Education: Years compulsory—10 grades or age 16. Literacy—95% of adult population.

Health: (2005) Infant mortality rate—16/1,000. Life expectancy—men 63.1 years; women 66.7 years.

Work force: (2006) 48,000.

Unemployment: (2005) 18%.

Government

Type: Parliamentary democracy; independent sovereign state within the Commonwealth.

Independence: February 7, 1974.

Constitution: December 19, 1975.

Government branches: Executive—governor general (representing Queen Elizabeth II, head of state), prime minister (head of government), cabinet. Legislative—bicameral parliament. Judicial—magistrates' courts, Eastern Caribbean Supreme Court (high court and court of appeals), final appeal to Privy Council in London.

Political subdivisions: Six parishes and two dependencies (Carriacou and Petit Martinique).

Political parties: New National Party (NNP), majority; National Democratic Congress (NDC); Grenada United Labor Party (GULP).

Suffrage: Universal at 18.

Economy

GDP: (2006) $408.1 million.

GDP growth rate: (2006) 2.1%.

Per capita GDP: (2006) $3,854.

Inflation: (2006) 3.8%.

Agriculture: Nutmeg, cocoa, bananas, other fruits, vegetables, mace, and fish.

Services: Tourism and education.

Construction: Housing development and tourism renovations.

Trade: (2005) Exports—$39 million (merchandise) and $126 (commercial services). Major markets—European Union (39.4%), United States (23.3%), Saint Lucia (6.3%), Saint Kitts and Nevis (5.2%), and Barbados (4.6%). Imports—$319 million (merchandise) and $93 million (commercial services). Major suppliers—United States (42.6%), Trinidad and Tobago (18.9%), European Union (12.2%), Japan (4.9%), and Barbados (3.3%).

Exchange rate: EC$2.70 = U.S. $1.

Total debt outstanding and disbursed: (2005) $437 million.

PEOPLE

About 89% of Grenada's population is of African descent. An additional 8.2% are of mixed East Indian, African, and/or Caucasian ancestry, reflecting Grenada's history of African slaves, East Indian indentured servants, and European settlers. An additional 2% of the population considers itself East Indian, which includes some descendents of the indentured servants brought to Grenada from 1857 to the 1890s, as well as immigrants arriving from Trinidad and Tobago, Guyana, and Indians since the 1970s. A small community (less than 1% of the population) of the descendants of early European settlers resides in

Grenada. About 50% of Grenada's population is under the age of 30. English is the official language; few people still speak French patois, though there has been a recent resurgence of interest in re-learning the language. A wide range of Christian denominations are present in Grenada, as well as growing number of other religions.

HISTORY

Before the arrival of Europeans, Carib Indians had driven the more peaceful Arawaks from the island. Columbus landed on Grenada in 1498 during his third voyage to the new world. He named the island "Concepcion." The origin of the name "Grenada" is obscure, but it is likely that Spanish sailors renamed the island for the city of Granada. By the beginning of the 18th century, the name "Grenada," or "la Grenade" in French, was in common use.

Partly because of the Caribs, Grenada remained un-colonized for more than 100 years after its discovery; early English efforts to settle the island were unsuccessful. In 1650, a French company founded by Cardinal Richelieu purchased Grenada from the English and established a small settlement. After several skirmishes with the Caribs, the French brought in reinforcements from Martinique and defeated the Caribs.

The island remained under French control until its capture by the British in 1762, during the Seven Years' War. The Treaty of Paris formally ceded Grenada to Great Britain in 1763. Although the French regained control in 1779, the Treaty of Versailles restored the island to Britain in 1783. Britain overcame a pro-French revolt in 1795, and Grenada remained British for the remainder of the colonial period.

During the 18th century, Grenada's economy underwent an important transition. Like much of the rest of the West Indies it was originally settled to cultivate sugar, which was grown on estates using slave labor. But natural disasters paved the way for the introduction of other crops. In 1782, Sir Joseph Banks, the botanical adviser to King George III, introduced nutmeg to Grenada. The island's soil was ideal for growing the spice, and because Grenada was a closer source of spices for Europe than the Dutch East Indies the island assumed a new importance to European traders.

The collapse of the sugar estates and the introduction of nutmeg and cocoa encouraged the development of smaller landholdings, and the island developed a land-owning yeoman farmer class. Slavery was outlawed in 1834. In 1833, Grenada became part of the British Windward Islands Administration.

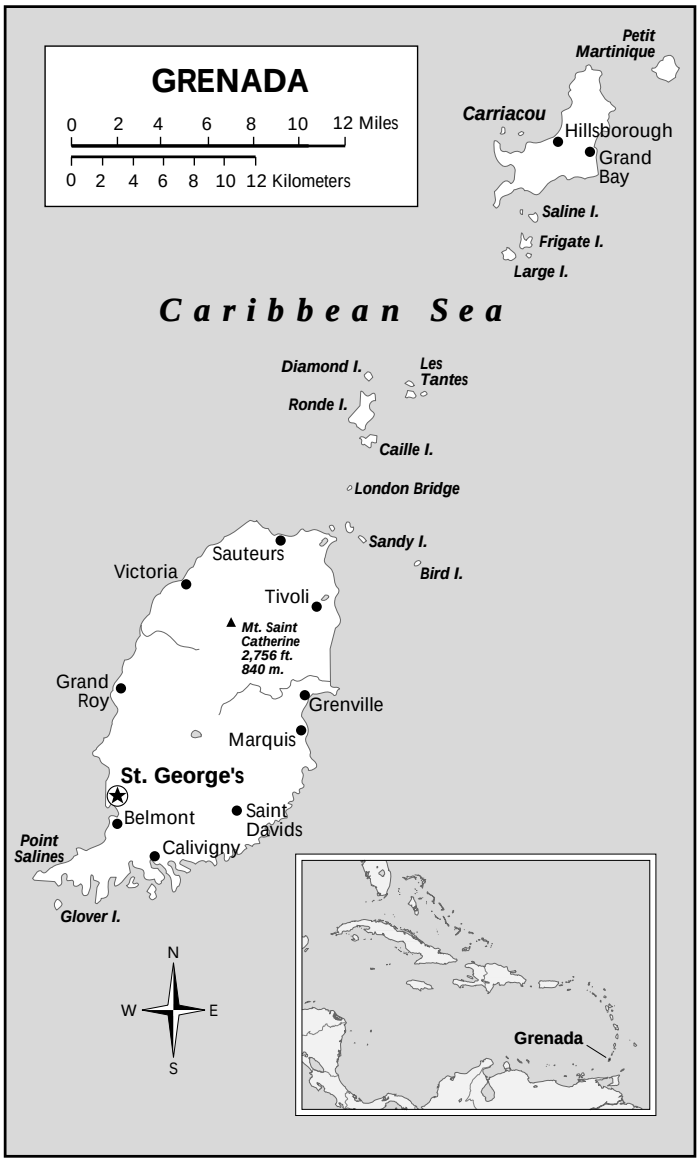
The governor of the Windward Islands administered the island for the rest of the colonial period. In 1958, the Windward Islands Administration was dissolved, and Grenada joined the Federation of the West Indies. After that federation collapsed in 1962, the British Government tried to form a small federation out of its remaining dependencies in the Eastern Caribbean.

Following the failure of this second effort, the British and the islands developed the concept of associated statehood. Under the Associated Statehood Act of 1967, Grenada was granted full autonomy over its internal affairs in March 1967. Full independence was granted on February 7, 1974.

After obtaining independence, Grenada adopted a modified Westminster parliamentary system based on the British model, with a governor general appointed by and representing the British monarch (head of state) and a prime minister who is both leader of the majority party and the head of government. Sir Eric Gairy was Grenada's first Prime Minister.

On March 13, 1979, the New Joint Endeavor for Welfare, Education, and Liberation Movement (New Jewel Movement—NJM), ousted Gairy in a coup and established a People's Revolutionary Government (PRG) headed by Maurice Bishop, who became Prime Minister. His Marxist-Leninist government established close ties with Cuba, the Soviet Union, and other communist bloc countries.

In October 1983, a power struggle within the government resulted in the arrest and execution of Bishop and several members of his cabinet and the killing of dozens of his supporters by elements of the People's Revolutionary Army (PRA).



A U.S.-Caribbean force landed on Grenada on October 25, 1983, in response to an appeal from the Governor General and to a request for assistance from the Organization of Eastern Caribbean States. U.S. citizens were evacuated, and order was restored.

An advisory council named by the Governor General administered the country until general elections were held in December 1984. The New National Party (NNP) led by Herbert Blaize won 14 out of 15 seats in free and fair elections and formed a democratic government. Grenada's constitution had been suspended in 1979 by the PRG, but it was restored after the 1984 elections.

The NNP continued in power until 1989 but with a reduced majority. Five NNP parliamentary members, including two cabinet ministers, left the party in 1986-87 and formed the National Democratic Congress (NDC), which became the official opposition.

In August 1989, Prime Minister Blaize broke with the NNP to form another new party, The National Party (TNP), from the ranks of the NNP. This split in the NNP resulted in the formation of a minority government until constitutionally scheduled elections in March 1990. Prime Minister Blaize died in December 1989 and was succeeded as Prime Minister by Ben Jones until the elections.

The NDC emerged from the 1990 elections as the strongest party, winning seven of the 15 available seats. Nicholas Brathwaite added two TNP

members and one member of the Grenada United Labor Party (GULP) to create a 10-seat majority coalition. The Governor General appointed him to be Prime Minister.

In parliamentary elections on June 20, 1995, the NNP won eight seats and formed a government headed by Keith Mitchell. The NNP maintained and affirmed its hold on power when it took all 15 parliamentary seats in the January 1999 elections.

General elections were held in November 2003; the NNP won 8 of the 15 seats, holding on to power with a much-reduced majority. The National Democratic Congress (NDC) led by Tillman Thomas won 7 seats and is now the official opposition.

Keith Mitchell lost his bid to win an unprecedented fourth term in the July 2008 election. While he won his own seat by a huge margin, only three other NNP candidates were voted in in a very close election. Tillman Thomas led his NDC cohort to an 11 to 4 victory over their long-time rivals. The winners began to organize their government, and Mitchell became the leader of the official opposition.

GOVERNMENT AND POLITICAL CONDITIONS

Grenada is governed under a parliamentary system based on the British model; it has a governor general, a prime minister and a cabinet, and a bicameral parliament with an elected House of Representatives and an appointed Senate.

Citizens enjoy a wide range of civil and political rights guaranteed by the constitution. Grenada's constitution provides citizens with the right to change their government peacefully. Citizens exercise this right through periodic free and fair elections held on the basis of universal suffrage.

The political parties in Grenada are are the New National Party (NNP), which remains moderate; the left of center National Democratic Congress (NDC), which is now made up of some members of the New Jewel Movement (NJM) and the original NDC; the People's Labor Movement (PLM), which is a combination of members of the original NDC and the Maurice Bishop Patriotic Movement (MBPM); and the Grenada United Labor Party (GULP). The National Party (TNP) and MBPM no longer exist. The Good Old Democracy Party (GOD) has only one adherent but contests all elections.

The Truth and Reconciliation Commission (TRC), launched in 2001 to investigate the period between the mid-1970s and the late 1980s, sent its report to the government in May 2006. The long-awaited (and two years overdue) report was only released to the public in mid-September 2006, when the government announced it would implement the TRC's recommendations. However, the government was vague on the details of how or when the recommendations would be implemented and called for additional public input. There has been no further progress.

In February 2007, the Privy Council in London handed down its verdict on the appeal of the group that was con-

victed of murdering Prime Minister Bishop and members of his cabinet in 1983. The "Group of 14" were originally condemned to death, but the sentence was commuted to life in prison. The three triggermen, sentenced to 30 years in prison as they were following orders, were released in December 2006 after serving two-thirds of their original sentence, as per local law. The remainder of the group argued that the original trial was unjust and appealed to the Privy Council to overturn the verdict and sentence. The Privy Council decision, however, only vacated the sentence, on the grounds that the original death sentence was inappropriate. It upheld the convictions of multiple homicides, stripping the group of its political prisoner status. The case was returned to the Grenada Supreme Court for resentencing. The resentencing was heard during the 2007 June Assizes, lasting one week. The court overturned the life sentences. Three of the 13 prisoners were released immediately for time served and the remaining ten are expected to be released in three or four years from the time of resentencing. Some family members of those killed in 1983 were unhappy with the new sentencing as it did not address the whereabouts of the bodies of their loved ones. Accusations of bias against the Barbadian judge arose when it was alleged that he had been a supporter of Maurice Bishop's New Jewel Movement in the 1970s and 1980s. The 800 members of the Royal Grenada Police Force (RGPF), which includes an 80-member paramilitary special services unit (SSU) and a 30-member coast guard, maintain security in Grenada. The U.S. Army and the U.S. Coast Guard provide periodic training and material support for the SSU and the coast guard. The Departments of State and Treasury provide support to the Financial Investigative Unit (FIU).

Permanent Representative to the UN, New York: **Ruth Elizabeth ROUSE**

Grenada maintains an embassy in the United States at 1701 New Hampshire Avenue, NW, Washington, DC 20009 (tel: 202-265-2561).

ECONOMY

The economy of Grenada, based primarily upon services (tourism and education) and agricultural production (nutmeg and cocoa), was brought to a near standstill by Hurricane Ivan on September 7, 2004. Thirty-seven people were killed by the hurricane, and approximately 8,000-10,000 left homeless. Hurricane Ivan damaged or destroyed 90% of the buildings on the island, including some tourist facilities. Overall damage totaled as much as 2.5 times annual GDP. Reconstruction has proceeded quickly, but much work remains. The United States has been the leading donor since the hurricane, with an emergency program of about $45 million aimed at repairing and rebuilding schools, health clinics, community centers, and housing; training several thousand Grenadians in construction and other fields; providing grants to private businesses to speed their recovery; and providing a variety of aid to help Grenada diversify its agriculture and tourism sectors. Despite initial high unemployment in the tourist and other sectors, urban Grenadians have benefited post-hurricane from job opportunities in the surging construction sector. Agricultural workers have not fared as well. Hurricane Ivan destroyed or significantly damaged a large percentage of Grenada's tree crops, and Hurricane Emily further damaged the sector. Complete recovery will take years. However, many hotels, restaurants, and other businesses have reopened. In anticipation of Cricket World Cup matches held on the island in the spring of 2007, many Grenadians renewed their focus on the rebuilding process. Predictions are for an increase in tourism, although Grenada lags behind its neighbors in marketing the island overseas. St. George's University, a large American medical and veterinary school with over 2,000 students, is in full operation.

Grenada is a member of the Eastern Caribbean Currency Union (ECCU). The Eastern Caribbean Central Bank (ECCB) issues a common currency for all members of the ECCU. The ECCB also manages monetary policy, and regulates and supervises commercial banking activities in its member countries.

Grenada is also a member of the Caribbean Community and Common Market (CARICOM). Most goods can be imported into Grenada under open general license, but some goods require specific licenses. Goods that are produced in the Eastern Caribbean receive additional protection; in May 1991, the CARICOM common external tariff (CET) was implemented. The CET aims to facilitate economic growth through intra-regional trade by offering duty-free trade among CARICOM members and duties on goods imported from outside CARICOM. In the spring of 2008, due to dramatic increases in the costs of food and fuel, the government removed the CET from some essential items, including baby formula, yeast, and baking powder.

FOREIGN RELATIONS

The United States, China, Cuba, and Venezuela have embassies in Grenada. Grenada has been recognized by most members of the United Nations and maintains diplomatic missions in the United States, Canada, China, Cuba, Belgium, the United Kingdom, and Venezuela. Grenada withdrew recognition of Taiwan in 2004 and subsequently established relations with the People's Republic of China.

Grenada is a member of the Caribbean Development Bank, CARICOM, the Organization of Eastern Caribbean States (OECS), the Commonwealth of Nations, and the World Trade Organization (WTO). It joined the United Nations in 1974, and then the World Bank, International Monetary Fund, and Organization of American States (OAS) in 1975. Grenada also is a member of the Eastern Caribbean's Regional Security System (RSS).

U.S.-GRENADIAN RELATIONS

The U.S. Government established an Embassy in Grenada in November 1983. The U.S. Ambassador to Grenada is resident in Bridgetown, Barbados. The Embassy in Grenada is staffed by a Chargé d'Affaires who reports to the Ambassador in Bridgetown.

The U.S. Agency for International Development (USAID) played a major role in Grenada's development. In addition to the $45 million emergency aid for reconstruction from Hurricane Ivan, USAID provided more than $120 million in economic assistance from 1984 to 1993. About 25 Peace Corps volunteers in Grenada teach special education, remedial reading, and vocational training and assist with HIV/AIDS work. Grenada receives counter-narcotics assistance from the United States and benefits from U.S. military exercise-related construction and humanitarian civic action projects.

Grenada and the United States cooperate closely in fighting narcotics smuggling and other forms of transnational crime. In 1995, the United States and Grenada signed a maritime law enforcement treaty. In 1996, they signed a mutual legal assistance treaty and an extradition treaty as well as an over-flight/order-to-land amendment to the maritime law enforcement treaty. The United States continues to provide training, equipment, and materiel, including three vehicles in 2006, to Grenadian security and defense forces. Some U.S. military training is provided as well. Grenada continues to be a popular destination for Americans. Of the 98,548 stayover visitors in 2005, 25,181 were U.S. citizens. It is estimated that some 2,600 Americans reside in the country, plus the 2,000 U.S. medical students who study at the St. George's University School of Medicine. (Those students are not counted as residents for statistical purposes.)

TRAVEL

Consular Information Sheet

March 30, 2007

Country Description: Grenada is a developing Caribbean island nation. The capital is St. George's. Tourism facilities vary, according to price and area.

Entry Requirements: For additional information concerning entry/exit requirements, travelers may contact the Embassy of Grenada, 1701 New Hampshire Avenue, N.W., Washington, D.C. 20009, telephone: (202) 265-2561, Fax: (202) 265-2468: e-mail: grenada@oas.org, or the Consulate of Grenada in New York.

Sea travelers must have a valid U.S. passport (or other original proof of U.S. citizenship, such as a certified U.S. birth certificate with a government-issued photo ID).

There is no visa requirement for stays up to three months. There is an airport departure fee of US$20 for adults and US$10 for children between the ages of five and twelve.

Safety and Security: For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Worldwide Caution Travel Alert, Travel

Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Street crime occurs in Grenada. Tourists have been victims of armed robbery especially in isolated areas and thieves frequently steal credit cards, jewelry, U.S. passports and money. Mugging, purse snatching and other robberies may occur in areas near hotels, beaches and restaurants, particularly after dark. Visitors should exercise appropriate caution when walking after dark or when using the local bus system or taxis hired on the road. It is advisable to hire taxis to and from restaurants.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical care is limited. U.S. citizens requiring medical treatment may contact the U.S Embassy in St. George's for a list of local doctors, dentists, pharmacies and hospitals. Serious medical problems requiring hospitalization and/or medical evacuation to the U.S. can cost thousands of dollars. Doctors and hospitals often expect immediate cash payment for health services. Pharmacies are usually well stocked, and prescription medicine is available, but travelers are advised to bring with them sufficient prescription medicine for the length of their stay as occasionally there are temporary shortages of medicines; most pharmacies will check with others in the area to see if they can get what is needed.

Grenada chlorinates its water, making it generally safe to drink. However, during especially heavy rains, quality control can slip, particularly in the city of St. George's. It is recommended that visitors to Grenada request bottled water, which is widely available and relatively inexpensive.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://www.cdc.gov/travel.

For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Grenada is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Traffic moves on the left in Grenada; the majority of vehicles are right hand drive. Grenada's roads, paved and unpaved, are mostly narrow and winding, with many blind corners and narrow or no shoulders. Road surfaces often deteriorate; especially in the rainy season (June –November) before maintenance work begins. Driving conditions in Grenada, including road conditions, increasing numbers of vehicles, and sometimes undisciplined minibus drivers all require caution and reduced speed for safety. The Government of Grenada has a seat belt law; drivers and passengers found not wearing seat belts are subject to a fine of EC$1,000 (US$400). Getting a local temporary drivers license, based on valid U.S. drivers license plus EC$30 (US$12), is highly recommended. In the event of an accident, not having a valid local driver's license may result in a fine, regardless of who is at fault. Rental vehicle companies are widely available; most of them will assist in applying for temporary driving licenses. The adequacy of road signage varies, but is generally poor to nonexistent.

For specific information concerning Grenada driver's permits, road safety, vehicle inspection, road tax and mandatory insurance, please contact the Grenada Board of Tourism in New York at 317 Madison Avenue, Suite 1704, New York, N.Y. 10017, telephone 1-800-927-9554, (212) 599 0301; Fax: 212-573-9731; e-mail: gbt@caribsurf.com or www.grenadagrenadines.com

Visit the website of the country's national tourist office at http://www.grenadagrenadines.com. Additional general information can be found on Grenada's Internet website at: http://www.grenadaconsulate.org.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Grenada's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Grenada's air carrier operations. For more information, travelers may visit the FAA's internet website at http://www.faa.gov.

Special Circumstances: Recovery efforts have been made from the damage caused by Hurricane Ivan in September 2004 and Hurricane Emily in July 2005. All utilities have been

restored. Cruise ships have returned and all the main shopping areas are open. While the majority of hotels are up and running, there is still one major resort (Le Source), which remain closed. The resort's management hopes to have the hotel open by the time Cricket World Cup 2007 Super Eight games take place in Grenada (alternate days April 10-21).

The February 1 merger of Liat and Caribbean Star airlines has reduced the number of daily flights between Grenada and the other Eastern Caribbean islands from six to three. Travelers coming into the region from the U.S. and elsewhere should verify in advance directly with Liat that they have a valid reservation. Some travelers making reservations from outside the region have arrived in the Eastern Caribbean and discovered that the reservation they thought they had on Liat, is not recognized by the airline, resulting in delayed travel as well as additional hotel costs.

Grenada experiences tropical storms during the hurricane season, from June through November. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

It is difficult to cash personal U.S. checks in Grenada. If accepted, they will take approximately six weeks to clear by a local bank. Major credit cards are widely accepted, and ATM facilities are available at most banks. Most hotels and restaurants take U.S. currency; however, change will be in local currency.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Grenada laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Grenada are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Grenada are encouraged to register with the U.S. Embassy through the State Department's travel registration website, and to obtain updated information on travel and security within Grenada. Americans without Internet access may register directly with the U.S. Embassy. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located on the main road to Lance Aux Epines after the Christian Scientist Church, and is approximately 15 minutes from the Point Salines International Airport. Telephone: 1-(473) 444-1173/4/5/6; Fax: 1-(473) 444-4820; Internet e-mail: usemb_gd@caribsurf.com. Embassy hours are 8:00 am to 12:30 pm, Monday to Friday except local and American holidays.

Intercountry Adoption

July 2005

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: If you are not resident or domiciled in Grenada, you may not adopt. Furthermore, no adoption is possible for children who are not resident in Grenada.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The government office responsible for adoptions in Grenada is the Grenada adoption board:

Ministry of Social Services,
Tanteen, St. George's
Grenada.
Tel: (473) 440-6575, (473) 440-8717
Fax: (473) 440-4780

Secretary of the Adoption Board is Ms. Jeanine Sylvester. A free information booklet is supplied on request.

Eligibility Requirements for Adoptive Parents: The government of Grenada requires that the adoptive parent(s) must be age twenty-five or at least twenty-one years older than the child.

Residential Requirements: Grenada requires that applicants for adoption be resident and domiciled in Grenada. The child must also be in the continuous physical care of the applicant for at least three consecutive months immediately preceding the adoption order.

Time Frame: This can vary greatly, depending on the number of cases before the courts. Adoptions can take from three months to a year.

Adoption Agencies and Attorneys: Prospective adopting parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services. For U.S.- based agencies, it is suggested that prospective adopting parents contact the Better Business Bureau and licensing office of the Depart-

ment of Health and Family Services in the state where the agency is located.

Adoption Fees: The cost for adoptions is approximately US $2,000.00, though this can vary depending on the fees charged by the local attorney.

Adoption Procedures: An initial adoption request is done through a local attorney in Grenada. Subject to the provisions of the Grenada Adoption Act, the court may make an order authorizing the applicant to adopt a child upon an application made in the prescribed manner by a person domiciled in Grenada if the applicant:

- Has attained the age of twenty five and is at least twenty one years older than the infant; or
- Has attained the age of twenty one and is a relative of the infant; or
- Is the biological mother or biological father of the infant.

Required Documents: The prospective parents are required to have valid passports, naturalization certificate, marriage certificate, divorce certificate, birth certificate, bank statements, and medical history.

The child will need a valid passport, original birth certificate and naturalization certificate. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://travel.state.gov.

Embassy of Grenada
1701 New Hampshire Avenue, N.W.
Washington, DC 20009
Tel: (202) 265-2561
Email: grenada@oas.org

Grenada Consulate
820 2ND Avenue, Suite 900 D,
New York, N.Y. 10017.
Tel: 212-599-0301

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children,* as well as the Department of State publication, *Intercountry Adoptions.*

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy
Lance Aux Epines Main Road,

Tel: (473) 444-1173;
Fax: (473) 444-4820;
E-mail: usemb_gd@caribsurf.com

Additional Information: Specific questions about adoption in Grenada may be addressed to the U.S. Embassy in Grenada. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4 th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services.

For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Grenada is not a party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between Grenada and the United States dealing with international parental child abduction.

American citizens who travel to Grenada place themselves under the jurisdiction of local courts. American citizens planning a trip to Grenada with dual national children should bear this in mind.

Custody Disputes: In Grenada, if parents are legally married they share the custody of their children.

If they are not married, custody is granted to the mother by law unless there are known facts of inappropriate behavior, mental or social problems. Foreign court orders are not automatically recognized.

Enforcement of Foreign Judgments: Custody orders and judgments of foreign courts are not enforceable in Grenada.

Visitation Rights: In cases where one parent has been granted custody of a child, the other parent is usually granted visitation rights. If a custodial parent fails to allow visitation, the non-custodial parent may appeal to the court.

Dual Nationality: Dual nationality is not recognized under Grenadine law.

Travel Restrictions: No exit visas are required to leave Grenada.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation (FBI).

Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp.ncjrs.org. Persons who wish to pursue a child custody claim in a Grenadian court should retain an attorney in Grenada.

The U.S. Embassy in Grenada maintains a list of attorneys willing to rep-

resent American clients. A copy of this list may be obtained by requesting one from the Embassy at:

U.S. Embassy St. George's
Consular Section
P O Box 54
St. George's
Grenada
Tel: 473-444-1173
e-mail: usemb_gd@caribsurf.com

Questions involving Grenadian law should be addressed to a Grenadian attorney or to the Embassy of Grenada in the United States at:

Embassy of Grenada
1701 New Hampshire Avenue, NW
Washington, DC 20009
Telephone: (202) 265-2561

For answers to general questions, please contact the Overseas Citizens Services Hotline at the toll-free number, 1-888-407-4747, which is available from 8:00AM through 8:00PM Eastern Standard Time, Monday through Friday (except U.S. holidays).

Callers who are unable to use the toll-free number, such as those calling from overseas, may obtain information and assistance during the hours by calling 1-202-501-4444.

GUATEMALA

Compiled from the August 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Guatemala

PROFILE

Geography

Area: 108,890 sq. km. (42,042 sq. mi.); about the size of Tennessee.
Cities: Capital—Guatemala City (metro area pop. 2.5 million). Other major cities—Quetzaltenango, Escuintla.
Terrain: Mountainous, with fertile coastal plain.
Climate: Temperate in highlands; tropical on coasts.

People

Nationality: Noun and adjective—Guatemalan(s).
Population: (2008 est.) 13.6 million.
Annual population growth rate: (2006 est.) 2.4%.
Ethnic groups: Mestizo (mixed Spanish-Indian), indigenous.
Religions: Roman Catholic, Protestant, traditional Mayan.
Languages: Spanish, 24 indigenous languages (principally Kiche, Kaqchikel, Q'eqchi, and Mam).
Education: Years compulsory—6. Attendance—41%. Literacy—70.6%.
Health: Infant mortality rate (2005)—32/1,000. Life expectancy (2005)—69 yrs.
Work force: Services—40%; industry and commerce—37%; agriculture—15%; construction, mining, utilities—4%. Fifty percent of the population engages in some form of agriculture, often at the subsistence level outside the monetized economy.

Government

Type: Constitutional democratic republic.
Constitution: May 1985; amended November 1993.
Independence: September 15, 1821.
Government branches: Executive—president (4-year term; 1 term limit). Legislative—unicameral 158-member Congress (4-year term). Judicial—13-member Supreme Court of Justice (5-year term).
Political subdivisions: 22 departments (appointed governors); 331 municipalities with elected mayors and city councils.
Political parties: National Union for Hope (UNE), Grand National Alliance (GANA), Patriot Party (PP), Guatemalan Republican Front (FRG), National Advancement Party (PAN), Unionists (Unionistas), Encounter for Guatemala (EG).
Suffrage: Universal for adults 18 and over who are not serving on active duty with the armed forces or police. A variety of procedural obstacles have historically reduced participation by poor, rural, and indigenous people, but implementation in 2007 of voting reform legislation nearly doubled the number of voting tables, resulting in higher participation in rural areas, including among indigenous people.

Economy

Real GDP: (2007 est.) $24.16 billion.
Real GDP growth: (2007 est.) 5.7%.
Per capita GDP PPP: (2007 est.) $4,571.
Natural resources: Oil, timber, nickel, gold.
Agriculture: (13.3% of GDP) Products—coffee, sugar, bananas, cardamom, vegetables, flowers and plants, timber, rice, rubber.
Manufacturing: (18.5% of GDP) Types—prepared food, clothing and textiles, construction materials, tires, pharmaceuticals.
Trade: (2007) Exports—$6.9 billion: coffee, bananas, sugar, crude oil, chemical products, clothing and textiles, vegetables. Major markets—U.S. 42.3%, Central American Common Market (CACM) 28.3%, Mexico 6.7%. Imports—$13.5 billion: machinery and equipment, fuels, mineral products, chemical products, vehicles and transport materials, plastic materials and products. Major suppliers—U.S. 34.2%, CACM 10.2%, Mexico 8.7%, China 5.7%.

PEOPLE

More than half of Guatemalans are descendants of indigenous Mayan peoples. Westernized Mayans and mestizos (mixed European and indigenous ancestry) are known as Ladinos. Most of Guatemala's population is rural, though urbanization is accelerating. The predominant religion is Roman Catholicism, into which many indigenous Guatemalans have incorporated traditional forms of worship. Protestantism and traditional Mayan religions are practiced by an estimated 40% and 1% of the population, respectively. Though the official language is Spanish, it is not universally understood among the indigenous population. The peace accords signed in December 1996 provide for the translation of some official documents and voting materials into several indigenous languages.

HISTORY

The Mayan civilization flourished throughout much of Guatemala and the surrounding region long before the Spanish arrived, but it was already in decline when the Mayans were defeated by Pedro de Alvarado in 1523-24. The first colonial capital, Ciudad Vieja, was ruined by floods and an earthquake in 1542. Survivors founded Antigua, the second capital, in 1543. Antigua was destroyed by two earthquakes in 1773. The remnants of its Spanish colonial architecture have been preserved as a national monument. The third capital, Guatemala City, was founded in 1776.

Guatemala gained independence from Spain on September 15, 1821; it briefly became part of the Mexican Empire, and then for a period belonged to a federation called the United Provinces of Central America. From the mid-19th century until the mid-1980s, the country passed through a series of dictatorships, insurgencies (particularly beginning in the 1960s), coups, and stretches of military rule with only occasional periods of representative government.

1944 to 1986

In 1944, Gen. Jorge Ubico's dictatorship was overthrown by the "October Revolutionaries," a group of dissident military officers, students, and liberal professionals. A civilian President, Juan Jose Arevalo, was elected in 1945 and held the presidency until 1951. Social reforms initiated by Arevalo were continued by his successor, Col. Jacobo Arbenz. Arbenz permitted the communist Guatemalan Labor Party to gain legal status in 1952. The army refused to defend the Arbenz government when a U.S.-backed group led by Col. Carlos Castillo Armas invaded the country from Honduras in 1954 and quickly took over the government. Gen. Miguel Ydigoras Fuentes took power in 1958 following the murder of Colonel Castillo Armas.

In response to the increasingly autocratic rule of Ydigoras Fuentes, a group of junior military officers revolted in 1960. When they failed, several went into hiding and established close ties with Cuba. This group became the nucleus of the forces that were in armed insurrection against the government for the next 36 years. Four principal left-wing guerrilla groups—the Guerrilla Army of the Poor (EGP), the Revolutionary Organization of Armed People (ORPA), the Rebel Armed Forces (FAR), and the Guatemalan Labor Party (PGT)—conducted economic sabotage and targeted government installations and members of government security forces in armed attacks. These organizations combined to form the Guatemalan National Revolutionary Unity (URNG) in 1982.

Shortly after President Julio Cesar Mendez Montenegro took office in 1966, the army launched a major counterinsurgency campaign that largely broke up the guerrilla movement in the countryside. The guerrillas then concentrated their attacks in Guatemala City, where they assassinated many leading figures, including U.S. Ambassador John Gordon Mein in 1968. Between 1966 and 1982, there was a series of military or military-dominated governments.

On March 23, 1982, army troops commanded by junior officers staged a coup to prevent the assumption of power by Gen. Angel Anibal Guevara, the hand-picked candidate of outgoing President and Gen. Romeo Lucas Garcia. They denounced Guevara's electoral victory as fraudulent. The coup leaders asked retired Gen. Efrain Rios Montt to negotiate the departure of Lucas and Guevara.

Rios Montt was at this time a lay pastor in the evangelical protestant "Church of the Word." He formed a three-member military junta that annulled the 1965 constitution, dissolved Congress, suspended political parties, and canceled the electoral law. After a few months, Rios Montt dismissed his junta colleagues and assumed the de facto title of "President of the Republic."

Guerrilla forces and their leftist allies denounced Rios Montt. Rios Montt sought to defeat the guerrillas with military actions and economic reforms; in his words, "rifles and beans." The government began to form local civilian defense patrols (PACs). Participation was in theory voluntary, but in reality, many Guatemalans, especially in the heavily indigenous northwest, had no choice but to join either the PACs or the guerrillas. Rios Montt's conscript army and PACs recaptured essentially all guerrilla territory—guerrilla activity lessened and was largely limited to hit-and-run operations. However, Rios Montt won this partial victory at an enormous cost in civilian deaths, in what was probably the most violent period of the 36-year internal conflict, resulting in about 200,000 deaths of mostly unarmed indigenous civilians.

On August 8, 1983, Rios Montt was deposed by his own Minister of Defense, Gen. Oscar Humberto Mejia Victores, who succeeded him as de facto President of Guatemala. Rios Montt survived to found a political party (the Guatemalan Republic Front) and to be elected President of Congress in 1995 and 2000. Awareness in the United States of the conflict in Guatemala, and its ethnic dimension, increased with the 1983

publication of the book I, Rigoberta Menchu, An Indian Woman in Guatemala.

General Mejia allowed a managed return to democracy in Guatemala, starting with a July 1, 1984 election for a Constituent Assembly to draft a democratic constitution. On May 30, 1985, after 9 months of debate, the Constituent Assembly finished drafting a new constitution, which took effect immediately. Vinicio Cerezo, a civilian politician and the presidential candidate of the Christian Democracy Party, won the first election held under the new constitution with almost 70% of the vote, and took office on January 14, 1986.

1986 to 2007

Upon its inauguration in January 1986, President Cerezo's civilian government announced that its top priorities would be to end the political violence and establish the rule of law. Reforms included new laws of habeas corpus and amparo (court-ordered protection), the creation of a legislative human rights committee, and the establishment in 1987 of the Office of Human Rights Ombudsman. Cerezo survived coup attempts in 1988 and 1989, and the final 2 years of Cerezo's government were also marked by a

failing economy, strikes, protest marches, and allegations of widespread corruption.

Presidential and congressional elections were held on November 11, 1990. After a runoff ballot, Jorge Serrano was inaugurated on January 14, 1991, thus completing the first transition from one democratically elected civilian government to another.

The Serrano administration's record was mixed. It had some success in consolidating civilian control over the army, replacing a number of senior officers and persuading the military to participate in peace talks with the URNG. Serrano took the politically unpopular step of recognizing the sovereignty of Belize. The Serrano government reversed the economic slide it inherited, reducing inflation and boosting real growth.

On May 25, 1993, Serrano illegally dissolved Congress and the Supreme Court and tried to restrict civil freedoms, allegedly to fight corruption. The "autogolpe" (or self-initiated coup) failed due to unified, strong protests by most elements of Guatemalan society, international pressure, and the army's enforcement of the decisions of the Court of Constitutionality, which ruled against the attempted takeover. Serrano fled the country.

On June 5, 1993, the Congress, pursuant to the 1985 constitution, elected the Human Rights Ombudsman, Ramiro De Leon Carpio, to complete Serrano's presidential term. De Leon, not a member of any political party and lacking a political base but with strong popular support, launched an ambitious anticorruption campaign to "purify" Congress and the Supreme Court, demanding the resignations of all members of the two bodies.

Despite considerable congressional resistance, presidential and popular pressure led to a November 1993 agreement brokered by the Catholic Church between the administration and Congress. This package of constitutional reforms was approved by popular referendum on January 30, 1994. In August 1994, a new Congress was elected to complete the unexpired term.

Under De Leon, the peace process, now brokered by the United Nations, took on new life. The government and the URNG signed agreements on human rights (March 1994), resettlement of displaced persons (June 1994), historical clarification (June 1994), and indigenous rights (March 1995). They also made significant progress on a socioeconomic and agrarian agreement.

National elections for president, the Congress, and municipal offices were held in November 1995. With almost 20 parties competing in the first round, the presidential election came down to a January 7, 1996 runoff in which National Advancement Party (PAN) candidate Alvaro Arzu defeated Alfonso Portillo of the Guatemalan Republican Front (FRG) by just over 2% of the vote. Under the Arzu administration, peace negotiations were concluded, and the government signed peace accords ending the 36-year internal conflict in December 1996. The human rights situation also improved during Arzu's tenure, and steps were taken to reduce the influence of the military in national affairs.

In a December 1999 presidential runoff, Alfonso Portillo (FRG) won 68% of the vote to 32% for Oscar Berger (PAN). Portillo's impressive electoral triumph, with two-thirds of the vote in the second round, gave him a claim to a mandate from the people to carry out his reform program. In February 2004, Portillo fled to Mexico to escape corruption charges.

Oscar Berger of the Grand National Alliance (GANA) party won the November 9, 2003 presidential election, receiving 54.1% of the vote. His opponent, Alvarado Colom Caballeros of the National Unity for Hope (UNE) party, received 45.9% of the vote.

Álvaro Colom of the National Unity for Hope (UNE) party won the November 4, 2007 presidential election against retired General Otto Perez Molina with 52.8% of the vote versus 47.2%.

GOVERNMENT

Guatemala's 1985 constitution provides for a separation of powers among the executive, legislative, and judicial branches of government. The 1993 constitutional reforms included an increase in the number of Supreme Court justices from 9 to 13. The reforms reduced the terms of office for president, vice president, and congressional representatives from 5 years to 4 years, and for Supreme Court justices from 6 years to 5 years; they increased the terms of mayors and city councils from 2-1/2 years to 4 years.

The president and vice president are directly elected through universal suffrage and limited to one term. A vice president can run for president after 4 years out of office. Supreme Court justices are elected by the Congress from a list submitted by the bar association, law school deans, a university rector, and appellate judges. The Supreme Court and local courts handle civil and criminal cases. There also is a separate Constitutional Court.

Guatemala has 22 administrative subdivisions (departments) administered by governors appointed by the president. Guatemala City and 331 other municipalities are governed by popularly elected mayors or councils.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Alvaro COLOM Caballeros**
Vice Pres.: **Rafael ESPADA**
Min. of Agriculture: **Julio Recinos SALAS**
Min. of Communication & Public Works: **Luis Alfredo ALEJOS Olivero**
Min. of Culture & Sports: **Geronimo LANCERIO**
Min. of Defense: **Marco Tulio GARCIA Franco, Brig. Gen.**
Min. of Economy: **Romulo CABALLEROS**

Min. of Education: **Ana Francisca Ordonez DE MOLINA**
Min. of Energy & Mines: **Carlos Ivan MEANY Valerio**
Min. of Environment & Natural Resources: **Luis Alberto FERRATE Feliche**
Min. of External Relations: **Haroldo RODAS Melgar**
Min. of Finance: **Juan Alberto FUENTES Knight**
Min. of Government: **Francisco Jose JIMENEZ Irungaray**
Min. of Labor: **Edgar RODRIGUEZ**
Min. of Public Health & Social Assistance: **Celso David CEREZO Mulet**
Attorney Gen.: **Jose Amilcar VELASQUEZ Zarate**
Solicitor Gen.: **Luis Alfonso ROSALES**
Sec. Gen. of the Presidency: **Jorge Raul ARROYAVE Reyes**
Pres., Bank of Guatemala: **Maria Antonieta del Cid de BONILLA**
Ambassador to the US: **Francisco VILLAGRAN de Leon**
Permanent Representative to the UN, New York: **Gert ROSENTHAL Koenigsberger**

The Guatemalan embassy is located at 2220 R Street, NW, Washington, DC 20008 (tel. 202-745-4952; email: INFO@Guatemala-Embassy.org). Consulates are in Washington, New York, Miami, Chicago, Houston, San Francisco, Denver, and Los Angeles, and honorary consuls in Montgomery, San Diego, Ft. Lauderdale, Atlanta, Leavenworth, Lafayette, New Orleans, Minneapolis, Philadelphia, Pittsburgh, San Juan, Providence, Memphis, San Antonio, and Seattle.

POLITICAL CONDITIONS

Congressional, municipal, and first-round presidential elections took place on September 9, 2007. The final round of presidential elections took place on November 4, 2007. Inauguration for the new president and the new Congress took place on January 14, 2008.

Common and violent crime, aggravated by a legacy of violence and vigilante justice, presents a serious challenge. Impunity remained a major problem, primarily because democratic institutions, including those responsible for the administration of justice, have developed only a limited capacity to cope with this legacy. Guatemala's judiciary is independent; however, it suffers from inefficiency, corruption, and intimidation.

In early December 2006, the government and the UN agreed to the creation of the joint International Commission Against Impunity in Guatemala (CICIG). On August 1, 2007, the Guatemalan Congress approved the agreement, and on January 11, 2008, Guatemala and the United Nations inaugurated the work of CICIG. An earlier Guatemala-UN agreement was ruled unconstitutional in 2004 before it was acted upon by the Guatemalan Congress. The UN Verification Mission in Guatemala (MINUGUA) ceased its 10-year project of monitoring peace accord implementation and human rights problems in November 2004 with UN Secretary General Kofi Annan declaring Guatemala had made "enormous progress in managing the country's problems through dialogue and institutions."

ECONOMY

After the signing of the final peace accord in December 1996, Guatemala was well-positioned for rapid economic growth over the next several years, until a financial crisis in 1998 disrupted the course of improvement. The subsequent collapse of coffee prices left what was once the country's leading export sector in depression and had a severe impact on rural incomes. On a more positive note, Guatemala's macroeconomic management is sound and its foreign debt levels are modest. The Berger administration (2004-2007) made promotion of foreign investment and competitiveness a priority and implemented a series of reforms to improve transparency, combat corruption, and spur economic growth. As a result of the reforms and implementation of the U.S.-Central America Free Trade Agreement (CAFTA), foreign direct investment (FDI) inflows increased from $591.6 million in 2006 to $723.5 million in 2007.

Guatemala's economy is dominated by the private sector, which generates about 90% of GDP. Agriculture contributes 13.3% of GDP and accounts for 24% of exports. Most manufacturing is light assembly and food processing, geared to the domestic, U.S., and Central American markets. Over the past several years, tourism and exports of textiles, apparel, and non-traditional agricultural products such as winter vegetables, fruit, and cut flowers have boomed, while more traditional exports such as sugar, bananas, and coffee continue to represent a large share of the export market.

The United States is the country's largest trading partner, providing 34.2% of Guatemala's imports and receiving 42.3% of its exports. The government's involvement is small, with its business activities limited to public utilities—some of which have been privatized—ports and airports, and several development-oriented financial institutions.

Guatemala ratified the U.S.-Central America Free Trade Agreement, commonly known as CAFTA, on March 10, 2005, and the agreement entered into force between Guatemala and the U.S. on July 1, 2006. CAFTA eliminates customs tariffs on as many categories of goods as possible; opens services sectors; and creates clear and readily enforceable rules in areas such as investment, government procurement, intellectual property protection, customs procedures, electronic commerce, the use of sanitary and phyto-sanitary measures to protect public health, and resolution of business disputes.

Other priorities include increasing transparency and accountability in Guatemala's public finances, broadening the tax base, and completing implementation of financial sector reforms. These measures attempt to ensure that Guatemala can comply with the standards of the international Financial Action Task Force for detecting and preventing money laundering.

The United States, along with other donor countries—especially France,

Italy, Spain, Germany, and Japan—and the international financial institutions, have increased development project financing since the signing of the peace accords. However, donor support remains contingent upon Guatemalan Government reforms and counterpart financing.

According to the World Bank, Guatemala has one of the most unequal income distributions in the hemisphere. The wealthiest 10% of the population receives almost one-half of all income; the top 20% receives two-thirds of all income. As a result, about 32% of the population lives on less than $2 a day and 13.5% on less than $1 a day. Guatemala's social development indicators, such as infant mortality and illiteracy, are among the worst in the hemisphere. The United States has provided disaster assistance and food aid in response to natural disasters including Hurricane Stan, which caused extensive mudslides in Guatemala in October 2005.

NATIONAL SECURITY

Guatemala is a signatory to the Rio Pact and is a member of the Conference of Central American Armed Forces (CFAC). Guatemala has deployed its troops to UN peacekeeping operations in Haiti and the Congo and has observers in several other locations. The president is commander in chief. The defense minister is responsible for policy. Day-to-day operations are the responsibility of the military chief of staff and the national defense staff.

An agreement signed in September 1996, which is one of the substantive peace accords, mandated that the mission of the armed forces change to focus exclusively on external threats. However, Presidents Berger, Portillo, and Arzu used a constitutional clause to order the army to temporarily support the police in response to a nationwide wave of violent crime.

The accord calls for a one-third reduction in the army's authorized strength and budget—achieved under President Berger—and for a constitutional amendment to permit the appointment of a civilian Minister of Defense. A constitutional amendment to this end was defeated as part of a May 1999 plebiscite, but discussions on how to achieve this objective continue between the executive and legislative branches.

The army has gone beyond its accord-mandated target of reducing its strength to 28,000 troops, and numbered 15,500 troops as of August 2008. Not only was this the most profound transformation of any Central American military in the last 50 years, it also illustrates the effective control the civilian government has over the military. President Berger tasked the Defense Ministry with increasing the professional skills of all soldiers. As part of the army downsizing, the operational structure of 19 military zones and three strategic brigades were recast as several military zones were eliminated and their area of operations absorbed by others. The air force operates three air bases; the navy has two port bases. Additionally, recent steps have been taken to redefine the military's mission—the military doctrine has been rewritten, and there has been an increase in cooperation with civil society to help bring about this reform.

FOREIGN RELATIONS

Guatemala's major diplomatic interests are regional security and, increasingly, regional development and economic integration. Guatemala participates in several regional groups, particularly those related to trade and the environment. The Council of Central American Ministers of Trade meets on a regular basis to work on regional approaches to trade issues. The council signed a Trade and Investment Framework Agreement (TIFA) with the U.S. in 1998, and was part of the negotiations that led to the creation of CAFTA. Guatemala joined Honduras and El Salvador in signing a free trade agreement with Mexico in 2000, which went into effect the following year. Guatemala also originated the idea for, and is the seat of, the Central American Parliament (PARLACEN). The U.S and Central American countries signed the CONCAUSA (Conjunto Centroamerica-USA) agreement at the Summit of the Americas in December 1994. CONCAUSA is a cooperative plan of action to promote clean, efficient energy use; conserve the region's biodiversity; strengthen legal and institutional frameworks and compliance mechanisms; and improve and harmonize environmental protection standards.

Guatemala has a long-standing claim to a large portion of Belize; the territorial dispute caused problems with the United Kingdom and later with Belize following its 1981 independence from the U.K. In December 1989, Guatemala sponsored Belize for permanent observer status in the Organization of American States (OAS). In September 1991, Guatemala recognized Belize's independence and established diplomatic ties, while acknowledging that the boundaries remained in dispute. In anticipation of an effort to bring the border dispute to an end in early 1996, the Guatemalan Congress ratified two long-pending international agreements governing frontier issues and maritime rights. In 2001, Guatemala and Belize agreed to a facilitation process led by the OAS to determine the land and maritime borders separating the two countries. National elections in Guatemala put a temporary halt to progress, but discussions resumed in November 2005. After being named Foreign Minister in January 2008, Haroldo Rodas made clear his intention to reinvigorate discussions with Belize, and the two countries agreed in principle to seek international arbitration under the auspices of the International Court of Justice at the Hague.

U.S.-GUATEMALAN RELATIONS

Relations between the United States and Guatemala traditionally have been close, although at times strained

by human rights and civil/military issues. U.S. policy objectives in Guatemala include:

- Supporting the institutionalization of democracy and implementation of the peace accords;
- Encouraging respect for human rights and the rule of law, and implementation of the International Commission Against Impunity in Guatemala (CICIG);
- Supporting broad-based economic growth and sustainable development and maintaining mutually beneficial trade and commercial relations, including ensuring that benefits of CAFTA-DR reach all sectors of the Guatemalan populace;
- Cooperating to combat money laundering, corruption, narcotics trafficking, alien-smuggling, and other transnational crime; and
- Supporting Central American integration through support for resolution of border/territorial disputes.

The United States, as a member of "the Friends of Guatemala," along with Colombia, Mexico, Spain, Norway, and Venezuela, played an important role in the UN-moderated peace accords, providing public and behind-the-scenes support.

The U.S. strongly supports the six substantive and three procedural accords, which, along with the signing of the December 29, 1996 final accord, form the blueprint for profound political, economic, and social change. To that end, the U.S. Government has committed over $500 million to support peace implementation since 1997.

Violent criminal activity continues to be a problem in Guatemala, including murder, rape, and armed assaults against persons of all nationalities. In recent years the number of violent crimes reported by U.S. citizens has steadily increased, though the number of Americans traveling to Guatemala has also increased. Most U.S. assistance to Guatemala is provided through the U.S. Agency for International Development's (USAID) offices for Guatemala. USAID/Guatemala's current program builds on the gains of the peace process that followed the signing of the peace accords in December 1996, as well as on the achievements of its 1997-2004 peace program.

The current program works to advance U.S. foreign policy objectives by focusing on Guatemala's potential as Central America's largest economy and trading partner of the United States, but also recognizes the country's lagging social indicators and high rate of poverty.

The three areas of focus for USAID/Guatemala's program are modeled after the Millennium Challenge Account areas—ruling justly, economic freedom, and investing in people, and are as follows:

More responsive, transparent governance, through:

- Strengthened justice; and
- Greater transparency and accountability of governments.

Open, diversified and expanding economies, through:

- Laws, policies, and regulations that promote trade and investment;
- More competitive, market-oriented private enterprises; and
- Broader access to financial markets and services.

Healthier, better educated people, through:

- Increased and improved quality of social sector (health and education) investments; and
- Increased use of quality maternal-child and reproductive health services, particularly in rural areas.

TRAVEL

Consular Information Sheet

October 12, 2007

Country Description: Guatemala has a developing economy, characterized by wide income disparities. Hotels and other tourist facilities in the principal tourist sites most frequented by visitors from the United States are generally good to excellent. A peace accord, signed in 1996, ended a 36-year armed conflict. Violent crime, however, is a serious concern due to endemic poverty, an abundance of weapons, a legacy of societal violence, and dysfunctional law enforcement and judicial systems.

Entry Requirements: A valid U.S. passport is required for all U.S. citizens, regardless of age, to enter Guatemala and to depart Guatemala for return to the U.S. Even if dual nationals are permitted to enter Guatemala on a second nationality passport, U.S. citizens returning to the United States from Guatemala are not allowed to board their flights without a valid U.S. passport. Certificates of Naturalization, birth certificates, driver's licenses, and photocopies are not accepted by Guatemalan authorities as alternative travel documents. While in Guatemala, U.S. citizens should carry their passports, or a photocopy of their passports, with them at all times.

An exit tax must be paid when departing Guatemala by air. The exit tax (currently $30) is generally included in an airline ticket price, but may be charged separately. There is an additional airport security fee (20 Quetzales, approximately $2.50) that all travelers must pay at the airport.

Minors under 18 traveling with a valid U.S. passport need no special permission from their parents to enter or leave Guatemala. U.S. citizens do not need a visa for a stay of 90 days or less (that period can be extended for an additional 180 days upon application to Guatemalan immigration). A U.S. citizen whose passport is lost or stolen in Guatemala must obtain a new passport at the U.S. Embassy as soon as possible and present it, together with a police report of the loss or theft, to the Dirección de Migración (Guatemalan immigration agency), Sub-director de Control Migratorio (Sub-director for Migratory Control), to obtain permission to depart Guatemala. The agency is located in Guatemala City at 6 Avenida 3-11, Zone 4, Guatemala City. Office hours are weekdays from 8:00 a.m. to 4:00 p.m.; telephone 2411-2411. No fee is charged by Guatemalan immigration for this service.

In June 2006, Guatemala entered a "Central America-4 (CA-4) Border Control Agreement" with El Salvador, Honduras, and Nicaragua. Under the terms of the agreement, citizens of the four countries may travel freely across land borders from one of the countries to any of the others without completing entry and exit formalities at Immigration checkpoints. U.S. citizens and other eligible foreign nationals, who legally enter any of the four countries, may similarly travel among the four without obtaining additional visas or tourist entry permits for the other three countries. Immigration officials at the first port of entry determine the length of stay, up to a maximum period of 90 days. Foreign tourists who wish to remain in the region beyond the period initially granted for their visit are required to request a one-time extension of stay from local Immigration authorities in the country where the traveler is physically present, or travel outside the CA-4 countries and reapply for admission to the region. Foreigners "expelled" from any of the four countries are excluded from the entire "CA-4" region. In isolated cases, the lack of clarity in the implementing details of the CA-4 Border Control Agreement has caused temporary inconvenience to travelers.

For further information regarding entry, exit and customs requirements, travelers should contact the Guatemalan Embassy at 2220 R Street NW, Washington, DC 20008; telephone (202) 745-4952, extension 102; fax (202) 745-1908; email at info@guatemala-embassy.org or contact the nearest Guatemalan consulate (Chicago, Denver, Houston, Los Angeles, Miami, New York, or San Francisco).

Safety and Security: Violent criminal activity continues to be a problem in Guatemala, including murder, rape, and armed assaults against foreigners. The police force is inexperienced and under-funded, and the judicial system is weak, overworked, and inefficient. Well-armed criminals know there is little chance they will be caught or punished. Traditionally, Guatemala experiences increases in crime before and during the Christmas and Easter holiday seasons.

Large demonstrations occur throughout Guatemala, often with little or no notice, and can cause serious traffic disruptions. Although most demonstrations are peaceful, they can turn violent, and travelers should avoid areas where demonstrations are taking place. The use of roadblocks and/or blocking of public facilities, including the international airport, has increased and demonstrators may prevent tourists caught behind the blockades from leaving. In 2007 particularly virulent rumors of child stealing and of murder for organ harvesting have been reported in several different areas of Guatemala frequented by American tourists. This year numerous Guatemalan citizens have been lynched for suspicion of child stealing, and three local women who allegedly facilitated foreign adoptions were attacked by a mob that accused them of kidnapping and killing a girl whose mutilated remains were found near Camotan, Chiquimula (near the Honduran border on the main road leading to the Copan Mayan ruins). In reaction to unconfirmed reports of babies being kidnapped in the El Golfete area of the Rio Dulce (near Livingston, Izabal), residents of small villages in the

area remain mobilized and suspicious of all outsiders, including foreigners. Also in 2007, two foreigners (including an American citizen) and a Guatemalan kayaking on a river near Chicaman, Quiche were accused of stealing children and seized by a mob estimated at 500 persons. Although threatened, the individuals were not physically attacked. The incident occurred after the group talked and joked with a local boy on the river bank. In Sayaxche, Petén, child stealing rumors escalated into mob action against a Guatemalan couple believed to be involved in child stealing. The husband was beaten and burned to death, and the wife threatened, but eventually turned over to the police. A local American resident was also seized and threatened with death when he tried to intervene with the mob. A family of American tourists, along with several Guatemalan motorists, was held overnight at a road blockade in the same area for possible use as human shields. Mobs have also targeted police, resulting in delayed or ineffective responses by law enforcement.

Due to uncontrolled drug and alien smuggling, the Guatemalan border with Mexico is a relatively high-risk area, in particular in the northern Peten Department. The most dangerous area in that region is on the northwestern border in the area that includes the Sierra de Lacandon and Laguna del Tigre National Parks. Extra precautions are required when U.S. Government personnel travel to the region.

The following recommendations will help residents and visitors alike to increase their safety:

- Avoid gatherings of agitated people. Frustration over crime and a lack of appropriate judicial remedies has led to violent incidents of vigilantism, including lynchings, especially in more isolated, rural areas. Attempting to intervene may put you at risk of attacks from mobs.

- Avoid close contact with children, including taking photographs, especially in rural areas. Such contact can be viewed with deep alarm and may provoke panic and violence.

- Keep informed of possible demonstrations by following the local news and consulting hotel personnel and tour guides. Avoid areas where demonstrations are occurring.

- Beware of strong currents, riptides, and undertow along Guatemala's Pacific Coast beaches. They pose a serious threat to even the strongest swimmers. Signs warning of treacherous surf are rare and confined mostly to private beaches owned by hotels. Lifeguards are rarely present on beaches.

Tourists planning to climb Pacaya and Agua volcanoes during Guatemala's rainy season (May through October) should plan their climb for the morning hours, when it is less likely that thunderstorms will occur. Climbers should monitor the weather situation and return to the base of the volcano as quickly as safely possible if thunderstorms gather. In 2003, a Canadian tourist was killed by lightning while climbing Pacaya. INGUAT, the Guatemalan Tourist Institute, has organized an active community-based tourism program in San Vicente Pacaya to minimize the risk of armed robbery on Pacaya. Climbing in groups is still highly advisable for any volcano climb to reduce the risk of assault.

Security escorts for tourist groups and security information are available from the Tourist Assistance Office of INGUAT (the Guatemalan Tourist Institute) at 7a Avenida 1-17, Zona 4 Centro Cívico, Ciudad de Guatemala. INGUAT's ASISTUR division has 24 hour/seven days per week direct telephone numbers for tourist assistance and emergencies, which are (502) 2421-2810 and (502) 5578-9836 and the fax is (502) 2421-2891. ASISTUR also maintains regional offices in all major tourist destinations in Guatemala, and the regional delegates provide rapid and appropriate assistance to crime and accident victims. INGUAT may be reached by its toll free number within the United States at 1-888- 464-8281. You may also simply dial 1500 in Guatemala to reach INGUAT Tourist Assistance. The e-mail address is asistur@inguat.gob.gt. Travelers may also wish to visit INGUAT's web site at http://visitguatemala.com. Tourist groups are advised to request security escorts from INGUAT, Attention: Coordinator of the National Tourist Assistance Program. There have been no incidents of armed robbery of groups escorted through the Tourist Protection Program. The request should be submitted by mail, fax or e-mail and should arrive at INGUAT at least three business days in advance of the proposed travel, giving the itinerary, names of travelers, and model and color of vehicle in which they will be traveling. Travelers should be aware that INGUAT might not be able to accommodate all requests.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The number of violent crimes reported by U.S. citizens and other foreigners has remained high in recent years. Incidents include, but are not limited to, assault, theft, armed robbery, carjacking, rape, kidnapping, and murder. Criminals often operate in groups of four or more and are confrontational and violent. Gangs are a growing concern in Guatemala City and rural Guatemala. Gang members are often well armed with sophisticated weaponry and they sometimes use massive amounts of force. Emboldened armed robbers have attacked vehicles on main roads in broad daylight. Travel on rural roads always increases the risk of a criminal roadblock or ambush. Widespread narcotics and alien smuggling activities can make

remote areas especially dangerous. Though there is no evidence that Americans are particularly targeted, criminals look for every opportunity to attack, so all travelers should remain constantly vigilant.

Most tourists and visitors travel throughout Guatemala without mishap. However, violent criminal activity on the highways continues, and tourists, among others, have been targeted. Many of the robbery attempts have occurred in daylight hours on main highways. Carjacking incidents and highway robberies are often violent. Four Americans were killed in highway robbery attempts in 2002 and three killed and one wounded in 2003. In 2004 one American tourist was murdered, and women and children were raped in highway assaults. Several highway assaults of American citizens also took place in 2005, but without serious injury to the victims. In 2006, there were 19 incidents of assault against Americans in motor vehicles reported to the Embassy, none of which involved death or injury. In nine of these incidents, the victims were arriving at Guatemala City's airport.

In 2007 there has been an increasing number of carjacking incidents and armed robberies of travelers who have just arrived on international flights, most frequently between 6:00 a.m and 10:00 am, but also in the evening. In the most common scenario tourists or business travelers who land at the airport around 7:00 am are held up by armed men as their vehicle departs the airport. Private vehicles, taxis and shuttle buses have been attacked. Typically, the assailants steal money, passports, and luggage, and in some but not all cases, the assailants steal the vehicle as well. Recently, many of these attacks have taken place far from the airport, just as travelers arrived at their homes, or in less busy areas of the city. Laptops are frequently targeted, so carry them inconspicuously in a backpack or other carryon luggage. Victims who did not resist the attackers were not physically injured. The Embassy advises its own employees to seek alternative routes for exiting the airport. In some cases, assailants have been wearing full or partial police uniforms and have used vehicles that resemble police vehicles, indicating that some elements of the police might be involved. Armed robberies have occurred within minutes of the tourist's vehicle being stopped by the police. U.S. Embassy personnel continue to observe heightened security precautions in Guatemala City and on the roads outside the capital city. U.S. tourists are urged to be especially aware of safety and security concerns when traveling on the roads in Guatemala. Rather than traveling alone, use a reputable tour organization. Stay in groups; travel in a caravan consisting of two or more vehicles; and, stay on the main roads. Ensure that someone not traveling with you is aware of your itinerary. Resist the temptation to stay in hotels that do not have adequate security. Travel after dark anywhere in Guatemala is extremely dangerous. It is preferable to stay in the main tourist destinations. Do not explore back roads or isolated paths near tourist sites. Pay close attention to your surroundings, especially when walking or when driving in Guatemala City. Refrain from displaying expensive-looking jewelry, large amounts of money, laptop computers, or other valuable items. Finally, if confronted by criminals, be aware that resistance may provoke a more violent response.

Avoid low-priced intra- and inter-city buses (recycled U.S. school buses); they are often attacked by armed robbers and are poorly maintained and dangerously driven. More than 100 bus drivers and passengers died in 2006 in robberies staged by holdup gangs that target public transportation, both urban and inter-city. The use of modern inter-city buses somewhat improves security and safety. There have been, however, several attacks on travelers on first-class buses on highway CA-2 near the border areas with both Mexico and El Salvador and on highways CA-1 and CA-9 near the El Salvador border and in the highlands between Quetzaltenango and Sololá. Be cautious with personal items such as backpacks, fanny packs, and passports while riding buses, because tourists' possessions are a favorite target of thieves. Foreign residents of Guatemala have special concerns. Since December 1999, when the Government of Guatemala appointed a Special Prosecutor to investigate all American citizen murders, twenty-four American citizen residents and six American citizen tourists have been murdered, and suspects have been convicted in only two cases. There have been "express" kidnappings in recent years, primarily in Guatemala City, in which a relatively small ransom that can be quickly gathered is demanded. U.S. citizens have been kidnapped in recent years. At least one incident of a random kidnapping, in which the victim was grabbed off the street in an affluent neighborhood of the city, occurred in December 2003 and resulted in a physical and sexual assault.

Pickpockets and purse-snatchers are active in all major cities and tourist sites, especially the central market and other parts of Zone 1 in Guatemala City and the city of Antigua. In a common scenario, an accomplice distracts the victim, while an assailant slashes or simply steals a bag or backpack while the victim's attention is diverted.

As in other countries, criminals also use a number of scams to steal money and possessions from tourists in Guatemala. In one popular scam, robbers place a nail in a parked vehicle's tire. The vehicle is then followed by the robbers who pose as "good Samaritans" when the tire becomes flat and the victims pull to the side of the road. While "help" is being rendered, the contents of the car are stolen, often without the knowledge of the victims. However, in some cases, the robbers have threatened the tourists with weapons. Parking areas in and around the Guatemala City International Airport are particularly prone to this crime. In another scam, victims are approached in a hotel, restaurant or other public place by an individual claiming there is some sort of problem with his or the would-be victim's automobile in the parking lot. On the way to investigate the "problem," usually in a remote or con-

cealed area near the parking lot, the robber pulls a gun on the victim demanding cash, credit cards and other valuables. A third popular scam involves various attempts to acquire a victim's ATM card and PIN number. Some sophisticated criminals have even placed boxes outside ATM kiosks that record PIN numbers when unsuspecting victims believe they must enter their PIN number to gain entry to the ATM foyer. After recording PIN numbers, robbers then steal the owner's ATM card to complete their crime. There are dozens of techniques scammers can use to rob victims of money and possessions. While most people mean no harm, always be cautious when strangers approach you for any reason or make unusual requests.

Parents adopting children in Guatemala have also been victimized in public places and at their hotels by police (or individuals dressed as police) who have threatened to arrest foster mothers and turn adoptive children over to orphanages, but released them in exchange for significant payments, often approaching $1000. Such threats have no basis in Guatemalan law, and should be immediately reported to the Embassy.

For security reasons, the Embassy does not allow U.S. government employees to stay in hotels in Zone 1 in Guatemala City and urges private travelers to avoid staying in this area Do not hail taxis on the street in Guatemala City. Use radio-dispatched taxis or taxis from major hotels instead.

The main road to Lake Atitlan via the Inter-American Highway (CA-1) and Solola is safer than the alternatives, though attacks in recent years have made traveling in a caravan highly recommended, even on the Inter-American Highway. Robbery and assault have been frequently reported on secondary roads near the lake with the highest number of incidents occurring on the RN-11 (Las Trampas road) parallel to the east side of the lake. Robbers have used mountain roads advantageously to stop buses, vans and cars in a variety of ways. Armed attacks have occurred on roads from Guatemala City to the Peten. Visitors to the Mayan ruins at Tikal are urged to fly to nearby Flores and then travel by bus or tour van to the site. Violent attacks have occurred in the Mayan ruins in the Peten, including in the Cerro Cahui Conservation Park, Yaxha, the road to and inside Tikal Park, and in the Tikal ruins. Tourist police (POLITUR) patrols inside the park have significantly reduced the violent crime incidents inside the park, but travelers should nevertheless remain in groups and on the principal trails leading to the Central Plaza and the Temple IV complex, and avoid remote areas of the park.

POLITUR (a joint police/Guatemalan Tourism Institute initiative) is present in all major tourist destinations. They should be contacted in case of any criminal incident in such areas, even if minor.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: A full range of medical care is available in Guatemala City, but medical care outside the city is limited. Guatemala's public hospitals frequently experience serious shortages of basic medicines and equipment. Care in private hospitals is generally adequate for most common illnesses and injuries, and many of the medical specialists working in them are U.S. trained and certified.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://www.cdc.gov/travel/default.aspx. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Guatemala is provided for general reference only, and may not be totally accurate in a particular location or circumstance. Driving in Guatemala requires one's full attention, and safe drivers must take extraordinary efforts to drive defensively to avoid dangerous situations.

Traffic rules are only casually observed. Many drivers do not use their turn signals to alert other drivers. Instead, a common custom is for a driver or passenger to stick a hand out the window and wave it to indicate that they will be taking an unspecified action. Speed limits, lane markings and stop signs are frequently ignored. Passing blindly on winding and/or steep mountain roads, poorly designed surfaces, and unmarked hazards, including frequent landslides and precarious temporary highway repairs, present additional risks to motorists.

Common public transportation is by local recycled school busses, which

serve every town in the country. Criminal activity and frequent fatal accidents, however, make the low-priced inter-city buses particularly dangerous. Modern inter-city buses offer some security from highway violence, but armed attacks are increasing, showing that all buses are vulnerable.

Although city streets are lit, secondary and rural roads have little to no illumination. Driving outside of urban areas at night is dangerous and not recommended. The Inter-American Highway (CA-1) and the road from Guatemala City to the Caribbean coast (CA-9) are especially dangerous due to heavy traffic, including large trucks and trailers. There are no roadside assistance clubs, however a roadside assistance force (PROVIAL) patrols most of the major highways in the country. PROVIAL can be contacted by calling 2422-7878.

Their vehicles are equipped with basic tools and first aid supplies, and their services are free. Police patrol the major roadways and may assist travelers, but the patrols are sporadic and may be suspended due to budget restraints. For roadside assistance, travelers may call the police by dialing 120 or the fire department by dialing 122 or 123. Cellular telephone service covers most areas frequented by tourists.

Valid U.S. driver's licenses are accepted for the first 30 days of a visit, and international driving permits are accepted in Guatemala for extended stays. Guatemala's road safety authorities are the Department of Transit and the Joint Operations Center of the National Police. Drivers use the right-hand side of the road in Guatemala, and speed limits are posted (in kilometers) depending on the condition of the road. Speed limits are different in rural and urban areas, but are rarely enforced. Drivers often drive at the absolute maximum speed possible for the particular vehicle at the time. These drivers share the road with slow vehicles, some barely able to manage 20 miles per hour, creating a hazardous mix of velocities. Turning right on red is not permitted unless otherwise posted, and drivers must yield when entering a traffic circle. Seat belts must be worn in Guatemala, but there are no laws regarding the use of child safety seats. It is against the law for drivers to operate cellular phones while driving.

People found driving under the influence of alcohol or other drugs are arrested and may serve jail time. In an accident resulting in injury or death, every driver involved is taken into custody and the vehicle(s) impounded until a judge determines responsibility in a re-enactment of the accident.

Visit the web site of Guatemala's national tourist office and national authority responsible for road safety at http://www.inguat.gob.gt or via e-mail at asistur@inguat.gob.gt or info@inguat.gob.gt.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Guatemala's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Guatemala's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Guatemalan customs authorities may enforce strict regulations concerning temporary importation into or export from Guatemala of items such as antiquities and other cultural property. It is advisable to contact the Embassy of Guatemala in Washington or one of Guatemala's consulates in the United States for specific information regarding customs requirements. In many countries around the world, counterfeit and pirated goods are widely available.

Transactions involving such products are illegal and bringing them back to the United States may result in forfeitures and/or fines. Non-Guatemalan citizens who wish to marry in Guatemala are required to provide proof of identity and civil status (indicating whether they are single or divorced). Prior notice of the marriage must be given in the Diario de Centro America (Guatemala's Official Record) and any large circulation daily newspaper for fifteen days. The marriage must take place within six months of the publication of the notice.

Disaster Preparedness: Guatemala is a geologically active country. Visitors should be aware of the possibility of earthquakes at any time and the need for contingency plans.

There are also four active volcanoes. Volcanic activity, such as that of Fuego Volcano near Antigua in January 2003, and again in January 2006, has on occasion forced evacuations of nearby villages; the January-February 2000 activity of Pacaya Volcano near Guatemala City also briefly closed Guatemala City's international airport. Both the Caribbean and Pacific coasts of Guatemala are also vulnerable to hurricanes and tropical storms from June through November.

Mudslides and flooding during the May to November rainy season often kill dozens of people and close roads. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offences.

Persons violating Guatemalan laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Guatemala are severe, and convicted offenders can expect long jail sentences and heavy fines.

Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Guatemala are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site and to obtain updated information on travel and security within Guatemala. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The latest security information is available from the Embassy, including its web site, http://guatemala.usembassy.gov.

The Consular Section is open for citizen services, including registration, from 7:30 a.m. to 12:00 noon and 1:00 p.m. to 3:30 p.m. Monday through Thursdays and 7:30 a.m. to 11:30 a.m. Fridays, excluding U.S. and Guatemalan holidays. The second and last Friday of each month are reserved for administrative matters; therefore, routine citizen services are not provided. Emergency services are available at all times.

The U.S. Embassy is located in Guatemala City at Avenida La Reforma 7-01, Zone 10; telephone (502) 2-326-4000 during Embassy business hours (8:00 a.m. to 5:00 p.m.), or (502) 2-331-2354 for emergencies during non-business hours; fax (502) 2-332-4353; Internet web site: http://guatemala.usembassy.gov.

Intercountry Adoption

November 2008

Guatemala is party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention). The United States Government believes Guatemala has had insufficient time to implement reform legislation that would create a Convention-compliant adoption process, and as a result, Guatemala cannot meet its Convention obligations.

The United States Citizenship and Immigration Services is not processing I-800A petitions because the Department of State is unable to verify, as required by Section 301(a) of the Intercountry Adoption Act (IAA), that the requirements of The Hague Adoption Convention have been met in cases from Guatemala.

The Guatemalan National Council on Adoption (CNA) announced in September 2008 that CNA will not accept any new adoption cases at this time.

The halt is to enable CNA to work on establishing guidelines to use in accrediting adoption agencies and to focus on completing transition cases. More information about CNA's decision may be found on its website, http://www.cna.gob.gt.

GUINEA

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Guinea (République de Guinée)

PROFILE

Geography

Area: 245,860 sq. km. (95,000 sq. mi.), about the size of Oregon.

Cities: Capital—Conakry. Other cities—Guéckédou, Boké, Kindia, N'Zérékoré, Macenta, Mamou, Kankan, Faranah, Siguiri, Dalaba, Labe, Pita, Kamsar.

Terrain: Generally flat along the coast and mountainous in the interior. The country's four geographic regions include a narrow coastal belt; pastoral highlands (the source of West Africa's major rivers); the northern savanna; and the southeastern rain forest.

Climate: Tropical.

People

Nationality: Noun and adjective—Guinean(s).

Population: (2002 census) 8,444,559, including refugees and foreign residents. Refugee population (2006 est.) 60,000 Liberians and Ivoiriens. Population of Conakry: 2 million. Population of largest prefectures—Guéckédou (487,017), Boké (366,915), Kindia (361,117), N'Zérékoré (328,347), Macenta (365,559).

Annual growth rate: (2002 census) 3.5%.

Ethnic groups: Peuhl 40%, Malinke 30%, Soussou 20%, other ethnic groups 10%.

Religions: Muslim 85%, Christian 8%, traditional beliefs 7%.

Languages: French (official), national languages.

Education: Years compulsory—8. Enrollment—primary school, 64.32% (male 78.71%, female 69.03%); secondary, 15%; and post secondary, 3%. Literacy (total population over age 15 that can read and write)—44.2% (male 58.74%, female 26.38%).

Health: (2002) Life expectancy—total population 54 years. Infant mortality rate (2002)—98/1000.

Work force: (2002, 4.5 million) Agriculture—76%; industry and commerce—18%; services—6%.

Government

Type: Republic.

Constitution: 1990; amended 2001.

Independence: October 2, 1958. Anniversary of the Second Republic, April 3, 1984.

Government branches: Executive—elected president (chief of state); prime minister (head of government); cabinet of civilian ministers. Legislative—elected National Assembly (114 seats). Judicial—Supreme Court.

Political subdivisions: Region, prefecture, subprefecture, rural district.

Political parties: Pro-government—Party for Unity and Progress (PUP). Opposition—Rally for the Guinean People (RPG), Union for Progress and Renewal (UPR), Union of Democratic Forces of Guinea (UFDG), Union for Progress of Guinea (UPG), Union of Republican Forces (UFR).

Suffrage: Universal over age 18.

Budget: (2006) $642 million.

Economy

GDP: (2005 est.) $3.38 billion.

Annual economic growth rate: (2005 est.) 3.3%.

Per capita GDP: (2005 est.) $363.40.

Avg. inflation rate: (2005) 30.9%.

Natural resources: Bauxite, iron ore, diamonds, gold, water power, uranium, fisheries.

Industry: (30.9% of GDP) Types—mining, light manufacturing, construction.

Agriculture: (19.5% of GDP) Products—rice, cassava, fonio, millet, corn, coffee, cocoa, bananas, palm products, pineapples, livestock, forestry. Arable land—35%. Cultivated land—4.5%.

Trade: (45.1% of GDP) Exports (2005)—$806.6 million: bauxite, alumina, diamonds, gold, coffee, pineapples, bananas, palm products, coffee. Major markets—European Union, U.S., Commonwealth of Independent States, China, Eastern Europe, Japan, Saudi Arabia, Morocco.

Exchange rate: (May 2006) Approximately 4833 Guinean francs=U.S. $1.
Fiscal year: January 1-December 31.

GEOGRAPHY

Guinea is located on the Atlantic Coast of West Africa and is bordered by Guinea-Bissau, Senegal, Mali, Côte d'Ivoire, Liberia, and Sierra Leone. The country is divided into four geographic regions: A narrow coastal belt (Lower Guinea); the pastoral Fouta Djallon highlands (Middle Guinea); the northern savannah (Upper Guinea); and a southeastern rain-forest region (Forest Guinea). The Niger, Gambia, and Senegal Rivers are among the 22 West African rivers that have their origins in Guinea. The coastal region of Guinea and most of the inland have a tropical climate, with a rainy season lasting from April to November, relatively high and uniform temperatures, and high humidity. Conakry's year-round average high is 29ºC (85ºF), and the low is 23ºC (74ºF); its average annual rainfall is 430 centimeters (169 inches). Sahelian Upper Guinea has a shorter rainy season and greater daily temperature variations.

PEOPLE

Guinea has four main ethnic groups:

- Peuhl (Foula or Foulani), who inhabit the mountainous Fouta Djallon;
- Malinke (or Mandingo), in the savannah and forest regions;
- Soussous in the coastal areas; and
- Several small groups (Gerzé, Toma, etc.) in the forest region.

West Africans make up the largest non-Guinean population. Non-Africans total about 10,000 (mostly Lebanese, French, and other Europeans). Seven national languages are used extensively; major written languages are French, Peuhl, and Arabic.

HISTORY

The area occupied by Guinea today was included in several large West African political groupings, including the Ghana, Mali, and Songhai empires, at various times from the 10th to the 15th century, when the region came into contact with European commerce. Guinea's colonial period began with French military penetration into the area in the mid-19th century. French domination was assured by the defeat in 1898 of the armies of Almamy Samory Touré, warlord and leader of Malinke descent, which gave France control of what today is Guinea and adjacent areas.

France negotiated Guinea's present boundaries in the late 19th and early 20th centuries with the British for Sierra Leone, the Portuguese for their Guinea colony (now Guinea-Bissau), and the Liberia. Under the French, the country formed the Territory of Guinea within French West Africa, administered by a governor general resident in Dakar. Lieutenant governors administered the individual colonies, including Guinea.

Led by Ahmed Sékou Touré, head of the Democratic Party of Guinea (PDG), which won 56 of 60 seats in 1957 territorial elections, the people of Guinea in a September 1958 plebiscite overwhelmingly rejected membership in the proposed French Community. The French withdrew quickly, and on October 2, 1958, Guinea proclaimed itself a sovereign and independent republic, with Sékou Touré as President.

Under Touré, Guinea became a one-party dictatorship, with a closed, socialized economy and no tolerance for human rights, free expression, or political opposition, which was ruthlessly suppressed. Originally credited for his advocacy of cross-ethnic nationalism, Touré gradually came to rely on his own Malinke ethnic group to fill positions in the party and government. Alleging plots and conspiracies against him at home and abroad, Touré's regime targeted real and imagined opponents, imprisoning many thousands in Soviet-style prison gulags, where hundreds perished. The regime's repression drove more than a million Guineans into exile, and Touré's paranoia ruined relations with foreign nations, including neighboring African states, increasing Guinea's isolation and further devastating its economy.

Sékou Touré and the PDG remained in power until his death on April 3, 1984. A military junta—the Military Committee of National Recovery (CMRN)—headed by then-Lt. Col. Lansana Conte, seized power just one week after the death of Sékou Touré. The CMRN immediately abolished the constitution, the sole political party (PDG) and its mass youth and women's organizations, and announced the establishment of the Second Republic. In lieu of a constitution, the government was initially based on ordinances, decrees, and decisions issued by the president and various ministers.

Political parties were proscribed. The new government also released all prisoners and declared the protection of human rights as one of its primary objectives. It reorganized the judicial system and decentralized the administration. The CMRN also announced its intention to liberalize the economy, promote private enterprise, and encourage foreign investment in order to develop the country's rich natural resources.

The CMRN formed a transitional parliament, the "Transitional Council for National Recovery" (CTRN), which created a new constitution (La Loi Fundamental) and Supreme Court in 1990. The country's first multi-party presidential election took place in 1993. These elections were marred by irregularities and lack of transparency on the part of the government. Legislative and municipal elections were held in 1995. Conte's ruling Party for Unity and Progress (PUP) won 76 of 114 seats in the National Assembly, amid opposition claims of irregularities and government tampering. The new National Assembly held its first session in October 1995.

Several thousand malcontent troops mutinied in Conakry in February 1996, destroying the presidential offices and killing several dozen civilians. Mid-level officers attempted, unsuccessfully, to turn the rebellion into a coup d'etat. The Government of Guinea made hundreds of arrests in connection to the mutiny, and put 98 soldiers and civilians on trial in 1998.

In mid-1996, in response to the coup attempt and a faltering economy, President Conté appointed a new government as part of a flurry of reform activity. He selected Sidya Touré, former chief of staff for the Prime Minster of the Cote d'Ivoire, as Prime Minister, and appointed other technically minded ministers. Touré was charged with coordinating all government action, taking charge of leadership and management, as well as economic planning and finance functions. In early 1997, Conté shifted many of the financial responsibilities to a newly named Minister of Budget and Finance.

In December 1998, Conté was reelected to another 5-year term in a flawed election that was, nevertheless, an improvement over 1993. Following his reelection and the improvement of economic conditions through 1999, Conté reversed direction, making wholesale and regressive changes to his cabinet. He replaced many technocrats and members of the Guinean Diaspora that had previously held important positions with "homegrown" ministers, particularly from his own Soussou ethnic group. These changes led to increased cronyism, corruption, and a retrenchment on economic and political reforms.

Beginning in September 2000, the Revolutionary United Front (RUF) rebel army, backed by Liberian Presi-

dent Charles Taylor, commenced large-scale attacks into Guinea from Sierra Leone and Liberia. The RUF, known for their brutal tactics in the near decade-long civil war in Sierra Leone, operated with financial and material support from the Liberian Government and its allies. These attacks destroyed the town of Gueckedou as well as a number of villages, causing large-scale damage and the displacement of tens of thousands of Guineans from their homes. The attacks also forced the UN High Commissioner for Refugees (UNHCR) to relocate many of the 200,000 Sierra Leonean and Liberian refugees residing in Guinea. As a result of the attacks, legislative elections scheduled for 2000 were postponed.

After the initial attacks in September 2000, President Conté, in a radio address, accused Liberian and Sierra Leonean refugees living in the country of fomenting war against the government. Soldiers, police, and civilian militia groups rounded up thousands of refugees, some of whom they beat and raped. Approximately 3,000 refugees were detained, although most were released by year's end.

In November 2001, a nationwide referendum, which some observers believe was flawed, amended the constitution to permit the president to run for an unlimited number of terms, and to extend the presidential term from 5 to 7 years. The country's second legislative election, originally scheduled for 2000, was held in June 2002. President Conté's Party of Unity and Progress (PUP) and associated parties won 91 of the 114 seats. Most major opposition parties boycotted the legislative elections, objecting to inequities in the existing electoral system.

GOVERNMENT AND POLITICAL CONDITIONS

Guinea is a constitutional republic in which effective power is concentrated in a strong presidency. Government administration is carried out at several levels; in descending order, they are: eight regions, 33 prefectures, over 100 subprefectures, and many districts (known as communes in Conakry and other large cities, and villages or "quartiers" in the interior). District-level leaders are elected; the president appoints officials to all other levels of the highly centralized administration. The president governs Guinea with the assistance of an appointed council of civilian ministers typically led by a prime minister.

The failing health of President Conté has been a cause of continuing concern. In late 2003, Conté fell ill during a trip to Japan and had to receive medical treatment in Morocco. However, in December 2003 Conté easily won a third presidential term against a single, relatively unknown candidate after the opposition parties boycotted the elections. On January 19, 2005, President Conte's motorcade was fired upon by unknown assailants. Two bodyguards were wounded but the President was not harmed. President Conté was medically evacuated twice in 2006 to receive emergency treatment in Geneva, Switzerland. However, in a late 2006 interview Conté stated that despite his health he would remain in office until his term ended in 2010.

In December 2005 Guinea held nation-wide elections for local and rural councils. In preparation for the election the government maintained an open dialogue with the opposition parties, 16 of which participated in the elections. Opposition leaders were allowed to campaign freely, and were allowed equal access to government-run media. The ruling PUP won 31 of 38 municipalities and 241 of 303 local councils. Though viewed as flawed, the 2005 elections were much improved over previous elections due to the use of transparent ballot boxes and other reforms. Legislative elections previously scheduled for June 2007 have been repeatedly delayed. Currently elections are expected in late 2008.

In late February and early March 2006, Guinea's labor union alliance launched a historic general strike demanding wage increases and union participation in Guinea's economic and social policy. Though the unions only won a modest salary increases, the strike established them as a credible, unified, and powerful force in Guinea. Due in part to the government's inability to control Guinea's rising inflation, the trade unions launched a second general strike in June 2006. The second general strike was marked by more intense and widespread violence, resulting in the deaths of several protesters at the hands of security forces. The unions called for a third round of national strikes in January 2007, after President Conté personally intervened to save a close associate from charges of corruption.

Whereas the unions' demands during the March and June 2006 strikes were primarily economic, the January 2007 strike began with a political tone. In addition to their economic agenda for improved wages and retirement benefits, the unions called for Conté's retirement and the reinstatement of embezzlement charges against two of Conté's allies. After President Conté dismissed the unions' demands, protesters began barricading roads, throwing rocks, burning tires, and skirmishing with police. Violence throughout Guinea peaked on January 22 when several thousand ordinary Guineans poured into the streets calling for change. Guinean security forces and the military's "red beret" presidential guard reacted by opening fire on the peaceful crowds and killing dozens in Conakry and throughout Guinea.

On January 27, 2007, unions, employers associations, and the government entered a tripartite agreement to suspend the strike. President Conté agreed to name a new "consensus" prime minister, with delegated executive powers. For the first time, the new prime minister of Guinea would carry the title of "head of government" and exercise certain powers previously held by the president of the republic. The government also agreed to new price controls for rice and fuel, as well a one-year ban on the exportation of food and fuel. However, President Conté's February 9

appointment of a longtime associate, Eugène Camara, as Guinea's new prime minister sparked another wave of violence and protests. In an attempt to quell the violence, on February 12 President Conté declared a "state of siege," which conferred broad powers on the military, and implemented a strict curfew. According to media reports, the following days saw military and police forces scour Conakry and towns in the hinterlands where they committed serious human rights abuses.

When Guinea's National Assembly rejected Conté's effort to extend the "state of siege," it became clear that the popular protests had widespread support, even among leaders of Conté's own ruling party. Soon after, an ECOWAS delegation led by former Nigerian President Babangida announced that President Conté had agreed to name a new "consensus" prime minister in consultations with the unions and civil society. Lansana Kouyaté arrived in Conakry on February 27, 2007, just hours after being announced as the new Prime Minister and head of the government. During his premiership, Kouyaté faced constant speculation that the president and his associates opposed his reform efforts. After 15 months in office, President Conté replaced Kouyaté with Ahmed Tidiane Souaré, a former minister of mines from a previous cabinet.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Lansana CONTE, Gen.**
Prime Min.: **Ahmed Tidiane SOUARE**
Min. of Admin. Reform & Public Service: **Makale TRAORE**
Min. of Agriculture: **Mahmoud CAMARA**
Min. of Commerce & Competitiveness: **Yacine BARRY**
Min. of Communication & New Information Technologies: **Tibou CAMARA**
Min. of Culture, Arts, & Leisure: **Aly Gilbert IFONO**
Min. of Decentralization & Local Development: **Ibrahima DIAKITE**
Min. of Defense: **Almamy Kabele CAMARA**
Min. of Development & the Environment: **Papa Koly KOUROUMA**
Min. of Economy & Finance: **Ousmane DORE**
Min. of Energy & Water: **Ansoumane CONDE**
Min. of Fishing & Aquaculture: **Youssouf SYLLA**
Min. of Foreign Affairs: **Amadou Lamarana BAH**
Min. of Health & Public Hygiene: **Mariame BEA VOUGI**
Min. of Higher Education & Scientific Research: **Gomou Nianga KOMATA**
Min. of Industrial Development, Small- & Medium-Sized Enterprises, & Handicraft: **Youssouf DIALLO**
Min. of Justice & Keeper of the Seals: **Bachir TOURE**
Min. of Livestock Breeding & the Protection of Animals: **El Hadj Diao KANTE**
Min. of Mines & Geology: **Ahmad KANTE**
Min. of National Reconciliation, Solidarity, & Institutional Relations: **Ahmadou Oury BAH**
Min. in Charge of Overseas Guineans & African Integration: **Harouna BERETE**
Min. of Planning & Cooperation: **Djigui CAMARA**
Min. of Pre-University & Civic Education: **Ousmane SOUARE**
Min. of Public Works: **Amadou Poredaka DIALLO**
Min. of Security & Civil Protection: **Mohamed DAMBA**
Min. of Social, Women's, & Children's Affairs: **Germaine MANGUE**
Min. of State Control & Good Governance: **Souleymane CISSE**
Min. of Technical Education & Vocational Training: **Sanoussi KABA**
Min. of Territorial Admin. & Political Affairs: **Sekouba BANGOURA**
Min. of Tourism & the Promotion of Hotels: **Bah Mairnouna DIALLO**
Min. of Transportation: **Cheick TOURE**
Min. of Urban Planning & Housing: **Saidouba CAMARA**
Min. of Youth & Sports: **Issa CONDE**
Min. of Youth Employment: **Ahmadou DIALLO**
Min. Sec. Gen. of the Presidency: **Sam Mamady SOUMAH**
Sec. Gen. of the Govt.: **Oury Bailo BAH**
Sec. Gen. of Religious Affairs: **Mahmoud Cherif NABANIOU**
Governor, Central Bank: **Daouda BANGOURA**
Ambassador to the US: **Mory Karamoko KABA**
Permanent Representative to the UN, New York: **Alpha Ibrahima SOW**

Guinea maintains an embassy in the United States at 2112 Leroy Place, NW, Washington, DC 20008 (tel. 202-483-9420) and a mission to the United Nations at 140 E. 39th St., New York, NY 10016 (tel. 212-687-8115/16/17).

ECONOMY

Richly endowed with minerals, Guinea possesses over 25 billion metric tons (MT) of bauxite—and perhaps up to one half of the world's reserves. In addition, Guinea's mineral wealth includes more than 4 billion tons of high-grade iron ore, significant diamond and gold deposits, and undetermined quantities of uranium. Guinea has considerable potential for growth in the agricultural and fishing sectors. Soil, water, and climatic conditions provide opportunities for large-scale irrigated farming and agro industry. Possibilities for investment and commercial activities exist in all these areas, but Guinea's poorly developed infrastructure and rampant corruption continue to present obstacles to large-scale investment projects.

Joint venture bauxite mining and alumina operations in northwest Guinea historically provide about 80% of Guinea's foreign exchange. The Compagnie des Bauxites de Guinea (CBG) is the main player in the bauxite industry. CBG is a joint venture, in which 49% of the shares are owned by the Guinean Government and 51% by an international consortium led by Alcoa and Alcan. CBG exports about 14 million metric tons of high-grade bauxite every year. The Compagnie des Bauxites de Kindia (CBK), a joint venture between the Government of Guinea and Russki Alumina, produces some 2.5 million MT annually, nearly all of which is exported to Russia and Eastern Europe. Dian Dian, a Guinean/Ukrainian joint bauxite venture, has a projected production rate of 1 million MT per year, but is not expected to begin operations for several years. The Alumina Compagnie de Guinée (ACG), which took over the former Friguia Consortium, produced about

2.4 million tons of bauxite in 2004, which is used as raw material for its alumina refinery. The refinery supplies about 750,000 MT of alumina for export to world markets. Both Global Alumina and Alcoa-Alcan have signed conventions with the Government of Guinea to build large alumina refineries with a combined capacity of about 4 million MT per year.

Diamonds and gold also are mined and exported on a large scale. AREDOR, a joint diamond-mining venture between the Guinean Government (50%) and an Australian, British, and Swiss consortium, began production in 1984 and mined diamonds that are 90% gem quality. Production stopped from 1993 until 1996, when First City Mining of Canada purchased the international portion of the consortium. By far, most diamonds are mined artisanally. The largest gold mining operation in Guinea is a joint venture between the government and Ashanti Gold Fields of Ghana. SMD also has a large gold mining facility in Lero near the Malian border. Other concession agreements have been signed for iron ore, but these projects are still awaiting preliminary exploration and financing results.

The Guinean Government adopted policies in the 1990s to return commercial activity to the private sector, promote investment, reduce the role of the state in the economy, and improve the administrative and judicial framework. Guinea has the potential to develop, if the government carries out its announced policy reforms, and if the private sector responds appropriately. So far, corruption and favoritism, lack of long-term political stability, and lack of a transparent budgeting process continue to dampen foreign investor interest in major projects in Guinea.

Reforms since 1985 include eliminating restrictions on agriculture and foreign trade, liquidation of some parastatals, the creation of a realistic exchange rate, increased spending on education, and cutting the government bureaucracy. In July 1996, President Lansana Conté appointed a new government, which promised major economic reforms, including financial and judicial reform, rationalization of public expenditures, and improved government revenue collection. Under 1996 and 1998 International Monetary Fund (IMF)/World Bank agreements, Guinea continued fiscal reforms and privatizations, and shifted governmental expenditures and internal reforms to the education, health, infrastructure, banking, and justice sectors. Cabinet changes in 1999 as well increasing corruption, economic mismanagement, and excessive government spending combined to slow the momentum for economic reform. The informal sector continues to be a major contributor to the economy.

The government revised the private investment code in 1998 to stimulate economic activity in the spirit of free enterprise. The code does not discriminate between foreigners and nationals and provides for repatriation of profits. While the code restricts development of Guinea's hydraulic resources to projects in which Guineans have majority shareholdings and management control, it does contain a clause permitting negotiations of more favorable conditions for investors in specific agreements. Foreign investments outside Conakry are entitled to more favorable benefits. A national investment commission has been formed to review all investment proposals. The United States and Guinea have signed an investment guarantee agreement that offers political risk insurance to American investors through the Overseas Private Investment Corporation (OPIC). In addition, Guinea has inaugurated an arbitration court system, which allows for the quick resolution of commercial disputes.

Until June 2001, private operators managed the production, distribution, and fee-collection operations of water and electricity under performance-based contracts with the Government of Guinea. However, both utilities are plagued by inefficiency and corruption. Foreign private investors in these operations departed the country in frustration.

In 2002, the IMF suspended Guinea's Poverty Reduction and Growth Facility (PRGF) because the government failed to meet key performance criteria. In reviews of the PRGF, the World Bank noted that Guinea had met its spending goals in targeted social priority sectors. However, spending in other areas, primarily defense, contributed to a significant fiscal deficit. The loss of IMF funds forced the government to finance its debts through Central Bank advances. The pursuit of unsound economic policies has resulted in imbalances that are proving hard to correct.

Under then-Prime Minister Diallo, the government began a rigorous reform agenda in December 2004 designed to return Guinea to a PRGF with the IMF. Exchange rates have been allowed to float, price controls on gasoline have been loosened, and government spending has been reduced while tax collection has been improved. These reforms have not slowed down inflation, which hit 27% in 2004 and 30% in 2005. Depreciation is also a concern. The Guinea franc was trading at 2550 to the dollar in January 2005. It hit 5554 to the dollar by October 2006. Despite the opening in 2005 of a new road connecting Guinea and Mali, most major roadways connecting the country's trade centers remain in poor repair, slowing the delivery of goods to local markets. Electricity and water shortages are frequent and sustained, and many businesses are forced to use expensive power generators and fuel to stay open. Even though there are many problems plaguing Guinea's economy, not all foreign investors are reluctant to come to Guinea. Global Alumina's proposed alumina refinery has a price tag above $2 billion. Alcoa and Alcan are proposing a slightly smaller refinery worth about $1.5 billion. Taken together, they represent the largest private investment in sub-Saharan Africa since the Chad-Cameroun oil pipeline.

DEFENSE

Guinea's armed forces are divided into four branches—army, navy, air force, and gendarmerie—whose chiefs report to the Chairman of the Joint Chiefs of Staff. The 10,000-member army is the largest of the four services. The navy has about 900 personnel and operates several small patrol craft and barges. Air force personnel total about 700; its equipment includes several Russian-supplied fighter planes and transport planes. Several thousand gendarmes are responsible for internal security.

FOREIGN RELATIONS

Guinea's relations with other countries, including with her West African neighbors, have improved steadily since 1985. Guinea reestablished relations with France and Germany in 1975, and with neighboring Côte d'Ivoire and Senegal in 1978. Guinea has been active in efforts toward regional integration and cooperation, especially regarding the Organization of African Unity (now the African Union) and the Economic Organization of West African States (ECOWAS). Guinea takes its role in a variety of international organizations seriously and participates actively in their deliberations and decisions. Guinea has participated in both diplomatic and military efforts to resolve conflicts in Liberia, Sierra Leone, and Guinea-Bissau, and contributed contingents of troops to peacekeeping operations in all three countries as part of ECOMOG, the Military Observer Group of ECOWAS. Guinea has offered asylum to more than 700,000 Liberian, Sierra Leonean, and Bissauan refugees since 1990, despite the economic and environmental costs involved.

The civil wars that engulfed Liberia and then Sierra Leone during the 1990s negatively affected relations between Guinea and these two fellow Mano River Union member countries. Guinea and Liberia accused each other of supporting opposition dissidents, and in late 2000 and early 2001, Guinean dissidents backed by the Liberian government and RUF rebels from Sierra Leone brutally attacked Guinea. These attacks caused over 1,000 Guinean deaths and displaced more than 100,000 Guineans. The attacks led to Guinea's support for the LURD (Liberians United For Reconciliation and Democracy) rebels in their attacks against the Liberian government of Charles Taylor. Taylor's departure for exile in August 2003 and the establishment of a new government in Liberia have led to a much improved relationship between the two countries.

Guinea belongs to the UN and most of its specialized related agencies, the African Union, the International Bank for Reconstruction and Development (IBRD), African Development Bank (AFDB), Niger River Basin (NRB), Economic Community of West African States (ECOWAS), Organization of the Islamic Conference (OIC), the Mano River Union (MRU), Gambia River Basin Organization (OMVG), and the Nonaligned Movement (NAM).

U.S.-GUINEAN RELATIONS

The United States maintains close relations with Guinea. U.S. policy seeks to encourage Guinea's democratic reforms, its positive contribution to regional stability, and sustainable economic and social development. The U.S. also seeks to promote increased U.S. private investment in Guinea's emerging economy. The U.S. Mission in Guinea is composed of five agencies—Department of State, U.S. Agency for International Development (USAID), Peace Corps, the Treasury Department, and the Department of Defense. In addition to providing the full range of diplomatic functions, the U.S. Mission also manages a military assistance program that provided nearly $331,000 for military education, professionalization, and language training programs.

USAID Guinea is now one of only five sustainable development missions in West Africa, with current core program areas in primary education, family health, democracy and governance, and natural resources management. After a temporary suspension due to nationwide political unrest in early 2007, the Peace Corps program in Guinea resumed operations at the end of July. Prior to the suspension, Peace Corps had more than 100 volunteers throughout the country, and the program is gradually increasing its numbers again. Volunteers work in four project areas: secondary education, environment/agro-forestry, public health and HIV/AIDS prevention, and small enterprise development. Guinea has also had a strong Crisis Corps program through the last few years.

TRAVEL

Consular Information Sheet

August 15, 2008

Country Description: Guinea is a developing country in western Africa, with minimal facilities for tourism. Travelers who plan to stay in Conakry, the capital, should make reservations well in advance. French is the official language; Pular, Malinké and Soussou are also widely spoken.

Entry Requirements: A passport, visa, international vaccination record (WHO card), and current yellow fever vaccination are required. Travelers should obtain the latest information and details from the Embassy of the Republic of Guinea, 2112 Leroy Street, NW, Washington, DC 20008, tel. (202) 986-4300, fax (202) 478-3010. The Guinean embassy does not maintain a current website. Overseas, inquiries should be made to the nearest Guinean embassy or consulate. Overseas, inquiries should be made at the nearest Guinean embassy or consulate.

Safety and Security: Since early 2008, there has been a constant threat of violent strikes and demonstrations in Guinea. The price of gasoline increased by more than 60 percent in April 2008, squeezing already economically hard-pressed Guineans and increasing tension in the country. Parliamentary elections scheduled for late 2008 could result in violence.

While U.S. citizens have not been targeted in past outbreaks of violence, being in the wrong place at the wrong time can be very dangerous. During periods of civil unrest, public services such as transportation and medical care, as well as availability of goods and services, can be affected. During many demonstrations, crowds of people gather and burn tires, create roadblocks, and damage vehicles by throwing rocks and bricks. The military has also been known to demonstrate and incite unrest due to their grievances with the government. Because of the potential for violence, U.S. citizens should avoid large crowds, political rallies, and street demonstrations. They should also avoid sensitive government installations, including the Presidential Palace, official government buildings, and military bases.

U.S. citizens should maintain security awareness at all times. There are no known terrorist groups officially operating in the country. Most border crossings are controlled jointly by Guinean armed forces, gendarmes, police and immigration officials. A long land frontier and the military's lack of physical and monetary resources, however, mean that borders are lightly patrolled. U.S. citizens considering travel to the border regions with Liberia, Sierra Leone or Côte d'Ivoire should consult the latest Travel Warnings and Country Specific Information for those countries (available at the Bureau of Consular Affairs' Web site at http://travel.state.gov) and contact the U.S. Embassy in Conakry for the latest travel and security information. Crossing land borders requires visas and complete paperwork, and can be difficult.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: In Conakry, as in many large cities, crime is a fact of daily life. Residential and street crime is very common. Sentiments toward Americans in Guinea are generally positive, but criminals regularly target foreigners, including Americans, because they are perceived as lucrative targets. Nonviolent and violent crimes are a problem. The majority of nonviolent crime involves acts of pick pocketing and purse snatching, while armed robbery, muggings, and assaults are the most common violent crimes. In spite of good intentions, the police have been unable to prevent the rapid escalation of crime. There have also been cases of direct and indirect requests for bribes from the police and military officials.

Criminals particularly target visitors at the airport, in the traditional markets, and near hotels and restaurants frequented by foreigners. Visitors should avoid unsolicited offers of assistance at the airport and hotels because such offers often mask an intention to steal luggage, purses, or wallets. Travelers should arrange for hotel personnel, family members, or business contacts to meet them at the airport to reduce their vulnerability to these crimes of opportunity.

Commercial scams and disputes with local business partners can create legal difficulties for U.S. citizens because corruption is widespread in Guinea. Business routinely turns on bribes rather than the law, and enforcement of the law is irregular and inefficient. The U.S. Embassy has extremely limited recourse in assisting Americans who are victims of illegal business deals.

Business fraud is rampant and the targets are usually foreigners, including Americans. Schemes previously associated exclusively with Nigeria are now prevalent throughout West Africa, including Guinea, and pose a danger of severe financial loss. Typically these scams begin with the receipt of an unsolicited communication (usually e-mails) from strangers who promise quick financial gain, often by transferring large sums of money or valuables out of the country, but then require a series of "advance fees" to be paid—such as fees for legal documents or taxes—to finalize the release of the transferred funds. Of course, the final payoff does not exist; the purpose of the scam is simply to collect the advance fees. A common variation is the scammer's claim to be a refugee or émigré of a prominent West African family, or a relative of a present or former political leader who needs assistance in transferring large sums of cash. Still other variations appear to be legiti-

mate business deals that require advance payments on contracts. Sometimes victims are convinced to provide bank account and credit card information and financial authorization that drains their accounts, incurs large debts against their credit, and takes their life savings.

The best way to avoid becoming a victim of advance-fee fraud is common sense—if a proposition looks too good to be true, it probably is. You should carefully check and research any unsolicited business proposal before committing any funds, providing any goods or services, and undertaking any travel. A good clue to a scam is the phone number given to the victim; legitimate businesses and offices provide fixed line numbers, while scams typically use only cell phones. It is virtually impossible to recover money lost through these scams.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities are poorly equipped and extremely limited both in the capital city and throughout Guinea. Medicines are in short supply, sterility of equipment should not be assumed, and treatment is frequently unreliable. Some private medical facilities provide a better range of treatment options than public facilities but are still well below global standards. There are no ambulance or emergency rescue services in Guinea and trauma care is extremely limited. Water in Guinea is presumed contaminated, so you should use only bottled or distilled water for drinking. Malaria is a serious risk to travelers in Guinea. For additional information on malaria, including protective measures, see the CDC travelers' health web site at http://wwwn.cdc.gov/travel.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Guinea. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Guinea is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Drivers in Guinea tend to be poorly trained and routinely ignore road safety rules. Guinea's road network, paved and unpaved, is underdeveloped and unsafe. Roads and vehicles are poorly maintained, road signs are insufficient, and roads and vehicles are frequently unlit. Livestock and pedestrians create constant road hazards and make nighttime travel inadvisable. Guinea has many roadblocks set up by the police or the military, making inter- and intra-city travel difficult from 10:00 p.m. to 6:00 a.m. During the rainy season (July through September), flash floods make some roads temporarily impassable. There is also a notable increase in banditry along the roadways between towns and upcountry during the rainy season in the hours of darkness. Roadside assistance is not available in Guinea.

Guinea has no public transportation. Taxis, including small cars and larger vans, are often poorly maintained and over-crowded. Taxis frequently stop and start without regard to other vehicles, making driving hazardous. Rental vehicles, with drivers, are available from agencies at major hotels in Conakry.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Guinea, the U.S. Federal Aviation Administration (FAA) has not assessed Guinea's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Guinean customs authorities may enforce strict regulations concerning the temporary import or export of items such as firearms, antiquities, medications, business equipment, and ivory. You should contact the Embassy of Guinea in Washington for specific information regarding customs requirements. The local currency is the Guinean franc (FG). Travelers may not have more than 100,000 FG (currently about $23.00 or more than $5,000 when they depart Guinea. Guinea has a cash economy. ATMs are not available, and traveler's checks are accepted only at some banks and hotels. Credit cards are accepted at some larger hotels in Conakry, but should be used only at reputable hotels and banks. Cash advances on Visa credit cards are available at various branches of BICIGUI, a local bank. Inter-bank fund transfers are possible at BICIGUI branches but can be diffi-

cult and expensive. Money transfers from the U.S. have worked successfully in the past. Western Union has several offices in Conakry, and Moneygram has an office downtown. Visitors should restrict photography to private gatherings and should obtain explicit permission from the Guinean government before photographing military and transportation facilities, government buildings, or public works. Photographing without permission in any public area may provoke a response from security personnel or a dangerous confrontation with people who find being photographed offensive.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Guinean laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Guinea are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Guinea are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, and to obtain updated information on travel and security within Guinea. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located on the Transversale No. 2, Centre Administratif de Koloma opposite the New Radio Station in Ratoma, Conakry, Guinea; telephone +224-30-42-08-61 through 68 or fax +224-30-42-08-71; web site: http://conakry.usembassy.gov.

Intercountry Adoption

January 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

General: The following is a guide for U.S. citizens who are interested in adopting a child in Guinea and applying for an immigrant visa for the child to come to the United States. This process involves complex Guinean and U.S. legal requirements. U.S. consular officers give each petition careful consideration on a case-by-case basis to ensure that the legal requirements of both countries have been met, for the protection of the prospective adoptive parent(s), the biological parents(s) and the child. Interested U.S. citizens are strongly encouraged to contact U.S. consular officials in Dakar, Senegal before formalizing an adoption agreement to ensure that appropriate procedures have been followed which will make it possible for the Embassy to issue a U.S. immigrant visa for the child.

Availability of Children for Adoption: Recent U.S. immigrant visa statistics reflect that four immigrant visas have been issued to Guinean orphans in the last five fiscal years.

Adoption Authority: Adoption petitions are submitted to a Tribunal of First Instance or a Justice of the Peace. The Court of Appeals is the second resort. The Ministry of Justice grants their authority.

Adoption Procedures: Those seeking to adopt should retain an attorney who is a member of the Guinean bar association. There are two types of adoptions in Guinea—perfect adoption and simple adoption. Both are open to Guineans and non-Guineans.

A perfect adoption is irrevocable and should be advantageous to the child. In perfect adoptions, the adoptive relationship takes precedence over any biological relationship. In a simple adoption, the child may continue to have ties to his/her biological family and it is revocable. In both kinds of adoption, if the parents are alive, their consent is required. If both parents are dead, consent needs to be granted by the remaining family members (le Conseil famille). The initial request is made to the Tribunal of First Instance or a Justice of the Peace. The judgement is given after inquiry and debate in court chambers.

Age and Civil Status Requirements: Anyone at least 35 years old may adopt another person if the difference in age between the two is at least 15 years. A couple may seek to adopt a minor child if one of the adopters is at least 35 years old and without children. Those seeking to adopt should not have a serious medical condition.

Adoption Agencies and Attorneys: There are no adoption agencies or groups that specialize in adoption in Guinea. The Embassy maintains a list of numerous attorneys practicing in Guinea.

Doctors: The U.S. Embassy in Conakry maintains current lists of doctors and sources for medicines, should either you or your child experience health problems while in Guinea

Documentary Requirements: The final request for adoption should include a copy of the child's birth certificate, identification for the prospective parents and the child, written justification for the adoption and a "certificate of domicile" verifying the potential prospective parent's place of residence.

U.S. Immigration Requirements: A Guinea child, even if adopted by an American citizen, must obtain an immigrant visa before he or she can enter the U.S. as a lawful permanent resident. Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please review current reports online at http://adoption.state.gov.

Questions: Specific questions regarding adoption in Guinea may be addressed to the Consular Section of the U.S. Embassy in Conakry.

You may also contact the Office of Children's Issues, SA-29, 2201 C Street, NW, U.S. Department of State, Washington, DC 20520-2818, telephone 1-888-407-4747 with specific questions.

GUINEA-BISSAU

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Guinea-Bissau

PROFILE

Geography

Area: (including Bijagos Archipelago) 36,125 sq. km., about the size of Maryland.

Cities: Capital—Bissau. Other cities—Bafata, Gabu, Canchungo, Farim, Cacheu. Regions: Oio, Tombali, Cacheu, Bolama, Quinara, Biombo, Bafata, Gabu.

Terrain: Coastal plain; savanna in the east.

Climate: Tropical.

People

Nationality: Noun and adjective—Bissau-Guinean(s).

Population: (2006) 1,700,000.

Population growth rate: (2005) 3%.

Ethnic groups: Balanta 30%, Fula 20%, Manjaca 14%, Mandinga 13%, Papel 7%, others 16%.

Religions: Indigenous beliefs 50%, Muslim 45%, Christian 5%.

Languages: Portuguese (official), Creole, French, many indigenous languages: Balanta-Kentohe 26%; Pulaar 18%; Mandjak 12%; Mandinka 11%; Pepel 9%; Biafada 3%; Mancanha 3%; Bidyogo 2%; Ejamat 2%; Mansoanka 1%; Bainoukgunyuno 1%; Nalu 1%; Soninke 1%; Badjara 1%; Bayote 0,5%; Kobiana 0,04%; Cassanga 0,04%, Basary 0, 03%.

Education: Years compulsory—4. Literacy (2005)—39.6% of adults.

Health: Infant mortality rate (2005)—200 deaths/1,000 live births. Life expectancy (2005)—45.8.

Work force: (480,000) Agriculture—85%; industry, services, and commerce—13%; government—2%.

Government

Type: Republic, multi-party since 1991.

Independence: September 24, 1973 (proclaimed unilaterally); September 10, 1974 (de jure from Portugal).

Constitution: Adopted 1984. The National Assembly adopted a new constitution in 2001, but it was neither promulgated nor vetoed by the President.

Government branches: Executive—president (chief of state), prime minister (head of government) and Council of State, ministers and secretaries of state. Legislature—National Popular Assembly (ANP), 100 members directly elected in 2004. Judicial—Supreme Court and lower courts.

Political subdivisions: Autonomous sector of Bissau and eight regions.

Political parties: In the March 2004 parliamentary elections, the African Party for the Independence of Guinea-Bissau and Cape Verde (PAIGC) won 45 seats; the Social Renovation Party (PRS) won 35 seats; and the United Social Democratic Party (PUSD) won 17 seats. In addition to these three major parties, there are numerous other political parties.

Suffrage: Universal at 18.

Economy

GDP: (2007) $386.8 million (est.).

Annual growth rate: (2007) 3.7%.

GDP per capita PPP: (2005) $600 (est.).

Natural resources: Fish and timber. Bauxite and phosphate deposits are not exploited; offshore petroleum.

Agriculture: Products—cashews, tropical fruits, rice, peanuts, cotton, palm oil. Arable land—11%. Forested—38%.

Industry: Very little industrial capacity remains following the 1998 internal conflict. The cashew processing industry is nascent.

Trade: Exports—$110 million (f.o.b., 2006): cashews ($66 million, 2006), fish and shrimp ($1 million, 2006). Major markets (2006)—India 72.4%, Nigeria 17.2%, Ecuador 4.1%, Italy 1.4%, and South Korea 1.3%. Imports—$28 million (f.o.b., 2006): food ($49 million, 2005), fuel and energy ($20 million, 2006), capital goods ($8 million, 2006). Major suppliers (2006)—Senegal 22.6%, Portugal 17.7%, Italy 12.2%, Pakistan 4.3%, and Cote d'Ivoire 3.2%.

PEOPLE

The population of Guinea-Bissau is ethnically diverse with distinct languages, customs, and social structures. Most people are farmers, with traditional religious beliefs (animism); 45% are Muslim, principally Fula and Mandinka speakers concentrated in the north and northeast. Other important groups are the Balanta and Papel, living in the southern coastal regions, and the Manjaco and Mancanha, occupying the central and northern coastal areas.

HISTORY

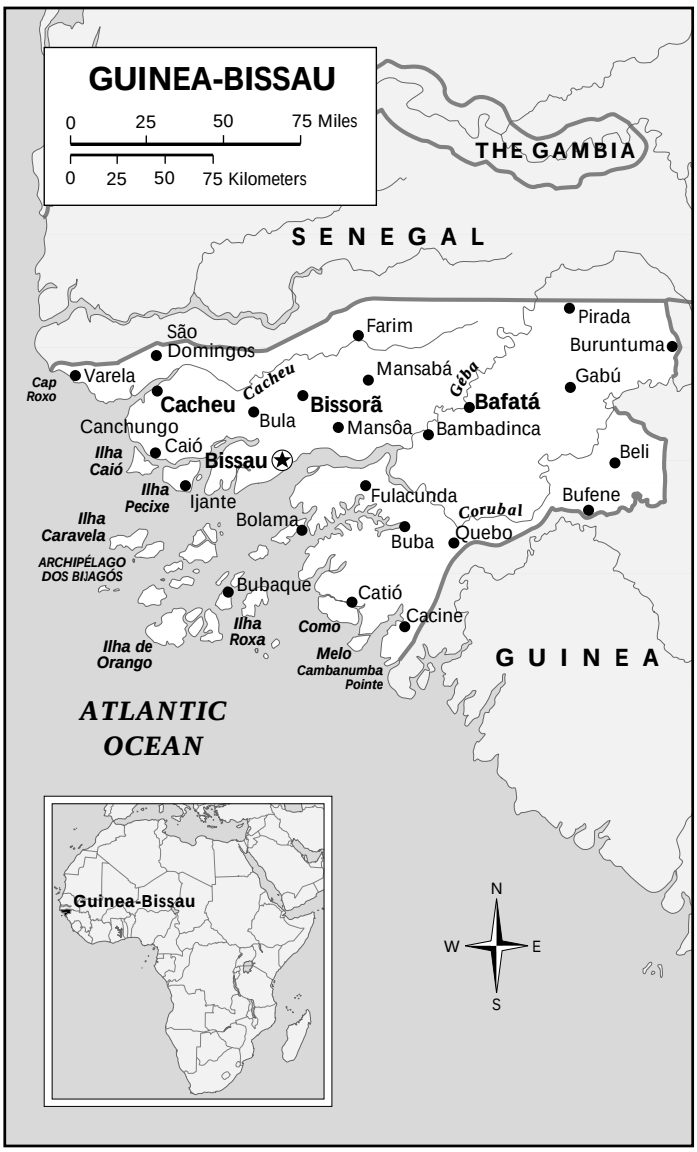
The rivers of Guinea and the islands of Cape Verde were among the first areas in Africa explored by the Portuguese in the 15th century. Portugal claimed Portuguese Guinea in 1446, but few trading posts were established before 1600. In 1630, a "captaincy-general" of Portuguese Guinea was established to administer the territory. With the cooperation of some local tribes, the Portuguese entered the slave trade and exported large numbers of Africans to the Western Hemisphere via the Cape Verde Islands. Cacheu became one of the major slave centers, and a small fort still stands in the town. The slave trade declined in the 19th century, and Bissau, originally founded as a military and slave-trading center in 1765, grew to become the major commercial center.

Portuguese conquest and consolidation of the interior did not begin until the latter half of the 19th century. Portugal lost part of Guinea to French West Africa, including the center of earlier Portuguese commercial interest, the Casamance River region. A dispute with Great Britain over the island of Bolama was settled in Portugal's favor with the involvement of U.S. President Ulysses S. Grant.

Before World War I, Portuguese forces, with some assistance from the Muslim population, subdued animist tribes and eventually established the territory's borders. The interior of Portuguese Guinea was brought under control after more than 30 years of fighting; final subjugation of the Bijagos Islands did not occur until 1936. The administrative capital was moved from Bolama to Bissau in 1941, and in 1952, by constitutional amendment, the colony of Portuguese Guinea became an overseas province of Portugal.

In 1956, Amilcar Cabral and Raphael Barbosa organized the African Party for the Independence of Guinea and Cape Verde (PAIGC) clandestinely. The PAIGC moved its headquarters to Conakry, Guinea, in 1960 and started an armed rebellion against the Portuguese in 1961. Despite the presence of Portuguese troops, which grew to more than 35,000, the PAIGC steadily expanded its influence until, by 1968, it controlled most of the country.

It established civilian rule in the territory under its control and held elections for a National Assembly. Portuguese forces and civilians increasingly were confined to their garrisons and larger towns. The Portuguese Governor and Commander in Chief from 1968 to 1973, Gen. Antonio de Spinola, returned to Portugal and led the movement that brought democracy to Portugal and independence for its colonies.



Amilcar Cabral was assassinated in Conakry in 1973, and party leadership fell to Aristides Pereira, who later became the first President of the Republic of Cape Verde. The PAIGC National Assembly met at Boe in the southeastern region and declared the independence of Guinea-Bissau on September 24, 1973. Following Portugal's April 1974 revolution, it granted independence to Guinea-Bissau on September 10, 1974. The United States recognized the new nation that day. Luis Cabral, Amilcar Cabral's half-brother, became President of Guinea-Bissau. In late 1980, the government was overthrown in a relatively bloodless coup led by Prime Minister and former armed forces commander Joao Bernardo "Nino" Vieira.

From November 1980 to May 1984, power was held by a provisional government responsible to a Revolutionary Council headed by President Joao Bernardo Vieira. In 1984, the council was dissolved, and the National Popular Assembly (ANP) was reconstituted. The single-party assembly approved a new constitution, elected President Vieira to a new 5-year term, and elected a Council of State, which was the executive agent of the ANP. Under this system, the president presided over the Council of State and served as head of state and government. The president also was head of the PAIGC and commander in chief of the armed forces.

There were alleged coup plots against the Vieira government in 1983, 1985, and 1993. In 1986, first Vice President Paulo Correia and five others were executed for treason following a lengthy trial. In 1994, the country's first multi-party legislative and presidential elections were held. An army uprising against the Vieira government in June 1998 triggered a bloody civil war that created hundreds of thousands of displaced persons and resulted in President Vieria having to request assistance from the governments of Senegal and Guinea, who provided troops to quell the uprising. The President was ousted by a military junta in May 1999. An interim government turned over power in February 2000 when opposition leader Kumba Yala, founder of the Social Renovation Party (PRS), took office following two rounds of transparent presidential elections.

Despite the elections, democracy did not take root in the succeeding 3 years. President Yala neither vetoed nor promulgated the new constitution that was approved by the National Assembly in April 2001. The resulting ambiguity undermined the rule of law. Impulsive presidential interventions in ministerial operations hampered effective governance. On November 14, 2002, the President dismissed the government of Prime Minister Alamara Nhasse, dissolved the National Assembly, and called for legislative elections. Two days later, he appointed Prime Minister Mario Pires to lead a caretaker government

controlled by presidential decree. Elections for the National Assembly were scheduled for April 2003, but later postponed until June and then October. On September 12, 2003, the President of the National Elections Commission announced that it would be impossible to hold the elections on October 12, 2003, as scheduled. The army, led by Chief of Defense General Verrisimo Correia Seabra, intervened on September 14, 2003. President Yala announced his "voluntary" resignation and was placed under house arrest. The government was dissolved and a 25-member Committee for Restoration of Democracy and Constitutional Order was established. On September 28, 2003, businessman Henrique Rosa was sworn in as President. He had the support of most political parties and of civil society. Artur Sanha, PRS President, was sworn in as Prime Minister. On March 28 and 30, 2004, Guinea-Bissau held legislative elections which international observers deemed acceptably free and fair. On May 9, 2004, Carlos Gomes Junior became Prime Minister.

GOVERNMENT AND POLITICAL CONDITIONS

On August 10, 2005 Joao Bernardo Vieria was declared the winner of a July 24 presidential runoff election over Malam Bacai Sanha in an election judged by international observers to be free and fair. President Vieria was inaugurated on October 1, 2005. Prime Minister Carlos Gomes Junior refused to accept Vieira's victory, and on October 28, Vieira dismissed Gomes and his government. Five days later, he installed former PAIGC official Aristide Gomes as Prime Minister.

Throughout 2006, President Vieira struggled to maintain control over the National Assembly and the general operations of the government. In early March 2007, the three main political parties—the PAIGC, the PRS, and the PUSD—agreed to push for a "government of consensus" in the interests of parliamentary stability. President Vieira refused to accept the decision, and on March 19 the National Popular Assembly passed a vote of no confidence against Prime Minister Aristide Gomes. President Vieira was then faced with the decision of dissolving the government and calling for new elections or appointing a new prime minister. Prime Minister Gomes resigned on March 29. In early April 2007, after much resistance, President Vieira accepted the appointment of Martinho N'Dafa Cabi as the new Prime Minister.

Prime Minister Cabi has called for a "relentless" fight against drug trafficking and vowed to instill fiscal discipline in the Government of Guinea-Bissau. This is especially important given the recent increase in news media reports examining Guinea-Bissau's role in the West African regional drug trade.

The government has implemented a number of policies to this end, and has succeeded in gaining the support of many in the donor community. Guinea-Bissau is perceived to be gaining political stability under this government, while still fragile. Parliamentary elections are scheduled for November 16, 2008. This election will be crucial to the ongoing efforts for growth and stability in the country.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Joao Bernardo VIEIRA**
Prime Min.: **Carlos CORREIA**
Min. of Admin. Reform: **Carlos COSTA**
Min. of Defense: **Marciano Silva BARBEIRO**
Min. of Economy & Regional Integration: **Carlos Mussa BALDE**
Min. of Education: **Marcelino VAZ**
Min. of Finance: **Issuf SANHA**
Min. of Fisheries: **Armando Ramos da SILVA**
Min. of Foreign Affairs, Intl. Cooperation, & Diaspora: **Maria da Conceicao Nobre CABRAL**
Min. of Health: **Camilo Simoes PEREIRA**
Min. of Interior: **Cipriano CASSAMA**
Min. of Justice: **Carmelita Barbosa Rodrigues PIRES**
Min. of Labor & Public Affairs: **Fernando GOMES**
Min. of Natural Resources & Environment: **Snares SAMBU**
Min. of Public Works & Housing: **Dionisio CABI**
Min. of Rural Development: **Sola Nkilin Na BITCHA**
Min. of Social Communication: **Fernando MENDONCA**
Min. of Social Solidarity, Family, & Poverty Eradication: **Fernando GOMES**
Min. of Tourism: **Francisco Conduto de PINA**
Min. of Trade, Industry, & Handicraft: **Luis Oliveira SANCA**
Min. of Transportation & Communications: **Vicente BLUTE**
Min. for Veteran Affairs: **Boata NANBATCHA**
Min. of Youth, Culture, & Sports: **Adiato Diallo NANDIGNA**
Permanent Representative to the UN, New York: **Alfredo Lopes CABRAL**

Guinea-Bissau does not have official representation in Washington, DC.

ECONOMY

Guinea-Bissau is among the world's least developed nations and depends mainly on agriculture and fishing. Guinea-Bissau exports some fish and seafood, although most fishing in Guinea-Bissau's waters is presently not done by Bissau-Guineans and very little fish and seafood is processed in Guinea-Bissau. The country's other important product is cashews. License fees for fishing provide the government with some revenue. Rice is a major crop and staple food and, if developed, Guinea-Bissau could potentially be self-sufficient in rice. Tropical fruits such as mangos could also provide more income to the country if the sector were developed. Because of high costs, the development of petroleum, phosphate, and other mineral resources is not a near-term prospect. However, unexploited offshore oil reserves may possibly provide much-needed revenue in the long run.

The military conflict that took place in Guinea-Bissau from June 1998 to early 1999 caused severe damage to the country's infrastructure and widely disrupted economic activity. Agricultural production is estimated to have fallen by 17% during the conflict, and the civil war led to a 28% overall drop in gross domestic product (GDP) in 1998. Cashew nut output, the main export crop, declined in 1998 by an estimated 30%. World cashew prices dropped by more than 50% in 2000, compounding the economic devastation caused by the conflict. Before the war, trade reform and price liberalization were the most successful part of the country's structural adjustment program under International Monetary Fund (IMF) sponsorship. Under the government's post-conflict economic and financial program, implemented with IMF and World Bank input, real GDP recovered in 1999 by almost 8%. In December 2000 Guinea-Bissau qualified for almost $800 million in debt-service relief under the first phase of the enhanced Heavily Indebted Poor Countries (HIPC) initiative. However, Guinea-Bissau's Poverty Reduction and Growth Fund program with the IMF was suspended that same month—following disbursement of the first tranche—due to off-program expenditures by the Yala regime. Thus, IMF and Paris Club internal debt relief for Guinea-Bissau was also suspended in 2001.

After a disastrous 2006, Guinea-Bissau's economy bounced back in 2007. Cashews, the country's principal cash crop, rebounded strongly in 2007 after the government's 2006 attempt to artificially set the price of cashews at 70 U.S. cents/kg—more than twice what traders were willing to pay. The economy also benefited from robust growth in the country's tourism industry. Guinea-Bissau appears ready to continue its economic growth in 2008 with new support from international donors and a recovery in cashew exports. Guinea Bissau has announced that Angola will be investing U.S. $500 million in a project to mine 3 million tons of bauxite per year. The IMF and World Bank resumed development support, and in January 2008 the IMF announced its approval for $2.8 million in emergency post-conflict assistance. Oil prospecting continues; however, this has yet to provide results that would encourage significant investment. GDP is projected to increase in 2008, with the deficit projected to decrease.

FOREIGN RELATIONS

Guinea-Bissau follows a nonaligned foreign policy and seeks friendly and cooperative relations with a wide variety of states and organizations. The European Union, France, Gambia, Portugal, Brazil, Egypt, Nigeria, People's Republic of China, Libya, Senegal, Guinea, the Palestinian Authority, and Russia have embassies in Bissau. Belgium, Canada, Germany, Mauritania, the Netherlands, Italy, Spain, Sweden, Switzerland, the United Kingdom, and the U.S. conduct diplomatic relations with Guinea-Bissau through their embassies in neighboring Dakar, Senegal.

Guinea-Bissau is a member of the UN and many of its specialized and related agencies. It is a member of the World Bank and the International Monetary Fund (IMF); African Development Bank (AFDB), Economic Community of West African States (ECOWAS), West African Economic and Monetary Union (WAEMU), Organization of the Islamic Conference (OIC), African Union, and permanent Interstate Committee for drought control in the Sahel (CILSS). Guinea-Bissau also is

a member of the Group of 77 (G-77), International Civil Aviation Organization (ICAO), Food and Agriculture Organization (FAO), and World Health Organization (WHO).

U.S.-GUINEA-BISSAU RELATIONS

The U.S. Embassy suspended operations in Bissau on June 14, 1998, in the midst of violent conflict between forces loyal to then-President Vieira and the military-led junta. Prior to and following the Embassy closure, the United States and Guinea-Bissau have enjoyed excellent bilateral relations.

The U.S. recognized the independence of Guinea-Bissau on September 10, 1974. Guinea-Bissau's Ambassador to the United States and the United Nations was one of the first the new nation sent abroad. The U.S. opened an Embassy in Bissau in 1976, and the first U.S. Ambassador presented credentials later that year.

U.S. assistance began in 1975 with a $1 million grant to the UN High Commissioner for Refugees for resettlement of refugees returning to Guinea-Bissau and for 25 training grants at African technical schools for Guinean students. Emergency food was a major element in U.S. assistance to Guinea-Bissau in the first years after independence. Since 1975, the U.S. has provided more than $65 million in grant aid and other assistance. Since the 1998 war the U.S. has provided over $800,000 for humanitarian demining to a non-governmental organization (NGO) which has removed over 2,500 mines and 11,000 unexploded ordnance from the city of Bissau; $1.6 million in food aid; and nearly $3 million for assistance for refugees, improving the cashew industry, and promoting democracy. The United States and Guinea-Bissau signed an international military education and training (IMET) agreement in 1986, and prior to 1998, the U.S. provided English-language teaching facilities as well as communications and navigational equipment to support the navy's coastal surveillance program. The U.S. European Command's Humanitarian Assistance Program has assisted with $390,000 for constructing or repairing schools, health centers, and bridges.

The Peace Corps withdrew from Guinea-Bissau in 1998 at the start of the civil war.

In August 2004, sanctions under Section 508 of the Foreign Operations Appropriations Act—which were imposed as a result of the September 2003 military coup—were lifted and Bissau once again became eligible for IMET and other direct aid.In March 2007, the U.S. and Brazil signed a Tripartite Memorandum of Understanding with Guinea-Bissau highlighting a parliamentary strengthening project first implemented in 2005.

TRAVEL

Consular Information Sheet

July 8, 2008

Country Description: The Republic of Guinea-Bissau, a small country in western Africa, is one of the world's poorest nations. The capital is Bissau and the official language is Portuguese. The country underwent a civil war in 1998-99 that devastated the economy. Tourist facilities and infrastructure in general are very limited and not up to American standards.

Entry Requirements: A valid passport, visa, and proof of onward/return ticket are required. As of August 2007, the Bissau-Guinean Embassy in Washington, D.C. remains temporarily closed. The Embassy of Guinea-Bissau does not have a web site. Due to lack of consular representation in the U.S., it is difficult to obtain the required visa for entry into Guinea-Bissau. Since most flights destined for Guinea-Bissau must pass through Dakar, Senegal or Lisbon, Portugal, most travelers are able to apply for visas at the Bissau-Guinean embassies in those countries. Although it is possible to obtain a visa upon arrival in Bissau if arrangements are made in advance, there are no clear instructions for how to make those arrangements.

Safety and Security: There is no permanent U.S. diplomatic or consular presence in Guinea-Bissau. The U.S. Embassy in Bissau suspended operations on June 14, 1998. While officials from the U.S. Embassy in Dakar, Senegal, make periodic visits to Guinea-Bissau, their ability to provide consular services, including emergency assistance, is very limited. The U.S. maintains a liaison office in Bissau, located at Edifício SITEC, Rua José Carlos Schwarz 245, Bairro d'Ajuda (tel/fax 245-256382, 245-5954647). This office is staffed by locally employed staff and, while not equipped to provide consular services, may be contacted in the event of an emergency. The nearest U.S. Embassies are located in Banjul, the Gambia; Conakry, Guinea; and Dakar, Senegal.

Although the civil war that led to the closure of the U.S. Embassy ended in 1999 and elections were held in June and July 2005, travelers should be aware that political tensions persist. Sporadic politically-motivated violence remains an issue. Due to the

potential for violence, U.S. citizens should avoid political gatherings and street demonstrations, and maintain security awareness at all times. With legislative elections scheduled for late 2008, the potential for future political unrest remains high.

In December 2004, the Government of Senegal and some factions of the Movement of Democratic Forces of the Casamance (MFDC), a Senegalese separatist movement, instituted an end to hostilities and agreed to negotiate with the goal of achieving a definitive end to the armed conflict in the Casamance. This conflict has not yet been resolved, however, and its effects reach into Guinea-Bissau. In the spring of 2006, Bissau-Guinean military forces conducted offensive operations near the town of Sao Domingos to expel elements of the MFDC. The fighting reportedly resulted in dozens of military and civilian casualties, mostly from landmine explosions. There are currently instances of fighting in the Casamance region (composed of the Ziguinchor and Kolda regions) involving factions of the Casamance separatist MFDC (Mouvement des Forces Démocratiques de la Casamance) in southern Senegal and the Senegalese military. Although the recent escalation in hostilities has not spilled over into Guinea-Bissau, the potential for conflict along the border remains.

Unexploded military ordnance and landmines remain scattered throughout the country. Although the capital city of Bissau was declared "mine-free" in June 2006 by the national demining center (CAAMI), occasional findings or unintentional explosions do occur. There are two non-governmental organizations (NGOs) active in successfully removing mines.

To minimize the risks posed by both bandits and landmines, U.S. citizens are encouraged to limit driving outside of towns to daylight hours only and to remain on well-traveled roads at all times.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Although there is a fairly low incidence of normal daytime street crime, travelers should observe security precautions in the city, particularly with regard to pickpocket activity in marketplaces. Travelers should refrain from walking alone at night. The lack of reliable public electricity means that urban streets are dark at night, even in Bissau. There have been periodic incidents of bandits accosting travelers in rural areas.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: While modern medical facilities are virtually nonexistent in Guinea-Bissau and travelers should not rely on them, emergency medical care may be possible at a new hospital in Bissau operated by the Sant'Egidio Community. Monday to Saturday there are flights from Bissau to Dakar, Senegal, where more acceptable levels of medical care are available. Malaria, a serious and sometimes fatal disease, is a risk for travelers to Guinea-Bissau. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Guinea-Bissau is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

The public transportation system, urban and rural road conditions, and the availability of roadside assistance are all poor. There is no consistent public electricity in the capital, and the lack of lighting at night makes careful driving essential. Since there are minefields left over from the civil war and the war of independence, travelers should not leave designated roads and pathways. The landmines are scattered in several areas throughout Guinea-Bissau, including Bafata, Oio, Biombo, Quinara, and Tombali regions. In addition, there are reports of unexploded ordinance located near the Embassies of Russia, France, the European Union and China.

While there has been significant progress in locating and removing landmines, the threat remains substantial. Speak with local authorities

first and use caution if leaving a main road or highway to enter a trail network or to make other types of cross-country movement.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Guinea-Bissau, the U.S. Federal Aviation Administration (FAA) has not assessed Guinea-Bissau's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's internet web site at http://www.faa.gov.

Special Circumstances: Guinea-Bissau's customs authorities may enforce strict regulations concerning the temporary import or export of items such as firearms, antiquities, medications, and business equipment. (See contact information in the section on Entry Requirements.)

International banking and finance is problematic due to a limited formal banking sector. ATMs are rarely available, credit cards are rarely accepted, currency exchange outside of the black market is almost non-existent, wire transfer possibilities are extremely limited, and repatriation of funds is problematic.

As there is currently no U.S. Embassy in Guinea-Bissau, U.S. consular officials may not be properly notified when an American citizen is arrested or detained in Guinea-Bissau. Because notification would have to be made to consular officers at U.S. Embassies in neighboring countries, there may be a delay in consular access to such citizens. U.S. citizens are encouraged to carry a notarized copy of their U.S. passports with them at all times so that, if questioned by local officials, proof of identity and U.S. citizenship is readily available.

Taking photographs of anything that could be perceived as being of military or security interest may result in problems with authorities. Guinea-Bissau has a cash-only economy, so travelers should not count on using credit cards and ATMs.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Bissau-Guinean laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Guinea-Bissau are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Guinea-Bissau are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Guinea-Bissau. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy in Guinea-Bissau remains closed. U.S. citizens who plan to enter Guinea-Bissau are encouraged to register with the Consular Section of the U.S. Embassy at Avenue Jean XXIII, Dakar, Senegal. The mailing address is B.P. 49, Dakar, Senegal. The telephone number is (221) 33 829-2100 and the fax is (221) 33 822-2991. The e-mail address is consulardakar@state.gov. The web site is http://dakar.usembassy.gov.

Intercountry Adoption

October 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: The U.S. Embassy in Dakar, Senegal issues immigrant visas for Bissau-Guinean citizens, including adopted orphans. Please review carefully the information found later in this flyer regarding the immigrant visa procedures at the U.S. Embassy in Dakar. Failure to comply with the Embassy's requirements could result in a denial of the child's visa case.

Patterns of Immigration: Recent U.S. immigrant visa statistics indicate that fewer than five immigrant visas have been issued to Bissau-Guinean orphans in the last five years.

Adoption Authority: The Ministry of Child Protection is responsible for intercountry adoptions in Guinea-Bissau. Adoption laws are outlined in Article 1974 of the civil code. In the adoption process, the Public Ministry will appoint a lawyer to ensure that the child's rights are protected. The Regional Tribunal in Guinea Bissau (Juiz de Direito da Seccao de Familia, Tribunal Regional de Bissau) is the court that approves intercountry adoptions.

Types Of Adoption: There are two types of adoptions in Guinea Bissau: simple adoption (adopcao restrita) and full adoption (adopcao plena). In a simple adoption, the ties of the child

to his birth family cannot be definitively proven and the child may continue to have contact with his or her biological family. Simple adoptions are revocable. In contrast, full adoptions are irrevocable and are granted when one or both parents have died and any living biological parent has severed ties with the child.

In these cases, the child will take the last name of the adopting parents and be considered their legitimate child. Only full adoption is recognized for U.S. immigration purposes. Adoption lawyers and authorities in Guinea-Bissau are aware that full adoption is required. In order to adopt, the prospective adoptive parents must have a local lawyer and meet the eligibility requirements.

Eligibility Requirements for Adoptive Parents: According to the Civil Code, the adoption must meet four basic criteria:

- the adoption should benefit the child;
- the child should be under age 14 and not emancipated;
- the adoption must be with the full consent of the child if he/she is 14 years old or older, unless he/she is mentally disabled, and;
- the adoptive parents must be between the ages of 25 and 60, married more than five years, and not legally or voluntarily separated.

The U.S. Government is aware of cases in which a single parent has successfully adopted an orphan. Adoptive parents must be able to demonstrate that they have adequate financial resources (through employment, tax records, home ownership, or other assets), no criminal record, and the emotional capacity to care for the child (usually described in a home study).

Residency Requirements: There are no residency requirements for adoptive parents.

Time Frame: The adoption process in Guinea-Bissau can take from six months to two years to complete. Once the case has been presented to the Court (Direito da Seccao de Familia), final review and the issuance of the adoption decree typically take one to two weeks.

Adoption Agencies and Attorneys: There are no adoption agencies in Guinea-Bissau. Two private nongovernmental organizations (NGOs) operate centers for orphans and abandoned children: the SOS Village and Casa Emanuel, both in Bissau. Foreign parents have adopted orphans from the Casa Emanuel orphanage in the past. A local lawyer is required to handle all of the requisite legal paperwork. The U.S. Embassy cannot recommend the services of any specific attorney or organization.

Adoption Fees: The fee for issuing an adoption decree is 400,000 West African Francs (CFAF) or approximately $750. This does not include additional fees that may be incurred for the lawyer's time, translation, and other expenses. The total cost to the lawyer is approximately $1,000 to $2,000 and subject to change.

Adoption Procedures: Because relatively few foreigners have adopted Bissau-Guinean orphans, the specific procedures to adopt an orphan are unclear. In general, adopting parents have identified an orphan through the help of a foreign adoption agency and the local orphanage before presenting the supporting documents to a private lawyer, who then presents the case before the Regional Tribunal.

Required Documents:

- Certified true copies of the adopting parent(s)' birth certificates;
- Certified true copies of the adopting parents' marriage certificate, if applicable;
- Police record or certification of the lack thereof;
- Financial documents of the adopting parents (employment records, documentation of assets, retirement and social security);
- Home study describing the social situation of the adopting parent(s);
- Birth certificate of the orphan;
- Death certificate(s) of the biological parents(s), if applicable, and;
- Statement of relinquishment of the biological parent(s), if applicable.

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

American Embassy Dakar

Additional Information: Specific questions about adoption in Guinea-Bissau may be addressed to the U.S. Embassy in Dakar. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

GUYANA

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Co-operative Republic of Guyana

PROFILE

Geography

Area: 214,970 sq. km. (83,000 sq. mi.); about the size of Idaho.

Cities: Capital—Georgetown (pop. 150,000). Other cities—Linden (29,000) and New Amsterdam (18,000).

Terrain: Low coastal plain, hilly sand and clay region, forested highlands, interior savanna.

Climate: Tropical.

People

Nationality: Noun and adjective—Guyanese (sing. and pl.).

Population: (2006, Government of Guyana) 760,200.

Ethnic groups: East Indian origin 43%, African origin 30%, mixed 17%, Amerindian 9%.

Religions: Christian 50%, Hindu 35%, Muslim 10%, other 5%.

Languages: English, Guyanese Creole, Amerindian languages (primarily Carib and Arawak).

Education: Years compulsory—ages 5 1/2-14 1/2. Attendance—primary 93.6%, secondary 93%. Literacy—96.5% of adults who have attended school.

Health: Infant mortality rate—49/1,000. Life expectancy—men 59 yrs., women 64 yrs.

Work force: (278,000) Industry and commerce—36.4%; agriculture—30.2%; services—30.2%; other—3.2%.

Government

Type: Republic within the Commonwealth.

Independence: May 26, 1966; Republic, February 23, 1970.

Constitution: 1980

Government branches: Executive—president (chief of state and head of government), prime minister. Legislative—unicameral National Assembly of 65 deputies. The ten administrative regions of the country elect 25 members, 40 are elected from party lists by proportion of the national vote. Judicial—Judicial Court of Appeal, High Court.

Political subdivisions: 10 regions.

Political parties: (voting seats in the National Assembly) People's Progressive Party/Civic (PPP/C) 36; People's National Congress (PNC) 22; Alliance for Change (AFC) 5, Guyana Action Party/Rise Organize and Rebuild (GAP/ROAR) 1; and The United Force (TUF) 1. Total seats: 65. Elections held August 28, 2006.

Suffrage: Universal at 18.

Economy (2007)

Real GDP: $847.9 million.

Real annual growth rate: 5.4%.

Per capita GDP: $1,111

Agriculture: Products—sugar, rice, fresh fruits and vegetables.

Natural resources: Gold, bauxite, diamonds, timber, shrimp, fish.

Industry: Types—mining (gold, bauxite, diamonds), agriculture (sugar, rice, livestock, fresh fruits and vegetables), forestry, fisheries, manufacturing (beverage, foodstuff processing, apparel, footwear assembly, pharmaceuticals), construction, and services (distribution, financial, transport and communication).

Trade: (merchandise) Exports—$680.9 million: gold, sugar, bauxite, fish and shrimp, rice, timber, diamonds. Major markets—U.S., Canada, U.K. Imports—$1.06 billion. Major suppliers—Trinidad and Tobago, U.S., China, Cuba, U.K.

PEOPLE

Guyana's population is made up of five main ethnic groups—East Indian, African, Amerindian, Chinese, and Portuguese. Ninety percent of the inhabitants live on the narrow coastal plain, where population density is more than 115 persons per square kilometer (380 per sq. mi.). The population density for Guyana as a whole is low—less than four persons per square kilometer. Although the government has provided free education from nursery school to the university level since 1975, it has not

allocated sufficient funds to maintain the standards of what had been considered the best educational system in the region. Many school buildings are in poor condition, there is a shortage of text and exercise books, the number of teachers has declined, and fees are being charged at the university level for some courses of study for the first time.

HISTORY

Before the arrival of Europeans, the region was inhabited by both Carib and Arawak tribes, who named it Guiana, which means land of many waters. The Dutch settled in Guyana in the late 16th century, but their control ended when the British became the de facto rulers in 1796. In 1815, the colonies of Essequibo, Demerara, and Berbice were officially ceded to Great Britain at the Congress of Vienna and, in 1831, were consolidated as British Guiana. Following the abolition of slavery in 1834, thousands of indentured laborers were brought to Guyana to replace the slaves on the sugarcane plantations, primarily from India but also from Portugal and China. The British stopped the practice in 1917. Many of the Afro-Guyanese former slaves moved to the towns and became the majority urban population, whereas the Indo-Guyanese remained predominantly rural. A scheme in 1862 to bring black workers from the United States was unsuccessful. The small Amerindian population lives in the country's interior.

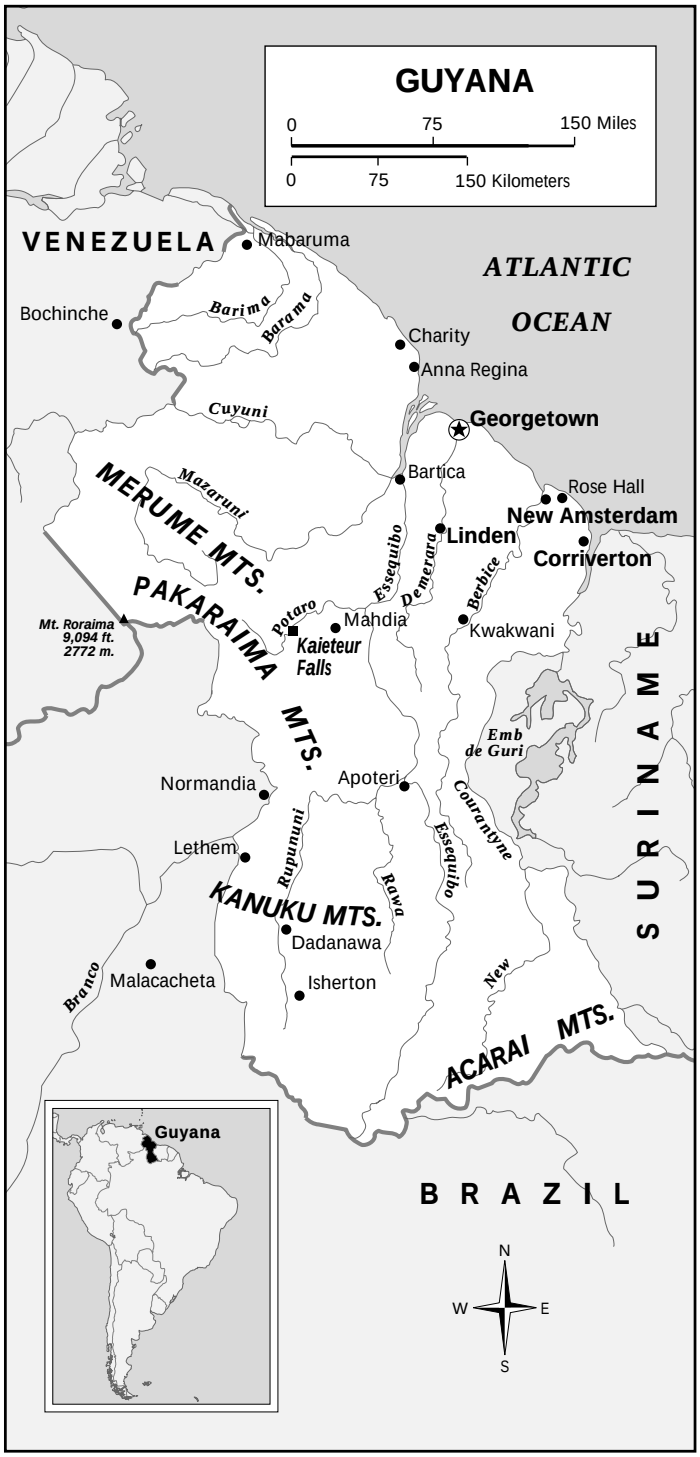
The people drawn from these diverse origins have coexisted peacefully for the most part. Slave revolts, such as the one in 1763 led by Guyana's national hero, Cuffy, demonstrated the desire for basic rights but also a willingness to compromise. Politically inspired racial disturbances between Indo-Guyanese and Afro-Guyanese erupted in 1962-64, and again following elections in 1997 and 2001. The conservative and cooperative nature of Guyanese society has contributed to a cooling of racial tensions; however, such tensions do constitute Guyana's most sensitive social stress point. Guyanese political history has been turbulent. The first modern political party in Guyana was the People's Progressive Party (PPP), established on January 1, 1950, with Forbes Burnham, a British-educated Afro-Guyanese, as chairman; Dr. Cheddi Jagan, a U.S.-educated Indo-Guyanese, as second vice chairman; and his American-born wife, Janet Jagan, as secretary general. The PPP won 18 out of 24 seats in the first popular elections permitted by the colonial government in 1953, and Dr. Jagan became leader of the house and minister of agriculture in the colonial government. Five months later, on October 9, 1953, the British suspended the constitution and landed troops because, they said, the Jagans and the PPP were planning to make Guyana a communist state. These events led to a split in the PPP, in which Burnham broke away and founded what eventually became the People's National Congress (PNC).

Elections were permitted again in 1957 and 1961, and Cheddi Jagan's PPP ticket won on both occasions, with 48% of the vote in 1957 and 43% in 1961. Cheddi Jagan became the first premier of British Guiana, a position he held for 7 years. At a constitutional conference in London in 1963, the U.K. Government agreed to grant independence to the colony but only after another election in which proportional representation would be introduced for the first time. It was widely believed that this system would reduce the number of seats won by the PPP and prevent it from obtaining a clear majority in Parliament. The December 1964 elections gave the PPP 46%, the PNC 41%, and the United Force (TUF), a conservative party, 12%. TUF threw its votes in the legislature to Forbes Burnham, who became prime minister.

Guyana achieved independence in May 1966, and became a republic on February 23, 1970—the anniversary of the Cuffy slave rebellion. From December 1964 until his death in August 1985, Forbes Burnham ruled Guyana in an increasingly autocratic manner, first as prime minister and later, after the adoption of a new constitution in 1980, as executive president. During that timeframe, elections were viewed in Guyana and abroad as fraudulent. Human rights and civil liberties were suppressed, and two major political assassinations occurred: the Jesuit Priest and journalist Bernard Darke in July 1979, and the distinguished historian and WPA Party leader Walter Rodney in June 1980. Agents of President Burnham are widely believed to have been responsible for both deaths.

Following Burnham's own death in 1985, Prime Minister Hugh Desmond Hoyte acceded to the presidency and was formally elected in the December 1985 national elections. Hoyte gradually reversed Burnham's policies, moving from state socialism and one-party control to a market economy and unrestricted freedom of the press and assembly. On October 5, 1992, a new National Assembly and regional councils were elected in the first Guyanese election since 1964 to be internationally recognized as free and fair. Cheddi Jagan was elected and sworn in as president on October 9, 1992. When President Jagan died in March 1997, Prime Minister Samuel Hinds replaced him in accordance with constitutional provisions. President Jagan's widow, Janet Jagan, was elected president in December 1997. She resigned in August 1999 due to ill health and was succeeded by Finance Minister Bharrat Jagdeo, who had been named prime minister a day earlier. National elections were held on March 19, 2001. Incumbent President Jagdeo won reelection with a voter turnout of over 90%. President Jagdeo won re-election again in national elections held on August 28, 2006, the first non-violent elections held in more than 20 years.

GOVERNMENT



Legislative power rests in a unicameral National Assembly, with 40 members chosen on the basis of proportional representation from national lists named by the political parties. An additional 25 members are elected by regional administrative districts. The legislature is not

directly elected; each party presents slates of candidates for the National Assembly. After the election, each party leader selects from the party lists the individuals who will represent the party in the National Assembly. The president may dissolve the assembly and call new elections at any time, but no later than 5 years from its first sitting.

Executive authority is exercised by the president, who appoints and supervises the prime minister and other ministers. The president is not directly elected; each party presenting a slate of candidates for the assembly must designate in advance a leader who will become president if that party receives the largest number of votes. Any dissolution of the assembly and election of a new assembly can lead to a change in the assembly majority and consequently a change in the presidency. Most cabinet ministers must be members of the National Assembly; the constitution limits non-member "technocrat" ministers to five. Technocrat ministers serve as non-elected members of the National Assembly, which permits them to debate but not to vote.

The highest judicial body is the Court of Appeal, headed by a chancellor of the judiciary. The second level is the High Court, presided over by a chief justice. The chancellor and the chief justice are appointed by the president.

For administrative purposes, Guyana is divided into 10 regions, each headed by a chairman who presides over a regional democratic council. Local communities are administered by village or city councils.

Ambassador to the US: **Bayney KARRAN**
Permanent Representative to the UN, New York:

Guyana maintains an embassy in the United States at 2490 Tracy Place NW, Washington, DC 20008 (tel. 202-265-6900).

POLITICAL CONDITIONS

Race and ideology have been the dominant political influences in Guyana. Since the split of the multiracial PPP in 1955, politics has been based more on ethnicity than on ideology. From 1964 to 1992, the PNC dominated Guyana's politics. The PNC draws its support primarily from urban Afro-Guyanese, and for many years declared itself a socialist vanguard party whose purpose was to make Guyana a nonaligned socialist state, in which the party, as in communist countries, was above all other institutions.

A majority of Indo-Guyanese have traditionally backed the People's Progressive Party. Rice farmers and sugar workers in the rural areas form the bulk of PPP's support. Indo-Guyanese who dominate the country's urban business community also have provided important support to both parties, depending on which was in power at the time.

Following independence, and with the help of substantial foreign aid, social benefits were provided to a broader section of the population, specifically in health, education, housing, road and bridge building, agriculture, and rural development. During Forbes Burnham's last years, however, the government's attempts to build a socialist society, including banning importation of basic foodstuffs, caused a massive emigration of skilled workers, and, along with other economic factors, led to a significant decline in the overall quality of life in Guyana.

After Burnham's death in 1985, President Hoyte took steps to stem the economic decline, including strengthening financial controls over the parastatal corporations and supporting the private sector. In August 1987, at a PNC Congress, Hoyte announced that the PNC rejected orthodox communism and the one-party state.

As the elections scheduled for 1990 approached, Hoyte, under increasing pressure from inside and outside Guyana, gradually opened the political system. After a visit to Guyana by former U.S. President Jimmy Carter in 1990, Hoyte made changes in the electoral rules, appointed a new chairman of the Elections Commission, and endorsed putting together new voters' lists, thus delaying the election. The elections, which finally took place in 1992, were witnessed by 100 international observers, including a group headed by Mr. Carter and another from the Commonwealth of Nations. Both groups issued reports saying that the elections had been free and fair, despite violent attacks on the Elections Commission building on election day and other irregularities.

Cheddi Jagan served as Premier (1957-64) and then minority leader in Parliament until his election as President in 1992. One of the Caribbean's most charismatic and famous leaders, Jagan was a founder of the PPP, which led Guyana's struggle for independence. Over the years, he moderated his Marxist-Leninist ideology. After his election as President, Jagan demonstrated a commitment to democracy, followed a pro-Western foreign policy, adopted free market policies, and pursued sustainable development for Guyana's environment. Nonetheless, he continued to press for debt relief and a new global human order in which developed countries would increase assistance to less developed nations. Jagan died on March 6, 1997, and was succeeded by Samuel A. Hinds, whom he had appointed Prime Minister. President Hinds then appointed Janet Jagan, widow of the late President, to serve as Prime Minister.

In national elections on December 15, 1997, Janet Jagan was elected President, and her PPP party won a 55% majority of seats in Parliament. Mrs. Jagan had been a founding member of the PPP and was very active in party politics. In addition to becoming Guyana's first female president, she had also been Guyana's first female prime minister and vice president, two roles she performed concurrently before being elected to the presidency.

The PNC, which won just under 40% of the vote, disputed the results of the 1997 elections, alleging electoral fraud. Public demonstrations and some violence followed, until a CARICOM team came to Georgetown to broker an accord between the two parties, calling for an international audit of the election results, a redrafting of the constitution, and elections under the constitution within 3 years. Elections took place on March 19, 2001. More than 150 international observers representing six international missions witnessed the polling. The observers pronounced the elections fair and open although marred by some administrative problems. As in 1997, public demonstrations and some violence followed the election, with the opposition PNCR disputing the results. The political disturbances following the election partially overlapped and politicized a major crime wave that gripped Guyana from the spring of 2002 through May 2003. By summer 2003 the worst of the crime wave had abated, and agitation over the election had subsided.

A lack of legal clarity over voter registration rules, in particular the legality of Guyanese remaining on the voter rolls after emigrating, fed a political stalemate that delayed the 2006 elections as opposition parties demanded a full house-to-house verification of the voter list. Ultimately, the election was held using the 2001 voting list—which the opposition had earlier deemed valid—plus new registrations. The Organization of American States and the Commonwealth observed the 2006 elections and considered them to be largely free and fair.

In early 2008, national electoral authorities commenced a voter re-registration exercise, scrutinized by the major political parties, in order to produce a fresh and widely accepted voter list. This exercise concludes in July 2008, in anticipation of nationwide municipal elections in early 2009. Municipal elections have not been held since 1994.

A general lack of trust between the predominantly Indo-Guyanese PPP/C and the almost exclusively Afro-Guyanese PNC/R persists. Co-founded prior to the 2006 parliamentary elections by disaffected members of the PPP/C and PNC/R, the Alliance For Change party has attempted to bridge the political and racial divide, but holds only five seats in Parliament and has gained minimal traction.

Due to constitutional term limits, President Jagdeo is not eligible to run for reelection again when his terms concludes in 2011. There is no established frontrunner to succeed him.

ECONOMY

In 2007, the real gross domestic product (GDP) of the Guyanese economy increased by 5.4%, exceeding expectations. Strong growth in the sugar, fishery, livestock, mining, and manufacturing sectors contributed to the economy's performance.

Agriculture

The agricultural sector (including sugar processing and rice milling) recorded a real 0.7% increase during 2007. The growth partly reflected stable weather conditions and large investment in drainage and irrigation facilities. In addition, the government has undertaken initiatives, with U.S. Government support, to increase production in the nontraditional agriculture sector.

Fishing and Livestock

The fishing sector grew 44.3% in real terms in 2007 due to increases of 6.7% and 96.1% in fish and shrimp catches, respectively. The launching of the Fisheries Management Plan, the recertification of Guyanese fish by the U.S., and the construction of an aquaculture hatchery contributed to this increase.

Despite these improvements, the fishing sector continues to be plagued by piracy and increasing machine and fuel costs. In 2007, the livestock sector grew 2% in real terms, largely due to the re-entry of a major livestock producer into the industry, the establishment of additional pastures, and government assistance in controlling pests and diseases.

Forestry

Logging and plywood output decreased in 2007 by 16.1% and 1.2%, respectively. The decrease in logging is largely attributed to the suspension of logging permits as a result of environmental concerns, and increases in freight and insurance costs. In contrast, the production of sawn-wood increased by 10.1%.

Mining

The mining sector grew 22.7% in real terms during 2007. This reflected the substantial investment and restructuring in the bauxite industry in recent years and increased world prices for bauxite and gold.

Manufacturing

The manufacturing sector (excluding sugar processing and rice milling) grew by 1% in 2007. High global prices for inputs adversely affected growth.

Construction

The construction sector grew 5.7% in 2007. Private investment in hotel construction and housing and a 2.2% increase in public sector investment in schools, roads, low-cost housing, and drainage and irrigation contributed to growth.

Services

The service sector increased 7% in 2007. The transport and communications sub-sectors grew by 13%, helped by heightened competition in the telecommunications sector as new cell phone and Internet providers entered the market.

Inflation

The Consumer Price Index (CPI) rose by 14% in 2007, a significant increase from the 4.2% inflation experienced in 2006. This was associated with implementation of a value-added tax (VAT) at the beginning of 2007, rising global food and commodity prices, and increased fuel costs.

Exchange Rate

The exchange rate remains stable; the Guyana dollar currently trades at G$200/U.S.$1.

Merchandise Trade

The trade deficit rose 27.3% to U.S. $381.7 million. The U.S $177.6 million increase in imports more than offset the U.S. $95.7 million increase in export earnings.

Exports

Total export receipts in 2007 amounted to U.S. $680.9 million, 16.4% higher than 2006. This increase was a result of higher world prices of sugar, rice, and gold as well as increased volumes exported. Sugar export earnings increased by 9.6% to U.S. $150.1 million, while the volume of sugar exported increased by 3.1% to 246,013 tons. Rice exports earned

U.S. $75.3 million, an increase of 37.8% over 2006 due largely to higher volumes exported. Receipts from gold exports were U.S. $153.1 million, 33.7% higher than the 2006 level due to an increase in export volume and a significant rise in global precious metal prices. The value of timber exports was U.S. $55.4 million, 0.7% below 2006, following new restrictions on log exports. The value of other timber (excluding plywood) exports increased by 2.1% to U.S. $47.6 million, while the value of plywood exports decreased by 6.9%. Total earnings from all other exports were U.S. $145.5 million, 8.2% less than the previous year. Guyana's primary export markets are the U.S. (18.8%), Canada (18.4%), the U.K. (8.7%), Portugal (6.5%), Trinidad and Tobago (4.9%), Netherlands (4.3%), Belgium (4.3%), and Jamaica (4.1%).

Imports

The value of merchandise imports grew by 20.1% to U.S. $1.06 billion in 2007. The increase reflected activities associated with hosting the Cricket World Cup in 2007 and higher fuel costs. Higher imports of furnishings for the hotel and hospitality industry grew to U.S. $62.1 million from U.S. $29.4 million in 2006. Imports of building and transport machinery, largely for public sector capital projects, grew 44.7% and 49.1%, respectively. Guyana's primary import sources are Trinidad and Tobago (23%), the U.S. (21.3%), China (9.7%), Cuba (6.3%), and the U.K. (4.5%).

Total Investment

Total 2007 investment rose by 4.9% to U.S. $434.0 million, due to increased public sector investment and a modestly improved investment climate in Guyana. Public investment accounted for slightly less than half of total investment. This increase reflected the government's aim to maintain infrastructure needed for sustained growth and development, such as roads, bridges, sea defense, drainage and irrigation, and schools. The government also allocated funds for improvement in agriculture, housing and water, and national security. Private investment, spurred by government incentives, increased by 8.5% to U.S. $222.5 million. Major investments include mining, construction, transport and communications, and distribution sectors. Foreign direct investment from the U.S. accounted for approximately U.S. $24.5 million, or 1.1%, of private investment in Guyana.

External Debt

Guyana continued to benefit from debt relief under the Multilateral Debt Relief Initiative (MDRI) during 2007. Guyana's outstanding public and publicly guaranteed external debt contracted by 31.1% to U.S. $718 million at the end of the year due to the MDRI and other debt write-offs. As a result, debt service payments declined by 18.1% to U.S. $19 million and the Inter-American Development Bank no longer considers Guyana a highly indebted poor country.

FOREIGN RELATIONS

After independence in 1966, Guyana sought an influential role in international affairs, particularly among Third World and nonaligned nations. It served twice on the UN Security Council (1975-76 and 1982-83). Former Vice President, Deputy Prime Minister, and Attorney General Mohamed Shahabuddeen served a 9-year term on the International Court of Justice (1987-96).

Guyana has diplomatic relations with a wide range of nations. The European Union (EU), the Inter-American Development Bank (IDB), the UN Development Program (UNDP), the World Health Organization (WHO), and the Organization of American States (OAS) have offices in Georgetown. The Caribbean Community (CARICOM) has its Secretariat headquartered in Georgetown.

Guyana strongly supports the concept of regional integration. It played an important role in the founding of the Caribbean Community and Common Market (CARICOM), but its status as one of the organization's poorest members limits its ability to exert leadership in regional activities. Guyana has sought to keep foreign policy in close alignment with the consensus of CARICOM members, especially in voting in the UN, OAS, and other international organizations.

A longstanding maritime boundary dispute with Suriname was resolved largely in Guyana's favor in August 2007. The dispute had flared up in June 2000, when a Canadian company drilling for oil under a Guyanese concession was forced to cease operations by Surinamese military gunboats. After several failed attempts at negotiation, in 2004 Guyana took the dispute to the UN Law of the Sea tribunal, which unanimously determined that the vast majority of the area in contention belonged to Guyana. The resolution of this dispute will likely have significant ramifications for Guyana's economy in the long term, as the seabed is estimated to contain approximately 15 billion barrels of oil.

Another territorial disagreement remains unresolved, however. In 1962 Venezuela challenged a previously accepted 1899 international arbitration award, and claimed all of Guyana west of the Essequibo River—62% of Guyana's territory. At a meeting in Geneva in 1966, the two countries agreed to receive recommendations from a representative of the UN Secretary General on ways to settle the dispute peacefully. Diplomatic contacts between the two countries and the Secretary General's representative continue, with a quiet détente on the issue currently prevailing.

U.S.-GUYANESE RELATIONS

U.S. policy toward Guyana seeks to develop robust, sustainable democratic institutions, laws, and political practices; support economic growth and development; and promote stability and security. During the last

years of his administration, President Hoyte sought to improve relations with the United States as part of a decision to move his country toward genuine political nonalignment. Relations also were improved by Hoyte's efforts to respect human rights, reform the economy, invite international observers for the 1992 elections, and reform electoral laws. Successive democratic elections and Guyana's reaffirmation of sound economic policies and respect for human rights have placed U.S.-Guyanese relations on an excellent footing. Under successive PPP governments, the United States and Guyana have continued to improve relations, and the United States maintains positive relations with the current government of President Jagdeo.

In an effort to combat the spread of HIV/AIDS in Guyana, the U.S. Centers for Disease Control and Prevention (CDC) opened an office at the U.S. Embassy in 2002. In January 2003, Guyana was named as one of only two countries in the Western Hemisphere to be included in President Bush's Emergency Plan for AIDS Relief (PEPFAR). CDC, in coordination with the U.S. Agency for International Development (USAID), is administering a 5-year multi-million dollar program of education, prevention, and treatment for those infected and affected by the disease. Guyana also benefits from a $6.7 million, two-year threshold country program under the U.S. Millennium Challenge Account developmental program.

U.S. military medical and engineering teams continue to conduct training exercises in Guyana, digging wells, building schools and clinics, and providing medical treatment.

TRAVEL

Consular Information Sheet

June 9, 2008

Country Description: Guyana is a developing nation on the north coast of South America. Tourist facilities are not developed, except for hotels in the capital city of Georgetown and a limited number of eco-resorts. The vast majority of the Guyanese live along the coast, leaving the interior largely unpopulated and undeveloped. Travel in the interior of Guyana can be difficult; many interior regions can only be reached by plane or boat.

Entry Requirements: A valid U.S. passport is required for U.S. citizens to enter and depart Guyana. On arrival, Guyanese Immigration normally grants U.S. visitors a stay of up to 3 months. U.S.-Guyanese dual nationals may be granted an indefinite stay. Extensions of stay may be obtained from the Ministry of Home Affairs at 60 Brickdam Street, Georgetown. The Central Office of Immigration located on Camp Street, Georgetown, must note the extension in the visitor's passport. Travelers for purposes other than tourism should check with the Ministry of Home Affairs for information about requirements for work permits and extended stays.

U.S.-Guyanese dual nationals departing Guyana for the U.S. using a Guyanese passport must present to Guyanese authorities a U.S. Certificate of Naturalization or other document establishing that they may legally enter the United States. For further information about entry, exit and customs requirements, travelers may consult the Embassy of Guyana at 2490 Tracy Place NW, Washington, DC 20008, telephone (202) 265-6900, the Consulate General in New York, or honorary consuls in California, Florida, Ohio and Texas. Visit the Embassy of Guyana web site at www.guyana.org for the most current visa information.

Safety and Security: Driving in Guyana can be particularly dangerous, with a significant number of accidents and road fatalities occurring. See the section below on "Traffic Safety and Road Conditions" for additional information.

In the past, demonstrations and protests occasionally occurred in Georgetown; however, these are increasingly rare. Past demonstrations have not been directed at U.S. citizens and violence against Americans in general is not common. Visitors should nevertheless remain alert and take prudent personal security measures to deal with the unexpected while in Guyana. It is advisable to avoid areas where crowds have congregated and to maintain a low profile when moving about Georgetown and other Guy-

anese cities. Most major eco-tourist resorts and hotels in Guyana do not have written emergency plans in place, and many of them have safety deficiencies, including a lack of easily identifiable lifeguards or no lifeguards at all. Many of these resorts also do not have adequately stocked first aid supplies.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs web site, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll-free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444.

Crime: Serious crime, including murder and home invasion, continues to be a major problem; the murder rate in Guyana is three times higher than the murder rate in the United States. In early 2008, an attack in the Georgetown suburb of Lusignan and in the Essequibo River town of Bartica by heavily armed gangs resulted in the deaths of more than 20 persons, mostly innocent Guyanese civilians. An investigation into these attacks is continuing, but most of the perpetrators are still at large. In addition, there have been several instances of random shootings at night at police headquarters or police stations in Georgetown. U.S. citizens are encouraged to maintain a high level of vigilance, consider security issues when planning activities throughout Guyana, minimize movement when possible, and avoid traveling at night, when possible.

Armed robberies continue to rise, especially in major business and shopping districts. Hotel room strong-arm break-ins are also increasing, so travelers should use caution when opening their hotel room doors and should safeguard valuables left in hotel rooms. Criminals may act brazenly, and police officers themselves have been the victims of assaults and shootings. Vehicle occupants should keep their doors locked and be aware of their surroundings at all times. Robbery and theft occur with some frequency in Georgetown and New Amsterdam. U.S. citizens should avoid stopping in or traveling through the village of Buxton, which lies along the road between Georgetown and New Amsterdam, and Agricola, which is located on the East Bank highway. The Department of State recommends that Embassy staff using the public golf course at Lusignan, next to Buxton, do so in groups and only during daylight hours.

Pickpocketing, purse snatching by thieves on bicycles, assault, and theft can occur in all areas of Georgetown. The areas adjacent to the sea wall and the National Park in Georgetown, although frequented by joggers, dogwalkers, and families are generally considered safe during daylight hours, have been the scenes of crimes in the past. Travelers should exercise extra care when visiting these areas after dusk. Pickpockets and thieves also frequent Stabroek and Bourda, the two major markets, and great care should be taken to safeguard personal property when shopping in these markets. U.S. passports and permanent residency cards are prized by thieves as they may be used for smuggling and identity theft.

There have been numerous incidents of piracy in recent months in and around the waters of Guyana. Mariners are advised to be vigilant and take appropriate precautions.

Travelers should avoid walking alone around Georgetown, even in the main areas and especially at night. Although bandits have been known to attack taxis, they are generally safe and remain the safest means of getting about town and to and from the airport for visitors. Only taxis from reputable companies should be used. Exercise constant vigilance. Do not dress ostentatiously, as there have also been reports of gold chains or other jewelry being snatched off of pedestrians.

The response of local law-enforcement authorities to the increase in violent crime has been largely ineffectual; the police are cooperative but lack the resources to respond effectively to serious criminal incidents. Nevertheless, Americans who are victims of crime are encouraged to contact the police as well as the American Citizens Services Unit of the U.S. Embassy's Consular Section.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds may be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical care is available for minor medical conditions. Emergency care and hospitalization for major medical illnesses or surgery is limited, due to a lack of appropriately trained specialists, below standard in-hospital care, and poor sanitation. Ambulance service is limited to transportation without any medical care and is frequently not available for emergencies. An MRI (linked to the US for interpretation) has been installed and is operational, but results may take up to 4 days.

Visitors are advised to bring prescription medicine sufficient for their length of stay and should be aware that Guyana's humid climate may affect some medicines. Some prescription medicines (mainly generic rather than name-brand) are available.

Special attention should be paid to HIV/AIDS in Guyana. In addition to infection rates as high as 45% in high-risk populations such as commercial sex workers, data from a

World Health Organization study in 2006 estimate that 1.6% of the general population is infected with HIV; this is among the highest prevalence rates in Latin America and the Caribbean. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad, consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Guyana is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

In 2007, road fatalities increased more than 40% from the previous year. The rate of traffic accident fatalities in Guyana is 70% higher than in the United States. The Traffic Division of Guyana's National Police Force is responsible for road safety but is ill-trained and ill-equipped. Driving in Guyana is hazardous because of very poor road surfaces; farm animals sleeping or wandering on the roads; pedestrians walking on the road; and poor driving habits, including speeding, reckless driving, tailgating, cellphone use, quick stops without signaling, failure to dim headlights and weaving in and out of traffic. Traffic lights installed in Georgetown are often ignored or simply flash, posing a risk to drivers and pedestrians. Visitors should exercise caution at all times while driving and avoid driving at night. The Department of State recommends that Embassy staff travel in groups of two or more vehicles when traveling outside of Georgetown at night.

Penalties for drivers involved in an accident resulting in injury or death are severe, including life imprisonment. If involved in an accident, call 911 for police and 913 for an ambulance. Police may be slow to respond and an ambulance may not be available.

Drivers use the left side of the road in Guyana. Seatbelt use is required by law and is enforced; failure to use a seatbelt can result in a fine. There presently are no laws in Guyana concerning use of child car seats. Both drivers and passengers on motorcycles must wear protective helmets that meet certain specifications.

Mini-buses (small twelve- to fifteen-passenger vans) ply various routes both within and between cities on no fixed schedule. Mini-bus drivers have come under severe criticism by the government, press, and private citizens for speeding, aggressive and reckless driving, overloading of vehicles, poor vehicle maintenance and repair, and offensive remarks directed at passengers. Mini-buses have been involved in a number of fatal accidents.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Guyana's Civil Aviation Authority as not being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Guyana's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Airlines: Flights on all airlines are routinely delayed, rerouted, or canceled without notice. Air travel within Guyana generally depends on demand. Flights that are not full may be canceled or passengers may be expected to pay for the empty seats. Travelers to the United States from Guyana have found narcotics planted in their luggage, both in bags registered under their names and in items they were carrying for others. Travelers should not carry any items they did not purchase and pack themselves, and should take care that no additional bags are registered in their names. Travelers should hand carry medications, valuables and perishable items.

Geography: The coastal plain, which occupies about 5 percent of the country's area, is home to more than 90 percent of its inhabitants. The plain extends from the Corentyne River in the east to the Venezuelan border in the northwest. This coastal plain was created through the polder system, a technique that dams and then drains a water-covered area. The polder system consists of a front dam (the sea wall along the east coast) and a back dam (the freshwater conservancy) approximately five to six kilometers inland from the sea wall. The system is in a fragile state due to chronic lack of maintenance. In addition, a dozen major drainage canals run from the base of the dam to the Atlantic Ocean across the polder itself. These main canals are, in turn, fed by literally thousands of lateral canals that run along both sides of almost every street and road. Seasonal rains (December-January and May-July), combined with a chronic lack of maintenance and improper new construction, led to significant flooding in Greater Georgetown and along the East Coast in January 2005 and in the Mahaica-Mahaicony Abrary area, Canals 1 and 2, on the West Coast Demerara and the Pomeroon River catchment area in January 2006.

Drinking Water: An inadequate garbage removal system has resulted in illegal residential and commercial dumping on the roadside and into the drainage system. Decaying dead bodies or animal carcasses are periodically discovered in the intake canals for the Georgetown water supply. The water supply system throughout the country should be considered contaminated and water should be treated or boiled before use.

Changing Currency and Credit Card Use: Travelers should have enough cash or travelers checks to meet their expenses. With few exceptions, credit cards and ATM cards cannot be used to withdraw cash from an overseas account. Please contact your bank to see if your card will work in Guyana. Although credit cards are accepted at certain institutions in Georgetown, travelers should be careful when using them and check their receipts and statements to ensure that additional unauthorized purchases have not been made to their card. American citizens are advised to exchange currency only with banks, hotels, and licensed money exchange houses ("cambios"). Many foreigners who opt to exchange money on the streets, lured by promises of higher exchange rates, become victims of fraud or receive counterfeit currency. Foreigners have been mugged after completing bank transactions. There is no legal recourse unless the police are successful in apprehending the perpetrator; even then there is no guarantee that the money will be recovered.

Firearms: Guyanese customs authorities may enforce strict regulations concerning temporary importation into or export from Guyana of items such as firearms. If you plan to take your firearms or ammunition to or through Guyana, you should contact officials at the Embassy of Guyana to learn about its regulations and fully comply with those regulations before traveling. You may consult http://www.customs.gov for information on importing firearms into the United States.

Wildlife: Many plants and animals common in Guyana are globally threatened or endangered species protected by the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES at www.cites.org). The Guyanese Ministry of Agriculture will grant an export permit for taking an exotic bird out of the country only to those persons who have been legally residing in Guyana for more than one year. There have been several U.S. citizens arrested for attempting to leave Guyana carrying birds without having obtained an export permit. Americans who have legally resided in Guyana for more than a year and who would like to take back to the United States any birds or animals, including pets, that are listed in CITES Appendices I, II, and III, must also have an appropriate U.S. import permit from the U.S. Fish and Wildlife Service (USFWS). This is a U.S. regulation that applies regardless of distinctions among the three CITES Appendices. Individuals can obtain fact sheets and permit applications from the USFWS Office of Management Authority, Branch of Permits, 4401 N. Fairfax Drive, Arlington, VA 22203, telephone (703) 358-2104, fax (703) 358-2281, http://www.fws.gov/permits.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Guyanese laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Guyana are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Guyana are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Guyana. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at 100 Young and Duke Streets, telephone 011-592-225-4900 through 225-4909, fax 011-592-225-8497 web site http://georgetown.usembassy.gov. Hours of operation are Monday-Friday, 7:30 am to 4:00 pm, except local and U.S. holidays. For emergencies after hours, on weekends and on holidays, U.S. citizens are requested to call the U.S. Embassy duty officer at 011-592-623-1992.

Intercountry Adoption

October 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Under Guyanese law only Guyanese nationals, former Guyanese nationals or non-Guyanese domiciled in Guyana may adopt Guyanese children.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority:

Adoption Board, Ministry of Labor, Human Services and Social Security
1 Water and Cornhill Streets
Georgetown, Guyana
Phone: 592-225-7450
Fax: 592-227-1308

Eligibility Requirements for Adoptive Parents: Adoption in Guyana is governed by the Adoption of Children Act, Chapter 46:04. To adopt a child the applicant, or in the case of a joint application one of the applicants, must be 25 years old and be at least 21 years older than the child (18 years older if the child is a relative). Single persons may adopt in Guyana.

Residency Requirements: Guyanese law dictates that Guyanese children can only be adopted by a person domiciled in Guyana; a Guyanese national who is resident outside Guyana; or a former Guyanese national who has acquired, by registration or other voluntary and formal act (including marriage), the citizenship of another country. Non-Guyanese nationals who are not domiciled in Guyana cannot adopt Guyanese children.

Time Frame: Adoptions in Guyana typically take 1 year to complete.

Adoption Agencies and Attorneys: There are no private adoption agencies in Guyana. A list of attorneys who can provide legal services related to adoption can be obtained from the U.S. Embassy in Georgetown or via the Embassy's web site at: http://georgetown.usembassy.gov. Please review current reports online at http://travel.state.gov/family for a list of agencies.

Adoption Fees: Attorneys determine the fees for adoption services rendered and may vary significantly among different attorneys. No government fees are required.

Adoption Procedures: Prospective adoptive parents must apply in person to the Adoption Board ("the Board"). The application form, First Schedule, consists of two parts, Form A and Form B. Form A is completed and signed by the prospective adoptive parents and consists of biographical data for the applicants and prospective child and references for the prospective adoptive parents. Form B is a medical certificate for the child or children to be adopted, which must be completed by a duly qualified medical practitioner. When the prospective adoptive parents file the First Schedule, they will receive an acknowledgement slip with an appointment date for the initial adoption interview. The prospective adoptive parents, child, and biological parents must appear before the Board at the interview.

In the event that the child's biological parents are deceased, proof must be provided to the Board in the form of a death certificate. At the interview the child's birth certificate and most recent school records must be presented. Consent of each birth parent or guardian of the child is required unless the birth parent or guardian has abandoned, neglected or mistreated the child, cannot be found or is incapable of giving consent. In cases where the biological parent(s) cannot be found, advertisement of the pending adoption must be placed for three consecutive Saturdays in a daily newspaper.

A social worker interviews the birth parents, prospective adoptive parents, and children separately at the initial adoption interview. At the conclusion of the interview, the prospective adoptive parents are given an informational letter from the Board. This letter provides instructions for the prospective adoptive parent's attorney to begin preparing the court papers for the adoption process. Two copies of this letter must also be filed in the High Court by the attorney for the applicants, along with an application to appoint the Board guardian ad litem of the child. Obtaining the order may take up to six months depending on the attorney's skill and the court calendar.

After the ad litem (or first order as it is also called) is granted, the Board conducts a more thorough investigation of the case, including a visit by an officer of the Board to the home of the prospective adoptive parents to ensure that the welfare of the child is being met.

In cases where the child does not live with the prospective adoptive parents, a probationary period is allowed for bonding between the two parties. The bonding period must take place in Guyana. A report of the investigation is prepared for the Board. In addition to the investigation by the Board the parents must obtain a home study. The home study may be done locally or overseas by a certified social worker.

After the investigation is complete and the home study received by the Board, the case is placed on the Adoption Board's calendar. Cases are usually scheduled 2-3 months in advance.

The prospective adoptive parents, children, and birth parents are required to be present for the meeting. The prospective adoptive parents must also be physically present in Guyana at least one month prior to the Board meeting.

A decision in favor of the prospective adoptive parents would be followed within a week by a recommendation (Form C) of the case to the High Court for the making of a Final Order. At a later date the parties involved will be given notice to attend court before a judge in chambers for the issuance of the Final Order. Once the Final Order is issued, a copy of the child's Adoption Certificate can be obtained from the office of the Registrar General.

Required Documents: Prospective adoptive parents are required to present certified copies of birth and marriage certificates, bank statements, employment verification, police clearance and a home study, and national identity cards or passports, if non-Guyanese.

Embassy of Guyana
2490 Tracy Place, N.W.
Washington, D.C. 20008
Tel: (202) 265-3834
(202) 265-6900
Fax: (202) 232-1297

Consulate General of Guyana
370 7th Avenue, Room 402
New York, N.Y. 10001
Tel: (212) 947-5115

Additional Information: Specific questions about adoption in Guyana may be addressed to the U.S. Embassy in Kingston.

General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

HAITI

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Haiti

PROFILE

Geography

Area: 27,750 sq. km. (10,714 sq. mi.); about the size of Maryland. Ile de la Gonave and Ile de la Tortue comprise Haiti's principal offshore territories.

Cities: Capital—Port-au-Prince (pop. 2 million). Other cities—Cap Haitien (pop. 600,000).

Terrain: Rugged mountains with small coastal plains and river valleys, and a large east-central elevated plateau.

Climate: Warm, semiarid, high humidity in many coastal areas.

People

Nationality: Noun and adjective—Haitian(s).

Population: (2006 census) 8.5 million.

Annual population growth rate: 1975-2001, 1.9%; 2.5% per year.

Ethnic groups: African descent 95%, African and European descent 5%.

Religions: (2003 data) Roman Catholic 55%, Protestant 28%, voudou (voodoo) practices pervasive.

Languages: French (official), Creole (official).

Education: Years compulsory—6. Adult literacy (2006 census)—56%.

Health: Child mortality—1 out of 8 children die before they reach the age of five. Life expectancy—56 years (women), 52 years (men).

Government

Type: Republic.

Independence: January 1, 1804.

Constitution: March 1987.

Government branches: Executive—President. Legislative—Senate (30 seats), Chamber of Deputies (99 seats). Judicial—Court of Cassation.

Political subdivisions: Ten departments.

Political parties: Lespwa, Fanmi Lavalas (FL), Struggling People's Organization (OPL), Open the Gate Party (PLB), Christian Movement for a New Haiti (MOCHRENHA), Tet Ansam, Fusion of Socialist Democrats (FUSION), Grand Center Right Front Coalition, Assembly of Progressive National Democrats (RNDP), Union to Save Haiti, Mobilisation for Haiti's progress, Haitian Democratic and Reform Movement, several others.

Suffrage: Universal at 18.

Economy

GDP: (2007) $6.1 billion.

Real GDP growth rate: (2007) 3.2%.

Per capita GDP: (2007) $713.

GDP by sector: (2006) Agriculture—27%; industry—8%; services—40%; Other—25%.

Inflation: (2007 est.) 8.1%.

Natural resources: Bauxite, copper, calcium carbonate, gold, marble.

Agriculture: (27% of GDP) Products—coffee, mangoes, sugarcane, rice, corn, cacao, sorghum, pulses, other fruits and vegetables.

Industry: (8% of GDP): Types—apparel, handicrafts, electronics assembly, food processing, beverages, tobacco products, furniture, printing, chemicals, steel.

Services: (40% of GDP): Commerce, hotels and restaurants, government, tourism.

Trade: (2006 est.) Total exports f.o.b.—$494.4 million: apparel, mangoes, leather and raw hides, seafood, electrical. Major market—U.S. Total imports f.o.b.—$1,548.3 million: grains, soybean oil, motor vehicles, machinery, meat, vegetables, plastics, petroleum.

Note: There are serious problems with national accounts in Haiti, including incomplete coverage and the questionable accuracy of raw data.

PEOPLE

Although Haiti averages about 302 people per square kilometer, its population is concentrated most heavily in

urban areas, coastal plains, and valleys. About 95% of Haitians are of African descent. The rest of the population is mostly of mixed Caucasian-African ancestry. A few are of European or Levantine heritage. Sixty percent of the population lives in rural areas.

French is one of two official languages, but it is spoken by only about 10% of the people. All Haitians speak Creole, the country's other official language. English is increasingly used as a second language among the young and in the business sector.

The dominant religion is Roman Catholicism. Increasing numbers of Haitians have converted to Protestantism through the work of missionaries active throughout the country. Much of the population also practices voudou (voodoo), recognized by the government as a religion in April 2003. Haitians tend to see no conflict in these African-rooted beliefs coexisting with Christian faith.

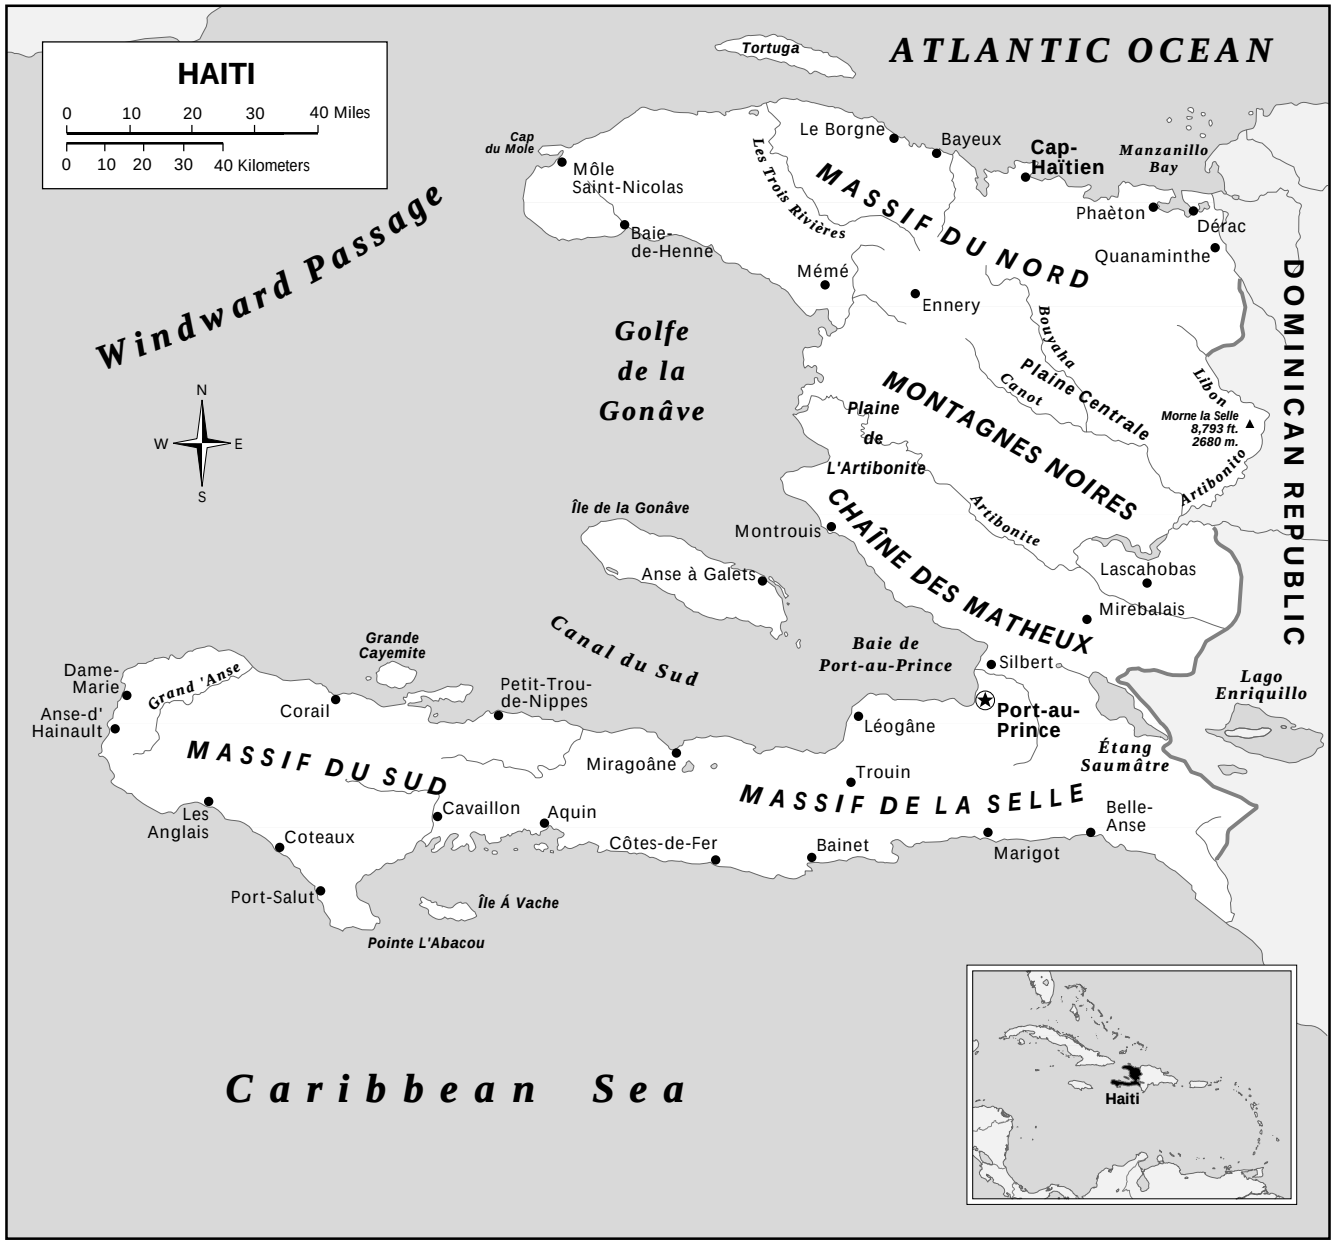
Although public education is free, the cost is still quite high for Haitian families who must pay for uniforms, textbooks, supplies, and other inputs. Due to weak state provision of education services, private and parochial schools account for approximately 90% of primary schools, and only 65% of primary school-aged children are actually enrolled. At the secondary level, the figure drops to around 20%. Less than 35% of those who enter will complete primary school. Though Haitians place a high value on education, few can afford to send their children to secondary school and primary school enrollment is dropping due to economic factors. Remittances sent by Haitians living abroad are important in paying educational costs.

Large-scale emigration, principally to the U.S.—but also to Canada, the Dominican Republic, The Bahamas and other Caribbean neighbors, and France—has created what Haitians refer to as the Tenth Department or the Diaspora. About one of every eight Haitians lives abroad.

HISTORY

The Spaniards used the island of Hispaniola (of which Haiti is the western part and the Dominican Republic the eastern) as a launching point from which to explore the rest of the Western Hemisphere. French buccaneers later used the western third of the island as a point from which to harass English and Spanish ships. In 1697, Spain ceded the western third of Hispaniola to France. As piracy was gradually suppressed, some French adventurers became planters, making Saint Domingue, as the French portion of the island was known, the "pearl of the Antilles"—one of the richest colonies in the 18th century French empire.

During this period, African slaves were brought to work on sugarcane and coffee plantations. In 1791, the slave population revolted—led by Toussaint L'Ouverture, Jean Jacques Dessalines, and Henri Christophe—and gained control of the northern part of the French colony, waging a war of attrition against the French.



By January 1804, local forces defeated an army sent by Napoleon Bonaparte, established independence from France, and renamed the area Haiti. The impending defeat of the French in Haiti is widely credited with contributing to Napoleon's decision to sell the Louisiana territory to the United States in 1803. Haiti is the world's oldest black republic and the second-oldest republic in the Western Hemisphere, after the United States. Although Haiti actively assisted the independence movements of many Latin American countries, the independent nation of former slaves was excluded from the hemisphere's first regional meeting of independent nations, in Panama in 1826, and did not receive U.S. diplomatic recognition until 1862.

Two separate regimes—north and south—emerged after independence but were unified in 1820. Two years later, Haiti occupied Santo Domingo, the eastern, Spanish-speaking part of Hispaniola. In 1844, however, Santo Domingo broke away from Haiti and became the Dominican Republic. With 22 changes of government from 1843 to 1915, Haiti experienced numerous periods of intense political and economic disorder, prompting the United States military intervention of 1915. Following a 19-year occupation, U.S. military forces were withdrawn in 1934, and Haiti regained sovereign rule.

From February 7, 1986—when the 29-year dictatorship of the Duvalier family ended—until 1991, Haiti was ruled by a series of provisional governments. In March 1987, a constitution was ratified that provides for an elected, bicameral parliament; an elected president that serves as head of state; and a prime minister, cabinet, ministers, and supreme court appointed by the president with parliament's consent. The Haitian Constitution also provides for political decentralization through the election of mayors and administrative bodies responsible for local government.

In December 1990, Jean-Bertrand Aristide won 67% of the vote in a presidential election that international observers deemed largely free and fair. Aristide took office on February 7, 1991, but was overthrown that September in a violent coup led by army elements and supported by many of the country's economic elite. The coup contributed to a large-scale exodus of Haitians by boat. From October 1991 to September 1994 a de facto military regime governed Haiti. Several thousand Haitians may have been killed during the de facto military rule. Various OAS and UN initiatives to end the political crisis through the peaceful restoration of the constitutionally elected government failed. On July 31, 1994, the UN Security Council adopted Resolution 940, which authorized member states to use all necessary means to facilitate the departure of Haiti's military leadership and to restore Haiti's constitutionally elected government to power.

The United States took the lead in forming a multinational force (MNF) to carry out the UN's mandate by means of a military intervention. In mid-September, with U.S. troops pre-

pared to enter Haiti by force, Gen. Raoul Cedras and other top leaders agreed to accept the intervention of the MNF. On September 19, 1994, the first contingents of what became a 21,000-member international force touched down in Haiti to oversee the end of military rule and the restoration of the constitutional government. President Aristide and other elected officials in exile returned on October 15.

Nationwide local and parliamentary elections in June 1995 returned a pro-Aristide, multi-party coalition called the Lavalas Political Organization (OPL) to power at all levels. In accordance with the constitutional bar on succeeding himself, President Aristide agreed to step aside and support a presidential election in December 1995. Rene Preval, a prominent Aristide political ally, took 88% of the vote, and was sworn in to a 5-year term on February 7, 1996, during what was Haiti's first-ever transition between two democratically elected presidents.

In late 1996, former President Aristide broke from the OPL and created a new political party, the Lavalas Family (FL). The OPL, holding the majority of the Parliament, renamed itself the Struggling People's Organization. Initial results of elections in April 1997 for the renewal of one-third of the Senate and creation of commune-level assemblies and town delegations showed victories for FL candidates in most races. However, the elections, which drew only about 5% of registered voters, were plagued with allegations of fraud and not certified by most international observers as free and fair.

The government was unable to organize local and parliamentary elections due in late 1998. In early

January 1999, President Preval dismissed legislators whose terms had expired—the entire Chamber of Deputies and all but nine members of the Senate—and converted local elected officials into state employees. The President and Prime Minister then ruled by decree, establishing a cabinet composed almost entirely of FL partisans. First round elections for local councils—ASEC and CASEC, municipal governments, town delegates, the Chamber of Deputies, and two-thirds of the Senate took place on May 21, 2000. The election drew the participation of a multitude of candidates from a wide array of political parties and a voter turnout of more than 60%. Manipulated vote counting by the Provisional Electoral Council (CEP) prevented run-off elections for eight Senate seats and gave the FL a virtual sweep in the first round. Although the flawed vote count undercut the credibility of the election, Haiti's new Parliament, including the contested Senators, was convened on August 28, 2000.

After this flawed election, Haiti's main bilateral donors re-channeled their assistance away from the government and announced they would not support or send observers to the November elections. Most opposition parties regrouped in an alliance that became the Democratic Convergence. Elections for President and nine Senators took place on November 26, 2000. All major opposition parties boycotted these elections, in which voter participation was estimated at 5%. Jean-Bertrand Aristide emerged as the easy victor of these controversial elections, and the candidates of his FL party swept all contested Senate seats. On February 7, 2001, Jean-Bertrand Aristide was inaugurated as President.

The political stalemate continued, and violence ensued. On July 28, 2001, unknown gunmen attacked police facilities in Port-au-Prince and the provinces. A subsequent government crackdown on opposition party members and former soldiers further increased tensions between Lavalas and Convergence. On December 17, 2001, unidentified gunmen attacked the National Palace in Port-au-Prince. Following the assault, pro-government groups attacked the offices and homes of several opposition leaders. One opposition member was killed. Negotiations between FL and Democratic Convergence were suspended indefinitely.

In January 2002, the OAS Permanent Council adopted Resolution 806 on Haiti that called for government action to address the political stalemate, growing violence, and deterioration in respect for human rights. It also authorized OAS establishment of a Special Mission in Haiti to support implementation of steps called for in Resolution 806. The OAS Special Mission worked with the government on plans to strengthen Haiti's democratic institutions in security, justice, human rights, and governance.

Security continued to deteriorate. Protest strikes and attacks on opposition demonstrations by government-supported gangs hardened attitudes on both sides. The opposition issued a public call for Aristide's removal and announced plans for a transitional government. In March 2003, a high-level joint delegation of the OAS and Caribbean Community (CARICOM) presented demands to President Aristide to restore public security; select new leadership for the Haitian National Police; arrest a notorious gang leader; and disarm the security forces used by government politicians to intimidate opponents.

Events spiraled downward: government-paid thugs violently disrupted a civil society public ceremony July 12 in Cite Soleil; police attacked civil society marches in Cap Haitien August 30 and September 14 and prevented an opposition march scheduled for October 5. Political instability grew throughout fall 2003. In Gonaives, hitherto pro-Aristide gang members led a violent rebellion against government authorities in the city. Government-sponsored repression of opposition protests reached a nadir when on December 5 pro-government gangs entered Haiti's state university campus and broke the legs of the Rector.

Following a meeting with Aristide at the Summit of the Americas in January 2004, Caribbean Community leaders proposed a plan to resolve the political crisis that President Aristide stated he accepted. A high-level international delegation came to Haiti February 21 to obtain agreement on a specific implementation timetable. President Aristide agreed, but the opposition "Democratic Platform" group of political parties and civil society expressed reservations. Meanwhile, the violence in Gonaives culminated February 5 in the "Artibonite Resistance Front" seizing control of the city. Other armed groups opposed to the Aristide government quickly emerged and succeeded in seizing control of many towns, mostly with little resistance from government authorities. By February 28, 2004, a rebel group led by a former police chief, Guy Philippe, advanced to within 25 miles of the capital. On February 29, 2004 Aristide submitted his resignation as President of Haiti and flew on a chartered plane to Africa.

2004–2007—Interim Government Gives Way to a New Democracy

Following the constitutional line of succession, Supreme Court Chief Justice Boniface Alexandre assumed the presidency and Gerard Latortue was appointed prime minister of the Interim Government of Haiti (IGOH) with the mandate of organizing elections to choose a new government. The interim government managed to organize three rounds of elections with the help of the OAS and UN. The first round of elections for President and Parliament took place peacefully on February 7, 2006, with a turnout estimated at over 60% of registered voters. The elections were considered generally free, fair, transparent, and democratic by national and international observers.

Rene Preval, former President (1996-2001) and former ally to Aristide, won the presidential election with 51.15%. Partial results first showed he fell short of an absolute majority, which triggered demonstrations against alleged fraud. The later decision of

the Electoral Council not to count blank ballots gave the victory to Preval. The Parliament, composed of a 30-seat Senate and a 99-member Chamber of Deputies, was elected in two rounds held on February 7 and April 21, 2006. Lespwa is the main political force in both chambers but fell short of the majority. Fusion, UNION, Alyans, OPL, and Famni Lavalas have many representatives in both chambers. Preval chose his long-time political associate and former Prime Minister Jacques-Edouard Alexis to serve again as his Prime Minister. Municipal elections were held December 3, 2006 and April 29, 2007. Some of these local government positions had not been filled in over a decade.

International Presence 1995–2004

After the transition of the 21,000-strong MNF into a peacekeeping force on March 31, 1995, the presence of international military forces that helped restore constitutional government to power was gradually ended. Initially, the U.S.-led UN peacekeeping force numbered 6,000 troops, but that number was scaled back progressively over the next 4 years as a series of UN technical missions succeeded the peacekeeping force. By January 2000, all U.S. troops stationed in Haiti had departed. In March 2000, the UN peacekeeping mission transitioned into a peacebuilding mission, the International Civilian Support Mission in Haiti (MICAH). MICAH consisted of some 80 non-uniformed UN technical advisers providing advice and material assistance in policing, justice, and human rights to the Haitian Government. MICAH's mandate ended on February 7, 2001, coinciding with the end of the Preval administration. The OAS Special Mission has some 25 international police advisors who arrived in summer 2003; is in addition to observing and reporting Haitian police performance, they provide limited technical assistance.

International Presence 2004–Present

At the request of the interim government and the UN, the U.S.-led Multilateral Interim Force, made up of troops from the U.S., Canada, France, and Chile, arrived in Port-au-Prince to ensure stability until the arrival of a UN peacekeeping force.

In April 2004, the United Nations Security Council adopted Resolution 1542, which created the UN Stability Mission in Haiti (MINUSTAH). Since that time, the Security Council has consistently and unanimously approved the renewal of MINUSTAH's mandate at 6-month intervals. On October 14, 2008, the UNSC voted unanimously to extend MINUSTAH's mandate for 12 months through October 14, 2009. The Stability Mission is currently authorized at 7,060 troops and 2,091 civilian police.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Rene Garcia PREVAL**
Prime Min.: **Michele Duvivier PIERRE-LOUIS**
Min. of Agriculture, Natural Resources, & Rural Development: **Joanas GUE**
Min. of Commerce & Industry: **Marie Josee GARNIER**
Min. of Culture & Communication: **Olsen JEAN-JULIE**

Min. of Youth, Sports, & Civic Action: **Evans LESCOUFLAIR**
Min.-Del. to the Prime Min. in Charge of Relations With Parliament: **Joseph JASMIN**
Ambassador to the US: **Raymond JOSEPH**
Permanent Representative to the UN, New York: **Leo MERORES**

The Embassy of Haiti is located at 2311 Massachusetts Ave., NW, Washington, DC 20008 (tel. 202-332-4090).

ECONOMY

Haiti remains the least-developed country in the Western Hemisphere and one of the poorest in the world. Comparative social and economic indicators show Haiti falling behind other low-income developing countries (particularly in the hemisphere) since the 1980s. Haiti now ranks 146th of 177 countries in the UN's Human Development Index. Haiti's economic stagnation is the result of earlier inappropriate economic policies, political instability, a shortage of good arable land, environmental deterioration, continued reliance on traditional technologies, under-capitalization and lack of public investment in human resources, migration of large portions of the skilled population, a weak national savings rate, and the lack of a functioning judicial system.

The 1991 coup and the irresponsible economic and financial policies of the de facto regime resulted in a sharp economic decline from 1991-94. Following the coup, the United States adopted mandatory sanctions, and the OAS instituted voluntary sanctions aimed at restoring constitutional government. International sanctions culminated in the May 1994 UN embargo of all goods entering Haiti except humanitarian supplies, such as food and medicine. The assembly sector, heavily dependent on U.S. markets, employed over 100,000 workers in the mid-1980s. During the embargo, employment fell below 17,000. Private domestic and

foreign investment has returned to Haiti slowly. Since the embargo's end, assembly sector employment has gradually recovered to about 18,500. The Haitian Hemispheric Opportunity through Partnership Encouragement Act (HOPE), enacted by the U.S. Congress in December 2006, provides new trade preferences for textile/apparel products that could boost production in the sector. However, growth has been stalled by investor concerns over security, lack of access to credit, and legal and physical infrastructure constraints.

Under President Preval (1996-2001), the country's economic agenda included trade/tariff liberalization, measures to control government expenditure and increase tax revenues, civil service downsizing, financial sector reform, and the modernization of two out of nine state-owned enterprises through their sale to private investors, the provision of private sector management contracts, or joint public-private investment. Structural adjustment agreements with international financial institutions (IFIs) intended to create conditions for private sector growth proved only partly successful, however. Workers in Haiti are guaranteed the right of association. Unionization is protected by the labor code. A legal minimum wage of 70 gourdes a day (about U.S. $1.70) applies to most workers in the formal sector.

Haiti's real GDP growth turned negative in FY 2001 after six years of growth. Following almost 4 years of recession ending in 2004, the economy grew by 1.5% in 2005, 2.5% in 2006, and 3.2% in 2007. But significant improvement in living standards would require an estimated doubling of the growth rate. Since the departure of President Aristide, the financial situation has stabilized. Inflation fell from 42.7% at end-2003 to 8.1% for calendar year 2007. The interim government conducted a largely sound fiscal policy, which was followed by the Alexis government. But the traditional low revenue collection rate (roughly 9% of the GDP) constrained its ability to provide social services and invest in physical and human capital. External assistance (approximately $965 million from July 2004 through March 2006) as well as diaspora remittances (estimated at approximately $1.65 billion) remain critical to keeping the economy afloat. In November 2006, Haiti was approved for an International Monetary Fund (IMF) Poverty Reduction and Growth Facility (PRGF) and reached decision point under the Heavily Indebted Poor Countries (HIPC) Initiative.

FOREIGN RELATIONS

Haiti is one of the original members of the United Nations and several of its specialized and related agencies, as well as a member of the Organization of American States (OAS). It maintains diplomatic relations with several dozen countries.

The international community rallied to Haiti's defense during the 1991-94 period of de facto military rule. Thirty-one countries participated in the U.S.-led multinational force (MNF) which, acting under UN auspices, intervened in September 1994 to help restore the legitimate government and create a secure and stable environment in Haiti. At its peak, the MNF included roughly 21,000 troops, mostly Americans, and more than 1,000 international police monitors. Within 6 months, the troop level was gradually reduced as the MNF transitioned to a 6,000-strong peacekeeping force, the UN Mission in Haiti (UNMIH). UNMIH was charged with maintaining the secure environment which the MNF had helped establish as well as nurturing Haiti's new police force through the presence of 900 police advisers. A total of 38 countries participated in UNMIH.

To spur Haiti's social and economic recovery from decades of misrule before that, international donors pledged in 1994 to provide more than $2 billion over five years in total assistance. Most bilateral assistance is now channeled through non-governmental organizations. Major bilateral donors are led by the United States, with the largest program, and include Canada, the EU, France, Germany, Japan, and Taiwan. Cuba provides highly visible, low-cost medical and technical experts. Multilateral aid is provided by the Inter-American Development Bank (IDB), International Monetary Fund, World Bank, and the UN and its agencies. All aid is coordinated informally by the World Bank.

In July 2004, $1.085 billion was pledged through 2006 at the World Bank Donors' Conference. Donors include the U.S., Canada, the EU, France, Sweden, Spain, Germany, Japan, Switzerland, Greece, Norway, Mexico, and Ireland. The IDB and the World Bank pledged multilateral aid. As of March 2006, $965 million had been disbursed, mainly to address humanitarian needs.

U.S.-HAITI RELATIONS

U.S. policy toward Haiti is designed to foster and strengthen democracy; help alleviate poverty, illiteracy, and malnutrition; promote respect for human rights; and counter illegal migration and drug trafficking. The U.S. also supports and facilitates bilateral trade and investment along with legal migration and travel. U.S. policy goals are met through direct bilateral action and by working with the international community. The United States has taken a leading role in organizing international involvement with Haiti. The United States works closely with the Organization of American States (OAS; see "Key OAS Issues"), particularly through the Secretary General's "Friends of Haiti" group (originally a UN group that included the U.S., Canada, France, Venezuela, Chile, Argentina which was enlarged in 2001 to add Germany, Spain, Norway, Mexico, Guatemala, Belize, and The Bahamas), the Caribbean Community (CARICOM), and individual countries to achieve policy goals.

Maintaining good relations with and fostering democracy in Haiti are important for many reasons, not least

of which is the country's geographical proximity to the continental United States. In addition to the many Haitians who receive visas to immigrate into the U.S. (averaging over 13,000 annually in FY 1999-2003), there is a flow of illegal migrants. Over 100,000 undocumented Haitian migrants were intercepted at sea by the U.S. Coast Guard in the past two decades, particularly during the 1991-94 period of illegal military rule when more than 67,000 migrants were interdicted. Since the return of the legitimate government in 1994, the interdiction of illegal migrants by U.S. Coast Guard vessels has decreased dramatically, averaging fewer than 1,500 annually. Neighboring Caribbean countries, particularly The Bahamas, continue to interdict Haitian migrants as well. The prospect remains, however, for the renewal of higher flows of illegal migrants, particularly under conditions of political unrest or further economic downturn.

U.S. Economic and Development Assistance

Political insecurity and the failure of Haiti's governments to invest in developing the country's natural and human resources has contributed significantly to the country's current state of underdevelopment. U.S. efforts to strengthen democracy and help build the foundation for economic growth aim to rectify this condition. The U.S. has been Haiti's largest donor since 1973. Between FY 1995 and FY 2003, the U.S. contributed more than $850 million in assistance to Haiti. Since 2004, the U.S. has provided over $600 million for improving governance, security, the rule of law, economic recovery, and critical human needs. The President's budget request for FY 2007 was $198 million. U.S. Government funds have been used to support programs that have addressed a variety of problems. Additional information on U.S. assistance to Haiti can be found at http://www.state.gov/p/wha/rls/fs/2006/77358.htm.

Haiti has been plagued for decades by extremely high unemployment and underemployment. The precipitous decline in urban assembly sector jobs, from a high of over 100,000 in 1986 to fewer than 20,000 in 2006, exacerbated the scarcity of jobs. To revitalize the economy, U.S. assistance attempts to create opportunities for stable sustainable employment for the growing population, particularly in rural areas. More recently, programs that help to increase commercial bank lending to micro-enterprises, especially in the agricultural sector, have helped to create a significant number of jobs. U.S. assistance is channeled primarily through private voluntary agencies and contractors to ensure efficient implementation of U.S. assistance programs.

Combating Drug Trafficking

Haiti is a major transshipment point for South American narcotics, primarily cocaine, being sent to the United States. To counter this threat, the U.S. has taken a number of steps, including vetting and training the counternarcotics division of the Haitian National Police, providing material assistance and training to the Haitian Coast Guard for drug and migrant interdiction, and obtaining the expulsion of several traffickers under indictment in the United States.

U.S. Business Opportunities

The U.S. remains Haiti's largest trading partner. Port-au-Prince is less than 2 hours by air from Miami, with several daily direct flights. A daily flight also connects Port-au-Prince with New York, and a new Port-au-Prince-Fort Lauderdale flight started in 2007. Both Port-au-Prince and Cap Haitien on the north coast have deep-water port facilities. Many Haitian entrepreneurs conduct business in English, and U.S. currency circulates freely in Haiti. A number of U.S. firms, including commercial banks, telecommunications, airlines, oil and agribusiness companies, and U.S.-owned assembly plants are present in Haiti.

Further opportunities for U.S. businesses include the development and trade of raw and processed agricultural products; medical supplies and equipment; rebuilding and modernizing Haiti's depleted infrastructure; developing tourism and allied sectors—including arts and crafts; and improving capacity in waste disposal, transportation, energy, telecommunications, and export assembly operations. Haiti's primary assembly sector inputs include textiles, electronics components, and packaging materials. Other U.S. export prospects include electronic machinery, including power-generation, sound and television equipment, plastics and paper, construction materials, plumbing fixtures, hardware, and lumber. Benefits for both Haitian and American importers and exporters are available under the Caribbean Basin Trade Partnership Act (CBTPA)—which provides for duty-free export of many Haitian products assembled from U.S. components or materials—the successor program to the Caribbean Basin Initiative, and the HOPE Act, which provides additional duty-free preferences for qualifying apparel/textiles products and automotive wire harnesses.

U.S. export opportunities also exist for four-wheel-drive vehicles, consumer electronics, rice, wheat, flour, animal and vegetable fats, meat, chicken, vegetables, and processed foodstuffs. The Government of Haiti seeks to reactivate and develop agricultural industries where Haiti enjoys comparative advantages, among which are essential oils, spices, fruits and vegetables, and sisal. The government encourages the inflow of new capital and technological innovations. Additional information on business opportunities in Haiti can be found at the Country Commercial Guide for Haiti.

Establishing a Business

Individuals wishing to practice a trade in Haiti must obtain an immigrant visa from a Haitian Consulate and, in most cases, a government work permit. Transient and resident traders must also have a professional ID card.

Property restrictions still exist for foreign individuals. Property rights of foreigners are limited to 1.29 hectares in urban areas and 6.45 hectares in rural areas. No foreigner may own more than one residence in the same district, or own property or buildings near the border.

To own real estate, authorization from the Ministry of Justice is necessary. Hurdles for businesses in Haiti include poor infrastructure, a high-cost port, an irregular supply of electricity, and Customs delays. There is little direct investment.

In November 2002, the Haitian Parliament passed an investment law prohibiting fiscal and legal discrimination against foreign investors. The 2002 law explicitly recognizes the crucial role of foreign direct investment in spurring economic growth and aims to facilitate, liberalize, and stimulate private investment in Haiti.

Foreign investment protection is also provided by the Haitian Constitution of 1987, which permits expropriation of private property for public use or land reform with payment in advance. American firms enjoy free transfer of interest, dividends, profits, and other revenues stemming from their investments, and are guaranteed just compensation paid in advance of expropriation, as well as compensation in case of damages or losses caused by war, revolution, or insurrection.

The U.S. and Haiti have a bilateral agreement on investment guarantees that permits the U.S. Overseas Private Investment Corporation to offer programs in Haiti. The two governments also signed a bilateral investment treaty in December 1983, but it was not ratified.

Additional information on establishing a business in Haiti can be found at www.export.gov, then to market research, then Country Commercial Guides.

TRAVEL

Consular Information Sheet

June 2, 2008

Country Description: Haiti is one of the least developed and least stable countries in the Western Hemisphere. The availability of consumer goods and services is barely adequate in the capital, Port-au-Prince, but other parts of the country experience chronic shortages. Most consumer products are imported and expensive. Some tourism facilities in the large cities and resort areas are satisfactory, but many are rudimentary at best, and are difficult to find in most rural areas and small towns.

Entry Requirements: All Americans traveling by air outside of the United States are required to present a passport or other valid travel document to enter or re-enter the United States. Haitian law requires U.S. citizens to have a passport to enter and exit Haiti. Once in Haiti, an undocumented U.S. citizen can experience delays of several weeks for the issuance of a passport, as it is often more difficult to establish identity and citizenship overseas than in the United States. The Haitian government

requires foreigners to pay a departure fee. U.S. citizens are encouraged to contact the Embassy of the Republic of Haiti for more details regarding current entry, departure and customs requirements for Haiti. The Embassy of the Republic of Haiti is located at 2311 Massachusetts Avenue NW, Washington, DC 20008; the telephone number is (202) 332-4090, and the Internet address is http://www.haiti.org. There are Haitian consulates in Miami and Orlando, Florida; Boston, Massachusetts; New York, NY; Chicago, Illinois and San Juan, Puerto Rico.

Safety and Security: U.S. citizens should exercise extreme caution and are strongly encouraged to register online at https://travelregistration.state.gov prior to travel.

Travel in Haiti can be dangerous and all visitors are urged to exercise vigilance and caution. In some cities and towns ordinary services such as water, electricity, police protection and government services are either very limited or unavailable. While U.N. personnel from several countries have been in Haiti since 2004, their presence does not guarantee absolute security for residents or visitors.

During 2007 and early April 2008, the Embassy issued several security related messages warning U.S. citizens in Haiti of violent or unstable conditions. On occasion, the U.S. mission in Haiti was forced to suspend service to the public or close because of security concerns. These concerns have also prevented Embassy personnel from traveling to or through some areas. Since October 2004 Embassy personnel have been prohibited from entering central Port-au-Prince after dark due to security concerns. The Embassy has also imposed a curfew on its officers from time to time. If situations occur where the Embassy must suspend operations or when officers are unable to travel freely, the Embassy will continue to be available by telephone to offer emergency services to U.S. citizens.

In early April 2008, there were violent demonstrations, looting, transportation disruptions, and up to seven reported deaths in Les Cayes and Port-au-Prince. Some American citizens were temporarily stranded in isolated locations and could not safely travel until calm was restored. Because political and economic conditions precipitating the civil unrest have not been entirely resolved, American citizens should defer non-essential travel to Haiti.

U.S. citizens in Haiti should avoid all large gatherings, as crowd behavior can be unpredictable. Visitors encountering roadblocks, demonstrations, or large crowds should remain calm and depart the area quickly and without confrontation. Assistance from Haitian officials, such as the police, is often unavailable. Overseas visitors must be particularly cautious on the days of planned political activities. U.S. citizens are urged to take common-sense precautions and avoid any event where crowds may congregate.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: There are no "safe areas" in Haiti. Crime, a chronic problem over the years, has increased in recent years and can be subject to periodic surges sometimes not obviously explained by other events or conditions. The U.S. estimates that up to 8% of the cocaine entering the United States passes through Haiti. The state of law and order has steadily deteriorated as a result. Reports of kidnapping, death threats, murders, drug-related shootouts, armed robberies, break-ins or carjackings are common. These crimes are primarily Haitian against Haitian, though several foreigners and U.S. citizens have been victimized. In 2007, there were 29 reported kidnappings of American citizens, including two victims who were killed. Many American citizens reported that they were beaten and or raped by their hostage takers. Kidnapping remains the most critical security concern; kidnappers frequently target children.

U.S. citizens who travel to Haiti should exercise extreme caution throughout the country. Travelers should keep valuables well hidden, ensure possessions are not left in parked vehicles, use private transportation, alternate travel routes, and keep doors and windows in homes and vehicles closed and locked. U.S. citizens should avoid all nighttime travel due to poor road conditions and increased criminal activity after dark. They should be alert for suspicious onlookers when entering and exiting banks, as criminals often watch and subsequently attack bank customers. Withdrawals of large amounts of cash should be avoided.

Criminal perpetrators often operate in groups of two to four individuals, and are disposed occasionally to be confrontational and gratuitously violent. Criminals sometimes will seriously injure or kill those who resist their attempts to commit crime. In robberies or home invasions, it is not uncommon for the assailants to beat or shoot the victim in order to limit the victim's ability to resist. If an armed individual demands the surrender of a vehicle or other valuables, the U.S. Embassy recommends compliance without resistance. This recommendation also applies in the event of a kidnapping. Visitors to Haiti should exercise caution at all times and review basic personal security procedures frequently.

U.S. citizens in Haiti must be particularly alert when arriving from overseas at the Port-au-Prince airport, as criminals have often targeted arriving passengers for later assaults and robberies. Some recent incidents have resulted in death. The use of public transportation, including "tap-taps" (private transportation used for commercial purposes), is not recommended. Visitors to Haiti should arrange for someone known to them to meet them at the airport.

U.S. citizens should decline all requests to carry items for others to or from Haiti. Traffickers of illegal drugs have duped unsuspecting travelers into helping transport narcotics aboard commercial airlines.

Certain high-crime zones in the Port-au-Prince area should be avoided, including Croix-des-Bouquets, Carrefour, Martissant, the port road (Boulevard La Saline), urban route Nationale #1, the airport road (Boulevard Toussaint L'Ouverture) and its adjoining connectors to the New ("American") Road via Route Nationale #1 (which should also be avoided). This latter area in particular has been the scene of numerous robberies, carjackings, and murders. Embassy employees are prohibited from remaining in the downtown area after dark or entering Cite Soleil and La Saline and their surrounding environs due to significant criminal activity. Neighborhoods in Port-au-Prince once considered relatively safe, such as the Delmas road area and Petionville, have been the scenes of an increasing number of violent crimes.

Cameras and video cameras should only be used with the permission of the subjects; violent incidents have followed unwelcome photography. Their use should be avoided altogether in high-crime areas.

Holiday periods, especially Christmas and Carnival, often bring a significant increase in criminal activity. Haiti's Carnival season is marked by street celebrations in the days leading up to Ash Wednesday. In recent years, Carnival has been accompanied by civil disturbances, altercations and severe traffic disruptions. People attending Carnival events or simply caught in the resulting celebrations have been injured and killed. Random stabbings during Carnival season are frequent. Roving musical bands called "rah-rahs" operate during the period from New Year's Day through Carnival. Being caught in a rah-rah event may begin as an enjoyable experience, but the potential for injury and the destruction of property is high. A mob mentality can develop unexpectedly leaving people and cars engulfed and at risk. During Carnival, rah-rahs continuously form without warning; some rah-rahs have identified themselves with political entities, lending further potential for violence.

The Haitian police are understaffed, poorly equipped and unable to respond to most calls for assistance. There are continued allegations of police complicity in criminal activity. The unsatisfactory response and enforcement capabilities of the Haitian national police and the weakness of the judiciary frustrate many victims of crime in Haiti. In the past, U.S. citizens involved in business and property disputes in Haiti have been arrested and detained without charge, and have been released only after intervention at high levels of the Haitian Government.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities in Haiti are scarce and for the most part sub-standard; outside the capital standards are even lower. Medical care in Port-au-Prince is limited, and the level of community sanitation is extremely low. Life-threatening emergencies often require evacuation by air ambulance at the patient's expense. Doctors and hospitals often expect immediate cash payment for health services.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Haiti is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Cars are supposed to be driven on the right side of the road in Haiti, but few roads have lane indicators and drivers use whatever part of the road is open to them, even if it is not the correct side of the road. Traffic is extremely congested in urban areas, and hours-long traffic jams develop throughout the country.

Driving in Haiti must be undertaken with extreme caution. The situation on the roads can be described as chaotic at best, and it is advisable for those with no knowledge of Haitian roads and traffic customs to hire a driver through a local hotel. Roads are generally unmarked, and detailed and accurate maps are not widely available. Lanes are not marked and signs indicating the direction of traffic flow seldom exist. This lack of organization, along with huge potholes that occur without warning, may cause drivers to execute unpredictable and dangerous maneuvers in heavy traffic. The Haitian govern-

ment lacks adequate resources to assist drivers in distress or to clear the road of accidents or broken-down vehicles blocking the flow of traffic. Drinking and driving is illegal in Haiti, but people frequently drive after drinking, especially at night.

Public transportation as it is usually defined does not exist in Haiti. While Haitians use buses, "taptaps" and taxis, which may observe regular routes, much like public transportation, none of these should be considered reliable. The Embassy strongly discourages their use.

Those who drive in Haiti should do so defensively and conservatively, avoid confrontations such as jockeying for position, and remain aware of the vehicles around them. Drivers should carry the phone numbers of people to call for assistance in an emergency, as Haitian authorities are unlikely to respond to requests for assistance. When traveling outside of Port-au-Prince, drivers should caravan with other vehicles to avoid being stranded in the event of an accident or breakdown.

As neither written nor driving tests are required to qualify for driver's licenses, road laws are not generally known or applied. Signaling imminent actions is not widely practiced, and not all drivers use turn indicators or international hand signals properly. For instance, many drivers use their left blinker for all actions, including turning right and stopping in the road, and others flap their left arm out the window to indicate that they will be taking an unspecified action. Drivers do not always verify that the road is clear before switching lanes, turning, or merging.

Speed limits are seldom posted and are generally ignored. Speeding is the cause of many of the fatal traffic accidents in Haiti, as are overloaded vehicles on winding, mountainous roads and vehicles without brakes. Poor maintenance and mechanical failures often cause accidents as well. Drivers should be particularly cautious at night, as unlighted vehicles can appear without warning. Right of way is not widely observed in Haiti, and there are few operational traffic lights or traffic signs. It is advisable at most intersections to stop and verify that there is no oncoming traffic even if it appears that you have the right of way. Drivers can be quite aggressive and will seldom yield. Walls built to the edge of roads frequently make it impossible to see around corners, forcing drivers to edge their cars into the road at intersections to check for oncoming traffic.

In addition to vehicles, a variety of other objects may appear on the road in Haiti, such as wooden carts dragged by people, small ice cream carts, animals, mechanics working on vehicles parked on the street, and even vendors and their wares. Vehicles are often abandoned in the road or by the side of the road. There are few marked crosswalks and sidewalks, and pedestrians often wend their way through traffic in urban areas.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Haiti's Civil Aviation Authority as not being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Haiti's air carrier operations. For more information, travelers may visit the FAA's internet web site at http://www.faa.gov.

Special Circumstances: The official currency of Haiti is the gourde, which has a variable exchange rate. Visitors will notice that most establishments in Haiti price items in an unofficial currency known as the "Haitian dollar." (One Haitian dollar is equivalent to five gourdes.) Others give prices in gourdes or even in U.S. dollars. It is always a good idea to clarify with vendors which currency—the gourde, Haitian dollar, or U.S. dollar—is being used in a given transaction, as price tags often bear a number without indicating currency. The currency itself shows a value in gourdes. U.S. dollars are the currency of choice at the Labadee Beach cruise ship port-of-call.

Travelers' checks are often difficult to change in Haiti, but credit cards are widely accepted and some establishments accept or cash personal checks. At least one local bank chain has ATMs around Port-au-Prince that are compatible with some U.S. ATM cards. These ATMs are frequently out-of-order, and there have been reports of over-charging accounts.

Haiti, like most Caribbean countries, can be affected by hurricanes and other storms. Hurricane season runs from approximately June 1—November 30 each year. Extensive flooding as a result of heavy rainfall has occurred in the past. Daily weather information in Haiti is available from national and international media. The Haitian meteorological service provides hurricane warnings via national radio. Both media and government information is only in Kreyol and/or French. Warnings are also available on the internet from many sources among which is the National Oceanic and Atmospheric Administration (NOAA) at hurricanes.noaa.gov. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA).

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offences. Persons violating Haiti's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Haiti are severe, and convicted offenders can expect long jail sentences and heavy fines. The judicial process in Haiti can be extremely long; progress is often dependent on considerations not related to the specific case. Detainees may wait months or years for their cases to be heard before a judge or to have legal decisions acted upon by the authorities. Bond is not usually available to those arrested for serious crimes with the result that often suspects remain in custody for

many months before formal indictment. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Haiti are encouraged to register with the nearest U.S. Embassy or Consulate through the State Departments travel registration web site so that they can obtain updated information on travel and security within Haiti. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The Consular Section of the U.S. Embassy is located at Boulevard du 15 October, Tabarre 41, Tabarre, Haiti. The main Embassy switchboard number is: (509) (2) 229-8000. The America Citizens Services (ACS) Unit fax number is (509) (2) 229-8027, the email address is acspap@hotmail.com. Web site: http://haiti.usembassy.gov. ACS Unit office hours are 7:00 a.m. to 3:30 p.m., Monday through Friday. The Consular Section is closed on U.S. and local holidays.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Haiti is not a party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between Haiti and the United States dealing with international parental child abduction. American citizens who travel to Haiti place themselves under the jurisdiction of local courts. American citizens planning a trip to Haiti with dual national children should bear this in mind.

Custody Disputes: Normally, in Haiti, parents who are legally married share the custody of their children. If they are not married, custody is decided by a court. The rights of the designated parent will be set within the scope of the court order. Culture, ethnicity, and gender do not have an impact in custody disputes. However, morality, financial resources, dependability, and availability are essential elements that are taken into account in custody disputes. Parental kidnapping is considered a crime and the length of imprisonment depends on the age of the child abducted.

Enforcement of Foreign Judgments: Custody orders and judgments of foreign courts are not enforced in Haiti.

Visitation Rights: In cases where legal custody has been granted and the judgment has been rendered, the non-custodial parent can petition the court for visitation rights within the court ordered decision or come to a verbal agreement with the custodial parent.

Dual Nationality: Dual nationality is not recognized under Haitian law.

Travel Restrictions: No exit visas are required to leave Haiti. However, travel restrictions can be imposed on married women or children. This authorization requires certification from the Haiti immigration office before they may exit the country.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation (FBI). Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp.ncjrs.org. Persons who wish to pursue a child custody claim in a Haitian court should retain an attorney in Haiti. The U.S. Embassy in Haiti maintains a list of attorneys willing to represent American clients. A copy of this list may be obtained by requesting one from the Embassy at:

U.S. Embassy Port-Au-Prince
Consular Section
5 Harry Truman Blvd
P O Box 1761
Port-au-Prince
Haiti
Telephone: (509) 223-7011
Fax: [509] 223-9665
Web site: http://usembassy.state.gov

Questions involving Haitian law should be addressed to a Haitian attorney or to the Embassy of Haiti in the United States at:

Embassy of Haiti
2311 Massachusetts Avenue, NW
Washington, DC 20008
Telephone: (202) 332-4090
Internet: http://www.haiti.org

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the

Intercountry Adoption section of this book and review current reports online at http://adoption.state.gov.

Haiti is not party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention). Haitian law does not allow for a Haitian child to travel to the United States to be adopted. Therefore, prospective adoptive parents must obtain a full and final adoption under Haitian law before the child can immigrate to the United States. Prospective adoptive parents can expect a lengthy process to adopt a child in Haiti.

Who Can Adopt? To bring an adopted child to United States from Haiti, you must be found eligible to adopt by the United States Government.

In addition to the United States requirements for prospective adoptive parents, Haiti also has the following eligibility requirements for prospective adoptive parents.

Residency Requirements: Haitian law does not require prospective adoptive parents to reside in Haiti, although Haitian courts and/or the Institut du Bien Etre Social et de Recherches (IBESR, the Haitian adoption authority) may require American prospective adoptive parents to travel to Haiti before the adoption is finalized. The United States Government does not require adoptive parents to travel to Haiti at any time during the adoption and immigrant visa process.

Age Requirements: Under Haitian law, at least one prospective adoptive parent must be 35 or older. For married couples, one prospective adoptive parent may be under age 35, provided the couple has been married for ten years and has no biological children.

Marriage Requirements: Adoptions by married couples require the consent of both spouses. This restriction can be waived with permission from the President of Haiti. While Presidential waivers of ineligibility are sometimes issued, they are difficult to obtain and require a lengthy period of time to process. United States immigration procedures still require the signature of both spouses on the USCIS Form I-600 (Petition to Classify Orphan as Immediate Relative).

Other Requirements: Haitian law permits adoptions by single parents, provided they meet the residency and age requirements.

Who Can Be Adopted? Haiti has specific requirements that a child must meet in order to be eligible for adoption. You cannot adopt a child in Haiti unless he or she meets the requirements outlined below.

In addition to these requirements, a child must meet the definition of an orphan under United States immigration law for you to bring him or her back to the United States. Learn more about United States requirements.

Relinquishment Requirements: Prospective adoptive parent(s) must obtain release from the child's surviving parent(s) or legal guardian. Known as the Extrait des Minutes des Greffes, this can only be obtained from the Tribunal de Paix (Justice of the Peace) with jurisdiction over the residence of the child.

Abandonment Requirements: If the biological parents of the child are deceased, their Extrait de Decès (extract of death) must be obtained from the Haitian National Archives.

Haitian Adoption Authority: Institut du Bien Etre Social et de Recherches (IBESR)

The Process: The first step in adopting a child from Haiti is usually to select a licensed agency in the United States that can help with your adoption. Adoption agencies must be licensed by the United States state in which they operate.

To bring an adopted child from Haiti to the United States, you must apply to be found eligible to adopt (Form I-600A) by the USCIS.

Prospective adoptive parents must submit the Extrait des Minutes des Greffes (or Extrait de Decès, if applicable) to IBESR, which will investigate, among other things, the medical and psychological well-being of the prospective adoptive parents and child. If you are found to be eligible to adopt, and a child is available for intercountry adoption, IBESR will provide you with a referral to the child.

The child must be eligible to be adopted according to Haiti's requirements. The child must also meet the definition of an orphan under United States immigration law.

Role of the Adoption Authority: If IBESR approves the adoption, it issues an Autorisation d'Adoption, Authorization of Adoption.

Only the IBESR office in Port-au-Prince can authorize an adoption. IBESR regional offices do not have this authority. This second step is often the most time-consuming in the overall adoption process. Each case has different mitigating factors, some more complicated than others, all of which can have a direct impact on the length of time it takes IBESR to process an individual case. The Immigrant Visa Unit of the United States Embassy has no authority over or ability to influence how quickly IBESR processes its caseload or which cases it takes in which order.

Role of the Court: Prospective adoptive parents must present the IBESR Authorization of Adoption to the Tribunal Civil (Civil Court) that has jurisdiction over the child's residence in order to obtain an Acte d'Adoption (Adoption Act), which finalizes the adoption.

Adoption Application: Prospective adoptive parents should file their application with IBESR.

Time Frame: The adoption process in Haiti frequently requires as long as eighteen months, primarily because the legal process is complex. Often adoption applications can take more than two years. Once an adoption case has been approved by

IBESR and USCIS, the adoptive parent(s) must apply for a Haitian passport for the child; this process can take an additional two or three months after the receipt of the Acte d'Adoption. Only after a Haitian passport has been obtained can the two-week process of obtaining an immigrant visa appointment at the Immigrant Visa Unit (Adoptions Unit) of the United States Embassy Consular Section begin. If at the time of the visa interview the adoption case is complete and the immigrant visa is issuable, the visa itself is typically available within two business days.

Adoption Fees: IBESR charges approximately $140 USD. Haiti's courts charge for judicial services, but their fees are not fixed. Prospective adoptive parents should expect to pay varying court fees and expenses. The approximate total cost to adopt a child in Haiti is $3,000 USD, excluding airfare; however, some adoptive parents report paying larger sums.

The adoptive parents must also pay the cost of the child's medical examination. The fee is $40 USD for children under age 10. For children over the age of 10, the fee is $40 USD, plus an additional $110 USD for vaccinations. Note that the vaccinations may be waived for completion in the United States if the child is under the age of 10.

Haitian and United States law prohibit any payments to the child's birth parent(s) or guardian(s) by the prospective adoptive parent(s) or their agents.

Documents Required: All documents are required to be translated into French and authenticated by a Haitian consul in the United States. The following is a list of documents for the child that are required by IBESR to process an adoption application:

- Three identity photos;
- A Haitian legal document called the "Certificate of Abandonment" from the birth mother and father (if known);
- Relinquishment of parental rights from each birth parent (if the birth parents are deceased, the surviving relatives or legal guardian must issue this document);
- The child's "extrait de naissance" and the "extrait de naissance," if available;
- Death certificate of the birth parents ("extrait de decès"), if applicable;
- The child's social history, which is a statement prepared by a social worker appointed by IBESR, stating how the child became an abandoned child;
- A psychological evaluation of the child; and
- A complete medical report that includes tests for tuberculosis, HIV, and sickle cell anemia.
- A statement from the prospective adoptive parents that they plan to adopt a child in Haiti;
- Three identity photos of each of the prospective adoptive parents;
- Birth certificate of each prospective adoptive parent (or Extrait de Naissance if born in Haiti);
- Marriage certificate of the prospective adoptive parents (Extrait de Mariage if married in Haiti; not required of single adoptive parent);
- An original notarized power of attorney designating whoever may act on the parents' behalf in Haiti (if applicable; a fax copy is not sufficient);
- A report from the adoptive parent's United States state of residence indicating that they are authorized to adopt a child;
- Financial documents, including tax returns, job letters, notarized bank account documents and copies of deeds and mortgages (prospective adoptive parents should forward the Form I-864 Affidavit of Support with the requisite attachments);
- An evaluation of the household environment in which the adoptive child will live (the home study conducted for the I-600A can be used to fulfill this requirement);
- A statement from a competent police authority in the prospective adoptive parent's town of residence indicating the absence of a criminal record (this is included in the home study and the I-171H is sufficient for this requirement);
- Medical examination reports for the prospective adoptive parent(s);
- A psychological evaluation report of the prospective adoptive parent(s); and
- Two letters of reference.

After IBESR approves the adoption, the Haitian courts require that prospective adoptive parents submit the following documents:

- The adoptive parents' birth certificates (if born in Haiti, these must be the official Extrait de Naissance (Extract of Birth) available from the Haitian National Archives);
- The child's Extrait de Naissance; this should not be confused with the Acte de Naissance, the document upon which the Extrait is based;
- The adoptive parents' marriage certificate, if applicable; and
- If the biological parents of the child are deceased, their Extrait de Decès (Extract of Death) from the Haitian National Archives.

Archives National d'Haiti is the National Archives in Port-au-Prince and is the only Haitian agency with the authority to issue extracts related to acts of birth, death, marriage, and divorce. Each of these documents is

based on an "acte" of birth, death, marriage, and divorce; this "acte" is rarely sufficient for IBESR or United States immigration purposes. The Immigrant Visa Unit of the United States Embassy has no authority over the National Archives or ability to influence how quickly it can provide required extracts.

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Haiti does not have any post-adoption requirements.

Travel Warning
April 30, 2008

This Travel Warning is being issued to advise American citizens to defer non-essential travel to Haiti until further notice. The civil unrest of early April has subsided, but the political and economic conditions that precipitated these events have not been entirely resolved. Conditions may occasionally limit Embassy operations to emergency services. Americans are also reminded of ongoing security concerns in Haiti, including frequent kidnappings of Americans for ransom. This supersedes the Travel Warning for Haiti issued on April 11, 2008.

In early April 2008, there were violent demonstrations, looting, transportation disruptions, and up to seven reported deaths in Les Cayes and Port-au-Prince. Some American citizens were temporarily stranded in isolated locations and could not safely travel until calm was restored. Because political and economic conditions precipitating the civil unrest have not been resolved, American citizens should defer non-essential travel to Haiti.

The absence of an effective police force in many areas of Haiti means that, should protests reignite, there is potential for looting, the erection of intermittent roadblocks set by armed protestors or by the police, and an increased possibility of random crime, including kidnapping, carjacking, home invasion, armed robbery and assault. Americans in Haiti should practice good personal security, take commonsense precautions, and avoid any event where crowds may congregate. Even demonstrations intended to be peaceful can turn violent. Americans should closely monitor news media and the U.S. Embassy's website at: http://haiti.usembassy.gov.

U.S. citizens traveling to and residing in Haiti despite this warning are reminded that there is also a chronic danger of violent crime, especially kidnappings. Most kidnappings are criminal in nature, and the kidnappers make no distinctions of nationality, race, gender or age; all are vulnerable. There were 29 reported kidnappings of Americans in 2007. As of the date of this Travel Warning, fourteen Americans were reported kidnapped in 2008. Most of the Americans were abducted in Port-au-Prince. These kidnappings have been marked by deaths, brutal physical

and sexual assault, and shooting of Americans. The lack of civil protections in Haiti, as well as the limited capability of local law enforcement to resolve kidnapping cases, further compounds the element of danger surrounding this trend.

Travel is always hazardous within Port-au-Prince. U.S. Embassy personnel are under an embassy-imposed curfew and must remain in their homes or in U.S. government facilities during the curfew. Some areas are off-limits to embassy staff after dark, including downtown Port-au-Prince. The embassy limits (restricts) travel by its staff to some areas outside of Port-au-Prince due to prevailing road and security conditions. This may constrain our ability to provide emergency services to U.S. citizens outside of Port-au-Prince. Demonstrations and violence occasionally limit Embassy operations to emergency services, even within Port-au-Prince. The UN stabilization force (MINUSTAH) remains fully deployed and is assisting the government of Haiti in providing security.

The Department of State strongly advises U.S. citizens traveling to or residing in Haiti to register either online at https://travelregistration.state.gov or with the Consular Section of the U.S. Embassy in Port-au-Prince. The Consular Section can be reached at (509) (2)229-8000 or e-mail address acspap@state.gov. Travelers should also consult the Department of State's latest Country Specific Information for Haiti and the Worldwide Caution at http://travel.state.gov. American citizens may also obtain up-to-date information on security conditions by calling 1-888-407-4747 toll free in the United States or Canada or 1-202-501-4444 from overseas. In Haiti, citizens can call 509/222-0200, ext. 2000.

THE HOLY SEE

Compiled from the December 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
The Holy See

PROFILE

Geography and People

Area: Total of 0.44 sq. km. (109 acres).
Population: (July 2006 est.) 932.
Ethnic groups: Italian, Swiss, other.
Religions: Roman Catholic.
Languages: Italian, Latin, French, various others.
Literacy: 100%.
Work force: 3,000 lay workers (reside outside the Vatican).

Government

Type: Papacy; ecclesiastical governmental and administrative capital of the Roman Catholic Church.
Independence: Sovereign entity since medieval times (Lateran Pacts confirming independence and sovereignty of The Holy See signed with Italy on February 11, 1929).
Suffrage: Limited to Cardinals less than 80 years old.

Economy

Budget: Revenues (2007) $372 million; expenditures (2007) $386 million.
Industries: Worldwide banking and financial activities; printing; production of coins, medals, postage stamps, a small amount of mosaics, and staff uniforms. This unique, noncommercial economy is also supported financially by contributions (known as Peter's Pence) from Roman Catholics throughout the world, the sale of postage stamps and tourist mementos, fees from admissions to museums, and the sale of publications. The incomes and living standards of lay workers are comparable to, or somewhat better than, those of counterparts who work in the city of Rome

PEOPLE AND HISTORY

Almost all of Vatican City's citizens live inside the Vatican's walls. The Vatican includes high-ranking dignitaries, priests, nuns, and guards as well as about 3,000 lay workers who comprise the majority of the work force.

The Holy See's diplomatic history began in the fourth century, but the boundaries of the papacy's temporal power have shifted over the centuries. From the 8th century through the middle of the 19th century, the Popes held sway over the Papal States, which included a broad band of territory across central Italy. In 1860, after prolonged civil and regional unrest, Victor Emmanuel's army seized the Papal States, leaving only Rome and surrounding coastal regions under papal control. In 1870, Victor Emmanuel captured Rome itself and declared it the new capital of Italy, ending papal claims to temporal power. Pope Pius IX and his successors disputed the legitimacy of these acts and proclaimed themselves to be "prisoners" in the Vatican. Finally, in 1929, the Italian Government and the Holy See signed three agreements resolving the dispute:

- A treaty recognizing the independence and sovereignty of the Holy See and creating the State of the Vatican City;
- A concordat defining the relations between the government and the church within Italy; and
- A financial convention providing the Holy See with compensation for its losses in 1870.

A revised concordat, altering the terms of church-state relations, was signed in 1984.

GOVERNMENT AND INSTITUTIONS

The Pope exercises supreme legislative, executive, and judicial power over the Holy See and the State of the Vatican City. Pope Benedict XVI, former Cardinal Joseph Ratzinger of

Germany, was elected and invested on April 19 and formally inaugurated on April 24, 2005.

The term "Holy See" refers to the composite of the authority, jurisdiction, and sovereignty vested in the Pope and his advisers to direct the worldwide Roman Catholic Church. As the "central government" of the Roman Catholic Church, the Holy See has a legal personality that allows it to enter into treaties as the juridical equal of a state and to send and receive diplomatic representatives. The Holy See has formal diplomatic relations with 175 nations, including the United States and many predominantly Muslim countries. The Holy See also maintains relations of a special nature with the Russian Federation and the Organization for the Liberation of Palestine.

Created in 1929 to provide a territorial identity for the Holy See in Rome, the State of Vatican City is a recognized national territory under international law. The Holy See enters into international agreements and receives and sends diplomatic representatives.

Administration of Vatican City State

The Pope delegates the internal administration of the Vatican City to the Pontifical Commission for the State of Vatican City. Vatican City maintains the Swiss Guards, a voluntary military force, as well as a modern security corps. It has its own post office, commissary, bank, railway station, electrical generating plant, television center, and publishing house. The Vatican also issues its own coins, stamps and Internet domain (.va). Vatican Radio, the official radio station, is one of the most influential in Europe. L'Osservatore Romano is the semi-official newspaper, published daily in Italian, and weekly in English, Spanish, Portuguese, German, and French (plus a monthly edition in Polish). There is also a weekly version published in Italian, as well as a weekly version in Malayalam (a language of India), started on April 3, 2007.

Administration of the Holy See

The Pope exercises his authority through the Roman Curia and the Papal Civil Service. The Roman Curia consists of the Secretariat of State, nine Congregations, three Tribunals, 11 Pontifical Councils, and a complex of offices that administer church affairs at the highest level. The Secretariat of State, under the Cardinal Secretary of State, directs and coordinates the Curia. On September 15, 2006, Pope Benedict XVI appointed Cardinal Tarcisio Bertone as Secretary of State (a role equivalent to that of prime minister) and appointed Archbishop Dominique Mamberti as Secretary for Relations with States (equivalent to foreign minister).

Among the most active of the major Curial institutions are the Congregation for the Doctrine of the Faith, which oversees church doctrine; the Congregation for Bishops, which coordinates the appointment of bishops worldwide; the Congregation for the Evangelization of Peoples, which oversees all missionary activities; and the Pontifical Council for Justice and Peace, which deals with international peace and social issues.

Three tribunals are responsible for judicial power. The Apostolic Penitentiary deals with matters of conscience; the Roman Rota is responsible for appeals, including annulments of marriage; and the Apostolic Signatura is the final court of appeal.

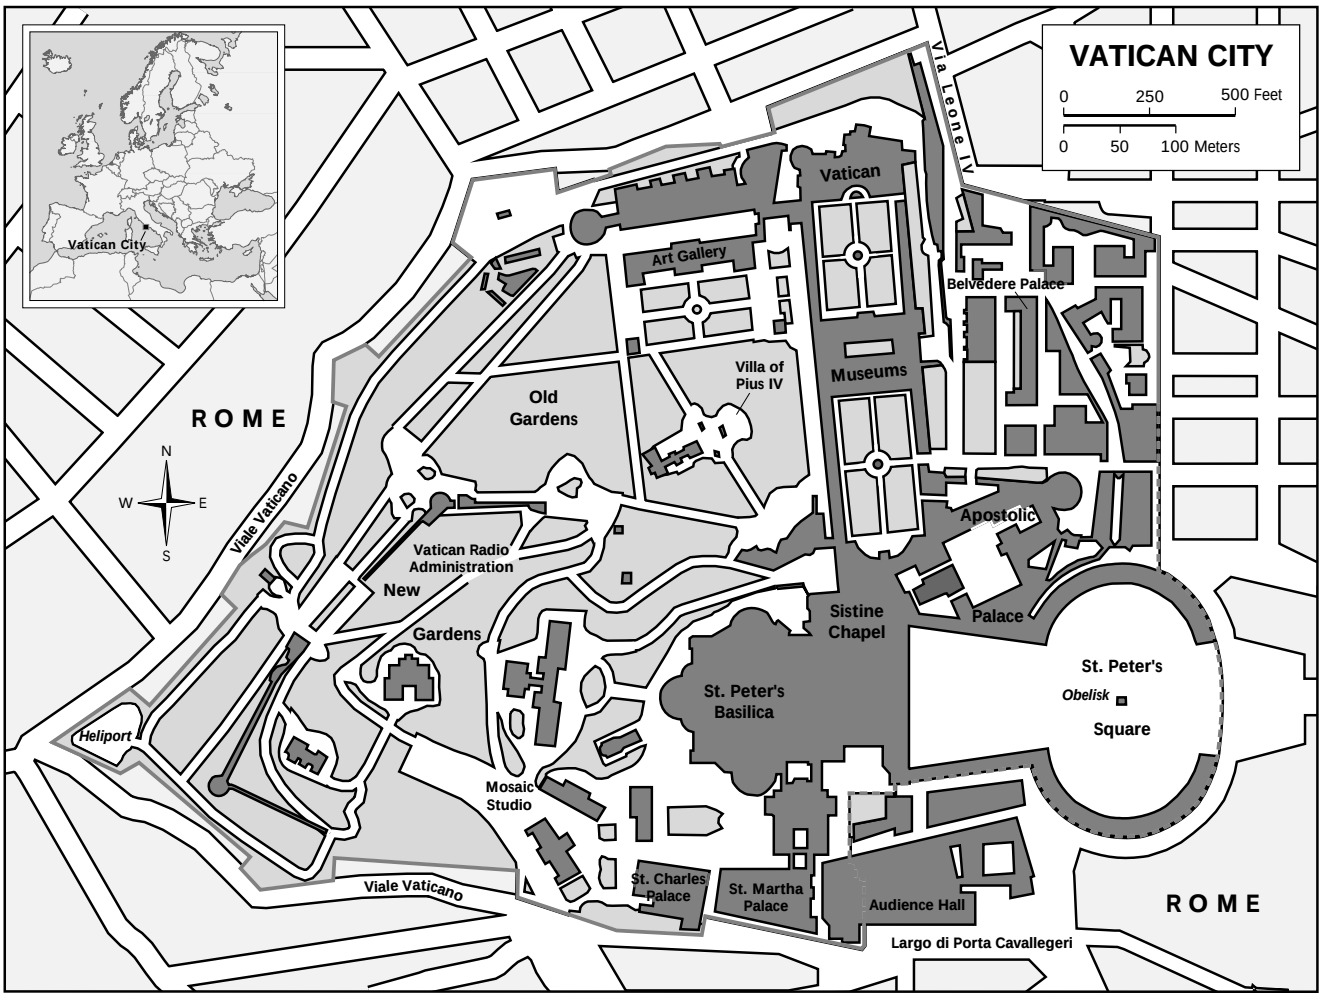
The Prefecture for Economic Affairs coordinates the finances of the Holy See departments and supervises the administration of the Patrimony of the Holy See, an investment fund dating back to the Lateran Pacts. A committee of 15 cardinals, chaired by the Secretary of State, has final oversight authority over all financial matters of the Holy See, including those of the Institute for Works of Religion, the Vatican bank.

Principal Government Officials

Last Updated: 11/12/08

Supreme Pontiff, Roman Catholic Church: **BENEDICT XVI, Pope**
Sec. of State: **Tarcisio BERTONE, Cardinal**
Sec. for Relations With States: **Dominique MAMBERTI, Archbishop**
Apostolic Nuncio to the US: **Pietro SAMBI, Archbishop**
Permanent Observer to the UN, New York: **Celestino MIGLIORE, Archbishop**

The Holy See maintains an Apostolic Nunciature, the equivalent of an embassy, in the U.S. at 3339 Massachusetts Ave. NW, Washington, DC 20008, (202) 333-7121.



Papal Audiences

The North American College in Rome, owned and operated by the U.S. Catholic hierarchy for training American priests, handles requests for papal audiences. The address is Casa Santa Maria dell'Umilta, Via dell'Umilta 30, 00187, Rome, Italy (tel. 39-06-690-0189).

FOREIGN RELATIONS

The Holy See conducts an active diplomacy. As noted, it maintains formal diplomatic relations with 175 nations; 78 of these maintain permanent resident diplomatic missions accredited to the Holy See in Rome. The rest have missions located outside Italy with dual accreditation. The Holy See maintains 106 permanent diplomatic missions to nation-states. Furthermore, the Holy See has two separate permanent diplomatic missions: one to the European Union, another to the Russian Federation.

The Holy See is especially active in international organizations. The Holy See has diplomatic relations with the European Union (EU) in Brussels, it is a permanent observer of the United Nations Organization (UN), Organization of American States (OAS) in Washington, African Union (AU), World Tourist Organization (WToO), World Trade Organiza-

tion (WTO), World Health Organization (WHO), World Food Program (WFP), United Nations Educational, Scientific and Cultural Organization (UNESCO), United Nations Environment Program (UNEP), United Nations International Drug Control Program (UNDCP), United Nations Center for Human Settlements (UNCHS), Latin Union (LU), International Organization for Migration (IOM), International Labor Organization (ILO), International Fund for Agricultural Development (IFAD), and the United Nations Food and Agriculture Organization (FAO).

The Holy See is also an observer on an informal basis of the World Meteorological Organization in Geneva (WMO), United Nations Committee of Peaceful Use of Outer Space (UNCOPUOS), International Strategy for Disaster Reduction (ISDR), International Maritime Organization (IMO), African Asian Legal Consultative Committee (AALCC) and the International Civil Aviation Organization (ICAO).

The Holy See is a member of the Organization for the Prohibition of Chemical Weapons (OPCW), Organization for Security and Cooperation in Europe (OSCE), International Telecommunication Union (ITU), International Telecommunication Satellite Organization (ITSO), World Intellectual Property Organization (WIPO), Universal Postal Union (UPU), International Institute for the Unification of Private Law (UNIDROIT), United Nations High Commissioner for Refugees (UNHCR), United Nations Conference on Trade and Development (UNCTAD), International Grains Council (IGC), International Committee for Military Medicine (ICMM), International Atomic Energy Agency (IAEA), and the Preparatory Commission for the Comprehensive Nuclear Test Ban Treaty Organization (CTBTO).

In 1971, the Holy See announced the decision to adhere to the nuclear Non-Proliferation Treaty (NPT) in order to "give its moral support to the principles that form the base of the treaty itself."

The Holy See is also a participating state in the OSCE and a guest of honor to the Parliamentary Assembly of the OSCE.

Furthermore, the Holy See has a delegate to the Arab League (AL) in Cairo.

U.S.-HOLY SEE RELATIONS

The United States maintained consular relations with the Papal States from 1797 to 1870 and diplomatic relations with the Pope, in his capacity as head of the Papal States, from 1848 to 1868, though not at the ambassadorial level. These relations lapsed with the loss of all papal territories in 1870.

From 1870 to 1984, the United States did not have diplomatic relations with the Holy See. Several presidents, however, designated personal envoys to visit the Holy See periodically for discussions of international humanitarian and political issues. Myron C. Taylor was the first of these representatives, serving from 1939 to 1950. Presidents Nixon, Ford, Carter, and Reagan also appointed personal envoys to the Pope.

The United States and the Holy See announced the establishment of diplomatic relations on January 10, 1984. On March 7, 1984, the Senate confirmed William A. Wilson as the first U.S. ambassador to the Holy See. Ambassador Wilson had been President Reagan's personal envoy to the Pope since 1981. The Holy See named Archbishop Pio Laghi as the first Apostolic Nuncio (equivalent to ambassador) of the Holy See to the U.S.

The U.S.-Holy See relationship is best characterized as an active global partnership for human dignity. Establishment of diplomatic relations has bolstered the frequent contact and consultation between the United States and the Holy See on many important international issues of mutual interest. The commitment to human dignity at the core of both the U.S. and Holy See approach to the world gives rise to a common agenda for action to promote religious freedom, justice, religious and ethnic tolerance, liberty, respect for women and children and for the rule of law.

Holy See priorities for 2008 include freedom of religion, inter-religious dialogue (particularly with the Muslim world), ecumenism, protection for the traditional family, and peace (particularly for the Middle East). Pope Benedict XVI has also publicly expressed concern over the issue of climate change, describing the protection of the environment as a moral responsibility to safeguard God's creation.

TRAVEL

Consular Information Sheet—Italy

June 10, 2008

Country Description: Italy is a developed democracy with a modern economy. The Holy See is a sovereign entity that serves as the ecclesiastical, governmental and administrative capital of the Roman Catholic Church, physically located within the State of the Vatican City inside Rome, with a unique, non-traditional economy. San Marino is a developed, constitutional democratic republic, also independent of Italy, with a modern economy. Tourist facilities are widely available.

Entry Requirements: A valid passport is required. Italian authorities may deny entry to travelers who attempt to enter without a valid passport. A visa is not required for tourist stays up to three months. However, for all other purposes, such as work, study, etc., a visa is required and must be obtained from the Italian Embassy or Consulates before entering Italy.

For further information concerning visas and entry requirements for Italy, travelers may contact the Embassy of Italy at 3000 Whitehaven St NW, Washington, DC 20008, via telephone at (202) 612-4400 or via the Internet: http://www.ambwashingtondc.esteri.it or Italian Consulates General in Boston, Chicago, Detroit, Houston, Los Angeles, Miami, Newark, New Orleans, New York, Philadelphia, or San Francisco, accessible through the above Internet site.

Americans staying or traveling within Italy for less than three (3) months are considered non-residents. This includes persons on vacation, those taking professional trips, students registered at an authorized school, or persons performing research or independent study.

As of May 28, 2007, under Italian law (http://www.camera.it/parlam/leggi/07068l.htm), all non-residents are required to complete a dichiarazione di presenza (declaration of presence). Tourists arriving from a non-Schengen-country (e.g. the United States) should obtain a stamp in their passport at the airport on the day of arrival. This stamp is considered the equivalent of the declaration of presence. Tourists arriving from a Schengen-country (e.g. France) must request the declaration of presence form from a local police office (commissariato di zona), police headquarters (questura) or their place of stay (e.g hotel, hostel, campgrounds) and submit the form to the police or to their place of stay within eight business days of arrival. It is important that applicants keep a copy of the receipt issued by the Italian authorities. Failure to complete a declaration of presence is punishable by expulsion from Italy.

Americans staying in Italy for more than three (3) months are considered residents and must obtain a permesso di soggiorno (permit of stay). This includes Americans who will

work or transact business and persons who want to simply live in Italy. An application "kit" for the permesso di soggiorno may be requested from one of 14,000 national post offices (Poste Italiane). The kit must then be returned to one of 5,332 designated Post Office acceptance locations. It is important that applicants keep a copy of the receipt issued by the Post Office. Additional information may be obtained from an Italian immigration website via Internet at: http://www.portaleimmigrazione.it. Within 20 days of receiving the permit to stay in Italy, Americans must go to the local Vital Statistics Bureau (Anagrafe of the Comune) to apply for residency. It generally takes one to two months to receive the certificate of residence (Certificato di Residenza).

Safety and Security: There have been occasional episodes of politically motivated violence in Italy, most often connected to Italian internal developments or social issues. At various times, Italian authorities have found bombs outside public buildings, have received bomb threats and were subjects of letter bombs. Firebombs or Molotov cocktails have been thrown at buildings or offices in the middle of the night. These incidents have all been attributed to organized crime or anarchist movements. Americans were not targeted or injured in these instances.

Demonstrations may have an anti-American character. Even demonstrations intended to be peaceful have the potential to turn into confrontational situations and possibly escalate into violence. U.S. citizens traveling or residing in Italy should take common sense precautions and follow news reports carefully in order to avoid demonstrations and to be aware of heightened security and potential delays when they occur.

Italy remains largely free of terrorist incidents. However, like other countries in the Schengen area, Italy's open borders with its Western European neighbors allow the possibility of terrorist groups entering/exiting the country with anonymity.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State Burea of Consular Affair's Internet site at http://travel.state.gov, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Italy has a moderate rate of violent crime, some of which is directed towards tourists, principally for motives of theft. Some travelers have been victims of rape and beatings. There have also been incidents of drinks laced with drugs being used by criminals to rob, and in some cases, assault tourists. Many of these incidents have occurred in the vicinity of Rome's Termini train station and at major tourist centers such as Campo de Fiori and Piazza Navona, as well as in Florence and Naples. Criminals using this tactic "befriend" a traveler at a train station, bus stop, restaurant, café or bar in tourist areas, then eventually offer a drink laced with a sleeping drug. When the tourist falls asleep, criminals steal the traveler's valuables. There have also been instances where the victim was assaulted, either physically or sexually.

Americans are urged to exercise caution at train stations and airports, and when frequenting nightclubs, bars and outdoor cafes, particularly at night, because criminals may make initial contact with potential victims in such settings. Individuals under the effect of alcohol may become victims of crime, including robbery, physical and sexual assault, due to their impaired ability to judge situations and make decisions. This is particularly a problem for younger Americans visiting Italy, where the age limit on the sale of alcoholic beverages is lower than in most U.S. states. If you are a victim of such a crime, please file a police report and contact the U.S. Embassy or nearest Consulate. There are also in-country organizations, which provide counseling, medical, and legal assistance to certain crime victims. Petty crimes such as pick pocketing, theft from parked cars, and purse snatching are serious problems, especially in large cities. Pickpockets sometimes dress like businessmen so tourists should not be lulled into a false sense of security by believing that well-dressed individuals are not potential pickpockets or thieves. Most reported thefts occur at crowded tourist sites, on public buses or trains, or at the major railway stations: Rome's Termini; Milan's Centrale; Florence's Santa Maria Novella; and Naples' Centrale and Piazza Garibaldi. Travelers should also be alert to theft in Milan's Malpensa Airport, particularly at car rental agencies. Clients of Internet cafes in major cities have been targeted. Tourists who have tried to resist petty thieves on motor scooters have suffered broken arms and collarbones.

Thieves in Italy often work in groups or pairs. Pairs of accomplices or groups of street urchins are known to divert tourists' attention so that another can pickpocket them. In one particular routine, one thief throws trash, waste or ketchup at the victim; a second thief assists the victim in cleaning up the mess; and the third discreetly takes the victim's belongings. Criminals on crowded public transportation slit the bottoms of purses or bags with a razor blade or sharp knife, then remove the contents. Theft of small items such as radios, luggage, cameras, briefcases, and even cigarettes from parked cars is a major problem.

Carjackings and thefts have also been reported from occupied vehicles waiting in traffic or stopped at traffic lights. Vehicles parked near beaches during the summer have been broken into and items stolen. Robbers take items from cars at gas stations often by smashing car windows.

In a scam practiced on the highways, one thief signals a flat tire to the driver of another car and encourages the driver to pull over. Often, the tire has been punctured by an accomplice, while in other instances, there may, in fact, be nothing wrong with the

vehicle. When the driver stops, one thief helps change the tire, while the other takes the driver's belongings. Use particular caution driving at night on highways, when there may be a greater incidence of robbery attempts. There have been occasional reports of break-ins of rental cars driven by Americans when the precautions mentioned above were not followed during stops at highway service areas.

On trains, a commonly reported trick involves one or more persons who pretend to befriend a traveler and offer drugged food or drink. Also, thieves have been known to impersonate police officers to gain the confidence of tourists. The thief shows the prospective victim a circular plastic sign with the words "police" or "international police." If this happens, the tourist should insist on seeing the officer's identification card (documento), as impersonators tend not to carry forged documents. Tourists should immediately report thefts or other crimes to the local police. The U.S. Secret Service in Rome has been advised of, and is assisting Italian Law Enforcement authorities in investigating, an increase in the appearance of ATM skimming devices. These devices are attached to legitimate bank ATMs, usually located in tourist areas, and capture the account information stored electronically on the card's magnetic strip. The devices consist of a card reader installed over the legitimate reader and a pin-hole video camera mounted above the keypad that records the customer's PIN. ATMs with skimming devices installed may also allow normal transactions to occur. The victim's information is sold, traded on-line or encoded on another card such as a hotel key card to access the compromised account. Here are some helpful hints to protect yourself and to identify skimming devices:

- Use ATMs located in well-lit public areas, or secured inside the bank/business
- Cover the keypad with one hand as you enter your PIN
- Avoid card readers that are not flush with the face of the ATM
- Look for gaps, tampered appearance, or other irregularities between the metal faceplate of the ATM and the card reader
- Monitor your account statements for unauthorized transactions

Organized criminal groups operate throughout Italy, but are more prevalent in the south. They have occasionally resorted to violence to intimidate or to settle disputes. Though the activities of such groups are not generally targeted at tourists, visitors should be aware that innocent bystanders could be injured.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

According to Italian Law (Law 80 of May 14, 2005), anyone caught buying counterfeit goods (for example, DVDs, CDs, watches, purses, bags, belts, sunglasses, etc.) is subject to a fine of no less than EUR 1,000. Police in major Italian cities enforce this law to varying degrees. Travelers are advised to purchase products only from stores and other licensed retailers to avoid unknowingly buying counterfeit and illegal merchandise.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Lost or stolen credit cards present risk of identity theft and should be cancelled immediately. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities are available, but may be limited outside urban areas. Public hospitals, though generally free of charge for emergency services, sometimes do not maintain the same standards as hospitals in the United States, so travelers are encouraged to obtain insurance that would cover a stay in a private Italian hospital or clinic. It is almost impossible to obtain an itemized hospital bill from public hospitals, as required by many U.S. insurance companies, because the Italian National Health Service charges one inclusive rate (care services, bed and board). For information on avian influenza (bird flu), please refer to the Department of State's Avian Influenza Fact Sheet, available at http://travel.state.gov.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad, consult the World Health Organization's web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

In Naples and the region of Campania, a perennial problem exists due to periodic garbage collection strikes and inadequate dump facilities. Residents often resort to burning the garbage which can give off toxic substances that can aggravate respiratory problems. Warm summer temperatures further aggravate this problem.

Medical Insurance: The Department of State strongly urges Ameri-

cans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Italy is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Streets in historic city centers are often narrow, winding and congested. Motor scooters are very popular and drivers often see themselves as exempt from conventions that apply to automobiles. Travelers who rent scooters should be particularly cautious. Pedestrians and drivers should be constantly alert to the possibility of scooters' sudden presence. Throughout Italy, the number of pedestrian deaths and injuries are increasing. Most deaths and injuries involve pedestrians or cyclists who are involved in collisions with scooters or other vehicles. U.S. citizens should remain vigilant and alert while walking or cycling near traffic. Pedestrians should be careful, as sidewalks, especially in major cities, can be extremely congested and uneven, and drivers of bicycles, motorcycles and other vehicles routinely ignore traffic signals and traffic flows, routinely park and even drive on sidewalks. For safety, pedestrians should look carefully in both directions before crossing streets, even when using a marked crosswalk with a green "avanti" ("walk") light illuminated.

Traffic lights are limited, often disobeyed, and a different convention of right-of-way is observed. Italy has over 5,600 kilometers (3,480 mi.) of "Autostrada," or superhighways. Commercial and individual vehicles travel and pass on these well-maintained roads at very high speeds. Accidents occur in which contributing factors include excessive speed, alcohol/drug use and/or sleepiness of long-distance drivers. Italy has one of the highest rates of car accident deaths in the European Union. In rural areas, a wide range of speed on highways makes for hazardous driving. Roads are generally narrow and often have no guardrails. Travelers in northern Italy, especially in winter, should be aware of fog and poor visibility, responsible for multiple-car accidents each year. Most Italian automobiles are equipped with special fog lights. Roadside assistance in Italy is excellent on the well-maintained toll roads, but limited on secondary roads. Use of safety belts and child restraining devices is mandatory and headlights should be on at all times outside of urban areas.

U.S. citizens driving in Italy are reminded that they must adhere to the local driving laws and regulations. Vehicle traffic in some historic downtown areas of cities and towns throughout Italy is limited by a system of permits (called "ZTL" and functioning the same way as an "EasyPass" system in the U.S. might on the freeway). Cameras record the license plates of cars driving in parts of the city that require a permit. Although most of the automated verification stations are clearly marked, if a driver passes one it is impossible to know at the time that a violation occurred or has been recorded. Violators are not pulled over or stopped, and there is no personal contact with a police officer. Whenever possible, the fines imposed for these violations are forwarded to the driver's home in the U.S. to request payment. The fines are cumulative for each time a driver passes a control point. A similar system of automated traffic control cameras is in place in many parts of the highway system and is used to ticket speeding violations.

U.S. citizens driving in Italy should also note that, according to Italian regulation, if a resident of a non-European Union country (e.g. the United States) violates a traffic law (e.g. for speeding), the violator must pay the fine at the time the violation occurs to the police officer issuing the ticket. If the citizen does not or cannot pay the fine at the time, Italian regulation allows the police officer to confiscate the offender's vehicle (even if the vehicle is a rental vehicle.) For specific information concerning Italian driving permits, vehicle inspection, road tax and mandatory insurance, contact the Italian Government Tourist Board (ENIT) offices via the Internet at: http://www.enit.it, tel: 212-245-4822 or the A.C.I. (Automobile Club Italiano) at Via Magenta 5, 00185 Rome, tel: 39-06-4477. For information on obtaining international drivers licenses, contact AAA or the American Automobile Touring Alliance.

Visit the website of the country's national tourist office at http://www.italiantourism.com and national authority responsible for road safety online at http://www.infrastrutturetrasporti.it.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Italy's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Italy's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Strikes and other work stoppages occur frequently in the transportation sector (national airlines, airports, trains, and bus lines). Most are announced in advance and are of short duration. Information on strikes may be found at http://www.infrastrutture.gov.it/page/NuovoSito/site.php. Reconfirmation of domestic and international flight reservations is highly recommended.

U. S citizens using public transportation while in Italy are reminded that they must adhere to local transportation laws and regulations. Travelers must purchase train tickets and validate them by punching them in validating machines usually located near the entrance of train tracks prior to boarding. Failure to follow this procedure may result in an on-the-spot fine by an inspector on the train. Travelers must purchase bus tickets prior to boarding and validate them immediately after boarding. Tickets may be

purchased at tobacco stores or kiosks. Failure to follow this procedure may result in an immediate fine imposed by an inspector on the bus. If the violator does not pay the fine on the spot, it will automatically double and will be forwarded to the violator's home address.

Disaster Preparedness: Several major earthquake fault lines cross Italy. Principal Italian cities, with the exception of Naples, do not lie near these faults, but smaller tourist towns, like Assisi, do and have suffered earthquakes.

General information about disaster preparedness is available via the Internet from the U.S. Federal Management Agency (FEMA) at http://www.fema.gov. Detailed information on Italy's earthquake fault lines is available from the U.S. Geological Survey (USGS) at http://www.usgs.gov.

Italy also has several active volcanoes generating geothermal events. Mt. Etna, on the eastern tip of the island of Sicily, has been erupting intermittently since 2000. Mt. Vesuvius, located near Naples, is currently capped and not active. Activity at Mt. Vesuvius is monitored by an active seismic network and sensor system, and no recent seismic activity has been recorded. Two of Italy's smaller islands, Stromboli and Vulcano in the Aeolian Island chain north of Sicily, also have active volcanoes with lava flows. Detailed information on volcano activity in Italy is available from the U.S. Geological Survey (USGS) at http://www.usgs.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations. They may differ significantly from those of the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Italian law, even unknowingly, may be expelled, arrested or imprisoned.

Penalties for possession, use or trafficking in illegal drugs in Italy are severe and convicted offenders can expect long jail sentences and heavy fines. Engaging in illicit sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

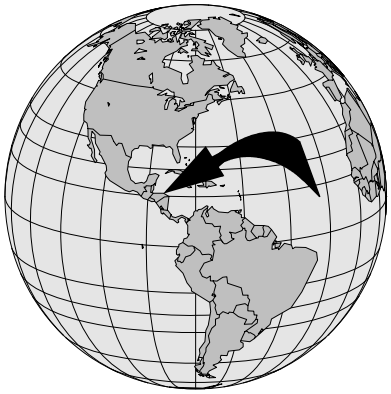
Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy and Consulate Locations: Americans living or traveling in Italy are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website, https://travelregistration.state.gov, and to obtain updated information on travel and security within Italy. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at Via V. Veneto 119/A, tel: 39-06-46741 and fax: 39-06-4674-2217; Internet address: http://italy.usembassy.gov.

The U.S. Consulates are located in:

Florence: Lungarno Amerigo Vespucci 38, tel: 39-055-266-951, consular fax: 399-055-215-550;

Milan: Via Principe Amedeo 2/10, tel: 39-02-290-351, and fax: 39-02-290-35-273;



Naples: Piazza della Repubblica, tel: 39-081-583-8111, and consular fax: 39-081-583-8275.

There are U.S. Consular Agents located in:

Genoa: Via Dante 2, tel: 39-010-584-492, and fax: 39-010-553-3033;

Palermo: Via Vaccarini 1, tel: 39-091-305-857, and fax: 39-091-625-6026;

Venice: Viale Galileo Galilei, 30, tel: 39-041-541-5944, and fax: 39-041-541-6654.

HONDURAS

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Honduras

PROFILE

Geography

Area: 112,090 sq. km. (43,278 sq. mi.); slightly larger than Virginia.
Cities: Capital—Tegucigalpa (1,150,000); San Pedro Sula (800,000-900,000).
Terrain: Mountainous.
Climate: Tropical to subtropical, depending on elevation.

People

Nationality: Noun and adjective—Honduran(s).
Population: (2006 est.) 7.3 million.
Growth rate: (2006 est.) 2.16%.
Ethnic groups: 90% mestizo (mixed Indian and European); others of European, Arab, African, or Asian ancestry; and indigenous Indians.
Religions: Roman Catholic, Protestant minority.
Languages: Spanish.
Education: (2003) Years compulsory—6. Attendance—88% overall, 31% at junior high level. Literacy—76.2%.
Health: Infant mortality rate—29.64/1,000. Life expectancy—66.2 yrs.
Work force: Services—42.2%; natural resources/agriculture—35.9%; manufacturing—16.3%; construction/housing—5.6%.

Government

Type: Democratic constitutional republic.
Independence: September 15, 1821.
Constitution: 1982; amended 1999.
Government branches: Executive—president, directly elected to 4-year term. Legislative—unicameral National Congress, elected for 4-year term. Judicial—Supreme Court of Justice (appointed for a 7-year term by Congress and confirmed by the president); several lower courts.
Political parties: National Party, Liberal Party, Innovation and National Unity Party, Christian Democratic Party, and the Democratic Unification Party.
Suffrage: Universal and compulsory at age 18.
Political subdivisions: 18 departments.

Economy (2007 est.)

GDP: $12.3 billion
Growth rate: 6.7%.
Per capita GDP: $1,600 (official exchange rate), $3,130 (PPP, IMF).
Natural resources: Arable land, forests, minerals, and fisheries.
Agriculture: (13.8% of GDP) Products—coffee, bananas, shrimp and lobster, sugar, fruits, basic grains, and livestock.
Manufacturing: (19.7% of GDP) Types—textiles and apparel, cement, wood products, cigars, and foodstuffs.
Services: (54.2% of GDP).
Trade: Exports (goods)—$5.59 billion: apparel, coffee, shrimp, bananas, palm oil, gold, zinc/lead concentrates, soap/detergents, melons, lobster, pineapple, lumber, sugar, and tobacco. Major market—U.S. (69.9%). Imports (goods)—$8.56 billion: fabrics, yarn, machinery, chemicals, petroleum, vehicles, processed foods, metals, agricultural products, plastic articles, and paper articles. Major source—U.S. (52.2%).

PEOPLE

About 90% of the population is mestizo. There also are small minorities of European, African, Asian, Arab, and indigenous Indian descent. Most Hondurans are Roman Catholic, but Protestant churches are growing in number. While Spanish is the predominant language, some English is spoken along the northern coast and is prevalent on the Caribbean Bay Islands. Several indigenous Indian languages and Garífuna (a mixture of Afro-indigenous languages) are also spoken. The restored Mayan ruins near the Guatemalan border in Copan reflect the great Mayan culture that flourished there for hundreds of years until the early 9th century. Columbus landed at mainland Honduras (Trujillo) in 1502, and named the area “Honduras” (mean-

ing “depths”) for the deep water off the coast. Spaniard Hernan Cortes arrived in 1524.

HISTORY

Honduras was originally inhabited by indigenous tribes, the most powerful of which were the Mayans. The western-central part of Honduras was inhabited by the Lencas. These autonomous groups had their conflicts but maintained their commercial relationships with each other and with other populations as distant as Panama and Mexico.

On July 30, 1502, Christopher Columbus first saw Honduran soil and he claimed the territory in the name of his sovereigns, Ferdinand of Aragon and Isabella of Castile. He named the area “Honduras” (meaning “depths") for the deep water off the coast.

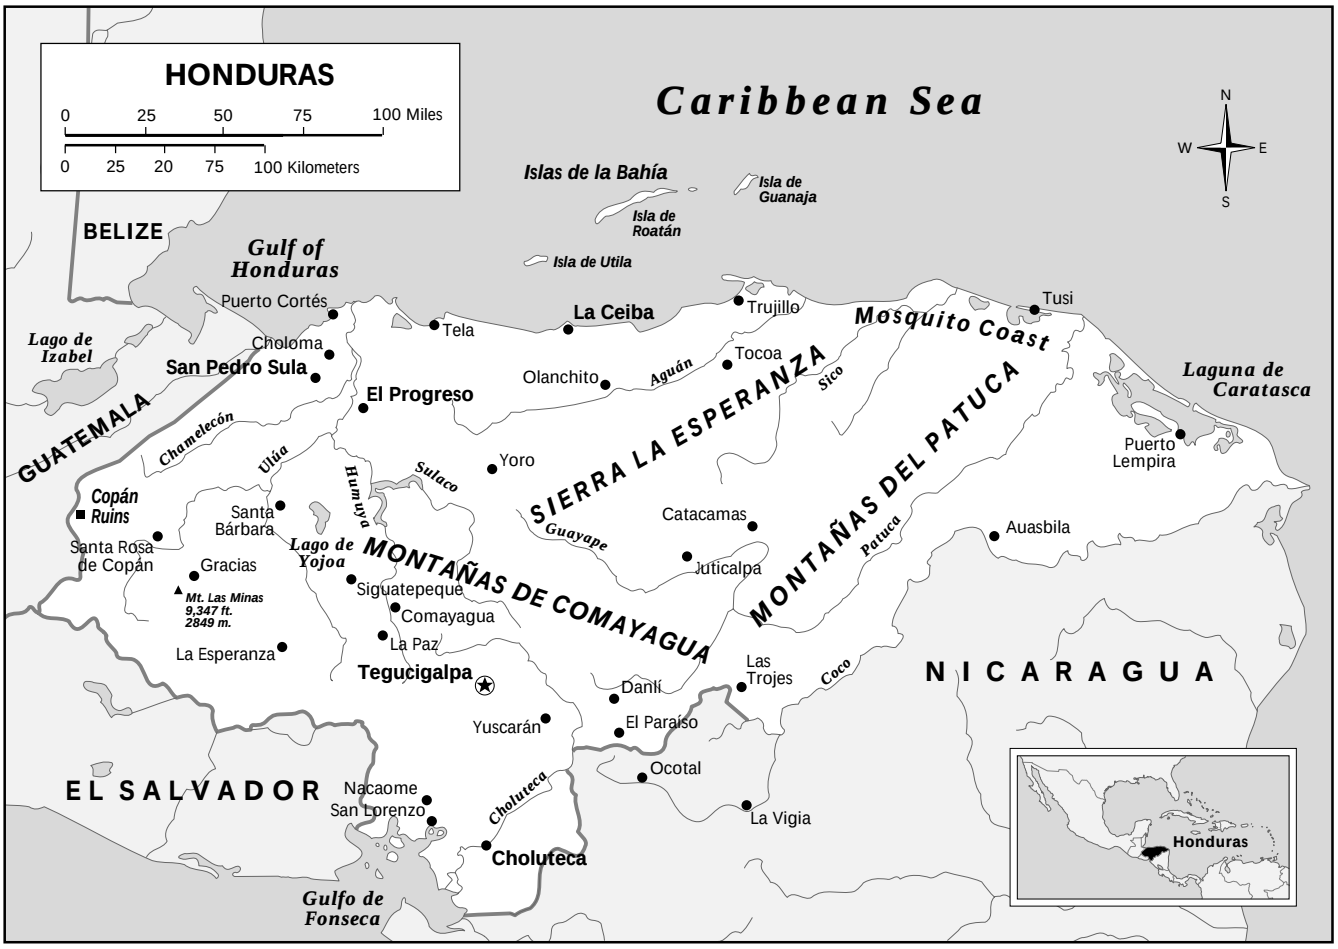
In 1523 the first expeditionary forces arrived under the command of Gil Gonzáles de Avila, who hoped to rule the new territory. In 1524, Cristóbal de Olid arrived with the same intent on behalf of Hernán Cortés. Olid founded the colony Triunfo de la Cruz and tried to establish an independent government. When Cortés learned of this, he decided to reestablish his own authority by sending a new expedition, headed by Francisco de las Casas. Olid, who managed to capture his rivals, was betrayed by his men and assassinated. Cortés then traveled to Honduras to firmly establish his government in the city of Trujillo before returning to Mexico in 1526. Honduras formed part of the colonial era Captaincy General of Guatemala. The cities of Comayagua and Tegucigalpa developed as early mining centers.

By October 1537, the Lenca chief, Lempira, a warrior of great renown, had managed to unify more than two hundred native tribes in order to offer an organized resistance against penetration by the Spanish conquerors. After a long battle, Governor Montejo gained the Valley of Comayagua, established Comayagua city in another location, and vanquished the indigenous peoples in Tenampúa, Guaxeregui, and Ojuera.

Independence

Honduras gained independence from Spain in 1821. The country was then briefly annexed to the Mexican Empire. In 1823, Honduras joined the newly formed United Provinces of Central America federation, which collapsed in 1838. Gen. Francisco Morazan—a Honduran national hero—led unsuccessful efforts to maintain the federation. Honduras' agriculture-based economy was dominated in the 1900s by U.S. companies that established vast banana plantations along the north coast. Foreign capital, plantation life, and conservative politics held sway in Honduras from the late 19th century until the mid-20th century.

Military Rule



Authoritarian Gen. Tiburcio Carias Andino controlled Honduras during the Great Depression, until 1948. In 1955—after two authoritarian administrations and a strike by banana workers—young military reformists staged a coup that installed a provisional junta and paved the way for constituent assembly elections in 1957. This assembly appointed Ramon Villeda Morales as President and transformed itself into a national legislature with a 6-year term. The Liberal Party ruled during 1957-63. In 1963, conservative military officers preempted constitutional elections and deposed Villeda in a bloody coup. These officers exiled Liberal Party members and took control of the national police. The armed forces, led by Gen. Lopez Arellano, governed until 1970. Popular discontent continued to rise after a 1969 border war with El Salvador, known as “the Soccer War.” A civilian President—Ramon Cruz of the National Party—took power briefly in 1970 but proved unable to manage the government. In 1972, Gen. Lopez staged another coup. Lopez adopted more progressive policies, including land reform, but his regime was brought down in the mid-1970s by corruption scandals. The regimes of Gen. Melgar Castro (1975-78) and Gen. Paz Garcia (1978-82) largely built the current physical infrastructure and telecommunications system of Honduras. The country also enjoyed its most rapid economic growth during this period, due to greater international demand for its products and the availability of foreign commercial lending.

Seven Consecutive Democratic Elections

Following the overthrow of Anastasio Somoza in Nicaragua in 1979 and general instability in El Salvador at the time, Hondurans elected a constituent assembly in 1980 and voted in general elections in 1981. A new constitution was approved in 1982, and the Liberal Party government of President Roberto Suazo Cordoba took office. Suazo relied on U.S. support during a severe economic recession, including ambitious social and economic development projects sponsored by the U.S. Agency for International Development (USAID). Honduras became host to the largest Peace Corps mission in the world, and nongovernmental and international voluntary agencies proliferated.

As the 1985 election approached, the Liberal Party interpreted election law as permitting multiple presidential candidates from one party. The Liberal Party claimed victory when its presidential candidates, who received 42% of the vote, collectively outpolled the National Party candidate, Rafael Leonardo Callejas. Jose Azcona Hoyo, the candidate receiving the most votes among the Liberals, assumed the presidency in 1986. With the endorsement of the Honduran military, the Azcona administration ushered in the first peaceful transfer of power between civilian presidents in more than 30 years.

Nationalist Rafael Callejas won the presidential election, taking office in 1990. The nation's fiscal deficit ballooned during Callejas' last year in office. Growing public dissatisfaction with the rising cost of living and with widespread government corruption led voters in 1993 to elect Liberal

Party candidate Carlos Roberto Reina with 56% of the vote. President Reina, elected on a platform calling for a "moral revolution," actively prosecuted corruption and pursued those responsible for human rights abuses in the 1980s. He created a modern attorney general's office and an investigative police force, increased civilian control over the armed forces, transferred the police from military to civilian authority, and restored national fiscal health.

Liberal Carlos Roberto Flores Facusse took office in 1998. Flores inaugurated programs of reform and modernization of the Honduran government and economy, with emphasis on helping Honduras' poorest citizens while maintaining the country's fiscal health and improving international competitiveness. In October 1998, Hurricane Mitch devastated Honduras, leaving more than 5,000 people dead and 1.5 million displaced. Damages totaled nearly $3 billion. Ricardo Maduro Joest of the National Party won the 2001 presidential elections, and was inaugurated in 2002. During his campaign, President Maduro promised to reduce crime, reinvigorate the economy, and fight corruption. Maduro's first act as President was to deploy a joint police-military force to the streets to permit wider neighborhood patrols in the ongoing fight against the country's massive crime and gang problem. Maduro was a strong supporter of the global war on terrorism and joined the U.S.-led coalition in Iraq with an 11-month contribution of 370 troops. Under President Maduro's guidance, Honduras also negotiated and ratified the U.S.-Central America Free Trade Agreement (CAFTA), received debt relief, became the first Latin American country to sign a Millennium Challenge Account compact with the U.S., and actively promoted greater Central American integration.

Jose Manuel "Mel" Zelaya Rosales of the Liberal Party won the November 27, 2005 presidential elections with less than a 4% margin of victory, the smallest margin ever in Honduran electoral history. Zelaya's campaign theme was "citizen power," and he vowed to increase transparency and combat narcotrafficking, while maintaining macroeconomic stability. The Liberal Party won 62 of the 128 congressional seats, just short of an absolute majority.

GOVERNMENT

The 1982 constitution provides for a strong executive, a unicameral National Congress, and a judiciary appointed by the National Congress. The president is directly elected to a 4-year term by popular vote. The Congress also serves a 4-year term; congressional seats are assigned the

parties' candidates in proportion to the number of votes each party receives in the various departments. The judiciary includes a Supreme Court of Justice (one president and 14 magistrates chosen by Congress for a seven-year term), courts of appeal, and several courts of original jurisdiction—such as labor, tax, and criminal courts. For administrative purposes, Honduras is divided into 18 departments, with municipal officials selected for 4-year terms.

POLITICAL CONDITIONS

Reinforced by the media and several political watchdog organizations, concerted efforts to protect human rights and civil liberties continue. Organized labor represents approximately 8% of the work force and its economic and political influence continues to decline.

Honduras held its seventh consecutive democratic elections in 2005 to elect a new president, unicameral Congress, and mayors. For the first time, as a result of the newly reformed Electoral Law, voters were able to vote for individual members of Congress, with photos of each candidate on the ballot, rather than party lists. For the electoral period 2006-2010, 31 women were elected to Congress. Additionally, 27 of these 31 congresswomen chose women as their alternates.

Political Parties

The two major parties are the slightly left-of-center Liberal Party and the slightly right of center National Party. The three much smaller registered parties—the Christian Democratic Party, the Innovation and National Unity Party, and the Democratic Unification Party—hold a few seats each in the Congress, but have never come close to winning the presidency.

Principal Government Officials

Last Updated: 2/1/2008

Pres.: **Manuel ZELAYA Rosales**
Vice Pres.: **Elvin Ernesto SANTOS Ordonez**
Min. of Agriculture & Livestock: **Hector HERNANDEZ**
Min. of Culture, Arts, & Sports: **Rodolfo PASTOR**
Min. of Defense: **Aristides MEJIA**
Min. of Education: **Rafael PINEDA PONCE**
Min. of Finance: **Rebeca SANTOS Rivera**
Min. of Foreign Relations: **Milton JIMENEZ Puerto**
Min. of Industry & Commerce: **Elizabeth AZCONA Bobock**
Min. of Govt. & Justice: **Jorge Arturo REINA**
Min. of Labor: **Rixi MONCADA Godoy**
Min. of Natural Resources & Environment: **Mayra MEJIA del Cid**
Min. of the Presidency: **Yani ROSENTHAL**
Min. of Public Employees' Retirement & Pension (INJUPEMP): **Lucio IZAGUIRRE**
Min. of Public Health: **Orison VELASQUEZ**
Min. of Public Works, Transportation, & Housing: **Jose Rosario BONANO**
Min. of Public Security: **Alvaro Antonio ROMERO Salgado**
Min. of Science & Technology: **Miriam MEJIA**
Min. of Tourism: **Ricardo MARTINEZ**
Min. Without Portfolio (Housing Sector): **Hector BRICENO**
Pres., Central Bank: **Gabriella NUNEZ de Reyes**
Ambassador to the US: **Roberto FLORES BERMUDEZ**
Permanent Representative to the UN, New York: **Ivan ROMERO-MARTINEZ**

Honduras maintains an embassy in the United States at 3007 Tilden Street NW, Washington, DC 20008 (tel. 202-966-7702).

ECONOMY

Honduras, with a per capita gross national income of $1,600, is one of the poorest countries in the Western Hemisphere. The economy grew 6% in 2006 or by about 3.2% on a per capita basis, and by an estimated 6.7% in 2007. Historically dependent on exports of agricultural goods, the Honduran economy has diversified in recent decades and now has a strong export-processing (maquila) industry, primarily focused on assembling textile and apparel goods for re-export to the United States, as well as automobile wiring harnesses and similar products. These industries employ about 130,000 Hondurans, out of an economically active population of 2.8 million. Despite the recent economic diversification, there continues to be a large subsistence farmer population with few economic opportunities. Honduras also has extensive forest, marine, and mineral resources, although widespread slash-and-burn agricultural methods and illegal logging continue to destroy Honduran forests.

Remittances from Hondurans living abroad, particularly the U.S., totaled $2.56 billion in 2007—more than a quarter of GDP—but the annual rate of growth of remittances slowed to 10%, compared with 31% in 2006. Meanwhile, Honduras's fuel import bill rose sharply with the surge in world oil prices (Honduras produces no petroleum), and foreign reserves of the Central Bank fell by nearly $98 million—about 4%. The rise in global grain prices also put upward pressure on Honduran consumer prices in 2007, and the inflation rate accelerated to 8.9% from 6.2% in 2006. By the end of the year, inflation was running at about a 10% annual rate, giving rise to political demands for price controls on basic items. Remittances may decline in 2008 with the slowdown in the U.S. economy, particularly the construction sector, where many Hondurans are employed, putting additional pressure on reserves.

The official exchange rate has been fixed at 18.89 Honduran Lempiras to the dollar since 2005. About 40% of the Honduran workforce was considered either unemployed or underemployed in 2006. This does not include the roughly 1 million Hondurans who have migrated to the United States.

Since 2005, Honduras has received nearly $ 4 billion in debt relief from

bilateral and multilateral donors. The donor community estimated this would reduce annual debt service payments by about $200 million in 2007. The Government of Honduras has committed to apply these funds to poverty alleviation, as laid out in the existing Poverty Reduction Strategy. However, much of the ensuing rise in government spending has gone to public sector salaries and fuel subsidies. The state electric utility, ENEE, is losing an estimated $300 million a year, primarily because the rates it charges its customers do not cover costs.

NATIONAL SECURITY

With the cessation of the 1980s civil wars in El Salvador and Nicaragua, the Honduran armed forces refocused their orientation toward combating transnational threats such as narcoterrorism and organized crime. Honduras supports efforts at regional integration and deployed troops to Iraq in support of Operation Iraqi Freedom. In 1999, the constitution was amended to abolish the position of military commander in chief of the armed forces, thus codifying civilian authority over the military.

FOREIGN RELATIONS

Honduras is a member of the United Nations, the World Trade Organization (WTO), the Organization of American States (OAS), the Central American Parliament (PARLACEN), the Central American Integration System (SICA), the Conference of Central American Armed Forces (CFAC), and the Central American Security Commission (CASC). During 1995-96, Honduras—a founding member of the United Nations—served as a nonpermanent member of the UN Security Council for the first time. Honduras is currently a member of the UN Human Rights Commission. Honduras is a party to all UN and OAS counterterrorism conventions and protocols.

Honduras is a strong proponent of Central American cooperation and integration, and continues to work towards the implementation of a regional customs union and Central American passport, which would ease border controls and tariffs among Honduras, Guatemala, Nicaragua, and El Salvador.

In 1969, El Salvador and Honduras fought the brief "Soccer War" over disputed border areas. The two countries formally signed a peace treaty in 1980, which put the border dispute before the International Court of Justice (ICJ). In 1992, the Court awarded most of the disputed territory to Honduras, and in January 1998, Honduras and El Salvador signed a border demarcation treaty to implement the terms of the ICJ decree although delays continue due to technical difficulties. However, Honduras and El Salvador maintain normal diplomatic and trade relations. Honduras also has unresolved maritime border disputes with El Salvador, Nicaragua, Jamaica, and Cuba.

U.S.-HONDURAN RELATIONS

Overview

The United States and Honduras have close and friendly relations. Honduras is supportive of U.S. policy in the United Nations and other fora, as well of the war on terrorism. Honduras was among the first countries to sign an International Criminal Court (ICC) Article 98 Agreement with the U.S., and the Honduran port of Puerto Cortes is part of the U.S. Container Security Initiative (CSI).

The United States favors stable, peaceful relations between Honduras and its Central American neighbors. During the 1980s, Honduras supported U.S. policy opposing a revolutionary Marxist government in Nicaragua and an active leftist insurgency in El Salvador. The Honduran Government also played a key role in negotiations that culminated in the 1990 Nicaraguan elections. Honduras continues to participate in the UN observer mission in the Western Sahara, contributed 370 troops for stabilization in Iraq, and remains interested in participating in other UN peacekeeping missions.

The United States is Honduras' chief trading partner, with two-way trade in goods increasing to over $7 billion in 2006. U.S.-Honduran trade is dominated by the Honduran maquila industry, which imports yarn and textiles from the United States and exports finished articles of clothing. Other leading Honduran exports to the United States include coffee, bananas, seafood (particularly shrimp), minerals (including zinc, lead, gold, and silver), and other fruits and vegetables. Two-way trade with Honduras in 2006 was $7.4 billion, up from $7.0 billion in 2005. For 2007 through October, Honduran exports to the United States increased 6%, and U.S. exports to Honduras increased 18% when compared to the same period in 2006.

U.S. investors account for nearly two-thirds of the foreign direct investment (FDI) in Honduras. The stock of U.S. direct investment in Honduras in 2005 was $402 million, up from $339 million in 2004. The overall flow of FDI into Honduras in 2005 totaled $568 million, $196 million of which was spent in the maquila sector. The United States continued as the largest contributor of FDI. The most substantial U.S. investments in Honduras are in the maquila sector, fruit production (particularly bananas, melons, and pineapple), tourism, energy generation, shrimp aquaculture, animal feed production, telecommunications, fuel distribution, cigar manufacturing, insurance, brewing, leasing, food processing, and furniture manufacturing. Many U.S. franchises, particularly in the restaurant sector, operate in Honduras.

In 2004, the United States signed the U.S.-Central America Free Trade Agreement (CAFTA) with Honduras, El Salvador, Nicaragua, Guatemala, Costa Rica, and the Dominican Republic. The legislatures of all signatories except Costa Rica ratified CAFTA in 2005, and the agreement entered into force in the first half of

2006. CAFTA eliminates tariffs and other barriers to trade in goods, services, agricultural products, and investments. Additionally, CAFTA is expected to solidify democracy, encourage greater regional integration, and provide safeguards for environmental protection and labor rights.

In June 2005, Honduras became the first country in the hemisphere to sign a Millennium Challenge Account (MCA) compact with the US Government. Under the compact, the U.S. Millennium Challenge Corporation will invest $215 million over five years to help Honduras improve its road infrastructure, diversify its agriculture, and get its products to market. Honduras failed the corruption indicator required for continued funding into 2008. MCC will closely follow Honduras's progress on reducing corruption under an approved "remediation plan."

The United States maintains a small presence at a Honduran military base; the two countries conduct joint peacekeeping, counternarcotics, humanitarian, disaster relief, and civic action exercises. U.S. troops conduct and provide logistics support for a variety of bilateral and multilateral exercises—medical, engineering, peacekeeping, counternarcotics, and disaster relief—for the benefit of the Honduran people and their Central American neighbors. U.S. forces—regular, reserve, and National Guard—benefit greatly from these exercises.

U.S. Policy Toward Honduras

U.S. policy toward Honduras is aimed at consolidating democracy, protecting human rights, and promoting the rule of law. U.S. Government programs are aimed at promoting a healthy and more open economy capable of sustainable growth, improving the climate for business and investment while protecting U.S. citizen and corporate rights, and promoting the well-being of the Honduran people. The United States also works with Honduras to meet transnational challenges—including the fight against terrorism, narcotics trafficking, money laundering, illegal migration, and trafficking in persons—and encourages and supports Honduran efforts to protect the environment. The goals of strengthening democracy and promoting viable economic growth are especially important given the geographical proximity of Honduras to the United States. An estimated 1 million Hondurans reside in the United States, 600,000 of whom are believed to be undocumented; consequently, immigration issues are an important item on our bilateral agenda.

U.S.-Honduran ties are further strengthened by numerous private sector contacts, with an average of between 80,000 and 110,000 U.S. citizens visiting Honduras annually and about 15,000 Americans residing there. More than 150 American companies operate in Honduras.

Economic and Development Assistance

In order to help strengthen Honduras' democratic institutions and improve living conditions, the United States has provided substantial economic assistance. The United States has historically been the largest bilateral donor to Honduras. The USAID budget for Honduras is $37 million for fiscal year 2007. Over the years, U.S. foreign assistance has helped advance such objectives as fostering democratic institutions, increasing private sector employment and income, helping Honduras manage its arrears with international financial institutions, providing humanitarian aid, increasing agricultural production, and providing loans to microbusinesses.

1998's Hurricane Mitch left hundreds of thousands homeless, devastated the road network and other public infrastructure, and crippled certain key sectors of the economy. Estimates show that Hurricane Mitch caused $8.5 billion in damages to homes, hospitals, schools, roads, farms, and businesses throughout Central America, including more than $3 billion in Honduras alone. In response, the United States provided more than $461 million in immediate disaster relief and humanitarian aid spread over the years 1998-2001. This supplemental assistance was designed to help repair water and sanitation systems; replace housing, schools, and roads; provide agricultural inputs; provide local government crisis management training; grant debt relief; and encourage environmental management expertise. Additional resources were utilized to maintain anti-crime and drug assistance programs.

The Peace Corps has been active in Honduras since 1962, and currently the program is one of the largest in the world. In 2005, there were 220 Peace Corps Volunteers working in the poorest parts of Honduras.

The U.S. Government strongly supports the professionalization of the civilian police force as an important element in strengthening the rule of law in Honduras. The American Embassy in Tegucigalpa provides specialized training to police officers.

Security Assistance

The role of the Honduran armed forces has changed significantly in recent years as many institutions formerly controlled by the military are now under civilian authority. The annual defense and police budgets have hovered at around $35 million during the past few years. Honduras receives modest U.S. security assistance funds and training.

In the absence of a large security assistance program, defense cooperation has taken the form of increased participation by the Honduran armed forces in military-to-military contact programs and bilateral and multilateral combined exercises oriented toward peacekeeping, disaster relief, humanitarian/civic assistance, and counternarcotics. The U.S. Joint Task Force Bravo (JTF-B), stationed at the Honduran Soto Cano Air Base, plays a vital role in supporting combined exercises in Honduras and in neighboring Central American countries. JTF-Bravo plays a critical role in helping the United States respond to natural disasters in Central America

by serving as a platform for rescue missions, repairing critical infrastructure, and in meeting high priority health and sanitation needs. JTF-Bravo forces have helped deliver millions of dollars worth of privately donated goods to those in need.

U.S. Business Opportunities

Bilateral trade between the two nations totaled $7.4 billion in 2006, up from $7 billion in 2005. Exports of goods and services from the U.S. increased from $3.24 billion in 2005 to $3.69 billion in 2006, while Honduran exports to the U.S. fell slightly from $3.75 billion in 2005 to $3.72 billion in 2006. More than 150 American companies operate in Honduras; U.S. franchises are present in increasing numbers.

Opportunities for U.S. business sales include textile machinery, construction equipment, automotive parts and accessories, telecommunications equipment, pollution control/water resources equipment, agricultural machinery, hotel and restaurant equipment, computers and software, franchising, and household consumer goods. The best prospects for agricultural products are corn, milled rice, wheat, soybean meal, and consumer-ready products.

U.S. citizens contemplating investment in real estate in Honduras should proceed with extreme caution, especially in the Bay Islands or coastal areas, because of frequently conflicting legislation, problems with land titles, and a weak judicial system. Investors or their attorneys should check property titles not only with the property registry office having jurisdiction in the area in which the property is located (being especially observant of marginal annotations on the deed and that the property is located within the area covered by the original title), but also with the National Agrarian Institute (INA) and the National Forestry Administration (COHDEFOR). Investors in land should be aware that even clear title is not a guarantee that a future dispute over land would be resolved equitably.

TRAVEL

Consular Information Sheet

May 19, 2008

Country Description: Honduras is a democracy with a developing economy. The national language is Spanish, although English is often spoken in the Bay Islands. The climate is generally pleasant and temperate, with dry and wet seasons. During the dry season from February into May, widespread forest fires and agricultural burning can lead to severely degraded air quality throughout the country leading to respiratory problems and airport closures. The terrain includes mountainous areas, coastal beaches and jungle lowlands. Facilities that would normally be used by tourists, including hotels and restaurants are generally adequate in the capital city of Tegucigalpa, San Pedro Sula, Tela, La Ceiba, the Bay Islands and near the Copan ruins. Large sections of the country, however, lack basic public services or even a governmental presence. Currency exchange is readily available at banks and hotels in the major cities.

Entry Requirements: A U.S. passport valid for at least three months from the date of entry is required to enter Honduras. Though not required by law, some travelers have reported difficulty departing Honduras using a passport with less than three months

of validity beyond the date of departure. A visa is not required, but tourists must provide evidence of return or onward travel. Parents should not rely on birth certificates for their children's travel; rather, prior to travel they should obtain U.S. passports for infants and minors born in the United States. U.S. citizens are encouraged to carry a photocopy of their U.S. passports with them at all times, so that if questioned by local officials proof of identity and U.S. citizenship are readily available.

In June 2006, Honduras entered a "Central America-4 (CA-4) Border Control Agreement" with Guatemala, El Salvador, and Nicaragua. Under the terms of the agreement, citizens of the four countries may travel freely across land borders from one of the countries to any of the others without completing entry and exit formalities at Immigration checkpoints. U.S. citizens and other eligible foreign nationals who legally enter any of the four countries may similarly travel among the four without obtaining additional visas or tourist entry permits for the other three countries. Immigration officials at the first port of entry determine the length of stay, up to a maximum period of 90 days. Foreign tourists who wish to remain in the four country region beyond the period initially granted for their visit are required to request a one-time extension of stay from local immigration authorities in the country where the traveler is physically present, or travel outside the CA-4 countries and reapply for admission to the region. Foreigners "expelled" from any of the four countries are excluded from the entire "CA-4" region. In isolated cases, the lack of clarity in the implementing details of the CA-4 Border Control Agreement has caused temporary inconvenience to some travelers and has resulted in others being fined more than one hundred dollars or detained in custody for 72 hours or longer.

Dual Nationality: Honduran law permits dual nationality only for minors under the age of 21 and those Honduran-born citizens who have become naturalized citizens of other countries. U.S. citizens who become Honduran citizens by naturalization are not considered to have dual nationality under Honduran law. However, becoming a Honduran citizen will not cause U.S. Citizens to lose their U.S. citizenship and all the accompanying rights and privileges. Dual nationals, in addition to being subject to all Honduran laws affecting U.S. citizens, may be subject to other laws that impose special obligations on Honduran citizens. For more information, please contact Honduran Immigration in Tegucigalpa (telephone 504-238-5613), San Pedro Sula (telephone 504-550-3728), Roatan (telephone 504-445-1226), La Ceiba (telephone 504-442-0638), or Puerto Cortes (telephone 504-665-0582).

Safety and Security: Political demonstrations sometimes disrupt traffic, but they are generally announced in advance and are usually peaceful. Travelers should avoid areas where demonstrations are taking place, and they should stay informed by following the local news and consulting hotel personnel and tour guides. Demonstrators frequently block public roads to press for concessions from the Government of Honduras. These demonstrations may last several hours and the Government rarely seeks to disperse the demonstrators. U.S. citizens should never try to pass such roadblocks. While the Honduran side of the Honduras-Nicaragua border has been largely cleared of land mines, travelers should exercise caution there. For more information, we strongly encourage travelers to visit the U.S. Embassy's web site at http://honduras.usembassy.gov. For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime is endemic in Honduras and requires a high degree of caution by U.S. visitors and residents alike. U.S. citizens have been the victims of a wide range of crimes, including murder, kidnapping, rape, assault, and property crimes. Sixty-two U.S. citizens have been murdered in Honduras since 1995; only twenty cases have been resolved. Four U.S citizens were murdered in Honduras in 2007, six in 2006, and ten in 2005. Kidnappings of U.S. citizens have occurred in Honduras, including two incidents in 2007. Poverty, gangs, and low apprehension and conviction rates of criminals contribute to a critical crime rate, including horrific acts of mass murder. With a total of 3,855 murders in 2007, and a population of approximately 7.3 million people, Honduras has one of the world's highest per capita murder rates.

U.S. citizens are encouraged to follow local news reports and seek additional information in the resources listed above. Criminals and pickpockets also target visitors as they enter and depart airports and hotels, so visitors should consider carrying their passports and valuables in a concealed pouch. Two-man teams on medium-size motorcycles often target pedestrians for robbery. There have also been reports of armed robbers traveling in private cars targeting pedestrians on isolated streets. The Honduran government conducts occasional joint police /military patrols in major cities in an effort to reduce crime. Problems with the judicial process include corruption and an acute shortage of trained personnel, equipment, staff, and financial resources. The Honduran law enforcement authorities' ability to prevent, respond to, and investigate criminal incidents and prosecute criminals remains limited. Honduran police generally do not speak English. The government has established a special tourist police in the resort town of Tela and other popular tourist destinations, including Tegucigalpa, San Pedro Sula, La Ceiba, and Roatan, but the number deployed is small and coverage is limited. The San Pedro Sula area has seen occasional armed robberies against tourist vans, minibuses, and cars traveling from the airport to area hotels, even sometimes targeting the road to Copan. Armed men have forced vehicles transporting tourists off the road and

robbed the victims, occasionally assaulting the driver or passengers. In past years, several U.S. citizens have been murdered in San Pedro Sula and La Ceiba shortly after arriving in the country. Assaults in these areas may be based on tips from sources at airport arrival areas, so visitors are strongly urged to exercise caution in discussing travel plans in public.

Copan, Roatan/Bay Islands, and other tourist destinations have a lower crime rate than other parts of the country, but thefts, break-ins, assaults, and murders do occur. Exercise particular caution walking on isolated beaches, especially at night. Coxen Hole on the island of Roatan should be avoided after dark.

The Government of Honduras has a very limited presence in Northern Olancho, Colon and Gracias a Dios Departments, which are well known for lumber and narcotics smuggling and violence. Travelers in those areas should use extra caution. See the description of highways/areas to be avoided in the Traffic Safety and Road Conditions section below for details.

Incidents of crime along roads in Honduras are common, including carjacking and kidnapping. There have been frequent incidents of highway robbery on a number of roads including Limones to La Union, Olancho (route 41) via Salama and northward to Esquipulas Del Norte. For more information, please see the section below on Traffic Safety and Road Conditions.

Travelers should always drive with their doors locked and windows rolled up to avoid potential robberies at traffic lights and other places, such as congested downtown streets. Avoid driving at night. All bus travel should be during daylight hours and on first-class conveyances, not on economy buses. Please choose taxis carefully, and note the driver's name and license number. Instruct the driver not to pick up other passengers, agree on the fare before you depart, and have small bills available for payment, as taxi drivers often do not make change. Do not resist a robbery attempt. Most criminals have weapons, and most injuries and deaths have resulted when victims have resisted. In 2004, an American citizen was murdered while attempting to flee an armed robbery in progress and another American was shot while resisting a carjacking. Two American citizens were murdered while resisting armed robberies in 2005.

Do not hitchhike or go home with strangers, particularly from nightspots. Whenever possible, travel in groups of two or more persons. Use the same common sense while traveling in Honduras that you would in any high crime area in the United States: do not wear excessive jewelry; do not carry large sums of money, or display cash, ATM/credit cards, or other valuables you do not need.

Avoid walking at night in most areas of Honduras. Do not hike alone in backcountry areas, or walk alone on beaches, historic ruins, or trails.

Individuals and groups should register their travel plans with the State Department via the Internet at the Department's secure travel registration web site, https://travelregistration.state.gov. Travelers may also register by sending passport, date of birth, and emergency contact information to the American Citizens Services Unit of the U.S. Embassy in Tegucigalpa via fax at 011-504-238-4357, or e-mail at usahonduras@state.gov prior to travel. Individuals as well as groups should always keep in their possession a photocopy of their U.S. passport data page, carry an additional copy in their suitcase, and leave a copy at home with a friend or family member.

Information for Victims of Crime: If you are the victim of a crime while in Honduras, contact local authorities immediately, either directly or through thenational police emergency number: *199. In addition to reporting to the local police, please contact the U.S. Embassy in Tegucigalpa or the Consular Agency in San Pedro Sula for assistance. The theft of a U.S. passport should be reported immediately.The Embassy and Consular Agency staff can provide you with information about medical care, contacting family members or friends and explaining how funds could be transferred. Although the investigation and prosecution of most crimes is solely the responsibility of local authorities, Consular staff can provide you with a list of attorneys if needed.

Medical Facilities and Health Information: Medical care in Honduras varies greatly in quality and availability. Outside Tegucigalpa and San Pedro Sula, medical care is inadequate to address complex situations. Support staff facilities and necessary equipment and supplies are not up to U.S. standards anywhere in Honduras. Facilities for advanced surgical procedures are not available. Wide areas of the country, including the popular tourist areas of the Bay Islands, do not have a general surgery hospital. Ambulance services are limited in major cities and almost non-existent elsewhere. Emergency services may be contacted directly through their local numbers.

Scuba diving is popular in the Bay Islands, but the limited medical facilities there pose a special risk in the event of an emergency. There is a decompression chamber on Roatan and Utila for divers, but no advanced medical care on either island for diving related accidents.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. U.S. medical insurance plans seldom cover health costs incurred outside the U.S. unless supplemental coverage is purchased. Furthermore, U.S. Medicare and Medicaid programs do not provide payment for medical services outside the U.S. However, many travel agents and private companies offer insurance plans that will cover health care expenses incurred overseas including emergency services such as medical evacuations. It is important to ensure that you have adequate medical evac-

uation coverage prior to your trip to Honduras. When making a decision regarding health insurance, Americans should consider that many foreign doctors and hospitals require payment in cash prior to providing service and that a medical evacuation to the U.S. may cost tens of thousands of dollars. Uninsured travelers who require medical care overseas often face extreme difficulties. When consulting with your insurer prior to your trip, ascertain whether payment will be made to the overseas healthcare provider or whether you will be reimbursed later for expenses you incur. Some insurance policies also include coverage for psychiatric treatment and for disposition of remains in the event of death.

Useful information on medical emergencies abroad, including overseas insurance programs, is provided in the Department of State's Bureau of Consular Affairs brochure, Medical Information for Americans Traveling Abroad, available via the Bureau of Consular Affairs home page.

Other Health Information: Mosquito-borne illnesses are an ongoing problem in Honduras. All persons traveling in Honduras, even for a brief visit, are at risk of contracting malaria. Take a prophylactic regimen best suited to your health profile. The country regularly suffers from outbreaks of dengue fever. Unlike traditional mosquito-borne illnesses, there is no medicinal prophylactic or curative regimen for dengue fever. Travelers should take precautions against being bitten by mosquitoes to reduce the chance of contracting such illnesses, such as avoiding standing water even in the home, wearing long sleeves and pants in both day and night, and applying insect repellent regularly.

Severe air pollution, which can aggravate or lead to respiratory problems, is common throughout the country during the dry season due in large part to widespread forest fires and agricultural burning. Travelers with respiratory or cardiac conditions and those who are elderly or extremely young are at greatest risk for complications from air pollution, which may include coughing, difficulty breathing, wheezing, or chest pain. Acute respiratory infections are also widespread; more than 100,000 cases are reported annually.

Individuals traveling to Honduras should ensure that all their routine vaccinations are up to date. Vaccination against Hepatitis A, Hepatitis B, and Typhoid is strongly recommended for those traveling to Honduras from the United States. Honduras requires vaccination against Yellow Fever for those traveling to Honduras from countries where there is the risk of transmission. Travelers taking prescription medications should bring an adequate supply with them when coming to Honduras and ensure that they are properly labeled.

Honduras also has the highest adult HIV/AIDS prevalence rate in the region. Over 63,000 people in Honduras have HIV/AIDS.

Honduras lacks a substantial infrastructure for maintaining water purity. Travelers are strongly encouraged to avoid drinking tap water or a beverage that contains ice from an unknown source (even alcoholic drinks). Bottles and bags of purified water are widely available. It is also recommended that individuals traveling to Honduras avoid eating untreated raw vegetables, fruits that can't be peeled on the spot, raw fish like ceviche and undercooked shellfish and products containing mayonnaise, pastry icing, and unpasteurized dairy products. Hot cooked food, fresh bread, dry foods such as crackers, bottled carbonated beverages, coffee, tea, and beer are usually safe, provided such food items are not purchased from street vendors. All fruits and vegetables should be washed thoroughly with detergent and running water. Those that will be cooked or peeled can then be stored in a sealed container until used. Those that will be eaten raw and will not be peeled should be soaked for 15 minutes in a solution of chlorine bleach (or 5% household bleach) in water (one tablespoon of Clorox per gallon of water), rinsed with potable water, and allowed to air dry.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747); fax 1-888-CDC-FAXX (1-888-232-3299), or via the CDC's Internet site at http://wwwn.cdc.gov/travel.

For information about outbreaks of infectious diseases abroad consult the World Health Organization's web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Honduras is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Because of crime and poor road conditions, driving can be very dangerous, and travelers should carry a cellular phone in case of an emergency. Travelers should exercise extreme caution while driving on isolated stretches of road and passing on mountainous curves. Rockslides are common, especially in the rainy season (May through December). Traffic signs, even on major highways, are often inadequate, and streets in the major cities are often unmarked. Travelers should always drive with their doors locked and windows rolled up to avoid potential robberies at traffic lights and other places such as congested downtown streets. Please refer to our Road Safety page for more information.

Honduran roads are poorly lit and marked. Vehicles are often driven at night without adequate illumination, and animals and people wander onto the roads at all hours. For these reasons, and because of the high incidence of crime, the U.S. Embassy strongly discourages car and bus travel after dark.

Major cities are connected by an inconsistently maintained, two-lane system of paved roads. Many secondary roads in Honduras are unpaved. During the rainy season, even major highways are often closed due to rockslides and flooding from heavy rains. In the event of an accident, contact the Honduran Transit Authority ("Transito") immediately. They may be contacted either directly through their local numbers, or through their national emergency number, *189. Honduran law requires that no vehicles involved in an accident be moved until Transit Agents arrive, not even to clear a traffic obstruction, unless you are in serious physical danger.

Some of the most dangerous stretches for road travel include: Tegucigalpa to Choluteca, because of dangerous mountain curves; El Progreso to La Ceiba, because of animal crossings and the poor condition of bridges from flooding; Route 39 through northern Olancho Department between Gualaco and San Esteban; and Limones to La Union, Olancho (route 41) via Salama and northward to Saba. Locals also refer to this latter stretch of road as the "Corridor of Death" because of frequent incidents of highway robbery. In March of 2008, 27 persons died when a bus overturned and rolled down a ravine in La Esperanza, Intibuca, on another infamous stretch of road called "Flight of the Angel."

The Embassy has received reports of robberies on the road from Tegucigalpa to Danlí. The only recommended route to the north coast from the south is CA-5 to route 21 to CA-13 via Tela to La Ceiba and Trujillo. Hijackings of private and commercial vehicles from the United States to Honduras have occurred. While Honduras and the United States have signed and ratified a Stolen Vehicle Treaty, existing Honduran laws protect good faith buyers (even of stolen vehicles) so the recovery and return of these vehicles to their original owners is not guaranteed. Vehicle insurance may mitigate loss; please check with the National Insurance Crime Bureau at https://www.nicb.org, private insurance carriers, and our Embassy web site information on Commercial Vehicle Hijackings at http://honduras.usembassy.gov for more information. For specific information concerning Honduran driving permits, vehicle inspection, road tax, and mandatory insurance, please contact the Honduran National Tourist Organization offices in New York via the Internet at http://www.hondurastips.honduras.com.

Marine Safety and Oversight: The areas off both coasts of Honduras are the subject of maritime border disputes between Honduras and its neighbors. The Honduran Navy patrols these areas, and all private vessels transiting Honduran territorial waters should be prepared to be hailed and possibly boarded by Honduran military personnel to verify documentation. While the Honduran Navy previously used private vessels as patrol vessels, this is no longer the case. In the event that any vessel is hailed in Honduran waters in the Caribbean by a non-military vessel or any suspicious vessel and directed to prepare for boarding, the vessel should immediately contact the U.S. Coast Guard Operations Center by radio or INMARSAT at 305-415-6800. Anyone needing more information can also contact the U.S. Embassy during working hours and request to speak with the U.S. Military Group (USMILGP) office. There have been incidents of armed assaults against private sailing vessels by criminals posing as fishermen off the northeast coast of Honduras, particularly in the numerous small islands northeast of the Department of Gracias a Dios. Sailors should contact the Coast Guard and yacht facility managers in their areas of travel for current information.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Honduras' Civil Aviation Authority as not being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Honduras' air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov. Severe air pollution often leads to the closing of some or all of Honduras's four international airports during the dry season. Some travelers have been compelled to travel by bus to neighboring countries in order to catch onward flights.

For further information, travelers may contact the Department of Transportation within the United States at tel. 1-800-322-7873, or visit the FAA's Internet web site at: www.faa.gov/avr/iasa.

Real Estate Investment: U.S. citizens should exercise extreme caution before entering into any form of commitment to invest in real property, particularly in coastal areas and the Bay Islands. Honduran laws and practices regarding real estate differ substantially from those in the United States, and fraudulent deeds and titles are common; U.S. citizens considering investing or buying real estate in Honduras should be aware that rights to such property do not enjoy the same level of protection as in the United States. There is no title insurance in Honduras, and approximately 80 percent of privately held land is untitled. In addition, there are complaints that the Honduran judicial system often prolongs disputed cases for many years before resolution. Americans have spent thousands of dollars in legal fees and years of frustration trying to resolve property disputes, even in cases in which local attorneys and Honduran and U.S. real estate agents had given assurances to the investor. Violence has been used against Americans involved in disputed property cases. Potential investors should engage competent local legal representation before making any commitments. Investors should thoroughly check references of attorneys and real estate agents.

Honduran law places certain restrictions on land ownership by foreigners in coastal and border areas. Squatters claim a number of properties owned by U.S. citizens. U.S. Government officials may not act as agents, attorneys, or in a fiduciary capacity. U.S. citizens who own property abroad and who thereby have assumed responsibilities concurrent

with ownership of property in a foreign country should take steps on their own initiative to safeguard their interests and to employ private legal counsel when the need arises. For further information on investing in property in Honduras, please review the State Department's Investment Climate Statement, part of the Country Commercial Guide at http://www.buyusa.gov/honduras/en/14.html. For information on contracting Honduran legal representation, please check with other investors. You may also refer to the list of attorneys available on the Embassy's home page at http://honduras.usembassy.gov/attorneylistjul07.pdf.

Financial Market Investment: Due to poor regulation and lack of guarantees, investment in the Honduran "Bolsa de Valores," or securities market, as well as banking institution bonds, "fideicomisos" (trusts), and certificates of deposit from uninsured financial institutions pose high risk to investors. Extreme caution should be exercised before and while undertaking such activities, as American citizens have lost large sums of money through investments in such precarious markets. For further information on investing in Honduras, please review the State Department's Investment Climate Statement, part of the Country Commercial Guide at http://www.buyusa.gov/honduras/en/14.html.

Corruption: Many U.S. firms and citizens operating in Honduras have found corruption to be a serious problem and a constraint to successful investment. While some U.S. firms have satisfactorily resolved cases through the courts, the majority have difficulty navigating the legal system. There are complaints that the Honduran judicial system caters to favoritism, external pressure and bribes. Corruption appears to be most pervasive in government procurement, government permits, and in the buying and selling of real estate (land titling).

Customs Regulations: U.S. citizens who intend to stay in Honduras for an extended period of time and who bring vehicles or household goods into the country should consult Honduran customs officials prior to shipment. With the exception of "antique" cars, all vehicles imported into Honduras by foreigners must be less than ten (10) years old. For specific information regarding customs requirements, please contact the Embassy of Honduras in Washington, DC at: http://www.hondurasemb.org for more information.

Honduran customs authorities may enforce strict regulations concerning temporary import and export of items such as antiquities, medications, and business equipment. For example, Honduran law prohibits the export of antiques and artifacts from pre-colonial civilizations. To protect the country's biodiversity, it is illegal to export certain birds, feathers, and other flora and fauna. For specific information regarding exportation requirements, please contact the Embassy of Honduras in Washington, DC at http://www.hondurasemb.org.

The Government of Honduras is strictly enforcing the law that requires a Honduran permit for the importation of firearms into Honduras. Travelers must obtain a firearm importation permit from a Honduran Embassy, Consulate General or Consulate located in the U.S. prior to bringing firearms into the country.

Please note that a U.S. government-issued or airline-issued permit is not valid for importation of firearms into Honduras. Firearms that arrive without the requisite Honduran permit will be confiscated and the bearer will be prosecuted to the full extent of Honduran law.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the U.S. and may not afford the protections available under U.S. law. Penalties for breaking the law can be more severe than in the U.S. for similar offenses. Persons violating Honduran laws, even unknowingly, may be fined, expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Honduras are severe, and convicted offenders can expect long jail sentences and heavy fines. Assisting or participating in the distribution of illegal drugs is also a crime prosecutable in the U.S., and may lead to fines, property seizure, or imprisonment.

Anyone offering you illegal drugs should be considered extremely dangerous—there is no "safe" source of illegal drugs. "Sexual tourists" travel alone or in groups to Honduras for the purpose of purchasing sexual favors from minors. This activity violates Honduran law, and American citizens are imprisoned in Honduras for sexual offenses involving minors. In addition, U.S. citizens and residents charged with these crimes are subject to prosecution upon their return to the U.S., regardless of the outcome of the judicial proceedings overseas.

Moreover, the prevalence of HIV/AIDS in sex workers in Honduras is estimated to be in excess of 10%.Using or disseminating child pornography in a foreign country is also a crime prosecutable in the United States.

Children's Issues: International adoptions from Honduras are very complex. Current information on Honduran adoption procedures and the immigrant visa application process is available from the Consular Section of the U.S. Embassy.

Prospective adoptive parents are urged to check with the Consular Section to ensure that all required documentation has been approved by the U.S. Bureau of Citizenship and Immigration Services of the Department of Homeland Security and to confirm that their child's adoption is complete before traveling to Honduras to apply for their child's immigrant visa. Adoptive parents are also urged to carry with them complete adoption paperwork when traveling with their adopted child to, from, and within Honduras. Honduras is a signatory to the Hague Convention on the Civil Aspects of International Child Abduction, but the U.S. Department of State has determined that Honduras has failed to comply with its obli-

gations under the Convention. No child has ever been returned to the United States from Honduras under the provisions of the Convention.

Registration and Embassy Locations: Americans living or traveling in Honduras are encouraged to register their presence through the State Department's travel registration web site, and to obtain updated information on travel and security within Honduras. Americans without Internet access may register directly with the U.S. Embassy in Tegucigalpa. By registering, whether via the Internet or in person at the Embassy, American citizens make it easier for the Embassy to contact them in case of emergency.

U.S. Embassy and Consulate location:
Avenida La Paz in Tegucigalpa, Honduras
Internet site:
http://honduras.usembassy.gov
Telephone: 011-504-236-9320 or 011-504-238-5114

For information on services for U.S. citizens, please ask for ext. 4400.
American Citizens Services Unit Fax: 011-504-238-4357

Consular Agency in San Pedro Sula location:
Banco Atlantida Building—11th Floor
San Pedro Sula, Honduras
Telephone: 011-504-558-1580

For more details about all U.S. Embassy and consular services in Honduras, please see the Embassy web site at http://honduras.usembassy.gov or visit the Bureau of Consular Affairs web site at http://travel. state.gov.

Intercountry Adoption

January 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: The adoption process in Honduras is currently in flux. Policies regarding eligibility requirements for adoptive parents, residency requirements, and time frame are under review by the Honduran Family Court (IHNFA).

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: Instituto Hondureño de la Niñez y la Familia (IHNFA) for children under 14 years old. Honduran Family Court for children 14 and older.

Instituto Hondureño de la Niñez y la Familia (IHNFA)
Honduras, Centro America
Tegucigalpa, Col. Humuya,
Calle la salud,
Apartado Postal 3234
Phone: (504) 23.57.754
Website: http://www.ihnfa.hn/

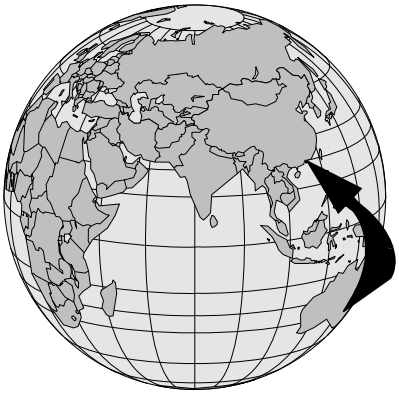
Adoption Agencies and Attorneys: All adoption agencies must be accredited. IHNFA has the information about registration and accreditation to operate. The U.S. Embassy in Tegucigalpa maintains a listing of attorneys in Honduras on their website at: http://honduras.usembassy.gov.

Adoption Fees: Between U.S. $3,000 and U.S. $10,000 for attorney fees.

Adoption Procedures: If a child is under 14 years old, a petition (available at the IHNFA) must be submitted with the IHNFA. If a child is 14—18 years old, a petition may be submitted to the Honduran Family Court by an attorney.

Required Documents: These are currently under review by IHNFA. Please contact IHNFA for more specific information.

Embassy of Honduras
3007 Tilden Street N.W.
Washington, D.C. 20008
Telephone: (202) 966-7702.
E-mail: embassy@hondurasemb.org
Website:
http://www.hondurasemb.org



Honduran Consulates are located in Atlanta, Boston, Chicago, Houston, Jacksonville, Los Angeles, Miami, New Orleans, New York, Phoenix, San Francisco, San Juan, and Tampa.

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy
Avenida La Paz
Tegucigalpa, Honduras.

Americans may contact the American Citizen Services Unit of the Consular Section at: Telephone: (504) 238-5114 ext. 4400; Website: http://honduras.usembassy.gov.

Additional Information: Specific questions about adoption in Honduras may be addressed to the U.S. Embassy in Tegucigalpa. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

HONG KONG

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Hong Kong Special Administrative Region

PROFILE

Geography

Area: 1,104 sq. km.; Hong Kong comprises Hong Kong Island, Kowloon, the New Territories, and numerous small islands.

Terrain: Hilly to mountainous, with steep slopes and natural harbor.

Climate: Tropical monsoon. Cool and humid in winter, hot and rainy from spring through summer, warm and sunny in fall.

People

Population: (end-2007) 6.96 million.

Population growth rate: (2007) 0.8%.

Ethnic groups: Chinese 95%; other 5%.

Religions: About 43% participate in some form of religious practice. Christian, about 9.6%.

Languages: Cantonese (a dialect of Chinese) and English are official.

Education: Literacy—97.1% (98.7% male, 95.4% female).

Health: (2007) Infant mortality rate—1.7/1,000. Life expectancy—82.4 yrs. (overall); 79.3 yrs. males, 85.4 yrs. females.

Work force: (2008) 3.66 million. Wholesale, retail, and import/export trades and restaurants and hotels—29.0%; finance, insurance, real estate, and business services—14.3%; manufacturing—4.2%

Government

Type: Special Administrative Region (SAR) of China, with its own constitution (the Basic Law).

Government branches: Executive—Administration: Chief Executive selected in March 2007; Executive Council, serving in an advisory role for the Chief Executive. Legislative—Legislative Council elected in September 2004. Judicial—Court of Final Appeal is highest court, other lower courts.

Political subdivisions: Hong Kong, Kowloon, New Territories.

Suffrage: Permanent residents, at 18 years or over, living in Hong Kong for the past 7 years are eligible to vote.

Economy (2007)

GDP: (2007) $207.2 billion.

GDP real growth rate: (2007) 6.4%.

Per capita GDP: (2007) $29,900.

Natural resources: Outstanding deepwater harbor.

Industry: Types—textiles, clothing, electronics, plastics, toys, watches, clocks.

Trade: Exports—$344.6 billion: clothing, electronics, textiles, watches and clocks, office machinery. Imports—$367.7 billion: consumer goods, raw materials and semi-manufactures, capital goods, foodstuffs, fuels.

PEOPLE

Hong Kong's population has increased steadily over the past decade, reaching 6.96 million in 2007. Hong Kong is one of the most densely populated areas in the world, with an overall density of some 6,303 people per square kilometer. Cantonese, the official Chinese language in Hong Kong, is spoken by most of the population. English, also an official language, is widely understood, being spoken by more than one-third of the population. Every major religion is practiced freely in Hong Kong. All children are required by law to be in full-time education between the ages of 6 and 15. Preschool education for most children begins at age 3. Primary school begins normally at the age of 6 and lasts for 6 years. At about age 12, children progress to a 3-year course of junior secondary education. Most stay on for a 2-year senior secondary course, while others join full-time vocational training. More than 90% of children complete upper secondary education or equivalent vocational education.

HISTORY

According to archaeological studies initiated in the 1920s, human activity on Hong Kong dates back over five millennia. Excavated neolithic artifacts suggest an influence from northern Chinese stone-age cultures. The territory was settled by Han Chinese during the seventh century, A.D., evidenced by the discovery of an ancient tomb at Lei Cheung Uk in Kowloon. The first major migration from northern China to Hong Kong occurred during the Sung Dynasty (960-1279). The British East India Company made the first successful sea venture to China in 1699, and Hong Kong's trade with British merchants developed rapidly soon after. After the Chinese defeat in the First Opium War (1839-42), Hong Kong was ceded to Britain in 1842 under the Treaty of Nanking. Britain was granted a perpetual lease on the Kowloon Peninsula under the 1860 Convention of Beijing, which formally ended hostilities in the Second Opium War (1856-58). The United Kingdom, concerned that Hong Kong could not be defended unless surrounding areas also were under British control, executed a 99-year lease of the New Territories in 1898, significantly expanding the size of the Hong Kong colony.

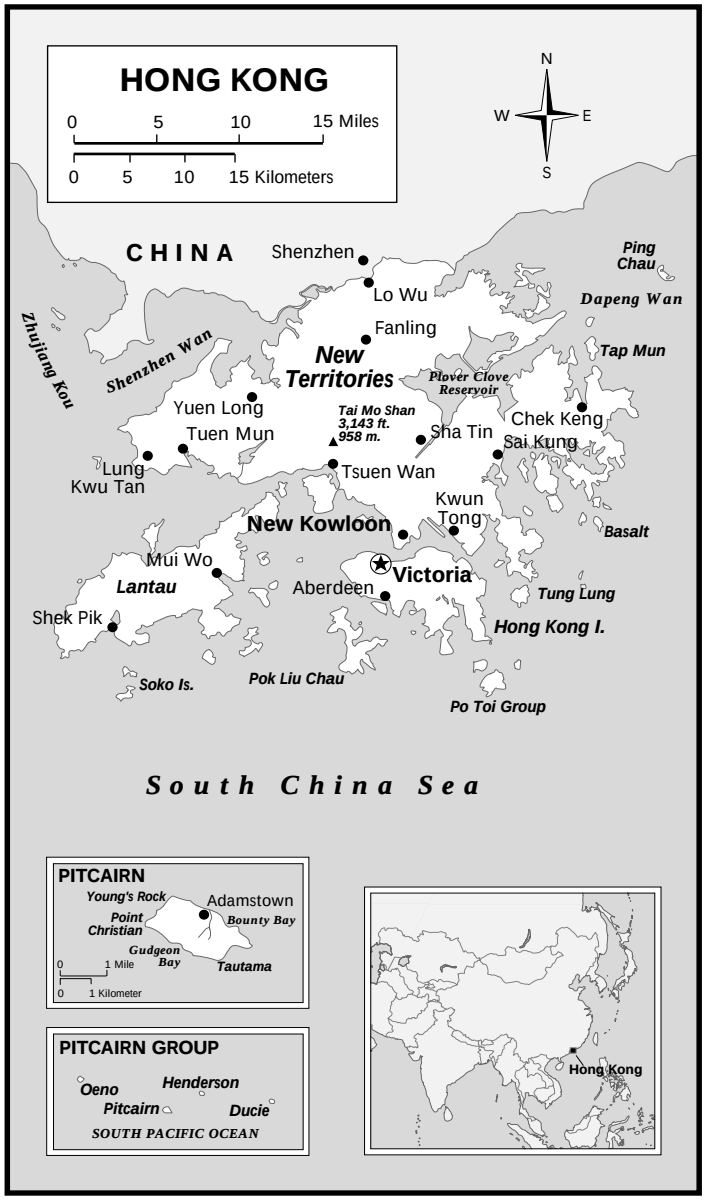
In the late 19th century and early 20th centuries, Hong Kong developed as a warehousing and distribution center for U.K. trade with southern China. After the end of World War II and the communist takeover of Mainland China in 1949, hundreds of thousands of people fled from China to Hong Kong. Hong Kong became an economic success and a manufacturing, commercial, finance, and tourism center. High life expectancy, literacy, per capita income, and other socioeconomic measures attest to Hong Kong's achievements over the last five decades.

On July 1, 1997, China resumed the exercise of sovereignty over Hong Kong, ending more than 150 years of British colonial rule. Hong Kong is a Special Administrative Region of the People's Republic of China with a degree of autonomy in all matters except foreign and defense affairs. According to the Sino-British Joint Declaration (1984) and the Basic Law, Hong Kong will retain its political, economic, and judicial systems and unique way of life for 50 years after reversion and will continue to participate in international agreements and organizations under the name, "Hong Kong, China."

GOVERNMENT AND POLITICAL CONDITIONS

The Hong Kong Special Administrative Region (SAR) is headed by Chief Executive Donald Tsang, who first took office in 2005 and whose current term ends in 2012. The Election Committee that votes on the Chief Executive is made up of approximately 800 Hong Kong residents from four constituency groups: commercial, industrial, and financial interests; professionals; labor, social services, and religious interests; and the legislature, the Chinese People's Political Consultative Conference, and the P.R.C. National People's Congress.

In December 2006, supporters of pro-democracy Civic Party legislator Alan Leong won 134 seats in the Election Committee, enabling Leong to challenge incumbent Chief Executive Tsang's bid for a new five-year term in 2007. Tsang, with solid support from the pro-government and pro-business sectors, won the March 25, 2007 Election Committee vote with 649 of the 795 votes. Leong garnered 123 votes.



In July 2002, the Hong Kong Government implemented the Principal Officials Accountability System, which was designed to make the government more responsive to public concerns. Eleven political appointees, directly responsible to the Chief Executive, were added to run the 11 policy bureaus. Three other senior civil service positions—the Chief Secretary, Financial Secretary, and Justice Secretary—also were converted to political appointments. This system was expanded in 2008 to include one Under Secretary and one Political Assistant position being filled by appointment in each bureau.

While Hong Kong remains a free and open society where human rights are respected, courts are independent, and there is well-established respect for the rule of law, residents are limited in their ability to change their government, and the legislature is limited in its power to affect government policies. The September 12, 2004 Legislative Council elections were seen as generally free, open, and widely contested, although Hong Kong groups have alleged voter intimidation, manipulation, or pressure in connection with them.

In December 2005 the Legco rejected a Hong Kong Government-proposed package of incremental reforms to the mechanisms for choosing the CE in 2007 and forming the Legco in 2008. In July 2007, the Hong Kong Government's Commission on Strategic Development issued a Green Paper on Constitutional Development, which set out a myriad of options to reform the CE and Legco electoral mechanisms, with the "ultimate aim" of universal suffrage as prescribed by the Basic Law.

On December 12, 2007, Chief Executive Donald Tsang submitted a report on the Green Paper to the central government. The report said more than half of local people wanted universal suffrage by 2012, but 2017 might be a more realistic date.

In December 2007, the P.R.C. National People's Congress Standing Committee (NPCSC) issued a decision on Hong Kong's constitutional development which, while ruling out universal suffrage in 2012, appears to open the way for Hong Kong to achieve full universal suffrage for the CE in 2017, and full universal suffrage for Legco sometime thereafter. Any amendments to the Basic Law will require approval by the CE, at least two-thirds of Legco, and then the NPCSC.

Principal Government Officials

Last Updated: 11/12/2008

Chief Executive: **Donald TSANG Yam-kuen**
Chief Secretary for Admin.: **Henry TANG Ying-yen**
Sec. for Civil Service: **Denise YUE Chong-yee**
Sec. for Commerce & Economic Development: **Rita LAU Ng Wai-lan**
Sec. for Constitutional Affairs: **Stephen LAM Sui-lung**
Sec. for Development: **Carrie LAM Cheng Yuet-ngor**
Sec. for Education: **Michael SUEN Ming-yueng**
Sec. for Environment: **Edward YAU Tang-wah**
Sec. for Finance: **John TSANG Chun-wah**
Sec. for Financial Services & Treasury: **K. C. CHAN Ka-keung**
Sec. for Food & Health: **York CHOW, Dr.**
Sec. for Home Affairs: **TSANG Tak-sing**
Sec. for Justice: **WONG Yan Lung**
Sec. for Labor & Welfare: **Matthew CHEUNG Kin-chung**
Sec. for Security: **Ambrose LEE Siu-kwong**
Sec. for Transport & Housing: **Eva CHENG**
Chief Executive, Hong Kong Monetary Authority: **Joseph YAM**
Chief Justice: **Andrew LI Kwok-nang**
Pres., Legislative Council: **Rita FAN Hsu Lai-tai**
Commissioner of Police: **TANG King-shing**
Commissioner, Independent Commission Against Corruption: **Timothy TONG Hin-ming**
Director of Audit: **Benjamin TANG Macau**
(Special Admin. Region of the People's Republic of China)
Chief Executive: **Edmund HO Hau-wah**
Sec. for Admin. & Justice: **Florinda Da Rosa Silva CHAN**
Sec. for Economics & Finance: **Francis TAM Pak-yuen**
Sec. for Security: **CHEONG Kuoc Va**
Sec. for Social Affairs & Culture: **Fernando CHUI Sai-on**
Sec. for Transportation & Public Works: **AO Man Long**
Procurator Gen.: **HO Chio Meng**
Pres., Court of Final Appeal: **SAM Hou Fai**
Pres., Legislative Council: **Susana CHOU**
Commissioner, Audit: **Fatima Mei-lei CHOI**
Commissioner, Independent Commission Against Corruption: **CHEONG U**

ECONOMY

Hong Kong is one of the world's most open and dynamic economies. Hong Kong per capita GDP is comparable to other developed countries. Real GDP expanded by 6.4% in 2007 year-on-year, driven by thriving exports, vibrant inbound tourism and strong consumer spending. Severe acute respiratory syndrome (SARS) caused the Hong Kong economy to shrink during the first half of 2003, and property prices had fallen 66% from their late 1997 peak, but have since more than doubled from that lower base. The unemployment rate declined to 3.3% in April-June 2008, the lowest level since mid-1998. The surplus for fiscal year 2007-08 was $15.9 billion or 7.6% of GDP, attributed to the robust economy, increased corporate profits and salaries, the buoyant stock market, and a stable property market.

Hong Kong enjoys a number of economic strengths, including a sound banking system, virtually no public debt, a strong legal system, ample foreign exchange reserves and an able and rigorously enforced anti-corruption regime. Hong Kong's liberal

economic system enables it to respond quickly to changing circumstances. It continues to take measures designed to improve its attractiveness as a commercial and trading center, especially after China's entry into the World Trade Organization (WTO), and is continually refining its financial architecture. The government is deepening its economic interaction with the Pearl River Delta in an effort to maintain Hong Kong's position as a gateway to China. These efforts include the conclusion of a free trade agreement with China, known as "the Closer Economic Partnership Arrangement" (CEPA), which applies zero tariffs to all Hong Kong-origin goods and preferential treatment in 40 service sectors. Hong Kong, along with the Macau SAR, is also participating in a new pan-Pearl River Delta trade block with nine Chinese provinces, which aims to lower trade barriers among members, standardize regulations, and improve infrastructure. U.S. companies have a generally favorable view of Hong Kong's business environment, including its legal system and the free flow of information, low taxation, and infrastructure.

The American Chamber of Commerce's annual business confidence survey, released in December 2007, showed 99% of respondents had a "good" or "satisfactory" outlook for 2008. Survey results indicated a positive economic outlook through 2010.

FOREIGN RELATIONS

Hong Kong's foreign relations and defense are the responsibility of China. Hong Kong is an independent customs territory and economic entity separate from the rest of China and is able to enter into international agreements on its own behalf in commercial and economic matters. Hong Kong, independently of China, participates as a full member of numerous international economic organizations including the World Trade Organization (WTO), the Asia Pacific Economic Cooperation forum (APEC), and the Financial Action Task Force (FATF). It is an articulate and effective champion of free markets and the reduction of trade barriers.

U.S.-HONG KONG RELATIONS

U.S. policy toward Hong Kong, grounded in a determination to promote Hong Kong's prosperity, autonomy, and way of life, is stated in the U.S.-Hong Kong Policy Act of 1992. The United States maintains substantial economic and political interests in Hong Kong. The United States supports Hong Kong's autonomy by concluding and implementing bilateral agreements; promoting trade and investment; arranging high-level visits; broadening law enforcement cooperation; bolstering educational, academic, and cultural links; and supporting the large community of U.S. citizens and visitors. Hong Kong is an active member of the global coalition against terrorism. Hong Kong has joined the Container Security Initiative and remains an important partner with regard to eliminating funding for terrorist networks and combating money laundering. Hong Kong agreed to participate in the Secure Freight Initiative in a limited capacity on a pilot basis in November 2007 and is scheduled to continue it participation through April 2009. Hong Kong has passed legislation designed to bring Hong Kong into compliance with applicable UN anti-terror resolutions and Financial Action Task Force recommendations.

The United States has substantial economic and social ties with Hong Kong. There are some 1,100 U.S. firms, including 891 regional operations (298 regional headquarters and 593 regional offices), and about 54,000 American residents in Hong Kong. According to U.S. Government statistics, U.S. exports to Hong Kong totaled $20.1 billion in 2007. U.S. direct investment in Hong Kong at the end of 2007 totaled about $47.4 billion, making the United States one of Hong Kong's largest investors, along with China, Japan, and the Netherlands. The United States and Hong Kong signed a civil aviation agreement in October 2002, which significantly liberalized the aviation market. Hong Kong enjoys a high degree of autonomy as a separate customs territory, with no changes to borders, staffing, or technology export controls since the 1997 handover. Intellectual property rights (IPR) protection is relatively strong and Hong Kong continues to take steps to improve both its legislation and its enforcement regime.

The Hong Kong Government maintains three Economic and Trade Offices in the United States. Addresses, telephone numbers, and web sites for these offices are listed below:

1520-18th Street NW
Washington, DC 20036
Tel: (202) 331-8947
Fax: (202) 331-8958
Web Site: www.hketowashington.gov.hk/dc/index.htm

115 East 54th Street
New York, NY 10022
Tel: (212) 752-3320
Fax: (212) 752-3395
Web Site: http://www.hketony.gov.hk/ny/index.htm

130 Montgomery Street
San Francisco, CA 94104
Tel: (415) 835-9300
Fax: (415) 421-0646
Web Site: http://www.hketosf.gov.hk/sf/index.htm

TRAVEL

Consular Information Sheet

August 26, 2008

Country Description: Hong Kong, a Special Administrative Region (SAR) of the People's Republic of China (PRC) since July 1, 1997, has a high degree of autonomy, except in the areas of defense and foreign policy, and retains its own currency, laws, and border controls. It is composed of three geographic areas: the New Territories, Kowloon Peninsula, and Hong Kong Island. Hong Kong SAR is cosmopolitan and highly developed. Tourist facilities and services are widely available.

Entry Requirements: A passport with a minimum of one-month validity after the period of intended stay, adequate funds to cover stay without working and evidence of onward/return transportation are required. Because many neighboring areas require six months validity remaining on the passport, U.S. citizens planning travel beyond Hong Kong should ensure that their passports are valid for at least six months from the date of their proposed entry into such areas. A visa is not required for tourist visits of up to 90 days by U.S. citizens. An extension of stay may be granted upon application to the Hong Kong SAR Immigration Department. Visas are required to work or study in Hong Kong. Visit the Hong Kong SAR Immigration Department at http://www.immd.gov.hk/ehtml/home.htm or the Embassy of the People's Republic of China web site at http://www.china-embassy.org/eng for the most current visa information. U.S. citizens should obtain all required visas prior to departing the U.S. Specifically, U.S. citizens wishing to travel to the PRC from Hong Kong require a PRC visa and should apply at the PRC Embassy or consulates in the U.S. Parents whose children hold U.S. passports should be aware that the PRC Visa Office may require certified birth certificates or other U.S. documents for these children. Persons applying in Hong Kong for PRC visas for U.S.-born children have been unable to obtain PRC visas without the certified U.S. birth certificate. Parents should consider bringing their children's certified birth certificates if applying for a PRC visa in Hong Kong.

Safety and Security: Although there have been no terrorist incidents in Hong Kong, the Department of State reminds Americans everywhere that U.S. citizens and interests are at a heightened risk of attack by terrorists. These individuals and groups have proven that they do not distinguish between official and civilian targets. Because security awareness has been elevated within the United States, terrorists may target U.S. interests overseas. Private Americans should be aware of the potential risks when making travel plans and should remain vigilant with regard to their personal security and exercise caution. The State Department will continue to develop information about potential threats.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Travel Alert, Middle East and North Africa Travel Alert, Travel Warnings and other Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Hong Kong SAR has a low crime rate. Even so, travelers should exercise caution when in congested areas and pay particular attention to personal belongings while in crowded markets and while traveling on public transportation. Violent crime, though rare, does occur. There have been cases where both local and foreign hikers have been robbed or beaten in country parks and on Victoria Peak. Although no U.S. citizens have been reported among these victims, U.S. citizens should be extremely vigilant when walking in these areas and should travel in groups.

There have been reports of robberies involving the drug rohypnol, commonly known as the "date rape drug." Most reports have involved bar staff and/or prostitutes from bars and clubs in the popular Wanchai and Tsim Sha Tsui districts. The drug is administered to unwitting victims via food or drink, who have later awoken to find all of their valuables missing. The drug causes the victim to lose consciousness, sometimes for over 24 hours, and often induces short term amnesia. Travelers are advised to avoid leaving drinks or food unattended, and should not accept food or drink from strangers or new acquaintances.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. embassy or consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. embassy or consulate for assistance. The embassy/consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Hong Kong has a crime victim compensation program available to U.S. citizens who are legal residents or tourists in Hong Kong. For more detailed information on the program and its requirements, please see the Hong Kong Social Welfare Department web page at http://www.

swd.gov.hk. The local equivalent to the "911" emergency line in Hong Kong is 999.

Medical Facilities and Health Information: Good medical facilities are available, and there are many Western-trained physicians in Hong Kong. Prescription drugs are widely available although may have different names than those in the U.S. Emergency services response time is good. Doctors and hospitals require immediate cash payment for health services and generally do not accept credit cards.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Hong Kong. The H5N1 virus ("avian flu") has been found in poultry and wild birds in Hong Kong. While rare, human infection and death from H5N1 infection have been reported. Most reported cases of human infection with H5N1 viruses have occurred after contact with H5N1-infected poultry or birds, but a small number of cases may have occurred following close and prolonged contact with another person who is visibly ill from H5N1 infection. Further information about Avian Flu is available from the Centers for Disease Control's Avian Flu Traveler Information web page at http://wwwn.cdc.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Hong Kong is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

About 90 percent of the population in Hong Kong depends on public transport. Taxis, buses, and the mass transit railway (MTR) are readily available, inexpensive, and generally safe. The MTR is an underground railway network and is the most popular mode of public transport, carrying an average of 2.3 million passengers a day.

In Hong Kong, traffic moves on the left. During the daytime, traffic congests Hong Kong's urban areas. Each year, more than 19,000 drivers, passengers, and pedestrians are injured or killed in traffic accidents in Hong Kong. Speed limits are 50 kilometers per hour in urban areas, 80 kilometers per hour on highways and 110 kilometers per hour on expressways unless otherwise marked. The use of seat belts in vehicles, if so equipped, is mandatory both in the front and back seats. The maximum penalty for dangerous driving causing death can be a fine of $50,000 HK ($6,500 US), imprisonment for five years and disqualification from driving for not less than two years on first conviction. At the scene of a traffic accident, drivers are required to undergo alcohol level testing. Any driver found exceeding the prescribed limit of blood alcohol level may face prosecution under Hong Kong law. The use of hand-held cellular phones while driving in Hong Kong is strictly prohibited. A breach of this law can lead to a maximum fine of $2,000 HK ($260 US). However, motorists can use "hands-free devices," such as headphones and speakerphones. Hong Kong law requires that all registered vehicles carry valid third-party liability insurance. A Hong Kong driver's license may be issued without a test to individuals who hold a valid U.S. driver's license, provided they have resided in the United States for not less than six months. U.S. citizen visitors who do not plan to stay in Hong Kong for more than twelve months can drive in Hong Kong on their valid U.S. driver's license. Visit the website of the Hong Kong Transport Department at www.td.gov.hk/home/index.htm for further details.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Hong Kong's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Hong Kong's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Customs Regulations: Hong Kong SAR customs authorities enforce strict regulations concerning controlled items carried while transiting Hong Kong (temporary importation or exportation) such as firearms and ammunition, counterfeit goods or illegally produced copies of copyright items, ivory, narcotics, medications, television decoders requiring a subscription, animals and plants, meat and poultry, textiles, and sensitive high technology or military products. Travelers bringing such goods into Hong Kong without a license may be prosecuted and the goods may be seized. The penalty for trafficking in dangerous drugs can be life imprisonment and a heavy fine. Among the other items that travelers must declare to customs officials are liquors, tobacco, cigarettes and cigars, methyl alcohol, and merchandise imported for commercial purposes. There are no currency restrictions for travelers.

Travelers are liable to prosecution and possible detention if they bring into/out of Hong Kong any firearm or ammunition. Unless otherwise exempted by laws, possession of an "imitation firearm" is also an offense. "Arms" means any firearm, air rifle/air gun/air pistol from which any shot, bullet or missile can be discharged with a muzzle energy greater than two joules, electric stunning device, gun/pistol or other propelling/releasing instrument from or by which a projectile containing any gas or chemical could be discharged, weapon for the discharge of any noxious liquid/gas/powder, and harpoon or spear gun. Paintball guns are included in this category.

Travelers are also liable to prosecution if they bring into/out of Hong Kong any "weapon," which includes Chinese-style throwing dart, gravity knife, gravity-operated steel baton, knuckleduster, Chinese-style fighting iron, spring-loaded steel baton, any

knife the blade of which is exposed by a spring or other mechanical/electric device, and any bladed/pointed weapon. Please note that the fact that such items may be openly for sale in mainland China does not necessarily mean that they may be brought into Hong Kong.

Please visit the website of the Hong Kong Department of Customs and Excise at http://www.customs.gov.hk/eng/content_e.html for specific information regarding Hong Kong customs requirements.

Visitors to Hong Kong should be aware that the importation into the United States of counterfeit, brand-name items, such as watches, compact discs, computer software, and clothing, is prohibited by U.S. law. U.S. Customs officials encourage the use of an ATA (Admission Temporaire/Temporary Admission) Carnet for the temporary admission of professional equipment, commercial samples, and/or goods for exhibitions and fair purposes.

Dogs and cats may be brought into Hong Kong only with a special permit issued in advance. Dogs and cats imported from the United States may be exempted from quarantine when they have valid health and vaccination certificates and the pets have been in the United States for at least six months. Additional information on importing pets is available on the Hong Kong Agriculture, Fisheries and Conservation Department web site at http://www.afcd.gov.hk.

Dual Nationality: Under PRC nationality law, persons who are of Chinese descent and who were born in the mainland of China or Hong Kong are PRC citizens. However, under an agreement between the United States and the PRC, all U.S. citizens entering Hong Kong on their U.S. passports, including such persons as may be considered PRC nationals by the PRC authorities, are considered U.S. citizens by the Hong Kong SAR authorities for purposes of ensuring consular access and protection.

Dual nationals, who are or previously were Hong Kong residents, and who wish to ensure U.S. consular access and protection after the initial 90-day period of admission into Hong Kong, must declare their U.S. nationality by presenting their U.S. passports to the Hong Kong Immigration Department and completing an application for declaration of change of nationality. This declaration of change of nationality will ensure U.S. consular protection and may also result in loss of one's Chinese nationality (but not necessarily one's right of abode). Although such individuals' failure to declare U.S. nationality may jeopardize U.S. consular protection, such failure will not jeopardize their U.S. citizenship. Dual national residents of Hong Kong who enter Hong Kong on their Hong Kong identity cards rather than their U.S. passports and who desire to guarantee U.S. consular protection should declare their U.S. nationality to the Hong Kong Immigration Department as soon as possible after entry. Dual nationals contemplating onward travel to PRC should be especially attentive to use of their U.S. passports, as the PRC authorities may require them to use the same document for entry into the PRC as they used to enter Hong Kong. The Nationality Law of the PRC does not recognize dual nationality. U.S. citizens, including such persons as may be considered Chinese nationals by the PRC authorities, who enter and depart the PRC using a U.S. passport and a valid PRC visa retain the right of U.S. consular access and protection under the U.S.-PRC Consular Convention. The ability of the U.S. Embassy or Consulates General in the PRC to provide normal consular services would be extremely limited should a dual national enter the PRC on a non-U.S. passport. Therefore, travelers should carefully consider whether or not to use a passport or travel document other than their U.S. passport.

Further information on consular protection and dual nationality is available on the Department of State Consular Affairs home page or the U.S. Consulate General in Hong Kong SAR at (852) 2841-2211. Information on the right of abode in Hong Kong may be obtained from the Hong Kong Immigration Department at telephone number: (852) 2824-4055, fax: (852) 2598-8388, via the Internet at: http://www.immd.gov.hk.

Typhoons: During the storm season (July through September), the Hong Kong Observatory issues typhoon warnings on an average of six times a year and heavy rainstorm alerts more frequently. The Hong Kong Observatory has a good notification and monitoring system in place. Please consult the Hong Kong Observatory web site for further information at http://www.hko.gov.hk/contente.htm. General information about natural disaster preparedness is available at the U.S. Federal Emergency Management Agency (FEMA) web site at http://www.fema.gov. Please be advised that if Typhoon Signal 8 or above or Black Rainstorm Warning is announced by the Hong Kong Government, the Consulate General will be closed.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Hong Kong laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession of, use of, or trafficking in illegal drugs in Hong Kong are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in illicit sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Hong Kong are encouraged to reg-

ister with the U.S. Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Hong Kong. Americans without Internet access may register directly with the U.S. Consulate. By registering, American citizens make it easier for the Consulate to contact them in case of emergency. The U.S. Consulate is located at 26 Garden Road, Central, Hong Kong, 24-hour telephone number (852) 2523-9011. Direct lines to American Citizen Services are (852) 2841-2211, 2841-2323, 2841-2225, fax (852) 2845-4845, email: acshk@state.gov. The U.S. mailing address is PSC 461, Box 5, FPO, AP 96521-0006. Please check the U.S. Consulate General Hong Kong web site for current office hours at http://hongkong.usconsulate.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

China is party to The Hague Convention on Protection of Children and Cooperation in Respect of Intercountry Adoption (Hague Adoption Convention). Since Hong Kong Special Administrative Region is a territory of China, all adoptions between Hong Kong and the United States must meet the requirements of the Convention and United States law implementing the Convention. The Government of Hong Kong tends to prefer that prospective adoptive parents are ethnic Chinese. However, non-ethnic Chinese may also adopt if willing to consider an older child or a child with special needs.

Adoption between the United States and Hong Kong is governed by The Hague Adoption Convention. Therefore to adopt from Hong Kong, you must first be found eligible to adopt by the United States Government. In addition to the United States requirements for adoptive parents, Hong Kong also has the following requirements for adoptive parents.

Residency Requirements: Prospective adoptive parents currently living in Hong Kong must be residents of Hong Kong or should offer assurance to the Adoption Unit that they will be living in Hong Kong for a minimum of 12 months. There are no residency requirements for prospective adoptive parents residing in the United States.

Age Requirements: Prospective adoptive parents must be at least 25 years of age. Prospective adoptive parents over the age of 45 will be considered if they are willing to accept older children or children with special needs.

Marriage Requirements: Both single individuals and married couples are eligible to adopt from Hong Kong. For single prospective adoptive parents, preference is given to single parents with special parental skills, such as nursing or social work skills. Some single parents have found their chances of being approved for adoption in Hong Kong increase if they agree to adopt a child with special needs. Single parents who already have a special needs child have a better chance of being matched with a special needs adoptee.

Income Requirements: Prospective adoptive parents will have to prove their income exceeds the Medium Monthly Domestic Household Income set by the Social Welfare Department. The Medium Monthly Domestic Household Income requires that after a family has paid all the necessary monthly expenditures (e.g., mortgage, loans, insurance, helper wages, tuition, etc.), a minimum level of funds are left over for incidental expenses. For instance, a family of three must show monthly funds of $16,000 HK and a family of four must show monthly funds of $19,800 HK.

The Medium Monthly Domestic Household Income is not available publicly. The Social Welfare Department must be contacted directly for specifics. Couples residing outside of Hong Kong must submit their tax returns and complete a questionnaire detailing their financial assets.

Other Requirements: Prospective adoptive parents should be in good physical and mental health.

Who Can Be Adopted? Hong Kong also has specific requirements that a child must meet in order to be eligible for adoption. You cannot adopt a child in Hong Kong unless he or she meets the requirements outlined below.

Age Requirements: Children between the ages of six months and 18 years of age can be adopted. (reflect that most children available for adoption are five years old or younger and some have health problems or are disabled.)

Hong Kong's Adoption Authority: Adoption Unit of the Social Welfare Department

The Process: The first step in adopting a child from Hong Kong is to select an adoption service provider in the United States that has been accredited. Only these agencies and attorneys can provide adoption services between the United States and Hong Kong.

After you choose an accredited adoption service provider, you apply to be found eligible to adopt (Form I-800A) by the USCIS. Once the United States Government determines that you are "eligible" and "suitable" to adopt, you or your agency will forward your information to the adoption authority in Hong Kong. Hong Kong's adoption authority will review your application to determine whether you are also eligible to adopt under Chinese law.

The Hong Kong-licensed provider will submit the adoption application to the Hong Kong central authority, including any preferences the prospective adoptive parents may have about the child's age, sex, physical/medical condition, or region of origin within Hong Kong. The application package should also include a cover letter, written along the lines found

at the following web site: http://www.gwca.org. The Hong Kong central authority reviews the documents and advises the prospective adoptive parent(s), either directly or through their adoption agency, whether additional documents or authentications are required.

If both the United States and Hong Kong determine that you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority in Hong King may provide you with a referral for a child. Once the Hong Kong central authority approves the application, it matches the application with a specific child. The central authority then sends the prospective adoptive parent(s) a letter of introduction about the child, including photographs and the child's health record. This document is commonly called a 'referral.' Prospective adoptive parents who still have questions about the child after reviewing this information may follow up with the Hong Kong central authority either directly or via their adoption agency.

Prospective adoptive parent(s) then either accept or refuse the referral and send the document to their agency, which forwards it to the Hong Kong central authority. If prospective adoptive parent(s) are considering refusing a referral they should discuss with their agency the possibility of getting a second referral.

After you accept a match with a child, you will apply to the USCIS for provisional approval to adopt that particular child (Form I-800). After this, your adoption service provider or you will submit a visa application for to a Consular officer at the United States Embassy. If the Consular office determines that the child appears eligible to immigrate to the United States, he/she will notify the Chinese adoption authority (Article 5 letter). For Convention country adoptions, prospective adoptive parent(s) may not proceed with the adoption or obtain custody for the purpose of adoption until this takes place.

Role of the Adoption Authority: The Director of the Social Welfare Department reviews the documentation to determine if the adoption is in the best interests of the child. Upon approval, the Social Welfare Department will file a court order to pass the care and control of the child to the Director of the United States adoption agency. (If the prospective adoptive parents are residents of Hong Kong, the child is released into their home for at least six months.) During the six months of living with the family, an adoption social worker makes periodic visits to determine if adoption by the prospective adoptive parents is in the best interest of the child.

Role of the Court: The District Court grants the adoption order and issues the final adoption certificate. For non-residents of Hong Kong, the finalization of the adoption passes the care and control of the child from the United States adoption agency to the adoptive parents.

Role of Adoption Agencies: The adoption agency arranges the prospective adoptive parents' home study. The adoption agency works with one of the agencies in Hong Kong that have been accredited to facilitate intercountry adoptions. The United States adoption agency forwards the home study report and supporting documents to the Hong Kong accredited body. The Hong Kong agency submits the documentation to the Social Welfare Department. Some adoption agencies accredited to facilitate intercountry adoptions are the International Social Service (ISS) and Mother's Choice Overseas Adoption Service. The ISS works closely with Hong Kong's Social Welfare Department in placing children overseas. Mother's Choice specializes in placing children with special needs–ranging from vision and hearing impairment to cerebral palsy, Down's syndrome, and development delay.

International Social Service
Hong Kong Branch

Fax: (852) 2537-7681
Email: adoption@motherschoice.com
Website:
http://www.motherschoice.com/pages/index.asp?pg=home

Adoption Application: The adoption application is filed with the Adoption Unit of the Social Welfare Department.

Time Frame: The average amount of time required to complete an intercountry adoption ranges from six to twelve months. The timeframe may be increased if the prospective adoptive parents have specific requests regarding the child's age and/or medical conditions.

Adoption Fees: The Social Welfare Department's Adoption Unit provides an assessment of the prospective adoptive parents' suitability to adopt at no charge. Adoptive parents based in Hong Kong are required to pay $2,840 HK for acting as guardian ad litem while the adoption proceedings are finalized. Prospective adoptive parents residing outside of Hong Kong are not required to pay this fee.

Documents Required: The following is a list of documents required to adopt a child from Hong Kong:

- Copy of United States passport;
- Copy of marriage certificate (if applicable);
- Evidence of termination of previous marriage (if applicable);
- Proof of income;
- Copies of school credentials;
- Evidence of prior adoptions (if any); and

- Satisfactory home study report and medical examination reports of the adopting parents.

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Hong Kong does not have any post-adoption requirements.

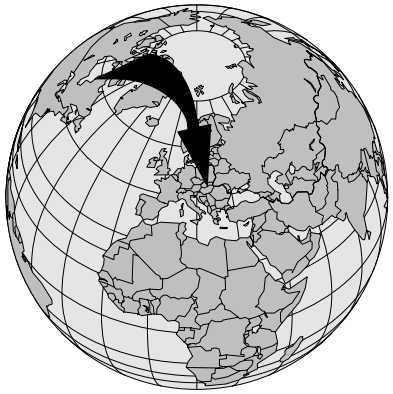
International Parental Child Abduction

November 2008



The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: The Hague Convention on the Civil Aspects of International Child Abduction (the "Hague Convention") came into force between the United States and Hong Kong on September 1, 1997. Therefore, Hague Convention provisions for return would apply to children abducted or retained after September 1, 1997. Parents and legal guardians of children taken to Hong Kong prior to September 1, 1997, may still submit applications for access to the child under the Hague Convention in some cases.

Criminal Remedies: For information on possible criminal remedies in the United States, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation. Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention at http://www.ojjdp.ncjrs.org. Please note that criminal charges may complicate a Hague Convention case.

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

HUNGARY

Compiled from the November 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Hungary

PROFILE

Geography

Area: 93,030 sq. km. (35,910 sq. mi.); about the size of Indiana.
Cities: Capital—Budapest (est. pop. 2 million). Other cities—Debrecen (220,000); Miskolc (208,000); Szeged (189,000); Pecs (183,000).
Terrain: Mostly flat, with low mountains in the north and northeast and north of Lake Balaton.
Climate: Temperate.

People

Nationality: Noun and adjective—Hungarian(s).
Population: (July 2007 est.) 9,956,108.
Ethnic groups: Magyar 89.9%, Romany 4% (est.), German 2.6%, Serb 2%, Slovak 0.8%, Romanian 0.7%.
Religions: (2001 census) Roman Catholic 51.9%, Calvinist 15.9%, Lutheran 3%, Greek Catholic 2.6%, Jewish 1%, others, including Baptist Adventist, Pentecostal, Unitarian 3%.
Languages: Magyar 98.2%, other 1.8%.
Education: Compulsory to age 16. Attendance—96%. Literacy—99%.
Health: (2007 est.) Infant mortality rate—8.21/1,000. Life expectancy—men 68.73 yrs., women 77.38 yrs.
Work force: (2006 est. 4.21 million) Agriculture—5.5%; industry and commerce—33.3%; services—61.2%.

Government

Type: Republic.
Constitution: August 20, 1949. Substantially rewritten in 1989, amended in 1990.
Government branches: Executive—president of the Republic (head of state), prime minister (head of government), Council of Ministers. Legislative—National Assembly (386 members, 4-year term). Judicial—Supreme Court and Constitutional Court.
Political subdivisions: 19 counties plus capital region of Budapest.
Political parties: Fidesz-Hungarian Civic Party—center-right; Hungarian Socialist Party (MSZP)—center-left; Alliance of Free Democrats (SZDSZ)—center-left; Hungarian Democratic Forum (MDF)—center-right; Christian Democratic People's Party (KDNP)—center-right.

Economy

GDP: HUF 27,220 billion (approx. $163.9 billion) ($1=HUF 166.1 - average exchange rate Jan—Oct 2008).
Annual growth rate: (2008 est.) 1.8%
Per capita GDP: (2008 est.) $16,400.
Natural resources: bauxite, coal, natural gas, fertile soils, arable land.
Agriculture/forestry: (2006 est., 3.4% of GDP) Products—meat, corn, wheat, sunflower seeds, potatoes, sugar beets, vegetables, fruits.
Industry and construction: (2007 est., 44,3% of GDP) Types—machinery, vehicles, chemicals, precision and measuring equipment, computer products, medical instruments, pharmaceuticals, textiles.
Trade: (2007 est.) Exports $94,6 billion)—machinery, vehicles, food, beverages, tobacco, crude materials, manufactured goods, fuels and electric energy. Imports ($94,7 billion)—machinery, vehicles, manufactured goods, fuels and electric energy, food, beverages, and tobacco. Major markets—EU (Germany, Austria, Italy, France, UK, Romania, Poland). Major suppliers—EU (Germany, Austria, Italy, France, Netherlands, Poland), Russia, China.

PEOPLE AND HISTORY

Ethnic groups in Hungary include Magyar (nearly 90%), Romany, German, Serb, Slovak, and others. The majority of Hungary's people are Roman Catholic; other religions represented are Calvinist, Lutheran, Jewish, Baptist, Adventist, Pentecostal, and Unitarian. Magyar is the pre-

dominant language. Hungary has long been an integral part of Europe. It converted to Western Christianity before AD 1000. Although Hungary was a monarchy for nearly 1,000 years, its constitutional system preceded by several centuries the establishment of Western-style governments in other European countries.

Following the defeat of the Austro-Hungarian Dual Monarchy (1867-1918) at the end of World War I, Hungary lost two-thirds of its territory and nearly as much of its population. It experienced a brief but bloody communist dictatorship and counterrevolution in 1919, followed by a 25-year regency under Adm. Miklos Horthy. Although Hungary fought in most of World War II as a German ally, it fell under German military occupation following an unsuccessful attempt to switch sides on October 15, 1944. Under occupation, the Hungarian Government deported or executed and seized the property of hundreds of thousands of its minority citizens, mostly members of the Jewish community. On January 20, 1945, a provisional government concluded an armistice with the Soviet Union and established the Allied Control Commission, under which Soviet, American, and British representatives held complete sovereignty over the country. The Commission's chairman was a member of Stalin's inner circle and exercised absolute control.

Communist Takeover

The provisional government, dominated by the Hungarian communist party (MKP), was replaced in November 1945 after elections which gave majority control of a coalition government to the Independent Smallholders' Party. The government instituted a radical land reform and gradually nationalized mines, electric plants, heavy industries, and some large banks. The communists ultimately undermined the coalition regime by discrediting leaders of rival parties and through terror, blackmail, and framed trials. In elections tainted by fraud in 1947, the leftist bloc gained control of the government.

By February 1949, all opposition parties had been forced to merge with the MKP to form the Hungarian Workers' Party. In 1949, the communists held a single-list election and adopted a Soviet-style constitution, which created the Hungarian People's Republic. Between 1948 and 1953, the Hungarian economy was reorganized according to the Soviet model. In 1949 and the country joined the Council for Mutual Economic Assistance (CMEA, or Comecon.) All private industrial firms with more than 10 employees were nationalized. Freedom of the press, religion, and assembly were strictly curtailed. The head of the Roman Catholic Church, Cardinal Jozsef Mindszenty, was sentenced to life imprisonment.

Forced industrialization and land collectivization soon led to serious economic difficulties, which reached crisis proportions by mid-1953. Imre Nagy replaced Rakosi as prime minister in 1953 and repudiated much of Rakosi's economic program of forced collectivization and heavy industry. He also ended political purges and freed thousands of political prisoners. However, the economic situation continued to deteriorate, and Rakosi succeeded in disrupting the reforms and in forcing Nagy from power in 1955 for "right-wing revisionism." Hungary joined the Soviet-led Warsaw Pact Treaty Organization the same year.

1956 Revolution

Pressure for change reached a climax on October 23, 1956, when security forces fired on Budapest students marching in support of Poland's confrontation with the Soviet Union. The ensuing battle quickly grew into a massive popular uprising. Gero called on Soviet troops to restore order on October 24. Fighting did not abate until the Central Committee named Imre Nagy as prime minister on October 25, and the next day Janos Kadar replaced Gero as party first secretary. Nagy dissolved the state security police, abolished the one-party system, promised free elections, and negotiated with the U.S.S.R. to withdraw its troops.

Faced with reports of new Soviet troops pouring into Hungary despite Soviet Ambassador Andropov's assurances to the contrary, on November 1 Nagy announced Hungary's neutrality and withdrawal from the Warsaw Pact. He appealed to the United Nations and the Western powers for protection of its neutrality. Preoccupied with the Suez Crisis, the UN and the West failed to respond, and the Soviet Union launched a massive military attack on Hungary on November 3. Some 200,000 Hungarians fled to the West. Nagy and his colleagues took refuge in the Yugoslav Embassy. Kadar, after delivering an impassioned radio address on November 1 in support of "our glorious revolution" and vowing to fight the Russians with his bare hands if they attacked Hungary, defected from the Nagy cabinet; he fled to the Soviet Union and on November 4 announced the formation of a new government. He returned to Budapest and, with Soviet support, carried out severe reprisals; thousands of people were executed or imprisoned. Despite a guarantee of safe conduct, Nagy was arrested and deported to Romania. In June 1958, the government announced that Nagy and other former officials had been executed.

Reform Under Kadar

In the early 1960s, Kadar announced a new policy under the motto of "He who is not against us is with us." He declared a general amnesty, gradually curbed some of the excesses of the secret police, and introduced a relatively liberal cultural and economic course aimed at overcoming the post-1956 hostility toward him and his regime. In 1966, the Central Committee approved the "New Economic Mechanism," through which it sought to overcome the inefficiencies of central planning, increase productivity, make Hungary more competitive in world markets, and create prosperity to ensure political stability. However, the reform was not as comprehensive as planned, and basic flaws of central planning produced economic stagnation. Over the next two decades of relative domestic quiet, Kadar's government responded to pressure for political and economic

reform and to counterpressures from reform opponents. By the early 1980s, it had achieved some lasting economic reforms and limited political liberalization and pursued a foreign policy which encouraged more trade with the West. Nevertheless, the New Economic Mechanism led to mounting foreign debt incurred to shore up unprofitable industries.

Transition to Democracy

Hungary's transition to a Western-style parliamentary democracy was the first and the smoothest among the former Soviet bloc, inspired by nationalism that long had encouraged Hungarians to control their own destiny. By 1987, activists within the party and bureaucracy and Budapest-based intellectuals were increasing pressure for change. Some of these became reform socialists, while others began movements which were to develop into parties. Young liberals formed the Federation of Young Democrats (Fidesz); a core from the so-called Democratic Opposition formed the Association of Free Democrats (SZDSZ), and the neopopulist national opposition established the Hungarian Democratic Forum (MDF). Civic activism intensified to a level not seen since the 1956 revolution.

In 1988, Kadar was replaced as General Secretary of the MKP, and that same year, the Parliament adopted a "democracy package," which included trade union pluralism; freedom of association, assembly, and the press; a new electoral law; and a radical revision of the constitution, among others. The Soviet Union reduced its involvement by signing an agreement in April 1989 to withdraw Soviet forces by June 1991.

National unity culminated in June 1989 as the country reburied Imre Nagy, his associates, and, symbolically, all other victims of the 1956 revolution. A national roundtable, comprising representatives of the new parties and some recreated old parties—such as the Smallholders and Social Democrats—the communist party, and different social groups, met in the late summer of 1989 to discuss major changes to the Hungarian constitution in preparation for free elections and the transition to a fully free and democratic political system.

Free Elections and a Democratic Hungary

The first free parliamentary election, held in May 1990, was a plebiscite of sorts on the communist past. The revitalized and reformed communists performed poorly despite having more than the usual advantages of an "incumbent" party. Populist, center-right, and liberal parties fared best, with the Democratic Forum (MDF) winning 43% of the vote and the Free Democrats (SZDSZ) capturing 24%. Under Prime Minister Jozsef Antall, the MDF formed a center-right coalition government with the Independent Smallholders' Party (FKGP) and the Christian Democratic People's Party (KDNP) to command a 60% majority in the parliament. Parliamentary opposition parties included SZDSZ, the Socialists (MSZP), and the Alliance of Young Democrats (Fidesz). Peter Boross succeeded as Prime Minister after Antall died in December 1993. The Antall/Boross coalition governments achieved a reasonably well-functioning parliamentary democracy and laid the foundation for a free market economy.

In May 1994, the socialists came back to win a plurality of votes and 54% of the seats after an election campaign focused largely on economic issues and the substantial decline in living standards since 1990. A heavy turnout of voters swept away the right-of-center coalition but soundly rejected extremists on both right and left. Despite its neocommunist pedigree, the MSZP continued economic reforms and privatization, adopting a painful but necessary policy of fiscal austerity (the "Bokros plan") in 1995. The government pursued a foreign policy of integration with Euro-Atlantic institutions and reconciliation with neighboring countries. But neither an invitation to join NATO nor improving economic indicators guaranteed the MSZP's re-election; dissatisfaction with the pace of economic recovery, rising crime, and cases of government corruption convinced voters to propel center-right parties into power following national elections in May 1998. The Federation of Young Democrats (renamed Fidesz-Hungarian Civic Party (MPP) in 1995) captured a plurality of parliamentary seats and forged a coalition with the Smallholders and the Democratic Forum. The new government, headed by 35-year-old Prime Minister Viktor Orban promised to stimulate faster growth, curb inflation, and lower taxes. Although the Orban administration also pledged continuity in foreign policy, and continued to pursue Euro-Atlantic integration as its first priority, it was a more vocal advocate of minority rights for ethnic Hungarians abroad than the previous government.

In April 2002, the country voted to return the MSZP-Free Democrat coalition to power. The new government, led by Prime Minister Peter Medgyessy, had a very slim majority in Parliament following the closest elections of the post-communist era. The Medgyessy government placed special emphasis on solidifying Hungary's Euro-Atlantic course, which culminated in Hungary's accession to the European Union on May 1, 2004. Prime Minister Medgyessy resigned in August 2004 after losing coalition support following an attempted cabinet reshuffle. Ferenc Gyurcsany was selected by the governing coalition to succeed Medgyessy, and he was confirmed by the Parliament on September 29, 2004.

In the April 2006 election, Prime Minister Ferenc Gyurcsany and his Socialist-liberal coalition were re-elected, the first time since communism that a sitting government has renewed its mandate. Currently, the MSZP is ruling as a minority government as the SZDSZ pulled out of the coalition in April 2008. The present configuration of Parliament includes MSzP with 190 seats, SZDSZ with 19 seats; Fidesz and KDNP with 161 seats, MDF with 10 seats, and five independent Members of Parliament. One seat is currently vacant, awaiting a by-election in January 2009. Following the dissolution of the coalition with SZDSZ the Prime Minister reduced the number of ministries in the cabinet from 17 to 13.

GOVERNMENT AND POLITICAL CONDITIONS

The President of the Republic, elected by the National Assembly every 5 years, has a largely ceremonial role, but powers also include appointing the prime minister. The prime minister selects cabinet ministers and has the exclusive right to dismiss them. Each cabinet nominee appears before one or more parliamentary committees in consultative open hearings and must be formally approved by the president. The unicameral, 386-member National Assembly is the highest organ of state authority and initiates and approves legislation sponsored by the prime minister. A party must win at least 5% of the national vote to form a parliamentary faction. National parliamentary elections are held every 4 years (the last in April 2006). A 15-member Constitutional Court has power to challenge legislation on grounds of unconstitutionality.

ECONOMY

The Hungarian economy prior to WWII was primarily oriented toward agriculture and small scale manufacturing. Hungary's strategic position in Europe and its relative lack of natural resources also have dictated a traditional reliance on foreign trade. In the early 1950s, the communist government forced rapid industrialization after the standard Stalinist pattern in an effort to encourage a more self-sufficient economy. Most economic activity was conducted by state-owned enterprises or cooperatives and state farms. In 1968, Stalinist self-sufficiency was replaced by the "New Economic Mechanism," which reopened Hungary to foreign trade, gave limited freedom to the workings of the market, and allowed a limited number of small businesses to operate in the services sector.

Although Hungary enjoyed one of the most liberal and economically advanced economies of the former Eastern bloc, both agriculture and industry began to suffer from a lack of investment in the 1970s, and Hungary's net foreign debt rose significantly—from $1 billion in 1973 to $15 billion in 1993—due largely to consumer subsidies and unprofitable state enterprises. In the face of economic stagnation, Hungary opted to try further liberalization by passing a joint venture law, adopting an income tax, and joining the International Monetary Fund (IMF) and the World Bank. By 1988, Hungary had developed a two-tier banking system and had enacted significant corporate legislation which paved the way for the ambitious market-oriented reforms of the post-communist years.

The Antall government of 1990-94 began market reforms with price and trade liberation measures, a revamped tax system, and a nascent market-based banking system. By 1994, however, the costs of government overspending and hesitant privatization had become clearly visible. Since that time, the government sector has been prone to high deficit spending, often preceding national elections. A series of reforms has helped bring this under control, and Hungary's early openness to foreign direct investment (FDI) led to a sustained period of high growth and made Hungary a magnet for FDI in the late 1990's and early parts of this century.

In 1995 Hungary's currency, the forint (HUF), became convertible for all current account transactions, and subsequent to OECD membership in 1996, for almost all capital account transactions as well. In 2001, the Orban government lifted remaining currency controls and broadened the band around the exchange rate, allowing the forint to appreciate by more than 12% in a year. Conflicting fiscal and monetary policy in the summer of 2002 caused confusion briefly in the market, with the forint surging against the Euro for several months. Prior to the change of regime in 1989, 65% of Hungary's trade was with Comecon countries. By the end of 1997, Hungary had shifted much of its trade to the West. Trade with EU countries and the OECD now comprises over 75% and 85% of the total, respectively. Germany is Hungary's single-most important trading partner. The United States has become Hungary's sixth-largest export market, while Hungary is ranked as the 72nd largest export market for the United States. Bilateral trade between the two countries has increased to more than $1 billion per year. The United States has normal trade relations with Hungary and has extended to it Overseas Private Investment Corporation insurance, and access to the Export/Import Bank. In the 1990's, Hungary rapidly integrated into the European economy, with the value of exports and imports both growing to well over 70% of GDP. This close relationship with the economies of the European Union (EU) helped pave the way for Hungary's accession to the EU in 2004. In recent years, Hungary has been a leader in per capita FDI in the region, and the private sector is the dominant engine of growth in an economy saddled down with heavy government debt and a substantial fiscal deficit.

Many analysts and international organizations note the success of export-oriented manufacturing companies, but see room for substantial structural reform to reduce government spending and increase efficiencies in areas such as taxation, health care, education, and social benefits. As a result, despite high levels of FDI, Hungary's growth rate over much of the last decade has trailed that of its central European neighbors.

As part of its EU membership agreement, Hungary agreed to meet the economic criteria necessary to adopt the Euro. In 2005 and 2006, it became clear that not only was a high budget deficit hurting the economy (at one point in danger of surpassing 10% of GDP in 2006), but that Hungary would have to endure EU scrutiny and possible sanctions associated. Against this backdrop, Prime Minister Gyurcsany proposed and launched a sweeping austerity program to attack Hungary's budget deficit, by raising taxes, decreasing subsidies, and streamlining the public sector. Businesses have complained that the increased taxes and greater enforcement costs have decreased Hungary's competitiveness, but the positive affects of the deficit are clear. With a goal of cutting the deficit from over 9% if GDP in 2006 to 6.8% of GDP in 2007, the government exceeded its target and attained a deficit of 5,0% of GDP for the year. GOH decreased the 2008 deficit target to 3.4% of GDP (from 4%) and the 2009 target to 2.9% of GDP. The rate of inflation has been declining since May 2008. The

Finance Ministry projects 6.4% annual average inflation for 2008. With more than $60 billion in FDI since 1989, Hungary has been a leading destination for FDI in central and eastern Europe, although this level is beginning to decline. The largest U.S. investors include GE, Alcoa, General Motors, Coca-Cola, Ford, IBM, and PepsiCo. Foreign companies modernized Hungary's industrial sector and created thousands of new, high-skilled, high-paying jobs. As a result of extensive and continuing liberalization, the private sector produces about 80% of Hungary's output. Currently, foreign firms control two-thirds of manufacturing, 90% of telecommunications, and 60% of the energy sector. Inflation declined from 14% in 1998 to 3.7% in 2005, and is expected to return to low levels by 2008. Policy challenges include cutting the public sector deficit, reducing the country's high redistribution rate, and taking concrete measures on transparency and tax reform to retain its competitive position in attracting investment.

In October 2008, the effects of the global financial crisis spilled over into Hungary. Years of high budget deficits and Hungary's high external debt levels fueled investor risk aversion, and negatively affected the foreign exchange, government securities, and equity markets in Hungary. Even though macroeconomic and financial policies had been strengthened since 2006, Hungary was hit hard by global de-leveraging. In order to increase investor confidence and ensure liquidity in domestic financial markets, Hungary concluded a $25 billion financial stabilization package with the IMF, EU and the World Bank.

NATIONAL SECURITY

Hungary's key national security focus since joining NATO in 1999 has been contributing to the stability of the region while integrating its armed forces into NATO's force structure. As a "NATO island" in an area of instability, Hungary takes a keen interest in NATO expansion and in the transatlantic link. It shares a more acute sense of the threat than many other European countries and is watching the transition in the Balkans, Ukraine, and Russia with great interest. Hungarians believe that Hungary's own security and that of its ethnic minorities in neighboring countries will be best served by a peaceful, unified region, which will be achieved when EU and NATO membership is extended to the entire region.

Hungary has been slowly modernizing and downsizing its armed forces since it left the Warsaw Pact in 1990. Transitioning from a heavy, slow-moving Warsaw Pact force to a lighter, versatile NATO force, the Hungarian military has gone from 130,000 in 1989 to approximately 24,000 combat and combat support forces in 2008. Implementing a new training, logistics, and leadership systems and a new Joint Forces Command structure, the Hungarian military has gained considerable practical experience working with NATO and other forces serving in international military missions (about 1,000 at any given time). Hungary was especially helpful during the implementation of the Dayton Peace Accords in the Balkans from 1995-2004, when its airbase at Taszar was used by coalition forces transiting the region. Hungary currently leads a Provisional Reconstruction Team (PRT) in Afghanistan and provides security at the Kabul airport. Hungary has committed to providing two Operational Mentoring and Liaison Teams (OMLT) as well as Special Forces personnel, without caveat, in Afghanistan in 2009. The Hungarian military took over command of a joint battalion in the Balkans in 2008. Hungary's Papa Airbase will be the home base of the Strategic Airlift Consortium's C-17 operations, expanding its contribution to NATO and other European partners. Hungary's military still faces numerous challenges to its modernization program, as reflected in the 2008 Hungarian defense budget, set at 1.17% of GDP, well below the NATO target of two percent.

FOREIGN RELATIONS

Except for the short-lived neutrality declared by Imre Nagy in November 1956, Hungary's foreign policy generally followed the Soviet lead from 1947 to 1989. During the communist period, Hungary maintained treaties of friendship, cooperation, and mutual assistance with the Soviet Union, Poland, Czechoslovakia, the German Democratic Republic, Romania, and Bulgaria. It was one of the founding members of the Soviet-led Warsaw Pact and Comecon, and it was the first central European country to withdraw from those now defunct organizations.

As with any country, Hungarian security attitudes are shaped largely by history and geography. For Hungary, this is a history of more than 400 years of domination by great powers—the Ottomans, the Habsburgs, the Germans during World War II, and the Soviets during the Cold War—and a geography of regional instability and separation from Hungarian minorities living in neighboring countries. Hungary's foreign policy priorities, largely consistent since 1990, represent a direct response to these factors. Since 1990, Hungary's top foreign policy goal has been achieving integration into Western economic and security organizations. To this end, Hungary joined NATO in 1999 and the European Union in May of 2004. Hungary also has improved its often-chilled neighborly relations by signing basic treaties with Romania, Slovakia, and Ukraine.

These renounce all outstanding territorial claims and lay the foundation for constructive relations. However, the issue of ethnic Hungarian minority rights in Slovakia and Romania periodically causes bilateral tensions to flare. Hungary was a signatory to the Helsinki Final Act in 1975, has signed all of the CSCE/OSCE follow-on documents since 1989, and served as the OSCE's Chairman-in-Office in 1997. Hungary's record of implementing CSCE Helsinki Final Act provisions, including those on reunification of divided families,

remains among the best in eastern Europe. Hungary has been a member of the United Nations since December 1955.

U.S.-HUNGARIAN RELATIONS

Relations between the United States and Hungary following World War II were affected by the Soviet armed forces' occupation of Hungary. Full diplomatic relations were established at the legation level on October 12, 1945, before the signing of the Hungarian peace treaty on February 10, 1947. After the communist takeover in 1947-48, relations with Hungary became increasingly strained by the nationalization of U.S.-owned property, unacceptable treatment of U.S. citizens and personnel, and restrictions on the operations of the American legation. Though relations deteriorated further after the suppression of the Hungarian national uprising in 1956, an exchange of ambassadors in 1966 inaugurated an era of improving relations. In 1972, a consular convention was concluded to provide consular protection to U.S. citizens in Hungary.

In 1973, a bilateral agreement was reached under which Hungary settled the nationalization claims of American citizens. In January 1978, the United States returned to the people of Hungary the historic Crown of Saint Stephen, which had been safeguarded by the United States since the end of World War II. Symbolically and actually, this event marked the beginning of excellent relations between the two countries. A 1978 bilateral trade agreement included extension of most-favored-nation status to Hungary. Cultural and scientific exchanges were expanded. As Hungary began to pull away from the Soviet orbit, the United States offered assistance and expertise to help establish a constitution, a democratic political system, and a plan for a free market economy.

Between 1989 and 1993, the Support for East European Democracy (SEED) Act provided more than $136 million for economic restructuring and private sector development. The Hungarian-American Enterprise Fund has offered loans, equity capital, and technical assistance to promote private-sector development. The U.S. Government has provided expert and financial assistance for the development of modern and Western institutions in many policy areas, including national security, law enforcement, free media, environmental regulations, education, and health care. American direct investment has had a direct, positive impact on the Hungarian economy and on continued good bilateral relations. When Hungary acceded to NATO in April 1999, it became a formal ally of the United States. This move has been consistently supported by the 1.5 million-strong Hungarian-American community. The U.S. government supported Hungarian European Union accession in 2004, and continues to work with Hungary as a valued partner in the Transatlantic relationship. Hungary joined the Visa Waiver Program on November 17, 2008.

TRAVEL

Consular Information Sheet

October 29, 2008

Country Description: Hungary is a stable democracy with a market economy. Tourist facilities outside Budapest are widely available, if not as developed as those found in Western Europe. Visitors considering a trip are encouraged to read the Embassy's consular web site at http://budapest.usembassy.gov.

Entry Requirements: A valid passport is required. Hungary is a party to the "Schengen" Agreement. As such, U.S. citizens may enter Hungary for up to 90 days for tourist or business purposes without a visa. The passport should be valid for at least three months beyond the period of stay. For further details about travel into and within Schengen countries, please see our Schengen Fact Sheet.

For further information concerning entry requirements and residency permits, contact the Embassy of the Republic of Hungary at 3910 Shoemaker Street NW, Washington, DC 20008, telephone (202) 362-6730. More information can be found on the Hungarian Embassy's web site at http://www.huembwas.org, or, from the Hungarian Consulates in Los Angeles or New York.

Safety and Security: Prior police approval is required for public demonstrations in Hungary and police oversight is routinely provided to ensure adequate security for partici-

pants and passersby. The October 23rd anniversary of the 1956 revolution is a very important and emotional national holiday in Hungary. Since 2006, groups have used this holiday to stage demonstrations against the Hungarian Government, and some of these demonstrations have turned violent. Police forces have used tear gas and water cannons to control the civil unrest. Other situations may develop which could pose a threat to public safety, as large demonstrations continue to occur in protest of various domestic political issues. While demonstrations have occurred throughout the country, the most vocal demonstrations occurred at Budapest's Kossuth Lajos tér, outside the Hungarian Parliament Building and very close to the U.S. Embassy. On several occasions the demonstrations turned violent, resulting in local law enforcement response that included the use of water cannons and tear gas. While Americans and U.S. interests are not specifically targeted by these incidents, many take place in areas popular with tourists. As a result, U.S. citizens are advised to avoid areas in which public demonstrations are taking place.

While Hungary does not appear to be experiencing the wave of race or ethnic-based violence associated with outer countries in East and Central Europe, a small but vocal group calling itself the Magyar Gaarda (Hungarian Guard) gained prominence in 2007 due to its radical nationalist message of intolerance towards Jews, Roma and homosexuals, its advocacy of violence and it's imagery reminiscent of Hungary's fascist regime of the 1940's. Although the group is not avowedly anti-American, it's targeting of people based on their ethnicity, race or sexual orientation should be noted by Americans traveling in Hungary, and steps should be taken to avoid confrontations with the group and its members.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov/, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up to date information on security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or, for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays.

Crime: Hungary has a low rate of violent crime. However, street crime occasionally involving violence has been reported, especially near major hotels and restaurants and on public transportation. Theft of passports, currency and credit cards is a frequent problem, especially in train stations, on public transportation and, occasionally, in restaurants and public baths.

The U.S. Embassy's Consular Section offers an informational brochure for tourists in Hungary, including a section on crimes and scams that have been encountered by other tourists. To read the advisory, please visit http://budapest.usembassy.gov/tourist_advisory.html.

Drivers should be cautious when stopping at gas stations and highway parking lots, or fixing flat tires or other mechanical problems, especially at night. There have been reports of scams perpetrated on unwitting victims while traveling the highways. One reported scam involves someone who attracts the driver's attention by saying that there is something wrong with his/her car (e.g. a smoking hood or flat tire) in order to encourage the driver to pull over to the side of the road. Once pulled over, the people participating in the scam will remove purses, passports, etc., from the car and drive away. Luggage and valuables should not be left unattended inside any vehicle.

A common scam involves young women asking foreign men to buy them drinks. When the bill arrives the drinks cost hundreds of dollars each. Americans should avoid bars and restaurants promoted by cab drivers or people on the street. Every bar and restaurant should provide a menu with prices before ordering. In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy or Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Tourists who become victims of a crime in Hungary are strongly encouraged to call a 24-hour multilingual crime-reporting telephone number. The number from 8 a.m. to 8 p.m. is 01-438-8080; from 8 p.m. to 8 a.m., the number is 06-8066-0044. There is also a 24-hour police Tourist Information office that provides service in English and German and is located in one of downtown Budapest's busiest tourist areas: 1051 Budapest Süto utca 2.

Medical Facilities and Health Information: Medical treatment in Hungary is adequate, but hospital facilities and nursing support are not comparable to those in the United States. Physicians are generally well trained, but there is a lack of adequate emergency services. Some doctors, particularly in Budapest, speak English. Doctors and hospitals usually expect immediate cash payment for health services.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Hungary.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning the Hungary is provided for general reference only, and may not be totally accurate in a particular location or circumstance. In Hungary, fatal traffic accidents number approximately 1,200 per year, with about 7,000 traffic accidents per year resulting in serious injuries. While this may seem low compared to the Untied States, Hungary has a much higher rate of accidents per miles driven. Americans should drive with caution and always be alert for other vehicles that may be violating traffic laws. Road travel is more dangerous during the Christmas season, summer months, and at night.

Roadside assistance, including medical and other services, is generally available. English is usually spoken at the emergency numbers listed below. In case English is not spoken, dial 112.

Ambulance: 104 or 350-0388
Police: 107
Fire: 105
24-hour English speaker: 112

Bus, train and taxi services are readily available for inter-city travel.

Hungarian motorways and highways are generally in good condition. Urban roads and road maintenance are also good although areas under construction are not always adequately marked or blockaded. In Budapest, many roads are often under construction. In rural areas, however, roads are often narrow, badly lit, and can be in a state of poor repair in some areas. Pedestrians, agricultural machinery, and farm animals often use these small rural roads. This requires increased caution on the part of drivers. Additional information on road conditions is available from "Utinform" at phone number (38)(1)336-2400.

Hungary has a policy of zero tolerance for driving under the influence of alcohol. Police often conduct routine roadside checks where breathanalyzer tests are administered. Persons found to be driving while intoxicated face jail and/or fines. Possible penalties for a car accident involving injury or death are one to five years in prison. Police have instituted a widespread practice of stopping vehicles, particularly in Budapest, to check driver identity documents in a search for illegal aliens and residents in Hungary, and to check vehicle registration and fitness documentation. It is against the law to use a handheld cell phone while driving anywhere in Hungary. Hungary recognizes international driver's permits (IDP) issued by the American Automobile Association (AAA) and the American Automobile Touring Alliance when presented in conjunction with a state driver's license. American driver's licenses will be accepted in Hungary for one year after arrival provided that a certified Hungarian translation has been attached to the license. Those with IDPs do not need to have the license translated, but must present both IDP and state driver's license together. After one year in Hungary, U.S. citizens must obtain a Hungarian driver's license. For further information on this procedure visit our website at http://budapest.usembassy.gov. The speed limit for cars and motorcycles on the motorway is 130 km per hour (approximately 80 mph); on highways, the limit is 110 km per hour (approximately 65 mph); and in town and village areas, the speed limit is 50 km per hour (approximately 30 mph). Many drivers, however, do not observe the speed limits, and extra care should be taken on two-way roads. Special seats are required for infants. Children under age 12 may not sit in the front seat of an automobile. Seats belts are mandatory for everyone in the car. Unless another instruction sign is displayed, yielding the right of way to cars approaching from the right is the general rule. Turning right on a red light is prohibited. The police write up tickets for traffic violations thus documenting the infraction and any applicable fine(s). The police will give the offender a postal check (money order) on which the amount of the fine to be paid is written, and this postal check may be presented and paid for at any Hungarian post office. Sometimes in disputes about fines or the offense, the police will confiscate the person's passport and issue a receipt for the passport with an "invitation letter" to appear at the police station the ext day or day after to resolve the dispute. The passport is returned after the resolution and/or the payment of the fine. For specific information about Hungarian driver's permits, vehicle inspection, road taxes and mandatory insurance, contact the Hungarian National Tourist Organization Office in New York via the internet at http://www.gotohungary.com.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Hungary's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Hungary's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: The acceptance of traveler's checks is not universal in Hungary. The presence of ATMs is increasing in Budapest and other major cities. Hungary's custom authorities may enforce strict regulations concerning temporary importation into or export from Hungary of items such as firearms, antiquities, and prescription medications. It is advisable to contact the Embassy of Hungary in Washington or one of Hungary's consulates in the United States for specific information regarding customs requirements.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Hungarian laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Hungary are strict and convicted offenders can expect jail sentences and heavy fines. Engaging in illicit sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy and Consulate Locations: Americans living in Hungary are encouraged to register with the nearest U.S. Embassy of Consulate through the State Department's travel registration web site, https://travelregistration.state.gov/ibrs/ui/, and to obtain updated information on travel and security within Hungary. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy in Budapest is located at 1054 Budapest, Szabadsag Ter 12; telephone (36)(1) 475-4703 or (36)(1) 475-4929. The Consular Section's fax is (36)(1) 475-4188 or (36)(1) 475-4113, and the Consular Section's web site is located at http://hungary.usembassy.gov.

Intercountry Adoption

April 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: Ministry for Youth, Family and Social Affairs, and Equal Opportunity; Department of Family and Guardianship Matters (Ifjusági, Családügyi, Szociális és Esélyegyenlõségi Minisztérium, Családjogi és Gyámügyi Osztály); Address: 1054 Budapest, Akademia u. 3.; Phone: (36-1) 475-5788 or (36-1) 475-7983.

Eligibility Requirements for Adoptive Parents: Hungarian law does not specify an age limit for adoptive parents, but Hungarian authorities require that one of the adoptive parents be under age 45. Hungarian law permits single people to adopt; however, Hungarian authorities may deny an adoption based on the strongly held opinion that a child be raised in by a married couple in a traditional family. According to the Ministry of Youth, Family and Social Affairs, adoptions are approved based on the submitted documents and a detailed study of the case. An adoption may be denied because of the age, marital status or other circumstances of the adoptive parents.

Residency Requirements: There are no residency requirements for prospective adoptive parents. However, once a child has been identified, the prospective parents will have to travel to Hungary to meet the child and, if they decide to proceed with the adoption, remain in Hungary for up to six weeks.

Time Frame: After receiving the prospective adoptive parents' application, the adoption authorities have 15 days to notify adoptive parents whether they have been approved to adopt in Hungary. Parents have 60 days to submit required documents. After prospective adoptive parents arrive to meet their child, it takes four to six weeks to complete the adoption.

Adoption Agencies and Attorneys: There are no officially accredited intercountry adoption agencies in Hungary. However, there are U.S. adoption agencies registered with the Ministry of Youth, Family and Social Affairs. Local authorities prefer to work with the registered and known agencies. Prospective adoptive parents must work directly with the Child and Youth Protection Institute (GYIVI) in the Hungarian county where the child is residing. The Embassy usually advises adoptive parents to seek the assistance of a U.S. adoption agency or a lawyer with experience in intercountry adoptions from Hungary if no friends or relatives are available to help in Hungary in the complex adoption process. Please contact the Ministry of Youth, Family and Social Affairs for information on which U.S. adoption agencies are authorized to work in Hungary.

Adoption Fees: Although there are no fees for the adoption itself, other expenses of obtaining documents and translations, and lawyers' fees, if any, can be high. For a translation of one

page a translator may collect from $40 to $140. The U.S. Embassy in Budapest is not familiar with what Hungarian attorneys charges for adoption related services.

Adoption Procedures: People who are interested in adopting children in Hungary should send their requests (a letter expressing the intention to adopt a Hungarian child) to:

Ministry for Youth, Family and Social Affairs, and Equal Opportunity
(Ifjusági, Családügyi, Szociális és Esélyegyenlõségi Minisztérium)
Akademia u. 3
Budapest 5th District
(36-1) 475-5788 or (36-1) 475-7983

Adoption requests can also be submitted through a Hungarian Consulate abroad. Please note, however, that the Consulate is required to forward the request to Budapest. Once a request for adoption is received, the adoption center has fifteen days to send the parents are sent an information packet about the necessary documents they must submit and adoption procedures. If the prospective parents fail to present the required documents within sixty days, the adoption center considers the request to adopt abandoned. Once the necessary documents are submitted, the adoption center will forward notification of registration to the adoptive parents. The documents are forwarded to the appropriate county Child and Youth Protection Institute (GYIVI). The county GYIVI will schedule an appointment for the prospective parents to travel to Hungary to meet the child. If, after meeting the child with whom they have been matched, the prospective adoptive parents agree to adopt this child, the GYIVI forwards all the documents with a recommendation to the Guardianship Office in the county where the child resides. This office has legal authority to adjudicate (approve or deny) all adoption requests. Once the final adoption decree is issued, the child must be re-registered at the birth registry of his/her place of birth. When the new birth certificate is issued, the adoptive parents submit a Hungarian passport application on behalf of the child.

The adoptive parents must be prepared to stay in Hungary during the adoption process, which may take 3-6 weeks, including the passport application. If, after meeting the child with whom they have been initially matched, the prospective adoptive parents do not wish to adopt that child, the GYIVI returns their documents to the adoption center in Budapest for further consideration.

The prospective adoptive parents' application remains valid for two years, after which time the entire registration process must be repeated.

Required Documents: In order to be placed on the national register of adoptive parents, the following documents must be submitted upon receipt of the information packet.

- Home study performed by a U.S. licensed agency or a social worker;
- Proof of income;
- Psychological evaluation of adoptive parents by a psychologist;
- Notification of I-600A approval from U.S. Citizenship and Immigration Services;
- Evidence of citizenship;
- Statement of prospective adoptive parents regarding motivation for adoption and expectations about the child (separate from the original letter of intent);
- Prospective adoptive parents' statements consenting to their registration on the national register;
- Certified copy of license of adoption agency, if applicable.

All of the documents must be original or certified copies issued within the last year, and must be accompanied by Hungarian translations authenticated by Hungarian consular officials abroad or certified translators in Hungary.

Embassy of Hungary
3910 Shoemaker Street, N.W.
Washington, D.C. 20008
Telephone (202) 362-6730
E-mail: info@huembwas.org
http://www.hungaryemb.org

Hungary also has consulates in Los Angeles and New York.

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions.*

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Additional Information: Specific questions about intercountry adoption in Hungary may be addressed to the U.S. Embassy in Budapest. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

ICELAND

Compiled from the August 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Iceland

PROFILE

Geography

Area: 103,000 sq. km. (39,600 sq. mi.); about the size of Virginia or slightly larger than Ireland.
Cities: Capital—Reykjavík (pop. 117,898). Other towns—Kópavogur (28,665), Hafnarfjörður (24,895), Akureyri (17,278).
Terrain: Rugged.
Climate: Maritime temperate.
Highest elevation: Hvannadalshnjúkur at Vatnajökull Glacier, at 2,111 meters (6,925 ft.).

People

Nationality: Noun—Icelander(s). Adjective—Icelandic.
Population: (January 1, 2008): 313,376.
Annual growth rate: (2007) 1.8%.
Ethnic groups: Relatively homogenous mixture of descendants of Norwegians and Celts.
Religions: Evangelical Lutheran, 86%.
Languages: Icelandic.
Education: Compulsory up to age 16. Attendance—99%. Literacy—99.9%.
Health: Infant mortality rate (2001-2006 average)—2.4/1,000. Life expectancy (2006)—men 79.4 years, women 83 years.
Work force: (2007, 181,500): Commerce—32.4%; manufacturing—10.2%; fishing/fish processing—4.2%; construction—8.9%; transport and communications—6.3%; agriculture—3.4%; government, education, and health—27.3%; other services—7.1%.
Unemployment: (2007) 2.3%.

Government

Type: Semi-presidential, parliamentary.
Independence: 1918 (became "sovereign state" under Danish Crown); 1944 (establishment of republic).
Constitution: 1874.
Government branches: Executive—president (head of state), prime minister (head of government), cabinet (12 ministers). Legislative—63-member unicameral parliament (Althingi). Judicial—Supreme Court, district courts, special courts.
Political subdivisions: 26 administrative districts and 79 municipalities.
Political parties: Independence (IP), Progressive (PP), Social Democratic Alliance (SDA), Left-Green Party (LGP), Liberal Party (LP).
Suffrage: Universal 18 years and above.
National holidays: June 17, anniversary of the establishment of the republic.

Economy

GDP: (2007) $19.9 billion.
GDP growth rate: (2005) 5.8%; (2006) 2.6%; (2007) 3.8%.
Per capita GDP: (2007) $64,033.
Inflation rate: (2007) 5.1%; (June 2008, 12-month change) 12.7%.
Budget: (2007) $6.3 billion; (projected 2008) $6.7 billion.
Annual budget surplus: (2006) 1.4% of GDP.
Net central government debt: (2007) 4.9% of GDP.
Natural resources: Marine products, hydroelectric and geothermal power.
Agriculture: Products—potatoes, tomatoes, cucumbers, turnips, livestock.
Industry: Types—aluminum smelting, fishing and fish processing technology, ferro-silicon alloy production, hydro and geothermal power, tourism, information technology.
Trade: Exports of goods (2007)—$4.8 billion: marine products 41.8% industrial products 38.9%, agriculture 1.1%, and miscellaneous 18.2%. Partners—EEA 78.4% (Netherlands 21.3%, Germany 13.4%, U.K. 13.2%, Ireland 7.6%, Spain 4.6%, Norway 3.8%, Denmark 3.3%); U.S. 5.3% ($250 million); Japan 4.2%. Imports (2007)—$6.7 billion: industrial supplies 26.7%; capital goods, parts, accessories 21.5%; consumer goods 15.7%; transport equipment 20.5%; food and beverages 6.8%; fuels and lubricants 8%. Partners—EEA 64.6% (Germany 12.1%, Sweden 10%, Denmark 7.4%, Netherlands 5.6%, U.K.

5.4%, Norway 4.6%, Italy 3.4%); U.S. 13.5% ($208 million); China 5.1%; Japan 4.7%.

GEOGRAPHY

Iceland is a volcanic island in the North Atlantic Ocean east of Greenland and immediately south of the Arctic Circle. It lies about 4,200 kilometers (2,600 mi.) from New York and 830 kilometers (520 mi.) from Scotland. About 79% of Iceland's land area, which is of recent volcanic origin, consists of glaciers, lakes, a mountainous lava desert (highest elevation 2,000 meters—6,590 ft.—above sea level), and other wasteland. About 28% of the land is used for grazing, and 1% is cultivated. The inhabited areas are on the coast, particularly in the southwest where about 60% of the population lives. Because of the Gulf Stream's moderating influence, the climate is characterized by damp, cool summers and relatively mild but windy winters. In Reykjavík, the average temperature is 11°C (52°F) in July and -1°C (30°F) in January.

PEOPLE

Most Icelanders are descendants of Norwegian settlers and Celts from the British Isles, and the population is remarkably homogeneous. According to Icelandic Government statistics, 93% of the nation's inhabitants live in urban areas (localities with populations greater than 200) and about 60% live in the Reykjavík metropolitan area. Of the Nordic languages, the Icelandic language is closest to the Old Norse language and has remained relatively unchanged since the 12th century. About 91% of the population belongs to the state church, the Evangelical Lutheran Church, or other Lutheran Churches. However, Iceland has complete religious liberty, and about 20 other religious congregations are present.

Most Icelandic surnames are based on patronymy, or the adoption of the father's first given name. For example, Magnus and Anna, children of a man named Pétur, would hold the surname Pétursson and Pétursdóttir, respectively. Magnus' children, in turn, would inherit the surname Magnusson, while Anna's children would claim their father's first given name as their surname. Women normally maintain their original surnames after marriage. This system of surnames is required by law, except for the descendants of those who had acquired family names before 1913.

Most Icelanders, while reserved by nature, rarely call each other by their surnames, and even phone directories are based on first names. Because of its small size and relative homogeneity, Iceland holds all the characteristics of a very close-knit society.

Cultural Achievements

The Sagas, almost all written between 1180 and 1300 A.D., remain Iceland's best-known literary accomplishment, and they have no surviving counterpart anywhere in the Nordic world. Based on Norwegian and Icelandic histories and genealogies, the Sagas present views of Nordic life and times up to 1100 A.D. The Saga writers sought to record their heroes' great achievements and to glorify the virtues of courage, pride, and honor, focusing in the later Sagas on early Icelandic settlers. The best-known Icelandic writer of the 20th century is the 1955 Nobel Prize winner Halldór Kiljan Laxness. The literacy rate is 99.9%, and literature and poetry are a legendary passion with the population. Per capita publication of books and magazines is the highest in the world.

Unlike its literature, Iceland's fine arts did not flourish until the 19th century because the population was small and scattered. Iceland's most famous painters are Ásgrímur Jónsson, Jón Stefánsson, and Jóhannes Kjarval, all of whom worked during the first half of the 20th century. The best-known modern sculptor, Ásmundur Sveinsson (1893-1982), drew his inspiration from Icelandic folklore and the Sagas for many of his works. Today, Kristján Jóhannsson is Iceland's most famous opera singer, while pop singer Björk and progressive rock band Sigur Rós are well known internationally.

HISTORY

Iceland was settled in the late 9th and early 10th centuries, principally by people of Norse origin. In 930 A.D., the ruling chiefs established a republican constitution and an assembly called the Althingi (Alþingi) the oldest parliament in the world. Iceland remained independent until 1262, when it entered into a treaty establishing a union with the Norwegian monarchy. Iceland passed to Denmark in the late 14th century when Norway and Denmark were united under the Danish crown.

In the early 19th century, national consciousness revived in Iceland. The Althingi had been abolished in 1800 but was reestablished in 1843 as a consultative assembly. In 1874, Denmark granted Iceland limited home rule, which was expanded in scope in 1904.

The constitution, written in 1874, was revised in 1903, and a minister for Icelandic affairs, residing in Reykjavík, was made responsible to the Althingi. The Act of Union, a 1918 agreement with Denmark, recognized Iceland as a fully sovereign state united with Denmark under a common king. Iceland established its own flag, but Denmark continued to represent Icelandic foreign affairs and defense interests.

German occupation of Denmark in 1940 severed communications between Iceland and Denmark. Consequently, Iceland moved immediately to assume control over its own territorial waters and foreign affairs. In May 1940, British military forces occupied Iceland. In July 1941, responsibility for Iceland's defense passed to the United States. Following a plebiscite, Iceland formally became an independent republic on June 17, 1944. In October 1946, the Icelandic and U.S. Governments agreed to terminate U.S. responsibility for the defense of Iceland, but the

United States retained certain rights at Keflavík. Iceland became a charter member of the North Atlantic Treaty Organization (NATO) in 1949. After the outbreak of hostilities in Korea in 1950, and pursuant to the request of NATO military authorities, the United States and Iceland agreed that the United States should again make arrangements for Iceland's defense.

A bilateral defense agreement signed on May 5, 1951, remains in force, even though the U.S. military forces are no longer permanently stationed in Iceland. Iceland is the only NATO country with no standing military of its own.

GOVERNMENT

The president, elected to a 4-year term, has limited powers. When Iceland became a republic in 1944, the post of president was created to fill the void left by the Danish king. Although the president is popularly elected and has limited veto powers (he can force a public referendum on a proposed law by refusing to sign it—a power that has only once been exercised), the expectation is that the president should play the same limited role as a monarch in a traditional parliamentary system.

The prime minister and cabinet exercise most executive functions. The parliament is composed of 63 members, elected every 4 years unless it is dissolved sooner. Suffrage for presidential and parliamentary elections is universal for those 18 and older, and members of the parliament are elected on the basis of parties' proportional representation in six constituencies. The judiciary consists of the Supreme Court, district courts, and various special courts. The constitution protects the judiciary from infringement by the other two branches.

Principal Government Officials

Last Updated: 11/12/08

President: **Olafur GRIMSSON**
Prime Minister: **Geir H. HAARDE**
Min. of Commerce: **Bjorgvin SIGURDSSON**

Min. of Communication & Transport: **Kristjan MOLLER**
Min. of Education, Culture, Research & Development: **Thorgedur Katrin GUNNARSDOTTIR**
Min. of Environment: **Thorunn SVEINBJARNADOTTIR**
Min. of Finance: **Arni M. MATHIESEN**
Min. of Fisheries & Agriculture: **Einar K. GUDFINNSSON**
Min. of Foreign Affairs & External Trade: **Ingibjorg Solrun GISLADOTTIR**
Min. of Health & Social Security: **Gudlaugur Thor THORDARSON**
Min. of Industry: **Ossur SKARPHEDINSSON**
Min. of Justice & Church Affairs: **Bjorn BJARNASON**
Min. of Social Affairs: **Johanna SIGURDARDOTTIR**
Dir., Central Bank of Iceland: **David ODDSSON**
Ambassador to the US: **Albert JONSSON**
Permanent Representative to the UN, New York: **Hjalmar HANNESSON**

Iceland maintains an embassy in the United States at 1156 - 15th Street, NW, Suite 1200, Washington, DC 20005 [tel. (202) 265-6653], and a consulate general at 800 Third Ave, 36th floor, New York, NY 10022 [tel. (212) 593-2700]. Iceland also has 25 honorary consulates in major U.S. cities.

POLITICAL CONDITIONS

Iceland's current government coalition was formed after the May 2007 parliamentary elections by the conservative Independence Party (IP) and the center-left Social Democratic Alliance. The two parties hold a large majority in parliament, with 43 out of 63 seats.

The current government replaced a coalition of the Independence Party and the Progressive Party (PP) that had been in power since 1995. Longtime IP leader Davíð Oddsson was Prime Minister 1991-2004, making him the longest-serving prime minister in Europe (from 1991 to 1995, the IP was in coalition with the Social Democratic Party). PP chairman and former Foreign Minister Halldór Ásgrímsson took over as Prime Minister on September 15, 2004, as part of a post-election deal with the Independence Party, and Oddsson became Foreign Minister. Oddsson retired from his ministerial position September 27, 2005, with former Finance Minister Geir Haarde becoming Foreign Minister. Oddsson also announced his intention shortly to step down as IP chairman, with Haarde elected to the post at a party national conference in October. In early June 2006 Ásgrímsson announced his withdrawal from politics as Prime Minister, parliamentarian, and chairman of the Progressive Party. Haarde became the third Prime Minister during the current electoral term on June 15, 2006, and Valgerður Sverrisdóttir (Progressive Party) took over as Foreign Minister. In May 2007 the Independence Party and the Social Democratic Alliance formed a new government after an abysmal showing by the Progressive Party. Geir Haarde continued as Prime Minister, and the chairman of the Social Democratic Alliance, Ingibjörg Sólrún Gísladóttir, took over the reins at the Ministry for Foreign Affairs.

The centrist agrarian Progressive Party has been a party to government for over 30 years in the past 4 decades. Its support dropped from 23% in the 1995 parliamentary election to 12% in 2007. The party has dealt with internal instability in the past few years, and power struggles have lead to frequent change in the party's leadership. Chairman Jón Sigurðsson stepped down after the 2007 elections and was replaced by the deputy chairman, Guðni Águstsson.

Three left-wing parties—the Social Democratic Party, the People's Alliance, and the Women's List—formed an electoral coalition prior to the 1999 parliamentary election in the hope of mounting a credible challenge to the long-dominant Independence Party. But the dream of creating a united left coalition failed when disaffected leftists formed a new splinter party called the Left Green Movement, led by former deputy People's Alliance leader Steingrímur Sigfusson. With this defection, the left coalition won a disappointing 27% of the vote (17 seats) in the 1999 election, four percentage points below what the three parties had won running separately in 1995. Their 31% (20 seats) showing in 2003 recaptured this ground but did not suffice to topple the government. The Left Greens won a respectable 9% of the vote (5 seats) in 2003, but in the 2007 election they improved significantly, with 14% of the total vote (9 seats). Another new faction, the Liberal Party, won just over 7% (4 seats) in 2003 based on its strong opposition to the current fishing management system, and clung to roughly 6% in 2007.

Despite the poor electoral showing in 1999, the three left-wing parties decided to merge formally in 2000, creating a new party, the Social Democratic Alliance, led by Ingibjörg Sólrún Gísladóttir. The party has found it difficult to reconcile the widely varying foreign policy views of its members, which range from strong support for NATO membership to pacifism and a desire for neutrality.

Iceland's current President is Ólafur Ragnar Grímsson, a former political science professor who led the far-left People's Alliance in 1987-95 and served as Finance Minister in 1988-91. Although Grímsson won office with only a 41% plurality in 1996, he was not challenged for re-election in 2000. This follows a well-established tradition of giving deference to sitting presidents. He was re-elected again on June 26, 2004. Once in office, a president can generally count on serving as many terms as he or she likes, assuming good behavior. Reflecting the belief that the president is "above politics," presidential candidates run for election as individuals—since 1952, political parties have played no role in nominating or endorsing candidates. President Grímsson has occasionally drawn criticism that he breaches the bounds of presidential etiquette by being too outspoken on sensitive political issues.

ECONOMY

Traditionally marine products have accounted for the majority of Iceland's exports of goods, but for the first time ever, in 2008 aluminum exports will exceed marine product exports. Other important exports include ferro-silicon alloys, equipment and electronic machinery for fishing and fish processing, and pharmaceuticals. The vast majority of Iceland's exports go to the European Union (EU) and the European Free Trade Association (EFTA) countries, followed by the United States and Japan. The U.S. is by far the largest foreign investor in Iceland. Iceland's relatively liberal trading policy was strengthened by accession to the European Economic Area in 1994 and by the Uruguay Round agreement, which also brought significantly improved market access for Iceland's exports, particularly seafood products. The agricultural sector, however, remains heavily subsidized and protected. Iceland became a full member of the European Free Trade Association in 1970 and entered into a free trade agreement with the European Community in 1973. Under the European Economic Area agreement, which took effect January 1, 1994, there is basically free cross-border movement of capital, labor, goods, and services between Iceland, EU, and EEA countries.

Iceland's economy was historically prone to inflation due to periods of rapid growth and its dependence on a few key export sectors, such as fish, which could fluctuate significantly in quantity and price from one year to the next. For example, inflation exceeded 43% in 1974 and 59% in 1980, before falling to 15% in 1987, and then rising to 30% in 1988, which resulted in devaluations of the krona. In the 1990s and continuing until 2006, Iceland experienced several years of strong economic growth, thanks to economic reforms, deregulation, and low inflation, averaging around 4%. The economy suffered a setback in spring 2006 when credit rating agencies and other international financial firms released a number of reports raising questions about the activities and stability of Iceland's major banks and the state of the Icelandic economy. These reports were widely covered in the international financial press, causing a marked drop in the value of shares listed on the Icelandic stock exchange and of the Icelandic krona. The market recovered as reforms were made in the banking sector. The financial sector was hit hard by the global credit crisis beginning in 2007. Although Icelandic banks had limited sub-prime mortgage market exposure, they were affected by the general lack of available capital. In the first six months of 2008, the Icelandic krona was devalued by 30% and inflation rose to nearly 12%. Because of Iceland's high current account deficit, high inflation, and high private sector debt levels, the global financial community and the foreign media closely monitored the situation. In turn, the Icelandic Government has carefully followed foreign confidence in the Icelandic economy because access to foreign capital, which Icelandic business people have used aggressively in overseas investments, is extremely important. Wealthy Icelanders have heavily invested in the retail and real estate markets in Denmark and the U.K. and telecom, pharmaceutical, banking, and financial sectors in Eastern Europe. Their success, beginning in the late 1990s, created for the first time a "super-rich" elite in Icelandic society.

Iceland has few proven mineral resources, but has abundant hydroelectric and geothermal energy resources. These clean energy sources provide for nearly 100% of electricity generation and home heating. Iceland's energy resources support power-intensive export industries, such as aluminum smelting. The Kárahnjúkar hydroelectric project is the largest single electrical station in the country, with capacity of 690 megawatts (mw). Other major hydroelectric stations include Búrfell (270 mw), Hrauneyjarfoss (210 mw), Sigalda (150 mw), and Blanda (150 mw). Iceland-based Nordural Aluminum is a wholly owned investment of Century Aluminum of Monterey, California. The plant employs more than 450 people and recently expanded its production capacity to 220,000 tons per year. A new smelter owned by Alcoa, another U.S.-owned aluminum company, began operations in June 2007 and will have a production capacity of 346,000 tons per year when fully operational. The Kárahnjúkar hydroelectric power plant, completed in early 2007, was built to provide power to the Alcoa smelter. Over $2 billion was invested to build the power plant and smelter, making the combined project the largest in Icelandic history.

Iceland has no railroads. Organized road building began about 1900 and has greatly expanded in the past decade. The current national road system connects most of the population centers along the coastal areas and consists of about 13,000 kilometers (8,125 mi.) of roads, of which about 4,800 kilometers (2,982 mi.) are paved. Regular air and sea service connects Reykjavík with the other main population centers.

DEFENSE

The U.S. and Iceland signed a bilateral agreement in 1951 stipulating that the U.S. would make arrangements for Iceland's defense on behalf of NATO and providing for basing rights for U.S. forces in Iceland. In March 2006 the U.S. announced it would continue to provide for Iceland's defense but without permanently basing forces in the country; Naval Air Station Keflavik closed in September 2006 after 55 years. The Government of Iceland expressed disappointment, and even opposition politicians opposed to the U.S. military presence criticized the manner of the closing, but bilateral discussions ensued to explore new ways of ensuring the country's security, with an emphasis on a "visible defense." Negotiations concluded with a Technical Agreement on base closure issues (e.g., facilities return, environmental cleanup, residual value) signed on September 29, 2006, and a "Joint Understanding" on future bilateral security cooperation (focusing on defending Iceland and the North Atlantic region against emerg-

ing threats such as terrorism and trafficking) signed by the Secretary of State, Prime Minister Haarde and Foreign Minister Sverrisdóttir in Washington on October 11, 2006. The U.S. also cooperated with local officials to mitigate the impact of job losses at the Air Station, notably by encouraging U.S. investment in industry and tourism development in the Keflavík area. The Government of Iceland announced in spring 2007 that a large portion of the former base site would be converted into the university-level "Atlantic Center of Excellence" with operations scheduled to begin in fall 2007.

Cooperative activities in the context of the new agreements began almost immediately, with the arrival of the amphibious ship USS Wasp in Reykjavík on October 12, 2006 (the first U.S. Navy port visit since 2002) to demonstrate the Navy's rapid reaction capability and to support counterterrorism training by units of Iceland's Coast Guard and police. In November 2006 a U.S. Navy P-3 patrol aircraft arrived at Keflavík for joint search and rescue, disaster surveillance, and maritime interdiction training. Northern Viking 2007, a U.S.-led air defense exercise, took place in August 2007, and planning for subsequent joint endeavors is underway.

The 2008 budget for the Government of Iceland is the first in the country's history to include funding for defense ($8.2 million); the money is earmarked for support of cooperative defense activities, military exercises in Iceland, and maintenance of defense-related facilities. This funding is in addition to roughly $12 million in new expenditures for the operation of the Iceland Air Defense System radar sites, which the United States handed over to Iceland on August 15, 2007.

The Government of Iceland contributes financially to NATO's international overhead costs and recently has taken a more active role in NATO deliberations, planning, and peacekeeping. Iceland hosted the NATO Foreign Ministers' Meeting in Reykjavík in June 1987 and again in May 2002. Iceland hosted the NATO Military Committee in April 2007 and hosted the NATO Parliamentary Assembly in October 2007.

FOREIGN RELATIONS

Iceland maintains diplomatic and commercial relations with practically all nations, but its ties with other Nordic states, with the U.S., and with the other NATO member states are particularly close. Icelanders remain especially proud of the role Iceland played in hosting the historic 1986 summit in Reykjavík between President Reagan and Soviet leader Gorbachev, which set the stage for the end of the Cold War.

Iceland has greatly increased its international profile since the early 1990s. Since the mid-1990s, Iceland has opened a number of missions overseas for a total of 22, including an embassy in Beijing, giving Iceland a diplomatic presence in all five permanent member countries of the UN Security Council. Not coincidentally, it has announced its candidacy to serve on the UN Security Council in 2009-2010. In the past few years, Iceland has also established missions to the Council of Europe in Strasbourg and to the Organization for Security and Cooperation in Vienna. In 1998, it bolstered its delegation to NATO, assigning a permanent representative to the military committee for the first time ever.

Notwithstanding its status as an unarmed nation, Iceland has been eager to do its part to contribute to the maintenance of international peace and security. One of the niches it is helping to fill is in civilian peacekeeping and crisis management. It took a significant step forward in this area in 2001 by launching its Icelandic Crisis Response Unit (ICRU). In setting up the ICRU, the Ministry for Foreign Affairs established a roster of over 100 experts in various occupations (police officers, nurses, doctors, lawyers, engineers, journalists, etc.) who will be specially trained and prepared to deploy to trouble spots abroad on short notice.

Peacekeeping has been a permanent item in the Icelandic state budget since 1994, and Iceland has been an active member of the UN Peacekeeping Committee since 1997. With the formal establishment of the ICRU, the government decided to increase the number of deployed peacekeepers to 50 by 2006. The key emerging niche capability of the ICRU is airport administration following the successful management of the airport in Pristina, Kosovo, in 2003 and of the airport in Kabul, Afghanistan, in 2004-2005.

Icelanders have a strong emotional bond with the Baltic states, and Iceland prides itself on being the first country to have recognized these countries' claim for independence in 1991.

Membership in International Organizations

Iceland is a member of the following organizations: Arctic Council, Barents Euro-Arctic Council; Council of Baltic Sea States; Council of Europe; European Economic Area; European Free Trade Organization; EFTA Court; EFTA Surveillance Authority; North Atlantic Treaty Organization; Organization for Security and Cooperation in Europe; Organization for Economic Cooperation and Development; International Criminal Police Organization; International Council for the Exploration of the Sea; International Hydrographic Organization; International Maritime Satellite Organization; International Union for the Publication of Custom Tariffs; Nordic Council; North-East Atlantic Fisheries Commission; North Atlantic Salmon Conservation Organization; the International Whaling Commission; and the North Atlantic Marine Mammal Commission. It also is a member of the United Nations and most of its related organizations, specialized agencies, and commissions, including the International Monetary Fund, World Trade Organization, World Tourism Organization, Food and Agricultural Organization, International Atomic Energy Agency, International Civil Aviation Organization, International Fund for Agri-

cultural Development; Industrial Development Organization; International Labor Organization, International Maritime Organization, International Telecommunications Union, UN Educational, Scientific, and Cultural Organization, Universal Postal Union, World Health Organization, and World Meteorological Organization; World Intellectual Property Organization; International Bank for Reconstruction and Development; International Development Association; International Finance Corporation Multilateral Investment Guarantee Agency and International Center for Settlement of Investment Disputes; UN Conference on Disarmament; Economic Commission for Europe; UN High Commissioner for Refugees; Office for the High Commissioner for Human Rights; Commission of Human Rights; UN Conference on Trade and Development.

U.S.-ICELANDIC RELATIONS

U.S. policy aims to maintain close, cooperative relations with Iceland, both as a NATO ally and as a friend interested in the shared objectives of enhancing world peace; respect for human rights; economic development; arms control; and law enforcement cooperation, including the fight against terrorism, narcotics, and human trafficking. Moreover, the United States endeavors to strengthen bilateral economic and trade relations.

TRAVEL

Consular Information Sheet

November 17, 2008

Country Description: Iceland is a highly developed, stable democracy with a modern economy. The national language is Icelandic, but English is widely spoken, especially in the capital city of Reykjavik.

Entry Requirements: Iceland is a party to the Schengen agreement. As such, U.S. citizens may enter Iceland for up to 90 days for tourist or business purposes without a visa. The passport should be valid for at least three months beyond the period of stay. For further details about travel into and within Schengen countries, please see our fact sheet. For further information in English concerning entry requirements for Iceland, please contact the Icelandic Directorate of Immigration via their web site at www.utl.is.

Safety and Security: There have been no terrorist attacks and very few criminal attacks affecting Americans in Iceland. However, like other countries in the Schengen area, Iceland's open borders with its Western European neighbors allow the possibility of terrorists or other criminals entering/exiting the country with anonymity. Americans are reminded to remain vigilant with regard to their personal security and to exercise caution.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State Bureau of Consular Affair's Internet site, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll-free in the United States, or, for callers outside the United States and Canada, a regular toll line at 1-202-501-4444.

Crime: Iceland has a relatively low crime rate, but minor assaults, automobile break-ins and other street crimes do occur, especially in the capital city of Reykjavik. Tourists should be aware that downtown Reykjavik can become especially disorderly in the early morning hours on weekends. Violent crime is rare, but it does occasionally occur.

Information for Victims of Crime: The loss or theft of a U.S. passport abroad should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. Iceland maintains a limited crime victim's assistance program through the Ministry of Justice. Please contact the U.S. Embassy in Reykjavik for further details. Those suffering psychological trauma or victims of rape may receive psychological assistance by contacting the University of Iceland's Hospital Psychological Trauma Center at 354-543-2000.

The local equivalent to the "911" emergency line in Iceland is: 112.

Medical Facilities and Health Information: Excellent medical facilities are available in Iceland. To obtain emergency medical assistance anywhere in the country, dial 112. To obtain non-emergency medical assistance in the Reykjavik metropolitan area dial 544-4114 during business hours and outside of normal business hours, dial 1770. The nurse who answers will offer advice on how to handle the problem, suggest that the patient come to an after-hours clinic, or send a physician to make a house call. For information on after-hours dental care, call 575-0505.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Iceland.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad, consult the World Health Organization's web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: Most medical services in Iceland, including emergency care, require full payment at the time of service. Payment to the medical facility must be paid in full before an individual will be able to leave the country. The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. Additional travel insurance to cover the price of medical evacuations is also strongly recommended.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Iceland is provided for general reference only, and may not be completely accurate in a particular location or circumstance.

Less than a third of Iceland's total road network is paved (2,262 miles of paved road vs. 5,774 miles of gravel or dirt road). Most of the 900-mile ring road (Highway 1) that encircles the country is paved, but many other roads outside the capital, especially those that run through the center of the country, are dirt or gravel tracks. Even those roads that are paved tend to be narrow and lack a shoulder or margin. Most bridges are only one lane wide, requiring drivers to be cognizant of oncoming traffic.

Extreme care should be taken when driving in rural areas during the winter (October through March), when daylight hours are limited and the weather and road conditions can change rapidly. Many routes in the interior of the country are impassable until July, due to muddy conditions caused by snowmelt. When driving in the interior, consider traveling with a second vehicle and always inform someone of your travel plans. For information on current road conditions throughout the country, please call the Public Roads Administration (Vegagerdin) at 1777 or consult its web site at http://www.vegagerdin.is/english.

For recorded weather information in English, call the Icelandic Weather Office (Vedurstofa Islands) at 902-0600, press 1 for English.

Icelandic law requires drivers to keep headlights on at all times. Talking on cell phones while driving is prohibited except when using a hands-free system, and is subject to a 5000 Icelandic Kronur fine. Unless otherwise posted, the speed limit is 50 km/h in urban areas and 30 km/h in residential areas. In rural areas, the speed limit depends on the type of road. On dirt and gravel roads, the speed limit is 80 km/h. On paved highways, the speed limit is 90 km/h. It is illegal to turn right on a red light. At four-way intersections, the right of way goes to the driver on the right; in traffic circles, to drivers in the inside lane. Many intersections in the capital have automatic cameras to catch traffic violators.

The use of seatbelts is mandatory in both the front and rear seats, and children under the age of six must be secured in a special car seat designed for their size and weight. Drivers are held responsible for any passenger under the age of 15 who is not wearing a seatbelt. No one who is less than 140 centimeters tall, weighs less than 40 kilograms, or is under the age of 12 is allowed to ride in a front seat equipped with an airbag.

Driving under the influence of alcohol is considered a serious offense in Iceland. The threshold blood alcohol test (BAT) level is very low. Drivers can be charged with DWI with a BAT as low as.05%. Drivers stopped under suspicion for DWI are usually given a "balloon" or Breathalyzer test. If the test is positive, a blood test is routinely administered. Under Icelandic law, a blood test cannot be refused and will be administered by force if necessary. The minimum punishment for a first offense is a fine of 50,000 Icelandic Kronur and the loss of driving privileges for two months.

U.S. citizens spending less than 90 days in Iceland may drive using their U.S. licenses.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Iceland's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Iceland's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Extreme care should be exercised when touring Iceland's numerous nature attractions, which include glaciers, volcanic craters, lava fields, ice caves, hot springs, boiling mud pots, geysers, waterfalls, and glacial rivers. There are few warning signs or barriers to alert travelers to potential haz-

ards. Several tourists are scalded each year because they get too close to an erupting geyser, or because they fall or step into a hot spring or boiling mud pot. High winds and icy conditions can exacerbate the dangers of visiting these nature areas. Hikers and backpackers are well advised to stay on marked trails, travel with someone, notify a third party about their travel plans and check weather reports, as there are often no means of communication from remote locations. This is especially important as weather conditions in Iceland are subject to frequent and unexpected changes. Those planning visits to dangerous or remote locations in Iceland are strongly encouraged to register with the U.S. Embassy before beginning their journey and to leave a travel itinerary with local guides/officials if planning to trek through remote parts of the country.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.

Persons violating Icelandic laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use or trafficking in illegal drugs in Iceland are strict, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Disaster Preparedness: Iceland is subject to natural disasters in the form of earthquakes, volcanic eruptions, avalanches and violent storms. Travelers should learn how to prepare for and react to such events by consulting the web site of Iceland's National Civil Defense Agency at http://www.almannavarnir.is. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living in or visiting Iceland are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, and to obtain updated information on travel and security within Iceland.

Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at Laufasvegur 21, tel. +354-562-9100; fax +354-562-9110. Information about consular services can be found in the Consular section of the Embassy home page at http://iceland.usembassy.gov.

Intercountry Adoption

June 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding.

Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Prospective adoptive parents must be resident in Iceland to adopt. This flyer describes how to get pre-approved in Iceland to adopt in a third country.

Patterns of Immigration: Recent U.S. immigrant visa statistics indicate that only one immigrant visa was issued to an Icelandic orphan in the last five years.

Adoption Authority:

The Ministry of Judicial and Ecclesiastical Affairs
Arnarhvall on Lindargata
150 Reykjavik, Iceland
Tel: 011-354-560-9010
Fax: 011-354-552-7340
E-mail: postur@dkm.stjr.is
Homepage: www.stjr.is

Eligibility Requirements for Adoptive Parents:

- Applicants must be at least 25 years old, but not more than 45 years old;
- Good mental and physical state;
- Do not have a criminal record;
- Can financially support a family;
- Married couples or a male and a female that have lived together in a proxy marriage (cohabitation registered with the National Registry) for at least 5 years can adopt together;
- One of the married individuals or a male/female in a proxy marriage can adopt the partner's child or foster child with the partner's permission;
- One of the married individuals or a male/female in a proxy marriage can adopt a child without the partner's permission if the partner has vanished or his/her mental state would impede the adoption process;
- Individuals can adopt children in special circumstances and if the adoption benefits the welfare of the child.

Residency Requirements: Under the 1999 Adoption Act (Law no. 130), only foreigners who are resident in Iceland or "have a special connection to the country" are allowed to adopt children in Iceland.

Time Frame: The pre-approval processs, described below, will take three to six months. The length of time to adopt in a third country will depend on the child's country of origin.

Adoption Agencies and Attorneys: Íslensk Ættleiðing (Icelandic Adoption Society) is the only adoption agency in Iceland. Please see their website (only in Icelandic): http://www.isadopt.is.

Adoption Fees: The pre-approval certificate that is issued to prospective adoptive parents costs IKR. 2.250.00. Prospective adoptive parents can expect to pay for services pertaining to adoption in a third country.

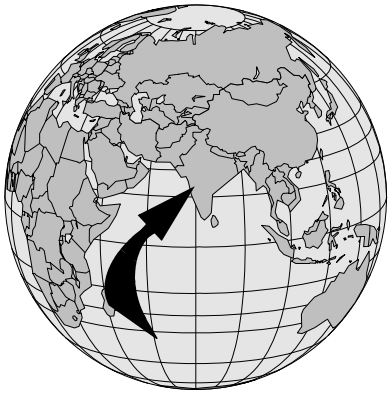
Adoption Procedures: The first step to adopt a child is to apply for a pre-approval from the Ministry of Judicial and Ecclesiastical Affairs. Applicants can get the application forms on their website. Then they return the forms to Íslensk Ættleiðing (Icelandic Adoption Society -IAS) and the agency will send the forms to the Ministry and attach necessary documents.

The application with attached documents is sent to the Ministry of Judicial and Ecclesiastical Affairs which then asks the social services and the child protection agency in the applicants' home town to give a report about the applicant's home and family environment. An employee from social services will contact the applicant and do a home study. This report is sent to the ministry which will take the decision based on this report. If the pre-approval is granted, then it is sent in English to IAS and the applicant gets a copy. The approval notice, which is valid for two years, will state that the applicant is permitted to adopt a child from a specific third country.

Required Documents:

- Application for pre-approval, Ministry of Judicial and Ecclesiastical Affairs, Skuggasundi, 150 Reykjavík. Telephone: 354-545-9000. Opening hours: Mon-Fri. 8:30—16.00;
- Birth certificate from applicant;
- Information about applicant on this form. (Re Application For Permission to Adopt. Re Application for Pre-Approval);
- Marriage certificate or certificate that proves proxy marriage of applicant;
- Certificate from the National Registry to show how long applicants have been living together. Marriage must have lasted at least one year and Proxy Marriage at least five years. The certificate can be sought at the National Registry in Iceland, Borgartúni 21a, 104 Reykjavík. Telephone: 354-569-2900;
- Police certificates from countries prospective adoptive parents resided for 3 months after the age of 16;
- Information about the applicant's health on the Information on Health Re application for Pre-Approval to Adopt a Child form;
- Doctors certificate for the adopting parent. Here you can get the Medical Certificate for Prospective Adoption Parent form, needs to be filled out by a doctor and the applicant;
- Certified copy of tax returns for the last two years;

The documents referenced above can be sought in Icelandic at:



Embassy of Iceland
1156 15th Street N.W., Suite 1200
Washington, D.C. 20005-1704
Tel.: (202) 265 6653
E-mail: icemb.wash@mfa.is
http://www.iceland.org/us

Iceland also has a Consulate General in New York and honorary consulates around the United States.

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children,* as well as the Department of State publication, *Intercountry Adoptions.* Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy
Laufasvegur 21,
101 Reykjavik, Iceland
Tel: (354) 562-9100
E-mail: reykjavikconsular@state.gov

Additional Information: Specific questions about adoption in Iceland may be addressed to the U.S. Embassy in Reykjavik. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

INDIA

Compiled from the January 2009 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of India

PROFILE

Geography

Area: 3.29 million sq. km. (1.27 million sq. mi.); about one-third the size of the U.S.

Cities: Capital—New Delhi (pop. 12.8 million, 2001 census). Other major cities—Mumbai, formerly Bombay (16.4 million); Kolkata, formerly Calcutta (13.2 million); Chennai, formerly Madras (6.4 million); Bangalore (5.7 million); Hyderabad (5.5 million); Ahmedabad (5 million); Pune (4 million).

Terrain: Varies from Himalayas to flat river valleys and deserts in the west.

Climate: Alpine to temperate to subtropical monsoon.

People

Nationality: Noun and adjective—Indian(s).

Population: (2007) 1.14 billion; urban 27.8%.

Annual growth rate: 1.3%

Population density: 324/sq. km.

Ethnic groups: Indo-Aryan 72%, Dravidian 25%, others 3%. While the national census does not recognize racial or ethnic groups, it is estimated that there are more than 2,000 ethnic groups in India.

Religions: Hindu 81.4%, Muslim 12.4%, Christian 2.3%, Sikh 1.9%, other groups including Buddhist, Jain, Parsi within 1%.

Languages: Hindi, English, and 16 other official languages.

Education: Years compulsory—none. Literacy—64.84%.

Health: Infant mortality rate—34.61/1,000. Life expectancy—68.59 years (2007 est.).

Work force: (est.) 450 million. Agriculture—60%; industry and commerce—18%; services and government—22%

Government

Type: Federal republic.

Independence: August 15, 1947.

Constitution: January 26, 1950.

Government branches: Executive—president (chief of state), prime minister (head of government), Council of Ministers (cabinet). Legislative—bicameral parliament (Rajya Sabha or Council of States, and Lok Sabha or House of the People). Judicial —Supreme Court.

Political parties: Indian National Congress (INC), Bharatiya Janata Party (BJP), Communist Party of India-Marxist, and numerous regional and small national parties.

Political subdivisions: 28 states (including Jammu and Kashmir), 7 union territories.

Suffrage: Universal over 18.

Economy

GDP: (FY 2007) $1 trillion ($1,000 billion).

Real growth rate: (2006-2007 est.) 9.4%.

Per capita GDP: (FY 2006-2007) $909.

Natural resources: Coal, iron ore, manganese, mica, bauxite, chromite, thorium, limestone, barite, titanium ore, diamonds, crude oil.

Agriculture: (18% of GDP) Products—wheat, rice, coarse grains, oilseeds, sugar, cotton, jute, tea.

Industry: 27% of GDP. Products—textiles, jute, processed food, steel, machinery, transport equipment, cement, aluminum, fertilizers, mining, petroleum, chemicals, and computer software.

Services and transportation: 55% of GDP.

Trade: Exports (FY 2006-2007)—$127 billion; engineering goods, petroleum products, precious stones, cotton apparel and fabrics, gems and jewelry, handicrafts, tea. Software exports—$22 billion. Imports (FY 2006-2007)—$192 billion; petroleum, machinery and transport equipment, electronic goods, edible oils, fertilizers, chemicals, gold, textiles, iron and steel. Major trade partners—U.S., China, EU, Russia, Japan.

PEOPLE

Although India occupies only 2.4% of the world's land area, it supports over 15% of the world's population. Only China has a larger population. India's median age is 25, one of the youngest among large economies. About 70% live in more than 550,000 villages, and the remainder in more than 200 towns and cities. Over the thousands of years of its history, India has been invaded from the Iranian plateau, Central Asia, Arabia, Afghanistan, and the West; Indian people and culture have absorbed and modified these influences to produce a remarkable racial and cultural synthesis.

Religion, caste, and language are major determinants of social and political organization in India today. However, with more job opportunities in the private sector and better chances of upward social mobility, India has begun a quiet social transformation in this area. The government has recognized 18 official languages; Hindi, the national language, is the most widely spoken, although English is a national lingua franca. Although 81% of its people are Hindu, India also is the home of more than 138 million Muslims—one of the world's largest Muslim populations. The population also includes Christians, Sikhs, Jains, Buddhists, and Parsis.

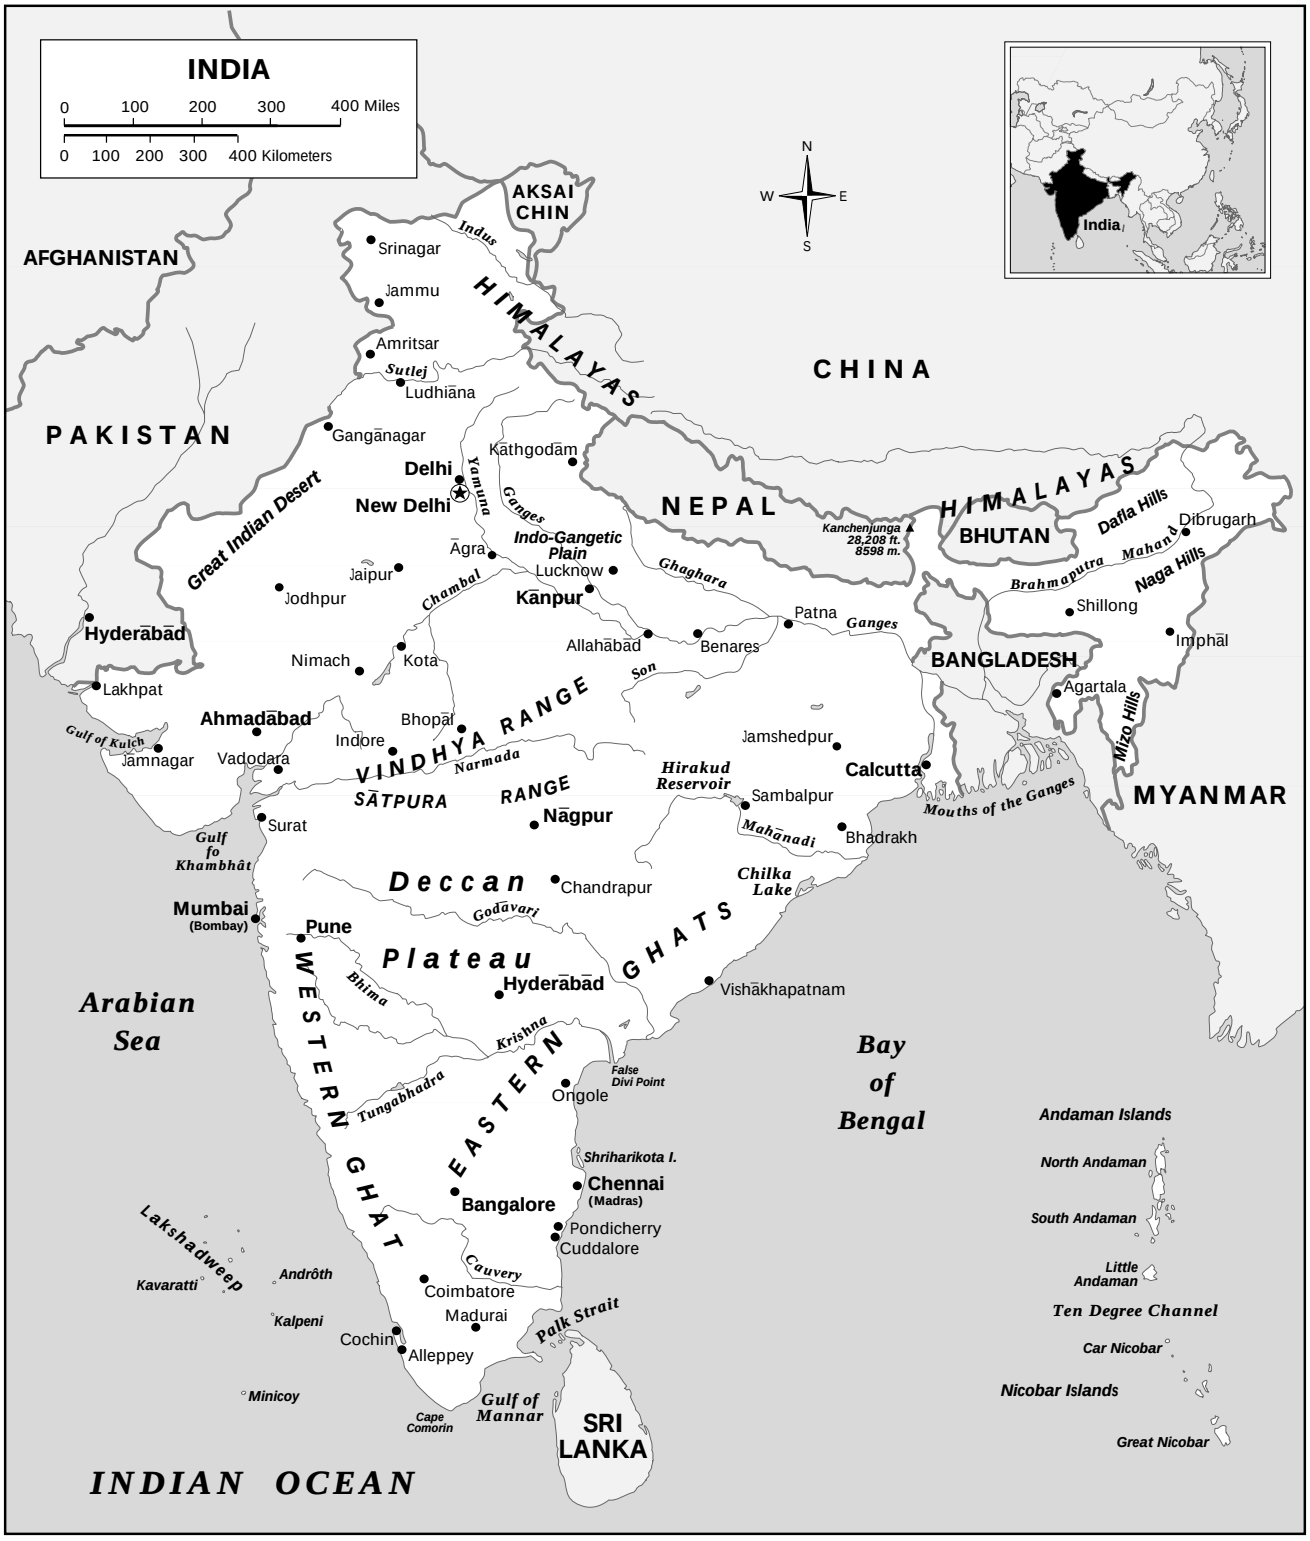
The Hindu caste system reflects Indian occupational and socially defined hierarchies. Ancient Sanskrit sources divide society into four major categories, priests (Brahmin), warriors (Kshatriya), traders (Vaishya) and farmers/laborers (Shudra). Although these categories are understood throughout India, they describe reality only in the most general terms. They omit, for example, the tribes and those once known as "untouchables." In reality, Indian society is divided into thousands of jatis—local, endogamous groups based on occupation—and organized hierarchically according to complex ideas of purity and pollution. Discrimination based on caste is officially illegal, but remains prevalent, especially in rural areas. Nevertheless, the government has made strong efforts to minimize the importance of caste through active affirmative action and social policies. Moreover, caste has been diluted if not subsumed in the economically prosperous and heterogeneous cities, where an increasing percentage of India's population lives. In the countryside, expanding education, land reform and economic opportunity through access to information, communication, transport, and credit have lessened the harshest elements of the caste system.

HISTORY

The people of India have had a continuous civilization since 2500 B.C., when the inhabitants of the Indus River valley developed an urban culture based on commerce and sustained by agricultural trade. This civilization declined around 1500 B.C., probably due to ecological changes.

During the second millennium B.C., pastoral, Aryan-speaking tribes migrated from the northwest into the subcontinent, settled in the middle Ganges River valley, and adapted to antecedent cultures.

The political map of ancient and medieval India was made up of myriad kingdoms with fluctuating boundaries. In the 4th and 5th centuries A.D., northern India was unified under the Gupta Dynasty. During this period, known as India's Golden Age, Hindu culture and political administration reached new heights.



Islam spread across the subcontinent over a period of 700 years. In the 10th and 11th centuries, Turks and Afghans invaded India and established sultanates in Delhi. In the early 16th century, Babur, a Turkish adventurer and distant relative of Timurlane, established the Mughal Dynasty, which lasted for 200 years. South India followed an independent path, but by the 17th century large areas of South India came under the direct rule or influence of the expanding Mughal Empire. While most of Indian society in its thousands of villages remained untouched by the political struggles going on around them, Indian courtly culture evolved into a unique blend of Hindu and Muslim traditions.

The first British outpost in South Asia was established by the English East India Company in 1619 at Surat on the northwestern coast. Later in the century, the Company opened permanent trading stations at Madras (now Chennai), Bombay (now Mumbai), and Calcutta (now Kolkata), each under the protection of native rulers.

The British expanded their influence from these footholds until, by the 1850s, they controlled most of present-day India, Pakistan, Sri Lanka, and Bangladesh. In 1857, an unsuccessful rebellion in north India led by Indian soldiers seeking the restoration of the Mughal Emperor caused the British Parliament to transfer political power from the East India Company to the Crown. Great Britain began administering most of India directly, while controlling the rest through treaties with local rulers.

In the late 1800s, the first steps were taken toward self-government in British India with the appointment of Indian councilors to advise the British Viceroy and the establishment of Provincial Councils with Indian members; the British subsequently widened participation in Legislative Councils. Beginning in 1920, Indian leader Mohandas K. Gandhi transformed the Indian National Congress political party into a mass movement to campaign against British colonial rule. The party used both parliamentary and nonviolent resistance and non-cooperation to agitate for independence. During this period, however, millions of Indians served with honor and distinction in the British armed forces, including service in both World Wars and countless other overseas actions in service of the Empire.

With Indians increasingly united in their quest for independence, a war-weary Britain led by Labor Prime

Minister Clement Attlee began in earnest to plan for the end of its suzerainty in India. On August 15, 1947, India became a dominion within the Commonwealth, with Jawaharlal Nehru as Prime Minister. Strategic colonial considerations, as well as political tensions between Hindus and Muslims, led the British to partition British India into two separate states: India, with a Hindu majority; and Pakistan, which consisted of two "wings," East and West Pakistan—currently Bangladesh and Pakistan—with Muslim majorities. India became a republic within the Commonwealth after promulgating its Constitution on January 26, 1950.

After independence, the Indian National Congress, the party of Mohandas K. Gandhi and Jawaharlal Nehru, ruled India under the leadership first of Nehru and then his daughter (Indira Gandhi) and grandson (Rajiv Gandhi), with the exception of brief periods in the 1970s and 1980s, during a short period in 1996, and the period from 1998-2004, when a coalition led by the Bharatiya Janata Party governed.

Prime Minister Nehru governed the nation until his death in 1964. Nehru was succeeded by Lal Bahadur Shastri, who also died in office. In 1966, power passed to Nehru's daughter, Indira Gandhi, Prime Minister from 1966 to 1977. In 1975, beset with deepening political and economic problems, Mrs. Gandhi declared a state of emergency and suspended many civil liberties. Seeking a mandate at the polls for her policies, she called for elections in 1977, only to be defeated by Morarji Desai, who headed the Janata Party, an amalgam of five opposition parties.

In 1979, Desai's Government crumbled. Charan Singh formed an interim government, which was followed by Mrs. Gandhi's return to power in January 1980. On October 31, 1984, Mrs. Gandhi was assassinated, and her son, Rajiv, was chosen by the Congress (I)—for "Indira"—Party to take her place. His Congress government was plagued with allegations of corruption resulting in an early call for national elections in 1989.

Although Rajiv Gandhi's Congress Party won more seats than any other single party in the 1989 elections, he was unable to form a government with a clear majority. The Janata Dal, a union of opposition parties, then joined with the Hindu-nationalist Bharatiya Janata Party (BJP) on the right and the Communists on the left to form the government. This loose coalition collapsed in November 1990, and the Janata Dal, supported by the Congress (I), came to power for a short period, with Chandra Shekhar as Prime Minister. That alliance also collapsed, resulting in national elections in June 1991.

While campaigning in Tamil Nadu on behalf of Congress (I), Rajiv Gandhi was assassinated on May 27, 1991, apparently by Tamil extremists from Sri Lanka, unhappy with India's armed intervention to try to stop the civil war there. In the elections, Congress (I) won 213 parliamentary seats and returned to power at the head of a coalition, under the leadership of P.V. Narasimha Rao. This Congress-led government, which served a full 5-year term, initiated a gradual process of economic liberalization and reform, which opened the Indian economy to global trade and investment. India's domestic politics also took new shape, as the nationalist appeal of the Congress Party gave way to traditional caste, creed, regional, and ethnic alignments, leading to the founding of a plethora of small, regionally based political parties.

The final months of the Rao-led government in the spring of 1996 were marred by several major corruption scandals, which contributed to the worst electoral performance by the Congress Party in its history. The Hindu-nationalist BJP emerged from the May 1996 national elections as the single-largest party in the Lok Sabha but without a parliamentary majority. Under Prime Minister Atal Bihari Vajpayee, the subsequent BJP coalition lasted only 13 days. With all political parties wishing to avoid another round of elections, a 14-party coalition led by the Janata Dal formed a government known as the United Front, under the former Chief Minister of Karnataka, H.D. Deve Gowda. His government collapsed after less than a year, when the Congress Party withdrew its support in March 1997. Inder Kumar Gujral replaced Deve Gowda as the consensus choice for Prime Minister at the head of a 16-party United Front coalition.

In November 1997, the Congress Party again withdrew support from the United Front. In new elections in February 1998, the BJP won the largest number of seats in Parliament—182—but fell far short of a majority. On March 20, 1998, the President approved a BJP-led coalition government with Vajpayee again serving as Prime Minister. On May 11 and 13, 1998, this government conducted a series of underground nuclear tests, spurring U.S. President Clinton to impose economic sanctions on India pursuant to the 1994 Nuclear Proliferation Prevention Act.

In April 1999, the BJP-led coalition government fell apart, leading to fresh elections in September. The National Democratic Alliance—a new coalition led by the BJP—won a majority to form the government with Vajpayee as Prime Minister in October 1999. The NDA government was the first in many years to serve a full five year term, providing much-needed political stability.

The Kargil conflict in 1999 and an attack by terrorists on the Indian Parliament in December 2001 led to increased tensions with Pakistan.

Hindu nationalists supportive of the BJP agitated to build a temple on a disputed site in Ayodhya, destroying a 17th century mosque there in December 1992, and sparking widespread religious riots in which thousands, mostly Muslims, were killed. In February 2002, 57 Hindu volunteers returning from Ayodhya were burnt alive when their train caught fire. Alleging that the fire was caused by Muslim attackers, anti-Muslim rioters throughout the state of Gujarat killed over 900 people and left 100,000 homeless. This led to accusations that the BJP-led Gujarat state government had not done enough to contain the riots, or arrest and prosecute the rioters.

The ruling BJP-led coalition was defeated in a five-stage election held in April and May of 2004, and a Congress-led coalition, known as the United Progressive Alliance (UPA), took power on May 22 with Manmohan Singh as Prime Minister. The UPA's victory was attributed to dissatisfaction among poorer rural voters that the prosperity of the cities had not filtered down to them, and rejection of the BJP's Hindu nationalist agenda.

The Congress-led UPA government has continued many of the BJP's foreign policies, particularly improving relations with the U.S. Prime Minister Singh and President Bush concluded a landmark U.S.-India strategic partnership framework agreement on July 18, 2005. In March 2006, President Bush visited India to further the many initiatives that underlie the new agreement. The strategic partnership is anchored by a historic civil nuclear cooperation initiative and includes cooperation in the fields of space, high-technology commerce, health issues, democracy promotion, agriculture, and trade and investment.

In July 2008, the UPA won a confidence motion with 275 votes in its favor and 256 against.

In late November 2008, terrorists killed at least 164 people in a series of coordinated attacks around Mumbai. Prime Minister Singh promised a thorough investigation and Home Minister Chidambaram pledged significant reforms to improve India's counterterrorism agencies.

GOVERNMENT

According to its Constitution, India is a "sovereign, socialist, secular, democratic republic." Like the United States, India has a federal form of government. However, the central government in India has greater power in relation to its states, and has adopted a British-style parliamentary system.

The government exercises its broad administrative powers in the name of the president, whose duties are largely ceremonial. A special electoral college elects the president and vice president indirectly for 5-year terms. Their terms are staggered, and the vice president does not automatically become president following the death or removal from office of the president.

Real national executive power is centered in the Council of Ministers (Cabinet), led by the prime minister. The president appoints the prime minister, who is designated by legislators of the political party or coalition commanding a parliamentary majority in the Lok Sabha (lower house). The president then appoints subordinate ministers on the advice of the prime minister. India's bicameral Parliament consists of the Rajya Sabha (Council of States) and the Lok Sabha (House of the People). The Council of Ministers is responsible to the Lok Sabha. The legislatures of the states and union territories elect 233 members to the Rajya Sabha, and the president appoints another 12. The members of the Rajya Sabha serve 6-year terms, with one-third up for election every 2 years. The Lok Sabha consists of 545 members, who serve 5-year terms; 543 are directly elected, and two are appointed.

India's independent judicial system began under the British, and its concepts and procedures resemble those of Anglo-Saxon countries. The Supreme Court consists of a chief justice and 25 other justices, all appointed by the president on the advice of the prime minister.

India has 28 states* and 7 union territories. At the state level, some legislatures are bicameral, patterned after the two houses of the national parliament. The states' chief ministers are responsible to the legislatures in the same way the prime minister is responsible to Parliament.

Each state also has a presidentially appointed governor, who may assume certain broad powers when directed by the central government. The central government exerts greater control over the union territories than over the states, although some territories have gained more power to administer their own affairs. Local governments in India have less autonomy than their counterparts in the United States. Some states are trying to revitalize the traditional village councils, or panchayats, to promote popular democratic participation at the village level, where much of the population still lives. Over half a million panchayats exist throughout India.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Pratibha PATIL**
Vice Pres.: **Hamid ANSARI**
Prime Min.: **Manmohan SINGH**
Principal Sec. to the Prime Min.'s Office: **T. K. A. NAIR**
National Security Adviser: **Mayankote Kelath NARAYANAN**
Dep. Chmn., Planning Commission: **Montek Singh AHLUWALIA**
Min. of Agriculture: **Sharad PAWAR**
Min. of Agro & Rural Industries: **Mahavir PRASAD**
Min. of Chemicals & Fertilizers: **Ram Vilas PASWAN**
Min. of Coal: **Manmohan SINGH**
Min. of Commerce & Industry: **Kamal NATH**
Min. of Communications & Information Technology: **A. RAJA**
Min. of Company Affairs: **Prem Chand GUPTA**
Min. of Consumer Affairs, Food, & Public Admin.: **Sharad PAWAR**
Min. of Culture: **Jaipal REDDY**
Min. of Defense: **A. K. ANTONY**
Min. of Development of Northeastern Region: **Paty Ripple KYNDIAH**
Min. of Earth Sciences: **Kapil SIBAL**
Min. of Environment & Forests: **Manmohan SINGH**
Min. of External Affairs: **Pranab MUKHERJEE**
Min. of Finance: **Palaniappan CHIDAMBARAM**
Min. of Health & Family Welfare: **Anbumani RAMADOSS**
Min. of Home Affairs: **Shivraj PATIL**
Min. of Human Resource Development: **Arjun SINGH**
Min. of Information & Broadcasting: **Priyaranjan DASMUNSI**
Min. of Law & Justice: **Hans Raj BHARDWAJ**
Min. of Local Govt.: **Mani Shankar AIYAR**
Min. of Mines: **Sis Ram OLA**
Min. of Minority Affairs: **A. R. ANTULAY**
Min. of Overseas Indian Affairs: **Vayalar RAVI**
Min. of Panchayati Raj: **Mani Shankar AIYAR**
Min. of Parliamentary Affairs: **Priyaranjan DASMUNSI**
Min. of Petroleum & Natural Gas: **Murli DEORA**
Min. of Power: **Sushil Kumar SHINDE**
Min. of Railways: **Laloo Prasad YADAV**
Min. of Rural Development: **Raghuvansh Prasad SINGH**
Min. of Science & Technology: **Kapil SIBAL**

Min. of Shipping, Road Transport, & Highways: **T. R. BAALU**
Min. of Small-Scale Industries: **Mahavir PRASAD**
Min. of Social Justice & Empowerment: **Meira KUMAR**
Min. of Steel: **Ram Vilas PASWAN**
Min. of Textiles: **Shankersinh VAGHELA**
Min. of Tourism & Culture: **Ambika SONI**
Min. of Tribal Affairs: **Paty Ripple KYNDIAH**
Min. of Urban Development: **Jaipal REDDY**
Min. of Water Resources: **Saif-u-Din SOZ**
Min. of Youth Affairs & Sports: **Mani Shankar AIYAR**
Min. of State (Independent Charge) for Civil Aviation: **Praful PATEL**
Min. of State (Independent Charge) for Food Processing Industries: **Subodh Kant SAHAY**
Min. of State (Independent Charge) for Heavy Industries & Public Enterprises: **Santosh Mohan DEV**
Min. of State (Independent Charge) for Labor & Employment: **Oscar FERNANDES**
Min. of State (Independent Charge) for Nonconventional Energy Sources: **Vilas MUTTEMWAR**
Min. of State (Independent Charge) for Statistics & Program Implementation: **G. K. VASAN**
Min. of State (Independent Charge) for Urban Employment & Poverty Alleviation: **Kumari SELJA**
Min. of State (Independent Charge) for Women & Child Development: **Renuka CHOWDHURY**
Governor, Reserve Bank of India: **Duvvuri SUBBARAO**
Ambassador to the US: **Ranendra SEN**
Permanent Representative to the UN, New York: **Nirupam SEN**

India maintains an embassy in the United States at 2107 Massachusetts Avenue NW, Washington, DC 20008 (tel. 202-939-7000, fax 202-265-4351, email indembwash@indiagov.org and consulates general in New York, Chicago, Houston, and San Francisco. The embassy's web site is http://www.indianembassy.org.

POLITICAL CONDITIONS

Emerging as the nation's single largest party in the April/May 2004 Lok Sabha election, Congress currently leads a coalition government under Prime Minister Manmohan Singh. Party President Sonia Gandhi was reelected by the Party National Executive in May 2005. Also a Member of Parliament, she heads the Congress Lok Sabha delegation. Congress prides itself as a secular, left of center party, with a long history of political dominance. Although its performance in national elections had steadily declined during the last 12 years, its surprise victory in 2004 was a result of recruiting strong allies into the UPA, the anti-incumbency factor among voters, and its courtship of India's many poor, rural and Muslim voters. Congress political fortunes suffered badly in the 1990s, as many traditional supporters were lost to emerging regional and caste-based parties, such as the Bahujan Samaj Party and the Samajwadi Party, but have rebounded since its May 2004 ascension to power. It currently rules either directly or in coalition with its allies in 9 states. In November 2005, the Congress regained the Chief Ministership of Jammu and Kashmir state, under a power-sharing agreement.

The Bharatiya Janata Party (BJP), led by Rajnath Singh, holds the second-largest number of seats in the Lok Sabha. Former Prime Minister Atal Bihari Vajpayee serves as Chairman of the BJP Parliamentary Party, and former Deputy Prime Minister L.K. Advani is Leader of the Opposition. The Hindu-nationalist BJP draws its political strength mainly from the "Hindi Belt" in the northern and western regions of India.

The party holds power in the states of Gujarat, Madhya Pradesh, Rajasthan, Chhattisgarh, and Orissa—in coalition with the Biju Janata Dal. Popularly viewed as the party of the northern upper caste and trading communities, the BJP made strong inroads into lower castes in recent national and state assembly elections. The party must balance the competing interests of Hindu nationalists, (who advocate construction of a temple on a disputed site in Ayodhya, and other primarily religious issues), and center-right modernizers who see the BJP as a party of economic and political reform. Four Communist and Marxist parties are united in a bloc called the "Left Front," which controls 57 parliamentary seats. The Left Front rules the states of West Bengal and Kerala. Although it has not joined the government, Left Front support provides the crucial seats necessary for the UPA to retain power in New Delhi; without its support, the UPA government would fall. It advocates a secular and Communist ideology and opposes many aspects of economic liberalization and globalization, resulting in dissonance with Prime Minister Singh's liberal economic approach.

The next general election is scheduled for April-May 2009.

ECONOMY

India's population is estimated at more than 1.1 billion and is growing at 1.3% a year. It has the world's 12th largest economy—and the third largest in Asia behind Japan and China—with total GDP in 2007 of around $1.1 trillion ($1,100 billion), based on a 2007 year-end exchange rate of 39.5 rupees to the U.S. dollar. Services, industry, and agriculture account for 55%, 27%, and 18% of GDP respectively. Nearly two-thirds of the population depends on agriculture for its livelihood. 700 million Indians live on $2 per day or less, but there is a large and growing middle class of more than 50 million Indians with disposable income ranging from 200,000 to 1,000,000 rupees per year ($4166-$20,833). Estimates are that the middle class will grow ten-fold by 2025.

India continues to move forward, albeit haltingly, with market-oriented economic reforms that began in 1991. Reforms include increasingly liberal foreign investment and exchange regimes, industrial decontrol, reductions in tariffs and other trade barriers, opening and modernization of the financial sector, significant adjustments in government monetary and fiscal policies, and more safeguards for intellectual property rights.

Real GDP growth for the fiscal year ending March 31, 2007 was 9.4%, up from 9.0% growth in the previous year. Growth for the fiscal year ending March 31, 2009 was initially expected to be between 8.5-9.0%, but has been revised downward by a number of economists to 7.0% or less because of the financial crisis and resulting global economic slowdown. Foreign portfolio and direct investment inflows have risen significantly in recent years. They contributed to $255 billion in foreign exchange reserves by June 2007. Government receipts from privatization were about $3 billion in fiscal year 2003-2004, but the privatization program has stalled since then.

Economic growth is constrained by inadequate infrastructure, a cumbersome bureaucracy, corruption, labor market rigidities, regulatory and foreign investment controls, the "reservation" of key products for small-scale industries, and high fiscal deficits. The outlook for further trade liberalization is mixed and a key WTO Doha Ministerial in July 2008 was unsuccessful due to differences between the U.S. and India (as well as China) over market access. India eliminated quotas on 1,420 consumer imports in 2002 and has incrementally lowered non-agricultural customs duties in recent successive budgets. However, the tax structure is complex, with compounding effects of various taxes.

The United States is India's largest trading partner. Bilateral merchandise trade in 2007 was $41.6 billion. Principal U.S. exports are diagnostic or lab reagents, aircraft and parts, advanced machinery, cotton, fertilizers, ferrous waste/scrap metal, and computer hardware. Major U.S. imports from India include textiles and ready-made garments, Internet-enabled services, agricultural and related products, gems and jewelry, leather products, and chemicals.

The rapidly growing software sector is boosting service exports and modernizing India's economy. Software exports crossed $28 billion in FY 2006-2007, while business process outsourcing (BPO) revenues hit $8.3 billion in 2006-2007. Personal computer penetration is 14 per 1,000 persons. The cellular/mobile market surged to 140 million subscribers by November 2006. The country has 54 million cable TV customers.

The United States is India's largest investment partner, with a 13% share. India's total inflow of U.S. direct investment was estimated at more than $9 billion through 2006. Proposals for direct foreign investment are considered by the Foreign Investment Promotion Board and generally receive government approval. Automatic approvals are available for investments involving up to 100% foreign equity, depending on the kind of industry. Foreign investment is particularly sought after in power generation, telecommunications, ports, roads, petroleum exploration/processing, and mining.

India's external debt was $155 billion in 2006-2007, up from $126 billion in 2005-2006. Foreign assistance was approximately $3 billion in 2006-2007, with the United States providing about $126 million in development assistance. The World Bank plans to double aid to India to almost $3 billion a year, with focus on infrastructure, education, health, and rural livelihoods.

DEFENSE

The supreme command of the Indian armed forces is vested in the President of India. Policies concerning India's defense, and the armed forces as a whole, are formulated and confirmed by the Cabinet.

The Indian Army numbers over 1.1 million strong and fields 34 divisions. Its primary task is to safeguard the territorial integrity of the country against external threats. The Army has been heavily committed in the recent past to counterterrorism operations in Jammu and Kashmir, as well as the in the Northeast. Its current modernization program focuses on obtaining equipment to be used in combating terror. The Army often provides aid to civil authorities and assists the government in organizing relief operations. The Indian Navy is by far the most capable navy in the region. The Navy's primary missions are the defense of India and of India's vital sea lines of communication. India relies on the sea for 90% of its oil and natural gas and over 90% of its foreign trade. The Navy currently operates one aircraft carrier with two on order, 14 submarines, and 15 major surface combatants. It is capable of projecting power within the Indian Ocean basin and occasionally operates in the South China Sea, the Mediterranean Sea and the Arabian Gulf. Fleet introduction of the Brahmos cruise missile and the possible lease of nuclear submarines from Russia will add significantly to the Indian Navy's flexibility and striking power.

Although small, the Indian Coast Guard has been expanding rapidly in recent years. Indian Navy officers typically fill top Coast Guard positions to ensure coordination between the two services. India's Coast Guard is responsible for control of India's huge exclusive economic zone.

The Indian Air Force is becoming a 21st century force through modernization, new tactics and the acquisition of modern aircraft, such as the SU-30MKI, a new advanced jet trainer (BAE Hawk) and the indigenously produced advanced light helicopter (Dhruv). In April 2008 six firms submitted proposals to the Indian Government to manufacture 126 multi-role combat aircraft for the Indian Air Force.

FOREIGN RELATIONS

India's size, population, and strategic location give it a prominent voice in international affairs, and its growing economic strength, military prowess, and scientific and technical capacity give it added weight. The end of the Cold War dramatically affected Indian foreign policy. India remains a leader of the developing world and the Non-Aligned Movement (NAM). India is now strengthening its political and commercial ties with the

United States, Japan, the European Union, Iran, China, and the Association of Southeast Asian Nations. India is an active member of the South Asian Association for Regional Cooperation (SAARC). Always an active member of the United Nations, India now seeks a permanent seat on the UN Security Council. India has a long tradition of participating in UN peacekeeping operations.

Bilateral and Regional Relations

Pakistan. India and Pakistan have been locked in a tense rivalry since the partition of the subcontinent upon achieving independence from Great Britain in 1947. The principal source of contention has been Kashmir, whose Hindu Maharaja at that time chose to join India, although a majority of his subjects were Muslim. India maintains that his decision and subsequent elections in Kashmir have made it an integral part of India. This dispute triggered wars between the two countries in 1947 and 1965 and provoked the Kargil conflict in 1999.

Pakistan and India fought a war in December 1971 following a political crisis in what was then East Pakistan and the flight of millions of Bengali refugees to India. The brief conflict left the situation largely unchanged in the west, where the two armies reached an impasse, but a decisive Indian victory in the east resulted in the creation of Bangladesh.

Since the 1971 war, Pakistan and India have made slow progress toward normalization of relations. In July 1972, Indian Prime Minister Indira Gandhi and Pakistani President Zulfikar Ali Bhutto met in the Indian hill station of Simla. They signed an agreement by which India would return all personnel and captured territory in the west and the two countries would "settle their differences by peaceful means through bilateral negotiations." Diplomatic and trade relations were re-established in 1976.

The 1979 Soviet invasion of Afghanistan caused new strains between India and Pakistan. Pakistan supported the Afghan resistance, while India implicitly supported the Soviet occupation. In the following eight years, India voiced increasing concern over Pakistani arms purchases, U.S. military aid to Pakistan, and Pakistan's nuclear weapons program. In an effort to curtail tensions, the two countries formed a joint commission. In December 1988, Prime Ministers Rajiv Gandhi and Benazir Bhutto concluded a pact not to attack each other's nuclear facilities and initiated agreements on cultural exchanges and civil aviation.

In 1997, high-level Indo-Pakistani talks resumed after a three-year pause. The Prime Ministers of India and Pakistan met twice, and the foreign secretaries conducted three rounds of talks. In June 1997 at Lahore, the foreign secretaries identified eight "outstanding issues" around which continuing talks would be focused. The dispute over the status of Jammu and Kashmir, an issue since partition, remains the major stumbling block in their dialogue. India maintains that the entire former princely state is an integral part of the Indian union, while Pakistan insists upon the implementation of UN resolutions calling for self-determination for the people of the state.

In September 1997, the talks broke down over the structure of how to deal with the issues of Kashmir and peace and security. Pakistan advocated that separate working groups treat each issue. India responded that the two issues be taken up along with six others on a simultaneous basis. In May 1998 India, and then Pakistan, conducted nuclear tests. Attempts to restart dialogue between the two nations were given a major boost by the February 1999 meeting of both Prime Ministers in Lahore and their signing of three agreements. These efforts were stalled by the intrusion of Pakistani-backed forces into Indian-held territory near Kargil in May 1999 (that nearly turned into full scale war), and by the military coup in Pakistan that overturned the Nawaz Sharif government in October the same year. In July 2001, Mr. Vajpayee and General Pervez Musharraf, leader of Pakistan after the coup, met in Agra, but talks ended after two days without result. After an attack on the Indian Parliament in December 2001, India-Pakistan relations cooled further as India accused Pakistan of involvement. Tensions increased, fueled by killings in Jammu and Kashmir, peaking in a troop buildup by both sides in early 2002.

Prime Minister Vajpayee's April 18, 2003 speech in Srinagar (Kashmir) revived bilateral efforts to normalize relations. In November 2003, Prime Minister Vajpayee and President Musharraf agreed to a ceasefire, which still holds, along the Line-of-Control in Jammu and Kashmir. After a series of confidence building measures, Prime Minister Vajpayee and President Musharraf met on the sidelines of the January 2004 SAARC summit in Islamabad and agreed to commence a Composite Dialogue addressing outstanding issues between India and Pakistan, including Kashmir.

In February 2004, India and Pakistan agreed to restart the "2+6" Composite Dialogue formula, which provides for talks on Peace and Security and Jammu and Kashmir, followed by technical and Secretary-level discussions on six other bilateral disputes: Siachen Glacier, Wuller Barrage/Tulbul Navigation Project, Sir Creek estuary, Terrorism and Drug Trafficking, Economic and Commercial cooperation, and the Promotion of Friendly Exchanges in various fields. The restart of the Composite Dialogue process was especially significant given the almost six years that had transpired since the two sides agreed to this formula in 1997-1998. The UPA government continued the Composite Dialogue with Pakistan. Following the October 2005 earthquake in Kashmir, the two governments coordinated relief efforts and opened access points along the Line-of-Control to allow relief supplies to flow from India to Pakistan and to allow Kashmiris from both sides to visit one another.

The Foreign Secretary talks resumed in November 2006, after a three-month delay following the July 11, 2006 terrorist bombings in Mumbai. The meeting generated modest progress, with the two sides agreeing to establish a joint mechanism on counter-terrorism. Since 2006, India and Pakistan have continued to take part in the Composite Dialogue process in an effort to maintain the peace process and strengthen bilateral relations. Most recently, the Indian Minister of External Affairs and the Indian Foreign Secretary met in May 2008 with their new counterparts in Islamabad to close the fourth round of talks, reaffirming a commitment to maintain the ceasefire along the Line-of-Control as well as increasing people-to-people connections through improving cross-border bus services. The Mumbai terrorist attacks in November 2008, however, have increased tensions between India and Pakistan.

SAARC. Certain aspects of India's relations within the subcontinent are conducted through the South Asian Association for Regional Cooperation (SAARC). Its members are Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, and Sri Lanka, with the People's Republic of China, Iran, Japan, European Union, Republic of Korea, and the U.S. as observers. Established in 1985, SAARC encourages cooperation in agriculture, rural development, science and technology, culture, health, population control, narcotics, and terrorism.

SAARC has intentionally stressed these "core issues" and avoided those which could prove divisive, although political dialogue is often conducted on the margins of SAARC meetings. In 1993, India and its SAARC partners signed an agreement gradually to lower tariffs within the region. Forward movement in SAARC had slowed because of tension between India and Pakistan, and the SAARC summit scheduled for 1999 was not held until January 2002. In addition, to boost the process of normalizing India's relationship with Pakistan, the January 2004 SAARC summit in Islamabad produced an agreement to establish a South Asia Free Trade Area (SAFTA). All the member governments have ratified SAFTA, which was slated to come into force on January 1, 2006, with a series of graduated tariff cuts through 2015. As of December 2006, however, the FTA partners were still negotiating sensitive product lists, rules of origin, and technical assistance. India hosted the 2007 SAARC summit, which called for greater regional cooperation on trade, environmental, social, and counterterrorism issues. At the 2008 SAARC summit in Sri Lanka, the SAFTA member countries signed a protocol for Afghanistan's accession and several countries (Including India, Pakistan, and Sri Lanka) agreed to drop some items from their sensitive product lists.

China. Despite suspicions remaining from a 1962 border conflict between India and China and continuing territorial/boundary disputes, Sino-Indian relations have improved gradually since 1988. Both countries have sought to reduce tensions along the frontier, expand trade and cultural ties, and normalize relations. Their bilateral trade reached $24 billion in 2006. China is India's second-largest trading partner behind the U.S.

A series of high-level visits between the two nations has improved relations. In December 1996, Chinese President Jiang Zemin visited India on a tour of South Asia. While in New Delhi, he and the Indian Prime Minister signed a series of confidence-building measures along the disputed border, including troop reductions and weapons limitations.

Chinese Premier Wen Jiabao invited Prime Minister Vajpayee to visit China in June 2003. They recognized the common goals of both countries and made the commitment to build a "long-term constructive and cooperative partnership" to peacefully promote their mutual political and economic goals without encroaching upon their good relations with other countries. In Beijing, Prime Minister Vajpayee proposed the designation of special representatives to discuss the border dispute at the political level, a process that is still under way.

In November 2006, President Hu Jintao made an official state visit to India, further cementing Sino-Indian relations. India and China are building on growing economic ties to improve other aspects of their relationship such as counter-terrorism, energy, and trade. In another symbol of improved ties, the two countries opened the Nathu La Pass to bilateral trade in July 2006 for the first time in 40 years. Though it is the first direct land trade route in decades, trade is expected to be local and small since the pass is open only four months a year.

Prime Minister Manmohan Singh met Chinese President Hu Jintao in January 2008 in Beijing in an effort to reinforce their confidence to further develop ties, vowing to promote their relations to a higher level. The meetings cemented a shared vision for the 21st century, agreeing to raise the annual volume of bilateral trade to $60 billion by 2010.

Former Soviet Union. The collapse of the Soviet Union in 1991 and the emergence of the Commonwealth of Independent States (CIS) had major repercussions for Indian foreign policy. India's substantial trade with the region plummeted after the Soviet collapse and has yet to recover. Long-standing military supply relationships were similarly disrupted due to questions over financing. Russia nonetheless remains India's largest supplier of military systems and spare parts.

Russia and India have not renewed the 1971 Indo-Soviet Peace and Friendship Treaty and follow what both describe as a more pragmatic, less ideological relationship. The visit of Russian President Boris Yeltsin to India in January 1993 helped cement this new relationship. The pace of high-level visits has since increased, as has discussion of major defense purchases. UPA leader Sonia Gandhi and Prime Minister Singh visited Russia in July 2005. President Vladimir Putin traveled to India in January 2007 to attend an Indo-Russia Summit and was the guest of honor at India's Republic Day celebrations.

U.S.-INDIA RELATIONS

Recognizing India as a key to strategic U.S. interests, the United States has sought to strengthen its relationship with India. The two countries are the world's largest democracies, both committed to political freedom protected by representative government. India is also moving gradually toward greater economic freedom. The U.S. and India have a common interest in the free flow of commerce and resources, including through the vital sea lanes of the Indian Ocean. They also share an interest in fighting terrorism and in creating a strategically stable Asia.

There were some differences, however, including over India's nuclear weapons programs and the pace of India's economic reforms. In the past, these concerns may have dominated U.S. thinking about India, but today the U.S. views India as a growing world power with which it shares common strategic interests. A strong partnership between the two countries will continue to address differences and shape a dynamic and collaborative future.

In late September 2001, President Bush lifted sanctions imposed under the terms of the 1994 Nuclear Proliferation Prevention Act following India's nuclear tests in May 1998. The nonproliferation dialogue initiated after the 1998 nuclear tests has bridged many of the gaps in understanding between the countries. In a meeting between President Bush and Prime Minister Vajpayee in November 2001, the two leaders expressed a strong interest in transforming the U.S.-India bilateral relationship. High-level meetings and concrete cooperation between the two countries increased during 2002 and 2003. In January 2004, the U.S. and India launched the Next Steps in Strategic Partnership (NSSP), which was both a milestone in the transformation of the bilateral relationship and a blueprint for its further progress.

In July 2005, President Bush hosted Prime Minister Singh in Washington, DC. The two leaders announced the successful completion of the NSSP, as well as other agreements which further enhance cooperation in the areas of civil nuclear, civil space, and high-technology commerce. Other initiatives announced at this meeting include: an U.S.-India Economic Dialogue, Fight Against HIV/AIDS, Disaster Relief, Technology Cooperation, Democracy Initiative, an Agriculture Knowledge Initiative, a Trade Policy Forum, Energy Dialogue and CEO Forum. President Bush made a reciprocal visit to India in March 2006, during which the progress of these initiatives were reviewed, and new initiatives were launched.

In December 2006, Congress passed the historic Henry J. Hyde United States-India Peaceful Atomic Cooperation Act, which allows direct civilian nuclear commerce with India for the first time in 30 years. U.S. policy had opposed nuclear cooperation with India because the country had developed nuclear weapons in contravention of international conventions and never signed the Nuclear Non-Proliferation Treaty. The legislation clears the way for India to buy U.S. nuclear reactors and fuel for civilian use.

In July 2007, the United States and India reached a historic milestone in their strategic partnership by completing negotiations on the bilateral agreement for peaceful nuclear cooperation, also known as the "123 agreement." This agreement, signed by Secretary of State Rice and External Affairs Minister Mukherjee on October 10, 2008, governs civil nuclear trade between the two countries and opens the door for American and Indian firms to participate in each other's civil nuclear energy sector.

The U.S. and India seek to elevate the strategic partnership further to include cooperation in counter-terrorism, defense cooperation, education, and joint democracy promotion.

TRAVEL

Consular Information Sheet

November 27, 2008

Country Description: India, the world's largest democratic republic, has a very diverse population, geography and climate. India is the world's second most populous country, and the world's seventh largest country in area. Tourist facilities have varying degrees of comfort and amenities are widely available in the major population centers and main tourist areas.

Entry Requirements: U.S. citizens require a valid passport and valid Indian visa to enter and exit India for any purpose. Visitors, including those on official U.S. Government business, must obtain visas at an Indian Embassy or Consulate abroad prior to entering the country, as there are no provisions for visas upon arrival. Those arriving without a valid passport and valid visa are subject to immediate deportation. The U.S. Embassy and Consulates in India are unable to assist when U.S. citizens arrive without proper documentation. Each visitor should carry photocopies of the bio-data page of the traveler's U.S. passport and the page containing the Indian visa in order to facilitate obtaining an exit visa from the Indian government in the event of theft or loss of the passport. Replacing a lost visa in order to exit the country takes up to three business days. Americans wishing to visit India are responsible for requesting the correct type of visa from the Indian Embassy or Consulate, as there generally are no provisions for changing one's immigration category (e.g., from tourist to work visa) once admitted. As of October 1, 2007, the Indian Embassy and Consulates in the U.S. outsourced the visa application process to Travisa Visa Outsourcing: http://indiavisa.travisaoutsourcing.com. Diplomatic and Official visa applications, however, are still accepted directly at the Indian Embassy and Consulates. Foreign citizens whose primary purpose of travel is to participate in religious activities should obtain a missionary visa rather than a tourist visa. Indian immigration authorities have deported American citizens who entered India with a tourist visa and conducted religious activities.

American travelers to India who work in "designated institutes and technology areas" will be subject to a two week waiting period in the visa application process and will be required to submit supplemental information with their visa application. Scholars planning to conduct research in India often need research clearances in addition to their visas. Specific information is available at the Indian Embassy and Consulates.

Foreign citizens who visit India to study, do research, work or act as missionaries, as well as all travelers planning to stay more than 180 days are required to register, generally within 14 days of arrival, with the Foreigners Regional Registration Office (FRRO) closest to where they will be staying. The FRRO maintains offices in New Delhi, Mumbai, Chennai (known as the "Chennai Immigration Office"), Kolkata and Amritsar. In smaller cities and towns, the local police headquarters will normally perform this function. General information regarding Indian visa and immigration rules, including the addresses and telephone numbers for the FRRO offices, can be found at the Indian Ministry of Home Affairs web site for its Bureau of Immigration at http://www.immigrationindia.nic.in.

If a foreign citizen (e.g., an American) overstays his or her Indian visa, or otherwise violates Indian visa regulations, the traveler may require a clearance from the Ministry of Home Affairs in order to leave the country. Such travelers generally must pay a fine, and in some cases, may be jailed until their deportation can be arranged. Visa violators seeking an exit clearance can visit the following office any weekday from 10 a.m. - 12 noon: Ministry of Home Affairs, Foreigners Division, Jaisalmer House, 26 Man Singh Road, New Delhi 110 011 (tel. +91-11-2338-5748).

For the most current information on entry and exit requirements, please contact the Embassy of India at 2536 Massachusetts Avenue NW, Washington, DC 20008, telephone (202) 939-9806 (http://www.indianembassy.org) or the Indian Consulates in Chicago (http://chicago.indianconsulate.com), New York (http://www.indiacgny.org), San Francisco (http://www.cgisf.org) or Houston (http://www.cgihouston.org). Outside the United States, inquiries should be made at the nearest Indian embassy or consulate.

Safety and Security: Multiple, simultaneous bombings in crowded public places in India over the past three years represent an increasing threat to American citizens traveling in India. Coordinated terror attacks in Mumbai on November 27, 2008 targeting areas frequented by foreigners cause specific concern for the risk of Americans becoming intended or unintended victims of terrorism in India.

Because the targets have included hotels, trains, train stations, markets, cinemas, mosques, and restaurants in large urban areas, it is becoming more difficult to modify one's behavior to lessen the growing risk.

Examples of terror attacks in major cities include the following that have killed over 600 people:

- November 2008: Terrorist attacks on luxury hotels, Jewish community center, restaurant, train station, hospital and other facilities frequented by foreigners in Mumbai,
- September 2008: Five deadly explosions in New Delhi markets,
- July 2008: Thirty bombs detonated in Bangalore, Karnataka and Ahmedabad, Gujarat as well as multiple un-detonated bombs found in Surat, Gujarat,
- May 2008: A coordinated series of bombings in market and temple areas of the tourist city of Jaipur, Rajasthan,
- December 2007: An attack on a government paramilitary facility in Uttar Pradesh,
- November 2007: Coordinated blasts at court facilities in three cities in Uttar Pradesh,
- November 2007: A blast in a cinema hall in Punjab,
- August 2007: Two explosions at a popular park and restaurant in Hyderabad, Andhra Pradesh,
- May 2007: An explosion at the main mosque in Hyderabad, Andhra Pradesh,
- February 2007: The detonation of explosive devices on a train northwest of Delhi,
- September 2006: A series of explosions at a mosque and cemetery in Malegaon,
- July 2006: Seven simultaneous attacks on Mumbai commuter trains,
- March 2006: Simultaneous attacks on a train station and places of worship in Varanasi,
- October 2005: Simultaneous attacks on several markets in New Delhi.

Terrorist incidents, including those in which American citizens were injured, also occur frequently in more remote parts of India. Generally, the attacks have taken place during the busy evening hours in markets and other crowded places but could occur at any time. Americans in India should be vigilant about security at all times. Americans are advised to monitor local news reports, vary their routes and times in carrying out daily activities, and consider the level of security present when visiting public places, including religious sites, or choosing hotels, restaurants, entertainment and recreation venues. Specific areas of concern are addressed below under "Areas of Instability."

A number of anti-Western terrorist groups (some of which are on the U.S. Government's list of foreign terrorist organizations) are active in India including, but not limited to, Islamic extremist groups such as Harakat ul-Mujahidin, Jaish-e-Mohammed, Lashkar-e Tayyiba, and Harkat-ul-Jihad-i-Islami.

Beyond the threat from terrorism, demonstrations often cause inconvenience. Local demonstrations can begin spontaneously and escalate with little warning, disrupting transportation systems and city services and posing risks to travelers' personal safety. In response to such events, Indian authorities occasionally impose curfews and/or restrict travel. U.S. citizens are urged to avoid demonstrations and rallies as they have the potential for violence, especially immediately preceding and following elections and religious festivals (particularly when Hindu and Muslim festivals coincide). In addition, religious and inter-caste violence is unpredictable and occurs occasionally. In some cases, demonstrators specifically block roads near popular tourist sites in order to gain the attention of Indian authorities; occasionally vehicles transporting tourists are attacked in these incidents. U.S. citizens should monitor local television and print media and contact the U.S. Embassy or the nearest U.S. Consulate for further information about the current situation in areas where they wish to travel.

In 2008, violence against Christians (including foreigners accused of proselytizing) has increased. Mobs have attacked Indian and American missionaries and social workers as such activity provokes strong reactions in some areas. Anti-Christian violence has seen an increase recently in several areas of India, such as in Orissa, Gujarat, Kerala, and Karnataka. Conversion of Hindus is illegal in some states of India and acts of conversion often become flash points for violent Hindu nationalist feelings.

Finally, visitors should exercise caution when swimming in open waters along the Indian coastline, particularly during the monsoon season. Every year, several people in Goa, Mumbai, Puri (Orissa), and other

areas drown due to the strong undertow. It is important for visitors to heed warnings posted or advised at beaches and avoid swimming in the ocean during the monsoon season.

Jammu & Kashmir: The Department of State strongly recommends that U.S. citizens avoid travel to the state of Jammu & Kashmir, with the exception of visits to the eastern Ladakh region and its capital, Leh. A number of terrorist groups operate in the state, targeting security forces that are present throughout the region, particularly along the Line of Control (LOC) separating Indian and Pakistani-controlled Kashmir, and those stationed in the primary tourist destinations in the Kashmir Valley: Srinagar, Gulmarg, and Pahalgam.

Since 1989, as many as 60,000 people (terrorists, security forces, and civilians) have been killed in the Kashmir conflict. Many terrorist incidents take place in the state's summer capital of Srinagar, but the majority of attacks occur in rural areas. Foreigners are particularly visible, vulnerable, and definitely at risk. In the summer of 2008, serious communal violence left the state mostly paralyzed, due to massive strikes and business shut downs. In addition, there have been attacks specifically targeted at civilians. For example: in October 2007 five soldiers and two civilians were killed in an IED blast carried out by militants in the Baramulla district of Kashmir; in August 2007 terrorists lobbed a grenade at the venue of an Independence Day function in the Bandipora district; in July 2007 a blast on an out-of-state tourist bus killed six and injured 20 civilians in the capital, Srinagar. The Indian government prohibits foreign tourists from visiting certain areas along the LOC (see the section on Restricted Areas, below). U.S. Government employees are prohibited from traveling to the state of Jammu & Kashmir (except for Ladakh) without permission, which is only granted in exceptional circumstances, from the U.S. Embassy in New Delhi. When traveling to Kashmir, U.S. official travelers attempt to lower their profiles, limit their lengths of stay, and exercise extreme caution.

India-Pakistan Border: The State Department recommends that U.S. citizens avoid travel to areas within five to ten kilometers of the border between India and Pakistan. Both India and Pakistan maintain a strong military presence on both sides of the border. The only official India-Pakistan border crossing point for persons who are not citizens of India or Pakistan is in the state of Punjab between Atari, India, and Wagah, Pakistan. The border crossing is usually open, but travelers are advised to confirm the current status of the border crossing prior to commencing travel. A Pakistani visa is required to enter Pakistan. An American citizen seeking a Pakistani visa while in India must first come to the U.S. Embassy in New Delhi to sign an affidavit of intent to apply for the Pakistani visa. This is a requirement of the Pakistani government.

Both India and Pakistan claim an area of the Karakoram mountain range that includes the Siachen glacier. U.S. citizens traveling to or climbing peaks in the disputed areas face significant risks. The disputed area includes the following peaks: Rimo Peak; Apsarasas I, II, and III; Tegam Kangri I, II and III; Suingri Kangri; Ghiant I and II; Indira Col; and Sia Kangri.

Travelers may check with the U.S. Embassy in New Delhi for information on current conditions. (Please see the section on "Registration/ Embassy and Consulate Locations" below.)

Northeast States: Incidents of violence by ethnic insurgent groups, including the bombing of buses and trains, occur with a degree of frequency in parts of Assam, Manipur, and Nagaland. While U.S. citizens have not been specifically targeted, they may be affected as bystanders. Visitors to India's Northeast states are cautioned not to travel outside major cities at night.

Security laws are in force, and the central government has deployed security personnel. Certain Northeastern states can be visited by foreigners only with a permit (see the section on Restricted Areas, below.) Travelers may check with the U.S. Consulate in Kolkata for information on current conditions. (Please see the section on Registration/Embassy and Consulate Locations, below.) U.S. Government employees are prohibited from traveling to the state of Manipur and to portions of the Karbi Anglong districts and Tinsukia in Assam without permission from the U.S. Embassy in New Delhi and U.S. Consulate in Kolkata. When traveling to these areas, U.S. official travelers attempt to lower their profiles, limit their lengths of stay, and exercise extreme caution.

East Central and Southern India: A disparate number of Maoist extremist groups called "Naxalites" are active in the region, primarily in rural areas. The Naxalites have a long history of conflict with state and national authorities, including frequent attacks on local police, paramilitary forces, and government officials. The Naxalites have not specifically targeted U.S. citizens, but have attacked symbolic targets that have included Western companies. The primary Naxalite group is represented by the Communist Party of India (Maoist).

The party's regional affiliates are active in the states of Andhra Pradesh, Orissa, Chhattisgarh, Bihar, Jharkand, and West Bengal. There was significant Naxalite activity in some rural areas of these states in recent years.

Restricted Areas: Certain parts of India are designated as "restricted areas" by the Indian Government, and require special advance permission to visit. These areas include:

- The state of Mizoram,
- The state of Manipur,
- The state of Arunachal Pradesh,
- The state of Nagaland,
- The state of Sikkim,
- Portions of the state of Himachal Pradesh near the Chinese border,

- Portions of the state of Uttarakhand (Uttaranchal) near the Chinese border,
- Portions of the state of Rajasthan near the Pakistani border,
- Portions of the state of Jammu & Kashmir near the Line of Control with Pakistan,
- The Andaman & Nicobar Islands,
- The Union Territory of the Laccadives Islands (Lakshadweep), and
- The Tibetan colony in Mundgod, Karnataka.

"Restricted Area Permits" can be obtained outside of India at Indian embassies and consulates abroad, or within India, from the Ministry of Home Affairs (Foreigners Division) at Jaisalmer House, 26 Man Singh Road, New Delhi. The states of Mizoram, Manipur, Nagaland, Arunachal Pradesh and Sikkim all maintain official guesthouses in New Delhi, each of which also can issue Restricted Area Permits for their respective states for certain travelers. Tourists also should exercise caution while visiting Mamallapuram (Mahabalipuram) in Tamil Nadu as the Indira Gandhi Atomic Research Center, Kalpakkam, is located just south of the site and is not clearly marked as a restricted and dangerous area.

For the latest security information, Americans traveling abroad should regularly monitor travel information included on the websites of the U.S. Embassy in New Delhi as well as the Consulates General in Mumbai (Bombay), Chennai (Madras) and Kolkata (Calcutta). Travelers should also monitor the Department's Internet web site where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada or, for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Petty crime, especially theft of personal property, is common, particularly on trains or buses. Pickpockets can be very adept, and women have reported having their bags snatched, purse-straps cut or the bottom of their purses slit without their knowledge. Theft of U.S. passports is quite common, particularly in major tourist areas, on overnight trains, and at airports. Train travelers are urged to lock their sleeping compartments and take valuables with them when leaving their berths. Air travelers are advised to carefully watch their bags in the arrival and departure areas outside of airports. Violent crime, especially directed against foreigners, has traditionally been uncommon, although in recent years there has been a modest increase. As U.S. citizens' purchasing power is comparatively large, travelers also should exercise modesty and caution in their financial dealings in India to reduce the chance of being a target for robbery or other crime. Gangs and criminal elements operate in major cities and have sometimes targeted unsuspecting businessmen and their family members for kidnapping.

U.S. citizens, particularly women, are cautioned not to travel alone in India. Western women continue to report incidents of physical harassment by groups of men. Known as "Eve-teasing," these incidents can be quite frightening. While India is generally safe for foreign visitors, according to the latest figures by Indian authorities, rape is the fastest growing crime in India. Among large cities, Delhi experienced the highest number of crimes against women. Although most victims have been local residents, recent sexual attacks against female visitors in tourist areas underline the fact that foreign women are also at risk and should exercise vigilance.

Women should observe stringent security precautions, including avoiding using public transport after dark without the company of known and trustworthy companions; restricting evening entertainment to well known venues; and avoiding walking in isolated areas alone at any time of day. Women should also ensure their hotel room numbers remain confidential and insist the doors of their hotel rooms have chains, deadlocks, and spy-holes. In addition, it is advisable for women to hire reliable cars and drivers and avoid traveling alone in hired taxis, especially during the hours of darkness. It is preferable to obtain taxis from hotels rather than hailing them on the street. If women encounter threatening situations, they can call 100 for police assistance.

Scams: Major airports, train stations and tourist sites are often used by scam artists looking to prey on visitors, often by creating a distraction. Taxi drivers and others, including train porters, may solicit travelers with "come-on" offers of cheap transportation and/or hotels. Travelers accepting such offers have frequently found themselves the victims of scams, including offers to assist with "necessary" transfers to the domestic airport, disproportionately expensive hotel rooms, unwanted "tours," unwelcome "purchases," and even threats to the traveler when the tourists try to decline to pay. There have been several disturbing reports of tourists being held hostage on houseboats in Srinagar, Jammu & Kashmir, and forced to pay thousands of dollars in the face of threats of violence against the traveler and his/her family members.

Travelers should exercise care when hiring transportation and/or guides and use only well-known travel agents to book trips. Some scam artists have lured travelers by displaying their name on a sign when they leave the airport. Another popular scam is to drop money or to squirt something on the clothing of an unsuspecting traveler and during the distraction to rob them of their valuables. Individual tourists have also been given drugged drinks or tainted food to make them more vulnerable to theft, particularly at train stations. Even food or drink purchased in front of the traveler from a canteen or vendor could be tainted. To protect against robbery of personal belongings, it is best not to accept food or drink from strangers.

Some vendors sell rugs or other expensive items that may not be of the quality promised. Travelers should deal only with reputable businesses and should not hand over credit cards or money unless they are certain that goods being shipped to them are the goods they purchased. If a deal sounds too good to be true, it is best avoided. Most Indian states have official tourism bureaus set up to handle travelers' complaints.

Travelers should be aware of a number of other scams that have been perpetrated against foreign travelers, particularly in Goa, Jaipur, and Agra. The scams generally target younger travelers and involve suggestions that money can be made by privately transporting gems or gold (both of which can result in arrest) or by taking delivery abroad of expensive carpets, supposedly while avoiding customs duties. The scam artists describe profits that can be made upon delivery of the goods, and require the traveler to pay a "deposit" as part of the transaction. The items are always fake, and if they were real, the traveler could be subject to arrest.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Victims of a crime in India, including loss or theft of a passport, should obtain a copy of the police report (called an "FIR" or "First Information Report") from local police at the time of reporting the incident. A copy of this report is helpful for insurance purposes in replacing lost valuables. It is required by the Indian Government in order to obtain an exit visa to leave India in the event of a lost or stolen passport. Local authorities generally are unable to take any meaningful action without the filing of a police report.

Medical Facilities and Health Information: The quality of medical care in India varies considerably. Medical care is available in the major population centers that approaches and occasionally meets Western standards, but adequate medical care is usually very limited or unavailable in rural areas.

Indian health regulations require all travelers arriving from Sub-Saharan Africa or other yellow-fever areas to have evidence of vaccination against yellow fever. Travelers who do not have such proof are subject to immediate deportation or a six-day detention in the yellow-fever quarantine center. U.S. citizens who transit through any part of sub-Saharan Africa, even for one day, are advised to carry proof of yellow fever immunization.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect-bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. These websites provide useful information, such as suggested vaccinations for visitors to India, safe food and water precautions, appropriate measures to avoid contraction of mosquito-borne diseases (such as malaria), suggestions to avoid altitude sickness, etc. Further, these sites provide information on disease outbreaks that may arise from time to time—outbreaks of mosquito-borne viral diseases such as dengue fever and chikungunya occur in various parts of India each year, so travelers should check the sites shortly before arriving in India. Further health information for travelers is available at http://www.who.int/ith/en.

In January and February 2008, there were outbreaks of Avian Influenza, H5N1 virus, in poultry in the eastern Indian state of West Bengal including some of the districts surrounding the city of Kolkata. The outbreak affected poultry but there were no reported human cases. There were also Avian Influenza outbreaks in poultry in July 2007 in Manipur and in the spring of 2006,in rural areas of the states of Maharasthra, Gujarat, and Madhya Pradesh. American citizens traveling in India should take all necessary precautions. Updates on the avian influenza situation in India are published on the Embassy's web site at http://newdelhi.usembassy.gov/acsinfluenza.html. For further information on avian influenza (bird flu), please refer to the Department of State's Avian Influenza Fact Sheet, available at http://travel.state.gov/travel/tips/health/health_1181.html.

Tuberculosis is an increasingly serious health concern in India. For further information, please consult the CDC's Travel Notice on TB at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://who.int/ith/en.

Medical tourism is a rapidly growing industry. Companies offering vacation packages bundled with medical consultations and financing options provide direct-to-consumer advertising over the internet. Such medical packages often claim to provide high quality care, but the quality of health care in India is highly variable.

People seeking health care in India should understand that medical systems operate differently from those in the United States and are not subject to the same rules and regulations.

Anyone interested in traveling for medical purposes should consult with their local physician before traveling and refer to the information from

CDC found at http://wwwn.cdc.gov/travel/yellowBookCh2-HealthCare-Abroad.aspx.

The U.S. Embassy and Consulates in India maintain lists of local doctors and hospitals, all of which are published on their respective websites under "U.S. Citizen Services." Please see "Registration/Embassy and Consulate Location" section below.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation. Many insurers rarely make payment directly to overseas heath care providers. For health care received in India, you will most likely need to pay up front and be reimbursed later for expenses you incur during treatment.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning India is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Travel by road in India is dangerous. A number of U.S. citizens have suffered fatal traffic accidents in recent years. Travel at night is particularly hazardous. Buses, patronized by hundreds of millions of Indians, are convenient in that they serve almost every city of any size. However, they are usually driven fast, recklessly, and without consideration for the rules of the road. Accidents are quite common. Trains are safer than buses, but train accidents still occur more frequently than in developed countries. In order to drive in India, one must have either a valid Indian driver's license or a valid international driver's license. Because of difficult road and traffic conditions, many Americans who visit India wisely choose to hire a local driver.

On Indian roads, the safest driving policy is to always assume that other drivers will not respond to a traffic situation in the same way you would in the United States. On Indian roads, might makes right, and buses and trucks epitomize this fact. For instance, buses and trucks often run red lights and merge directly into traffic at yield points and traffic circles. Cars, auto-rickshaws, bicycles and pedestrians behave only slightly more cautiously. Frequent use of one's horn or flashing of headlights to announce one's presence is both customary and wise.

Outside major cities, main roads and other roads are poorly maintained and congested. Even main roads often have only two lanes, with poor visibility and inadequate warning markers. On the few divided highways one can expect to meet local transportation traveling in the wrong direction, often without lights. Heavy traffic is the norm and includes (but is not limited to) overloaded trucks and buses, scooters, pedestrians, bullock and camel carts, horse or elephant riders en route to weddings, bicycles, and free-roaming livestock. Traffic in India moves on the left. It is important to be alert while crossing streets and intersections, especially after dark as traffic is coming in the "wrong" direction (i.e., from the left). Travelers should remember to use seatbelts in both rear and front seats where available, and to ask their drivers to maintain a safe speed.

If a driver hits a pedestrian or a cow, the vehicle and its occupants are at risk of being attacked by passersby. Such attacks pose significant risk of injury or death to the vehicle's occupants or at least of incineration of the vehicle. It can thus be unsafe to remain at the scene of an accident of this nature, and drivers may instead wish to seek out the nearest police station. Protestors often use road blockage as a means of publicizing their grievances, causing severe inconvenience to travelers. Visitors should monitor local news reports for any reports of road disturbances.

Emergency Numbers: The following emergency numbers work in New Delhi, Mumbai, Chennai, and Kolkata:

Police: 100
Fire Brigade: 101
Ambulance: 102

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of India's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of India's air carrier operations. Civil aircraft have been detained a number of times for deviating from approved flight plans. U.S. citizens piloting civil aircraft in India must file any changes to previous flight plans with the appropriate Indian authorities and may not overfly restricted airspace.

Dual Nationality: In 2006, India launched the "Overseas Citizens of India" (OCI) program, which has often been mischaracterized as a dual nationality program, as it does not grant Indian citizenship. Thus, an American who obtains an OCI card is not a citizen of India and remains a citizen of the United States. An OCI card in reality is similar to a U.S. "green card" in that a holder can travel to and from India indefinitely, work in India, study in India, and own property in India (except for certain agricultural and plantation properties). An OCI holder, however, does not receive an Indian passport, cannot vote in Indian elections and is not eligible for Indian government employment. The OCI program is similar to the Persons of Indian Origin (PIO) card introduced by the Indian government several years ago, except that PIO holders must still register with Indian immigration authorities, and PIO cards are not issued for an indefinite period. American citizens of Indian descent can apply for PIO or OCI cards at the Indian Embassy in Washington, or at the Indian Consulates in Chicago, New York, San Francisco and Houston. Inside India, American citizens can apply at the nearest FRRO office (please see "Entry/Exit Requirements" section above for more information on the FRRO).

Religious Activities: Foreign visitors planning to engage in religious

proselytizing are required by Indian law to have a "missionary" visa. Immigration authorities have determined that certain activities, including speaking at religious meetings to which the general public is invited, may violate immigration law if the traveler does not hold a missionary visa. Foreigners with tourist visas who engage in missionary activity are subject to deportation and possible criminal prosecution. The states of Orissa, Chhattisgarh, and Madhya Pradesh have active legislation regulating conversion from one religious faith to another. Gujarat, Himachal Pradesh and Arunachal Pradesh currently have inactive laws restricting conversion and are awaiting accompanying regulations needed for enforcement. The state legislatures of Rajasthan have passed a similar act, but it was twice refused by the Governor and forwarded to the President for legal review and guidance on its constitutional merit. U.S. citizens intending to engage in missionary activity may wish to seek legal advice to determine whether the activities they intend to pursue are permitted under Indian law. Foreigners suspected of or actually proselytizing Hindus have been attacked in conservative, rural areas in India, including Orissa.

Customs Restrictions: Indian customs authorities enforce strict regulations concerning temporary importation into or export from India of items such as firearms, antiquities, electronic equipment, currency, ivory, gold objects, and other prohibited materials. Even transit passengers require permission from the Government of India to bring in such items. Those not complying risk arrest and/or fine and confiscation of these items. If charged with any alleged legal violations by Indian law enforcement, it is recommended that an attorney review any document prior to signing. The Government of India requires the registration of antique items with the local police along with a photograph of the item. It is advisable to contact the Embassy of India in Washington or one of India's consulates in the United States for specific information regarding customs requirements. More information is available from the Indian Central Board of Excise and Customs at http://www.cbec.gov.in/cae1-english.htm. Another useful site is https://igiacustoms.gov.in/about.htm. In many countries around the world, including India, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under Indian law. In addition, bringing them back to the United States may result in forfeitures and/or fines.

Indian customs authorities encourage the use of an ATA (Admission Temporaire/Temporary Admission) Carnet for the temporary admission of professional equipment, commercial samples, and/or goods for exhibitions and fair purposes. ATA Carnet Headquarters, located at the U.S. Council for International Business, 1212 Avenue of the Americas, New York, NY 10036, issues and guarantees the ATA Carnet in the United States. For additional information call (212) 354-4480, e-mail atacarnet@uscib.org or visit http://www.uscib.org for details.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Indian laws, even unknowingly, may be expelled, arrested or imprisoned. For example, certain comments or gestures towards women, Indian national symbols, or religion that are legal in the United States may be considered a criminal violation in India, subjecting the accused to possible fines or imprisonment. Furthermore, since the police may arrest anyone who is accused of committing a crime (even if the allegation is frivolous in nature), the Indian criminal justice system is often used to escalate personal disagreements into criminal charges. This practice has been increasingly exploited by dissatisfied business partners, contractors, estranged spouses, or other persons with whom the U.S. citizen has a disagreement, occasionally resulting in the jailing of U.S. citizens pending resolution of their disputes. At the very least, such circumstances can delay the U.S. citizen's timely departure from India, and may result in an unintended long-term stay in the country.

Corruption in India, especially at local levels, is a concern, as evidenced by Transparency International's Corruption Perception Index of 3.5, ranking India in 72nd place of the world's countries. Penalties for possession, use, or trafficking in illegal drugs in India are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in India is a crime, and is prosecutable in the United States.

Children's Issues: India is not a signatory to the Hague Convention on the Civil Aspects of International Child Abduction (although the Government of India has expressed its intention to sign the convention at some point in the future), nor is international child abduction considered to be a crime under Indian law.

Registration and Embassy and Consulate Locations: Americans living or traveling in India are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site and to obtain updated information on travel and security in India. Americans without Internet access may register in person with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy in New Delhi is located at Shanti Path, Chanakya Puri 110021; telephone +91-11-2419-8000; fax +91-11-2419-8407. The Embassy's Internet home page address is http://newdelhi.usembassy.gov. (Note that the "+" sign indicates your international access code, which in the United States is 011-, but which is 00- in most other countries.)

The U.S. Consulate General in Mumbai (Bombay) is located at Lincoln House, 78 Bhulabhai Desai Road, 400026, telephone +91-22-2363-3611; fax +91-22-2363-0350. The Internet home page address is http://mumbai.usconsulate.gov.

The U.S. Consulate General in Kolkata (Calcutta) is at 5/1 Ho Chi Minh Sarani, 700071; telephone +91-33-3984-2400; fax +91-33-2282-2335. The Internet home page address is http://kolkata.usconsulate.gov.

The U.S. Consulate General in Chennai (Madras) is at 220 Anna Salai, Gemini Circle, 600006; telephone +91-44-2857-4000; fax +91-44-2857-4443. The Internet home page address is http://chennai.usconsulate.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

India is a member of The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention). Therefore, all adoptions between India and the United States must meet the requirements of the Convention and the United States law implementing the Convention. For detailed information on these requirements for adoption, please review the *Intercountry Adoption* section of this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov. Indian law does not permit foreigners to adopt Indian children, but rather to receive guardianship (or legal custody) of a child. This allows prospective adoptive parents to depart India and to adopt the child in the United States.

Who Can Adopt? Adoption between the United States and India is governed by The Hague Adoption Convention. Therefore to adopt from India, you must first be found eligible to be an adoptive parent by the United States Government.

In addition to the United States requirements for prospective adoptive parents, India also has the following eligibility requirements for prospective adoptive parents.

Residence Requirements: There are no residency requirements for intercountry adoptions from India.

Age Requirements: Prospective adoptive parents can't be less than 30 or more than 55 years of age. Married couples must have a combined age of 90 or less. Single parents up to the age of 45 can adopt. Prospective adoptive parents should be at least 21 years older than the child.

Marriage Requirements: Prospective adoptive parents can be married or single.

Income Requirements: There are no income requirements for intercountry adoptions from India.

Other Requirements: Indian law only allows Hindus, Sikhs, Jains and Buddhists to complete full adoptions of Indian children. However, Under the Guardian and Wards Act of 1890, foreigners may petition an Indian District Court (or Family Court in larger urban areas) for legal custody (guardianship) of a child for the purpose of taking the child abroad to conclude a full and final adoption.

Who Can Be Adopted? Because India is a member of The Hague Adoption Convention, children from India must meet the requirements of the Convention in order to be eligible for adoption. India makes an effort to place all abandoned or relinquished children with an Indian family in India first. If that is not possible, then they prefer that an Indian family abroad be found. Finally, if no Indian family can be found, then the child can be placed with a non-Indian resident family. Typically prospective adoptive parents resident in Indian will find the process goes much more quickly and smoothly than for non-resident prospective adoptive parents.

India's Adoption Authority: Central Adoption Resource Agency

The Process: The first step in adopting a child from India is to select an agency in the United States that has been accredited. Only accredited agencies (and approved attorneys) can provide adoption services between the United States and India.

Under Indian law, foreign prospective adoptive parents considering adoption of a child from India are required to use an adoption agency that is "enlisted" with the Indian Central Adoption Resource Agency (CARA).

Further details on enlisted agencies may be found on the CARA web site at http://www.adoptionindia.nic.in/carahome.html. These agencies then work with a local placement agency to complete the custody process in India on behalf of the prospective parents.

After you choose an accredited adoption agency, you apply to be found eligible to adopt by the USCIS. Once the United States Government determines you "eligible" and "suitable" to be an adoptive parent, your information will be forwarded to the adoption authority in India. India's adoption authority will review your application to determine whether you are also eligible to adopt under India's law.

If both the United States and India determine that you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority will provide you with a referral for a child. You cannot identify a specific child that you would like to adopt prior to the adoption authority providing this referral.

After you accept a match with a child, you will apply to the USCIS for provisional approval to adopt that particular child (Form I-800). After this, your adoption service provider or you will submit a visa application to a Consular Officer at the United States

Embassy. If the Consular Office determines that the child appears eligible to immigrate to the United States, he/she will notify India's adoption authority (Article 5 letter). For Convention country adoptions, prospective adoptive parent(s) may not proceed with the adoption or obtain custody for the purpose of adoption until this takes place.

Role of the Adoption Authority: The Central Adoption Resource Agency is the official national agency that oversees intercountry adoptions in India.

Role of the Court: The court will normally require, at a minimum the "No Objection Certificate" (NOC), a birth certificate or affidavit of birth, and evidence of abandonment to grant the custody order.

Role of Adoption Agencies: In addition, all recognized adoption agencies (or, as they are referred to in India, placement agencies) in India are local and must be registered with their Indian state Voluntary Coordinating Agency (VCA). Placement agencies do not provide national coverage, so prospective adoptive parents must determine the Indian state from which they propose to adopt. The Central Adoption Resource Agency (CARA), established in 1990, licenses all the VCAs and all Indian placement agencies. The Indian placement agency usually files the paperwork with the court, minimizing the need for a private attorney. However, links to attorneys lists maintained by the United States Embassy and three consulates in India are provided below.

New Delhi—
http://newdelhi.usembassy.gov/judicial_assistance.html

Chennai—
http://chennai.usconsulate.gov/uploads/images/ia8t6wtgvUD1ip1tJSW4jg/wwwflawyer.pdf

Mumbai—
http://mumbai.usconsulate.gov/judicial_assistance.html

Calcutta—
http://kolkata.usconsulate.gov/list_of_attorneys.html

Time Frame: Once prospective adoptive parents have received approval to adopt abroad (approval of I-600A petition) and arrived in India, they can expect approximately two to three months to complete all formalities in India.

Adoption Fees: Adoption fees to adopt an Indian child are approximately $3,500 USD. This amount does not include any United States-based expenses (such as the home study, application or petition filing costs, etc.). Prospective adoptive parents can expect to pay a total of between $12,000 and $15,000 USD for adoption services.

In the adoption services contract that you sign at the beginning of the adoption process, your agency will itemize the fees and estimated expenses related to your adoption process.

Documents Required: All prospective adoptive parents must provide the following documents to the Indian District Court when applying for guardianship of an Indian child:

- Approved I-600A;
- Birth certificate for the child;
- Abandonment certificate for the child from an approved adoption agency;
- No Objection Certificate from CARA; and
- Child's Indian Passport.

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents.

For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: There are no post-adoption requirements for intercountry adoptions from India.

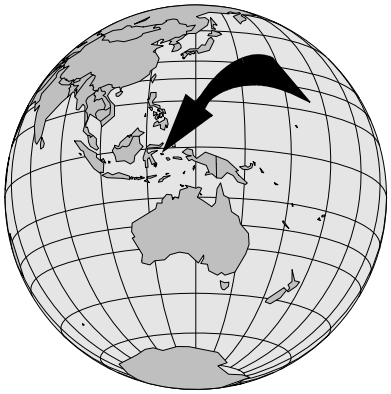
Travel Alert
December 24, 2008

The Department of State warns U.S. citizens that there is a high threat of terrorism throughout India, and advises U.S. citizens traveling to or already in India to maintain a high level of vigilance and to take appropriate steps to increase their security awareness, especially during the end-of-year holidays until India's Republic Day, January 26. This Travel Alert expires on January 31, 2009 and replaces that issued on December 19 to provide updated information regarding the security situation.

The November 26 terrorist attack in Mumbai was carried out at venues frequented by Americans. That attack killed 170 persons (including six Americans and 16 other non-Indians) and injured 300. Future attacks may also target public places frequented by Westerners, including in large cities and tourist areas. In response to perceived threats of terror attacks there, the Government of Goa has restricted beach parties and other large outdoor gatherings from December 23 to January 5.



The U.S. Mission is concerned that increased political tension between Pakistan and India may further complicate travel in areas near their already-sensitive border. In addition, the Department of Defense has increased its security requirements for all its employees visiting India.

Because of the number and diversity of terror attacks in India during the past two years, Americans in India should be vigilant about security at all times. They should monitor local news, vary their routes and times, and consider the level of security when visiting public places, such as religious sites, hotels, restaurants, or entertainment and recreation venues. U.S. citizens should keep a low profile, avoid crowds and demonstrations, and maintain valid travel documents. Finally, travelers should plan on added time to account for increased security, especially at hotels and airports. For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at http://travel.state.gov where the current Worldwide Caution, Travel Warnings, and Travel Alerts can be found. Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the United States and Canada or, for callers outside the United States and Canada, a regular toll line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays). Americans are also encouraged to read the Country Specific Information for India, available on the Embassy's website at http://newdelhi.usembassy.gov, and also at http://travel.state.gov.

U.S. citizens living or traveling abroad are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site at https://travelregistration.state.gov/ibrs/ui so that they can obtain updated information on travel and security. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

U.S. citizens may contact the American Citizens Services Unit of the Embassy or the Consulates General for further information. The U.S. Embassy in New Delhi is located at Shanti Path, Chanakya Puri 110021; telephone +91-11-2419-8000; fax +91-11-2419-8407. The Embassy's Internet home page address is http://newdelhi.usembassy.gov. The U.S. Consulate General in Mumbai (Bombay) is located at Lincoln House, 78 Bhulabhai Desai Road, 400026, telephone +91-22-2363-3611; fax +91-22-2363-0350. The Internet home page address is http://mumbai.usconsulate.gov. The U.S. Consulate General in Chennai (Madras) is at 220 Anna Salai, Gemini Circle, 600006, telephone +91-44-2857-4000; fax +91-44-2811-2027. The Internet home page address is http://chennai.usconsulate.gov.

The U.S. Consulate General in Kolkata (Calcutta) is at 5/1 Ho Chi Minh Sarani, 700071; telephone +91-33-3984-2400; fax +91-33-2282-2335. The Internet home page address is http://kolkata.usconsulate.gov.

INDONESIA

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Indonesia

PROFILE

Geography

Area: 2 million sq. km. (736,000 sq. mi.), about three times the size of Texas; maritime area: 7,900,000 sq. km.

Cities: Capital—Jakarta (est. 8.8 million). Other cities—Surabaya 3.0 million, Medan 2.5 million, Bandung 2.5 million.

Terrain: More than 17,500 islands; 6,000 are inhabited; 1,000 of which are permanently settled. Large islands consist of coastal plains with mountainous interiors.

Climate: Equatorial but cooler in the highlands.

People

Nationality: Noun and adjective—Indonesian(s).

Population: (July 2008 est.) 237.5 million.

Annual population growth rate: (2008 est.) 1.175%.

Ethnic groups: (2000 census) Javanese 40.6%, Sundanese 15%, Madurese 3.3%, Minangkabau 2.7%, others 38.4%.

Religions: (2000 census) Muslim 86.1%, Protestant 5.7%, Catholic 3%, Hindu 1.8%, others 3.4%.

Languages: Indonesian (official), local languages, the most prevalent of which is Javanese.

Education: Years compulsory—9. Enrollment—94% of eligible primary school-age children. Literacy—90.4% (2007).

Health: Infant mortality rate—31.04/1,000 (2008 est.). Life expectancy at birth—70.46 years (2008 est.).

Work force: 111.5 million (2008). Agriculture—42%, industry—12%, services—44%.

Government

Type: Independent republic.

Independence: August 17, 1945 proclaimed.

Constitution: 1945. Embodies five principles of the state philosophy, called Pancasila, namely monotheism, humanitarianism, national unity, representative democracy by consensus, and social justice.

Government branches: Executive—president (head of government and chief of state) elected by direct popular vote. Legislative—The People's Consultative Assembly (MPR), which includes the 550-member House of Representatives (DPR) and the 128-member Council of Regional Representatives (DPD), both elected to five-year terms. Judicial—Supreme Court.

Suffrage: 17 years of age universal and married persons regardless of age.

Economy

GDP: (2007) $433 billion; (2008 est.): $500 billion.

Annual growth rate: (2007) 6.3%; (2008 est.): 6.1%.

Inflation: (2007) 6.6%; (2008 est.): 11.5-12.5% (end-period).

Per capita income: (2007) $3,700 (est., PPP).

Natural resources: (11.1% of GDP): Oil and gas, bauxite, silver, tin, copper, gold, coal.

Agriculture: (13.8% of GDP) Products—timber, rubber, rice, palm oil, coffee. Land—17% cultivated.

Manufacturing: (27% of GDP) Garments, footwear, electronic goods, furniture, paper products.

Trade: Exports (2007)—$118.1 billion including oil, natural gas, appliances, textiles. Major exporters—Japan, U.S., Singapore, Republic of Korea, China. Imports (2007)—$84 billion including food, chemicals, capital goods, consumer goods. Major importers—Singapore, Japan, China.

PEOPLE

Indonesia's approximately 237.5 million people make it the world's fourth-most populous nation. The island of Java, roughly the size of New York State, is the most populous island in the world (124 million, 2005 est.) and one of the most densely populated areas in the world. Indonesia

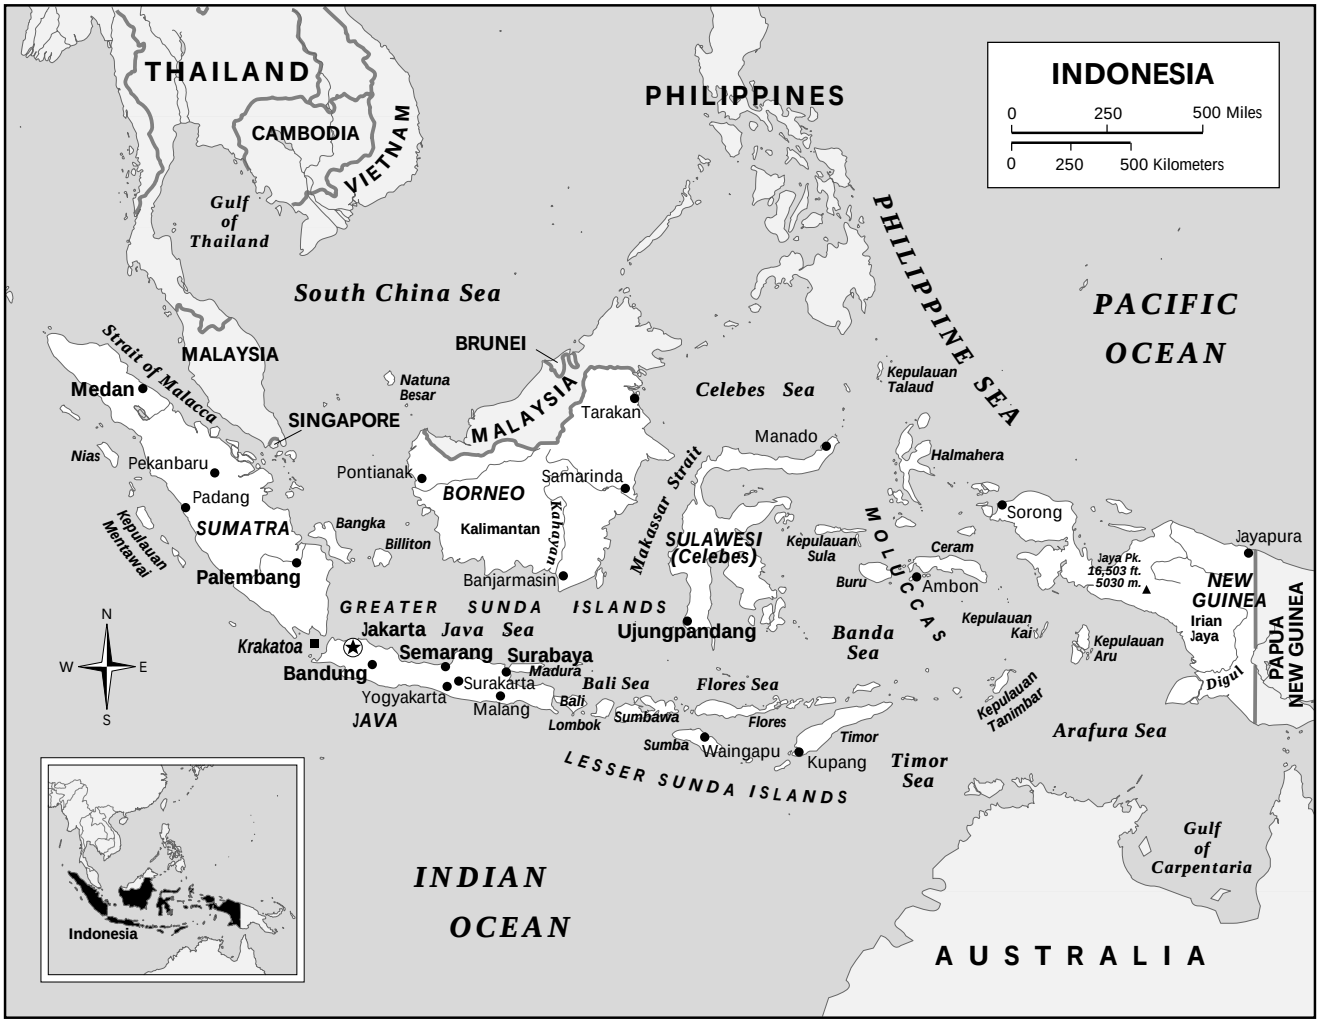
includes numerous related but distinct cultural and linguistic groups, many of which are ethnically Malay. Since independence, Bahasa Indonesia (the national language, a form of Malay) has spread throughout the archipelago and has become the language of most written communication, education, government, business, and media. Local languages are still important in many areas, however. English is the most widely spoken foreign language. Education is compulsory for children through grade 9. In primary school, 94% of eligible children are enrolled whereas 57% of eligible children are enrolled in secondary school.

Constitutional guarantees of religious freedom apply to the six religions recognized by the state, namely Islam (86.1%), Protestantism (5.7%), Catholicism (3%), Hinduism (1.8%), Buddhism (about 1%), and Confucianism (less than 1%). On the resort island of Bali, over 90% of the population practices Hinduism. In some remote areas, animism is still practiced.

HISTORY

By the time of the Renaissance, the islands of Java and Sumatra had already enjoyed a 1,000-year heritage of advanced civilization spanning two major empires. During the 7th-14th centuries, the Buddhist kingdom of Srivijaya flourished on Sumatra. At its peak, the Srivijaya Empire reached as far as West Java and the Malay Peninsula. Also by the 14th century, the Hindu Kingdom of Majapahit had risen in eastern Java. Gadjah Mada, the empire's chief minister from 1331 to 1364, succeeded in gaining allegiance from most of what is now modern Indonesia and much of the Malay archipelago as well. Legacies from Gadjah Mada's time include a codification of law and an epic poem. Islam arrived in Indonesia sometime during the 12th century and, through assimilation, supplanted Hinduism by the end of the 16th century in Java and Sumatra. Bali, however, remains overwhelmingly Hindu. In the eastern archipelago, both Christian and Islamic proselytizing took place in the 16th and 17th centuries, and, currently, there are large communities of both religions on these islands.

Beginning in 1602, the Dutch slowly established themselves as rulers of present-day Indonesia, exploiting the weakness of the small kingdoms that had replaced that of Majapahit. The only exception was East Timor, which remained under Portugal's control until 1975. During 300 years of rule, the Dutch developed the Netherlands East Indies into one of the world's richest colonial possessions.



During the first decade of the 20th century, an Indonesian independence movement began and expanded rapidly, particularly between the two World Wars. Its leaders came from a small group of young professionals and students, some of whom had been educated in the Netherlands. Many, including Indonesia's first president, Soekarno (1945-67), were imprisoned for political activities.

The Japanese occupied Indonesia for three years during World War II (1942-1945). On August 17, 1945, three days after the Japanese surrender to the Allies, a small group of Indonesians, led by Soekarno and Mohammad Hatta, proclaimed independence and established the Republic of Indonesia. They set up a provisional government and adopted a constitution to govern the republic until elections could be held and a new constitution written. Dutch efforts to reestablish complete control met strong resistance. After four years of warfare and negotiations, the Dutch transferred sovereignty to a federal Indonesian Government. In 1950, Indonesia became the 60th member of the United Nations.

Shortly after hostilities with the Dutch ended in 1949, Indonesia adopted a new constitution, providing for a parliamentary system of government in which the executive was chosen by and accountable to parliament. Parliament was divided among many political parties before and after the country's first nationwide election in 1955, and stable governmental coalitions were difficult to achieve. The role of Islam in Indonesia became a divisive issue. Soekarno defended a secular state based on Pancasila, five principles of the state philosophy—monotheism, humanitarianism, national unity, representative democracy by consensus, and social justice—codified in the 1945 constitution, while some Muslim groups preferred either an Islamic state or a constitution which included a preambular provision requiring adherents of Islam to be subject to Islamic law. At the time of independence, the Dutch retained control over the western half of New Guinea (known as Irian Jaya in the Soekarno and Soeharto eras and as Papua since 2000) and permitted steps toward self-government and independence.

Negotiations with the Dutch on the incorporation of Irian Jaya into Indonesia failed and armed clashes broke out between Indonesian and Dutch troops in 1961. In August 1962, the two sides reached an agreement and Indonesia assumed administrative responsibility for Irian Jaya on May 1, 1963. The Indonesian Government conducted an "Act of Free Choice" in Irian Jaya under UN supervision in 1969 in which 1,025 Papuan representatives of local councils agreed by consensus to remain a part of Indonesia. A subsequent UN General Assembly resolution confirmed the transfer of sovereignty to Indonesia. Opposition to Indonesian administration of Papua gave rise to small-scale guerrilla activity in the years following Jakarta's assumption of control. In the more open atmosphere since 1998, there have been more explicit expressions within Papua calling for independence from Indonesia.

Unsuccessful rebellions on Sumatra, Sulawesi, West Java, and other islands beginning in 1958, plus a failure by the constituent assembly to develop a new constitution, weakened the parliamentary system. Consequently, in 1959, when President Soekarno unilaterally revived the provisional 1945 constitution that gave broad presidential powers, he met little resistance. From 1959 to 1965, President Soekarno imposed an authoritarian regime under the label

of "Guided Democracy." He also moved Indonesia's foreign policy toward nonalignment, a foreign policy stance supported by other prominent leaders of former colonies who rejected formal alliances with either the West or Soviet bloc. Under Soekarno's auspices, these leaders gathered in Bandung, West Java in 1955 to lay the groundwork for what became known as the Non-Aligned Movement. In the late 1950s and early 1960s, President Soekarno moved closer to Asian communist states and toward the Indonesian Communist Party (PKI) in domestic affairs. Though the PKI represented the largest communist party outside the Soviet Union and China, its mass support base never demonstrated an ideological adherence typical of communist parties in other countries.

By 1965, the PKI controlled many of the mass civic and cultural organizations that Soekarno had established to mobilize support for his regime and, with Soekarno's acquiescence, embarked on a campaign to establish a "Fifth Column" by arming its supporters. Army leaders resisted this campaign. Under circumstances that have never been fully explained, on October 1, 1965, PKI sympathizers within the military, including elements from Soekarno's palace guard, occupied key locations in Jakarta and kidnapped and murdered six senior generals. Major General Soeharto, the commander of the Army Strategic Reserve, rallied army troops opposed to the PKI to reestablish control over the city. Violence swept throughout Indonesia in the aftermath of the October 1 events and unsettled conditions persisted through 1966. Right-wing gangs killed tens of thousands of alleged communists in rural areas. Estimates of the number of deaths range between 160,000 and 500,000. The violence was especially brutal in Java and Bali. During this period, PKI members by the tens of thousands turned in their membership cards. The emotions and fears of instability created by this crisis persisted for many years as the communist party remains banned from Indonesia.

Throughout the 1965-66 period, President Soekarno vainly attempted to restore his political stature and shift the country back to its pre-October 1965 position. Although he remained President, in March 1966, Soekarno transferred key political and military powers to General Soeharto, who by that time had become head of the armed forces. In March 1967, the Provisional People's Consultative Assem-

bly (MPRS) named General Soeharto acting President. Soekarno ceased to be a political force and lived under virtual house arrest until his death in 1970.

President Soeharto proclaimed a "New Order" in Indonesian politics and dramatically shifted foreign and domestic policies away from the course set in Soekarno's final years. The New Order established economic rehabilitation and development as its primary goals and pursued its policies through an administrative structure dominated by the military but with advice from Western-educated economic experts. In 1968, the People's Consultative Assembly (MPR) formally selected Soeharto to a full five-year term as President and he was re-elected to successive 5-year terms in 1973, 1978, 1983, 1988, 1993, and 1998. In mid-1997, Indonesia suffered from the Asian financial and economic crisis, accompanied by the worst drought in 50 years and falling prices for oil, gas, and other commodity exports. As the exchange rate changed from a fixed to a managed float to fully floating, the rupiah depreciated in value, inflation increased significantly, and capital flight accelerated. Demonstrators, initially led by students, called for Soeharto's resignation. Amid widespread civil unrest, Soeharto resigned on May 21, 1998, three months after the MPR had selected him for a seventh term. Soeharto's hand-picked Vice President, B.J. Habibie, became Indonesia's third President. President Habibie reestablished International Monetary Fund (IMF) and donor community support for an economic stabilization program. He released several prominent political and labor prisoners, initiated investigations into the unrest, and lifted controls on the press, political parties, and labor unions.

In January 1999, Habibie and the Indonesian Government agreed to a process, with UN involvement, under which the people of East Timor would be allowed to choose between autonomy and independence through a direct ballot held on August 30, 1999. Some 98% of registered voters cast their ballots, and 78.5% of the voters chose independence over continued integration with Indonesia. Many people were killed by Indonesian military forces and military-backed militias in a wave of violence and destruction after the announcement of the pro-independence vote.

Indonesia's first elections in the post-Soeharto period were held for the national, provincial, and sub-provincial parliaments on June 7, 1999. Forty-eight political parties participated in the elections. For the national parliament, Partai Demokrasi Indonesia Perjuangan (PDI-P, Indonesian Democratic Party of Struggle led by Megawati Soekarnoputri) won 34% of the vote; Golkar ("Functional Groups" party) 22%; Partai Kebangkitan Bangsa (PKB, National Awakening Party linked to the conservative Islamic organization Nadhlatul Ulama headed by former President Abdurrahman Wahid) 13%; and Partai Persatuan Pembangunan (PPP, United Development Party led by Hamzah Haz) 11%. The MPR selected Abdurrahman Wahid as Indonesia's fourth President in November 1999 and replaced him with Megawati Soekarnoputri in July 2001.

The constitution, as amended in the post-Soeharto era, provides for the direct election by popular vote of the president and vice president. Under the 2004 amendment, only parties or coalitions of parties that gained at least 3% of the House of Representatives (DPR) seats or 5% of the vote in national legislative elections were eligible to nominate a presidential and vice presidential ticket. The 2004 legislative elections took place on April 5 and were considered to be generally free and fair. PDI-P lost its plurality in the House of Representatives, dropping to under 19% of the total vote, while Golkar remained near 1999 levels with 21% of the vote. Five other parties won between 6 and 11% of the national vote. Of the 18 other parties that participated, nine won small numbers of seats in the DPR. The first direct presidential election was held on July 5, 2004, contested by five tickets. As no candidate won at least 50% of the vote, a runoff election was held between the top two candidates, President Megawati Sukarnoputri and retired General Susilo Bambang Yudhoyono, on September 20, 2004. In this final round, Yudhoyono won 60.6% of the vote. Approximately 76.6% of the eligible voters participated, a total of roughly 117 million people, making Indonesia's presidential election the largest single-day election in the world. The Carter Center, which sent a delegation of election observers, issued a statement congratulating "the people and leaders of Indonesia for the successful conduct of the presidential election and the peaceful atmosphere that has prevailed throughout the ongoing democratic transition."

Natural disasters have devastated many parts of Indonesia over the past few years. On December 26, 2004 a 9.1 to 9.3 magnitude earthquake took place in the Indian Ocean, and the resulting tsunami killed over 130,000 people in Aceh and left more than 500,000 homeless. On March 26, 2005, an 8.7 magnitude earthquake struck between Aceh and northern Sumatra, killing 905 people and displacing tens of thousands. After much media attention of the seismic activity on Mt. Merapi in April and May 2006, a 6.2 magnitude earthquake occurred 30 miles to the southwest. It killed over 5,000 people and left an estimated 200,000 people homeless in the Yogyakarta region.

GOVERNMENT AND POLITICAL CONDITIONS

Indonesia is a republic based on the 1945 constitution providing for a separation of executive, legislative, and judicial power. Substantial restructuring has occurred since President Soeharto's resignation in 1998 and the short, transitional Habibie administration in 1998 and 1999. The Habibie government established political reform legislation that formally set up new rules for the electoral system, the House of Representatives (DPR), the People's Consultative Assembly (MPR), and political parties without changing the

1945 Indonesian constitution. After these reforms, the constitution now limits the president to two terms in office.

The president, elected for a five-year term, is the top government and political figure. The president and the vice president were elected by popular vote for the first time on September 20, 2004. Previously, the MPR selected Indonesia's president. In 1999, the MPR selected Abdurrahman Wahid, also known as Gus Dur, as the fourth President.

The MPR removed Gus Dur in July 2001, immediately appointing then-Vice President Megawati Soekarnoputri as the fifth President. Megawati brought a certain amount of stability to Indonesia, yet there were concerns over progress on combating corruption and encouraging economic growth. In 2004, Susilo Bambang Yudhoyono was elected to succeed Megawati. National legislative and presidential elections will be held in 2009. The president, assisted by an appointed cabinet, has the authority to conduct the administration of the government. President Yudhoyono's Democratic Party (PD) holds 55 of the 550 seats in the House of Representatives (DPR), making it the fourth-largest political party represented in the legislature as of 2008. Yudhoyono, however, also had the support of other political parties that combined to hold a majority of the seats in the DPR.

The People's Consultative Assembly (MPR) has 678 members, consisting of the 550 members of the DPR and the 128 representatives of the Council of Regional Representatives (DPD), which includes four members from 32 of Indonesia's 33 provinces. Since 2004, all seats in the DPR and DPD have been held by legislators elected by the citizenry. Previously, some seats had been reserved for representatives of the armed forces. The military has been a significant political force throughout Indonesian history, though it had ceded its formal political role by 2004.

The armed forces shaped the political environment and provided leadership for Soeharto's New Order from the time it came to power in the wake of the abortive 1965 uprising. Military officers, especially from the army, were key advisers to Soeharto and Habibie and had considerable influence on policy. Under the dual function concept ("dwifungsi"), the military asserted a continuing role in socio-political affairs.

This concept was used to justify placement of officers to serve in the civilian bureaucracy at all government levels. Although the military retains influence and is one of the only truly national institutions, the wide-ranging democratic reforms instituted since 1999 abolished "dwifungsi" and ended the armed forces' formal involvement in government administration. The police have been separated from the military, further reducing the military's direct role in governmental matters. Control of the military by the democratically elected government has been strengthened. As a reaction to Soeharto's centralization of power and reflecting historically independent sentiment, Hasan di Tiro established the Free Aceh Movement (Gerakan Aceh Merdeka, GAM) in December 1976 to seek independence for Aceh. Some 15,000 died in military conflict in Aceh over the following three decades. Through peace talks led by former Finnish president Martti Ahtisaari, a peace agreement between GAM and the Indonesian Government that provided wide-ranging autonomy for Aceh was signed on August 15, 2005.

By December 2005, GAM declared that they had disbanded the military wing of their organization, and the Indonesian Government had withdrawn the bulk of its security forces down to agreed levels. On December 11, 2006, Aceh held gubernatorial and district administrative elections, the first democratic elections in over half a century in Aceh.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Susilo Bambang YUDHOYONO**
Vice Pres.: **Muhammad Yusuf KALLA**
Coordinating Min. for Economic Affairs: **SRI MULYANI Indrawati**
Coordinating Min. for the People's Welfare: **Aburizal BAKRIE**
Coordinating Min. for Political, Legal, & Security Affairs: **WIDODO Adi Sutjipto**
Min. of Agriculture: **Anton APRIYANTONO**
Min. for Communication & Information: **Mohammad NUH**
Min. for Cooperatives & Small & Medium Enterprises: **Suryadharma ALI**
Min. of Culture & Tourism: **Jero WACIK**
Min. of Defense: **Juwono SUDARSONO**
Min. for the Development of Disadvantaged Regions: **Mohammad Lukman EDY**
Min. of Education: **Bambang SUDIBYO**
Min. for Energy & Mineral Resources: **Purnomo YUSGIANTORO**
Min. for the Environment: **Rachmat Nadi WITOELAR Kartaadipoetra**
Min. of Finance: **SRI MULYANI Indrawati**
Min. of Foreign Affairs: **Noer Hassan WIRAJUDA**
Min. of Forestry: **Malam Sambat KABAN**
Min. of Health: **Siti Fadilah SUPARI**
Min. of Home Affairs: **MARDIYANTO**
Min. of Industry: **Fahmi IDRIS**
Min. of Justice & Human Rights: **Andi MATTALATA**
Min. of Manpower & Transmigration: **Erman SUPARNO**
Min. of Maritime Affairs & Fisheries: **Freddy NUMBERI**
Min. for National Development Planning: **Paskah SUZETTA**
Min. for Public Housing: **Mohammad Yusuf ASYARI**
Min. of Public Works: **Joko KIRMANTO**
Min. of Religion: **Muhammad Maftuh BASYUNI**
Min. of Research & Technology: **KUSMAYANTO Kadiman**
Min. of Social Affairs: **Bachtiar CHAMSYAH**
Min. for State Apparatus Reform: **Taufiq EFFENDI**
Min. for State-Owned Enterprises: **Sofyan DJALIL**
Min. of Trade: **Mari Elka PANGESTU**
Min. of Transportation: **Jusman Syafii DJAMAL**
Min. for Women's Empowerment: **Meutia Farida HATTA Swasono**
Min. for Youth & Sports: **Adhyaksa DAULT**
Attorney Gen.: **Hendarman SUPANDJI**
Cabinet Sec.: **Sudi SILALAHI**
State Sec.: **Hatta RAJASA**
Dir., State Intelligence Agency (BIN): **Syamsir SIREGAR**
Governor, Bank Indonesia: **BOEDIONO**
Ambassador to the US: **SUDJADNAN Parnohadiningrat**

Permanent Representative to the UN, New York: **Raden Mohammad Marty Muliana NATALEGAWA**

The Embassy of Indonesia is at 2020 Massachusetts Avenue NW, Washington, DC 20036 (tel. 202-775-5200-5207; fax: 202-775-5365). Consulates General are in New York (5 East 68th Street, New York, NY 10021, tel. 212-879-0600/0615; fax: 212-570-6206); Los Angeles (3457 Wilshire Blvd., Los Angeles, CA 90010; tel. 213-383-5126; fax: 213-487-3971); Houston (10900 Richmond Ave., Houston, TX 77042; tel. 713-785-1691; fax: 713-780-9644). Consulates are in San Francisco (1111 Columbus Avenue, San Francisco, CA 94133; tel. 415-474-9571; fax: 415-441-4320); and Chicago (2 Illinois Center, Suite 1422233 N. Michigan Avenue, Chicago, IL 60601; tel. 312-938-0101/4; 312-938-0311/0312; fax: 312-938-3148).

ECONOMY

Indonesia has a market-based economy in which the government plays a significant role. There are 158 state-owned enterprises and the government administers prices on several basic goods, including fuel, rice, and electricity.

In the mid-1980s, the government began eliminating regulatory obstacles to economic activity. The steps were aimed primarily at the external and financial sectors and were designed to stimulate employment and growth in the non-oil export sector. Annual real gross domestic product (GDP) growth averaged nearly 7% from 1987-97 and most analysts recognized Indonesia as a newly industrializing economy and emerging major market. The Asian financial crisis of 1997 altered the region's economic landscape. With the depreciation of the Thai currency, the foreign investment community quickly reevaluated its investments in Asia. Foreign investors dumped assets and investments in Asia, leaving Indonesia the most affected in the region. In 1998, Indonesia experienced a negative GDP growth of 13.1% and unemployment rose to 15-20%. In the aftermath of the 1997-98 financial crisis, the government took custody of a significant portion of private sector assets via debt restructuring, but subsequently sold most of these assets, averaging a 29% return. Indonesia has since recovered, albeit slower than some of its neighbors, by recapitalizing its banking sector, improving oversight of capital markets, and taking steps to stimulate growth and investment, particularly in infrastructure. GDP growth has steadily risen this decade, achieving real growth of 6.3% in 2007 and projected to exceed 6.0% growth in 2008.

Economic Policy

After he took office on October 20, 2004, President Yudhoyono moved quickly to implement a "pro-growth, pro-poor, pro-employment" economic program. He appointed a respected group of economic ministers who announced a "100-Day Agenda" of short-term policy actions designed to energize the bureaucracy. President Yudhoyono also announced an ambitious anti-corruption plan in December 2004. The State Ministry of National Development Planning (BAPPENAS) released in early 2005 a Medium Term Plan focusing on four broad objectives: creating a safe and peaceful Indonesia; creating a just and democratic Indonesia; creating a prosperous Indonesia; and establishing a stable macroeconomic framework for development. President Yudhoyono reshuffled his cabinet in December 2005, appointing former Finance Minister Boediono as Coordinating Minister for Economic Affairs and moving Sri Mulyani Indrawati from the National Development Planning Agency to the Finance Ministry. In May 2008, President Yudhoyono appointed Boediono as Governor of Bank Indonesia, the central bank. In June 2008, President Yudhoyono appointed Finance Minister Sri Mulyani Indrawati to also serve as Coordinating Minister for Economic Affairs. The Yudhoyono administration targeted average growth of 6.6% from 2004-2009 to reduce unemployment and poverty significantly. Indonesia's overall macroeconomic picture is stable and improving. By 2004, real GDP per capita returned to pre-financial crisis levels. In 2007, domestic consumption continued to account for the largest portion of GDP, at 63%, followed by investment at 24.8%, government consumption at 8.3%, and net exports at 4%. By all measures, investment realization has climbed in each of the past several years.

Following a significant run-up in global energy prices in 2007/2008, the Indonesian Government raised fuel prices by an average of 29% on May 24, 2008 in an effort to reduce its fuel subsidy burden. Fuel subsidies had been projected to reach Rp 265 trillion ($29.4 billion) in 2008, or 5.9% of GDP. The fuel price hikes, along with rising food prices, led to consumer price inflation of 11.9% in July 2008. To help its citizens cope with higher fuel and food prices, the Indonesian Government implemented a direct cash compensation package for low-income families and an extra range of benefits including an expanded subsidized rice program and additional subsidies aimed at increasing food production.

Banking Sector

Indonesia currently has 128 commercial banks, of which 11 are majority foreign-owned and 17 are foreign joint venture banks. The top 15 banks control about 70% of assets in the sector. Four state-owned banks (Bank Mandiri, BNI, BRI, BTN) control about 37.4% of assets. The Indonesian central bank, Bank Indonesia (BI), announced plans in January 2005 to strengthen the banking sector by encouraging consolidation and improving prudential banking and supervision. BI hopes to encourage small banks with less than Rp 100 billion (about U.S. $11 million) in capital to either raise more capital or merge with healthier "anchor banks" before end-2010, announcing the criteria for anchor banks in July 2005. In October 2006, BI announced a single presence policy to further prompt consolidation. The policy stipulates that a single party can own a controlling interest in only one banking organization. Controlling interest is defined as 25% or more of total out-

standing shares or having direct or indirect control of the institution. BI plans to adopt Basel II standards beginning in 2009 and to improve operations of its credit bureau to centralize data on borrowers. Another important banking sector reform was the decision to eliminate the blanket guarantee on bank third-party liabilities. BI and the Indonesian Government completed the process of replacing the blanket guarantee with a deposit insurance scheme run by the independent Indonesian Deposit Insurance Agency (also known by its Indonesian acronym, LPS) in March 2007. The removal of the blanket guarantee did not produce significant deposit outflows from or among Indonesian banks. Sharia banking has grown considerably in Indonesia in recent years, representing 2.15% of the banking sector, about $4.78 billion in assets as of July 2008.

Exports and Trade

Indonesia's exports grew to a record $118 billion in 2007, an increase of 14% from 2006. The largest export commodities for 2007 were oil and gas (19.4%), minerals (18.8%), electrical appliances (13.27%), rubber products (6.8%), and textiles (3.6%). The top four destinations for exports for 2007 were Japan (14.2%), the U.S. (12.3%), Singapore (9.7%), and China (7.3%). Meanwhile, total imports rose 15% to $84 billion in 2007. The U.S. trade deficit with Indonesia increased 1.9% in 2007 to $10.1 billion ($4.2 billion in exports versus $14.3 billion in imports).

Oil and Minerals Sector

Indonesia announced that it would leave the Organization of Petroleum Exporting Countries (OPEC) in 2008, as it had been a net petroleum importer since 2004. Crude and condensate output averaged 954,000 barrels per day (bpd) in 2007. In 2006, the oil and gas sector contributed $11.9 billion of government revenues, or 15.5% of the total. U.S. companies have invested heavily in the petroleum sector. Indonesia ranked tenth in world gas production. In early 2007, Qatar passed Indonesia as the world's number one exporter of liquefied natural gas (LNG). Despite the declining trends, Indonesia's oil and gas trade balance remained positive at $2.3 billion for 2006 and $156 million in 2007, according to unofficial statistics.

Although minerals production traditionally centered on bauxite, silver, and tin, Indonesia is expanding its copper, nickel, gold, and coal output for export markets. In mid-1993, the Energy Ministry reopened the coal sector to foreign investment. Total coal production reached 179 million metric tons in 2007, including exports of 139.9 million tons. Two U.S. firms operate two copper/gold mines in Indonesia, with a Canadian and U.K. firm holding significant investments in nickel and gold, respectively. In 2007 Indonesia ranked fifth among the world's top gold concentrate producers. Indonesian gold production in 2006 was 171 tons. Indonesia achieved its peak output in 2001 with 180 tons. Production mainly came from Freeport's Grasberg mine, the world's biggest gold-producing mine. Indonesia's share of global hard rock mining exploration spending has dropped from 3% to 1%. Since 1998, only three new gold mines have opened. This decline does not reflect Indonesia's mineral prospects, which are high; rather, the decline reflects uncertainty over mining laws and regulations, low competitiveness in the tax and royalty system, and investor concerns over divestment policies and the sanctity of contracts.

Investment

Since the late 1980s, Indonesia has made significant changes to its regulatory framework to encourage investment and economic growth. This growth was financed largely from private investment, both foreign and domestic. U.S. investors provided a majority of the investment in the oil and gas sector and undertook some of Indonesia's largest mining projects. In addition, the presence of U.S. banks, manufacturers, and service providers expanded, especially after the industrial and financial sector reforms of the 1980s. While many petroleum and mining investors remained after the 1997 financial crisis, the number of U.S. investors in other sectors declined. Other major foreign investors include Japan, the United Kingdom, Singapore, the Netherlands, Hong Kong, Taiwan, and South Korea. Infrastructure investment declined steadily after the financial crisis and has not yet recovered. In November 2006, however, the Indonesian Government announced that it was opening up 110 infrastructure projects valued at $16.5 billion and was working on 120 regulations to encourage infrastructure investment.

President Yudhoyono and his economic ministers have stated repeatedly their intention to improve the climate for private sector investment to raise the level of GDP growth and reduce unemployment. In addition to general corruption and legal uncertainty, businesses have cited a number of specific factors that have reduced the competitiveness of Indonesia's investment climate, including: corrupt and inefficient customs services; non-transparent and arbitrary tax administration; inflexible labor markets that have reduced Indonesia's advantage in labor-intensive manufacturing; increasing infrastructure bottlenecks; and uncompetitive investment laws and regulations. In each of the past three years, the Government of Indonesia has announced a series of economic policy packages aimed at stimulating investment and infrastructure improvements and implementing regulatory reform. A new investment law was enacted in 2007, which contains provisions to restrict the share of foreign ownership in a range of industries. The government is considering a review of Indonesia's negative list, but no changes or revisions had been announced as of September 2008.

On September 2, 2008, the DPR passed long-awaited tax reform legislation. The legislation, which awaits presidential signature, will reduce corporate and personal income tax rates as of January 1, 2009. Corporate income tax rates will fall from 30% to 28% in 2009 and 25% in 2010, with additional reductions for small and medium enterprises and publicly

listed companies. The legislation raises the taxable income threshold for individuals, cuts the maximum personal income tax from 35% to 30%, and provides lower marginal personal income tax rates across four income categories. Taxes on dividends will also fall from a maximum of 20% to a maximum of 10%. Long-planned labor reforms have been delayed.

The passage of a new copyright law in July 2002 and accompanying optical disc regulations in 2004 greatly strengthened Indonesia's intellectual property rights (IPR) regime. Despite the government's significantly expanded efforts to improve enforcement, IPR piracy remains a major concern to U.S. intellectual property holders and foreign investors, particularly in the high-technology sector. In March 2006, President Yudhoyono issued a decree establishing a National Task Force for IPR Violation Prevention. The IPR Task Force was intended to formulate national policy to prevent IPR violations and determine additional resources needed for prevention, as well as to help educate the public through various activities and improve bilateral, regional, and multilateral cooperation to prevent IPR violations. It has yet to fully realize these aims. In 2007, Indonesia was removed from the U.S. Trade Representative's "Priority Watch" list and placed on the "Watch" list.

Environment

President Yudhoyono's administration has significantly increased Indonesia's global profile on environmental issues, and U.S.-Indonesia cooperation on the environment has grown substantially. Indonesia is particularly vulnerable to the effects of climate change, which include rising sea levels and erosion of coastal areas, increased frequency and intensity of extreme weather events, species extinction, and the spread of vector-borne diseases. At the same time, Indonesia faces challenges in addressing the causes of climate change. Indonesia has the world's second-largest tropical forest and the fastest deforestation rate, making it the third-largest contributor of greenhouse gas emissions, behind the U.S. and China. In December 2007, Indonesia hosted the 13th Conference of the Parties of the United Nations Framework Convention on Climate Change (UNFCCC), and led efforts to highlight the importance of forests and deforestation in the climate debate.

In 2004, President Yudhoyono initiated a multi-agency drive against illegal logging that has significantly decreased illegal logging through stronger enforcement activities. The State Department and the U.S. Trade Representative have negotiated with the Indonesian Ministries of Trade and Forestry the U.S. Government's first Memorandum of Understanding on Combating Illegal Logging and Associated Trade. Presidents George W. Bush and Yudhoyono announced the MOU during President Bush's November 2006 visit to Indonesia. Implementation of the MOU includes collaboration on sustainable forest management, improved law enforcement, and improved markets for legally harvested timber products. This effort will strengthen the enabling conditions for avoiding deforestation, specifically addressing the trade issues that are involved.

The U.S. Government contributed to the start of the Heart of Borneo conservation initiative to conserve a high-biodiversity, transboundary area that includes parts of Indonesia, Malaysia, and Brunei. The three countries launched the Heart of Borneo initiative in February 2007. The Governments of Indonesia and the U.S. are currently negotiating a Tropical Forest Conservation Act (TFCA) program. Under the program, a portion of the Government of Indonesia's debt to the U.S. Government may be reduced and redirected toward tropical forest conservation in Indonesia.

Indonesia is also home to the greatest marine biodiversity on the planet. President Yudhoyono called for a Coral Triangle Initiative (CTI) in August 2007. The Coral Triangle Initiative is a regional plan of action to enhance coral conservation, promote sustainable fisheries, and ensure food security in the face of climate change. In December 2007, the U.S. Government announced its support for the six CTI nations (Indonesia, Malaysia, Philippines, Timor-Leste, Papua New Guinea, and Solomon Islands). Since then, the United States has provided $8.4 million to this initiative. With projected funding of $32 million over five years, the U.S. is the largest bilateral donor to CTI, and President Bush endorsed the CTI proposal formally at the 2007 Asia-Pacific Economic Cooperation (APEC) Summit.

Indonesia will host the first-ever World Oceans Conference in Manado, North Sulawesi, May 11-15, 2009. The World Oceans Conference is also the launch venue for the Coral Triangle Initiative. Top government officials and other leaders will discuss the scientific interplay between ocean degradation, climate and weather patterns, and fishing stocks.

NATIONAL SECURITY

Indonesia's armed forces (Tentara Nasional Indonesia, or TNI) total approximately 350,000 members, including the army, navy, marines, and air force. The army is the largest branch with about 280,000 active-duty personnel. Defense spending in the national budget accounts for 1.8% of GDP, but is supplemented by revenue from many military businesses and foundations.

The Indonesian National Police were a branch of the armed forces for many years. The police were formally separated from the military in April 1999, a process that was formally completed in July 2000. With 250,000 personnel, the police represent a much smaller portion of the population than in most nations.

Indonesia has peaceful relations with its neighbors. Without a credible external threat in the region, the military historically viewed its prime mission as assuring internal security. Military leaders have said that they wish to transform the military to a professional, external security force, providing domestic support to civilian

security forces as necessary. Throughout Indonesian history, the military maintained a prominent role in the nation's political and social affairs. A significant number of cabinet members have had military backgrounds, while active duty and retired military personnel occupied a large number of seats in the parliament. Commanders of the various territorial commands played influential roles in the affairs of their respective regions. With the inauguration of the newly-elected national parliament in October 2004, the military no longer has a formal political role, although it retains important political influence.

FOREIGN RELATIONS

Since independence in 1945, Indonesia has espoused a "free and active" foreign policy, seeking to play a role in regional affairs commensurate with its size and location but avoiding involvement in conflicts among major powers. Indonesian foreign policy under the "New Order" government of President Soeharto moved away from the stridently anti-Western, anti-American posturing that characterized the latter part of the Soekarno era.

Following Soeharto's ouster in 1998, Indonesia's Presidents have preserved the broad outlines of Soeharto's independent, moderate foreign policy. The traumatic separation of East Timor from Indonesia after an August 1999 East Timor referendum, and subsequent events in East and West Timor, strained Indonesia's relations with the international community.

A cornerstone of Indonesia's contemporary foreign policy is its participation in the Association of Southeast Asian Nations (ASEAN), of which it was a founding member in 1967 with Thailand, Malaysia, Singapore, and the Philippines. Since then, Brunei, Vietnam, Laos, Burma, and Cambodia also have joined ASEAN. While organized to promote common economic, social, and cultural goals, ASEAN acquired a security dimension after Vietnam's invasion of Cambodia in 1979. The security policy aspect of ASEAN expanded with the establishment of the ASEAN Regional Forum in 1994, in which 22 countries participate, including the United States.

At ASEAN's Singapore Summit in November 2007, the organization's members signed a new charter, a small step toward the agreed goal of creating an ASEAN Community to propel greater integration in the areas of political and security affairs, economics, and socio-cultural affairs. Indonesia was a strong proponent of further integration. Indonesia also was one of the founders of the Non-Aligned Movement (NAM) and has taken moderate positions in its councils. As NAM Chairman in 1992-95, Indonesia led NAM positions away from the rhetoric of North-South confrontation, advocating instead the broadening of North-South cooperation in the area of development. Indonesia continues to be a prominent leader of the Non-Aligned Movement.

Indonesia often supports NAM and Group of 77 (G-77) foreign policy views, taking positions regarding human rights contrary to the United States. In May 2005, the Yudhoyono administration, in a major effort to reinvigorate its leadership of the NAM and reset the movement's future course, hosted an Asia-Africa Summit to commemorate the founding of the NAM in Bandung, Indonesia in 1955.

A secular state, Indonesia has the world's largest Muslim population and is a member of the Organization of the Islamic Conference (OIC). It carefully considers the interests of Islamic solidarity in its foreign policy decisions while providing a moderating influence in the OIC. President Wahid, for example, pursued better relations with Israel; Foreign Minister Wirajuda participated in the November 2007 Middle East peace conference in Annapolis.

After 1966, Indonesia welcomed and maintained close relations with the donor community, particularly the United States, Western Europe, Australia, and Japan, through the Intergovernmental Group on Indonesia (IGGI) and its successor, the Consultative Group on Indonesia (CGI), which have provided substantial foreign economic assistance. Donors in recent years have expanded assistance to Indonesia, due to its rapid democratic consolidation.

Indonesia has been a strong supporter of the Asia-Pacific Economic Cooperation (APEC) forum. Largely through the efforts of President Soeharto at the 1994 meeting in Bogor, Indonesia, APEC members agreed to implement free trade in the region by 2010 for industrialized economies and 2020 for developing economies.

In 2008, Indonesia finalized its Economic Partnership Agreement (EPA) with Japan, a significant trade partner and Indonesia's biggest foreign investor. The agreement is Indonesia's first bilateral free trade deal and exempts Indonesia from 90% of Japanese import duties.

President Yudhoyono has sought a higher international profile for Indonesia. In March 2006, Yudhoyono traveled to Burma to discuss democratic reform and visited several Middle Eastern countries in April and May 2006. Yudhoyono delivered a major speech in Saudi Arabia, encouraging the Muslim world to embrace globalization and technology for greater social and economic progress.

In November 2006, Indonesia sent about 1,000 peacekeeping troops to southern Lebanon to be part of the UN Interim Force in Lebanon (UNIFIL) and replaced those troops with a second contingent a year later. In 2007 and 2008, Indonesia holds a non-permanent seat on the UN Security Council.

U.S.-INDONESIAN RELATIONS

The United States has important economic, commercial, and security interests in Indonesia. It remains a

linchpin of regional security due to its strategic location astride a number of key international maritime straits, particularly the Malacca Strait. Relations between Indonesia and the U.S. are positive and have advanced since the election of President Yudhoyono in October 2004. The U.S. played a role in Indonesian independence in the late 1940s and appreciated Indonesia's role as an anti-communist bulwark during the Cold War. Cooperative relations are maintained today, although no formal security treaties bind the two countries. The United States and Indonesia share the common goal of maintaining peace, security, and stability in the region and engaging in a dialogue on threats to regional security. Cooperation between the U.S. and Indonesia on counter-terrorism has increased steadily since 2002, as terrorist attacks in Bali (October 2002 and October 2005), Jakarta (August 2003 and September 2004) and other regional locations demonstrated the presence of terrorist organizations, principally Jemaah Islamiyah, in Indonesia. The United States has welcomed Indonesia's contributions to regional security, especially its leading role in helping restore democracy in Cambodia and in mediating territorial disputes in the South China Sea.

The U.S. is committed to consolidating Indonesia's democratic transition and supports the territorial integrity of the country. Nonetheless, there are friction points in the bilateral political relationship. These conflicts have centered primarily on human rights, as well as on differences in foreign policy. The U.S. Congress cut off grant military training assistance through International Military Education and Training (IMET) to Indonesia in 1992 in response to a November 12, 1991, incident in East Timor when Indonesian security forces shot and killed East Timorese demonstrators. This restriction was partially lifted in 1995. Military assistance programs were again suspended, however, in the aftermath of the violence and destruction in East Timor following the August 30, 1999 referendum favoring independence.

Separately, the U.S. had urged the Indonesian Government to identify and bring to justice the perpetrators of the August 2002 ambush murders of two U.S. teachers near Timika in Papua province. In 2005, the Secretary of State certified that Indonesian cooperation in the murder investigation had met the conditions set by Congress, enabling the resumption of full IMET. Eight suspects were arrested in January 2006, and in November 2006 seven were convicted.

In November 2005, the Under Secretary of State for Political Affairs, under authority delegated by the Secretary of State, exercised a National Security Waiver provision provided in the FY 2005 Foreign Operations Appropriations Act to remove congressional restrictions on Foreign Military Financing (FMF) and lethal defense articles. These actions represented a reestablishment of normalized military relations, allowing the U.S. to provide greater support for Indonesian efforts to reform the military, increase its ability to respond to national and regional disasters, and promote regional stability.

Under the terms of the FY 2008 FOAA, signed into law in December 2007, Congress did not reimpose restrictions. However, it prevented a portion of U.S. security assistance from being released before the Secretary of State reported on the status of certain measures of military reform, of accountability for past human rights abuses, of public access to Papua, and of the investigation into the 2004 murder of a prominent human rights activist.

Regarding worker rights, Indonesia was the target of several petitions filed under the Generalized System of Preferences (GSP) legislation arguing that Indonesia did not meet internationally recognized labor standards. A formal GSP review was suspended in February 1994 without terminating GSP benefits for Indonesia. Since 1998, Indonesia has ratified all eight International Labor Organization core conventions on protecting internationally recognized worker rights and allowed trade unions to organize. However, enforcement of labor laws and protection of workers rights remains inconsistent and weak in some areas. Indonesia's slow economic recovery has pushed more workers into the informal sector, which reduces legal protection and could create conditions for increases in child labor.

Development Assistance from the United States to Indonesia

The U.S. Agency for International Development (USAID) and its predecessors have provided development assistance to Indonesia since 1950. Initial assistance focused on the most urgent needs, including food aid, infrastructure rehabilitation, health care, and training. Throughout the 1970s and 1980s, a time of great economic growth in Indonesia, USAID played a major role in helping the country achieve self-sufficiency in rice production and in reducing the birthrate.

Today, USAID assistance programs focus on basic education, democratic and decentralized governance, economic growth, education, health, water, sanitation, and the environment. The United States was one of the lead donors in the reconstruction efforts in the tsunami-hit area of Aceh. Most of the U.S. tsunami relief program is complete, although our efforts toward the construction of the Aceh west coast highway continues, and the U.S. remains actively engaged in conflict prevention and resolution efforts in Aceh.

Education: In October 2003, President Bush announced a $157 million Indonesian Education Initiative for 2004-2009 to improve the quality of education in Indonesia. This initiative is a cornerstone of the U.S. Government assistance program in Indonesia, directly responding to Indonesia's priorities and reflecting a joint Indonesia-U.S. commitment to revitalize education for the next generation of Indonesia's leaders. Since the initiative began, more than 1,476 primary and junior secondary schools—secular and religious, public and private—in eight provinces, have

participated. About 23,612 educators have been trained to improve the quality of teaching and learning, and more than 345,983 students are reaping the benefits.

The program serves as a model for introducing useful pedagogical and capacity-building techniques that facilitate the smooth transition of the sector-based management of basic education in a decentralized environment. By 2010, the program will promote ownership of a robust and replicable model and ensure the sustainability of a very promising innovation to Indonesia's education system.

Decentralized Basic Education (DBE): The Indonesia Education Initiative will increase the quality of basic education in primary and junior secondary schools, both public and private, and focus on three results: (DBE1) Local governments and communities more effectively manage education services; (DBE2) Enhance the quality of teaching and learning to improve student performance in key subjects such as math, science, and reading; and (DBE3) Youth gain more relevant life and work skills to better compete for jobs in the future.

Opportunities for Vulnerable Children: This program promotes inclusive education in Indonesia. Children with special needs such as visual impairment are provided the opportunity to be educated in public schools. Replicable models are being developed to expand the reach of the program.

Sesame Street Indonesia: An Indonesian co-production of the award-winning television show targeting young children was developed and produced by the Sesame Workshop in New York with local Indonesian partners and USAID funding. The program went on the air in 2007 and more than 1.8 million Indonesian children have viewed the program.

Effective Democracy and Decentralized Governance: This objective aims to support democratic reforms by supporting effective and accountable local governance, addressing conflict and encouraging pluralism, and consolidating national-level democratic reforms.

Mitigation of Conflict and Support for Peace: USAID remains a key donor working to mitigate conflict and support peace in conflict areas, such as Aceh, Papua, Sulawesi, and Ambon. Assistance activities focus on: conflict resolution/mitigation; civilian-military affairs; livelihoods development in conflict areas; drafting and monitoring of relevant legislation; and emergency and post-conflict transitional assistance to conflict affected persons.

Anti-Trafficking In Persons: USAID's anti-trafficking programs work closely with the Ministry of Women's Empowerment and civil society groups in policy making, program development, victim support, and dissemination of information which will contribute to reducing the trafficking of women and children in Indonesia.

Justice Sector Reforms: Through the Democratic Reform Support Program and Justice Sector Reform Program, USAID's current Justice Sector programs provide technical assistance and training to judges, prosecutors and staff members at the Supreme Court, the Constitutional Court, and the Attorney General's Office.

Legislative Strengthening: Technical assistance and training are provided to strengthen the legislative and legal drafting skills of parliamentarians as well as provide institutional support to the National House of Representatives, National Regional Representative Council, and over 60 district-level legislative councils.

Activities include promoting constituency and media outreach; developing the capacity to draft and analyze legislation and operational budgets; creating inter-party coalitions; and encouraging legislative commissions to carry out their functions and perform strategic planning.

The Local Governance Support Program: Currently assisting 60 local governments, this program works to increase governmental accountability and transparency, strengthen the local legislative process, promote citizen engagement and civil service reform, and improve the delivery of basic services.

Promoting Democratic Culture: USAID works with civil society organizations and government institutions to strengthen democratic civic culture, focusing on respect for pluralism, religious diversity, and the rights of women and minority groups. Activities under this program include civic education, advocacy, engaging traditional leaders, building networks to support tolerance and pluralism, and assisting the government in reviewing policies that conflict with the constitution and human rights standards.

Tsunami Reconstruction: The U.S. Government was one of the first donors to respond to the disaster. Through numerous grants to non-governmental organizations (NGOs), international organizations, and UN agencies, USAID has helped stabilize the humanitarian situation in Aceh, avert a public health crisis, and provide relief services to survivors.

Rebuilding Shelter and Key Infrastructure: USAID is assisting communities by providing much needed shelter, working with the Indonesian Government to rebuild key infrastructure and ensuring proper mapping and planning is considered through local cooperation.

Restoring Livelihoods: USAID enables communities to direct capacity building to benefit people at the local level. USAID's Community Based Recovery Initiative is working with 59 villages to organize local capacity-building initiatives.

Strengthening Capacity and Governance: USAID is providing assistance to restore local government services in Aceh, working to increase governmental accountability and transparency, strengthen the local legislative process, promote citizen

engagement and civil service reform, and improve the delivery of basic services.

Economic Growth Strengthened and Employment Created: Assistance to the Indonesian Government and private sector focuses on creating jobs by improving the business and investment climate, combating corruption, increasing competitiveness in key sectors, and improving the safety of the financial system. USAID is working with Indonesians to ensure that future generations enjoy an increasingly prosperous, democratic and stable country.

Trade and Investment Climate: Efforts to promote a transparent and predictable legal and regulatory business climate aim to reduce the hidden costs of doing business, increase certainty, promote good governance, enhance trade and investment, and create jobs.

Agribusiness and Industry Competitiveness: Assistance to leading agribusiness and industry sub-sectors fuels growth, exports, jobs, and prosperity. These efforts also drive increased productivity and national competitiveness by forging stronger public and private sector partnerships.

Financial Sector Safety and Soundness: Assistance to key financial and non-bank financial institutions helps build a sound financial infrastructure through improved oversight, transparency, and governance.

Improving the Quality of Basic Human Services: The USAID Basic Human Services Office provides assistance to Indonesia through an integrated strategy that aims to improve the health of local communities through support for maternal and child health, disease surveillance and control, food and nutrition, and access to safe drinking water through better watershed management and water treatment.

Environmental Services: This program supports better health through improved water resources management and expanded access to clean water and sanitation services. With a ridge to reef approach, partners improve water resource management from watershed sources, along rivers, through cities, and to coastal reefs. In the upper watershed, the program promotes forest management, biodiversity conservation, and land use planning to protect a steady, year-round source of clean water. Further downstream, the program strengthens municipal water utilities to improve and expand piped water and sanitation services to communities. Stakeholder forums link upstream and downstream communities to build consensus on water and waste management issues. Marginalized urban communities also benefit from the introduction of safe drinking water through Air Rahmat, a home chlorination product being introduced to the market through a public-private partnership.

Health Services: Women, newborns, and children are the principal beneficiaries of this integrated public health program. Working with the government, NGOs, and other partners, USAID focuses on maternal, neonatal, and child health; reproductive health; nutrition; HIV/AIDS, tuberculosis, malaria; and decentralization of the health sector. Improved health-seeking behaviors within communities link key hygiene promotion interventions, such as hand-washing with soap to reduce diarrheal disease, a major cause of childhood death. USAID's avian influenza (AI) program includes integrated public and private sector AI surveillance and response for both animal and human outbreaks and behavior change communications to minimize behaviors that facilitate the transmission of AI to both poultry and people.

Food and Nutrition: Improving the nutritional status of Indonesians, USAID food assistance targets poor communities. These activities directly impact women and children through targeted supplemental feeding and nutritional education activities. The food assistance program works with villages to construct public latrines, washing facilities, protected water stations, and to organize solid waste disposal efforts to better protect community health. Over one million people will be direct recipients of USAID food assistance under this program.

TRAVEL

Consular Information Sheet

December 15, 2008

Country Description: Indonesia is an independent republic consisting of more than 17,500 islands spread over 3,400 miles along the Equator. The main islands are Java, Sumatra, Bali, Kalimantan (Borneo), Sulawesi (Celebes), Papua, Halmahera, and Seram. The capital city of Jakarta lies in the lowlands of West Java, the most populated island. The country has approximately 245,500,000 people and more than 300 ethnic groups.

Indonesia's geographic location and topography make the country prone to natural disasters, especially seismic upheaval due to its location on the "Ring of Fire," an arc of volcanoes and fault lines encircling the Pacific Basin. Indonesia is a developing country with a growing economy and some infrastructure shortcomings. However, it has many tourist destinations associated with the country's cultural diversity and natural resources. Annually, approximately 150,000 U.S. tourists visit Indonesia.

The U.S. diplomatic mission in Indonesia consists of approximately 220 American staff and 500 family members in addition to an average of 150 temporary duty officials who visit the Embassy each month.

Entry Requirements: Indonesian government requires a passport valid for at least six months from the date of arrival in Indonesia to enter the country. Indonesian authorities regularly deny entry to all foreign nationals who arrive with less than six months validity on their passports. The U.S. Embassy cannot obtain entry permission for Americans in this situation. Travelers will be required to depart for Singapore or a nearby country to obtain a new U.S. passport. American citizens are required to have a visa to enter Indonesia. U.S. citizens may apply for a visa on arrival at the airports in Jakarta, Bali, Surabaya, Medan, Padang, Pekanbaru, Manado, Biak, Ambon, Balikpapan, Pontianak, Kupang, Batam, and South Sumatra. An onward/return ticket is required to apply for an entry visa at these Indonesian ports of entry. Visas are not available at the Banda Aceh airport. Visas on arrival are available at a limited number of seaports, including the Batam and Bintan ferry terminals, but are not available at any land border crossing. Travelers without a visa should check carefully when planning travel between Indonesia and other countries in the region to be sure their return to Indonesia is through a designated visa-on-arrival port or airport. Travelers will not be allowed to enter or return to Indonesia at a port of entry that does not have visa-on-arrival facilities.

Indonesian visas require an entire passport page. Travelers without a blank visa page in their passport may be denied entry. Additional visa pages may be added in the United States through a Passport Agency or at most U.S. embassies and consulates. Visitors may be granted a 3-day visa on arrival for a fee of $10, or a 30-day visa on arrival for a fee of $25. Recent experience has shown that some visitors are granted a 7-day visa on arrival for $10. All visas on arrival are non-extendable. Travelers must exit the country to be able to purchase another visa on arrival. Travelers are strongly advised to purchase the 30-day visa on arrival to avoid problems if travel plans change unexpectedly. As of March 2008, travelers who overstay visas on arrival are subject to a fine of U.S. $20 per day.

U.S. citizens may also apply for a visa at the Indonesian Embassy in Washington, DC, or at an Indonesian Consulate in the U.S. In some cases, U.S. citizens may also apply at Indonesian embassies and consulates in other countries. U.S. citizens traveling overseas who wish to apply for an Indonesian visa should inquire with the local embassy in the country where they are currently traveling. A visitor's visa for business purposes and social/cultural stays of longer duration require a letter of intent/sponsorship from the Indonesian employer and/or sponsor. For up-to-date information, travelers may contact the Embassy of the Republic of Indonesia: 2020 Massachusetts Avenue NW, Washington, DC 20036, phone: (202) 775-5200 or at http://www.embassyofindonesia.org. Indonesian Consulates are located in Los Angeles (213) 383-5126, San Francisco (415) 474-9571, Chicago (312) 920-1880, New York (212) 879-0600, and Houston (713) 785-1691. Visit the Embassy of Indonesia web site at http://www.embassyofindonesia.org for the most current visa information.

Indonesia strictly enforces its immigration/visa requirements. Several Westerners, including Americans, have been jailed for visa violations and/or overstays. Violators may also be subject to substantial fines and/or deportation from Indonesia for immigration and visa violations. Immigration officials have also detained people for conducting business, academic, or other non-tourist activities while on tourist visa status. Volunteer work with local or international NGOs is not permitted on tourist visa status. Penalties for such immigration/visa violations may include a prison sentence of up to 5 years and a fine of Rupiah 25 million. Travelers are encouraged to contact an Indonesian consular office to determine the appropriate visa category before traveling to Indonesia. All airline passengers, including children, are subject to a departure tax, which must be paid in cash (Rupiah). The international departure tax as of November 2008 is 100,000 Rupiah in Jakarta but may vary depending on what international airport is being used; domestic departure tax in Jakarta is 30,000 Rupiah but this tax also varies by airport.

Safety and Security: Since 2005, the Indonesian police and security forces have disrupted a number of terrorist cells and arrested approximately 400 suspects linked with Jemaah Islamiyah (JI), a U.S. Department of State-designated terrorist organization, including the three terrorists convicted of killing 202 people in an October 2002 nightclub bombing in Bali. While Indone-

sia's counterterrorism efforts have had significant results, the threat remains. For example, in July 2008, Indonesian authorities arrested nine suspects in Sumatra who had been building bombs reportedly in preparation for anti-Western attacks, and in September 2008, a bomb was found in a shopping center in Palu before the start of the Muslim fasting month.

In spite of the success of the Indonesian counter-terrorism units, JI networks and cells may remain intact and have the capacity to go operational with little or no warning.

Extremists may target both official and private interests. Examples of such targets include high-profile sporting events, residential areas, business offices, hotels, clubs, restaurants, places of worship, schools, public areas, and locales where Americans or foreigners gather in large numbers. The Department of State urges Americans in Indonesia to avoid crowds, maintain a low profile, and be vigilant about security at all times. Americans are advised to monitor local news broadcasts, vary their routes and times in carrying out daily activities, and consider the level of preventive security when visiting public places in Indonesia. Americans vacationing in Indonesia are advised to consider the level of preventive security when choosing hotels, restaurants, beaches, entertainment venues, and recreation sites.

Americans should always use common sense when traveling in unfamiliar areas and should be aware that local groups here as elsewhere may respond violently to real and perceived offenses. For example, in June 2008, two Americans in western Sumatra were beaten after the Americans reportedly accused a local man of theft. In the same month, another American in Sumatra was threatened by members of a local mosque when the American visited the mosque to complain about being awakened from his sleep by the morning call to prayer. The U.S. Mission in Indonesia must approve U.S. government employees' travel to the province of Papua, and travelers to that region must also obtain the approval of the Indonesian government. Even though other areas of Indonesia are not under official U.S. government travel restrictions, the U.S. Mission requests that official U.S. government employees inform the Regional Security Officer of their intent to travel to the provinces of Banda Aceh, Central Sulawesi and Maluku.

American travelers and American residents are urged to update their passports and important personal papers in case it becomes necessary to depart Indonesia quickly. Travel distances, poor communications, and an inadequate health care infrastructure make it extremely difficult for the Embassy to respond to U.S. citizen emergencies. Many parts of Indonesia (including many tourist destinations) are isolated and difficult to reach or contact.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime can be a problem in some major metropolitan areas in Indonesia. Crimes of opportunity such as pick-pocketing and theft occur throughout the country. Americans in Jakarta and Surabaya are advised to hire a taxi either from a major hotel queue or by calling a reputable taxi company, such as Silver Bird or Blue Bird, rather than hailing one on the street. Americans arriving at Soekarno-Hatta Airport in Jakarta should only use Silver Bird or Blue Bird taxis obtained at a designated taxi queue. Airport touts should not be used. Criminals in Jakarta regularly rob customers in taxis painted to look like taxis from reputable companies; booking taxis by telephone directly from the company is the best way to avoid falling victim to this crime. Claiming to act in the name of religious or moral standards, certain extremist groups have, on occasion, attacked nightspots and places of entertainment. Most of these attacks have sought to destroy property rather than to injure individuals. International news events can sometimes trigger anti-American or anti-Western demonstrations.

Credit card fraud and theft is a serious and growing problem in Indonesia, particularly for Westerners. Travelers should minimize use of credit cards or use cash. If used, credit card numbers should be closely safeguarded at all times. There have been many reports of shop, restaurant, and hotel staff writing down the credit card numbers of customers and then making purchases using the credit card number after the card owner has departed the retail location. Travelers should avoid using credit cards for online transactions at Internet cafes and similar venues. Travelers who decide to use credit cards should monitor their credit card activity carefully and immediately report any unauthorized use to their financial institution.

U.S. citizens are encouraged to carry a copy of their U.S. passports with them at all times, so that if questioned by local officials, proof of identity and proof of U.S. citizenship are readily available. When U.S. citizens are arrested or detained, formal notification of the arrest is normally provided to the U.S. Embassy in Jakarta in writing, a process that can take several weeks. If detained, U.S. citizens should telephone the Embassy Jakarta, or the nearest U.S. consular office immediately.

"Drink-spiking" incidents have been of increasing concern as there have been many reports of males being targeted for this ruse in clubs and nightspots. The effects of this drug, believed to be an animal tranquilizer, are extremely powerful. Besides putting the victim in an unconscious state for a long period of time, the side effects include memory loss, nausea, headaches and vomiting. Although most of these incidents involve male victims it is important

to remember that females have been victimized in the past with "Date-Rape" drugs. Maritime piracy in Indonesian waters continues, but incident reports have decreased steadily in past years. Most recent reports are of thefts of valuables or cargo from boats that are in a port and not at sea. Regardless, before traveling by sea, especially in the Straits of Malacca between the Riau Province and Singapore and in the waters north of Sulawesi and Kalimantan, passengers are advised to review the current security situation with a local port agent.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The Indonesia emergency telephone numbers similar to "911" in the United States are: 110 for police, 113 for fire, and 118 for ambulance.

Medical Facilities and Health Information: The general level of sanitation and health care in Indonesia is far below U.S. standards. Some routine medical care is available in all major cities, although most expatriates leave the country for serious medical procedures. Psychological and psychiatric medical and counseling services are limited throughout Indonesia. Serious medical problems requiring hospitalization and/or medical evacuation to locations with acceptable medical care, such as Singapore, Australia, or the United States can cost thousands of dollars. Doctors and hospitals often expect immediate cash payments or sizable deposits for health services. A list of English-speaking doctors and hospitals is available via the U.S. Embassy Jakarta web site at http://jakarta.usembassy.gov.

Indonesian ambulance attendants often lack training equivalent to U.S. standards. Americans staying in Indonesia for extended periods, especially those who have known health problems, are advised to investigate private ambulance services in their area and to provide family and close contacts with the direct telephone number(s) of the service they prefer.

Malaria, dengue and other tropical and contagious diseases occur frequently in Indonesia. In 2005, polio re-emerged in Western Java. Avian Influenza (H5N1) is endemic among poultry in Indonesia and poultry outbreaks have been reported in the majority of Indonesia's provinces. As of September 10, 2008, the World Health Organization has reported a total of 137 confirmed human H5N1 cases and 112 deaths. Of the total, 20 cases and 13 deaths occurred in 2005, 55 cases and 45 deaths occurred in 2006, 42 cases and 37 deaths occurred in 2007, and 20 cases and 17 deaths have been reported this year. Travelers are urged to consult with their personal physicians and to obtain updated information on Avian Influenza before traveling to Indonesia.

Updated information and links to the World Health Organization (WHO) and Centers for Disease Control and Prevention (CDC) are posted on the U.S. Embassy web site at http://jakarta.usembassy.gov.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the CDC's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel/default.aspx. Tuberculosis is an increasingly serious health concern in Indonesia. For further information, please consult the CDC's Travel Notice on TB http://wwwn.cdc.gov. For information about outbreaks of infectious diseases abroad consult the WHO's web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State urges Americans to consult with their medical insurance company prior to traveling abroad to confirm if their policy applies overseas and if it will cover emergency expenses such as a medical evacuation. Information regarding short-term health and emergency assistance policies is located on the Bureau of Consular Affairs web site at http://travel.state.gov.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Indonesia is provided for general reference only, and may not be accurate in a particular location or circumstance.

In general, traffic in Indonesia is congested and undisciplined. The number and variety of vehicles on the road far exceed the capacity of existing roadways to handle the traffic. Road conditions vary from good (in the case of toll roads and major city roads) to dangerously poor. Generally, road safety awareness is very low in Indonesia, although it is increasing. Buses and trucks are often dangerously overloaded and tend to travel at high speeds. Most roads outside major urban areas have a single lane of traffic in each direction, making passing dangerous. Most Indonesian drivers do not maintain a safe following distance in a manner familiar to U.S. drivers and tend to pass or maneuver with considerably less

margin for error than in the United States. Although traffic in Indonesia moves on the left side of the road, drivers tend to pass on both sides and may use the shoulder for this purpose. It is common for drivers to create extra lanes regardless of the lane markings painted on the roads.

Throughout Indonesia, there is an overabundance of motorcycles claiming to have the right of way. Many motorcycle drivers recklessly weave in and out of traffic and typically fail to observe traffic regulations. Throughout the country, motor vehicles also share the roads with other forms of transportation such as bicycle pedicabs, horse and ox carts, and pushcarts.

Although Indonesia requires the use of seat belts in front seats, most Indonesian automobiles do not have seat belts in the rear passenger seats. The use of infant and child car seats is not common, and it can be very difficult to rent a car seat for temporary use. Helmets are required for all passengers on motorcycles, but this law is inconsistently enforced. Passengers often do not wear helmets. Accidents on rented motorcycles constitute the largest cause of death and serious injury among foreign visitors to Indonesia. American citizens are discouraged from riding motorcycles.

Accidents between a car and a motorcycle are invariably viewed as the fault of the driver of the car. Groups of motorcycle riders will sometimes threaten the driver of a car who is involved in an accident regardless of who is at fault. Expatriates and affluent Indonesians often use professional drivers. All car rental firms provide drivers for a nominal additional fee. Travelers unfamiliar with Indonesian driving conditions are strongly encouraged to hire drivers.

Driving at night can be extremely dangerous outside of major urban areas. Drivers often refuse to use their lights until it is completely dark, and most rural roads are unlit. Sometimes residents in rural areas use road surfaces as public gathering areas, congregating on them after dark.

When an accident involving personal injury occurs, Indonesian law requires both drivers to await the arrival of a police officer to report the accident. Although Indonesian law requires third party insurance, most Indonesian drivers are uninsured, and even when a vehicle is insured, it is common for insurance companies to refuse to pay damages. Nevertheless, foreigners who plan to drive while in Indonesia should ensure they have appropriate insurance coverage and drivers licenses. Drivers should be aware that ambulance service in Indonesia is unreliable, and that taxis or private cars are often used to transport the injured to a medical facility. In cases of serious injury to a pedestrian, the driver of the vehicle could be required to help transport the injured person to the hospital. When an accident occurs outside a major city, it may be advisable, before stopping, to drive to the nearest police station to seek assistance.

Visit the website of Indonesia's national tourist office online at http://my-indonesia.info/indexpromo.php.

Aviation Safety Oversight: B Based on publicly available information, including the results of a study commissioned by the Indonesian Government, the U.S. Federal Aviation Administration (FAA) has determined that the Indonesian Directorate General of Civil Aviation is not in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Indonesia's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov/safety/programs_initiatives/oversight/iasa.

Indonesian civil aviation continues to experience air incidents and accidents, including four crashes with fatalities between September 5, 2005, and March 7, 2007. Incidents included hard landings, collapsed landing gear, and planes veering off the runway. Whenever possible, Americans traveling to and from Indonesia should fly directly to their destinations on international carriers from countries whose civil aviation authorities meet international aviation safety standards for the oversight of their air carrier operations under the FAA's International Aviation Safety Assessment (IASA) program.

Natural Disasters: Many areas of Indonesia are at high risk for natural disasters due to its geographic location and topography. The Indian Ocean earthquake and tsunami on December 26, 2004 killed more than 130,000 people and left over 37,000 missing in Aceh and North Sumatra. On September 12, 2007 a 8.4-magnitude quake off shore of Sumatra along the edge of the Menawai island patch damaged hundreds of homes and killed at least 13 people. Dozens of strong aftershocks were felt and magnitude 7.8 and 7.1 tremors were recorded during the following two days. Major earthquakes on Nias Island off Sumatra in March 2005 and in Yogyakarta in May 2006 killed thousands of people. An earthquake and tsunami on the southern Java coast in July 2006 killed more than 600 people and left thousands homeless. Mt. Merapi Volcano near Yogyakarta experienced significant pyroclastic flows from April to early July 2006, and authorities evacuated residents within a 15-mile radius. Americans planning hiking or other outdoor activities in Indonesia are encouraged to obtain up-to-date information on local conditions, to travel with a local guide, and to carry a local mobile phone. Travelers should obey instructions from civil defense and emergency personnel and should not enter restricted areas.

Air Quality: Air quality in Indonesia is acceptable most of the time. However, within Indonesia's major cities, air quality can range from "unhealthy for sensitive groups" to "unhealthy." The air quality in Jakarta is particularly polluted. Individuals susceptible to chronic respiratory illnesses should consult with their doctor before spending significant amounts of time in Jakarta.

Scuba Diving, Snorkeling and Surfing: U.S. citizens should exercise prudence when scuba diving, snorkeling and surfing, and when vis-

iting remote tourist locations. Strong seasonal undercurrents in coastal waters pose a sometimes-fatal threat to surfers and swimmers, and every year several Americans drown in unstable water. Surfers and divers should also be aware that local fishermen in coastal waters may use explosives to catch fish although this practice is illegal in Indonesia.

Hiking: U.S. citizens interested in hiking on Puncak Jaya or other mountains in Papua should ensure that they organize their trip through a reputable tour operator and ensure they have firm, realistic plans and backup plans for climbing down the mountain. In the past, some local tour operators have abandoned climbers after they reached the summit. Climbers should be aware that transiting via private properties on the way down the mountain is considered trespassing and not a safe or legal alternative.

Teaching English in Indonesia: U.S. citizens who would like to teach English in Indonesia are urged to carefully review employment contracts before they travel to Indonesia. Most contracts include a monetary penalty for early termination. Individuals should be aware that English schools may require holding passports to insure that the employee complies with the terms of the contract or pays the appropriate penalty. In the past several months, there has been an increase in the number of Americans who terminated their employment contracts early, and could not depart Indonesia because their employer would not release their passports.

Commercial Disputes: U.S. citizens involved in commercial or property matters should be aware that the business environment is complex and dispute settlement mechanisms are not highly developed. Local and foreign businesses often cite corruption and ineffective courts as serious problems. Business and regulatory disputes, which would be generally considered administrative or civil matters in the U.S., may in some cases be treated as criminal cases in Indonesia. It can be challenging to resolve trade disputes. For more information, please refer to the U.S. Department of Commerce's Country Commercial Guide for Indonesia at http://www.buyusainfo.net/docs/x_6987010.pdf.

Internet Purchases: U.S. citizens frequently experience difficulties when purchasing goods by Internet from Indonesian suppliers with whom the buyer has not met personally. An increase in fraud has been noted with American citizens attempting to purchase goods via the internet from Indonesian stores and suppliers.

Currency: Counterfeit currency is a problem in Indonesia. Banks, exchange facilities and most commercial establishments do not accept U.S. currency that is worn, defaced, torn or issued before 1996.

Dual Nationality: Indonesian law does not recognize dual nationality for adults over 18 years. Because of this, U.S. citizens who are also documented as Indonesian nationals may experience difficulties with immigration formalities in Indonesia. Holding dual citizenship may also hamper the U.S. Embassy or Consulate's ability to provide consular protection to Americans. In addition to being subject to all Indonesian laws affecting U.S. citizens, dual nationals may also be subject to other laws that impose special obligations on Indonesian citizens. In July 2006 the Indonesian Parliament passed new legislation allowing children under age 18 to maintain a foreign nationality as well as Indonesian citizenship. Parents whose children hold both Indonesian and U.S. citizenship may experience difficulties with entry and exit immigration procedures until the new law is fully implemented.

Transportation: There has been a rapid rise in all manners of public and private transportation within Indonesia. Various private airlines have begun operation in Indonesia over the past several years, as have new bus and ferry lines. Several recent air accidents have resulted in fatalities, injuries and significant damage to aircraft. In the past year, several ferries sank and another was badly damaged by fire, resulting in a significant number of deaths and injuries. While all forms of transportation are regulated in Indonesia, equipment tends to be less well maintained than similar equipment operated in the United States, and the quality of amenities found on various modes of transportation do not typically meet Western standards.

Customs Regulations: Indonesian customs authorities have strict regulations concerning import and export of items such as prescription medicines and foreign language materials or videotapes/discs. Americans are encouraged to contact the Embassy of Indonesia in Washington or one of Indonesia's consulates in the United States for specific information about customs requirements. Transactions involving such products are illegal, and bringing them back to the United States may result in forfeiture and/or fines.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Indonesia's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Indonesia are severe, and convicted offenders can expect long jail sentences and heavy fines. The death sentence can be given in cases of drug trafficking; several foreigners have been sentenced to death in recent years. One U.S. citizen was given a life sentence for drug trafficking.

Indonesian prisons are harsh and do not meet Western standards. Many prisoners are required to supplement their prison diets and clothing with funds from relatives. Medical care within Indonesian prisons, while available, is below Western standards, and access to medical testing to diagnose illness, as well as medica-

tions to treat conditions, is often difficult to obtain. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: There have been several recent cases of parental child abduction in Indonesia. While each case is different, Indonesian courts and police typically have not recognized valid U.S. sole custody decrees. Indonesia is not a signatory to the Hague Convention on the Civil Aspects of International Child Abduction. For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Indonesia are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Indonesia. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy is located in Jakarta at Medan Merdeka Selatan 5; telephone: (62)(21) 3435-9000; fax (62)(21) 385-7189. The Embassy's web site is http://www.usembassy-jakarta.org. The consular section can be reached by e-mail at jakconsul@state.gov. To subscribe to the U.S. Embassy Emergency Notification System, please register at http://jakarta.usembassy.gov/consular/ACSREGISTER.html. The U.S. Consulate General in Surabaya is at Jalan Raya Dr. Sutomo 33; telephone: (62)(31)295-6400; fax (62)(31) 567-4492; e-mail: consurabaya@state.gov.; after-hours duty officer (62)(811)334-183. The consulate should be the first point of contact for Americans needing assistance who are present or residing in the Indonesian provinces of: East Java, Nusa Tenggara Timor, Nusa Tenggara Barat, all of Sulawesi and North and South Maluku.

There is a Consular Agency in Bali at Jalan Hayam Wuruk 188, Denpasar, Bali; telephone: (62)(361) 233-605; fax (62)(361) 222-426; e-mail: amcobali@indo.net.id. The U.S. Consulate in Surabaya is an alternate contact for American citizens in Bali.

The U.S. Consulate in Medan, North Sumatra, only provides emergency assistance to U.S. citizens and does not yet have public consular hours. Americans citizens needing consular assistance in Sumatra should contact the U.S. Embassy in Jakarta.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Indonesia is not a party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between Indonesia and the United States dealing with international parental child abduction. Therefore, there is no treaty remedy by which the left-behind parent would be able to pursue recovery of the child or children should they be abducted or wrongfully retained in Indonesia. Once in Indonesia, the child or children would be completely subject to Indonesian law for all matters including custody. The United States is not a party to any treaty or convention on the enforcement of court orders. A custody decree issued by a court in the U.S. has no binding legal force abroad, although it may have a persuasive force in some countries. Furthermore, a U.S. custody decree may be considered by foreign courts and authorities as evidence and, in some cases, foreign courts may voluntarily recognize and enforce it on the basis of comity (the voluntary recognition by courts of one jurisdiction of the laws and judicial decisions of another).

Custody Disputes: Parental child abduction is not a crime under Indonesian law. Custody disputes are considered civil legal matters that must be resolved between the concerned parties or through the courts in Indonesia. The district/religious courts will hear and process child custody cases only as part of a divorce petition. Family issues and custody disputes are adjudicated based on Indonesian's Civil Code ("Kitab Undang-undang Hukum Perdata").

In order to bring a case/petition before the local court, the left-behind parent will require the assistance of an attorney licensed to practice in Indonesia. The court will also consider a child's relationship with each of the disputing parties and will evaluate each parent's ability to provide education and general living conditions and welfare for the child or children. Domestic law does not provide visitation rights to the non-custodian parent unless the parent(s) ask the court to incorporate visitation orders before the final divorce decree is issued.

The district and religious courts have jurisdiction on civil law cases, including child custody disputes. For Muslims, Islamic (Sharia) law can apply in family and religious matters. Questions on specific Islamic laws as they pertain to custody rights should be addressed to a lawyer licensed to practice in Indonesia. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel. state.gov/child-abduction.

Deportation: There is no extradition treaty between the United States and Indonesia. However, if the taking parent is a U.S. citizen whose U.S. passport has been revoked due to an outstanding federal Unlawful Flight to avoid Prosecution (UFAP) warrant or indictment on charges of International Parental Kidnapping (IPKCA) in violation of 18 USC Section 1204, Indonesian authorities may consider deportation based on lack of a valid travel document. Exit permits are required for foreigners who stay in Indonesia for more than six months. Exit/re-entry permits are given to foreigners who are holding "KITAS" (temporary stay permit).

Dual Nationality: A child with a parent who was born outside of the U.S. or who has acquired a second nationality through naturalization in another country may have a claim to citizenship in that country. There is no requirement that a U.S. citizen parent consent to the acquisition by his/her child of another nationality and in many cases a parent is unaware that his/her child may have dual citizenship. The Embassy of Indonesia in Washington D.C. will be able to provide more detailed information on whether your child has a claim.

Initiating Foreign Enforcement Proceedings Under Local Law: If a country is not a signatory to the Hague Convention on the Civil Aspects of International Child Abduction, it may be necessary for you to initiate a child custody action in the courts in the foreign country. This usually will require retaining the services of an attorney abroad. The Department of State, Office of Children's Issues is not a repository for foreign laws. However, selected information may be available concerning general procedures on child custody in particular countries. Contact the Office of Children's Issues to see if such information is available.

Retaining A Foreign Attorney: A list of English-speaking attorneys is available from the U.S. State Department, Office of American Citizens Services. See also the Martindale-Hubbell Law Directory available in law libraries. It may be helpful to provide your foreign attorney with copies of any state laws concerning child custody orders and their enforcement in the U.S.

Criminal Remedies: The Department of State is not a law enforcement agency. The Department of Justice, Office of International Affairs works with U.S. prosecuting attorneys, the Federal Bureau of Investigation and with Interpol (an international police agency) in a joint cooperative effort to return persons charged with U.S. crimes from foreign countries. Extradition of the abducting adult may not result in the return of the child. Foreign countries may refuse to extradite a person to the United States if that person is also a citizen of the foreign country. Foreign countries may not recognize parental abduction as a crime. Please note that the extradition process applies only to the abducting adult/fugitive and not the child. The proper channel for the return of the child is through civil mechanisms or voluntary return arrangements. Additional information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp.ncjrs.org.

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

Intercountry Adoption

March 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Important Notes: Indonesian Government stipulates that an adoptive child must be of the same religion as the adoptive parents. Where the religion of the child's birth parents is not known, the child will be deemed to be Muslim.

There have been a number of instances in which Americans have been poorly advised (by legal practitioners) and have entered into fostering/adoption arrangements which, even though endorsed by local Indonesian courts, do not meet the requirements of Indonesian adoption law. Adoptions that do not meet these requirements will not meet the requirements for the issuance of U.S. immigrant visas for the children. Americans intending to adopt a child in Indonesia should not attempt to circumvent the proper processes.

U.S. citizens are strongly encouraged to contact U.S. consular officials in Jakarta, Indonesia, before formalizing an adoption agreement to ensure that appropriate procedures have been followed which will make it possible for the Embassy to issue a U.S. immigrant visa for the child.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The Ministry of Social Affairs of the Republic of Indonesia, Directorate of Child Social Service Development is the agency designated by the Indonesian government to manage the administration of Indonesian adoption law and regulations. This office may be reached in writing or by phone at:

Jalan Salemba Raya No. 28
Jakarta Pusat, Indonesia
Telephone: 62-21-310-0375

In addition, American prospective adoptive parents considering adopting an Indonesian child should contact Yayasan Sayap Ibu (the Sayap Ibu Foundation).

This organization has been designated by the Ministry of Social Affairs to handle adoptions by foreigners. In areas of Indonesia where Yayasan Sayap Ibu is not represented, the first point of contact should be the Ministry itself. The Yayasan Sayap Ibu office in Jakarta is located at:

Yayasan Sayap Ibu
Jalan Barito II # 55
Telephone: 62-21-722-1763

Eligibility Requirements for Adoptive Parents: The Indonesian government has imposed the following criteria on prospective adoptive parents:

- Couples must be between 30 and 45 years of age;
- Married for a minimum of 5 years;
- Resident in Indonesia for at least 2 years with a permit issued by the local authorities (Rukun Tetangga, Rukun Warga, Kelurahan, Kecamatan), and a letter from the Embassy in Jakarta (a statement of Domicile);
- Couples can be either childless, have one of their own children or have previously adopted an Indonesian child. If the prospective adoptive mother has had birth children in the past, she must no longer be capable of bearing children;
- Believe in God;
- Both parents must appear at the Court hearing;
- The adoptive child must be less than 5 years old;
- The adoptive child must be in the care of a registered and authorized social welfare organization.

Recent legislation also stipulates that an adoptive child must be of the same religion as the adoptive parents. Where the religion of the child's birth parents is not known, the child will be deemed to be Muslim.

Residency Requirements: Foreign national prospective adoptive parents must be resident in Indonesia and must have been working and living in Indonesia for at least two years prior to the application to adopt. Past experience has shown that if one foreign national parent is resident in Indonesia before the other, he or she may initiate the process as long as s/he has already been resident in Indonesia for at least two years.

In cases where one prospective adoptive parent is a foreign national and the other is an Indonesian citizen, the residency requirement has not applied as long as the Indonesian national has resided in Indonesia to see the adoption process through completion. Such cases, however, are necessarily more complicated, and different courts may interpret the law differently.

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Time Frame: Adoption procedures can take from 12 to 18 months.

Adoption Agencies and Attorneys: The U.S. Embassy in Jakarta is not aware of any legally recognized Indonesian agencies who can assist adoptive parents. Foreigners may seek private legal assistance to facilitate the process of adoption and seek advice and information from certain orphanages.

Adoption Fees: The legal fees paid to the Indonesian authorities for adoption are approximately US$ 400. However, some adoptive parents have indicated that the cost can run up to $600 or more total.

Adoption Procedures: This is a guide to local procedures for adoption of Indonesian children by American citizens. For further information, Americans wishing to adopt a child in Indonesia should contact Yayasan Sayap Ibu. There are several required documents that must be completed by the adoptive parents. When all the required paperwork is completed, applications for adoption are directed through Yayasan Sayap Ibu or another designated social organization to the Department of Social Affairs, which usually grants permission for the child to be released into the prospective adoptive parents' foster care.

The adoptive parent must complete a minimum period of six months of foster parenting the child before commencing the court process to finalize the adoption. Monitoring by an Indonesian social worker appointed by the Department of Social Affairs (DEPSOS) is a part of this fostering process.

After the adoptive parents have completed the requisite six months of foster parenting, fulfilled the two- year residency requirement, and have delivered all the necessary paperwork to the Sayap Ibu Orphanage, a court date will be set. The court hearing will officially establish the foster parents as the child's adoptive parents.

Americans intending to adopt a child in Indonesia should not attempt to circumvent the proper processes. In order to obtain a valid court order, all adoptions must be vetted by an Inter-Departmental Committee (Tim Pertimbangan Perizinan Pangangkatan Anak Antara Warganegara Indonesia dan Warganegara Asing) that authorizes foreign adoptions.

The final court decision must refer to the approval decision made by this committee.

Approximately two weeks after the court hearing approving the adoption, the adoptive parents will receive the official court adoption document. With the court document in hand, the parents can apply for the child's Indonesian passport.

The child will not be able to depart Indonesia or be issued a U.S. visa until he/she has a passport.

Required Documents:

- Letter of no objection to the adoption from the American Embassy (issued by the Consular Section);
- Marriage Certificate (authenticated by the Indonesian Embassy/ Consulate in the country of issuance);
- Birth Certificates of both parents (authenticated by the Indonesian Embassy/Consulate in the country of issuance);
- Birth Certificates of previous children (authenticated by the Indonesian Embassy/Consulate in the country of issuance);
- Reference letters from the parents or close relatives of both prospective adoptive parents stating that they approve of the prospective parents' desire to adopt an Indonesian child;
- Health statement for the husband and wife by a medical practitioner at an Indonesian government hospital. Statement from an Indonesian government hospital gynecologist regarding involuntary childlessness;
- Income statement;
- Good conduct certificates from the Indonesian police for both husband and wife;
- Family photos and photos of the home and surroundings;
- Three photos each (3cm x 4cm) of husband and wife;
- Statement from the adoptive parents that they will report the condition of the adopted child to the Indonesian Embassy or Consulate in future areas of residence;
- Statement of motivation for adopting an Indonesian child (with U.S. Embassy seal);
- Separate statements of domicile issued by the U.S. Embassy in Jakarta and from the local authorities (Rukun Tangga/ Rukun Warga / Kelurahan / Kecamatan);
- Photocopy of Work or Residence Permits;
- Photocopy of passports;
- A letter from the U.S. Embassy in Jakarta stating that the child will be allowed to enter the United States after the adoption is granted, and that under U.S. adoption legislation an adopted child becomes a child of the adopters as if he/she had been born to them in marriage.

Note: All documents must be translated into Indonesian (Bahasa Indonesia) by a translator that has registered their signature with the Embassy so that translations may be certified with greater ease. Prospective adoptive parents may obtain the list of sworn translators from the U.S. Embassy in Jakarta.

Embassy of Indonesia
2020 Massachusetts Ave. N.W.
Washington, D.C. 20036
Phone: 202-775-5200

Indonesia also has consulates in Chicago, Honolulu, Houston, Los Angeles, New York and San Francisco.

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions.*

Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

Additional Information: Specific questions about adoption in Indonesia may be addressed to the U.S. Embassy in Jakarta. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-404-4747.

IRAN

Compiled from the March 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Islamic Republic of Iran

PROFILE

Geography

Area: 1.6 million sq. km. (636,295 sq. mi., slightly larger than Alaska).

Arable land: 9.78% of the country.

Cities: Capital—Tehran. Other cities—Isfahan, Tabriz, Mashhad, Shiraz, Yazd, Qom.

Terrain: Desert and mountains.

Climate: Semiarid; subtropical along the Caspian coast.

People

Nationality: Noun and adjective—Iranian(s).

Population: (2007 est.) 70.5 million.

Population growth rate: (2007 est.) 1.6%.

Ethnic groups: Persians 51%, Azeri 24%, Gilaki and Mazandarani 8%, Kurd 7%, Arab 3%, Lur 2%, Baloch 2%, Turkmen 2%, other 1%.

Religions: Shi'a Muslim 89%; Sunni Muslim 9%; Zoroastrian, Jewish, Christian, and Baha'i 2%.

Languages: Persian and Persian dialects 58%, Turkic languages (besides Turkish) 26%, Kurdish 9%, Luri 2%, Balochi 1%, Arabic 1%, Turkish 1%, other 2%.

Education: Literacy (total population age 15 and over who can read and write, 2003)—79% (male: 86%, female: 73%).

Health: (2007 est.) Infant mortality rate—38.12 deaths/1,000 live births. Life expectancy at birth (2007)—total population: 70.56 yrs.

Government

Type: Islamic republic.

Constitution: Ratified in December 1979, revised 1989.

Government branches: Executive—Supreme Leader (head of state), president (head of government), Council of Ministers, Assembly of Experts, Expediency Council, Council of Guardians. Legislative—290-member Majles (National Assembly, or Islamic Consultative Assembly). Judicial—Supreme Court.

Political parties: Several reformist groups, such as the Islamic Iran Participation Front (IIFP, also known as Mosharekat) and the Mojahideen of the Islamic Revolution (MIRO) have come together as a reformist coalition in advance of the 2008 Majles elections. Another influential reformist group is the National Trust Party. Similarly, several conservative groups have come together under two separate coalitions, the United Front of Principle-ists and the Broad and Popular Coalition of Principle-ists. Some conservative groups remain outside either coalition.

Political subdivisions: 30 provinces.

Suffrage: Universal suffrage. The government is debating raising the voting age from 15 to 18.

Economy

GDP: (purchasing power parity, 2007 est.) $852.6 billion.

GDP: (official exchange rate, 2007 est.) $222.4 billion.

GDP real growth rate: (2007 est.) 6.2%.

GDP composition by sector: (2007 est.) Agriculture 10.4%, industry 33%, services 48.8%.

Per capita income: (PPP 2007 est.) $12,300.

Work force: by occupation (June 2007) Agriculture 25%, industry 31%, services 45%.

Unemployment rate: (according to the Iranian Government) 12.1%.

Natural resources: Petroleum, natural gas, coal, chromium, copper, iron ore, lead manganese, zinc, sulfur.

Agriculture: Principal products—wheat, rice, other grains, sugar beets, fruits, nuts, cotton, dairy products, wool, caviar. Note: Iran is not self-sufficient in terms of food.

Industry: Types—petroleum, petrochemicals, textiles, cement and building materials, food processing (particularly sugar refining and vegetable oil production), metal fabricating (particularly steel and copper), armaments.

Trade: (2007 est.) Exports—$76.5 billion: petroleum 80%, chemical and

petrochemical products, carpets, fruits, nuts. Major export partners (2007)–U.A.E. (17.1%), Germany (13.6%), Italy (6.7%), Turkey (5.3%), India (4.8%), Azerbaijan (4%), Turkmenistan (2.4%), China (3%), Singapore (2.5%). Imports–$61.3 billion: industrial raw materials and intermediate goods, capital goods, foodstuffs and other consumer goods, technical services, military supplies. Major import partners–Germany (12%), China (10.5%), U.A.E. (9.4%), France (5.6%), Italy (5.4%), South Korea (5.4%), Russia (4.5%).

PEOPLE

Iran is a pluralistic society. Persians are the largest predominant ethnic and cultural group in this country, though many are actually of mixed ancestry. The population of the country has important Turkic elements (e.g., Azeris) and Arabs predominate in the southwest. In addition, Iranian citizens include Kurds, Balochi, Bakhtyari, Lurs, and other smaller minorities, such as Armenians, Assyrians, Jews, and Brahuis (or Brohi).

The 1979 Islamic revolution and the 1980-88 war with Iraq transformed Iran's class structure politically, socially, and economically. During this period, Shia clerics took a more dominant position in politics and nearly all aspects of Iranian life, both urban and rural. After the fall of the Pahlavi regime in 1979, much of the urban upper class of prominent merchants, industrialists, and professionals, favored by the former monarch, the shah, lost standing and influence to the senior clergy and their supporters. Bazaar merchants, who were allied with the clergy against the Pahlavi shahs, also have gained political and economic power since the revolution.

The urban working class has enjoyed somewhat enhanced status and economic mobility, spurred in part by opportunities provided by revolutionary organizations and the government bureaucracy. Though the number of clergy holding senior positions in the parliament and elsewhere in government has declined since the 1979 revolution, Iran has nevertheless witnessed the rise of a post-revolutionary elite among lay people who are strongly committed to the preservation of the Islamic Republic.

Most Iranians are Muslims; 89% belong to the Shi'a branch of Islam, the official state religion, and about 9% belong to the Sunni branch, which predominates in neighboring Muslim countries. Non-Muslim minorities include Zoroastrians, Jews, Baha'is, and Christians.

HISTORY

The ancient nation of Iran, historically known to the West as Persia and once a major empire in its own right, has been overrun frequently and has had its territory altered throughout the centuries. Invaded by Arabs, Seljuk Turks, Mongols, and others—and often caught up in the affairs of larger powers—Iran has always reasserted its national identity and has developed as a distinct political and cultural entity.

Archeological findings indicate human activity in Iran during the middle Paleolithic era, about 100,000 years ago. The sixth millennium B.C. saw a fairly sophisticated agricultural society and proto-urban population centers. Many dynasties have ruled Iran, starting with the Achaemenid (559-330 B.C.) founded by Cyrus the Great. After the conquest of Persia by Alexander the Great and the Hellenistic period (300-250 B.C.) came the Parthian (250 B.C.-226 A.D.) and the Sassanian (226-651) dynasties.

The seventh century Arab-Muslim conquest of Iran was followed with invasions by the Seljuk Turks and the Mongols. Iran underwent something of a revival under the Safavid dynasty (1502-1736), the most prominent figure of which was Shah Abbas, who expelled the Uzbeks and Ottomans from Persia. The conqueror Nadir Shah and his successors were followed by the Zand dynasty, founded by Karim Khan, and later the Qajar (1795-1925) and the Pahlavi dynasties (1925-1979).

Modern Iranian history began with a nationalist uprising against the Shah in 1905 and the establishment of a limited constitutional monarchy in 1906. The discovery of oil in 1908 would later become a key factor in Iranian history and development.

In 1921, Reza Khan, an Iranian officer of the Persian Cossack Brigade, seized control of the government. In 1925, having ousted the Qajar dynasty, he made himself Shah and established the Pahlavi dynasty, ruling as Reza Shah for almost 16 years.

Under Reza Shah's reign, Iran began to modernize and to secularize, and the central government reasserted its authority over the tribes and provinces. During World War Two the Allies feared the monarch close relations with Nazi Germany. In September 1941, following the occupation of western Iran by the Soviet Union and the United Kingdom, Reza Shah was forced to abdicate. His son, Mohammad Reza Pahlavi, became Shah and would rule until 1979.

During World War Two, Iran had been a vital link in the Allied supply line for lend-lease supplies to the Soviet Union. After the war, Soviet troops stationed in northwestern Iran not only refused to withdraw but backed revolts that established short-lived, pro-Soviet separatist regimes in the northern regions of Azerbaijan and Kurdistan. These ended in 1946. The Azerbaijani revolt crumbled after U.S. and United Nations (UN) pressure forced a Soviet withdrawal. Iranian forces also suppressed the Kurdish uprising.

In 1951, the government of nationalist Prime Minister Mohammed Mossadeq (sometimes spelled Mossadegh) nationalized the British-owned Anglo-Iranian Oil Company (AIOC). The Shah fled to Rome from Iran before the U.S.-backed coup against Mossadeq in August 1953, during which pro-Shah army forces

arrested the Prime Minister. The Shah returned soon thereafter. In 1961, Iran initiated a series of economic, social, and administrative reforms that became known as the Shah's White Revolution. The core of this program was land reform. Modernization and economic growth proceeded at an unprecedented rate, fueled by Iran's vast petroleum reserves, the third-largest in the world. However, his autocratic method of rule and pro-western policies alienated large sectors of the population, including the Shia clergy.

In 1978, domestic turmoil swept the country as a result of religious and political opposition to the Shah's rule, including abuses committed by SAVAK, the hated internal security and intelligence service. In January 1979, the Shah left Iran; he died abroad several years after.

On February 1, 1979, exiled religious leader Ayatollah Ruhollah Khomeini returned from France to assume control of the revolution and established himself as Supreme Leader of a new, theocratic republic guided by Islamic principles. Following Khomeini's death on June 3, 1989, the Assembly of Experts chose the outgoing president of the republic, Ali Khamenei, to be his successor as Supreme Leader in what proved to be a smooth transition externally. There was debate amongst senior clerics regarding Khamenei's relative lack of religious credentials.

In August 1989, Akbar Hashemi-Rafsanjani, the speaker of the Majles, was elected President by an overwhelming majority. He was re-elected June 1993, with a more modest majority. Some Western observers attributed the reduced voter turnout to disenchantment with the deteriorating economy. An overwhelming majority of Iranians elected Mohammad Khatami-Ardakani as President in August 1997, hoping he would

usher in a new era of freedom and reform. Khatami had modest successes in broadening the participation of Iranians in government and politics through initiating popular elections for local government councils and encouraging the development of civil society. Many liberal-minded Iranians were disappointed that Khatami did not support student protesters in 1999, but he was nevertheless re-elected in June 2001.

In February 2004 flawed elections were held for the Seventh Majles in which many reformists were prohibited from running, meaning that a much more conservative group of parliamentarians easily retook control of the Majles in May 2004. The first round of elections for the Eighth Majles took place on March 14, 2008, but final results will not be available until after April 25.

None of the seven candidates in the presidential vote on June 17, 2005 received a majority, resulting in a two-candidate runoff between Tehran mayor Mahmud Ahmadi-Nejad and former President Akbar Hashemi Rafsanjani on June 24. Following the first round, some Iranian politicians alleged voter fraud and electoral interference by the Basij militia forces. Ahmadi-Nejad, winning in the second round with almost 62% of the vote according to Iranian Government figures, took office in August 2005. The next presidential elections are scheduled for 2009.

GOVERNMENT

The December 1979 Iranian constitution defines the political, economic, and social order of the Islamic republic. The document establishes Shi'a Islam of the Twelver (Jaafari) sect as Iran's official religion. Sunni Islam, Zoroastrianism, Judaism and Christianity are the only other recognized, legal minority religions. The country is governed by secular and religious leaders through governing bodies, whose duties often overlap.

The Supreme Leader holds power for life unless removed by the Assembly of Experts. He has final say on all domestic, foreign, and security policies for Iran, though he establishes and supervises those policies in consultation with the Expediency Council. The Leader is the final arbiter on all differences or disputes among the various branches of government. He appoints officials to key positions including the head of judiciary and the 12 members of the Guardian Council (six directly, six indirectly). He has power to remove the president and is commander-in-chief of the armed forces.

The constitution stipulates that the Assembly of Experts, which currently consists of the 86 popularly-elected clerics elected to 8-year terms, chooses the Supreme Leader based on jurisprudent qualifications and commitment to the principles of the revolution. The Assembly of Experts reviews his performance periodically and has the power to depose and replace him. Pragmatic conservative candidates generally polled better than their hardline conservative opponents during the December 15, 2006 elections to the Assembly of Experts. (Turnout for this vote, which coincided with municipal council elections, was quite high, topping 60%.) Citizens will not vote for representatives to the Assembly again until 2014.

The Council of Guardians consists of 12 persons. The Supreme Leader appoints the six religious members of the Council of Guardians while the Iranian parliament, the Majles, selects the six lay members from candidates recommended by the judiciary, which is in turn selected by the Supreme Leader. The non-clerics play a role only in determining whether legislation before the Majles conforms to Iran's constitution. The religious members, on the other hand, take part in all deliberations, considering all bills for conformity to Islamic principles. The Council of Guardians can veto any law. This body also certifies the competence of candidates for the presidency, the Assembly of Experts, and the Majles, and it has the power of approbatory supervision over elections.

The president of the Islamic Republic of Iran is elected by universal suffrage to a 4-year term. The president supervises the affairs of the executive branch, appointing and supervising the Council of Ministers (members of the cabinet), coordinating government decisions, and selecting government policies to be placed before the National Assembly.

The Majles, or National Assembly, consists of 290 members elected to 4-year terms. The members of the legislature are elected by direct and secret ballot from among the candidates approved by the Council of Guardians.

In 1988, Ayatollah Khomeini created the Council for Expediency, which resolves legislative issues on which the Majles and the Council of Guardians fail to reach an agreement. Since 1989, it has been used to advise the national religious leader on matters of national policy as well. It is composed of the president, the speaker of the Majles, the judiciary chief, the clerical members of the Council of Guardians, and other members appointed by the Supreme Leader for 3-year terms. Cabinet members and Majles committee chairs also serve as temporary members when issues under their jurisdictions are considered. In 2005, it was announced that the Expediency Council, which now has over 40 members, would have responsibility for general supervision of the system, though that has not resulted in any noticeable change in this institution's day-to-day authority or operations.

Judicial authority is constitutionally vested in the Supreme Court and the four-member High Council of the Judiciary; these are two separate groups with overlapping responsibilities and have one head. Together, they are responsible for supervising the enforcement of all laws and for establishing judicial and legal policies.

Iran has two military forces. The national military is charged with defending Iran's borders, while the Islamic Revolutionary Guard Corps (IRGC) is charged with protecting the

revolution and its achievements. The Qods Force is the IRGC's special operations branch and is responsible for activity outside Iran.

Iran has 30 provinces managed by an appointed governor general. The provinces are further divided into counties, districts, and villages. Sixty percent of eligible voters took part in the first ever municipal and local council elections in 1999, though a lower percentage went to the polls in the second round in 2003. Turnout during the December 15, 2006 elections, during which citizens also elected Assembly of Expert representatives, was over 60%. The local councils select mayors.

Principal Government Officials

Last Updated: 11/12/08

Supreme Leader: **Ali Hoseini-KHAMENEI, Ayatollah**
Pres.: **Mahmud AHMADI-NEJAD**
Speaker of the Islamic Consultative Assembly (Majles): **Ali Ardeshir-LARIJANI**
Sec. of the Cabinet: **Masud ZARIBAFAN**
First Vice Pres.: **Parviz DAVUDI**
Vice Pres. for Atomic Energy: **Qolam Reza AQAZADEH-Khoi**
Vice Pres. for Cultural Heritage & Tourism: **Esfandiar Rahim MASHAIE**
Vice Pres. for Environmental Protection: **Fatemeh JAVADI**
Vice Pres. for Executive Affairs: **Ali SAIDLU**
Vice Pres. for Legal & Parliamentary Affairs: **Mohammad Reza RAHIMI**
Vice Pres. for Management & Planning: **Mansur BORQEI**
Vice Pres. for Martyrs & War Veterans Affairs: **Hosein DEHQAN**
Vice Pres. for National Youth Organizations: **Ali AKBARI, Hojjat ol-Eslam**
Vice Pres. for Physical Education: **Mohammad ALI-ABADI**
Min. of Agricultural Jihad: **Mohammad Reza ESKANDARI**
Min. of Commerce: **Masud MIR-KAZEMI**
Min. of Communication & Information Technology: **Mohammad SOLEIMANI**
Min. of Cooperatives: **Mohammad ABBASI**
Min. of Defense & Armed Forces Logistics: **Mostafa Mohammad NAJAR, Brig. Gen. (Ret.)**
Min. of Economic Affairs & Finance: **Shams-ed-Din HOSEINI**
Min. of Education: **Mahmud FARSHIDI**
Min. of Energy: **Parviz FATAH**
Min. of Foreign Affairs: **Manuchehr MOTAKI**
Min. of Health: **Kamran BAQERI-LANKARANI**
Min. of Housing & Development: **Mohammad SAIDI-KIA**
Min. of Industries & Mining: **Ali Akbar MEHRABIAN**
Min. of Intelligence & Security: **Qolam Hosein MOHSENI-EJEI**
Min. of Interior: **Ali KORDAN**
Min. of Islamic Culture & Guidance: **Mohammad Hosein SAFAR-HARANDI**
Min. of Justice: **Qolam Hosein ELHAM**
Min. of Labor & Social Affairs: **Mohammad JAHROMI**
Min. of Petroleum: **Qolam Hosein NOZARI**
Min. of Roads & Transportation: **Hamed BEHBAHANI**
Min. of Science, Research, & Technology: **Mohammad Mehdi ZAHEDI**
Min. of Welfare & Social Security: **Abdol Reza MESRI**
Govt. Spokesman: **Qolam Hosein ELHAM**
Governor, Central Bank of Iran: **Tahmaseb MAZAHERI-Khorasani**
Head of Interest Section in the US: **Mostafa RAHMANI**
Permanent Representative to the UN, New York: **Mohammad KHAZAI-Torshizi**

POLITICAL CONDITIONS

Iran's post-revolution difficulties have included an 8-year war with Iraq, internal political struggles and unrest, and economic disorder. The early days of the regime were characterized by severe human rights violations and political turmoil, including the seizure of the U.S. Embassy compound and its occupants on 4 November 1979, by Iranian student militants. Iranian authorities released the 52 hostages only after 444 days of captivity.

By mid-1982, the clergy had won a succession of post-Revolution power struggles that eliminated first the center of the political spectrum and then the leftists, including the communist Tudeh party and the cult-like Mujahedin-e Khalq Organization (MEK or MKO). Assassinations, throwing acid in the faces of women who refused to wear the veil, and other acts of violence punctuated this period. There has been some moderation of excesses since the early days of the revolution, and the country experienced a partial "thaw" in terms of political and social freedoms during the tenure of former president Khatami, but serious problems remained. The administration of President Ahmadi-Nejad has witnessed a crackdown on Iranian civil society, continued human rights violations, and worsening constraints on press freedom and civil liberties.

The Islamic Republican Party (IRP) was Iran's sole political party until its dissolution in 1987. Iran now has a variety of groups engaged in political activity; some are oriented along ideological lines or based on an identity group, others are more akin to professional political parties seeking members and recommending candidates for office. Some have been active participants in the Revolution's political life while others reject the state. Conservatives consistently thwarted the efforts of reformists during the Khatami era and have consolidated their control on power since the flawed elections for the seventh Majles in 2004 and president Ahmadi-Nejad's victory in 2005.

The Iranian Government has faced armed opposition from a number of groups, including the MEK (which the U.S. Government added to its list of Foreign Terrorist Organizations in 1999), the People's Fedayeen, the Kurdish Democratic Party of Iran (KDPI), the Party for a Free Life in Kurdistan (PJAK), and the Baluchi opposition group Jundallah.

ECONOMY

Pre-revolutionary Iran's economic development was rapid. Traditionally an agricultural society, by the 1970s Iran had achieved significant industrialization and economic moderniza-

tion, helped in large part by the growing worldwide demand for oil. However, the pace of growth had slowed dramatically by 1978, just before the Islamic revolution. Since the fall of the shah, economic recovery has proven elusive thanks to a combination of factors, including state interference in the economy and fluctuations in the global energy market. Economic activity was severely disrupted additionally by years of upheaval and uncertainty surrounding the revolution and the introduction of statist economic policies. These conditions were worsened by the war with Iraq and the decline in world oil prices beginning in late 1985. After the war with Iraq ended, the situation began to improve: Iran's GDP grew for two years running, partly from an oil windfall in 1990, and there was a substantial increase in imports. Iran's social policies during the Iran-Iraq war resulted in a baby boom. Nonetheless, Iran continues to suffer from "brain drain" as its educated youth leave the country to pursue better economic opportunities.

A decrease in oil revenues in 1991 and growing external debt dampened optimism for recovery. In March 1989, the government instituted a new 5-year plan for economic development, which loosened state control and allowed Iran to seek greater latitude in accessing foreign capital. Mismanagement and inefficient bureaucracy, as well as political and ideological infighting, hampered the formulation and execution of a consolidated economic policy, and Iran fell short of the plan's goals while economic inequality was aggravated. Former President Khatami followed the market reform plans of his predecessor, President Rafsanjani, and indicated that he would pursue diversification of Iran's oil-reliant economy, although he made little progress toward that goal. High inflation and expansive public transfer programs, as well as powerful economic-political vested interests, created obstacles for rapid reform.

Unemployment, a major problem even before the revolution, has many causes, including population growth and restrictive labor policies. Farmers and peasants enjoyed a psychological boost from the attention given them by the Islamic regime but hardly appear to be better off in economic terms. The government has made progress on rural development, including electrification and road building, but Iran still faces inefficiencies related to agricultural land usage which are politically difficult to reconcile. Agriculture also has suffered from shortages of capital, raw materials, and equipment, problems dating back to the 1980-1988 war with Iraq. (See Foreign Relations below.)

Although Islam guarantees the right to private ownership, banks and some industries–including the petroleum, transportation, utilities, and mining sectors–were nationalized after the revolution under Marxist-influenced economic policies. Starting under President Rafsanjani, Iran has pursued some privatization through its nascent equities markets. However, the industrial sector remains plagued by low labor productivity and shortages of raw materials and spare parts, and is uncompetitive against foreign imports.

Today, Iran's economy is marked by a bloated and inefficient state sector, a reliance on the oil sector (which provides over 85% of government revenues), and statist policies that create major distortions throughout. Most economic activity is controlled by the state. Although the Supreme Leader issued a decree in July 2006 to privatize 80% of the shares of most government-owned companies, private sector activity is typically limited to small-scale workshops, farming, and services. President Mahmud Ahmadi-Nejad has failed to make any notable progress in fulfilling the goals of the nation's latest five-year plan. A combination of price controls and subsidies (on food and energy in particular) continue to weigh down the economy, and administrative controls, widespread corruption, and other rigidities undermine the potential for private-sector-led growth. As a result of these inefficiencies, significant informal market activity flourishes and shortages are common. High oil prices in recent years have doubled export earnings since 2004 and have enabled Iran to amass nearly $65 billion in foreign exchange reserves. Yet this increased revenue has not eased economic hardships, which include high unemployment (11% according to government estimates) and double-digit inflation, and the economy has only seen moderate growth. Iran has an educated population, and economic inefficiency and insufficient investment (both foreign and domestic) have prompted an increasing number of Iranians to seek employment overseas, resulting in significant "brain drain."

FOREIGN RELATIONS

Khomeini's revolutionary regime initiated sharp changes from the foreign policy pursued by the Shah, particularly in reversing the country's orientation toward the West. In the Middle East, Iran's only significant ally has been Syria, but Iran has made strides in improving relations with its Gulf neighbors, particularly Saudi Arabia.

Iran's foreign relations are based on sometimes competing objectives. Iran's pragmatic foreign policy goals include, not surprisingly, protecting itself from external threats and building trade ties. Iran also exports its fundamentalist revolution to other countries and supports terrorist organizations, and its vehement anti-U.S. and anti-Israel stances are well-known. Senior Iranian officials directed Hezbollah to carry out the bombing of the Asociación Mutual Israelita Argentina (AMIA, the Argentine Israelite Mutual Association) building in Buenos Aires on July 18, 1994, killing 85 people and wounding scores of others. The Interpol Executive Committee in November 2007 issued Red Notices (international arrest warrants) for six individuals–five former or current Iranian officials and one Lebanese Hezbollah leader–out of the eight indicted by the Government of Argentina in October 2006.

In September 1980, during the U.S. hostage crisis, Iraq invaded Iran to

take control of the waterway between the two countries, the Shatt al-Arab, although the conflict's underlying causes included each nation's overt desire for the overthrow of the other's government. Iran defended itself and demanded the withdrawal of Iraqi troops from Iranian territory and the return to the status quo ante for the Shatt al-Arab as established under the 1975 Algiers Agreement signed by Iraq and Iran. Khomeini's government turned down an Iraqi cease-fire proposal in 1982, making a new demand for Saddam Hussein's removal as well. After eight punishing years of war, in July 1988, Iran at last agreed to UN Security Council Resolution 598 and the cease-fire was implemented on August 20, 1988. Neither nation had made any real gains in the war.

Iran's relations with many of its Arab neighbors have been strained by Iranian attempts to spread its Islamic revolution, a strictly ideological goal. In 1981, Iran supported a plot to overthrow the Bahrain Government. In 1983, Iran expressed support for Shi'ites who bombed Western embassies in Kuwait, and in 1987, Iranian pilgrims rioted during the hajj (pilgrimage) in Mecca, Saudi Arabia. Egypt mistrusts Iran because of support of Egyptian Sunni fundamentalists. Iran backs Hezbollah (in Lebanon), Hamas, Palestinian Islamic Jihad, and the Popular Front for the Liberation of Palestine-General Command, all of which are violently opposed to the Arab-Israeli peace process. In contrast, while relations with west European nations have been uneven, they have been driven primarily by pragmatic goals of trade and security. Iran has largely declined to deliver on key European political concerns such as human rights and weapons of mass destruction (WMD) acquisition efforts, particularly in the nuclear field, where the International Atomic Energy Agency (IAEA) has been strongly critical of Iran.

An IAEA report in November 2003 provided evidence that Iran, a signatory to the Nuclear Non-Proliferation Treaty (NPT), had concealed secret nuclear activities for 18 years. Under international pressure, Iran signed the Additional Protocol to the Safeguards Agreement on December 18, 2003, agreeing to suspend all uranium-enrichment and reprocessing activities voluntarily, as well as cooperate fully with the International Atomic Energy Agency (IAEA) in resolving questions regarding Iran's nuclear program. In June 2004, the IAEA rebuked Iran for failing to fully cooperate with an inquiry into its nuclear activities, and in November 2004, Iran agreed to suspend most of its uranium enrichment under a deal with the EU. That promise did not last, however, and since then concerns over Iran's nuclear activities have increased.

On June 6, 2006, China, France, Germany, Russia, the United States, and United Kingdom offered Iran a substantial package of economic cooperation and assistance. Tehran, however, was first required to come into compliance with International Atomic Energy Agency (IAEA) guidelines on its nuclear program, suspending its uranium enrichment program. On July 31, the UN Security Council adopted resolution 1696 on the Iranian nuclear question, requiring Iran to suspend all activities related to enrichment and reprocessing, including research and development, as demanded by the IAEA, or else face possible sanctions. Tehran defied the UN Security Council (UNSC) deadline of August 31, leading to the passage of UNSC Resolution 1737 in December 2006 and, as Iran continued to balk, Resolution 1747 in March 2007.

Both Iran and Russia believe they have important national interests at stake in developments in Central Asia and the Transcaucasus, particularly regarding energy resources from the Caspian Sea. Russian and other sales of military equipment and technology to Iran concern Iran's neighbors and the United States. Washington is also concerned about Russian assistance in building a nuclear facility at Bushehr.

Iran spends about 3.3% of its GDP on its military. Iran's military consists of both a national military held over from the shah's government and the IRGC, each with its own ground, naval and air braches. The Iran-Iraq war took a heavy toll on these military forces. Iran has since worked to modernize its military, including development of ballistic missile programs. Iran also continues to seek nuclear capabilities.

U.S.-IRANIAN RELATIONS

On November 4, 1979, militant Iranian students occupied the American Embassy in Tehran with the support of Ayatollah Khomeini. Fifty-two Americans were held hostage for 444 days. On April 7, 1980, the United States broke diplomatic relations with Iran, and on April 24, 1981, the Swiss Government assumed representation of U.S. interests in Tehran. Iranian interests in the United States are represented by the Government of Pakistan. The Islamic Republic of Iran does not have its own embassy in Washington, though it does have a permanent mission to the United Nations in New York City.

In accordance with the Algiers declaration of January 20, 1981, the Iran-U.S. Claims Tribunal (located in The Hague, Netherlands) was established for the purpose of handling claims of U.S. nationals against Iran and of Iranian nationals against the United States. U.S. contact with Iran through The Hague covers only legal matters.

The U.S. Government, by Executive Orders issued by the President as well as by Congressional legislation, prohibits most trade with Iran. Some sanctions were imposed on Iran because Tehran is a state sponsor of terrorism, others because of the nuclear proliferation issues, and still more for human rights violations, including infringement of religious freedom. The commercial relations that do exist between the two countries consist mainly of Iranian purchases of food and medical products and U.S. imports of carpets and food. Some sanctions were temporarily

waived in the wake of the devastating Bam earthquake of December 2003. U.S. officials and relief workers actively assisted in relief and reconstruction efforts.

There are serious obstacles to improved relations between the two countries. As a state sponsor of terrorism, Iran remains an impediment to international efforts to locate and prosecute terrorists. Recent attempts by Iran to form loose alliances with anti-U.S. governments in the Western Hemisphere, such as the Venezuelan Government, has further heightened concern about Iran's support for terrorism and nuclear ambitions. Operation Iraqi Freedom removed the Iranian Government's greatest security threat, but officially Iran remained neutral about U.S. policy, sometimes strongly condemning American policies and actions in Iraq. Iran has cultural ties to elements of the populations of both Iraq and Afghanistan. It has made some positive contributions to stability in both countries, but other actions have had the opposite effect. It remains to be seen whether Tehran will ultimately be a constructive force in the reconstruction of its two neighbors or not.

The U.S. Government defines its areas of objectionable Iranian behavior as the following:

- Iran's efforts to acquire nuclear weapons and other weapons of mass destruction;
- Its support for and involvement in international terrorism;
- Its support for violent opposition to the Middle East peace process, as well as its harmful activities particularly in Lebanon, as well as in Iraq, Afghanistan, and elsewhere in the region; and
- Its dismal human rights record and lack of respect for its own people.

The United States has held discussions with Iranian representatives on particular issues of concern over the years. U.S. and Iranian envoys cooperated during operations to overthrow the Taliban in 2001 and during the Bonn Conference in 2002 that established a broad-based government for the Afghan people under President Karzai. The Secretary of State, her Iranian counterpart, and others met at talks on Iraq in Sharm El Sheikh, Egypt, on May 3, 2007. The American and Iranian ambassadors to Iraq took part in face-to-face discussions in Baghdad, with Iraqi officials in attendance, on May 28, 2007. The United States believes, however, that normal relations are impossible until Iran's policies change.

The Secretary of State has stated that Iranian agreement to abide by UNSC Resolutions 1696 and 1747, calling for Tehran to suspend uranium enrichment and comply with its international nuclear obligations, could lead to the direct negotiations between American and Iranian government officials, not only on Iran's nuclear case but on a wide range of issues. Nevertheless, the U.S. State Department is supporting efforts to further the cause of democracy in Iran. In fiscal year (FY) 2006, the U.S. Congress allocated approximately $66 million to promote free media, personal freedom, and a better understanding of western values and culture. As part of these efforts, the Department supports efforts to develop civil society in Iran and exchange programs that bring Iranian students, athletes, professionals and others to the United States.

In 2007, the Iranian Government charged and in some cases imprisoned four innocent Iranian-American scholars, civil society actors, and journalists, accused by the regime of jeopardizing the security of the state. The international community, academic institutions, non-governmental organizations (NGOs) and private citizens joined the U.S. Government in calling for the release of the detained dual nationals. They were later freed. We continue to press Iran to cooperate more fully in the investigation into the case of private investigator and retired FBI agent Robert Levinson, missing since visiting Kish Island, Iran, March 8-9, 2007.

TRAVEL

Consular Information Sheet

July 1, 2008

Country Description: Iran is a constitutional Islamic republic with a theocratic system of government where ultimate political authority is vested in a learned religious scholar, the Supreme Leader. Shia Islam is the official religion of Iran, and Islamic law is the basis of the authority of the state. The Iranian Constitution guarantees freedom of worship to Jews, Christians and Zoroastrians, though they are sometimes the subject of discrimination and repression. The workweek in Iran is Saturday through Thursday; however, many government offices and private companies are closed on Thursdays. Friday is the day of rest when all establishments are closed. Offices in Iran are generally open to the public during the morning hours only.

Entry Requirements: Should you decide to travel to Iran despite the current Travel Warning, a passport and visa are required, except for travel to Kish Island. To obtain a visa, contact the Iranian Interests Section of the Embassy of Pakistan located at 2209 Wisconsin Avenue NW, Washington, DC 20007; tel. 202-965-4990, 91, 92, 93, 94, 99, fax 202-965-1073, 202-965-4990 (Automated Fax-On-Demand after office hours).

U.S. citizens traveling to Iran are being fingerprinted upon entry. The Iranian press has reported that foreign tourists may obtain seven-day tourist visas at the airport in Tehran. However, U.S. citizens are not eligible to receive these visas and have to obtain valid visas from the Iranian Interests Section in Washington. Note: possession of a valid Iranian visa will not guarantee entry into the country. Some American travelers with valid visas have been refused entry at the border without explanation. U.S. citizens do not have to obtain a visa for travel from Dubai, United Arab Emirates, to Kish

Island. U.S. passports are valid for travel to Iran. However, the Iranian government does not recognize dual nationality and will treat U.S.-Iranian dual nationals solely as Iranian citizens. Thus, U.S. citizens who were born in Iran, who became naturalized citizens of Iran (e.g. through marriage to an Iranian citizen), and children of such persons—even those without Iranian passports who do not consider themselves Iranian—are considered Iranian nationals by Iranian authorities.

Therefore, despite the fact that these individuals hold U.S. citizenship, under Iranian law, they must enter and exit Iran on an Iranian passport, unless the Iranian government has recognized a formal renunciation or loss of Iranian citizenship. Dual nationals may be subject to harsher legal treatment than a visitor with only American citizenship. (See section on Special Circumstances below.)

In the past, U.S.-Iranian dual nationals have been denied permission to enter/depart Iran using their U.S. passport; they have also had their U.S. passports confiscated upon arrival or departure. (Depending on the circumstances, the individuals were sometimes able to retrieve their U.S. passports after renouncing their Iranian citizenship.)

Recently, Iranian authorities have prevented a number of Iranian-American citizen academics, journalists, and others who traveled to Iran for personal reasons from leaving, and in some cases have detained and imprisoned them on various charges, including espionage and being a threat to the regime. Americans of Iranian origin should consider the risk of being targeted by authorities before planning travel to Iran. Iranian authorities may deny dual nationals' access to the United States Interests Section in Tehran, because they are considered to be solely Iranian citizens.

As a precaution, however, it is advisable for U.S.-Iranian dual nationals to obtain in their Iranian passports the necessary visas for the country which they will transit upon their return to the U.S. so that, if their U.S. passports are confiscated in Iran, they may depart Iran with their Iranian passport. These individuals can then apply for a new U.S. passport in that third country.

Dual nationals whose U.S. passports are confiscated may also obtain a "Confirmation of Nationality" from the U.S. Interests Section of the Embassy of Switzerland, which is the U.S. protecting power. This statement, addressed to the relevant foreign embassies in Tehran, enables the travelers to apply for third-country visas in Tehran. Dual nationals finding themselves in this situation should note in advance that the Swiss Embassy would issue this statement only after the traveler's U.S. nationality is confirmed and after some processing delay. Dual nationals must enter and depart the United States on U.S. passports.

Visa extensions are time-consuming and must be filed at least one week in advance of the expiration date. As of March 21, 2006, a foreign national and anyone accompanying him/her will pay a fine of 300,000 rials or 30,000 ottomans per day for each day of unauthorized stay in Iran.

All Iranian nationals, including U.S.-Iranian dual nationals, must have an exit permit stamped in their Iranian passports in order to depart Iran. The stamp is affixed to the Iranian passport when it is issued and remains valid until the expiration date of the passport. All Iranian nationals residing abroad and in Iran, including U.S.-Iranian dual nationals, are now required to pay an exit tax regardless of the duration of their stay in Iran. More specific information on Iranian passport and exit visa requirements may be obtained from the Iranian Interests Section of the Embassy of Pakistan in Washington, D.C.

Non-Iranian-national women who marry Iranian citizens gain Iranian nationality upon marriage. If the marriage takes place in Iran, the woman's American passport will be confiscated by Iranian authorities. They must have the consent of their husbands to leave Iran or, in his absence, must gain the permission of the local prosecutor. Iranian law combined with the lack of diplomatic relations between the United States and Iran means that the U.S. Interests Section in Tehran can provide only very limited assistance if an American woman married to an Iranian man has marital difficulties and/or encounters difficulty in leaving Iran.

After divorce or death of the husband, a foreign-born woman has the choice to renounce her Iranian citizenship but any of the couple's children will automatically be Iranian citizens and their citizenship is irrevocable. They will be required to enter and depart Iran on Iranian passports. For a divorce to be recognized it should be carried out in Iran or, if outside Iran, in accordance with Sharia law. Upon divorce, custody of the children normally goes to the mother until the child reaches age 7, at which point custody is automatically transferred to the father. However, if the courts determine that the father is unsuitable to raise the children, they may grant custody to the paternal grandfather or to the mother, if the mother has not renounced her Iranian citizenship and is normally resident in Iran. If the courts grant custody to the mother, she will need permission from the paternal grandfather or the courts to obtain exit visas for the minor children (under age 18) to leave the country. Iran is not a signatory to the Hague Convention on the Civil Aspects of International Child Abduction. Please see the Department of State's International Parental Child Abduction flyer on Iran for further information.

Safety and Security: U.S. citizens who travel to Iran despite the Travel Warning should exercise caution throughout the country, but especially in the southeastern region where westerners have been victims of criminal gangs often involved in the smuggling of drugs and other contraband. American citizens should avoid travel to areas within 100 kilometers of the border with Afghanistan, within 10 kilometers of the border with Iraq, and generally anywhere east of the line from Bam and Bandar Abbas toward the Pakistan border.

Terrorist explosions have killed a number of people since 2005. Be aware that the Iranian government has blamed the U.S. and/or UK governments for involvement in the February 2007 bombing that killed Iranian military forces in Zahedan in the southeast and the 2005/2006 bombings in Ahvaz/Khuzestan in the southwest. A number of British firms were damaged in attacks in August and November 2005.

U.S. citizens are advised to avoid demonstrations and large public gatherings. Increased tension between Iran and the West over the past several years is a cause of concern for American travelers.

Iranian security personnel may at times place foreign visitors under surveillance. Hotel rooms, telephones and fax machines may be monitored, and personal possessions in hotel rooms may be searched. Photography near military and other government installations is strictly prohibited and could result in serious criminal charges, including espionage, which carries the death penalty.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Travel Warning for Uzbekistan and the Worldwide Caution can be found.

For the latest security information, Americans traveling abroad should regularly monitor Department's Internet web site where the current Travel Warnings and Travel Alerts, including the Travel Warning for Iran, the Worldwide Caution Travel Alert and the Middle East and North Africa Travel Alert, can be found.

Up-to-date information on safety and security, including safety and security in Iran, can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Major crime is generally not a problem for travelers in Iran, although foreigners occasionally have been victims of petty street crime. Young men in unmarked cars have robbed foreigners and young men on motor bikes have snatched bags.

There have been reports of robberies by police impersonators, usually in civilian clothing. Insist on seeing the officer's identity card and request the presence of a uniformed officer/marked patrol car. Travelers should not surrender any documents or cash.

Travelers should not carry large amounts of hard currency. In view of the possibility of theft, passports, disembarkation cards, other important documents and valuables should be kept in hotel safes or other secure locations. Pre-booked taxis are safer than those hailed from the street. Americans should check with their hotel or tour guide for information on local scams.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the U.S. Interests Section at the Swiss Embassy in Tehran or the nearest U.S. Embassy or Consulate.

Because of the lack of a U.S. Embassy in Iran, the processing time for a replacement passport takes longer at the U.S. Interests Section at the Swiss Embassy than elsewhere.

If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the U.S. Interests Section for assistance. The staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred.

Although the investigation and prosecution of the crime is solely the responsibility of local authorities, Swiss Embassy officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent of the "911" emergency line in Iran is as follows: 115 for ambulance service, 125 for fire and 110 for police. English speakers, however, are generally unavailable.

Medical Facilities and Health Information: Basic medical care and medicines are available in the principal cities, but may not be available in rural areas. Medical facilities do not meet U.S. standards and sometimes lack medicines and supplies.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

In 2006, there were reports of Crimean Congo Hemorrhagic Fever, mostly in the southeastern Sistan va Baluchistan province. See www.who.int/mediacentre/factsheets/fs208/en for more information. Iranian authorities have confirmed outbreaks of avian influenza (bird flu) in January 2008 in northern Iran, as well as earlier reports among wild swans in the Anzali Wetlands and in domestic poultry in the northern provinces of Azerbaijan and Gilan. There have been a number of fatalities from avian flu reported in eastern Turkey, 45 kilometers from the Iranian border. For information on avian influenza (bird flu), please refer to the Department of State's Avian Influenza Fact Sheet, available at http://travel.state.gov/travel/tips/health/health_1181.html.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their pol-

icy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Iran is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Travelers in possession of International Driver's Permits may drive in Iran, though the U.S. Interests Section in Iran does not recommend that tourists drive in Iran. Iran has a very high rate of traffic accidents, the second highest cause of mortality in the country. Drivers throughout Iran tend to ignore traffic lights, traffic signs and lane markers. Urban streets are not well lit. It is therefore particularly dangerous to drive at night. Sidewalks in urban areas only exist on main roads and are usually obstructed by parked cars. In the residential areas, few sidewalks exist. Drivers almost never yield to pedestrians at crosswalks. If you are involved in an accident, no matter how minor, do not leave the scene. Wait until the police arrive to file a report.

Iranian authorities sometimes set up informal roadblocks, both in cities and on highways, often manned by young, inexperienced officers. They are often suspicious of foreigners. Ensure you carry a form of identification with you and avoid getting into disputes.

Pollution levels from cars are very high, particularly in Tehran, which can trigger respiratory problems.

Aviation Safety Oversight: As there is no direct commercial air service between the U.S. and Iran by local carriers, the U.S. Federal Aviation Administration (FAA) has not assessed the Government of Iran's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's internet website at http://www.faa.gov. Civil aviation in Iran continues to experience air incidents and accidents, including five crashes with fatalities between April 20, 2005, and November 27, 2006. Incidents included engine failure and planes veering off the runway.

Special Circumstances: The Iranian Government has seized the passports and blocked the departure of foreigners who work in Iran on tax/commercial disputes.

In addition to being subject to all Iranian laws, U.S. citizens who also possess Iranian citizenship may also be subject to other laws that impose special obligations on citizens of Iran, such as military service or taxes. Iranian-citizen males aged 18-34 are required to perform military service, unless exempt. Iranian-Americans, even those born in the U.S., are included.

Dual nationals sometimes have their U.S. passports confiscated and may be denied permission to leave Iran, or encounter other problems with Iranian authorities. Likewise, Iranian authorities may deny dual nationals' access to the U.S. Interests Section in Tehran, because they are considered to be solely Iranian citizens. Refer to the above section entitled "Entry/Exit Requirements" for additional information concerning dual nationality.

U.S. citizens who are not dual U.S.-Iran nationals are encouraged to carry a copy of their U.S. passport (biodata page and page with Iranian visa) with them at all times, so that if questioned by local officials, proof of U.S. citizenship is readily available. Carry some other form of identification with you, such as a drivers license or other photo identification at all times as well.

Credit cards and bank cards are not widely accepted in Iran. It is difficult to change dollars to rials in Iranian banks and you may not be able to access your U.S. bank accounts via the Internet from Iran. You will not be able to access your U.S. bank accounts using ATMs in Iran. Travelers checks can be difficult to exchange. Bring enough hard currency to cover your stay, but make sure you declare this currency upon entry. There is no Western Union or similar institution and bank transfers may not be possible. Exchange money only at banks or an authorized currency exchange facility, not on the street, and keep your exchange receipts.

Pre-paid overseas calling cards are available at most newsagents. The Internet is widely used in Iran. There are Internet cafes in most hotels. Usage may be monitored.

Do not work illegally. You will be deported, fined and/or imprisoned. You may also be prevented from entering the country again.

Islamic law is strictly enforced in Iran. Alcohol is forbidden. Importation of pork products is banned. Consult a guide book on Iran to determine how to dress and behave properly and respectfully. Women should expect to wear a headscarf and jacket that covers the arms and upper body while in public. There may be additional dress requirements at certain religious sites, e.g., women might need to put on a chador (which covers the whole body except the face) at some shrines. During the holy month of Ramadan, you should in general observe the Muslim tradition of not eating, drinking or smoking in public from sunrise to sunset each day, though there are exemptions for foreign travelers who eat in hotel restaurants. (See the Criminal Penalties section below for more information.)

In general, it is best to ask before taking photographs of people. Hobbies like photography and those involving the use of binoculars (e.g., bird-watching) can be misunderstood and get you in trouble with security officials. (See the Safety and Security section above for warnings on photography.)

For specific information regarding Iranian customs regulations, contact the Iranian Interests Section of the Embassy of Pakistan in Washington, DC.

Most laptops are controlled items. It is unlawful to bring controlled items into Iran, even on a temporary basis, unless specifically authorized by the Office of Foreign Assets Control (OFAC) in a manner consistent with the Iran-Iraq Arms Nonproliferation Act of 1992 and other relevant law.

U.S. Government economic sanctions still govern imports of Iranian-origin goods and services and exports to Iran. Except for carpets and foodstuffs, and information or informational materials and gifts valued at $100 or less, the importation of Iranian-origin goods or services into the United States is prohibited. The exportation or re-exportation of goods, technology or services directly or indirectly from the United States or by a U.S. person to Iran also is prohibited, except in the following cases: articles donated to relieve human suffering (such as food, clothing and medicine), gifts valued at $100 or less, licensed exports of agricultural commodities, medicine and medical devices, and trade in informational materials.

The Office of Foreign Assets Control (OFAC), Department of Treasury, provides guidance to the public on the interpretation of the current economic sanctions. For further information, consult OFAC's Compliance Programs Division, at 202-622-2490, visit the OFAC web site at http://www.treas.gov/offices/enforcement/ofac/, or obtain information via fax at 202-622-0077. For information concerning licensing of exports, contact OFAC's Licensing Division at:

Licensing Division
Office of Foreign Assets Control
U.S. Department of the Treasury
1500 Pennsylvania Avenue NW
Treasury Annex
Washington, DC 20220
Telephone (202) 622-2480
Fax (202) 622-1657

Iran is prone to earthquakes. Many people have died in recent years, most notably in the city of Bam in 2003, killing 30,000. In February 2005, an earthquake measuring 6.4 on the Richter scale struck Zarand in southeast Iran. In March 2006, several earthquakes occurred in Restan province, western Iran, killing around 100 and injuring 1200.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Iranian laws, even unknowingly, may be expelled, arrested or imprisoned. Fines, public floggings, and long prison terms are common. Former Muslims who have converted to other religions, as well as persons who encourage Muslims to convert, are subject to arrest and possible execution. Drinking, possession of alcoholic beverages and drugs, un-Islamic dress, as well as public displays of affection with a member of the opposite sex are considered to be crimes. Relations between non-Muslim men and Muslim women are illegal. Adultery, sex outside of marriage and gay sex are all illegal under Iranian law and carry the death penalty. DVDs depicting sexual relations and magazines showing unveiled women are forbidden.

Penalties for possession, use, or trafficking in illegal drugs in Iran are severe and convicted offenders can expect long jail sentences and heavy fines. Iran executes many people each year on drug-related charges. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States. Please see our information on Criminal Penalties.

U.S. citizens in Iran who violate Iranian laws, including laws that are unfamiliar to Westerners (such as those regarding the proper wearing of apparel,) may face severe penalties.

The Iranian Government reportedly has the names of all individuals who filed claims against Iran at the Iran-U.S. Claims Tribunal at The Hague pursuant to the 1981 Algerian Accords. In addition, the Iranian Government reportedly has compiled a list of the claimants who were awarded compensation in the Iran Claims Program administered by the Foreign Claims Settlement Commission. The Iranian government is allegedly targeting award-holders who travel to Iran. It is reported that upon some claimants' entry into Iran, Iranian authorities question them as to the status of payment of their respective awards with a view to recouping the award money. It is also reported that the Iranian Government has threatened to prevent U.S. claimants who visit Iran from departing the country until they make arrangements to repay part or all of their award.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and U.S. Interests Section Location: There is no U.S. Embassy or Consulate in Iran. The Embassy of Switzerland serves as the protecting power for U.S. interests in Iran. The U.S. Interests Section at the Swiss Embassy is currently located at Afrika Avenue, West Farzan Street, no. 32, Tehran, 19588-45111, Iran, P.O. Box 19395-4683. The telephone numbers for the U.S. Interests Section are (98) 21-8878-2964 and 98-21-8879-2364, fax 98-21-8877-3265, email: tie.vertretung@eda.admin.ch. The workweek is Sunday through Thursday. Public service hours are 8:00 a.m.—12:00 noon. The Interests Section does not issue U.S. visas or accept visa applications. The limited consular services provided to U.S. citizens in Tehran include:

- registering U.S. citizens;
- answering inquiries concerning the welfare and whereabouts of U.S. citizens in Iran;
- rendering assistance in times of distress or physical danger;|
- providing U.S. citizens with pass-

port and Social Security card applications and other citizenship forms for approval at the U.S. Embassy in Bern, Switzerland;

- performing notarial services on the basis of accommodation; and,

- taking provisional custody of the personal effects of deceased U.S. citizens.

Americans living or traveling in Iran are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website so that they can obtain updated information on travel and security within Iran. They may also register on the web site of the U.S. Interests Section at www.eda.admin.ch/tehran. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate before flying to Iran. By registering, American citizens make it easier for the U.S. Interests Section to contact them in case of emergency.

Intercountry Adoption

February 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

The Department of State has received inquiries from American citizens concerned about the plight of the children affected by the earthquake in Bam, Iran and wondering about the possibility of adoption. The Department of State shares this humanitarian concern for the children of Bam, Iran and applauds American citizens' desire to assist them in their time of need. However, at this time, it is not possible for U.S. citizens to adopt Iranian children, for several reasons. The international standard in a crisis is to keep children as close to their family members as possible. It can be extremely difficult to determine whether children whose parents are missing are truly orphans. It is not uncommon in a catastrophic situation for parents to send their children out of the affected area, or to become separated during an evacuation. Even when children are indeed orphaned or abandoned by their parents, they are often taken in by other relatives. Staying with relatives in extended family units is generally a better solution than uprooting the child completely.

The United States Interests Section of the Swiss Embassy at Tehran has provided the following information regarding adoptions in Iran. The information is based on informal discussions with an adviser at the Nationality and Refugees Department of the Iranian Ministry of Foreign Affairs. In accordance with current Iranian practice, adoptions by parents residing outside of Iran are possible provided the adoptive parents are Iranian citizens and fulfill all the other required conditions for adoption. Applications from close family members have the greatest chance of being approved. Before an adoption can take place, strict rules are applied in order to protect the children and to establish the suitability of prospective adoptive parents. The process is complicated and time-consuming. Moreover, only the Iranian Welfare Organization and the appropriate court can decide each case on its own merits in the best interest of the child. Muslim children will be given exclusively to Muslim parents. Christian parents may adopt children of Christian denominations.

Iranians living abroad can file adoption applications through relatives living in Iran. Applications must be submitted to the Iranian Welfare Organization. After a child has been placed with a family, surveillance by Iranian authorities continues and periodic checks are made to ensure the child's physical and mental well-being.

There are still ways in which U.S. citizens can help the children of Bam. Many nongovernmental organizations (NGOs) say that what is needed most at this time are financial contributions. Individuals who wish to assist can do the most good by making a financial contribution to an established NGO that will be well placed to respond to Iran's most urgent needs.

The Red Cross is working through the International Committee of the Red Cross (ICRC) to provide humanitarian assistance in Iran. The Red Cross and ICRC do assessments to determine needs and use monetary donations where the need is the greatest. To contact them, call 1-800-HELP-NOW. There is no mechanism to direct money to a specific child or person. The website http://www.redcross.org has more information on directed contributions. The United States Agency for International Development (USAID) Web site, http://www.usaid.gov/iran, provides information on how individuals can assist.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

Since the mid-1970's, when we first began compiling statistics on this

subject, the Department of State has taken action in more than 4,200 cases where children have either been abducted from the United States or wrongfully detained in a foreign country. We have provided information in response to thousands of additional inquiries regarding child custody, visitation rights and effective abduction prevention techniques such as supervised visitation.

The Office of Overseas Citizens Services has taken an active role in almost 80 cases of children taken to or wrongfully retained in Iran. To our knowledge, the majority of these cases have not been resolved. However, in a number of cases, the left-behind parent has kept open the lines of communication, negotiated with the abducting parent, and eventually persuaded the other parent to travel out of Iran with the children.

The United States severed diplomatic and consular relations with the Government of Iran on April 7, 1980 as a result of the events surrounding the seizure of our Embassy in Tehran, Iran on November 4, 1979. In April of 1980, the United States Government formally asked the Swiss Government if it would assume diplomatic and consular representation of the United States in Iran. The Swiss agreed to perform specific consular and administrative functions on behalf of the U.S. Government.

One of their responsibilities is to provide consular services to children who have been taken by one parent to Iran without the other parent's knowledge or consent. In this regard, Swiss officials are permitted to ascertain the child's welfare, process applications for U.S. passports and to inform appropriate officials if there are allegations of child abuse. However, the Iranian government has placed strict limits on the ability of Swiss diplomats to intervene in such cases because they do not recognize the concept of dual nationality and therefore, when one parent is an Iranian citizen, consider the children involved to be Iranian citizens only.

Swiss diplomats in Iran do not have the authority to take custody of and return a child to the United States, just as foreign diplomats in the U.S. cannot remove children from this country. Such an action would be considered kidnapping under local law.

If you are concerned about a potential abduction, one of the first steps you should take is to notify the Department's Office of Legal Assistance and Citizenship Appeals. That office, which can be reached on (202) 326-6178, can block the issuance of a U.S. passport in your child's name upon submission of a court order giving you sole custody or prohibiting the child's departure from the U.S. without permission of the court. That office can also tell you whether your spouse has already applied for and obtained a passport for your child. However, if a passport has already been issued for the child, that office cannot revoke the passport or prevent its use.

If the child's father is an Iranian citizen, the child is considered an Iranian citizen under Iranian law and could travel abroad on an Iranian passport. There is nothing the Department of State can do to prevent the issuance of an Iranian passport by the Iranian Interests Section of the Embassy of Algeria.

You may wish to notify the Iranian Interests Section that you would object to your child receiving a passport without your consent. At that time, you could ask whether they have already issued a passport for the child. The address and the telephone number of the Iranian Interests Section of the Embassy of Algeria are: 2209 Wisconsin Avenue, N.W., Washington D.C. 20007; (202) 965-4999.

Unfortunately, it has been our experience that a parent encounters little or no difficulty obtaining travel documentation from the Interests Section for a dual U.S.-Iranian citizen child, despite the existence of a U.S. court order barring departure without the court's consent.

As you may already know, a custody decree issued by a court in the United States has no force or effect in a foreign country. When a child is abducted by a parent, the deprived parent must usually initiate legal proceedings in the foreign country to regain custody of the child or to enforce visitation rights. However, the difficulties in recovering a child from an Islamic country without the full support and consent of the father can be insurmountable.

It is the Department's understanding that in Iran, all matters concerning family law are governed by the religious courts. While you would be free to seek legal custody through the Iranian religious courts, you should be aware that Islamic courts rarely, if ever, grant custody of children to a parent who will not raise them as Muslims, does not plan to remain in Iran or has remarried. Islamic courts attach great importance to having children reside near their father so that he can visit frequently and oversee their upbringing. Even if the mother is granted custody, (The children would still need his permission to leave the country).

Currently, the only treaties which have any application to abductions of children from the United States are the Hague Convention on the Civil Aspects of International Child Abduction and the extradition treaties which the United States has with individual countries. Iran is not a party to the Hague Convention, and since the U.S. and Iran do not maintain diplomatic relations, there is no bilateral treaty in effect which would cover parental child abduction.

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Travel Warning

September 15, 2008

The Department of State continues to warn U.S. citizens to carefully consider the risks of travel to Iran. Dual

national Iranian-American citizens may encounter difficulty in departing Iran. This Travel Warning supersedes the Travel Warning for Iran issued January 3, 2008.

Some elements of the Iranian regime and the population remain hostile to the United States. As a result, American citizens may be subject to harassment or arrest while traveling or residing in Iran. In 2007, Iranian authorities prevented a number of Iranian-American citizen academics, journalists, and others who traveled to Iran for personal reasons from leaving for several months, and in some cases detained and imprisoned them on various charges, including espionage and posing a threat to national security. Americans of Iranian origin should consider the risk of being targeted by authorities before planning travel to Iran. Iranian authorities may deny dual nationals access to the United States Interests Section in Tehran, because they are considered to be solely Iranian citizens.

The Iranian regime continues to repress its minority religious and ethnic groups, including Bahai, Arabs, Kurds, Azeris, and others. Consequently, some areas within the country where these minorities reside, including the Baluchistan border area near Pakistan and Afghanistan, the Kurdish northwest of the country, and areas near the Iraqi border, remain unsafe. Armed attacks on the road between Bam and Kerman in May 2007 also render this area unsafe.

Large-scale demonstrations have taken place in various regions throughout Iran over the past several years as a result of a sometimes volatile political climate. U.S. citizens who travel to Iran despite this Travel Warning should exercise caution.

The U.S. government does not have diplomatic or consular relations with the Islamic Republic of Iran and therefore cannot provide protection or routine consular services to American citizens in Iran. The Swiss government, acting through its Embassy in Tehran, serves as protecting power for U.S. interests in Iran. Neither U.S. passports nor visas to the United States are issued in Tehran. The Iranian Government does not recognize dual citizenship and generally does not permit the Swiss to provide protective services for U.S. citizens who are also Iranian nationals. U.S. citizens of Iranian origin who are considered by Iran to be Iranian citizens have been detained and harassed by Iranian authorities. Former Muslims who have converted to other religions, as well as persons who encourage Muslims to convert, are subject to arrest and prosecution.

Americans who travel or reside in Iran despite this Travel Warning are strongly encouraged to register through the State Department's travel registration website, https://travelregistration.state.gov. If they are in Tehran, American citizens may also register in person at the U.S. Interests Section of the Swiss Embassy at Africa Avenue, West Farzan Street, no. 59, Tehran. The local telephone numbers are 021-8878-2964 and 021-8879-2364, fax 021-8877-3265, e-mail: tie.vertretung@eda.admin.ch.

U.S. citizens should also consult the Department of State's Country Specific Information for Iran, and the current Worldwide Caution, which are located on the Department's Internet web site at http://travel.state.gov. American citizens may also obtain updated information on travel and security conditions by calling 1-888-407-4747 toll-free in the United States and Canada or, from outside the United States and Canada, 1-202-501-4444.

IRAQ

Compiled from the February 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Iraq

PROFILE

Geography

Area: 437,072 sq. km.; about the size of California.

Cities: Capital—Baghdad (5.7 million, 2004 estimate). Other cities—Basrah, Mosul, Kirkuk, Sulaymaniyah, Irbil.

Terrain: Alluvial plains, mountains, and desert.

Climate: Mostly hot and dry.

People

Nationality: Noun and adjective—Iraqi(s).

Population: (July 2007 est.) 27,499,638.

Population growth rate: (2007 est.) 2.618%.

Ethnic groups: Arab 75%-80%, Kurd 15%-20%, Turcoman, Chaldean, Assyrian, or others less than 5%.

Religions: Muslim 97%, Christian 3%, others less than 1%.

Languages: Arabic (official), Kurdish (official), Assyrian, Armenian.

Education: Years compulsory—primary school (age 6 through grade 6). Literacy (2006 UNESCO est.)—74.1%.

Health: Infant mortality rate—47.04 deaths/1,000 live births. Life expectancy—69.3 yrs. (2007 est.)

Government

Type: Parliamentary democracy.

Constitution: October 15, 2005.

Independence: On October 3, 1932, Iraq gained independence from the League of Nations Mandate under British Administration. On June 28, 2004, the Coalition Provisional Authority (CPA) transferred sovereignty to the Iraqi Interim Government. A new four-year, constitutionally based government took office in March 2006, and a new cabinet was installed in May 2006.

Government branches: Executive—Presidency Council (one president and two vice presidents); Council of Ministers (one prime minister, two deputy prime ministers, and 34 cabinet ministers). Judicial—Supreme Court appointed by the Prime Minister and confirmed by the Council of Representatives. Legislative—Council of Representatives (CoR) consisting of 275 members.

Political subdivisions: 18 governorates (muhafazat, singular—muhafazah)—Al Anbar, Al Basrah, Al Muthanna, Al Qadisiyah, An Najaf, Arbil, As Sulaymaniyah, At Ta'mim, Babil, Baghdad, Dahuk, Dhi Qar, Diyala, Karbala', Maysan, Ninawa, Salah ad Din, Wasit. One region—the Kurdistan Regional Government.

Economy

GDP: (2007 est.) $55.44 billion (official exchange rate).

GDP per capita: (2007 est.) $3,600.

GDP real growth rate: (2007 proj.) 5.0%.

Inflation: (2007) 4.7%

Unemployment rate: (2006 estimate) 18% to 30%.

Budget: (FY 2008) Revenues—$42.3 billion (est.); expenditures—$48.4 billion (est.)

Public debt: (December 2007 est.) $56.3 billion.

Natural resources: Oil, natural gas, phosphates, sulfur.

Agriculture: Products—wheat, barley, rice, vegetables, cotton, dates, cattle, sheep.

Industry: Types—petroleum, chemicals, textiles, construction materials, food processing.

Trade: Exports (2007 est.)—$34.04 billion f.o.b. Export commodities (2007 est.)—crude oil (84%), crude materials excluding fuels (8%), food and live animals (5%). Export partners (2006)—U.S. 46.8%, Italy 10.7%, Canada 6.2%, Spain 6.1%. Imports (2007 est.)—$23.09 billion f.o.b. Import commodities—food, medicine, manufactured goods, refined petroleum products. Import partners (2006)—Syria 26.5%, Turkey 20.5%, U.S. 11.8%, Jordan 7.2%.

GEOGRAPHY

Iraq is bordered by Kuwait, Iran, Turkey, Syria, Jordan, and Saudi Arabia. The country slopes from mountains over 3,000 meters (10,000 ft.) above sea level along the border with Iran and Turkey to the remnants of sea-level marshes in the southeast. Much of the land is desert or wasteland. The mountains in the northeast are an extension of the alpine system that runs eastward from the Balkans into southern Turkey, northern Iraq, Iran, and Afghanistan, terminating in the Himalayas.

Average temperatures range from higher than 48°C (120°F) in July and August to below freezing in January. Most of the rainfall occurs from December through April and averages between 10 and 18 centimeters (4-7 in.) annually. The mountainous region of northern Iraq receives appreciably more precipitation than the central or southern desert region.

PEOPLE

Almost 75% of Iraq's population live in the flat, alluvial plain stretching southeast from Baghdad and Basrah to the Persian Gulf. The Tigris and Euphrates Rivers carry about 70 million cubic meters of silt annually to the delta. Known in ancient times as Mesopotamia, the region is the legendary locale of the Garden of Eden. The ruins of Ur, Babylon, and other ancient cities are in Iraq. Iraq's two largest ethnic groups are Arabs and Kurds. Other distinct groups are Turcoman, Chaldeans, Assyrians, Persians, and Armenians. Arabic is the most commonly spoken language. Kurdish is spoken in the north, and English is the most commonly spoken Western language. The majority (60-65%) of Iraqi Muslims are members of the Shi'a sect, but there is a large (32-37%) Sunni population as well, made up of both Arabs and Kurds. Small communities of Christians, Jews, Bahais, Mandaeans, and Yezidis also exist. Most Kurds are Sunni Muslim but differ from their Arab neighbors in language, dress, and customs.

HISTORY

Once known as Mesopotamia, Iraq was the site of flourishing ancient civilizations, including the Sumerian, Babylonian, and Parthian cultures. Muslims conquered Iraq in the seventh century A.D. In the eighth century, the Abassid caliphate established its capital at Baghdad.

At the end of World War I, Iraq became a British-mandated territory. When it was declared independent in 1932, the Hashemite family, which also ruled Jordan, ruled as a constitutional monarchy. In 1945, Iraq joined the United Nations and became a founding member of the Arab League. In 1956, the Baghdad Pact allied Iraq, Turkey, Iran, Pakistan, and the United Kingdom, and established its headquarters in Baghdad.

Gen. Abdul Karim Qasim took power in July 1958 coup, during which King Faysal II and Prime Minister Nuri as-Said were killed. Qasim ended Iraq's membership in the Baghdad Pact in 1959. Qasim was assassinated in February 1963, when the Arab Socialist Renaissance Party (Ba'ath Party) took power under the leadership of Gen. Ahmad Hasan al-Bakr as prime minister and Col. Abdul Salam Arif as president.

Nine months later, Arif led a coup ousting the Ba'ath government. In April 1966, Arif was killed in a plane crash and was succeeded by his brother, Gen. Abdul Rahman Mohammad Arif. On July 17, 1968, a group of Ba'athists and military elements overthrew the Arif regime. Ahmad Hasan al-Bakr reemerged as the President of Iraq and Chairman of the Revolutionary Command Council (RCC).

In July 1979, Bakr resigned, and Saddam Hussein assumed both offices. The Iran-Iraq war (1980-88) devastated the economy of Iraq. Iraq declared victory in 1988 but actually achieved a weary return to the status quo antebellum. The war left Iraq with the largest military establishment in the Gulf region but with huge debts and an ongoing rebellion by Kurdish elements in the northern mountains. The government suppressed the rebellion by using weapons of mass destruction on civilian targets, including a mass chemical weapons attack on the city of Halabja that killed several thousand civilians.

Iraq invaded Kuwait in August 1990, but a U.S.-led coalition acting under United Nations (UN) resolutions expelled Iraq from Kuwait in February 1991. After the war, Kurds in the north and Shi'a Muslims in the south rebelled against the government of Saddam Hussein. The government responded quickly and with crushing force, killing thousands. It also pursued damaging environmental and agricultural policy meant to drain the marshes of the south. As a result, the United States, United Kingdom, and France established protective no-fly zones in northern and southern Iraq. In addition, the UN Security Council required the regime to surrender its weapons of mass destruction (WMD) and submit to UN inspections. When the Ba'ath regime refused to fully cooperate with the UN inspections, the Security Council employed sanctions to prevent further WMD development and compel Iraqi adherence to international obligations. Coalition forces enforced no-fly zones in southern and northern Iraq to protect Iraqi citizens from attack by the regime and a no-drive zone in southern Iraq to prevent the regime from massing forces to threaten or again invade Kuwait.

A U.S.-led coalition removed the Ba'th regime in March-April 2003, bringing an end to more than 12 years of Iraqi defiance of UN Security Council resolutions. The coalition formed the Coalition Provisional Authority (CPA) to provide for the administration of Iraq during the period of transitional administration, to restore conditions of security and stability, and to create conditions in which the Iraqi people could freely determine their own political future. The UN Security Council acknowledged the authorities of the coalition and provided for a role for the UN and other parties to assist in fulfilling these objectives.

The CPA disbanded on June 28, 2004, transferring sovereign authority for governing Iraq to the Iraqi Interim Government (IIG). Based on the timetable laid out in the Transitional Administrative Law (TAL), the IIG governed Iraq until elections were held on January 30, 2005; thereafter the Iraqi Transitional Government assumed authority.

In May 2005, the Iraqi Transitional Government appointed a multi-ethnic committee to draft a new Iraqi Constitution. The new constitution was finalized in September 2005, and was ratified in a nationwide referendum on October 15, 2005. On December 15, 2005, Iraqis again went to the polls to participate in the first legislative elections as laid out by the new constitution. The new four-year, constitutionally based government took office in March 2006, and the new cabinet was approved and installed in May 2006.

GOVERNMENT

Iraq is a constitutional democracy with a federal system of government.

The 2005 Iraqi Constitution guarantees all Iraqis basic rights in many areas. The executive branch is made up of the Presidency Council (one president, two deputy presidents) and a Council of Ministers (one prime minister, two deputy prime ministers, and 34 cabinet ministers). The President is the Head of State, protecting the Constitution and representing the sovereignty and unity of the state, while the Prime Minister is the direct executive authority and commander in chief. Beginning in 2006, the military and police began transitioning from being under the operational control of the Multi-National Forces-Iraq command to Iraqi command and control. The President and Vice Presidents are elected by the Council of Representatives (CoR). The Prime Minister is nominated by the largest bloc in the Council of Representatives. Upon designation, the Prime Minister names the members of his cabinet, the Council of Ministers, which is then approved by the Council of Representatives. The Council of Representatives may withdraw confidence from the Prime Minister, in which case the Prime Minister and Cabinet are considered resigned. Under normal circumstances, the executive branch serves a four-year term concurrent with that of the Council of Representatives.

Iraq's legislative branch consists of an elected Council of Representatives and an as-yet unformed Federation Council. The Council of Representatives consists of 275 members, each of whom is elected to four-year terms of service. At least one-quarter of the members of the Council of Representatives must be female. The responsibilities of the Council of Representatives include enacting federal laws, monitoring the executive branch, and electing the President of the Republic. The Federal Council will be established, by law, as a representative for governorates and territories that are not organized in a region.

Iraq's judicial branch is independent, and is under no authority but that of the law. The federal judicial authority is comprised of the Higher Judicial Council, Federal Supreme Court, Court of Cassation, Public Prosecution Department, Judiciary Oversight Commission, and other federal courts. The Higher Judicial Council supervises the affairs of the federal judiciary. The Federal Supreme Court is the highest court in the country, and the final authority on legal decisions. The establishment of the federal courts, their types, and methods for judicial appointments will be set forth by laws enacted by the Council of Representatives.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Jalal TALABANI**
Vice Pres.: **Adil ABD AL-MAHDI**
Vice Pres.: **Tariq al-HASHIMI**
Prime Min.: **Nuri al-MALIKI**
Dep. Prime Min.: **Rafi al-ISSAWI**
Dep. Prime Min.: **Barham SALIH**
Min. of Agriculture: **Ali Husayn al-BAHADILI**
Min. of Communications: **Faruq ABD AL-QADIR Abd al-Rahman**
Min. of Culture: **Mahar Dilli al-HADITHI**
Min. of Defense: **Abd al-Qadir al-MUFRIJI**
Min. of Displacement & Migration: **Abd al-Samad SULTAN**
Min. of Education: **Khudayr al-KHUZAI**
Min. of Electricity: **Karim Wahid al-HASAN**
Min. of Environment: **Nermin OTHMAN**
Min. of Finance: **Bayan JABR**
Min. of Foreign Affairs: **Hoshyar Mahmud ZEBARI**
Min. of Health: **Salih Mahdi Mutlab al-HASNAWI**
Min. of Higher Education: **Abid Dhiyab al-UJAYLI**
Min. of Housing & Construction: **Bayan DIZAYEE**
Min. of Human Rights: **Wijdan Mikhail SALIM**
Min. of Industry & Minerals: **Fawzi al-HARIRI**
Min. of Interior: **Jawad al-BULANI**
Min. of Justice: **Hashim al-SHIBLI**
Min. of Labor & Social Affairs: **Mahmud Muhammad Jawad al-RADI**
Min. of Municipalities & Public Works: **Riyadh GHARIB**
Min. of Oil: **Husayn al-SHAHRISTANI**
Min. of Planning: **Ali BABAN**
Min. of Science & Technology: **Raid Fahmi JAHID**
Min. of Trade: **Abd al-Falah al-SUDANI**
Min. of Transportation: **Amir Abd al-Jabar ISMAIL**
Min. of Water Resources: **Latif RASHID**
Min. of Youth & Sports: **Jasim Muhammad JAFAR**
Min. of State for Civil Society Affairs: **Thamir Jafar al-ZUBAYDI**
Min. of State for Foreign Affairs: **Muhammad Munajid al-DULAYMI**
Min. of State for National Assembly: **Safa al-Din al-SAFI**
Min. of State for National Dialogue: **Akram al-HAKIM**
Min. of State for National Security: **Shirwan al-WAILI**
Min. of State for Provinces: **Khulud Sami al-MAJUN**
Min. of State for Tourism & Antiquities: **Qahtan Abbas al-JABBURI**
Min. of State for Women's Affairs: **Nawal Majid al-SAMARRAI**
Min. of State Without Portfolio: **Ali Muhammad AHMAD**
Min. of State Without Portfolio: **Hasan Radhi Kazim al-SARI**
Min. of State Without Portfolio: **Muhammad Abbas al-URAYBI**
Governor, Central Bank of Iraq: **Sinan al-SHABIBI**
Ambassador to the US: **Samir Shakir al-SUMAYDI**
Permanent Representative to the UN, New York: **Hamid al-BAYATI**

Political Parties and Leaders

Assyrian Democratic Movement [Yonadam Kanna]; Da'wa al-Islamiya Party [Ibrahim al-Ja'afari]; Badr Organization [Hadi al-Amiri]; Constitutional Monarchy Movement [Sharif Ali Bin al-Hussein]; General Conference of Iraqi People [Adnan al-Dulaymi]; Hewar National Iraqi Front [Saleh al-Mutlaq]; Independent Iraqi Alliance [Falah al-Naqib]; Iraqi Communist Party [Hamid Majeed Musa]; Iraqi Hizballah [Karim Mahud al-Muhammadawi]; Iraqi Independent Democrats [Adnan Pachachi]; Iraqi Islamic Party [Tariq al-Hashimi]; Iraqi National Accord (INA) [Ayad Allawi]; Iraqi National Congress (INC) [Ahmad Chalabi]; Iraqi National Council for Dialogue [Khalaf Ulayan al-Khalifawi al-Dulaymi]; Iraqi National Unity Movement [Ahmad al-Kubaysi]; Iraqi Turkmen Front ; Islamic Action Organization [Ayatollah Muhammad al-Mudarrisi]; Jama'at al-Fadilah [Ayatollah Muhammad 'Ali al-Yacoubi]; Kurdistan Democratic Party (KDP) [Massoud Barzani]; Kur-

distan Islamic Union [Salaheddine Muhammad Bahaaeddin]; Mithal al-Alusi List [Mithal al-Alusi]; Muslim Ulama Council [Harith Sulayman al-Dari]; National Democratic Movement; National Reconciliation and Liberation Party [Mishan al-Jabburi]; Patriotic Union of Kurdistan (PUK) [Jalal Talabani]; Al-Risalyun [Muqtada al-Sadr]; Al-Sadr Movement [Muqtada al-Sadr] (not an organized political party, but it fields independent candidates affiliated with Muqtada al-Sadr); Islamic Supreme Council of Iraq (ISCI, formerly the Supreme Council of the Islamic Revolution in Iraq, SCIRI) [Abdul Aziz al-Hakim]; Yezidi Movement for Reform and Progress.

Note: The Democratic Patriotic Alliance of Kurdistan, the Iraqi National List, Tawafuq Coalition, Iraqi Front for National Dialogue, and the United Iraqi Alliance were electoral blocs consisting of the representatives from the various Iraqi political parties. Alliances and Electoral blocs are subject to change.

POLITICAL CONDITIONS

Since March 2006, the Government of Iraq has been a broad coalition led by a Shi'ite legislative bloc known as the United Iraqi Coalition (UIC) or the United Iraqi Alliance (UIA). The UIC currently holds 128 of 275 seats in the Council of Representatives. The UIC is currently composed of ISCI, the al-Sadr movement, al-Da'wa al-Islamiyya, Da'wa Tanzim al-Iraq, Jama'at al-Fadilah, and various independents. Politicians with Sunni religious affiliations, including the Tawaffuq and Hewar groups, presently hold 59 seats in the Council of Representatives. The Kurdish bloc known as the Democratic Patriotic Alliance of Kurdistan (which includes the KDP & PUK) holds 53 legislative seats. Ayad Allawi's Iraqiyya or Iraqi National List (INL) holds 25 seats. The remaining seats are composed of various independents.

The Council of Representatives is currently working toward reviewing certain controversial articles of the Constitution. The process is likely to be a long one, as consideration needs to be given to the interests of each of the major political groups.

ECONOMY

Historically, Iraq's economy was characterized by a heavy dependence on oil exports and an emphasis on development through central planning. Prior to the outbreak of the war with Iran in September 1980, Iraq's economic prospects were bright. Oil production had reached a level of 3.5 million barrels per day, and oil revenues were $21 billion in 1979 and $27 billion in 1980. At the outbreak of the war, Iraq had amassed an estimated $35 billion in foreign exchange reserves.

The Iran-Iraq war depleted Iraq's foreign exchange reserves, devastated its economy, and left the country saddled with a foreign debt of more than $40 billion. After hostilities ceased, oil exports gradually increased with the construction of new pipelines and the restoration of damaged facilities. Iraq's invasion of Kuwait in August 1990, subsequent international sanctions, damage from military action by an international coalition beginning in January 1991, and neglect of infrastructure drastically reduced economic activity. Government policies of diverting income to key supporters of the regime while sustaining a large military and internal security force further impaired finances, leaving the average Iraqi citizen facing desperate hardships. Implementation of a UN Oil-For-Food (OFF) program in December 1996 improved conditions for the average Iraqi citizen. In December 1999, Iraq was authorized to export unlimited quantities of oil through OFF to finance essential civilian needs including, among other things, food, medicine, and infrastructure repair parts.

The drop in GDP in 2001-02 was largely the result of the global economic slowdown and lower oil prices. Per capita food imports increased significantly, while medical supplies and health care services steadily improved. The occupation of the U.S.-led coalition in March-April 2003 resulted in the shutdown of much of the central economic administrative structure. The rebuilding of oil infrastructure, utilities infrastructure, and other production capacities has proceeded steadily since 2004 despite attacks on key economic facilities and continuing internal security incidents. Despite uncertainty, Iraq is making progress toward establishing the laws and institutions needed to make and implement economic policy.

Iraq's economy is dominated by the oil sector, which has traditionally provided about 95% of foreign exchange earnings. Current estimates show that oil production averages 2.1 million bbl/day.

The Iraqi Government is seeking to pass and implement laws to strengthen the economy, including a hydrocarbon law to encourage development of this sector, a revenue sharing law to equitably divide oil revenues within the nation in line with the Iraqi constitution, and writing regulations to implement a new foreign investment law. Controlling inflation, reducing corruption, and implementing structural reforms such as bank restructuring and private sector development will be key to Iraq's economic growth.

Foreign assistance has been an integral component of Iraq's reconstruction efforts over the past three years. At a Donors Conference in Madrid in October 2003, more than $33 billion was pledged to assist in the reconstruction of Iraq. Out of that conference, the United Nations (UN) and the World Bank launched the International Reconstruction Fund Facility for Iraq (IRFFI) to administer and disburse about $1.7 billion of those funds. The rest of the assistance is being disbursed bilaterally. To date $15.3 billion has been pledged in foreign aid for 2004-2008 from outside of the U.S.

In December 2007, the International Monetary Fund (IMF) agreed to

renew a Stand-By Arrangement (SBA) for Iraq, which provides a credit line to the Iraqi government of up to $744 million if needed. The SBA also requires Iraq to undertake some economic policy reforms. If Iraq fulfills the terms of the SBA, the country will receive the final stage of Paris Club debt reduction. At that point, a total of 80 percent of Iraq's international debt will have been forgiven. The new SBA lasts for 15 months, through March 2009; the previous SBA began December 2005 and ended December 2007.

In July 2006, the Government of Iraq and the UN began work to formulate the International Compact with Iraq (ICI), a five-year framework for Iraq to achieve economic self-sufficiency within its region and the world. On May 3, 2007 in Sharm el-Sheikh the ICI was formally launched by more than 70 countries and international organizations, many represented at the ministerial level.

The Compact aims to create a mutually reinforcing dynamic of national consensus and international support. Domestically the aim is to build a national Compact around the government's political and economic program and to restore the Iraqi people's trust in the state and its ability to protect them and meet their basic needs. Internationally, the Compact establishes a framework of mutual commitments to provide financial and technical assistance and debt relief needed to support Iraq and strengthen its resolve to address critical reforms and policies.

Agriculture

Despite its abundant land and water resources, Iraq is a net food importer. Under the UN Oil-For-Food program, Iraq imported large quantities of grains, meat, poultry, and dairy products. Obstacles to agricultural development during the previous regime included labor shortages, inadequate management and maintenance, salinization, urban migration, and dislocations resulting from previous land reform and collectivization programs. A Ba'ath regime policy to destroy the "Marsh Arab" culture by draining the southern marshes and introducing irrigated farming to this region destroyed a natural food-producing area, while concentration of salts and minerals in the soil due to the draining left the land unsuitable for agriculture. Through assistance from USAID and USDA, targeted efforts have begun to overcome the damage done by the Ba'ath regime in ways that will rehabilitate the agricultural sector and confront environmental degradation. These efforts include infrastructure development, private sector development, veterinary clinic restoration, increased wheat production, and training and technical assistance in developing policies on sustainable water resources management and building Iraqi natural resources management.

Trade

The United Nations imposed economic sanctions on Iraq after it invaded Kuwait in 1990. Under the Oil-For-Food program Iraq was allowed to export oil and use the proceeds to purchase goods to address essential civilian needs, including food, medicine, and infrastructure spare parts. With the lifting of UN sanctions after the Ba'ath regime was removed in 2003, Iraq is gradually resuming trade relations with the international community, including with the U.S. The U.S. designated Iraq as a beneficiary developing country under the Generalized System of Preferences (GSP) program in September 2004. Iraq was granted observer status at the World Trade Organization (WTO) in February 2004, and began its WTO accession process in December 2004. On May 25, 2007, Iraq participated in its first Working Party meeting in Geneva. The meeting, in which Trade Minister al-Sudani participated, was characterized as a successful start to the WTO accession process, one that is crucial to Iraq's integration into the international economy. Dependent upon Iraqi progress on relevant issues, the next Working Party meeting could take place as early as spring 2008.

DEFENSE

The Iran-Iraq War ended with Iraq sustaining the largest military structure in the Middle East, with more than 70 divisions in its army and an air force of over 700 modern aircraft. Losses during the 1990 invasion of Kuwait and subsequent expulsion of Iraqi forces from Kuwait in 1991 by a UN coalition resulted in the reduction of Iraq's ground forces to 23 divisions and air force to less than 300 aircraft.

When major combat operations ended in April 2003, the Iraqi Army disintegrated, and its installations were destroyed by pilfering and looting. The Coalition Provisional Authority (CPA) officially dissolved the Iraqi military and Ministry of Defense on May 23, 2003. On August 7, 2003, the CPA established the New Iraqi Army as the first step toward the creation of the national self-defense force of post-Saddam Hussein Iraq. Support for the manning, training, and equipping of Iraq's security forces is led by the Multi-National Security Transition Command-Iraq (MNSTC-I). In addition to defense forces, the Ministry of Interior, with the help of the MNSTC-I, is training and equipping civilian police forces to establish security and stability, primarily through combating the nation-wide insurgency. Initially under the command and control of the Multi-National Forces-Iraq (MNF-I) command, in 2006 police and Iraqi Army units began to transition to Iraqi control. By November 2007, all of the original ten Iraq Army divisions had completed the transfer to Iraq Ground Forces Command. The process of transferring provinces to Provincial Iraqi Control (PIC) began in July 2007, when Muthanna became the first province where Iraq Security Forces took the leading role of security in a province. In December 2007, Basrah became the ninth of Iraq's eighteen provinces to transfer to PIC.

FOREIGN RELATIONS

With the fall of Saddam Hussein and the Ba'ath regime, Iraq has taken

steps toward re-engagement on the international stage. Iraq currently has diplomatic representation in 54 countries around the world, including 3 permanent Missions to the United Nations in New York, the United Nations Commission on Human Rights in Geneva and the Arab League in Cairo. 43 countries have diplomatic representation in Iraq,

U.S.-IRAQI RELATIONS

The focus of United States policy in Iraq remains on helping the Iraqi people build a constitutional, representative government that respects the rights of all Iraqis and has security forces capable of maintaining order and preventing the country from becoming a safe haven for terrorists and foreign fighters. The ultimate goal is an Iraq that is peaceful, united, stable, democratic, and secure, with institutions capable of providing just governance and security for all Iraqis and is an ally in the war against terrorism. U.S. forces remain in Iraq as part of the Multi-National Force-Iraq to assist the Government of Iraq in training its security forces, as well as to work in partnership with the Government of Iraq to combat forces that seek to derail Iraq's progression toward full democracy. The U.S. Government is carrying out a multibillion-dollar program to assist in the reconstruction of Iraq.

The Republic of Iraq belongs to the following international organizations: United Nations (UN); Arab League (AL); World Bank (WB); International Monetary Fund (IMF); International Atomic Energy Agency (IAEA); Nonaligned Movement (NAM); Organization of the Islamic Conference (OIC); Organization of Petroleum Exporting Countries (OPEC); Interpol; World Health Organization (WHO); G-19; G-77; Arab Bank for Economic Development in Africa (ABEDA); Arab Fund for Economic and Social Development (AFESD); Arab Monetary Fund (AMF); Council of Arab Economic Unity (CAEU); Food and Agriculture Organization (FAO); International Bank for Reconstruction and Development (IBRD); International Civil Aviation Organization (ICAO); International Community for Radionuclide Metrology (ICRM); International Development Association (IDA); International Development Bank (IDB); International Fund for Agricultural Development (IFAD); International Finance Corporation (IFC); International Federation of Red Cross and Red Crescent Societies (IFRCS); International Labor Organization (ILO); International Maritime Organization (IMO); International Mobile Satellite Organization (IMSO) Intergovernmental Oceanographic Commission (IOC); International Organization for Standardization (ISO); International Telecommunications Satellite Organization (ITSO); International Telecommunication Union (ITU); Organization of Arab Petroleum Exporting Countries (OAPEC); Permanent Court of Arbitration (PCA); United Nations Conference on Trade and Development (UNCTAD); United Nations Education, Scientific, and Cultural Organization (UNESCO); United Nations Economic and Social Commission for Western Asia (UNESCWA); United Nations Industrial Development Organization (UNIDO); World Tourism Organization (UNWTO)Universal Postal Union (UPU); World Customs Organization (WCO); World Federation of Trade Unions (WFTU); World Intellectual Property Organization (WIPO); World Meteorological Organization (WMO); World Trade Organization (WTO) observer.

TRAVEL

Consular Information Sheet

October 2, 2008

Country Description: In 2005, Iraqi citizens adopted a new constitution and participated in legislative elections to create a permanent, democratic government, and in May 2006, a new Government of Iraq (GOI), led by Prime Minister Nouri al-Maliki, was sworn in. Although the GOI has made political, economic and security progress, Iraq still faces many challenges, including overcoming three decades of war and government mismanagement that stunted Iraq's economy, sectarian and ethnic tensions that have slowed progress toward national reconciliation, and ongoing (even if abating) insurgent, sectarian, criminal, and terrorist violence. Conditions in Iraq are extremely dangerous. While Iraqi Security Forces now take the lead in providing security in most provinces, Multinational Force-Iraq (MNF-I) continues to assist the Iraqi government in providing security in many areas of the country. The workweek in Iraq is Sunday through Thursday.

Entry Requirements: Passports valid for at least six months and visas are required for most private American citizens. An Iraqi visa may be obtained through the Iraqi Embassy in Washington, D.C. Travelers should not rely on obtaining a visa upon arrival at an airport or port of entry in Iraq. Visitors to Iraq who plan to stay for more than 10 days must obtain a no-fee residency stamp. In Baghdad, the stamps are available for all visitors at the main Residency Office near the National Theater. Contractors in the International Zone may also obtain exit stamps at the Karadah Mariam Police Station (available Sunday and Wednesday, 10:00-14:00.). There is a 10,000 Iraqi dinar (USD 8) penalty for visitors who do not obtain the required residency stamp. In order to obtain a residency stamp, applicants must produce valid credentials or proof of employment, two passport-sized photos, and HIV test results. An American citizen who plans to stay longer than two months must apply at the Residency Office for an extension. Americans traveling to Iraq for the purpose of employment should check with their employers and with the Iraqi Embassy in Washington, D.C. for any special entry or exit requirements related to employment. American citizens whose passports reflect travel to Israel may be refused entry into Iraq or may be refused an Iraqi visa, although to date there are no reported cases of this occurring.

U.S. citizens who remain longer than 10 days must obtain an exit stamp at the main Residency Office before departing the country. In Baghdad, they are available for all visitors at the main Residency Office near the National Theater. Contractors in the International Zone may also obtain exit stamps at the Karadah Mariam Police Station (available Sunday and Wednesday, 10:00-14:00). Exit stamp fees vary from USD 20 to USD 200, depending on the length of stay, entry visa and other factors. Those staying fewer than 10 days do not need to get an exit stamp before passing through Iraqi immigration at the airport. Visitors who arrive via military aircraft but depart on commercial airlines must pay a USD 80 departure fee at the airport.

Note: For information on entry requirements for other countries, please go to the Entry/Exit Requirements section in the Country Specific Information Sheet for the country you are interested in at http://travel.state.gov/travel/cis_pa_tw/cis/cis_1765.html. You may also contact the U.S. embassy or consulate of that country for further information.

Visit the Iraqi Embassy web site at http://www.iraqiembassy.us for the most current visa information. The Embassy is located at 1801 P Street NW, Washington, DC 20036; phone number is 202-742-1600; the fax is 202-333-1129.

Exit Requirements: U.S. Citizens who remains longer than 10 days must obtain an exit stamp at the main Residency Office before departing the country. In Baghdad, they are available for all visitors at the main Residency Office near the National Theater. Contractors in the International Zone may also obtain exit stamps at the Karadah Mariam Police Station (available Sunday and Wednesday, 10:00-14:00). Exit stamp fees vary from USD 20 to USD 200, depending on the length of stay, entry visa and other factors. Those staying fewer that 10 days do not need to get an exit stamp before passing through Iraqi Immigration at the airport. Visitors who arrive via military aircraft but depart on commercial airlines must pay a USD 80 departure fee at the airport

Visit the Iraqi Embassy web site at http://www.iraqiembassy.org for the most current visa information. The Embassy is located at 1801 P Street NW, Washington, DC 20036; phone number is 202-483-7500; fax is 202-462-5066.

Safety and Security: The risk of terrorism directed against U.S. citizens in Iraq remains extremely high. The Department of State continues to strongly warn U.S. citizens against travel to Iraq, which remains very dangerous.

Remnants of the former Baath regime, transnational terrorists, criminal elements and numerous insurgent groups remain active throughout Iraq. Multinational Force-Iraq (MNF-I) and Iraqi Security Forces (ISF)-led military operations continue, and attacks persist against MNF-I and the ISF throughout the country. Turkish government forces have carried out operations against elements of the Kongra-Gel (KGK, formerly Kurdistan Worker's Party, or Partiya Karkeren Kurdistan (PKK)) terrorist group that are located along Iraq's northern border. Despite recent improvements in the security environment, Iraq remains dangerous, volatile and unpredictable. Attacks against military and civilian targets throughout Iraq continue, including in the International (or "Green") Zone. Targets include hotels, restaurants, police stations, checkpoints, foreign diplomatic mis-

sions, and international organizations and other locations with expatriate personnel. Such attacks can occur at any time. Kidnappings still occur; the most recent kidnapping of an American citizen occurred in July 2008. Improvised Explosive Devices (IEDs), Explosively Formed Penetrators (EFPs), and mines often are placed on roads, concealed in plastic bags, boxes, soda cans, dead animals, and in other ways to blend with the road. Grenades and explosives have been thrown into vehicles from overpasses and placed on vehicles at intersections, particularly in crowded areas. Rockets and mortars have been fired at hotels, and vehicle-borne IEDs have been used against targets throughout the country. Occasionally, U.S. Government personnel are prohibited from traveling to certain areas depending on prevailing security conditions. In addition to terrorist and criminal attacks, sectarian violence occurs often. Detailed security information is available on the Embassy's web site at http://iraq.usembassy.gov and at http://www.centcom.mil.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found. Travelers are also referred to the U.S. Embassy Baghdad's Warden Notices which are available on the Embassy web site at http://iraq.usembassy.gov.

Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The U.S. Embassy and MNF-I are working with Iraqi authorities to establish law enforcement and civil structures throughout the country. U.S. and British military personnel are providing police protection as well, as the security situation permits. Petty theft is common in Iraq, including thefts of money, jewelry, or valuable items left in hotel rooms and pick-pocketing in busy places such as markets. Carjacking by armed thieves is very common, even during daylight hours, and particularly on the highways from Jordan and Kuwait to Baghdad. Foreigners, primarily dual American-Iraqi citizens, and Iraqi citizens are targets of kidnapping. The kidnappers often demand money but have also carried out kidnappings for political/religious reasons.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. While U.S. Consular Services in Iraq are limited due to security conditions, the Embassy/Consulate staff can, for example, assist you to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

There is no 911-equivalent emergency telephone number in Iraq.

Medical Facilities and Health Information: Basic modern medical care and medicines are not widely available in Iraq. The recent conflict in Iraq has left some medical facilities non-operational and medical stocks and supplies severely depleted. The facilities in operation do not meet U.S. standards, and the majority lack medicines, equipment and supplies. Because the Baghdad International Airport has limited operations for security reasons, it is unlikely that a private medical evacuation can be arranged.

Iraq does not allow visitors with HIV/AIDS to enter the country. At this time there is no waiver available for this ineligibility. However, please inquire directly with the Embassy of Iraq at http://www.iraqiembassy.org before you travel for any changes.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Avian Influenza: The WHO and Iraqi authorities have confirmed human cases of the H5NI strain of avian influenza, commonly known as the "bird flu." Travelers to Iraq and other countries affected by the virus are cautioned to avoid poultry farms, contact with animals in live food markets, and any surfaces that appear to be contaminated with feces from poultry or other animals. In addition, the CDC and WHO recommend eating only fully cooked poultry and eggs.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation as well as whether medical evacuation would be possible from Iraq.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Iraq is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

All vehicular travel in Iraq is extremely dangerous. There have been numerous attacks on civilian vehicles, as well as military convoys. Attacks occur throughout the day, but travel at night is exceptionally dangerous and should be avoided. There have been attacks on civilian vehicles

as well as military convoys on Highways 1, 5, 10 and 15, even during daylight hours. Travelers are strongly urged to travel in convoys with at least four vehicles in daylight hours only. Travel in or through Ramadi and Fallujah, in and between al-Hillah, al-Basrah, Kirkuk, and Baghdad and between the International Zone and Baghdad International Airport, and from Baghdad to Mosul is particularly dangerous. Occasionally, U.S. Government personnel are prohibited from traveling to select areas depending on prevailing security conditions. There continues to be heavy use of Improvised Explosive Devices (IEDs) and/or mines on roads, particularly in plastic bags, soda cans, and dead animals. Grenades and explosives have been thrown into vehicles from overpasses, particularly in crowded areas. Travel should be undertaken only when absolutely necessary and with the appropriate security.

Buses run irregularly and frequently change routes. Poorly maintained city transit vehicles are often involved in accidents. Long distance buses are available, but are often in poor condition and drive at unsafe speeds. Jaywalking is common. Drivers usually do not yield to pedestrians at crosswalks and ignore traffic lights (if available), traffic rules and regulations. Roads are congested. Driving at night is extremely dangerous. Some cars do not use lights at night and urban street lights may not be functioning. Some motorists drive at excessive speeds, tailgate and force other drivers to yield the right of way.

Aviation Safety Oversight: As there is no direct commercial air service to the United States by air carriers registered in Iraq, the U.S. Federal Aviation Administration (FAA) has not assessed Iraq's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA web site at http://www.faa.gov.

There is credible information that terrorists are targeting civil aviation. Military aircraft arriving and departing from Baghdad International Airport (ORBI) have been subjected to small arms and missile fire. Travelers choosing to utilize civilian aircraft to enter or depart Iraq should be aware that, although there have been no recent attacks on civilian aircraft, the potential threat still exists. Official U.S. Government (USG) personnel are strongly encouraged to use U.S. military or other USG aircraft when entering or departing Iraq. All personnel serving in Iraq under Chief of Mission (COM) authority are prohibited from entering or departing ORBI on commercial airlines unless they receive COM approval, which is granted on a case-by-case basis for emergency purposes only. Other personnel not under COM authority must be guided by their own agencies. Personnel under COM authority assigned to the Erbil and Sulaymaniyah areas are permitted to use commercial flights in and out of Erbil on a case-by-case basis.

Special Circumstances: As of September 21, 2006, Iraqi law prohibits adult Iraqis and foreigners from holding and transporting more than U.S. $10,000 in cash out of Iraq. In addition, it permits adult Iraqi and resident foreigners to hold and transport no more than 200,000 Iraqi dinars to cover travel expenses. Iraqi law also prohibits taking more than 100 grams of gold out of the country. Iraqi customs personnel are taking action to enforce these laws and may pose related questions to travelers during immigration and customs exit procedures. (Civil customs personnel also will verify passport annotations related to any items such as foreign currency, gold jewelry, or merchandise that were declared by passengers upon entry into Iraq on Form-8.)

All U.S. citizens are reminded that it is their duty to respect Iraqi laws, including legal restrictions on the transfer of currency outside of Iraq. If you are detained at the airport or at any other point of exit regarding your attempt to transfer currency out of Iraq, you should contact—or ask that Iraqi authorities immediately contact—the American Embassy.

Transporting large amounts of currency is not advisable. Almost all of the international companies working in Iraq have the capability to make payments to their employees and at least four Iraqi banks are also able to convert cash into an international wire transfer directed to a bank account outside Iraq. Branches of the Credit Bank of Iraq on Al-Sa'adoon St., Baghdad (creditbkiq@yahoo.com), Dar Es Salaam Bank (info@desiraq.com), Iraqi Middle East Investment Bank (coinvst@iraqimdlestbank.com) and Al-Warqaa Investment Bank (warkabank@hotmail.com) all have this capability. Please be aware that large wire transfers may require Central Bank of Iraq approval because of measures in place to combat money laundering. Such approvals can be obtained by the sending bank, if information on the origin of the funds and the reason for its transfer are provided. Additional information on banking in Iraq is available at the Central Bank of Iraq web site http://www.cbiraq.org.

Customs and MNF-I officers have the broad authority to search persons or vehicles at Iraq ports of entry. Officers may confiscate any goods that may pose a threat to the peace, security, health, environment, or good order of Iraq or any antiquities or cultural items suspected of being illegally exported. Goods that are not declared may be confiscated by an officer. Persons may also be ordered to return such goods, at their expense, to the jurisdiction from which they came.

The banking and financial infrastructure has been disrupted and is in the process of rebuilding. Hotels usually require payment in foreign currency. Automatic Teller Machines (ATMs) are extremely limited but the Trade Bank of Iraq (TBI) provides ATM services in dinars and U.S. dollars at the TBI head office in central Baghdad and two other locations.

Telecommunications are very poor. There is very limited international phone service in Iraq at this time. Local calls are often limited to a neighborhood network. There are no public telephones in the cities; however, calls may be made from hotels, restaurants or shops. Limited cellu-

lar telephone service and Internet service are available in Iraq. Due to security conditions, the Consular Section of the U.S. Embassy is able to provide only limited emergency services to U.S. citizens. Because police and civil structures are in the process of being rebuilt, emergency service and support will be limited.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Iraqi laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Iraq are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: The U.S. and international media have occasionally reported on the difficult situation faced by Iraq's children, and it is completely understandable that some American citizens want to respond to such stories by offering to open their homes and adopt these children in need. However Iraqi law does not permit full adoptions as they are generally understood in the United States. It is not possible to adopt Iraqi children at this time. Iraq is not party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between Iraq and the United States dealing with international parental child abduction.

The security situation in Iraq limits consular access to children. For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://adoption.state.gov.

Registration and Embassy Locations: The Travel Warning on Iraq urges U.S. citizens to defer travel to Iraq. However, Americans living or traveling in Iraq despite that Warning are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Iraq. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. U.S. citizens may also contact the consular section of the U.S. Embassy in Baghdad, Iraq located in the International Zone via e-mail at baghdadacs@state.gov, via landline at 1-240-553-0581, extension 2413 (this number rings in Baghdad) or the U.S. Embassy's web site at http://iraq.usembassy.gov. The after-hours number in case of extreme emergency is 011-964-770-443-2594 (from the US) or 964-0770-443-2594 (within Iraq.)

Intercountry Adoption

August 2007

The Department of State has received many inquiries from American citizens concerned about the plight of the children of Iraq and wondering about the possibility of adopting them. At this time, it is not possible to adopt Iraqi children, for several reasons.

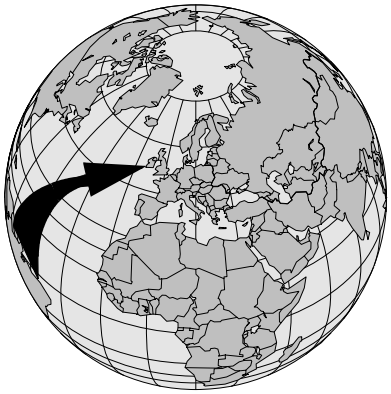
In general, intercountry adoptions are private civil legal matters governed by the laws of the children's home country, which has the primary responsibility and jurisdiction for deciding what would be in the children's best interests. The U.S. Embassy in Baghdad has confirmed that Iraqi law does not currently permit full adoptions as they are generally understood in the United States.

Iraq does grant a more limited arrangement akin to guardianship; however, the U.S. Government is unaware of any non-Iraqis' being granted guardianship of Iraqi children. In addition, even if an Iraqi court were to grant a U.S. citizen guardianship rights for an Iraqi child, the child would likely be unable to immigrate to the United States, unless the citizen could establish both that the child qualifies as an "orphan" as defined in section 101(b)(1)(F) of the Immigration and Nationality Act and, under Iraqi law, the "guardianship" order gave the citizen authority not only to care for the child but to bring the United States for the specific purpose of the child's adoption in the United States. Since Iraqi law does not permit adoption, it is not clear that an Iraqi guardianship order could give this authority. The U.S. and international media have occasionally reported on the difficult situation faced by many Iraqi children, and it is completely understandable that some American citizens want to respond to such stories by offering to open their homes and adopt these children in need. However, it is a generally agreed international principle that uprooting children during a war, natural disaster or other crisis may in fact exacerbate the children's situation. It can be extremely difficult in such circumstances to determine whether children who appear to be orphans truly are. It is not uncommon in a hostile situation for parents to send their children out of the area, or for families to become separated during an evacuation. Even when it can be demonstrated that children are indeed orphaned or abandoned, they are often taken in by other relatives. Staying with relatives in extended family units is generally a better solution than uprooting a child completely. There are still ways in which U.S. citizens can help the children of Iraq. Many nongovernmental organizations (NGOs) say that what is needed most at this time are financial contributions. Individuals who wish to assist can do the most good by making a financial contribution to an established NGO that will be well placed to respond to Iraq's most urgent needs. The American Red Cross is working through the International Committee of the Red Cross (ICRC) to provide humanitarian assistance in Iraq. The Red Cross and ICRC do assessments to determine

needs and use monetary donations where the need is the greatest. To contact them, call 1-800-HELP-NOW. There is no mechanism to direct money to a specific child or person. The website http://www.redcross.org has more information on directed contributions. The United States Agency for International Development (USAID) Web site, http://www.usaid.gov/iraq, provides information on how individuals can assist. "Interaction" is a Washington-based coalition of NGOs. Those interested in children's issues/orphans may go on the website http://www.interaction.org and look at the "Guide to Appropriate Giving" and to "Emergency Relief in Iraq" both on the home page. Interested donors can read synopses on various organizations and in some cases make contributions. Interaction can also be reached at 202-667-8227. The Department of State continues to strongly warn U.S. citizens against travel to Iraq, which remains very dangerous.

Travel Warning

June 13, 2008



This Travel Warning updates the current security situation and reiterates the dangers of the use of civilian aircraft and of road travel within Iraq. This supersedes the Travel Warning of July 23, 2007.

The Department of State continues to strongly warn U.S. citizens against travel to Iraq, which remains very dangerous. Remnants of the former Baath regime, transnational terrorists, criminal elements and numerous insurgent groups remain active throughout Iraq. Multinational Force-Iraq (MNF-I) and Iraqi Security Forces (ISF)-led military operations continue, and attacks persist against MNF-I and the ISF throughout the country. Turkish government forces have carried out operations against elements of the Kongra-Gel (KGK, formerly Kurdistan Worker's Party, or Partiya Karkeren Kurdistan (PKK)) terrorist group that are located along Iraq's northern border.

Despite recent improvements in the security environment, Iraq remains dangerous, volatile and unpredictable. Attacks against military and civilian targets throughout Iraq continue, including in the International (or "Green") Zone. Targets include hotels, restaurants, police stations, checkpoints, foreign diplomatic missions, and international organizations and other locations with expatriate personnel. Such attacks can occur at any time. Kidnappings still occur; the most recent kidnapping of an American citizen occurred in August 2007. Improvised Explosive Devices (IEDs), Explosively Formed Penetrators (EFPs), and mines often are placed on roads, concealed in plastic bags, boxes, soda cans, dead animals, and in other ways to blend with the road.

Grenades and explosives have been thrown into vehicles from overpasses, particularly in crowded areas. Rockets and mortars have been fired at hotels, and vehicle-borne IEDs have been used against targets throughout the country. Occasionally, U.S. Government personnel are prohibited from traveling to certain areas depending on prevailing security conditions. In addition to terrorist and criminal attacks, sectarian violence occurs often. Detailed security information is available on the Embassy's web site at http://iraq.usembassy.gov and at http://www.centcom.mil. Military aircraft arriving and departing from Baghdad International Airport (ORBI) have been subjected to small arms and missile fire. Travelers choosing to utilize civilian aircraft to enter or depart Iraq should be aware that, although there have been no recent attacks on civilian aircraft, the potential threat still exists, as well as does the high risk to road transportation described above. Official U.S. Government (USG) personnel are strongly encouraged to use U.S. military or other USG aircraft when entering or departing Iraq. All personnel serving in Iraq under Chief of Mission (COM) authority are prohibited from entering or departing ORBI on commercial airlines unless approved by the Regional Security Office (RSO) on a case-by-case basis. Other personnel not under COM authority must be guided by their own agency. The Embassy is located in the International Zone. The Embassy can provide only limited emergency services to U.S. citizens in Iraq. The U.S. Government considers the potential threat to U.S. Government personnel assigned to Iraq sufficiently serious to require them to live and work under strict security restrictions. At present, travel to and from the International Zone is extremely limited. Unofficial travel to Iraq by U.S. Government employees and their family members requires prior approval by the Department of State. The U.S. Embassy does not provide visa services to the general public. American citizens who choose to visit or reside in Iraq despite this Travel Warning are urged to take responsibility for their personal security, avoid crowds, especially rallies or demonstrations, and to inform the U.S. Embassy of their presence in Iraq.

All Americans in Baghdad are strongly encouraged to register with the Embassy at the following website: https://travelregistration.state.gov.American citizens may obtain the latest security information or other information about Iraq by contacting the U.S. Embassy, located in the International Zone, via landline at: 1-240-553-0589, via Iraqna cellular phones at 07901-191-0058/57/56/54/53/52/49/48, via e-mail to baghdadacs@state.gov, or by accessing the U.S. Embassy's website at http://iraq.usembassy.gov. The after-hours numbers in cases of extreme emergency is 011-964-770-443-2594 (from the US) or 964 0770-443-2594 (within Iraq.). Updated information on travel and security in Iraq may be obtained from the Department of State by calling 1-888-407-4747 toll-free in the United States and Canada, or for callers outside the United States, a regular toll-line at 1-202-501-4444. For further information, please consult the Country Specific Information for Iraq, as well as the Worldwide Caution, all of which are available on the Bureau of Consular Affairs Internet website at http://travel.state.gov.

IRELAND

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Ireland

PROFILE

Geography

Area: 70,282 sq. km. (27,136 sq. mi.); slightly larger than West Virginia.
Terrain: Arable 10%, meadows and pastures 77%, rough grazing in use 11%, inland water 2%.
Climate: Temperate maritime.

People

Nationality: Noun—Irishman, Irishwoman. Adjective—Irish.
Population: (April 2007): 4,339,000.
Cities: Capital—Dublin (pop. 506,211). Other cities—Cork (119,418), Galway (72,414), Limerick (52,539), Waterford (45,748).
Population breakdown: 0-14 years (21%), 15-24 years (15%), 25-34 years (17%), 35-44 years (14%), 45-54 years (12%), 55-64 years (10%), 65 years and over (11%).
Population growth rate: (2008 est.): 1.133%.
Ethnic groups: Irish, with English minority.
Religions: Roman Catholic 86.8%; Church of Ireland 3 %; Presbyterian 0.5%; Methodist 0.25%; Muslim 1 %; Jewish 0.1%; other 8.35%.
Languages: English, Irish (Gaelic).
Education: Compulsory up to age 16. Enrollment rates: first (primary) level 471,519; second (high school and vocational) level 333,718; third (university and college) level 138,362. Literacy—99%.
Health: Infant mortality rate—5.14/1,000. Life expectancy at birth—male 75.44 yrs., female 80.88 yrs.
Work force: Services—67%; industry—27%; agriculture—6%.

Government

Type: Parliamentary republic.
Independence: December 6, 1921.
Constitution: December 29, 1937.
Government branches: Executive—president, chief of state; Prime Minister (Taoiseach—pronounced "TEE-shuck"), head of government. Legislative—bicameral national Parliament (Oireachtas—pronounced "o-ROCK-tas") House of Representatives (Dail—pronounced "DOIL") and Senate (Seanad—pronounced "SHAN-ad"). Judicial—Supreme Court.
Political subdivisions: 26 counties, 34 local authorities.
Political parties: Fianna Fail, Fine Gael, Labour, Progressive Democrats, Green Party, Sinn Fein.
Suffrage: Universal over 18.

Economy

Nominal GDP: (2007) $186.2 billion.
Real GDP growth: (2007) 5.3%.
Nominal GDP per capita: (2007) $43,100.
Natural resources: Zinc, lead, natural gas, barite, copper, gypsum, limestone, dolomite, peat.
Agriculture: (5% of GDP) Products—cattle, meat, and dairy products; potatoes; barley; hay; silage; wheat.
Industry: (46% of GDP) Types—food processing, beverages, engineering, computer equipment, textiles and clothing, chemicals, pharmaceuticals, construction.
Trade: (2007) Exports—$115.6 billion (excluding services): machinery, transport equipment, chemicals, food, live animals, manufactured materials, beverages. Imports—$84.2 billion (excluding services): grains, petroleum products, machinery, transport equipment, chemicals, textile yarns. Major suppliers—Great Britain and Northern Ireland 31%, U.S. 11%, Germany 8%, China 7%, Japan 4%, France 3%, rest of the world (including other EU member states) 36%.

PEOPLE AND HISTORY

The Irish people are mainly of Celtic origin, with the country's only significant sized minority having descended from the Anglo-Normans. English is the common language, but Irish (Gaelic) is also an official language and is taught in schools. Anglo-Irish writers such as Swift, Sheridan,

Goldsmith, Burke, Wilde, Joyce, Yeats, Shaw, and Beckett have made a major contribution to world literature over the past 300 years.

The earliest inhabitants—people of a mid-Stone Age culture—arrived about 6000 BC. About 4,000 years later, tribes from southern Europe arrived and established a high Neolithic culture, leaving behind gold ornaments and huge stone monuments. The Bronze Age people, who arrived during the next 1,000 years, produced elaborate gold and bronze ornaments and weapons.

The Iron Age arrived abruptly in the fourth century BC with the invasion of the Celts, a tall, energetic people who had spread across Europe and Great Britain in the preceding centuries. The Celts, or Gaels, and their more numerous predecessors divided into five kingdoms in which, despite constant strife, a rich culture flourished.

The coming of Christianity from across the Irish Sea brought major changes and civilizing influences. Tradition maintains that St. Patrick arrived on the island in AD 432 and, in the years that followed, worked to convert the Irish to Christianity.

The pagan druid tradition collapsed before the spread of the new faith, and Irish scholars excelled in the study of Latin learning and Christian theology in the monasteries that flourished. Missionaries went forth from Ireland to England and the continent, spreading news of the flowering of learning, and scholars from other nations came to Irish monasteries. The excellence and isolation of these monasteries helped preserve Latin and Greek learning during the Dark Ages. The arts of manuscript illumination, metalworking, and sculpture flourished and produced such treasures as the Book of Kells, ornate jewelry, and the many carved stone crosses that dot the island.

Two hundred years of Viking invasion and settlement was later followed by a Norman conquest in the 12th century. The Norman conquest resulted in the assimilation of the Norman settlers into Irish society. The early 17th century saw the arrival of Scottish and English Protestants, sent as colonists to the north of Ireland and the Pale around Dublin.

In 1800 the Irish Parliament passed the Act of Union with Great Britain, and Ireland was an official part of the United Kingdom until 1921. Religious freedom, outlawed in the 18th century, was restored in 1829, but this victory for the Irish Catholic majority was overshadowed by a severe economic depression and the great famine from 1846-48 when the potato crop failed. Millions died, and the millions that emigrated spawned the first mass wave of Irish emigration to the United States. A decade later, in 1858, the Irish Republican Brotherhood (IRB—also known as the Fenians) was founded as a secret society dedicated to armed rebellion against the British. An aboveground political counterpart, the Home Rule Movement, was created in 1874, advocating constitutional change for independence.

Galvanized by the leadership of Charles Stewart Parnell, the party was able to force British governments after 1885 to introduce several home rule bills. The turn of the century witnessed a surge of interest in Irish nationalism, including the founding of Sinn Fein ("Ourselves Alone") as an open political movement.

Nationalism was and is a potent populist force in Irish politics. A home rule bill passed in 1914, but its implementation was suspended until war in Europe ended. Believing the mantra: "England's problem is Ireland's opportunity," and tapping into a mood of Gaelic revivalism, Padraic Pearse and James Connolly led the unsuccessful Easter Rising of 1916. Pearse and the other 1916 leaders declared an independent Irish republic, but a lack of popular support doomed the rebellion, which lasted a week and destroyed large portions of Dublin. The decision by the British military government to execute the leaders of the rebellion, coupled with the British Government's threat of conscripting the Irish to fight in the Great War, alienated public opinion and produced massive support for Sinn Fein in the 1918 general election. Under the leadership of Eamon de Valera, the elected Sinn Fein deputies constituted themselves as the first Dail. Tensions only increased: British attempts to smash Sinn Fein ignited the Anglo-Irish War of 1919-1921.

The end of the war brought the Anglo-Irish treaty of 1921, which established the Irish Free State of 26 counties within the British Commonwealth and recognized the partition of the island into Ireland and Northern Ireland, though supposedly as a temporary measure. The six predominantly Protestant counties of northeast Ulster—Northern Ireland—remained a part of the United Kingdom with limited self-government. A significant Irish minority repudiated the treaty settlement because of the continuance of subordinate ties to the British monarch and the partition of the island. This opposition led to further hostilities—a civil war (1922-23), which was won by the pro-treaty forces.

In 1932, Eamon de Valera, the political leader of the forces initially opposed to the treaty, became Prime Minister, and a new Irish constitution was enacted in 1937. The last British military bases were soon withdrawn, and the ports were returned to Irish control. Ireland was neutral in World War II. The government formally declared Ireland a republic in 1948; however, it does not normally use the term "Republic of Ireland," which tacitly acknowledges the partition, but refers to the country simply as "Ireland."

GOVERNMENT AND POLITICAL CONDITIONS

Ireland is a sovereign, independent, democratic state with a parliamentary system of government. The president, who serves as head of state in a largely ceremonial role, is elected for a 7-year term and can be re-elected only once. The current president is

Mary McAleese, who is serving her second term after having succeeded President Mary Robinson—the first instance worldwide where one woman has followed another as an elected head of state. In carrying out certain constitutional powers and functions, the president is aided by the Council of State, an advisory body. On the Taoiseach's (prime minister's) advice, the president also dissolves the Oireachtas (Parliament). The prime minister (Taoiseach, pronounced "TEE-shuck") is elected by the Dail (lower house of Parliament) as the leader of the political party, or coalition of parties, which wins the most seats in the national elections, held approximately every 5 years (unless called earlier). Executive power is vested in a cabinet whose ministers are nominated by the Taoiseach and approved by the Dail.

The bicameral Oireachtas (Parliament) consists of the Seanad Eireann (Senate) and the Dail Eireann (House of Representatives).

The Seanad is composed of 60 members—11 nominated by the prime minister, 6 elected by the national universities, and 43 elected from panels of candidates established on a vocational basis. The Seanad has the power to delay legislative proposals and is allowed 90 days to consider and amend bills sent to it by the Dail, which wields greater power in Parliament. The Dail has 166 members popularly elected to a maximum term of 5 years under a complex system of proportional representation. A member of the Dail is known as a Teachta Dala, or TD.

Judges are appointed by the president on nomination by the government and can be removed from office only for misbehavior or incapacity and then only by resolution of both houses of Parliament. The ultimate court of appeal is the Supreme Court, consisting of the chief justice and five other justices. The Supreme Court also can decide upon the constitutionality of legislative acts if the president asks for an opinion.

Local government is by elected county councils and—in the cities of Dublin, Cork, Limerick, and Waterford—by county borough corporations. County councils/corporations in turn select city mayors. In practice, however, authority remains with the central government. Irish politics remain dominated by the two political parties that grew out of Ireland's bitter 1922-23 civil war. Fianna Fail was formed by those who opposed the 1921 treaty that partitioned the island. Although treaty opponents lost the civil war, Fianna Fail soon became Ireland's largest political party. Fine Gael, representative of the pro-treaty forces, remains the country's second-largest party. The Progressive Democrats, Labour, Sinn Fein, and the Greens are the other significant parties.

The May 2007 national elections brought the Fianna Fail party and its leader Bertie Ahern back to power in a coalition government for an unprecedented third five-year term. Coalition members joining Fianna Fail were the Green Party and the Progressive Democrats. Ahern appointed Finance Minister Brian Cowen Deputy Prime Minister (Tanaiste, pronounced "TAW-nish-tuh").

On April 3, 2008 Ahern announced his intention to resign as leader of Fianna Fail and Taoiseach on May 6. Cowen was elected leader of Fianna Fail on April 5, and assumed office on May 6. He was elected Taoiseach on May 7. Cowen appointed Mary Coughlan, Minister for Enterprise, Trade and Employment as Tanaiste. The Foreign Minister is Micheal Martin.

Local and European elections took place in June 2004 and saw gains for opposition parties. The election also featured a referendum on citizenship. Until that time, Ireland had granted citizenship on the basis of birth on Irish soil. Concerns about security and social welfare abuse prompted the government to seek to bring citizenship laws in line with the more restrictive policies prevalent in the rest of Europe, and the 2004 referendum measure passed by a wide majority. Now, persons with non-Irish parents can acquire Irish citizenship at birth only if at least one parent has been resident in Ireland for three years preceding the birth.

In a referendum held on June 12, 2008 Irish voters rejected the European Union (EU) Lisbon Treaty by 53.7% to 46.3%. The margin of the "no" vote was surprisingly high given that most of the political parties, trade unions, employers' organizations, and farmers' associations endorsed it. However, no single factor emerged as decisive in the referendum's defeat. The government began a "comprehensive analysis" of the Irish vote, which they intend to present to their EU partners at the EU Council meeting in October.

Northern Ireland

Consolidating the peace process in Northern Ireland and encouraging the full implementation of the 1998 Good Friday Agreement (GFA) and the 2006 St. Andrews Agreement remain U.S. priorities in Ireland.

The conflict in Northern Ireland stems from a history of British rule, historical animosity between Catholics and Protestants, and the various armed and political attempts to unite Northern Ireland with the rest of the island. "Nationalist" and "Republican" groups seek a united Ireland, while "Unionists" and "Loyalists" want Northern Ireland to remain part of the United Kingdom. After decades of violence by both Republican and Loyalist paramilitaries, most notably the Irish Republican Army (IRA), the British and Irish governments negotiated an IRA ceasefire in 1994, which was followed by the landmark U.S.-brokered Good Friday Agreement (GFA) in 1998.

The GFA established a power-sharing legislative assembly to serve as the autonomous local government of Northern Ireland. The 108-member Northern Ireland Assembly is led by a first minister and deputy first minister, one from each of the two communities, and a 10-minister executive. The GFA also provided for changes in both the British and Irish constitutions. Ireland ceded territorial claim to Northern Ireland, and the U.K. agreed that Northern Ireland could become part of Ireland if a majority (North and South) so voted in the future. Finally, the GFA provided the blueprint for "normalization," to include the eventual removal of British forces, devolution of police and justice functions, and guarantees of human rights and equal opportunity for all individuals. The agreement was approved in a 1998 referendum by 71% of Northern Ireland voters and 95% of Irish voters.

The major political parties in Northern Ireland are the Democratic Unionist Party (DUP), Sinn Fein, the Ulster Unionist Party (UUP), and the Social Democratic and Labor Party (SDLP). The UUP and SDLP are centrist Unionist and Nationalist parties, respectively, while Sinn Fein is strongly Republican and the DUP is strongly Unionist. From the time the Assembly was created in 1998 until 2003, the UUP and SDLP were the governing parties.

In October 2002, the British Government suspended (for the fourth time) the Assembly, following a breakdown in trust between Unionists and Republicans. The British and Irish Governments began discussions with the parties to try to resolve long-standing unresolved differences between the communities, and to secure a commitment from Sinn Fein that Republicans would divest themselves of all paramilitary activities and capabilities. Efforts to restore the political process in time to stage new elections to the Assembly in May 2003 broke down when the two governments concluded they did not have sufficient assurances from the Republicans. However, the governments proceeded to publish a joint declaration, mapping out the timetable to full implementation of the GFA. The governments also created an International Monitoring Commission to serve as a forum to hear complaints of alleged breaches of GFA commitments by the political parties and/or by British authorities. The four-member commission includes a representative from the United States.

Beginning in 2005, there were significant steps to reinvigorate the peace process. In July 2005, the IRA unilaterally announced that it would end its "armed struggle" and rely upon solely peaceful and democratic means to achieve its political objectives. The Independent International Commission on Decommissioning (IICD) confirmed in September 2005 that the IRA had effectively put its weapons "beyond use." A series of reports by the International Monitoring Commission also noted significant progress by the IRA in its move away from criminality. Following upon this momentum, the British and Irish Governments in April 2006 launched a new negotiation process that envisioned the restoration of the Assembly and the selection of the First

Minister and Deputy First Minister by year's end. This process led to a summit at St. Andrews, Scotland, in October 2006, brokered by Irish Prime Minister (Taoiseach) Bertie Ahern and British Prime Minister Tony Blair, which achieved agreement between Sinn Fein and the DUP on the process for restoring power to the Northern Ireland Assembly. Elections for the Assembly took place on March 7, 2007, which led to the restoration of the Northern Ireland Assembly on May 8, 2007. DUP leader Ian Paisley was elected First Minister, while Sinn Fein leader Martin McGuinness became Deputy First Minister.

Two breakthroughs enabled this historic agreement to proceed: Sinn Fein's decision at an extraordinary Ard Fheis ("AR-desh," party conference) on January 28 to endorse policing and justice; and the DUP's decision to contest the March 7 election, signaling that the party would agree to share power with Sinn Fein in a restored Assembly. In the meantime, both the British and Irish Governments have offered significant new financial packages for the new Assembly.

The Special Envoy for the Northern Ireland Peace Process is Paula Dobriansky, who coordinates with the U.S. Missions in London, Belfast and Dublin to reinforce the views of the British and Irish Governments that the newly restored Northern Ireland Assembly must govern effectively in order to achieve economic growth and community reconciliation in Northern Ireland.

The United States also continues to provide funding ($13.5 million in 2007) for projects administered under the International Fund for Ireland (IFI), created in 1986 to generate economic opportunity and cross-community engagement in the border areas, both North and South. Since the IFI's establishment, the U.S. Government has contributed over $482 million, roughly half of total IFI funding.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Mary MCALEESE**
Prime Min.: **Brian COWEN**
Dep. Prime Min.: **Mary COUGHLAN**
Min. for Agriculture, Fisheries, & Food: **Brendan SMITH**
Min. for Arts, Sport, & Tourism: **Martin CULLEN**
Min. for Communications, Energy, & Natural Resources: **Eamon RYAN**
Min. for Community, Rural, & Gaeltacht Affairs: **Eamon O'CUIV**
Min. for Defense: **Willie O'DEA**
Min. for Education & Science: **Batt O'KEEFFE**
Min. for Enterprise, Trade, & Employment: **Mary COUGHLAN**
Min. for Environment, Heritage, & Local Government: **John GORMLEY**
Min. for Finance: **Brian LENIHAN**
Min. for Foreign Affairs: **Micheal MARTIN**
Min. for Health & Children: **Mary HARNEY**

Min. for Social & Family Affairs: **Mary HANAFIN**
Min. for Transport & Marine: **Noel DEMPSEY**
Attorney Gen.: **Paul GALLAGHER**
Governor, Central Bank of Ireland: **John HURLEY**
Ambassador to the US: **Michael COLLINS**
Permanent Representative to the UN, New York: **John Paul KAVANAGH**

The Irish Embassy in the United States is at 2234 Massachusetts Ave. NW, Washington, DC 20008 (tel. 202-462-3939/40/41/42). Irish Consulates are located in New York, Chicago, Boston, and San Francisco.

ECONOMY

Ireland boasts a vibrant, globalized economy, with GDP per capita second only to Luxembourg's in the EU. The "Celtic Tiger" period of the mid to late 1990s saw several years of double-digit GDP growth, driven by a progressive industrial policy that boosted large-scale foreign direct investment and exports. GDP growth dipped during the immediate post-September 11, 2001 global economic slowdown, but has averaged roughly 5% yearly since 2004, the best performance for this period among the original EU 15 member states. Between 2004 and 2007, the Irish economy generated roughly 90,000 new jobs annually, attracting over 200,000 foreign workers, mostly from the new EU member states, in an unprecedented immigration influx. The construction sector has accounted for approximately one-quarter of these jobs. However, the Irish economy began to experience a slowdown in 2008, with the government forecasting 0.5% GDP growth in 2008. Some economists believe that the economy will fall into recession this year. The cause of the downturn has been a marked slowdown in Ireland's housing market. The government plans to cut spending over the next two years by just over $2 billion as a result of a fall in tax receipts, again, largely as a result of less construction-related activity.

Economic and trade ties are an important facet of overall U.S.-Irish relations. In 2007, U.S. exports to Ireland were valued at $9 billion, while Irish exports to the U.S. totaled $30.4 billion, according to the Bureau of Economic Analysis. The range of U.S. exports includes electrical components and equipment, computers and peripherals, drugs and pharmaceuticals, and livestock feed. Irish exports to the United States represent approximately 20% of all Irish exports, and have roughly the same value as Irish exports to the U.K. (inclusive of Northern Ireland). Exports to the United States include alcoholic beverages, chemicals and related products, electronic data processing equipment, electrical machinery, textiles and clothing, and glassware. According to Ireland's Central Statistical Office, Irish exports to the United States from January to September 2006 rose by 7% compared to the same period in 2005, while Irish imports from the United States from January to September 2006 fell by 14% compared to the same period in 2005.

U.S. investment has been particularly important to the growth and modernization of Irish industry over the past 25 years, providing new

technology, export capabilities, and employment opportunities. As of year-end 2007, the stock of U.S. foreign direct investment in Ireland stood at $85 billion, more than the U.S. total for China, India, Russia, and Brazil—the so-called BRIC countries—combined. Currently, there are approximately 620 U.S. subsidiaries in Ireland, employing roughly 100,000 people and spanning activities from manufacturing of high-tech electronics, computer products, medical supplies, and pharmaceuticals to retailing, banking, finance, and other services. In more recent years, Ireland has also become an important research and development (R&D) center for U.S. firms in Europe.

Many U.S. businesses find Ireland an attractive location to manufacture for the EU market, since it is inside the EU customs area and uses the euro. In 2005, U.S. firms accounted for 61% of Ireland's total exports. Other reasons for Ireland's attractiveness include: a 12.5% corporate tax rate for domestic and foreign firms; the quality and flexibility of the English-speaking work force; cooperative labor relations; political stability; pro-business government policies; a transparent judicial system; strong intellectual property protection; and the pulling power of existing companies operating successfully (a "clustering" effect). Factors that negatively affect Ireland's ability to attract investment include: increasing labor and energy costs (especially when compared to low-cost countries in Eastern Europe and Asia), skilled labor shortages, inadequate infrastructure (such as in the transportation and Internet/broadband sectors), and price levels that are ranked among the highest in Europe.

FOREIGN RELATIONS

Ireland is a member of numerous international organizations, including the United Nations, the Organization for Security and Cooperation in Europe, and the European Union. Ireland has been an important contributor to numerous international peacekeeping missions, such as in Lebanon (UNIFIL), Liberia (UNIMIL), and the Balkans (KFOR and EUFOR). Ireland's overseas development assistance focuses on Sub-Saharan Africa and stands at 5% of GDP.

U.S.-IRISH RELATIONS

U.S. relations with Ireland have long been based on common ancestral ties and shared values. These relations have broadened and matured, given the significant U.S. role in Ireland's economic success and cooperation on global challenges. Besides regular dialogue on political and economic issues, the U.S. and Irish Governments have official exchanges in areas such as medical research and education.

With Ireland's membership in the European Union, the discussion of EU trade and economic policies, as well as other aspects of EU policy, is also a key element in the U.S.-Irish relationship. In recent years, Ireland has attempted to act as a diplomatic bridge between the United States and European Union. During its 2004 EU presidency, Ireland worked to strengthen U.S.-EU ties that had been strained by the Iraq war, and the current EU Ambassador to the United States is former Irish Prime Minister John Bruton.

Emigration, long a vital element in the U.S.-Irish relationship, declined significantly with Ireland's economic boom in the 1990s. For the first time in its modern history, Ireland is experiencing high levels of inward migration, a phenomenon with political, economic, and social consequences. However, Irish citizens do continue the common practice of taking temporary residence overseas for work or study, mainly in the U.S., U.K., and elsewhere in Europe, before returning to establish careers in Ireland.

The U.S. J-1 visa program, for example, remains a popular means for Irish youths to work temporarily in the United States.

TRAVEL

Consular Information Sheet

December 2, 2008

Country Description: Ireland is a highly developed democracy with a modern economy. Tourist facilities are widely available.

Entry Requirements: A passport is necessary, but a visa is not required for tourist or business stays of up to three months.

Visit the Embassy of Ireland web site for the most current visa information, or contact the embassy at 2234 Massachusetts Avenue NW, Washington,

DC 20008, tel: (202) 462-3939, or the nearest Irish consulate in Boston, Chicago, New York or San Francisco.

Safety and Security: Ireland remains largely free of terrorist incidents. While the 1998 ceasefire in Northern Ireland is holding, there have been spates of violence in Northern Ireland associated with paramilitary organizations. These incidents have the potential for some spillover into Ireland. Travelers to Northern Ireland should consult the Country Specific Information for the United Kingdom and Gibraltar. Several Americans have reported incidents of verbal abuse and one reported a physical assault apparently in reaction to U.S. policy on the war on terrorism. As elsewhere in Europe, there have been public protests, which for the most part are small, peaceful and well policed. Americans are advised, nonetheless, to avoid public demonstrations in general and to monitor local media when protests occur.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's Internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Ireland has a low rate of violent crime. There have been a limited number of incidents in which foreigners and tourists have been victims of assault, including instances of violence toward those who appear to be members of racial minority groups. In addition, there have been several reported assaults in Dublin by small, unorganized gangs roaming the streets in the early morning hours after the pubs close. There is a high incidence of petty crime—mostly theft, burglary and purse snatching—in major tourist areas. Thieves target rental cars and tourists, particularly in the vicinity of tourist attractions, and some purse and bag snatching incidents in these areas have turned violent, especially in Dublin. Travelers should take extra caution to safeguard passports and wallets from pickpockets and bag snatchers.

Crimes involving credit and debit cards and automated teller machines (ATMs) are also a concern. Travelers should protect their PIN numbers at all times and avoid using ATM machines that appear to have been tampered with. There has been an increase in Ireland of the use of "skimmers" on ATM machines, especially in tourist areas. Skimmers are usually small electronic devices that are attached to the outside of an ATM machine in order to "skim" the ATM or credit card data for later criminal use. Most ATMs in Ireland now have electronic warnings about their use and advise customers to look closely at the ATM before using it.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime in Ireland, in addition to reporting to local police (Gardai), please contact the U.S. Embassy in Dublin for assistance. The Embassy staff can, for example, assist you in finding appropriate medical care, contacting family members or friends, and learning how funds can be transferred. Although the investigation and prosecution of the crime are solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed. The Irish Tourist Assistance Service (ITAS) is a free nationwide service offering support and assistance to tourists who are victimized while visiting Ireland. If you are a tourist victim of crime, report the incident to the nearest Garda Station (police station), which will contact ITAS. All tourist victims of crime are referred to ITAS by the Gardai.

The local equivalent to the "911" emergency line in Ireland is 999 or 122.

Medical Facilities and Health Information: Modern medical facilities and highly skilled medical practitioners are available in Ireland. Because of high demand, however, access to medical specialists can be difficult and admissions to hospitals for certain non-life-threatening medical conditions may require spending significant periods of time on waiting lists. Those traveling to or intending to reside in Ireland who may require medical treatment while in the country should consult with their personal physicians prior to traveling. Over-the-counter medication is widely available. Irish pharmacists may not be able to dispense medication prescribed by your U.S. physician and may direct you to obtain a prescription from an Irish doctor before providing you with your required medication. A list of Irish general practitioners in each area of Ireland may be obtained from the web site of the Irish College of General Practitioners at http://www.icgp.ie/go/find_a_gp. Emergency services usually respond quickly.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Ireland.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet website at http://wwwn.cdc.gov/travel.

For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/countries/irl/en. Further health information for travelers is available online at http://www.who.int/ith.

Foot and Mouth Disease: The Irish Department of Agriculture and Food wishes to advise all incoming passengers to Ireland that the current Foot and Mouth situation in Great Britain represents a high risk of the spread of disease to Ireland. If you are travel-

ing from Great Britain to Ireland, and have visited a farm with cattle, sheep, goats, or pigs on your travels, you must report to the Irish Department of Agriculture and Food office at the port of entry. Fresh meat or unpasteurized milk products bought in Great Britain may not be brought into Ireland. If you are carrying any of these products they must be disposed of in the bins provided at the port of entry. For further information, please visit www.agriculture.gov.ie.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Ireland is provided for general reference only, and may not be totally accurate in every particular location or circumstance.

As driving is on the left side of the road in Ireland, motorists without experience in left-drive countries should be especially cautious. Tourists driving on the wrong side of the road are the cause of several serious accidents each year. Turning on red is not legal in Ireland. The vast majority of the rental cars are stick shift; it can be difficult to find automatic transmission rental cars. Road conditions are generally good, but once off main highways, country roads quickly become narrow, uneven and winding. Roads are more dangerous during the summer and on holiday weekends due to an increase in traffic. More information on driving in Ireland can be found on the U.S. Embassy in Dublin web site.

For specific information concerning Irish driving permits, vehicle inspection, road tax and mandatory insurance, please visit the official tourism guide for Ireland at Tourism Ireland web site at at http://www.tourismireland.com. Taxis are reasonably priced but availability varies with time of day and where you are in the country. Bus service in the cities is generally adequate, though many buses are overcrowded and frequently late. Inter-city bus and train services are reasonably good.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Ireland's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Ireland's air carrier operations. For more information, travelers may visit the FAA's web site.

Special Circumstances: Most Irish banks will not accept U.S. $100 bills. ATMs are widely available, but some, particularly in rural areas, may not accept cards from U.S. banks. Credit cards are widely accepted throughout Ireland. A number of travelers have been told by their airline that their passport must remain valid for six months after their entry into Ireland.

The Government of Ireland has advised that this is a recommendation of the airline industry and is not an Irish legal requirement. Travelers must be in possession of a valid passport to travel.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.

Persons violating Irish laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Ireland are severe, and convicted offenders can expect long jail sentences and heavy fines.

Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in Ireland and the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Ireland are encouraged to register with the U.S. Embassy in Dublin through the State Department's travel registration web site and to obtain updated information on travel and security within Ireland. Americans without Internet access may register directly with the U.S. Embassy in Dublin. By registering, Americans make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at 42 Elgin Road, Ballsbridge, Dublin 4, telephone (353) (1) 668-8777, after hours number: (353) (1) 668-9612, fax: (353) (1) 668-8056, and on the Internet at http://dublin.usembassy.gov.

Intercountry Adoption

May 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The following is intended as a very general guide to assist U.S. citizens who plan to adopt a child from Ireland and apply for an immigrant visa for the child to come to the United States. The information in this flyer relating to the legal requirements of Ireland is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Patterns of Immigration: Recent U.S. immigrant visa statistics indicate only one immigrant visa has been issued to an Irish orphan in the last five fiscal years.

Adoption Authority in Ireland: The government office responsible for adoptions in Ireland is:

Adoption Board (An Bord Uchtala),
Shelbourne House
Shelbourne Road
Ballsbridge, Dublin 4
Tel: 353-1-667-1392
Fax: 353-1-667-1438
Website: www.adoptionboard.ie

Eligibility Requirements for Adoptive Parents: Other than widows or widowers, unmarried individuals may not adopt Irish children. A couple adopting a child to whom they are not related must both be at least 21 years of age.

Where the child is being adopted by a married couple and one of them is the biological mother or father or a relative of the child, only one of them must have attained the age of 21 years. Both the biological parent and the step-parent adopt the child, thus changing the biological parent's legal relationship to the child.

Irish law does not lay down upper age limits for adopting parents. However, age is considered a significant factor by the societies and health boards when assessing a couple's suitability to adopt and most Irish adoption agencies apply their own upper age limits.

The following persons are eligible to adopt:

- A married couple living together. This is the only circumstance in which the law permits the adoption of a child by more than one person.
- A maried person alone. In this circumstance, the spouse's consent to adopt must be obtained, unless they are living apart and are separated because: (i). there is a court decree or deed of separation; or (ii). the absent spouse has deserted the prospective adoptive parent; or (iii). the prospective adoptive parent has left the other spouse based on that other spouse's conduct.
- The mother, father or a relative of a specific child (relative meaning a grandparent, brother, sister, uncle or aunt of the child to be adopted and/or the spouse of any such relative). In this case, the term "relative" is taken to mean a biological relative of either the biological mother or father.
- A widow or widower.

Persons not falling into one of the categories and above may only adopt where the Board is satisfied that, in the particular circumstances of the case, it is desirable to grant an order.

A sole applicant who does not come within the classes of persons defined under c) and d) may only adopt where the Board is satisfied that, in the particular circumstances of the case, it is desirable to grant an order. It is not possible for two unmarried persons to adopt jointly.

If the adopting parents, child and birth parent(s) are not all of the same religion, the birth parent(s) must know the religion (if any) of each of the adopting parents when giving consent to the child's adoption. The identity of the adoptive parents need not be disclosed to the biological parents, merely their religious preference.

The Adoption Board cannot make an adoption order unless it is satisfied that each of the adopting parents is a suitable person to have parental rights and duties in respect

Residency Requirements: Adopting parents must be ordinarily resident in Ireland and have been so resident for at least one year before the date of the making of the adoption order.

Time Frame: From start of process until the child is matched with prospective adopters is approximately 12 to15 months. Adoptive parents who plan to file an I-600 must finalize the adoption within 18 months of filing their I-600A in the United States.

Adoption Agencies and Attorneys: The registered adoption societies and the health boards are the only agencies legally entitled to place children for adoption. A number of the societies are operated by, or in association with, the local Irish health authority. There is no Irish government-approved attorney or firm of attorneys. A list of approved adoption agencies can be found at: http://www.adoptionboard.ie/domestic/supportgroups.php.

Adoption Fees: Attorney fees: Vary depending on the firm and the complexity of the case:

- Adoption Agency fees: No Fees
- Health Board fees: No Fees
- Adoption Board fees: No Fees
- Estimated average cost to parents of adoption in Ireland: No maximum

Domestic Adoption Within Ireland: All applications for adoption orders are made to the Adoption Board, an independent statutory body. The primary function of the Board is to approve or refuse applications for Adoption orders in relation to Irish adoptions.

A couple wishing to have a child placed with them for adoption should apply to a registered adoption agency or their local health board to initiate the process. They will undergo an assessment process to determine whether they are considered eligible to adopt. Those who are considered ineligible to adopt for any reason can appeal the decision of the assessors if they wish. Those considered eligible can then seek a child to adopt.

A couple seeking permission to adopt will have to undergo a detailed assessment by either the Registered Adoption Society or the Health Board (not the Adoption Board) through which they have chosen to apply The purpose of this assessment is to

establish the couple's suitability as prospective adoptive parents. The assessment will be carried out by one of the agency's social workers. It will include a number of joint and individual interviews and visits to the couple's home. The couple will also need to undergo a medical examination.

The Adoption Board cannot make an adoption order unless it is satisfied as to the suitability of the adoption parents. The Board has a team of social workers who visit the homes of applicants for adoption orders and report to the Board on their suitability. This second set of home visits is completely separate from those initially conducted by either the Adoption Society or Health board.

The Adoption Board does not usually finalize an adoption until the adopting parents have had the child in their care for at least six months. The Board may require the applicants to have the child in their care for a longer period in certain circumstances.

When the Adoption Board is satisfied that an adoption is ready to be finalized, it will invite the adoptive parents and child to attend the hearing of their application. At the oral hearing, the applicants are asked certain questions under oath in order to establish their identity and eligibility to adopt. If these questions are answered to the satisfaction of the Board, the Board then makes an adoption order of the child.

Intercountry Adoption in Third Countries: The pre-approval procedures for intercountry adoption are similar to domestic adoption above. The adoption of the child will by governed by the child's country of origin. For more information on Irish government requirements for such cases, prospective adoptive parents should visit www.adoptionboard.ie/intercountry/index.php.

Documents Required: If a couple is accepted by an adoption agency and have a child placed with them, the next step is to apply to the Adoption Board for an adoption order. Certain documents specified by the Adoption Board must be sent to the Board in support of the application, typically marriage certificates, birth certificates, etc.

Embassy of Ireland
2234 Massachusetts Avenue N.W.
Washington D.C. 20008
Tel: 202 462-3939
Fax: (202) 232 5993
http://www.irelandemb.org
Ireland also has Consulates General in Boston, Chicago, New York, and San Francisco.

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publicationM-249, *The Immigration of Adopted and Prospective Adoptive Children,* as well as the Department of State publication, *Intercountry Adoptions.* Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy
42 Elgin Road
Ballsbridge Dublin 4
Tel: (353)-(1)-668-8777,
After hours number:
(353) (1) 668-9612
Fax: (353) (1) 668-8056
Email: ACS_Dublin@state.gov

Additional Information: Specific questions about adoption in Ireland may be addressed to the U.S. Embassy in Dublin or the Irish Adoption Board. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Absent a court order, married parents in Ireland are assumed to share joint custody of any minor children. In divorce and custodial proceedings, it is rare, but not unheard of, for the father to be awarded custody. The mother of a child born out-of-wedlock in Ireland is assumed to have sole and full custody of the child. If the father's name does not appear on the birth certificate, he may have a difficult time even obtaining access to the child even though he can still be brought to court and ordered to pay child support.

A U.S. court order regarding custody is not enforceable in Ireland, but will be taken into account as a courtesy, if presented to the Irish court during a custody hearing in Ireland.

The child of an Irish citizen automatically acquires Irish citizenship regardless of where the birth occurred (with a few exceptions). The signatures of both parents are required on an application for an Irish passport for a minor child. If your child has a claim to Irish citizenship, you may be able to prevent the issuance of an Irish passport to your child upon presentation of a court order certified by the clerk of the court. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

The Hague Convention: The Hague Convention on the Civil Aspects of International Child Abduction (Hague Convention) came into force between the United States and the Republic of Ireland on October 1, 1991. Therefore, Hague Convention provisions for return would

apply to children abducted or retained after October 1, 1991. Parents and legal guardians of children taken to the Republic of Ireland prior to October 1, 1991 may still submit applications for access/visitation to the child under the Hague Convention. All countries party to the Hague Convention have a Central Authority that is responsible for processing Hague applications. For more information, please read the *International Parental Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

The designated Central Authority for the Republic of Ireland is the Department of Justice, Equality and Law Reform. They are located at 43/49 Mespil Road, Dublin 4, Ireland. The international telephone number is 011-353-1-667-0344 and the international telefax number is 011-353-1-667-0367. The Central Authority e-mail address is child_abduction@justice.ie.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities, or the nearest office of the Federal Bureau of Investigation. Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention at http://www.ojjdp.ncjrs.org. You should be aware that filing criminal child abduction charges in the United States against a taking parent could jeopardize an Irish Hague Convention case.

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

ISRAEL

Compiled from the October 2007 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
State of Israel

PROFILE

Geography

Area: 20,330 sq. km. (7,850 sq. mi.) including Jerusalem; about the size of New Jersey.

Cities: Capital—Jerusalem. Israel proclaimed Jerusalem as its capital in 1950. The United States, like nearly all other countries, maintains its embassy in Tel Aviv. Other cities—Tel Aviv, Haifa.

Terrain: Plains, mountains, desert, and coast.

Climate: Temperate, except in desert areas.

People

Population: (2007 est.) 6.43 million.

Annual population growth rate: (2007 est.) 1.2%.

Ethnic groups: Jews 76.2%; Arabs 19.5%; other 4.3%.

Religions: Judaism, Islam, Christianity, Druze.

Languages: Hebrew (official), Arabic (official), English, Russian.

Education: Years compulsory—11. Literacy—96.9% (female 95.6%; male 98.3%).

Health: Infant mortality rate (2005 est.)—7.03/1,000 births. Life expectancy at birth—79.32 years; female 81.55 years, male 77.21 years.

Work force: (2.68 million; Central Bureau for Statistics, 2004) Agriculture—2.1%; manufacturing—16.2%; electricity and water supply—0.8%; construction—5.4%; trade and repair of motor vehicles—3.6%; accommodation services and restaurants—4.3%; transport, storage, and communication—6.5%; banking, insurance, and finance—3.3%; business activities—13.4%; public administration—4.7%; education—12.7%; health, welfare, and social services—10.7%; community, social, and personal services—4.6%; services for households by domestic personnel—1.6%.

Government

Type: Parliamentary democracy.

Independence: May 14, 1948.

Constitution: None; however, the Declaration of Establishment (1948), the Basic Laws of the parliament (the Knesset), and the Israeli citizenship law fill many of the functions of a constitution.

Government branches: Executive—president (chief of state); prime minister (head of government). Legislative—unicameral Knesset. Judicial—Supreme Court.

Political parties: Labor, Likud, Kadima, and various other secular and religious parties, including some wholly or predominantly supported by Israel's Arab citizens. A total of 12 parties are represented in the 17th Knesset, elected March 2006.

Suffrage: Universal at 18.

Economy

GDP: (2006 est.) $170.3 billion.

Annual growth rate: (2006) 4.8%.

Per capita GDP: (2006) $26,800.

Currency: Shekel (4.13 shekels = 1 U.S. dollar; 2007 est.).

Natural resources: Copper, phosphate, bromide, potash, clay, sand, sulfur, bitumen, manganese.

Agriculture: Products—citrus and other fruits, vegetables, beef, dairy, and poultry products.

Industry: Types—high-technology projects (including aviation, communications, computer-aided design and manufactures, medical electronics, fiber optics), wood and paper products, potash and phosphates, food, beverages, tobacco, caustic soda, cement, construction, plastics, chemical products, diamond cutting and polishing, metal products, textiles, and footwear.

Trade: Exports (2006 est.)—$42.86 billion. Exports include polished diamonds, electronic communication, medical and scientific equipment, chemicals and chemical products, electronic components and computers, machinery and equipment, transport equipment, rubber, plastics, and textiles. Imports (excluding defense imports, 2006 est.)—$47.8 billion: raw materials, diamonds, energy ships and airplanes, machinery, equipment, land transportation equipment for investment, and consumer goods. Major partners—U.S., U.K., Germany; exports—U.S., Bel-

gium, Hong Kong; imports—U.S., Belgium, Germany, Switzerland, U.K.

PEOPLE

Of the approximately 6.43 million Israelis in 2007, about 76% were counted as Jewish, though some of those are not considered Jewish under Orthodox Jewish law. Since 1989, nearly a million immigrants from the former Soviet Union have arrived in Israel, making this the largest wave of immigration since independence. In addition, an estimated 105,000 members of the Ethiopian Jewish community have immigrated to Israel, 14,000 of them during the dramatic May 1991 Operation Solomon airlift. 32.9% of Israelis were born outside of Israel.

The three broad Jewish groupings are the Ashkenazim, or Jews who trace their ancestry to western, central, and eastern Europe; the Sephardim, who trace their origin to Spain, Portugal, southern Europe, and North Africa; and Eastern or Oriental Jews, who descend from ancient communities in Islamic lands. Of the non-Jewish population, about 68% are Muslims, about 9% are Christian, and about 7% are Druze.

Education is compulsory from age 6 to 16 and is free up to age 18. The school system is organized into kindergartens, 6-year primary schools, 3-year junior secondary schools, and 3-year senior secondary schools, after which a comprehensive examination is offered for university admissions. There are seven university-level institutions in Israel, a number of regional colleges, and an Open University program.

With a population drawn from more than 100 countries on 5 continents, Israeli society is rich in cultural diversity and artistic creativity. The arts are actively encouraged and supported by the government. The Israeli Philharmonic Orchestra performs throughout the country and frequently tours abroad. The Jerusalem Symphony and the New Israel Opera also tour frequently, as do other musical ensembles. Almost every municipality has a chamber orchestra or ensemble, many boasting the talents of gifted performers from the countries of the former Soviet Union.

Israel has several professional ballet and modern dance companies, and folk dancing, which draws upon the cultural heritage of many immigrant groups, continues to be very popular. There is great public interest in the theater; the repertoire covers the entire range of classical and contemporary drama in translation as well as plays by Israeli authors. Of the three major repertory companies, the most famous, Habimah, was founded in 1917.

Active artist colonies thrive in Safed, Jaffa, and Ein Hod, and Israeli painters and sculptors exhibit works worldwide. Israel boasts more than 120 museums, including the Israel Museum in Jerusalem, which houses the Dead Sea Scrolls along with an extensive collection of regional archaeological artifacts, art, and Jewish religious and folk exhibits. Israelis are avid newspaper readers, with more than 90% of Israeli adults reading a newspaper at least once a week. Major daily papers are in Hebrew; others are in Arabic, English, French, Polish, Yiddish, Russian, Hungarian, and German.

HISTORY

The creation of the State of Israel in 1948 was preceded by more than 50 years of efforts to establish a sovereign nation as a homeland for Jews. These efforts were initiated by Theodore Herzl, founder of the Zionist movement, and were given added impetus by the Balfour Declaration of 1917, which asserted the British Government's support for the creation of a Jewish homeland in Palestine.

In the years following World War I, Palestine became a British Mandate and Jewish immigration steadily increased, as did violence between Palestine's Jewish and Arab communities. Mounting British efforts to restrict this immigration were countered by international support for Jewish national aspirations following the near-extermination of European Jewry by the Nazis during World War II. This support led to the 1947 UN partition plan, which would have divided Palestine into separate Jewish and Arab states, with Jerusalem under UN administration.

On May 14, 1948, soon after the British quit Palestine, the State of Israel was proclaimed and was immediately invaded by armies from neighboring Arab states, which rejected the UN partition plan. This conflict, Israel's War of Independence, was concluded by armistice agreements between Israel, Egypt, Jordan, Lebanon, and Syria in 1949 and resulted in a 50% increase in Israeli territory.

In 1956, French, British, and Israeli forces engaged Egypt in response to its nationalization of the Suez Canal and blockade of the Straits of Tiran. Israeli forces withdrew in March 1957, after the United Nations established the UN Emergency Force (UNEF) in the Gaza Strip and Sinai. This war resulted in no territorial shifts and was followed by several years of terrorist incidents and retaliatory acts across Israel's borders.

In June 1967, Israeli forces struck targets in Egypt, Jordan, and Syria in response to Egyptian President Nasser's ordered withdrawal of UN peacekeepers from the Sinai Peninsula and the buildup of Arab armies along Israel's borders. After 6 days, all parties agreed to a cease-fire, under which Israel retained control of the Sinai Peninsula, the Golan Heights, the Gaza Strip, the formerly Jordanian-controlled West Bank of the Jordan River, and East Jerusalem. On November 22, 1967, the Security Council adopted Resolution 242, the "land for peace" formula, which called for the establishment of a just and lasting peace based on Israeli withdrawal from territories occupied in 1967 in return for the end of all states of belligerency, respect for the sovereignty of all states in the area, and the right to live in peace within secure, recognized boundaries.

The following years were marked by continuing violence across the Suez Canal, punctuated by the 1969-70 war of attrition. On October 6, 1973—Yom Kippur (the Jewish Day of Atonement), the armies of Syria and Egypt launched an attack against Israel. Although the Egyptians and Syrians initially made significant advances, Israel was able to push the invading armies back beyond the 1967 cease-fire lines by the time the United States and the Soviet Union helped bring an end to the fighting. In the UN Security Council, the United States supported Resolution 338, which reaffirmed Resolution 242 as the framework for peace and called for peace negotiations between the parties.

In the years that followed, sporadic clashes continued along the cease-fire lines but guided by the U.S., Egypt, and Israel continued negotiations. In November 1977, Egyptian President Anwar Sadat made a historic visit to Jerusalem, which opened the door for the 1978 Israeli-Egyptian peace summit convened at Camp David by President Carter. These negotiations led to a 1979 peace treaty between Israel and Egypt, pursuant to which Israel withdrew from the Sinai in 1982, signed by President Sadat of Egypt and Prime Minister Menahem Begin of Israel.

In the years following the 1948 war, Israel's border with Lebanon was quiet relative to its borders with other neighbors. After the expulsion of Palestinian fighters from Jordan in 1970 and their influx into southern Lebanon, however, hostilities along Israel's northern border increased and Israeli forces crossed into Lebanon. After passage of Security Council Resolution 425, calling for Israeli withdrawal and the creation of the UN Interim Force in Lebanon peacekeeping force (UNIFIL), Israel withdrew its troops.

In June 1982, following a series of cross-border terrorist attacks and the attempted assassination of the Israeli Ambassador to the U.K., Israel invaded Lebanon to fight the forces of Yasser Arafat's Palestine Liberation Organization (PLO). The PLO with-

drew its forces from Lebanon in August 1982. Israel, having failed to finalize an agreement with Lebanon, withdrew most of its troops in June 1985 save for a residual force which remained in southern Lebanon to act as a buffer against attacks on northern Israel. These remaining forces were completely withdrawn in May 2000 behind a UN-brokered delineation of the Israel-Lebanon border (the Blue Line). Hezbollah forces in Southern Lebanon continued to attack Israeli positions south of the Blue Line in the Sheba Farms/Har Dov area of the Golan Heights.

The victory of the U.S.-led coalition in the Persian Gulf War of 1991 opened new possibilities for regional peace. In October 1991, the United States and the Soviet Union convened the Madrid Conference, in which Israeli, Lebanese, Jordanian, Syrian, and Palestinian leaders laid the foundations for ongoing negotiations designed to bring peace and economic development to the region. Within this framework, Israel and the PLO signed a Declaration of Principles on September 13, 1993, which established an ambitious set of objectives relating to a transfer of authority from Israel to an interim Palestinian authority. Israel and the PLO subsequently signed the Gaza-Jericho Agreement on May 4, 1994, and the Agreement on Preparatory Transfer of Powers and Responsibilities on August 29, 1994, which began the process of transferring authority from Israel to the Palestinians.

On October 26, 1994, Israel and Jordan signed a historic peace treaty, witnessed by President Clinton. This was followed by Israeli Prime Minister Rabin and PLO Chairman Arafat's signing of the historic Israeli-Palestinian Interim Agreement on September 28, 1995. This accord, which incorporated and superseded previous agreements, broadened Palestinian self-government and provided for cooperation between Israel and the Palestinians in several areas.

Israeli Prime Minister Yitzhak Rabin was assassinated on November 4, 1995, by a right-wing Jewish radical, bringing the increasingly bitter national debate over the peace process to a climax. Subsequent Israeli governments continued to negotiate with the PLO resulting in additional agreements, including the Wye River and the Sharm el-Sheikh memoranda. However, a summit hosted by President Clinton at Camp David in July 2000 to address permanent status issues—including the status of Jerusalem, Palestinian refugees, Israeli settlements in the West Bank and Gaza, final security arrangements, borders, and relations and cooperation with neighboring states—failed to produce an agreement.

Following the failed talks, widespread violence broke out in Israel, the West Bank, and Gaza in September 2000. In April 2001 the Sharm el-Sheikh Fact Finding Committee, commissioned by the October 2000 Middle East Peace Summit and chaired by former U.S. Senator George Mitchell, submitted its report, which recommended an immediate end to the violence followed by confidence-building measures and a resumption of security cooperation and peace negotiations. Building on the Mitchell report, In April 2003, the Quartet (the U.S., UN, European Union (EU), and the Russian Federation) announced the "roadmap," a performance-based plan to bring about two states, Israel and a democratic, viable Palestine, living side by side in peace and security.

Despite the promising developments of spring 2003, violence continued and in September 2003 the first Palestinian Prime Minister, Mahmoud Abbas (Abu Mazen), resigned after failing to win true authority to restore law and order, fight terror, and reform Palestinian institutions. In response to the deadlock, in the winter of 2003-2004 Prime Minister Sharon put forward his Gaza disengagement initiative, proposing the withdrawal of Israeli settlements from Gaza as well as parts of the northern West Bank. President Bush endorsed this initiative in an exchange of letters with Prime Minister Sharon on April 14, 2004, viewing Gaza disengagement as an opportunity to move towards implementation of the two-state vision and begin the development of Palestinian institutions. In a meeting in May 2004 the Quartet endorsed the initiative, which was approved by the Knesset in October 2004.

The run-up to disengagement saw a flurry of diplomatic activity, including the February 2005 announcement of Lieutenant General William Ward as U.S. Security Coordinator; the March 2005 Sharon-Abbas summit in Sharm el-Sheikh; the return of Egyptian and Jordanian ambassadors to Israel; and the May 2005 appointment of former World Bank president James D. Wolfensohn as Special Envoy for Gaza Disengagement to work for a revitalization of the Palestinian economy after disengagement. Wolfensohn's direct involvement spurred Israeli-Palestinian agreement on the Gaza 'crossings" at Karni and Erez, on the demolition of settler homes, water, electricity, and communications infrastructure issues, as well as other issues related to the Palestinian economy.

On August 15, 2005, Israel began implementing its disengagement from the Gaza Strip, and the Israeli Defense Forces completed their withdrawal, including the dismantling of 17 settlements, on September 12. After broad recognition for Prime Minister Sharon's accomplishment at that fall's UN General Assembly, international attention quickly turned to efforts to strengthen Palestinian governance and the economy in Gaza. The United States brokered a landmark Agreement on Movement and Access between the parties in November 2005 to facilitate further progress on Palestinian economic issues. However, the terrorist organization Hamas—building on popular support for its "resistance" to Israeli occupation and a commitment to clean up the notorious corruption of the Palestinian Authority (PA)—took a majority in the January 2006 Palestinian Legislative Council (PLC) elections, with Hamas leader Ismail Haniya as Prime Minister. The Israeli leadership pledged not to work with a Palestinian government in which Hamas had a role.

Shortly following Hamas' PLC victory, the Quartet—comprised of the United States, European Union, United Nations. and Russia—outlined three basic principles the Hamas-led PA must meet in order for the U.S. and the international community to reengage with the PA: renounce violence and terror, recognize Israel, and respect previous agreements, including the roadmap. The Hamas-led PA government rejected these principles, resulting in a Quartet statement of "grave concern" on March 30, 2006 and the suspension of U.S. assistance to the PA, complete prohibition on U.S. Government contacts with the PA, and prohibition of unlicensed transactions with the PA government. The Palestine Liberation Organization (PLO) under the leadership of PLO Chairman and PA President Mahmud Abbas (Abu Mazen), by contrast, remained consistently committed to the Quartet principles.

Despite several negotiated cease-fires between Hamas and Fatah, violent clashes in the Gaza Strip—and to a lesser extent in the West Bank—were commonplace between December 2006 and February 2007 and resulted in dozens of deaths and injuries. In an attempt to end the intra-Palestinian violence, the King of Saudi Arabia invited Palestinian rivals to Mecca, and on February 9, 2007, Abbas and Hamas leader Haniya agreed to the formation of a Palestinian national unity government and a cessation of violence. Hamas' rejectionist policies and violent behavior continued despite the formation of the national unity government.

In June 2007, Hamas effectively orchestrated a violent coup in Gaza. Hamas also launched scores of Qassam rockets into southern Israel in an attempt to involve Israel in the Hamas-Fatah conflict. On June 14, Palestinian Authority President Mahoud Abbas exercised his lawful authority by declaring a state of emergency, dissolving the national unity government, and replacing it with a new government with Salam Fayyad as Prime Minister.

The new Palestinian Authority government under President Abbas and Prime Minister Fayyad has no elements controlled by Hamas or any other terrorist group. The new government is dedicated to peace and the Quartet principles and has been embraced politically and financially by the international community, including Israel.

GOVERNMENT

Israel is a parliamentary democracy. Its governmental system is based on several basic laws enacted by its unicameral parliament, the Knesset. The president (chief of state) is elected by the Knesset for a 5-year term.

The prime minister (head of government) exercises executive power and has in the past been selected by the president as the party leader most able to form a government. Between May 1996 and March 2001, Israelis voted for the prime minister directly. (The legislation, which required the direct election of the prime minister, was rescinded by the Knesset in March 2001.) The members of the cabinet must be collectively approved by the Knesset.

The Knesset's 120 members are elected by secret ballot to 4-year terms, although the prime minister may decide to call for new elections before the end of the 4-year term. Voting is for party lists rather than for individual candidates, and the total number of seats assigned each party reflects that party's percentage of the vote. Successful Knesset candidates are drawn from the lists in order of party-assigned rank. Under the present electoral system, all members of the Knesset are elected at large. The independent judicial system includes secular and religious courts. The courts' right of judicial review of the Knesset's legislation is limited. Judicial interpretation is restricted to problems of execution of laws and validity of subsidiary legislation. The highest court in Israel is the Supreme Court, whose judges are approved by the President.

Israel is divided into six districts, administration of which is coordinated by the Ministry of Interior. The Ministry of Defense is responsible for the administration of the occupied territories.

Principal Government Officials

Last Updated: 11/12/08

The country has a caretaker government until the selection of a new prime minister. The prime minister automatically assumes any ministerial position vacated until the official appointment of another minister.

Pres.: **Shimon PERES**
Prime Min.: **Ehud OLMERT**
Dep. Prime Min.: **Tzipora "Tzipi" LIVNI**
Vice Prime Min.: **Haim RAMON**
Min. of Agriculture & Rural Development: **Shalom SIMHON**
Min. of Communications: **Ariel ATIAS**
Min. of Defense: **Ehud BARAK**
Min. for Development of the Negev & Galilee: **Yaacov EDRI**
Min. of Education: **Yael "Yuli" TAMIR**
Min. of Environment: **Gideon EZRA**
Min. of Finance: **Roni BAR-ON**
Min. of Foreign Affairs: **Tzipora "Tzipi" LIVNI**
Min. of Health: **Yaacov BEN YIZRI**
Min. of Housing & Construction: **Zeev BOIM**
Min. of Immigrant Absorption: **Yaacov EDRI**
Min. of Industry, Trade, & Labor: **Eliyahu "Eli" YISHAI**
Min. of Interior: **Meir SHEETRIT**
Min. of Internal (Public) Security: **Avraham DICHTER**
Min. of Justice: **Daniel FRIEDMANN**
Min. of National Infrastructures: **Binyamin BEN ELIEZER**
Min. for Pensioner Affairs: **Rafael "Rafi" EITAN**
Min. of Religious Affairs: **Yitzhak COHEN**
Min. of Social Affairs: **Yitzhak HERZOG**
Min. of Science, Culture, & Sport: **Ghalib MAJADILAH**
Min. of Tourism: **Gideon EZRA**
Min. of Transportation & Road Safety: **Shaul MOFAZ**
Min. Without Portfolio: **Ruhama AVRAHAM**
Min. Without Portfolio: **Amichai "Ami" AYALON**
Min. Without Portfolio: **Yitzhak COHEN**
Min. Without Portfolio: **Meshulam NAHARI**
Attorney Gen.: **Menachem MAZUZ**

Governor, Bank of Israel: **Stanley FISCHER**
Ambassador to the US: **Salai MERIDOR**
Permanent Representative to the UN, New York: **Gabriela SHALEV**

Israel maintains an embassy in the United States at 3514 International Drive NW, Washington DC, 20008 (tel. 202-364-5500). There also are consulates general in Atlanta, Boston, Chicago, Houston, Los Angeles, Miami, New York, Philadelphia, and San Francisco.

POLITICAL CONDITIONS

From the founding of Israel in 1948 until the election of May 1977, Israel was ruled by successive coalition governments led by the Labor alignment or its constituent parties. From 1967-70, the coalition government included all of Israel's parties except the communist party. After the 1977 election, the Likud bloc, then composed of Herut, the Liberals, and the smaller La'am Party, came to power forming a coalition with the National Religious Party, Agudat Israel, and others. As head of Likud, Menachem Begin became Prime Minister. The Likud retained power in the succeeding election in June 1981, and Begin remained Prime Minister. In the summer of 1983, Begin resigned and was succeeded by his Foreign Minister, Yitzhak Shamir.

After Prime Minister Shamir lost a Knesset vote of confidence early in 1984, new elections in July provided no clear winner, with both Labor and Likud considerably short of a Knesset majority and unable to form even narrow coalitions. After several weeks of difficult negotiations, they agreed on a government of national unity, including the rotation of the office of Prime Minister and the combined office of Vice Prime Minister and Foreign Minister midway through the government's 50-month term. During the first 25 months of unity government rule, Labor's Shimon Peres served as Prime Minister, while Likud's Shamir held the posts of Vice Prime Minister and Foreign Minister, until they switched positions in October 1986. In November 1988 elections, Likud edged Labor out by one seat but was unable to form a coalition, producing another national unity government in January 1989. Yitzhak Shamir became Prime Minister, and Shimon Peres became Vice Prime Minister and Finance Minister. This government fell in March 1990, however, in a vote of no confidence precipitated by disagreement over the government's response to U.S. Secretary of State Baker's initiative in the peace process. Labor Party leader Peres was unable to attract sufficient support among the religious parties to form a government. Yitzhak Shamir then formed a Likud-led coalition government, including members from religious and right-wing parties.

Shamir's government took office in June 1990, and held power for 2 years. In the June 1992 national elections, the Labor Party reversed its electoral fortunes, taking 44 seats. Labor Party leader Yitzhak Rabin formed a coalition with Meretz (a group of three leftist parties) and Shas (an ultra-Orthodox religious party). The coalition included the support of two Arab-majority parties. Rabin became Prime Minister in July 1992, presiding over the signing of the Oslo accords with the Palestine Liberation Organization. However, Rabin was assassinated by a right-wing Jewish radical on November 4, 1995. Peres, then Deputy Prime Minister and Foreign Minister, once again became Prime Minister and immediately proceeded to carry forward the peace policies of the Rabin government and to implement Israel's Oslo commitments, including military redeployment in the West Bank and the holding of historic Palestinian elections on January 20, 1996.

Enjoying broad public support and anxious to secure his own mandate, Peres called for early elections after just 3 months in office. (They would have otherwise been held by the end of October 1996.) In late February and early March, a series of suicide bombing attacks by Palestinian terrorists took some 60 Israeli lives, seriously eroding public support for Peres and raising concerns about the peace process. Increased fighting in southern Lebanon, which also brought Katyusha rocket attacks against northern Israel, also raised tensions and weakened the government politically a month before the May 29 elections.

In those elections—the first direct election of a Prime Minister in Israeli history—Likud leader Binyamin Netanyahu won by a narrow margin, having sharply criticized the government's peace policies for failing to protect Israeli security. Netanyahu subsequently formed a right-wing coalition government publicly committed to pursuing the peace process, but with an emphasis on security and reciprocity.

In 1999, with a shrunken coalition and facing increasing difficulty passing legislation and defeating no-confidence motions, Netanyahu dissolved parliament and called for new elections. This time, the Labor candidate—Ehud Barak—was victorious. Barak formed a mixed coalition government of secular and religious parties, with Likud in the opposition. In May 2000, Barak fulfilled one of his major campaign promises by withdrawing Israeli forces from Southern Lebanon. However, by mid-autumn, with the breakdown of the Camp David talks and the worsening security situation caused by the new intifada, Barak's coalition was in jeopardy. In December, he resigned as Prime Minister, precipitating a new prime ministerial election.

In a special election on February 6, 2001, after a campaign stressing security and the maintenance of Israeli sovereignty over Jerusalem, Likud leader Ariel Sharon defeated Barak by over 20 percentage points. As he had promised in his campaign, Sharon formed a broad unity government that included the Labor and Likud parties, the far-right parties, some smaller secular parties, and several religious parties. The unity government collapsed in late 2002, and new elections were held in January 2003. Sharon again won, and formed a new government consisting

of his own Likud party, the right-wing National Religious Party and National Union party, and centrist Shinui.

The summer of 2004 saw renewed instability in the government, as disagreement over the Gaza disengagement plan resulted in Sharon's firing two ministers of the National Union Party and accepting the resignation of a third from the National Religious Party in order to secure cabinet approval of the plan (it was endorsed on June 6, 2004). Continuing divisions within the Likud on next steps then prompted Ariel Sharon to leave the party in November 2005 to form the Kadima ("Forward") party and call new elections for March 2006. However, Sharon was unexpectedly incapacitated in January 2006 due to a severe stroke and leadership of Kadima shifted to Acting Prime Minister Ehud Olmert, who on March 28 led the party to 29 seats in the Knesset. Labor came in second with 19 seats, and Shas and Likud tied with 12. After intensive coalition negotiations, a new, Kadima-led government, with Labor as "senior partner," was sworn in on May 4, 2006.

ECONOMY

Israel has a diversified, technologically advanced economy with substantial but decreasing government ownership and a strong high-tech sector. The major industrial sectors include high-technology electronic and biomedical equipment, metal products, processed foods, chemicals, and transport equipment. Israel possesses a substantial service sector and is one of the world's centers for diamond cutting and polishing. It also is a world leader in software development and, prior to the violence that began in September 2000, was a major tourist destination.

Israel's strong commitment to economic development and its talented work force led to economic growth rates during the nation's first two decades that frequently exceeded 10% annually. The years after the 1973 Yom Kippur War were a lost decade economically, as growth stalled and inflation reached triple-digit levels. The successful economic stabilization plan implemented in 1985 and the subsequent introduction of market-oriented structural reforms reinvigorated the economy and paved the way for rapid growth in the 1990s.

A wave of Jewish immigration beginning in 1989, predominantly from the countries of the former U.S.S.R., brought nearly a million new citizens to Israel. These new immigrants, many of them highly educated, now constitute some 13% of Israel's 6.7 million inhabitants. Their successful absorption into Israeli society and its labor force forms a remarkable chapter in Israeli history. The skills brought by the new immigrants and their added demand as consumers gave the Israeli economy a strong upward push and in the 1990s, they played a key role in the ongoing development of Israel's high-tech sector.

During the 1990s, progress in the Middle East peace process, beginning with the Madrid Conference of 1991, helped to reduce Israel's economic isolation from its neighbors and opened up new markets to Israeli exporters farther afield. The peace process stimulated an unprecedented inflow of foreign investment in Israel, and provided a substantial boost to economic growth in the region over the last decade. The onset of the intifada beginning at the end of September of 2000, the downturn in the high-tech sector and Nasdaq crisis, and the slowdown of the global economy have all significantly affected the Israeli economy. However, despite the recent conflicts in Gaza and Lebanon, the Israeli economy grew during 2006.

Israeli companies, particularly in the high-tech area, have in the past enjoyed considerable success raising money on Wall Street and other world financial markets; Israel ranks second to Canada among foreign countries in the number of its companies listed on U.S. stock exchanges. Israel's tech market is very developed, and in spite of the pause in the industry's growth, the high-tech sector is likely to be the major driver of the Israeli economy. Almost half of Israel's exports are high tech. Most leading players, including Intel, IBM, and Cisco have a presence in Israel.

Growth was an exceptional 6.2% in 2000, due in part to a number of one-time high tech acquisitions and investments. This exceptional year was followed by two years of negative growth of -0.9% and -1%, respectively, in 2001 and 2002. As a result of the security situation and the associated downturn in the economy, there was a significant rise in unemployment and wage erosion. This led to a decline in private consumption in 2002, the first time that there had been negative private consumption since the early 1980s. However, following growth rates of 1.7% in 2003 and 4.4% in 2004, the Israeli economy entered into a period of stabilization and recovery after the deep recession of 2001 and 2002. Since then, the Israeli economy seems to have returned to a trend of consistent growth. The Israeli economy grew by 5.2% in 2005 and GDP per capita (U.S. $17,800) increased by 3.3%. The Israeli economy grew by an estimated 4.8% in 2006.

Exports of goods and services in Israel grew by 7% in 2005. Service and agricultural exports each increased by more than 10% in 2005, whereas exports increased by 5.6% and imports rose to 4.4%. Tourism revenues increased by 22.7% as a result of the dramatic increase following the intifada's subsidence. Israel's private consumption increased by 4% in 2005. The largest growth in private consumption was in the purchase of clothing, footwear, and personal effects, which increased by 10.2%, following an increase of 5.4% in 2004. Consumption of consumer durables grew much more slowly than in 2004, with an increase of only 3.4%, compared with 14.3% the previous year.

In the Israeli business sector, business GDP grew by 6.6% in 2005. According to CBS statistics, the transportation, storage, and communications industries grew by 9.2%, following growth of 6.6% in 2004. The GDP of the wholesale, retail, restau-

rant, and hotel sector increased by 8.1%, up from 6.1% in 2004. The GDP of the finance and business services sector in 2005 increased by 6.4%, up from the previous year's 6.1% growth rate.

The general consensus among economists is that Israel's economy is very strong and that its growth potential is in the 4% to 5% range.

The United States is Israel's largest trading partner. In 2005, two-way trade totaled some $26.6 billion, up 12% from 2004. The U.S. trade deficit with Israel was $7.1 billion in 2005, up 33% from 2004, due largely to rising Israeli exports to the U.S. U.S. exports to Israel rose 6.1% in 2005 to $9.7 billion, making Israel our 19th largest export market for goods. The principal goods exported from the U.S. include civilian aircraft parts, telecommunications equipment, semiconductors, civilian aircraft, electrical apparatus, and computer accessories. Israel's chief exports to the U.S. include diamonds, pharmaceutical preparations, telecommunications equipment, medicinal equipment, electrical apparatus, and cotton apparel. The two countries signed a free trade agreement (FTA) in 1985 that progressively eliminated tariffs on most goods traded between the two countries over the following 10 years. An agricultural trade accord signed in November 1996 addressed the remaining goods not covered in the FTA but has not entirely erased barriers to trade in the agricultural sector. Israel also has trade and cooperation agreements in place with the European Union, Canada, Mexico, and other countries.

Best prospect industry sectors in Israel for U.S. exporters are electricity and gas equipment, defense equipment, medical instruments and disposable products, industrial chemicals, telecommunication equipment, electronic components, building materials/construction industries (DIY and infrastructure), safety and security equipment and services, non-prescription drugs, travel and tourism services, and computer software.

FOREIGN RELATIONS

In addition to seeking an end to hostilities with Arab forces, against which it has fought five wars since 1948, Israel has given high priority to gaining wide acceptance as a sovereign state with an important international role.

Before 1967, Israel had established diplomatic relations with a majority of the world's nations, except for the Arab states and most other Muslim countries. UN Security Council resolutions provided the basis for ceasefire and disengagement agreements concerning the Sinai and the Golan Heights between Israel, Egypt, and Syria and for promoting the Camp David accords and the Egyptian-Israeli Peace Treaty. The Soviet Union and the communist states of Eastern Europe (except Romania) broke diplomatic relations with Israel during the 1967 war, but those relations were restored by 1991.

The landmark October 1991 Madrid conference recognized the importance of Security Council Resolutions 242 and 338 in resolving regional disputes, and brought together for the first time Israel, the Palestinians, and the neighboring Arab countries, launching a series of direct bilateral and multilateral negotiations. These talks were designed to finally resolve outstanding security, border, and other issues between the parties while providing a basis for mutual cooperation on issues of general concern, including the status of refugees, arms control and regional security, water and environmental concerns, and economic development.

Today, Israel has diplomatic relations with 161 states. Following the signing of the Israel-PLO Declaration of Principles on September 13, 1993, Israel established or renewed diplomatic relations with 36 countries. Israel has full diplomatic relations with Egypt, Jordan, and Mauritania. In addition, on October 1, 1994, the Gulf States publicly announced their support for a review of the Arab boycott, in effect abolishing the secondary and tertiary boycotts against Israel. Israel has diplomatic relations with nine non-Arab Muslim states and with 32 of the 43 Sub-Saharan states that are not members of the Arab League. Israel established relations with China and India in 1992 and with the Holy See in 1993.

DEFENSE

Israel's ground, air, and naval forces, known as the Israel Defense Force (IDF), fall under the command of a single general staff. Conscription is universal for Jewish men and women over the age of 18, although exemptions may be made on religious grounds. Druze, members of a small Islamic offshoot living in Israel's mountains, also serve in the IDF. Israeli Arabs, with the exception of some Bedouins, do not serve.

During 1950-66, Israel spent an average of 9% of GDP on defense. Real defense expenditures increased dramatically after both the 1967 and 1973 wars. Military spending in 2005 totaled $9.45 billion, which is equivalent to 7.7% of GDP, and represents 16.3% of government expenditures. The United States provides approximately $2.4 billion per year in security assistance.

In 1983, the United States and Israel established the Joint Political Military Group, which meets twice a year. Both the U.S. and Israel participate in joint military planning and combined exercises, and have collaborated on military research and weapons development.

U.S.-ISRAELI RELATIONS

Commitment to Israel's security and well being has been a cornerstone of U.S. policy in the Middle East since Israel's founding in 1948, in which the United States played a key supporting role. Israel and the United States are bound closely by historic and cultural ties as well as by mutual interests. Continuing U.S. economic and security assistance to Israel

acknowledges these ties and signals U.S. commitment. The broad issues of Arab-Israeli peace have been a major focus in the U.S.-Israeli relationship. U.S. efforts to reach a Middle East peace settlement are based on UN Security Council Resolutions 242 and 338 and have been based on the premise that as Israel takes calculated risks for peace the United States will help minimize those risks.

On a bilateral level, relations between the United States and Israel are continually strengthening in every field. In addition to the Joint Political-Military Group described above, there are: bilateral science and technology efforts (including the Binational Science Foundation and the Binational Agricultural Research and Development Foundation); the U.S.-Israeli Education Foundation, which sponsors educational and cultural programs; the Joint Economic Development Group, which maintains a high-level dialogue on economic issues; the Joint Counterterrorism Group, designed to enhance cooperation in fighting terrorism; and a high-level Strategic Dialogue that meets biannually.

TRAVEL

Consular Information Sheet

February 8, 2008

Country Description: The State of Israel is a parliamentary democracy with a modern economy. Tourist facilities are widely available. Travelers may visit the website of the Israeli Ministry of Tourism for tourist information at http://www.goisrael.com. Israel occupied the West Bank, Gaza Strip, Golan Heights, and East Jerusalem as a result of the 1967 War. Pursuant to negotiations between Israel and the Palestinians, the Palestinian Authority (PA) exercises jurisdiction over the Gaza Strip and parts of the West Bank. Palestinian Authority police are responsible for keeping order in those areas, and the PA exercises a range of civil functions there. The division of responsibilities and jurisdiction in the West Bank between Israel and the PA is complex. Definitive information on entry, customs requirements, arrests, and other matters in the West Bank and Gaza is subject to change without prior notice or may not be available.

Entry Requirements: The general entry and exit requirements for Americans traveling to Israel, the West Bank and Gaza are listed below. American citizens may be subject to special restrictions. American citizens are advised to read all sections of this sheet very carefully for special regulations that may affect their travel.

U.S. citizens who are also citizens of Israel must enter and depart Israel, the West Bank, and Gaza using their current Israeli passport. Israeli authorities require that U.S. citizens who have a Palestinian identification number, or who may have acquired a Palestinian identification number via their parents or grandparents, to enter and exit Israel, the West Bank and Gaza using their Palestinian Authority passport. Without the Palestinian Authority or Israeli passport, these Americans may be denied from entering or exiting Israel, the West Bank or Gaza, or may face serious delays at the ports of entry.

Individuals with a Palestinian Authority identity number, including American citizens, are required by Israeli authorities to enter the West Bank through the Allenby border crossing. They are not permitted by Israeli authorities to enter Israel through Ben Gurion International Airport unless they obtain in advance a transit permit for that purpose.

U.S. citizens are advised that all persons applying for entry to Israel, the West Bank, or Gaza are subject to security and criminal screening by the Government of Israel, and may be denied entry or exit without explanation.

American citizens who feel they have been wrongly denied entry to Israel or the West Bank should fill out the Denial of Entry Sheet which can be retrieved under the U.S. citizen services tab at the Jerusalem Consulate General's web site at http://jerusalem.usconsulate.gov.

Israel: A passport valid for six months beyond duration of stay, an onward or return ticket, and proof of sufficient funds are required for entry. A no-charge, three-month visa may be issued upon arrival and may be renewed. Travelers carrying official or diplomatic U.S. passports must obtain visas from an Israeli embassy or consulate prior to arrival. Anyone who has been refused entry, experienced difficulties with his/her status during a previous visit, overstayed the authorized duration of a previous visit, or otherwise violated the terms of their admission to Israel should consult the Israeli Embassy or nearest Israeli Consulate before attempting to return. Anyone seeking returning resident status must obtain permission from Israeli authorities before traveling. The Government of Israel at times has declined to admit American citizens wishing to visit or travel to the West Bank or Gaza. Persons denied entry who seek immigration court hearings to contest such denials may be detained for prolonged periods while awaiting a hearing.

The Gaza Strip: The Department of State urges U.S. citizens to avoid all travel to the Gaza Strip, which is under the control of Hamas, a terrorist organization. American citizens in Gaza are advised to depart immediately. Please contact the U.S. Consulate in Jerusalem for additional assistance if necessary. See the latest Travel Warning for Israel, the West Bank and Gaza for the latest information concerning travel to the Gaza Strip. Private vehicles may not cross from Israel into Gaza or from Gaza into Israel. The Rafah border crossing between Gaza and Egypt and the Gaza Airport remain closed.

The West Bank: On March 4, 2007, the Government of Israel published a new West Bank visitor visa policy for foreign nationals. The policy states that the following are permitted foreign visitor categories:

- Spouses of resident Palestinians registered in the West Bank population registry;
- Children (up to age 16) of resident Palestinians;
- Business people, investors, and bearers of West Bank work permits;
- Staff of foreign missions in the West Bank;
- Representatives of international organizations in the West Bank;
- Lecturers and consultants;
- Humanitarian cases and others.

According to the written policy, American citizens "may transit to the West Bank via Israel after showing documents at the Ben Gurion airport or Allenby Bridge [crossing between the West Bank and Jordan] that confirm their status/position and the purpose of their visit, subject to inspection and approval by a representative of the Coordinator for Government Activities in the Territories."

For extensions of visas of American citizens in the West Bank, the Government of Israel's policy states:

The following categories may request to extend their visa after the initial period for an additional period of up to one year (and no longer than 27 months total):

- Spouses of resident Palestinians registered in the West Bank population registry;
- Children up to the age of 16 of resident Palestinians;
- Businesspersons/investors/bearers of a working permit for the West Bank;
- Humanitarian cases and others.

In order to extend the visa, they must apply to the Palestinian Population Registry in Ramallah. In special cases, they should turn to the Population Registry of the Israeli Ministry of Interior in Beit-El.

The following categories may request an extension of their visa after the initial period for an additional period of up to 6 months (and no longer than a total of 27 months:

- Staff of foreign missions in the West Bank;
- Representatives of international organizations in the West Bank.

In order to extend the visa, they must apply to the Head of the International Organization Department in the Israeli Civil Administrationat Beit El or to the Population Registry of the Israeli Ministry of Interior."

Finally, the Government of Israel policy notes:

Foreign citizens whose passports were stamped recently with the words "Last Permit" in the recent months may nonetheless leave the West Bank and submit a new visa request. The arrangements set out in this document are subject to imperative considerations of policy and security as may be applicable in Entry of individuals into Israel and the West Bank remains subject to security/criminal assessment by the relevant authorities.

U.S. citizens who have a Palestinian Authority ID number or who the Government of Israel considers to have residency status in the West Bank or Gaza are advised to read very carefully the next section, entitled Palestinian-Americans.

Palestinian Americans: It is possible that an American citizen born in the United States whose parents were born or lived in the West Bank or Gaza would be considered a resident of the West Bank or Gaza by Israeli authorities. Israeli authorities may consider American citizens to be residents of the West Bank or Gaza if there were born there, lived there, or

have a Palestinian ID number. The Government of Israel requires residents of the West Bank or Gaza to present valid Palestinian Authority travel documents when entering or leaving Israel. This requirement specifically applies to American citizens considered by the Government of Israel to be resident in the West Bank or Gaza, although in practice it often applies to transient visitors as well. American citizens resident in the West Bank or Gaza who arrive at any Israeli border point without a Palestinian passport will usually be granted permission to travel to the West Bank or Gaza to obtain one.

Individuals with a Palestinian Authority identity number, including American citizens, are required to enter the West Bank through the Allenby border crossing and Gaza through the Rafah border crossing when it is operational. They are not permitted to enter Israel through Ben Gurion International Airport unless they obtain in advance a transit permit for that purpose which is rarely issued and can be expensive and inconvenient. Permit applications must be submitted at least three working days prior to departure, although Israeli authorities may take considerably longer to render a decision. In practice, except in humanitarian or special interest cases Israeli authorities are unlikely to grant this permit. In the event a permit is denied, individuals with a Palestinian Authority identity number, including American citizens, must exit the West Bank via the crossing at Allenby Bridge into Jordan and from Gaza via the Rafah crossing into Egypt when it is operational. Specific questions may be addressed to the nearest Israeli Embassy or Consulate or, within Israel, the nearest office of the Ministry of the Interior. During periods of heightened security restrictions, American citizens with residency status in the West Bank or Gaza might not be allowed to enter or exit Gaza or the West Bank at all, even with an American passport.

Israel-Jordan Crossings: International crossing points between Israel and Jordan are the Arava crossing (Wadi al-'Arabah) in the south, near Eilat, and the Jordan River crossing (Sheikh Hussein Bridge) in the north, near Beit Shean. American citizens using these two crossing points to enter either Israel or Jordan need not obtain prior visas, but will have to pay the following fees:

- Jordan River Crossing: Israeli exit fee of 68 NIS/US $15, Jordanian entry fee 5 Jordanian dinars
- Arava crossing: exit fee of 68 NIS/US $15, entry fee of 5 Jordanian dinars

Visas should be obtained in advance for those wanting to cross the Allenby Bridge between Jordan and the West Bank. The Government of Israel requires that Palestinian Americans with residency status in the West Bank enter Jordan via the Allenby Bridge. Procedures for all three crossings into Jordan are subject to frequent changes. Persons with residency status in the West Bank or Gaza seeking to cross the Allenby Bridge from Jordan should contact the Jordanian authorities for information concerning special clearance procedures for Palestinian ID holders before traveling to the bridge. Visit the Embassy of Israel website at: http://www.israelemb.org for the most current visa information.

Safety and Security: Israeli authorities strictly enforce security measures. American citizen visitors have been subjected to prolonged questioning and thorough searches upon entry or departure by Israeli authorities. Travelers (including American citizens) with Arabic surnames, those who ask that Israeli stamps not be entered into their passports, and unaccompanied female travelers have been delayed and subjected to close scrutiny by Israeli border authorities. American citizens have been detained and/or arrested at the airport and at other border crossings on suspicion of security-related crimes and members of religious groups have been monitored, arrested, and deported for suspicion of intent to commit violent or disruptive acts in Israel. In some cases, Israeli authorities have denied American citizen's access to U.S. consular officers, lawyers, and even family members during temporary detention.

Security-related delays are not unusual for travelers carrying cameras or electronic equipment, and some have had their laptop computers and other electronic equipment confiscated at Ben Gurion Airport. While most effects are returned prior to the traveler's departure, some equipment has been retained by the authorities for lengthy periods and has reportedly been damaged, destroyed or lost. Americans who have had personal property damaged due to security procedures at Ben Gurion can contact the Commissioner of Complaints at the airport for redress.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site, where the current Travel Warning for Israel, the West Bank and Gaza, Worldwide Caution Travel Alert, Middle East and North Africa Travel Alert, and other Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada or, for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Terrorism: U.S. citizens, including tourists, students, residents, and U.S. mission personnel, have been injured or killed by terrorists while in Israel, Jerusalem, the West Bank and Gaza. Attacks have occurred in highly frequented shopping and pedestrian areas and on public buses. U.S. Embassy and Consulate General American employees and their families are prohibited from using public buses and trains.

American citizens should use good judgment and exercise caution when visiting public areas and using transportation facilities to minimize exposure to possible terrorist attacks. Strategies to minimize risk include: avoiding demonstrations and large crowds, being aware of one's immediate surroundings, especially while visiting contentious religious sites,

military areas, and establishments frequented by off-duty soldiers, and by avoiding suspicious objects.

Kidnapping: In the past, armed gunmen have kidnapped foreigners, including several Americans, in Gaza and the West Bank. Gunmen in negotiations with the Palestinian Authority have sometimes used such foreign hostages as bartering tools. The threat of hostage-taking remains a primary concern for Americans and foreigners within the Gaza Strip. Any Americans traveling to Gaza in spite of the Department of State's Travel Warning urging no travel to Gaza should register with the American Consulate General in Jerusalem prior to entry and maintain a very low profile while moving within Gaza. They should also have the telephone numbers of the U.S. Consulate General at hand for rapid contact in the event of an emergency. However, the ability of the Consulate to provide service to Americans in Gaza is extremely limited; private American citizens should avoid travel to these areas.

Demonstrations and Civil Unrest: In the West Bank, Gaza and Jerusalem, demonstrations or altercations can occur spontaneously and have the potential to become violent without warning. If such disturbances occur, American visitors should leave the area immediately. In Jerusalem's Old City, where exits are limited, American visitors should seek safe haven inside a shop or restaurant until the incident is over. Demonstrations are particularly dangerous in areas such as checkpoints, settlements, military areas, and major thoroughfares where protesters are likely to encounter Israeli security forces.

Areas of Instability: U.S. Government personnel in Israel and Jerusalem, whether stationed there or on temporary duty, are under tight security controls, as noted below. In addition, they occasionally may be prohibited from traveling to sections of Jerusalem and parts of Israel depending on prevailing security conditions.

Jerusalem: In Jerusalem, travelers should exercise caution at religious sites on holy days, Fridays, Saturdays, and Sundays, and dress appropriately when visiting the Old City and ultra-orthodox Jewish neighborhoods. Most roads into ultra-orthodox Jewish neighborhoods are blocked off on Friday nights and Saturdays. Assaults on secular visitors, either for being in cars or for being "immodestly dressed," have occurred in these neighborhoods. Isolated street protests and demonstrations can occur in the commercial districts of East Jerusalem (Salah Ed-Din Street and Damascus Gate areas) during periods of unrest. U.S. Government American employees are authorized to travel to the Old City and the Mount of Olives during daylight hours only. Although few security incidents have occurred recently within the Old City, visitors are urged to exercise caution and be aware of their surroundings at all times. This is especially true when entering or exiting the Old City at times when the volume of pedestrian traffic could create difficulties.

There have been reports of harassment of tourists by vendors in many tourist areas of Jerusalem including, in particular, the Mount of Olives.

West Bank and Gaza: For safety and security reason, U.S. Government American personnel and dependents are prohibited from traveling to any cities, towns or settlements in the West Bank, except for mission-essential business or other approved purposes. Jericho, as distinct from other areas in the West Bank, is under the full security responsibility of the Palestinian Authority. Violence in recent years has decreased markedly in Jericho and, since the PA's assumption of security responsibility for Jericho in February 2005, the level of violence there has remained low compared to other parts of the West Bank. For limited, personal travel, U.S. government personnel and family members are permitted to travel through the West Bank, using only Routes 1 and 90, to reach the Allenby/King Hussein Bridge or the Dead Sea coast near Ein Gedi and Masada. Each such transit requires prior notification to the Consulate General's security office and must occur during daylight hours. U.S. Government personnel and family members are permitted personal travel on Route 443 between Modi'in and Jerusalem during daylight hours only.

Travel to the Gaza Strip by U.S. Government personnel is prohibited. Under policy guidance issued by the Secretary of State, exceptions to the prohibition on Gaza travel are only for official, mission-critical travel. Private American citizens also should avoid travel to these areas.

During periods of unrest, the Israeli Government sometimes closes off access to the West Bank and Gaza, and those areas may be placed under curfew. All persons in areas under curfew should remain indoors or risk arrest or injury. Americans have been killed, seriously injured, detained and deported as a result of encounters with Israeli Defense Forces operations in Gaza and the West Bank. Travel restrictions may be imposed with little or no warning. Strict measures have frequently been imposed following terrorist actions, and the movement of Palestinian Americans, both those with residency status in the West Bank or Gaza as well as foreign passport holders, has been severely impeded. Due to current limitations on travel by U.S. Government employees to the West Bank and Gaza made necessary by uncertain security conditions, the ability of consular staff to offer timely assistance to American citizens in need in these areas is considerably reduced at present.

Golan Heights: There are live land mines in many areas and visitors should walk only on established roads or trails. Near the northern border of Israel, rocket attacks from Lebanese territory can occur without warning.

Crime: The crime rate is moderate in Israel, Jerusalem, and the West Bank. Incidents of organized, violent crime, residential break-ins and petty theft have increased in Gaza since Israel's disengagement in September 2005. In addition, break-ins of parked vehicles are common at beach areas,

the Dead Sea, and national parks (especially Caesarea National Park). U.S. citizens should not leave their valuables in unattended cars in these areas. There has also been a significant upsurge in non-violent home invasions. U.S. citizens resident in Israel have had jewelry, cash, vehicles, and their personal documentation and belongings stolen at all hours.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The Government of Israel provides assistance to victims of terrorist acts. Please use this link to the National Insurance Institute for more information: http://www.btl.gov.il.

Medical Facilities and Health Information: Modern medical care and medicines are available in Israel. Some hospitals in Israel and most hospitals in the West Bank and Gaza, however, fall below U.S. standards. Travelers can find information in English about emergency medical facilities and after-hours pharmacies in the "Jerusalem Post" and the English language edition of "Ha'aretz" newspapers. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Also, please see the Department of State's Avian Flu Fact Sheet. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Israel, the West Bank and Gaza is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Israeli roads and highways tend to be crowded, especially in urban areas. Aggressive driving is a serious problem and few drivers maintain safe following distances. Drivers should use caution, as Israel has an extremely high rate of fatality from automobile accidents.

U.S. Embassy Tel Aviv and Consulate General Jerusalem American employees and their families have been prohibited from using public buses.

The Government of Israel requires that all passenger car occupants use their seat belts at all times and that headlights be used during all intercity travel, both day and night, during winter. Since January 1, 2006, all drivers are required to carry fluorescent vests in the car with them at all times, and they are required to wear these vests whenever they get out of their cars to make repairs, change tires, etc. If a vehicle is stopped for a traffic violation and it does not contain a fluorescent vest, the driver will be fined. These vests can be purchased for a nominal price in all local gas stations. Cellular phone use is prohibited while driving.

West Bank and Gaza: Crowded roads and aggressive driving are common in the West Bank and Gaza. During periods of heightened tensions, cars with Israeli license plates have been stoned and fired upon. Emergency services may be delayed by the need for Palestinian authorities to coordinate with Israeli officials. Seat belt use is required outside of cities and drivers may not drink alcohol. Individuals involved in accidents resulting in death or injury may be detained by police pending an investigation.

Visit the website of the Israeli Ministry of Tourism and national authority responsible for road safety at http://www.goisrael.com.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Israel's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Israel's air carrier operations. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Special Circumstances: Video cameras and other electronic items must be declared upon entry to Israel and are sometimes seized by Israeli customs and security officials and returned either damaged and/or after a lengthy delay. It is advisable to contact the Embassy of Israel in Washington, D.C. or one of Israel's consulates in the United States for specific information regarding customs requirements. Definitive information on customs requirements for the Palestinian Authority is not available.

Arrests and Detentions: U.S. citizens arrested by the Israeli National Police (INP) in Israel and charged with crimes are entitled to legal representation provided by the Israeli Government and to consular notification and visitation. In some cases, there are significant delays between the time of arrest and the time when the INP notifies the Embassy or Consulate General and grants consular access. This is particularly true in the arrest of dual American-Israeli and American-Palestinian citizens. This procedure may be expedited if the arrested American shows a U.S. passport to the police and asks the police or prison authority to contact the U.S. Embassy or Consulate General. When access to a detained American citizen is denied or delayed, the U.S. Government formally protests the lack of consular access to the Israeli Government.

U.S. citizens arrested by the Israeli Security Police for security offenses, and U.S. citizens arrested in the West Bank or Gaza for criminal or security offenses may be prevented from communicating with lawyers, family members, or consular officers for lengthy periods. The U.S. Consulate General and the Embassy are often not notified of such arrests, or are not notified in a timely manner. Consular access to the arrested individual is frequently delayed. Arrestees have been subject to mistreatment during interrogation and pressured to sign statements in Hebrew that have not been translated. Under local law they may be detained for up to six months at a time without charges. Youths over the age of 14 have been detained and tried as adults. The U.S. Government will formally protest any report of mistreatment to the relevant authorities.

U.S. citizens arrested by the Palestinian Authority (PA) Security Forces in the West Bank for crimes are entitled to legal representation and consular notification and access. The PA Security Forces normally notify the Consulate General of non-security related arrests for criminal offenses within two days of arrest, and consular access is normally granted within four days. This procedure may be expedited if the arrested American shows a U.S. passport to the police, or asks the police to contact the U.S. Consulate General.

U.S. citizens arrested by the PA Security Forces in the West Bank for security offenses may be prevented from communicating with lawyers, family members, or consular officers for lengthy periods. In addition, they may be held in custody for protracted periods without formal charges or before being taken in front of a judge for an arrest extension. The PA often does not notify the U.S. Consulate General of arrests in a timely manner, and consular access to arrestees is occasionally delayed. Since Hamas seized control of the Gaza Strip in June 2007, their Executive Forces (EF) have dominated security matters there. The United States Government has no contact with the EF.

Dual Nationality: Israeli citizens naturalized in the United States retain their Israeli citizenship, and children born in the United States to Israeli parents usually acquire both U.S. and Israeli nationality at birth. Israeli citizens, including dual nationals, are subject to Israeli laws requiring service in Israel's armed forces, as well as other laws pertaining to passports and nationality. American-Israeli dual nationals of military age who do not wish to serve in the Israeli armed forces should contact the Israeli Embassy in Washington, D.C. to learn more about an exemption or deferment from Israeli military service before going to Israel. Without this exemption or deferment document, they may not be able to leave Israel without completing military service or may be subject to criminal penalties for failure to serve. Israeli citizens, including dual nationals, must enter and depart Israel on their Israeli passports, and Israeli authorities may require persons whom they consider to have acquired Israeli nationality at birth to obtain an Israeli passport prior to departing Israel.

Bearers of Palestinian passports or identity numbers who have become naturalized United States citizens are considered by the Israeli government to retain their Palestinian nationality, and Israeli authorities will view them as Palestinians first, and as American citizens second. Palestinian Americans whom the Government of Israel considers residents of the West Bank or Gaza may face certain travel restrictions. These individuals are subject to restrictions on movement between Israel, the West Bank and Gaza and within the West Bank and Gaza that are imposed by the Israeli Government on all Palestinians for security reasons. During periods of heightened security concerns these restrictions can be onerous. Palestinian-American residents of Jerusalem are normally required to use laissez-passers (travel documents issued by the Israeli Government) that contain reentry permits approved by the Israeli Ministry of Interior for any out-of-country travel. All U.S. citizens with dual nationality must enter the U.S. on their U.S. passports.

Court Jurisdiction: Civil courts in Israel actively exercise their authority to bar certain individuals, including nonresidents, from leaving the country until monetary and other legal claims against them can be resolved. Israel's rabbinical courts exercise jurisdiction over all Jewish citizens and residents of Israel in cases of marriage, divorce, child custody and child support. In some cases, Jewish-Americans who entered Israel as tourists have become defendants in divorce cases filed by their spouses in Israeli rabbinical courts. These Americans have been detained in Israel for prolonged periods while the Israeli courts consider whether the individuals have sufficient ties to Israel to establish rabbinical court jurisdiction. Jewish-American visitors should be aware that they might be subject to involuntary and prolonged stays in Israel if a case is filed against them in a rabbinical court, even if their marriage took place in the U.S. and regardless of whether their spouse is present in Israel.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United

States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than those in the United States for similar offenses. Persons violating Israel's or the Palestinian Authority's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Israel and Palestinian Authority administered areas are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy and Consulate Locations: Americans living or traveling in Israel, the West Bank or Gaza are encouraged to register with the U.S. Embassy in Tel Aviv or the Consulate General in Jerusalem through the State Department's travel registration website, and to obtain updated information on travel and security within Israel, the West Bank or Gaza. Americans without Internet access may register directly with the U.S. Embassy or Consulate General. By registering, American citizens make it easier for the Embassy or Consulate General to contact them in case of emergency.

The U.S. Embassy is located at 71 Hayarkon Street in Tel Aviv. The U.S. mailing address is Unit 7228, Box 0001, APO AE 09830. The telephone number is (972)(3) 519-7575. The number after 4:30 p.m. and before 8:00 a.m. local time is (972)(3) 519-7551. The fax number is (972)(3) 516-4390. The Embassy's e-mail address is amctelaviv@state.gov and its Internet web page is http://telaviv.usembassy.gov.

The Consular Section of the U.S. Embassy should be contacted for information and help in the following areas: Israel, the Golan Heights and ports of entry at Ben Gurion Airport, Haifa Port, the northern (Jordan River) and southern (Arava) border crossings connecting Israel and Jordan, and the border crossings between Israel and Egypt.

The Consular Section of the U.S. Consulate General in Jerusalem is located at 27 Nablus Road in Jerusalem. The U.S. mailing address is Unit 7228, Box 0039, APO AE 09830. The telephone number is (972)(2) 622-7200. The Consular Section's public telephone number for information and assistance is (972)(2) 628-7137, Monday through Friday from 8:00 a.m. to 12:00 p.m. Messages may be left at that number at other times. The emergencies only number after 4:30 p.m. and before 8:00 a.m. local time is (972)(2) 622-7250. The Consular Section's fax number is (972)(2) 627-2233. The Consulate's e-mail address is jerusalemacs@state.gov and its Internet web page is http://jerusalem.usconsulate.gov.

The U.S. Consulate General should be contacted for information and help in the following areas: West and East Jerusalem, the Gaza Strip, the West Bank, the Allenby Bridge border crossing connecting Jordan with the West Bank, and the Rafah border crossing between Gaza and Egypt.

A U.S. Consular Agent who reports to the Embassy in Tel Aviv maintains an office in Haifa at 26 Ben Gurion Boulevard, telephone (972)(4) 853-1470. The Consular Agent can provide both routine and emergency services in the northern part of Israel.

Travel Warning

September 26, 2008

This Travel Warning updates information on the general security environment in Israel, the West Bank, and the Gaza Strip, and reminds American citizens of threats to themselves and to U.S. interests in those locations. The Department of State urges U.S. citizens to remain mindful of security factors when planning travel to Israel. In addition, the Department of State urges U.S. citizens to defer travel to the West Bank and to avoid all travel to the Gaza Strip. This warning supersedes the Travel Warning issued March 19, 2008.

The Gaza Strip: Conflict and violence can occur and spread rapidly and Unpredictably in the Gaza Strip. The State Department strongly recommends that American citizens refrain from all travel to the Gaza strip and that those already in Gaza depart immediately. This recommendation has been in effect since the deadly roadside bombing of a U.S. Embassy convoy in Gaza in October 2003. It applies to all Americans, including journalists and aid workers. No official travel is permitted inside the Gaza Strip at this time.

Hamas, a State Department-designated foreign terrorist organization, violently assumed control over Gaza in June 2007, making worse the already dangerous security situation there. Although a ceasefire between Israel and Hamas went into effect June 19, 2008, the Gaza Strip continues to be a potential center of violence between Israeli security forces and Palestinian terrorist groups. Militants there have abducted Western citizens, and terrorist organizations have threatened attacks against U.S. interests. The American International School in northern Gaza has been the target of repeated attacks. Despite the ceasefire, Hamas and Islamic Jihad (another designated foreign terrorist organization) still occasionally launch rocket attacks against Israeli towns as far north as Ashkelon. The Israeli Defense Forces (IDF) retains the option of responding to these attacks with military force. In addition, Hamas uses violence against other Palestinian factions in Gaza, and innocent civilians are at times the victims.

The security environment is very fluid in the vicinity of the Gaza Strip, and the ceasefire could collapse with little or no advance warning. Rocket and mortar launches into Israel are unpredictable, resulting in a potentially unsafe situation. Gunfire from Gaza into Israel is a danger. Palestinian snipers have killed individuals

within rifle range of the Gaza border. As a result, travel in the surrounding area is strongly discouraged. Due to the continued high level of tensions and violence in and near the Gaza Strip, all U.S. Embassy and Consulate General employees are required to provide 24 hours advance notice of any official travel to the city of Sderot, crossing points into Gaza, and to any other areas bordering Gaza. American citizens should be aware that as a consequence of the prohibition on travel by U.S. Government employees to the Gaza Strip, the ability of consular staff to offer timely assistance to U.S. citizens there is extremely limited.

The West Bank: The security environment in the West Bank remains volatile. Violent demonstrations, kidnappings and shootings are unpredictable and can occur without warning. The Department of State urges Americans to defer travel to the West Bank at this time.

The IDF continues to carry out security operations in the West Bank, including nighttime raids to arrest terrorist suspects that sometimes result in gun battles. Israeli security operations can occur at any time, including frequent raids to arrest terrorist suspects that result in shootings, demonstrations and often violent conflict. This heightens the risk of Americans being caught in the middle of potentially dangerous situations. Some Americans and Europeans involved in demonstrations and other such activities in the West Bank have become involved in confrontations with Israeli settlers and the IDF. The State Department recommends that Americans, for their own safety, avoid demonstrations.

All those who pass through the West Bank should exercise particular care when approaching and transiting Israeli military checkpoints. Travelers should be aware that they might encounter delays and difficulties, and might even be denied passage through a checkpoint.

American citizens should be aware that, as a consequence of the current limitations on official travel to the West Bank, the ability of consular staff to offer timely assistance to U.S. citizens there is limited.

Travel Restrictions for U.S. Government Personnel: All American U.S. Government personnel and their dependents are prohibited from traveling to any cities, towns or settlements in the West Bank, except when they are on mission-essential business or are traveling for other mission-approved purposes. For limited, personal travel, U.S. government personnel and family members are

Permitted to travel through the West Bank only by using Routes 1 and 90 to reach the Allenby/King Hussein Bridge or the Dead Sea coast near Ein Gedi and Masada. They are also permitted to travel north on Route 90 from the Allenby/King Hussein Bridge to the Sea of Galilee. Use of these routes is approved for transit only, with stops permitted only at Qumran National Park off Route 90 by the

Dead Sea. Each such transit requires prior notification to the Consulate General's security office and must occur during daylight hours. U.S. Government personnel and family members are permitted both official and personal travel on Route 443 between Modi'in and Jerusalem without prior notification, during daylight hours only.

General Safety and Security: Israeli authorities remain concerned about the continuing threat of terrorist attacks. In September 2008, a vehicle plowed into a group of Israeli soldiers on a traffic island near a Jerusalem square, injuring more than a dozen. Two fatal bulldozer attacks on civilians in July 2008 and a March 2008 shooting, all in Jerusalem, and a February 2008 bombing in Dimona are reminders of the precarious security environment. The threat of such attacks is on-going. American citizens are cautioned that a greater danger may exist in the vicinity of restaurants, businesses and other places associated with U.S. interests and/or located near U.S. official buildings, such as the U.S. Embassy in Tel Aviv and the U.S. Consulate General in Jerusalem. Rocket fire from Lebanon into Israel, except for one recent incident, has ceased since the end of military hostilities between Israel and Hizbollah forces in southern Lebanon in the summer of 2006. Although Israel denied any involvement, the killing of a Hizbollah leader in Syria on February 12, 2008, raises the possibility of Hizbollah attacks against Israel.

American citizens are urged to exercise a high degree of caution and common sense when patronizing restaurants, nightclubs, cafes, malls, places of worship, and theaters—especially during peak hours. Large crowds and public gatherings have been targeted by terrorists in the past and should be avoided to the extent practicable. American citizens should take into consideration that public buses, trains, and their respective terminals are "off-limits" to U.S. Government personnel.

The State Department urges American citizens to remain vigilant while traveling throughout Jerusalem, especially within the commercial and downtown areas of West Jerusalem and the city center. Israeli security services report that they continue to receive information of planned terrorist attacks in and around Jerusalem.

Spontaneous or planned protests within the Old City are possible, especially after Friday prayers. Some of these protests have led to violent clashes. The Old City of Jerusalem is off-limits to U.S. Government personnel and their family members after dark during the entire week and between the hours of 11 am and 2 pm on Fridays.

Entry/Exit Difficulties: The Government of Israel considers American citizens who also hold Israeli citizenship or have a claim to such dual nationality to be Israeli citizens for immigration and other legal purposes. For example, an American citizen child of an Israeli parent will be considered an Israeli citizen by Israeli immigration officials and Israeli law will apply to the child's travel to, and departure from, Israel.

American citizens whom Israeli authorities determine to be of Arab origin are likely to face additional, often time-consuming, and probing questioning by immigration and border authorities, or may even be denied entry into Israel. If they are determined by Israeli authorities to have a claim to residency status in the West Bank or Gaza, or to have a claim to a Palestinian identification number, such American citizens may be required by the Government of Israel to use a Palestinian Authority travel document to transit Israel to enter the West Bank or Gaza. Such a determination could be made for American citizens if they or their immediate family members were born in the West Bank or Gaza, currently reside there, or lived there for any appreciable amount of time.

American citizens who hold a Palestinian Authority ID, as well as persons judged by the Israeli authorities to have claim to a Palestinian Authority ID, will be considered subject to Israeli law and to regulations that Israel applies to residents of the West Bank and Gaza, regardless of the fact that they hold U.S. citizenship. A Palestinian ID number might be active or inactive. If active, the Government of Israel may stamp the Palestinian Identification Number in the U.S. passport, and the American citizen may be required to obtain Palestinian Authority travel documents prior to departing Israel. In addition, American citizens having or eligible for a

Palestinian Authority ID who entered Israel via Ben Gurion Airport might be required to depart via the Allenby Bridge to Jordan. Upon arrival, such persons may wish to consider asking Israeli immigration authorities from where they will be required to depart. Additionally, American citizens who have (or who are eligible to receive) a Palestinian Authority Identification Number, may be refused entry to Israel via Ben Gurion Airport and told that they must enter Israel from Jordan via the Allenby Bridge.

The United States Government seeks equal treatment for all American citizens regardless of national origin or ethnicity. American citizens who encounter difficulties are encouraged to contact the U.S. Embassy in Tel Aviv or the U.S. Consulate General in Jerusalem at the telephone numbers below.

Americans in Israel, the West Bank and the Gaza Strip are strongly encouraged to register with the Consular Sections of the U.S. Embassy in Tel Aviv or the U.S. Consulate General in Jerusalem through the State Department's travel registration website, https://travelregistration.state.gov. U.S. citizens who require emergency services may telephone the Consulate General in Jerusalem at (972) (2) 628-7137, after hours: (972) (2) 622-7250 or the Embassy in Tel Aviv at (972) (3) 519-7575, after hours: (972) (3) 519-7551.

Current information on travel and security in Israel, the West Bank and the Gaza Strip may be obtained from the Department of State by calling 1-888-407-4747 within the United States and Canada, or, from overseas, 1-202-501-4444. For additional and more in-depth information about specific aspects of travel to these areas, U.S. citizens should consult: the Country Specific Information for Israel, the West Bank and Gaza; and the Worldwide Caution. These along with other Travel Warnings, Travel Alerts and Country Specific Information sheets are available on the Department's Internet website at http://travel.state.gov. Up-to-date information on security conditions can also be accessed at http://usembassy-israel.org.il or http://jerusalem. usconsulate.gov.

ITALY

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Italian Republic

PROFILE

Geography

Area: 301,225 sq. km. (116,303 sq. mi.); about the size of Georgia and Florida combined.

Cities: Capital—Rome (pop. 2.8 million). Other cities—Milan, Naples, Turin.

Terrain: Mostly rugged and mountainous.

Climate: Generally mild Mediterranean; cold northern winters.

People

Nationality: Noun and adjective—Italian(s).

Population: (July 2007 est.) 58.15 million.

Annual growth rate: (2007 est.) 0.01%.

Ethnic groups: Primarily Italian, but there are small groups of German-, French-, Slovene-, and Albanian-Italians.

Religions: Roman Catholic (majority).

Languages: Italian (official).

Education: Years compulsory—18. Literacy—98%.

Health: Infant mortality rate—5.72/1,000 live births. Life expectancy—77.01 years for men; 83.07 years for women.

Work force: (24.63 million, 2006 est.) Services—63%; industry and commerce—32%; agriculture—5%. Unemployment rate is 7%.

Government

Type: Republic since June 2, 1946.

Constitution: January 1, 1948.

Government branches: Executive—president (chief of state), Council of Ministers (cabinet), headed by the president of the council (prime minister). Legislative—bicameral parliament: 630-member Chamber of Deputies, 315-member Senate (plus a varying number of "life" Senators). Judicial—independent constitutional court and lower magistracy.

Political subdivisions: 94 provinces, 20 regions.

Political parties: People of Liberty, Democratic Party, Northern League, Italy of Values, Union of the Center, Movement for Autonomy.

Suffrage: Vote for House; universal over 18; vote for Senate; universal over 25.

Economy

GDP: (purchasing power parity, 2007 est.) $1.8 trillion.

GDP per capita: (purchasing power parity, 2007 est.) $31,000.

GDP growth: 1.7% (2007); 1.9% (2006); 0.1% (2005); 0.9% (2003 est.); 0.4% (2002); 1.8% (2001).

Natural resources: Fish and natural gas.

Agriculture: Products—wheat, rice, grapes, olives, citrus fruits, potatoes, sugar beets, soybeans beef, dairy products.

Industry: Types—tourism, machinery, iron and steel, chemicals, food processing, textiles, motor vehicles, clothing, footwear, ceramics.

Trade: Exports (2007 est.) $474.8 billion f.o.b.: mechanical products, textiles and apparel, transportation equipment, metal products, chemical products, food and agricultural products. Partners (2006)—Germany 13.2%, France 12.3%, U.S. 7.5%, Spain 7.5%, U.K. 6.6%. Imports (2007 est.)—$483.6 billion f.o.b.: machinery and transport equipment, foodstuffs, ferrous and nonferrous metals, wool, cotton, energy products. Partners (2006)—Germany 17.3%, France 10.0%, Netherlands 5.7%, China 5.2%, Belgium 4.5%, Spain 4.3%.

PEOPLE AND HISTORY

Italy is largely homogeneous linguistically and religiously but is diverse culturally, economically, and politically. Italy has the fifth-highest population density in Europe—about 200 persons per square kilometer (490 per sq. mi.). Minority groups are small, the largest being the German-speaking people of Bolzano Province

and the Slovenes around Trieste. There are also small communities of Albanian, Greek, Ladino, and French origin. Immigration has increased in recent years, however, while the Italian population is declining overall due to low birth rates. Although Roman Catholicism is the majority religion—85% of native-born citizens are nominally Catholic—all religious faiths are provided equal freedom before the law by the constitution.

Greeks settled in the southern tip of the Italian Peninsula in the eighth and seventh centuries B.C.; Etruscans, Romans, and others inhabited the central and northern mainland. The peninsula subsequently was unified under the Roman Republic. The neighboring islands came under Roman control by the third century B.C.; by the first century A.D., the Roman Empire effectively dominated the Mediterranean world. After the collapse of the Roman Empire in the West in the fifth century A.D., the peninsula and islands were subjected to a series of invasions, and political unity was lost. Italy became an oft-changing succession of small states, principalities, and kingdoms, which fought among themselves and were subject to ambitions of foreign powers. Popes of Rome ruled central Italy; rivalries between the popes and the Holy Roman Emperors, who claimed Italy as their domain, often made the peninsula a battleground.

The commercial prosperity of northern and central Italian cities, beginning in the 11th century, combined with the influence of the Renaissance, mitigated somewhat the effects of these medieval political rivalries. Although Italy declined after the 16th century, the Renaissance had strengthened the idea of a single Italian nationality. By the early 19th century, a nationalist movement developed and led to the reunification of Italy—except for Rome—in the 1860s. In 1861, Victor Emmanuel II of the House of Savoy was proclaimed King of Italy. Rome was incorporated in 1870. From 1870 until 1922, Italy was a constitutional monarchy with a parliament elected under limited suffrage.

20th Century History

During World War I, Italy renounced its standing alliance with Germany and Austria-Hungary and, in 1915, entered the war on the side of the Allies. Under the postwar settlement, Italy received some former Austrian territory along the northeast frontier. In 1922, Benito Mussolini came to power and, over the next few years, eliminated political parties, curtailed personal liberties, and installed a fascist dictatorship termed the Corporate State. The king, with little or no effective power, remained titular head of state.

Italy allied with Germany and declared war on the United Kingdom and France in 1940. In 1941, Italy—with the other Axis powers, Germany and Japan—declared war on the United States and the Soviet Union. Following the Allied invasion of Sicily in 1943, the King dismissed Mussolini and appointed Marshal Pietro Badoglio as Premier. The Badoglio government declared war on Germany, which quickly occupied most of the country and freed Mussolini, who led a brief-lived regime in the north. An anti-fascist popular resistance movement grew during the last two years of the war, harassing German forces before they were driven out in April 1945. A 1946 plebiscite ended the monarchy, and a constituent assembly was elected to draw up plans for the republic.

Under the 1947 peace treaty, minor adjustments were made in Italy's frontier with France, the eastern border area was transferred to Yugoslavia, and the area around the city of Trieste was designated a free territory. In 1954, the free territory, which had remained under the administration of U.S.-U.K. forces (Zone A, including the city of Trieste) and Yugoslav forces (Zone B), was divided between Italy and Yugoslavia, principally along the zonal boundary. This arrangement was made permanent by the Italian-Yugoslav Treaty of Osimo, ratified in 1977 (currently being discussed by Italy, Slovenia, and Croatia). Under the 1947 peace treaty, Italy relinquished its overseas territories and certain Mediterranean islands.

The Roman Catholic Church's status in Italy has been determined, since its temporal powers ended in 1870, by a series of accords with the Italian Government. Under the Lateran Pacts of 1929, which were confirmed by the present constitution, Vatican City is recognized by Italy as an independent, sovereign entity. While preserving that recognition, in 1984, Italy and the Vatican updated several provisions of the 1929 accords. Included was the end of Roman Catholicism as Italy's formal state religion.

Italy's Cultural Contributions

Europe's Renaissance period began in Italy during the 14th and 15th centuries. Literary achievements—such as the poetry of Petrarch, Tasso, and Ariosto and the prose of Boccaccio, Machiavelli, and Castiglione—exerted a tremendous and lasting influence on the subsequent development of Western civilization, as did the painting, sculpture, and architecture contributed by giants such as da Vinci, Raphael, Botticelli, Fra Angelico, and Michelangelo. The musical influence of Italian composers Monteverdi, Palestrina, and Vivaldi proved epochal; in the 19th century, Italian romantic opera flourished under composers Gioacchino Rossini, Giuseppe Verdi, and Giacomo Puccini. Contemporary Italian artists, writers, filmmakers, architects, composers, and designers contribute significantly to Western culture.

GOVERNMENT

Italy has been a democratic republic since June 2, 1946, when the monarchy was abolished by popular referendum. The constitution was promulgated on January 1, 1948.

The Italian state is centralized. The prefect of each of the provinces is appointed by and answerable to the central government. In addition to the provinces, the constitution provides for 20 regions with limited governing powers. Five regions—

Sardinia, Sicily, Trentino-Alto Adige, Valle d'Aosta, and Friuli-Venezia Giulia—function with special autonomy statutes. The other 15 regions were established in 1970 and vote for regional "councils." The establishment of regional governments throughout Italy has brought some decentralization to the national governmental machinery, and recent governments have devolved further powers to the regions. Many regional governments, particularly in the north of Italy, are seeking additional powers. The 1948 constitution established a perfectly bicameral parliament (Chamber of Deputies and Senate), a separate judiciary, and an executive branch composed of a Council of Ministers (cabinet), headed by the president of the council (prime minister). The president of the republic is elected for seven years by the parliament sitting jointly with a small number of regional delegates. The president nominates the prime minister, who chooses the other ministers. The Council of Ministers—in practice composed mostly of members of parliament—must retain the confidence of both houses. The houses of parliament are popularly and directly elected by a proportional representation system. Under 2005 legislation, the Chamber of Deputies has 630 members (12 of which are elected by Italians abroad). In addition to 315 elected members (six of which are elected by Italians abroad), the Sen-

ate includes former presidents and several other persons appointed for life according to special constitutional provisions. Both houses are elected for a maximum of five years, but either may be dissolved before the expiration of its normal term. Legislative bills may originate in either house and must be passed by a majority in both.

The Italian judicial system is based on Roman law modified by the Napoleonic code and subsequent statutes. There is only partial judicial review of legislation in the American sense. A constitutional court, which passes on the constitutionality of laws, is a post-World War II innovation. Its powers, volume, and frequency of decisions are not as extensive as those of the U.S. Supreme Court.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Giorgio NAPOLITANO**
Prime Min.: **Silvio BERLUSCONI**
Under Sec. for the Prime Min.: **Gianni LETTA**
Min. of Agriculture: **Luca ZAIA**
Min. of Community Policy: **Andrea RONCHI**
Min. of Cultural Assets: **Sandro BONDI**
Min. of Defense: **Ignazio LA RUSSA**
Min. of Economic Development: **Claudio SCAJOLA**
Min. of Economy & Finance: **Giulio TREMONTI**
Min. of Education: **Maria Stella GELMINI**
Min. of Environment: **Stefania PRESTIGIACOMO**
Min. of Equal Opportunity: **Mara CARFAGNA**
Min. of Foreign Affairs: **Franco FRATTINI**
Min. of Infrastructure & Transport: **Altero MATTEOLI**
Min. of Innovation: **Renato BRUNETTA**
Min. of Interior: **Ernesto Roberto MARONI**
Min. of Justice: **Angelino ALFANO**
Min. of Program Implementation: **Gianfranco ROTONDI**
Min. of Reforms & Federalism: **Umberto BOSSI**
Min. of Regional Affairs: **Raffaele FITTO**
Min. of Relations With Parliament: **Elio VITO**
Min. of Simplification: **Roberto CALDEROLI**
Min. of Welfare: **Maurizio SACCONI**
Min. of Youth Policy: **Giorgia MELONI**
Governor, Bank of Italy: **Mario DRAGHI**
Ambassador to the US: **Giovanni CASTELLANETA**
Permanent Representative to the UN, New York: **Giulio TERZI di Sant'Agata**

Italy maintains an embassy in the United States at 3000 Whitehaven Street, NW, Washington, DC 20008 (tel. 202-612-4400).

POLITICAL CONDITIONS

Until recently, there had been frequent government turnovers (more than 60 and counting) since 1945. The dominance of the Christian Democratic (DC) party during much of the postwar period lent continuity and comparative stability to Italy's political situation.

From 1992 to 1997, Italy faced significant challenges as voters—disenchanted with past political paralysis, massive government debt, extensive corruption, and organized crime's considerable influence—demanded political, economic, and ethical reforms. In 1993 referendums, voters approved substantial changes, including moving from a proportional to a largely majoritarian electoral system and the abolishment of some ministries. However in 2005, parliament passed a new electoral law based on full proportional assignment of seats.

Major political parties, beset by scandal and loss of voter confidence, underwent far-reaching changes. New political forces and new alignments of power emerged in March 1994 national elections. The election saw a major turnover in the new parliament, with 452 out of 630 deputies and 213 out of 315 senators elected for the first time. The 1994 elections also swept media magnate Silvio Berlusconi—and his Freedom Pole coalition—into office as Prime Minister. Berlusconi, however, was forced to step down in January 1995 when one member of his coalition withdrew support. The Berlusconi government was succeeded by a technical government headed by Prime Minister Lamberto Dini, which fell in early 1996. New elections in 1996 brought a center-left coalition to government for the first time after World War II.

A series of center-left coalitions dominated Italy's political landscape between 1996 and 2001. In April 1996, national elections led to the victory of a center-left coalition (the Olive Tree) under the leadership of Romano Prodi. Prodi's government became the second-longest to stay in power before he narrowly lost a vote of confidence (by three votes) in October 1998. A new government was formed by Democratic Party of the Left leader and former-communist Massimo D'Alema. In April 2000, following a poor showing by his coalition in regional elections, D'Alema resigned. The succeeding center-left government, including most of the same parties, was headed by Giuliano Amato, who previously served as Prime Minister in 1992-93.

National elections, held on May 13, 2001, returned Berlusconi to power at the head of the five-party center-right Freedom House coalition, comprising the prime minister's own party, Forza Italia, the National Alliance, the Northern League, the Christian Democratic Center, and the United Christian Democrats. This Berlusconi government served its entire term.

In national elections held April 9-10, 2006, Romano Prodi's center-left Union coalition won a narrow victory over Berlusconi's Freedom House coalition. The Union coalition included the Democratic Party (born of the November 2007 fusion of the Democrats of the Left and the Daisy Party), UDEUR (Union of Democrats for Europe), Rose in the Fist (made up by Italian Social Democrats and Italian Radical Party), Communist Renewal, the Italian Communist Party, Italy of Values, and the Greens.

In May 2006, the parliament elected Giorgio Napolitano as the Republic's President. President Napolitano formerly served as a lifetime senator, Minister of the Interior, and a Mem-

ber of the European Parliament as a member of center-left parties. President Napolitano's term ends in May 2013. The Senate, lower house, and regional representatives will vote to elect his successor.

In January 2008, the Prodi government fell when small coalition partner UDEUR withdrew support. In February, the President dissolved parliament and Silvio Berlusconi returned to power after defeating former Rome Mayor Walter Veltroni by a comfortable margin in elections on April 13-14, 2008. Berlusconi's winning coalition was composed of the People of Liberty (a union of Forza Italia and National Alliance), the Northern League, and the Movement for Autonomy. Berlusconi was sworn in as Prime Minister on May 8. Veltroni now heads the opposition.

Political Parties

Italy's dramatic self-renewal transformed the political landscape between 1992 and 1997. Scandal investigations touched thousands of politicians, administrators, and businessmen; the shift from a proportional to majoritarian voting system also altered the political landscape.

Party changes were sweeping. The Christian Democratic Party dissolved; the Italian People's Party and the Christian Democratic Center emerged. Other major parties, such as the Socialists, saw support plummet. A new populist and free-market oriented movement, Forza Italia, gained wide support among moderate voters. The National Alliance broke from the neofascist Italian Social Movement. A trend toward two large coalitions—one on the center-left and the other on the center-right—emerged from the April 1995 regional elections. For the 1996 national elections, the center-left parties created the Olive Tree coalition while the center right united again under the Freedom Pole. The May 2001 elections ushered into power a refashioned center-right coalition dominated by Berlusconi's party, Forza Italia. The April 2006 elections returned the center-left to power under the eight-party Union coalition, a successor to the Olive Tree. In October 2007, the Union coalition parties officially merged to form the Democratic Party. Veltroni was chosen as party leader and was the center-left's candidate in the April 2008 elections. Silvio Berlusconi launched an alliance between his Forza Italia party and Gianfranco Fini's National Alliance. The parties ran together under the People of Liberty symbol in April 2008. The election greatly simplified parliament, dramatically reducing the numbers of parties, and for the first time since World War II, leaving communist parties out of parliament. People of Liberty (37.4%) won the largest share of the vote and took power in coalition with a strengthened Northern League (8.3%) and the tiny Movement for Autonomy (1.1%). The Democratic Party scored 5.6% and ran in alliance with Italy of Values (4.4%), while the Union of the Center (5.6%) ran alone.

ECONOMY

The Italian economy has changed dramatically since the end of World War II. From an agriculturally based economy, it has developed into an industrial state ranked as the world's sixth-largest market economy. Italy belongs to the Group of Eight (G-8) industrialized nations; it is a member of the European Union and the Organization for Economic Cooperation and Development (OECD).

Italy has few natural resources. With much land unsuited for farming, Italy is a net food importer. There are no substantial deposits of iron, coal, or oil. Proven natural gas reserves, mainly in the Po Valley and offshore Adriatic, constitute the country's most important mineral resource. Most raw materials needed for manufacturing and more than 80% of the country's energy sources are imported. Italy's economic strength is in the processing and the manufacturing of goods, primarily in small and medium-sized family-owned firms. Its major industries are precision machinery, motor vehicles, chemicals, pharmaceuticals, electric goods, and fashion and clothing.

Italy continues to grapple with budget deficits and high public debt—2.0% and 105.6% of GDP for 2007, respectively. Italy joined the European Monetary Union in 1998 by signing the Stability and Growth Pact, and as a condition of this Euro zone membership, Italy must keep its budget deficit beneath a 3% ceiling. In June 2006, the European Commission warned Italy it had to bring the deficit down to that level by 2007. The Italian Government has found it difficult to bring the budget deficit down to a level that would allow a rapid decrease of that debt.

Italy's economic growth averaged only 0.66% for the five years ending in 2005; 2006 GDP growth reached 1.9%, the highest since 2000, largely due to export growth to the Euro zone area. The economy continues to grow less than the Euro zone average, and growth is expected to decelerate from 1.7% in 2007 to under 1% in 2008 as the Euro zone and world economies slow.

Italy's closest trade ties are with the other countries of the European Union, with whom it conducts about 60.3% of its total trade (2006 data). Italy's largest EU trade partners, in order of market share, are Germany (14.9%), France (11.1%), and the United Kingdom (5.3%). Italy continues to grapple with the effects of globalization, where certain countries (notably China) have eroded the Italian lower-end industrial product sector.

The Italian economy is also affected by a large underground economy—worth some 27% of Italy's GDP. This production is not subject, of course, to taxation and thus remains a source of lost revenue to the local and central government.

U.S.-Italy Economic Relations

The United States and Italy cooperate closely on major economic issues, including within the G-8. With a large population and a high per capita income, Italy was the United States' thirteenth-largest trading partner through November 2007,

with total bilateral trade of $44.9 billion comprised of exports to Italy totaling $12.0 billion and imports from Italy worth $32.1 billion. The U.S.'s $19.2 billion deficit with Italy through November 2007 was slightly below the $20.1 billion deficit registered in 2006. Part of this imbalance has been due to a strong dollar. Significant changes are occurring in the composition of this trade. Value-added products such as office machinery and aircraft are becoming important U.S. exports to Italy. U.S. foreign direct investment in Italy at the end of 2006 exceeded $28.9 billion.

Labor

Unemployment is a regional issue in Italy—low in the north, high in the south. The overall national rate is at its lowest level since 1992. Chronic problems of inadequate infrastructure, corruption, and organized crime act as disincentives to investment and job creation in the south. A significant underground economy absorbs substantial numbers of people, but they work for low wages and without standard social benefits and protections. Women and youth have significantly higher rates of unemployment than do men.

Unions claim to represent 40% of the work force. Most Italian unions are grouped in four major confederations: the General Italian Confederation of Labor (CGIL), the Italian Confederation of Workers' Unions (CISL), the Italian Union of Labor (UIL), and the General Union of Labor (UGL), which together claim 35% of the work force. These confederations formerly were associated with important political parties or currents, but they have evolved into fully autonomous, professional bodies. The CGIL, CISL, and UIL are affiliated with the International Confederation of Free Trade Unions (ICFTU) and customarily coordinate their positions before confronting management or lobbying the government. The confederations have had an important consultative role on national social and economic issues.

Agriculture

Italy's agriculture is typical of the division between the agricultures of the northern and southern countries of the European Union. The northern part of Italy produces primarily grains, sugarbeets, soybeans, meat, and dairy products, while the south specializes in fruits, vegetables, olive oil, wine, and durum wheat. Even though much of its mountainous terrain is unsuitable for farming, Italy has a large work force (1.4 million) employed in farming. Most farms are small, with the average size being only seven hectares.

FOREIGN RELATIONS

Italy was a founding member of the European Community—now the European Union (EU). Italy was admitted to the United Nations in 1955 and is a member and strong supporter of the North Atlantic Treaty Organization (NATO), the Organization for Economic Cooperation and Development (OECD), the General Agreement on Tariffs and Trade/World Trade Organization (GATT/WTO), the Organization for Security and Cooperation in Europe (OSCE), and the Council of Europe. It chaired the CSCE (the forerunner of the OSCE) in 1994, the EU in 1996, and the G-8 in 2001 and served as EU president from July to December 2003. Italy began serving a two-year term on the UN Security Council in January 2007.

Italy firmly supports the United Nations and its international security activities. Italy actively participated in and deployed troops in support of UN peacekeeping missions in Lebanon, Somalia, Mozambique, and Timor-Leste and provides critical support for NATO and UN operations in Afghanistan, Bosnia, Kosovo, and Albania. Italy, under NATO's ISAF, maintains approximately 2,500 troops and a Provincial Reconstruction Team in the western Afghanistan province of Herat. In December 2006, Italy completed the deployment of some 3,000 troops who supported international efforts to stabilize Iraq and continues to support reconstruction and development assistance of the Iraqi people through humanitarian workers and other officials, particularly in Dhi Qar Province. Currently over 8,000 Italian troops are deployed, including 2,250 in Kosovo, 2, 350 in Lebanon as part of UNIFIL, and over 2,500 in Afghanistan.

The Italian Government seeks to obtain consensus with other European countries on various defense and security issues within the EU as well as NATO. European integration and the development of common defense and security policies will continue to be of primary interest to Italy.

U.S.-ITALY RELATIONS

The United States enjoys warm and friendly relations with Italy. Italy is a leading partner in the war against terrorism. The two are NATO allies and cooperate in the United Nations, in various regional organizations, and bilaterally for peace, prosperity, and security. Italy has worked closely with the United States and others on such issues as NATO and UN operations as well as with assistance to Russia and the New Independent States; Lebanon; the Middle East peace process; multilateral talks; Somalia and Mozambique peacekeeping; and combating drug trafficking, trafficking in women and children, and terrorism. Under longstanding bilateral agreements flowing from NATO membership, Italy hosts important U.S. military forces at Vicenza and Livorno (army); Aviano (air force); and Sigonella, Gaeta, and Naples—home port for the U.S. Navy Sixth Fleet. The United States has about 13,000 military personnel stationed in Italy. Italy hosts the NATO Defense College in Rome. Italy remains a strong and active transatlantic partner which, along with the United States, has sought to foster democratic ideals and international cooperation in areas of strife and civil conflict. Toward this end, the Italian Government has cooperated with the

United States in the formulation of defense, security, and peacekeeping policies.

TRAVEL

Consular Information Sheet

June 10, 2008

Country Description: Italy is a developed democracy with a modern economy. The Holy See is a sovereign entity that serves as the ecclesiastical, governmental and administrative capital of the Roman Catholic Church, physically located within the State of the Vatican City inside Rome, with a unique, non-traditional economy. San Marino is a developed, constitutional democratic republic, also independent of Italy, with a modern economy. Tourist facilities are widely available.

Entry Requirements: A valid passport is required. Italian authorities may deny entry to travelers who attempt to enter without a valid passport. A visa is not required for tourist stays up to three months. However, for all other purposes, such as work, study, etc., a visa is required and must be obtained from the Italian Embassy or Consulates before entering Italy.

For further information concerning visas and entry requirements for Italy, travelers may contact the Embassy of Italy at 3000 Whitehaven St NW, Washington, DC 20008, via telephone at (202) 612-4400 or via the Internet: http://www.ambwashingtondc.esteri.it or Italian Consulates General in Boston, Chicago, Detroit, Houston, Los Angeles, Miami, Newark, New Orleans, New York, Philadelphia, or San Francisco, accessible through the above Internet site.

Americans staying or traveling within Italy for less than three (3) months are considered non-residents. This includes persons on vacation, those taking professional trips, students registered at an authorized school, or persons performing research or independent study.

As of May 28, 2007, under Italian law (http://www.camera.it/parlam/leggi/07068l.htm), all non-residents are required to complete a dichiarazione di presenza (declaration of presence). Tourists arriving from a non-Schengen-country (e.g. the United States) should obtain a stamp in their passport at the airport on the day of arrival. This stamp is considered the equivalent of the declaration of presence. Tourists arriving from a Schengen-country (e.g. France) must request the declaration of presence

form from a local police office (commissariato di zona), police headquarters (questura) or their place of stay (e.g hotel, hostel, campgrounds) and submit the form to the police or to their place of stay within eight business days of arrival. It is important that applicants keep a copy of the receipt issued by the Italian authorities. Failure to complete a declaration of presence is punishable by expulsion from Italy.

Americans staying in Italy for more than three (3) months are considered residents and must obtain a permesso di soggiorno (permit of stay). This includes Americans who will work or transact business and persons who want to simply live in Italy. An application "kit" for the permesso di soggiorno may be requested from one of 14,000 national post offices (Poste Italiane). The kit must then be returned to one of 5,332 designated Post Office acceptance locations. It is important that applicants keep a copy of the receipt issued by the Post Office. Additional information may be obtained from an Italian immigration website via Internet at: http://www.portaleimmigrazione.it. Within 20 days of receiving the permit to stay in Italy, Americans must go to the local Vital Statistics Bureau (Anagrafe of the Comune) to apply for residency. It generally takes one to two months to receive the certificate of residence (Certificato di Residenza).

Safety and Security: There have been occasional episodes of politically motivated violence in Italy, most often connected to Italian internal developments or social issues. At various times, Italian authorities have found bombs outside public buildings, have received bomb threats and were subjects of letter bombs. Firebombs or Molotov cocktails have been thrown at buildings or offices in the middle of the night. These incidents have all been attributed to organized crime or anarchist movements. Americans were not targeted or injured in these instances.

Demonstrations may have an anti-American character. Even demonstrations intended to be peaceful have the potential to turn into confrontational situations and possibly escalate into violence. U.S. citizens traveling or residing in Italy should take common sense precautions and follow news reports carefully in order to avoid demonstrations and to be aware of heightened security and potential delays when they occur.

Italy remains largely free of terrorist incidents. However, like other countries in the Schengen area, Italy's open borders with its Western European neighbors allow the possibility of terrorist groups entering/exiting the country with anonymity.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State Burea of Consular Affair's Internet site at http://travel.state.gov, where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Italy has a moderate rate of violent crime, some of which is directed towards tourists, principally for motives of theft. Some travelers have been victims of rape and beatings. There have also been incidents of drinks laced with drugs being used by criminals to rob, and in some cases, assault tourists. Many of these incidents have occurred in the vicinity of Rome's Termini train station and at major tourist centers such as Campo de Fiori and Piazza Navona, as well as in Florence and Naples. Criminals using this tactic "befriend" a traveler at a train station, bus stop, restaurant, café or bar in tourist areas, then eventually offer a drink laced with a sleeping drug. When the tourist falls asleep, criminals steal the traveler's valuables. There have also been instances where the victim was assaulted, either physically or sexually.

Americans are urged to exercise caution at train stations and airports, and when frequenting nightclubs, bars and outdoor cafes, particularly at night, because criminals may make initial contact with potential victims in such settings. Individuals under the effect of alcohol may become victims of crime, including robbery, physical and sexual assault, due to their impaired ability to judge situations and make decisions. This is particularly a problem for younger Americans visiting Italy, where the age limit on the sale of alcoholic beverages is lower than in most U.S. states. If you are a victim of such a crime, please file a police report and contact the U.S. Embassy or nearest Consulate. There are also in-country organizations, which provide counseling, medical, and legal assistance to certain crime victims. Petty crimes such as pick pocketing, theft from parked cars, and purse snatching are serious problems, especially in large cities. Pickpockets sometimes dress like businessmen so tourists should not be lulled into a false sense of security by believing that well-dressed individuals are not potential pickpockets or thieves. Most reported thefts occur at crowded tourist sites, on public buses or trains, or at the major railway stations: Rome's Termini; Milan's Centrale; Florence's Santa Maria Novella; and Naples' Centrale and Piazza Garibaldi. Travelers should also be alert to theft in Milan's Malpensa Airport, particularly at car rental agencies. Clients of Internet cafes in major cities have been targeted. Tourists who have tried to resist petty thieves on motor scooters have suffered broken arms and collarbones.

Thieves in Italy often work in groups or pairs. Pairs of accomplices or groups of street urchins are known to divert tourists' attention so that another can pickpocket them. In one particular routine, one thief throws trash, waste or ketchup at the victim; a second thief assists the victim in cleaning up the mess; and the third discreetly takes the victim's belongings. Criminals on crowded public transportation slit the bottoms of purses or bags with a razor blade or sharp knife, then remove the contents. Theft of small items such as radios, luggage, cameras, briefcases, and even cigarettes from parked cars

is a major problem. Carjackings and thefts have also been reported from occupied vehicles waiting in traffic or stopped at traffic lights. Vehicles parked near beaches during the summer have been broken into and items stolen. Robbers take items from cars at gas stations often by smashing car windows.

In a scam practiced on the highways, one thief signals a flat tire to the driver of another car and encourages the driver to pull over. Often, the tire has been punctured by an accomplice, while in other instances, there may, in fact, be nothing wrong with the vehicle. When the driver stops, one thief helps change the tire, while the other takes the driver's belongings. Use particular caution driving at night on highways, when there may be a greater incidence of robbery attempts. There have been occasional reports of break-ins of rental cars driven by Americans when the precautions mentioned above were not followed during stops at highway service areas.

On trains, a commonly reported trick involves one or more persons who pretend to befriend a traveler and offer drugged food or drink. Also, thieves have been known to impersonate police officers to gain the confidence of tourists. The thief shows the prospective victim a circular plastic sign with the words "police" or "international police." If this happens, the tourist should insist on seeing the officer's identification card (documento), as impersonators tend not to carry forged documents. Tourists should immediately report thefts or other crimes to the local police. The U.S. Secret Service in Rome has been advised of, and is assisting Italian Law Enforcement authorities in investigating, an increase in the appearance of ATM skimming devices. These devices are attached to legitimate bank ATMs, usually located in tourist areas, and capture the account information stored electronically on the card's magnetic strip. The devices consist of a card reader installed over the legitimate reader and a pin-hole video camera mounted above the keypad that records the customer's PIN. ATMs with skimming devices installed may also allow normal transactions to occur. The victim's information is sold, traded on-line or encoded on another card such as a hotel key card to access the compromised account. Here are some helpful hints to protect yourself and to identify skimming devices:

- Use ATMs located in well-lit public areas, or secured inside the bank/business
- Cover the keypad with one hand as you enter your PIN
- Avoid card readers that are not flush with the face of the ATM
- Look for gaps, tampered appearance, or other irregularities between the metal faceplate of the ATM and the card reader
- Monitor your account statements for unauthorized transactions

Organized criminal groups operate throughout Italy, but are more prevalent in the south. They have occasionally resorted to violence to intimidate or to settle disputes. Though the activities of such groups are not generally targeted at tourists, visitors should be aware that innocent bystanders could be injured.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

According to Italian Law (Law 80 of May 14, 2005), anyone caught buying counterfeit goods (for example, DVDs, CDs, watches, purses, bags, belts, sunglasses, etc.) is subject to a fine of no less than EUR 1,000. Police in major Italian cities enforce this law to varying degrees. Travelers are advised to purchase products only from stores and other licensed retailers to avoid unknowingly buying counterfeit and illegal merchandise.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Lost or stolen credit cards present risk of identity theft and should be cancelled immediately. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities are available, but may be limited outside urban areas. Public hospitals, though generally free of charge for emergency services, sometimes do not maintain the same standards as hospitals in the United States, so travelers are encouraged to obtain insurance that would cover a stay in a private Italian hospital or clinic. It is almost impossible to obtain an itemized hospital bill from public hospitals, as required by many U.S. insurance companies, because the Italian National Health Service charges one inclusive rate (care services, bed and board). For information on avian influenza (bird flu), please refer to the Department of State's Avian Influenza Fact Sheet, available at http://travel.state.gov.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad, consult the World Health Organization's web site at http://www.who.int/en. Further health information for

travelers is available at http://www.who.int/ith. In Naples and the region of Campania, a perennial problem exists due to periodic garbage collection strikes and inadequate dump facilities. Residents often resort to burning the garbage which can give off toxic substances that can aggravate respiratory problems. Warm summer temperatures further aggravate this problem.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Italy is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Streets in historic city centers are often narrow, winding and congested. Motor scooters are very popular and drivers often see themselves as exempt from conventions that apply to automobiles. Travelers who rent scooters should be particularly cautious. Pedestrians and drivers should be constantly alert to the possibility of scooters' sudden presence. Throughout Italy, the number of pedestrian deaths and injuries are increasing. Most deaths and injuries involve pedestrians or cyclists who are involved in collisions with scooters or other vehicles. U.S. citizens should remain vigilant and alert while walking or cycling near traffic. Pedestrians should be careful, as sidewalks, especially in major cities, can be extremely congested and uneven, and drivers of bicycles, motorcycles and other vehicles routinely ignore traffic signals and traffic flows, routinely park and even drive on sidewalks. For safety, pedestrians should look carefully in both directions before crossing streets, even when using a marked crosswalk with a green "avanti" ("walk") light illuminated. Traffic lights are limited, often disobeyed, and a different convention of right-of-way is observed. Italy has over 5,600 kilometers (3,480 mi.) of "Autostrada," or superhighways. Commercial and individual vehicles travel and pass on these well-maintained roads at very high speeds. Accidents occur in which contributing factors include excessive speed, alcohol/drug use and/or sleepiness of long-distance drivers. Italy has one of the highest rates of car accident deaths in the European Union. In rural areas, a wide range of speed on highways makes for hazardous driving. Roads are generally narrow and often have no guardrails. Travelers in northern Italy, especially in winter, should be aware of fog and poor visibility, responsible for multiple-car accidents each year. Most Italian automobiles are equipped with special fog lights. Roadside assistance in Italy is excellent on the well-maintained toll roads, but limited on secondary roads. Use of safety belts and child restraining devices is mandatory and headlights should be on at all times outside of urban areas.

U.S. citizens driving in Italy are reminded that they must adhere to the local driving laws and regulations. Vehicle traffic in some historic downtown areas of cities and towns throughout Italy is limited by a system of permits (called "ZTL" and functioning the same way as an "EasyPass" system in the U.S. might on the freeway). Cameras record the license plates of cars driving in parts of the city that require a permit. Although most of the automated verification stations are clearly marked, if a driver passes one it is impossible to know at the time that a violation occurred or has been recorded. Violators are not pulled over or stopped, and there is no personal contact with a police officer. Whenever possible, the fines imposed for these violations are forwarded to the driver's home in the U.S. to request payment. The fines are cumulative for each time a driver passes a control point. A similar system of automated traffic control cameras is in place in many parts of the highway system and is used to ticket speeding violations.

U.S. citizens driving in Italy should also note that, according to Italian regulation, if a resident of a non-European Union country (e.g. the United States) violates a traffic law (e.g. for speeding), the violator must pay the fine at the time the violation occurs to the police officer issuing the ticket. If the citizen does not or cannot pay the fine at the time, Italian regulation allows the police officer to confiscate the offender's vehicle (even if the vehicle is a rental vehicle.) For specific information concerning Italian driving permits, vehicle inspection, road tax and mandatory insurance, contact the Italian Government Tourist Board (ENIT) offices via the Internet at: http://www.enit.it, tel: 212-245-4822 or the A.C.I. (Automobile Club Italiano) at Via Magenta 5, 00185 Rome, tel: 39-06-4477. For information on obtaining international drivers licenses, contact AAA or the American Automobile Touring Alliance.

Visit the website of the country's national tourist office at http://www.italiantourism.com and national authority responsible for road safety online at http://www.infrastrutturetrasporti.it.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Italy's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Italy's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Strikes and other work stoppages occur frequently in the transportation sector (national airlines, airports, trains, and bus lines). Most are announced in advance and are of short duration. Information on strikes may be found at http://www.infrastrutture.gov.it/page/NuovoSito/site.php. Reconfirmation of domestic and international flight reservations is highly recommended.

U. S citizens using public transportation while in Italy are reminded that

they must adhere to local transportation laws and regulations. Travelers must purchase train tickets and validate them by punching them in validating machines usually located near the entrance of train tracks prior to boarding. Failure to follow this procedure may result in an on-the-spot fine by an inspector on the train. Travelers must purchase bus tickets prior to boarding and validate them immediately after boarding. Tickets may be purchased at tobacco stores or kiosks. Failure to follow this procedure may result in an immediate fine imposed by an inspector on the bus. If the violator does not pay the fine on the spot, it will automatically double and will be forwarded to the violator's home address.

Disaster Preparedness: Several major earthquake fault lines cross Italy. Principal Italian cities, with the exception of Naples, do not lie near these faults, but smaller tourist towns, like Assisi, do and have suffered earthquakes.

General information about disaster preparedness is available via the Internet from the U.S. Federal Management Agency (FEMA) at http://www.fema.gov. Detailed information on Italy's earthquake fault lines is available from the U.S. Geological Survey (USGS) at http://www.usgs.gov.

Italy also has several active volcanoes generating geothermal events. Mt. Etna, on the eastern tip of the island of Sicily, has been erupting intermittently since 2000. Mt. Vesuvius, located near Naples, is currently capped and not active. Activity at Mt. Vesuvius is monitored by an active seismic network and sensor system, and no recent seismic activity has been recorded. Two of Italy's smaller islands, Stromboli and Vulcano in the Aeolian Island chain north of Sicily, also have active volcanoes with lava flows. Detailed information on volcano activity in Italy is available from the U.S. Geological Survey (USGS) at http://www.usgs.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations. They may differ significantly from those of the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Italian law, even unknowingly, may be expelled, arrested or imprisoned.

Penalties for possession, use or trafficking in illegal drugs in Italy are severe and convicted offenders can expect long jail sentences and heavy fines. Engaging in illicit sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy and Consulate Locations: Americans living or traveling in Italy are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration website, https://travelregistration.state.gov, and to obtain updated information on travel and security within Italy.

Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy is located at Via V. Veneto 119/A, tel: 39-06-46741 and fax: 39-06-4674-2217; Internet address: http://italy.usembassy.gov.

The U.S. Consulates are located in:

Florence: Lungarno Amerigo Vespucci 38, tel: 39-055-266-951, consular fax: 399-055-215-550;

Milan: Via Principe Amedeo 2/10, tel: 39-02-290-351, and fax: 39-02-290-35-273;

Naples: Piazza della Repubblica, tel: 39-081-583-8111, and consular fax: 39-081-583-8275.

There are U.S. Consular Agents located in:

Genoa: Via Dante 2, tel: 39-010-584-492, and fax: 39-010-553-3033;

Palermo: Via Vaccarini 1, tel: 39-091-305-857, and fax: 39-091-625-6026;

Venice: Viale Galileo Galilei, 30, tel: 39-041-541-5944, and fax: 39-041-541-6654.

Intercountry Adoption

April 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services.

For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel. Prospective adoptive parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services.

Important Note: Prospective adoptive parents must legally reside in Italy.

Patterns of Immigration: U.S. immigrant visa statistics show that no Italian children have received adoption immigrant visas in the past five years.

Adoption Authority: City juvenile courts oversee the handling of adoption cases.

For a complete listing of these courts, prospective adoptive parents should visit the following web site: http://www.leradicieleali.com.

Eligibility Requirements for Adoptive Parents: Adoptive parents must be at least eighteen years old and no more than forty-five years over the age of the adoptee. Only married couples may adopt. The couple must have been married for at least three years and must reside in Italy.

Residency Requirements: Prospective adoptive parents must legally reside in Italy.

Time Frame: An adoption in Italy can take up to three years from the time the application is filed with the juvenile court until the child is in the new family's home and the adoption is finalized.

Adoption Agencies and Attorneys: A list of Italian adoption agencies is located at: http://www.dirittoefamiglia.it/redazion/problemi/adozioni/associazioniadozione.htm. A list of attorneys is available via the U.S. Embassy web site at http://www.italy.usembassy.gov.

Adoption Fees: Approximately 5,000 euros.

Adoption Procedures: Prospective adoptive parents start the adoption procedure by submitting a request called "Dicharazione alla Disponabilità per l'Adozione" (Declaration of Willingness to Adopt) to the Juvenile Court having jurisdiction over the place of residence of the prospective adoptive parents. Based on the information provided by the prospective adoptive parents, the Juvenile Court selects the child that better matches the prospective adoptive parents. There are no further details on how the child is selected by the Juvenile Court.

There is a fostering period of one year. During that period, the local Juvenile Court monitors and provides support to the prospective adoptive parents. At the end of the fostering year, the Juvenile Court either confirms or revokes the adoption.

The Court will request the intervention of the local social services agency to assist and evaluate the couple, prepare a home study, and report the findings to the Court. The appointed local social services agency will then conduct a study on the prospective adoptive parents in order to evaluate their capacity to bring up the minor, their personal economic situation, their personal health conditions, the family environment and the motivation of their request. The Juvenile Court can also appoint a judge and/or a team of specialists, who will hold meetings with the prospective adoptive parents in order to evaluate them and/or to provide additional information.

Documents Required: The Declaration of Willingness to Adopt should be accompanied by the following documents:

- Birth Certificates of the prospective adoptive parents;
- Registry Office certificate ("Stato di Famiglia");
- Declaration of consent to adopt by the prospective adoptive parents' parents, given in the form of an affidavit or, should they be deceased, death certificate(s) of adopting parents' parents;
- Medical certificate issued by family doctor;
- Evidence of economic means (i.e. tax returns; pay stubs);
- Criminal record of adopting parents;
- Notarial act, or equivalent declaration, attesting that there is neither legal nor de facto separation between the adopting couple.

No documentation about the child or children is required.

Embassy of Italy

3000 Whitehaven Street, NW

Washington, DC 20008

Tel.: (202) 612-4400

Fax: (202) 518-2151

www.ambwashingtondc.esteri.it/ambasciata_washington

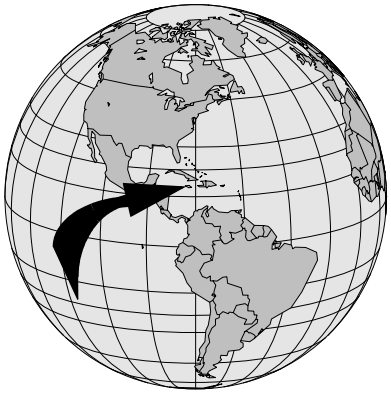
Italy has Consulates in Boston, Chicago, Detroit, Houston, Los Angeles, Miami, New York, Philadelphia, and San Francisco.

U.S. Immigration Requirements: Prospective adoptive parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy

Via Vittorio Veneto 121—00187 ROMA

website: rome.usembassy.gov



Telephone (switchboard): (+39) 06.46741

fax: (+39) 06.4674.2244

e-mail: uscitizensrome@state.gov

The United States also has Consulates General in Florence, Milan and Naples.

Additional Information: Specific questions about intercountry adoption in Italy may be addressed to the U.S. Consulate in Naples. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

JAMAICA

Compiled from the December 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Jamaica

PROFILE

Geography

Area: 10,991 sq. km. (4,244 sq. mi.).

Cities: Capital—Kingston metro area and St. Andrew (pop. 650,000). Other cities—Montego Bay (96,000), Spanish Town (131,515).

Terrain: Mountainous, coastal plains.

Climate: Tropical.

People

Nationality: Noun and adjective—Jamaican(s).

Population: (2006 est.) 2,673,800.

Annual growth rate: (2006) 1.5%.

Ethnic groups: African 90.9%, East Indian 1.3%, Chinese 0.2%, White 0.2%, mixed 7.3%, other 0.1%.

Religions: Anglican, Baptist and other Protestant, Roman Catholic, Rastafarian, Jewish.

Languages: English, Patois.

Education: Years compulsory—to age 14. Literacy (age 15 and over)—79.9%.

Health: (2005) Infant mortality rate—19.2/1,000. Life expectancy—female 75 yrs., male 73 yrs.

Work force: (2006, 1.25 million) Industry—17.1%; agriculture—17.9%; services—64.9%.

Government

Type: Constitutional parliamentary democracy.

Independence: August 6, 1962.

Constitution: August 6, 1962.

Government branches: Executive—Governor General (chief of state, representing British monarch), prime minister, cabinet. Legislative—bicameral Parliament (21 appointed senators, 60 elected representatives). Judicial—Court of Appeal and courts of original jurisdiction.

Political subdivisions: 14 parishes, 60 electoral constituencies.

Political parties: People's National Party (PNP), Jamaica Labour Party (JLP), National Democratic Movement (NDM), United Peoples Party (UPP).

Suffrage: Universal at 18.

Economy

GDP: (2005) $9.7 billion.

Real growth rate: (2006) 2.5%.

Per capita GDP: (2005) $3,640.

Natural resources: Bauxite, gypsum, limestone, marble, sand, silica.

Agriculture: Products—sugar, bananas, coffee, citrus fruits, condiments and spices.

Industry: Types—tourism, bauxite and alumina, processed foods, sugar, rum, cement, metal, chemical products.

Trade: (2005) Exports—$1.5 billion: alumina, bauxite, sugar, bananas, chemicals, citrus fruits and products, rum, coffee. Major markets (2005)—U.S. 26.3%, U.K. 10.8%, Canada 19.6%, Trinidad and Tobago 0.6%, Japan 1.0%. Imports (2005)—$4.7 billion: machinery, transportation and electrical equipment, food, fuels, fertilizer. Major suppliers (2000)—U.S. 40.1%, Trinidad and Tobago 9.0%, Japan 4.5%, U.K. 2.4%, Canada 2.3%.

PEOPLE AND HISTORY

Arawaks from South America had settled in Jamaica prior to Christopher Columbus' first arrival at the island in 1494. During Spain's occupation of the island, starting in 1510, the Arawaks were exterminated by disease, slavery, and war. Spain brought the first African slaves to Jamaica in 1517. In 1655, British forces seized the island, and in 1670, Great Britain gained formal possession.

Sugar made Jamaica one of the most valuable possessions in the world for more than 150 years. The British Parliament abolished slavery as of August 1, 1834. After a long period of direct British colonial rule, Jamaica gained a degree of local political control in the late 1930s, and held its first election under full universal

adult suffrage in 1944. Jamaica joined nine other U.K. territories in the West Indies Federation in 1958 but withdrew after Jamaican voters rejected membership in 1961. Jamaica gained independence in 1962, remaining a member of the Commonwealth.

Historically, Jamaican emigration has been heavy. Since the United Kingdom restricted emigration in 1967, the major flow has been to the United States and Canada. About 20,000 Jamaicans emigrate to the United States each year; another 200,000 visit annually. New York, Miami, Chicago, and Hartford are among the U.S. cities with a significant Jamaican population. Remittances from the expatriate communities in the United States, United Kingdom, and Canada, estimated at up to $1.6 billion per year, make increasingly significant contributions to Jamaica's economy.

GOVERNMENT

The 1962 constitution established a parliamentary system based on the U.K. model. As chief of state, Queen Elizabeth II appoints a governor general, on the advice of the prime minister, as her representative in Jamaica. The governor general's role is largely ceremonial. Executive power is vested in the cabinet, led by the prime minister. Parliament is composed of an appointed Senate and an elected House of Representatives. Thirteen Senators are nominated on the advice of the prime minister and eight on the advice of the leader of the opposition. General elections must be held within 5 years of the forming of a new government. The prime minister may ask the governor general to call elections sooner, however. The Senate may submit bills, and it also reviews legislation submitted by the House.

It may not delay budget bills for more than 1 month or other bills for more than 7 months. The prime minister and the cabinet are selected from the Parliament. No fewer than two or more than four members of the cabinet must be selected from the Senate.

The judiciary also is modeled on the U.K. system. The Court of Appeals is the highest appellate court in Jamaica. Under certain circumstances, cases may be appealed to the Privy Council of the United Kingdom. Jamaica's parishes have elected councils that exercise limited powers of local government.

Principal Government Officials

Last Updated: 11/12/08

Governor Gen.: **Kenneth HALL**
Prime Min.: **Bruce GOLDING**
Dep. Prime Min.: **Kenneth BAUGH, Dr.**
Min. of Agriculture: **Christopher TUFTON**
Min. of Defense: **Bruce GOLDING**
Min. of Education: **Andrew HOLNESS**
Min. of Energy: **Clive MULLINGS**
Min. of Finance & the Public Service: **Audley SHAW**
Min. of Foreign Affairs & Foreign Trade: **Kenneth BAUGH, Dr.**
Min. of Health & Environment: **Rudyard SPENCER**

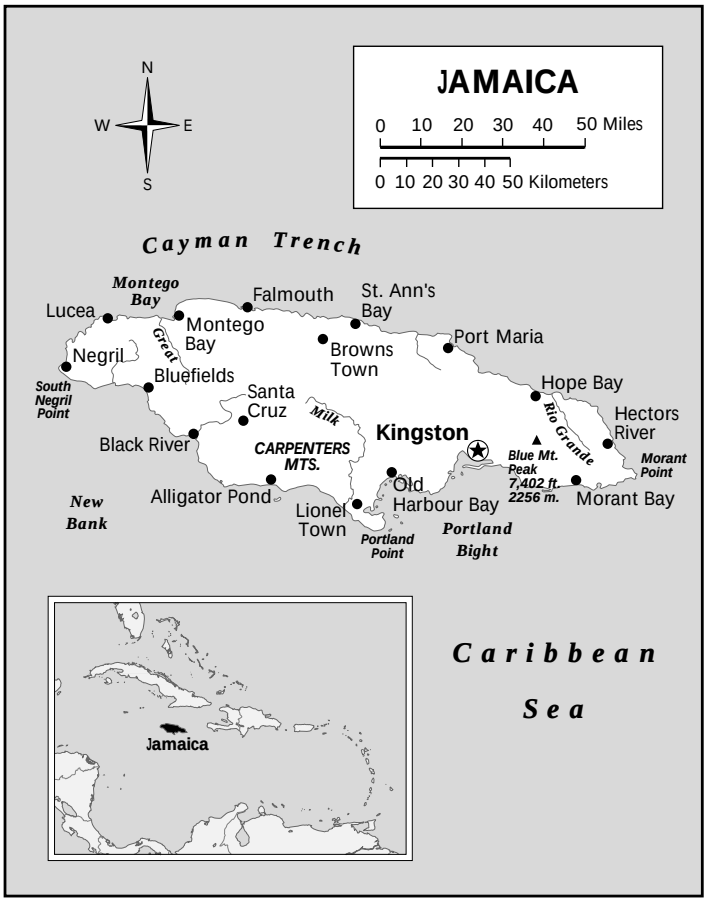
Min. of Tourism: **Edmund BARLETT**
Min. of Transport & Works: **Michael HENRY**
Min. of Water & Housing: **Horace CHANG, Dr.**
Attorney Gen.: **Dorothy LIGHTBOURNE**
Governor, Central Bank: **Derick Milton LATIBEAUDIERE**
Ambassador to the US: **Anthony JOHNSON**
Permanent Representative to the UN, New York: **Raymond WOLFE**

Jamaica maintains an embassy in the United States at 1520 New Hampshire Avenue NW, Washington, DC 20036 (tel. 202-452-0660). It also has consulates in New York at 767 3rd Avenue, New York, NY 10017 (tel. 212-935-9000); and in Miami in the Ingraham Building, Suite 842, 25 SE 2nd Avenue, Miami, FL 33131 (tel. 305-374-8431/2).

POLITICAL CONDITIONS



Jamaica's political system is stable. However, the country's serious economic problems have exacerbated social problems and have become the subject of political debate. High unemployment—averaging 12.5%—rampant underemployment, growing debt, and high interest rates are the most serious economic problems. Violent crime is a serious problem, particularly in Kingston.

The two major political parties have historical links with the two largest trade unions—the Jamaica Labour Party (JLP) with the Bustamante Industrial Trade Union (BITU), and the People's National Party (PNP) with the National Workers Union (NWU). The center-right National Democratic Movement (NDM) was established in 1995, and the populist United Peoples Party (UPP) in 2001; neither has links with any particular trade union, and both are marginal movements.

For health reasons, Michael Manley stepped down as Prime Minister in March 1992 and was replaced by P.J. Patterson. Patterson subsequently led the PNP to victory in general elections in 1993, 1997, and in October of 2002. The 2002 victory marked the first time any Jamaican political party has won four consecutive general elections since the introduction of universal suffrage in 1944. Upon Patterson's retirement on March 30, 2006, Portia Simpson Miller became the first female prime minister in Jamaica's history. She left office after her party (PNP) lost to the JLP in general elections held in September 2007. The current composition of the lower house of Jamaica's Parliament is 32 JLP and 28 PNP.

Since the 1993 elections, the Jamaican Government, political parties, and Electoral Advisory Committee

have worked to enact electoral reform. In the 2002 general elections, grassroots Jamaican efforts from groups like CAFFE (Citizens Action for Free and Fair Elections), supplemented by international observers and organizations such as The Carter Center, helped reduce the violence that has tended to mar Jamaican elections. Former President Carter also observed the 2002 elections and declared them free and fair.

ECONOMY

Jamaica has natural resources, primarily bauxite, adequate water supplies, and climate conducive to agriculture and tourism. The discovery of bauxite in the 1940s and the subsequent establishment of the bauxite-alumina industry shifted Jamaica's economy from sugar and bananas. By the 1970s, Jamaica had emerged as a world leader in export of these minerals as foreign investment increased.

The country faces some serious problems but has the potential for growth and modernization. Currency reserves, remittances, tourism, agriculture, mining, construction, and shipping all remain strong, and Jamaica has attracted over U.S. $4.4 billion in foreign direct investment over the past decade. However, high unemployment, burdensome debt, an alarming crime rate, and anemic growth continue to darken the country's prospects. After 4 years of negative economic growth, Jamaica's GDP grew by 0.8% in 2000, and has grown in the 0.5% to 2.5% range, year-on-year, since then. Inflation fell from 25% in 1995 to 6.1% in 2000 and registered single digits for a few years, until returning to double digits in 2007 and 2008 with the spike in world commodity prices which was soon followed by the global economic downturn.

Through periodic intervention in the market, the central bank prevents any abrupt drop in the exchange rate. Nevertheless, the Jamaican dollar continues to slip despite intervention. The average exchange rate was J$76.20 to the U.S. $1.00 by December 2008. Weakness in the financial sector, speculation, and low levels of government investment erode confidence in the production sector. The government is unable to channel funds into social and physical infrastructure because of an overwhelming debt-to-GDP ratio, which currently stands at approximately 130%.

Almost 55 cents on every dollar earned by the Jamaican Government goes to debt servicing and recurrent expenditure. Tax compliance rates also contribute to the problem, hovering at approximately 45%. On the other hand, net internal reserves were just over $1.7 billion at the end of 2008.

Jamaican Government economic policies encourage foreign investment in areas that earn or save foreign exchange, generate employment, and use local raw materials. The government provides a wide range of incentives to investors, including remittance facilities to assist them in repatriating funds to the country of origin; tax holidays which defer taxes for a period of years; and duty-free access for machinery and raw materials imported for approved enterprises.

Free trade zones have stimulated investment in garment assembly, light manufacturing, and data entry by foreign firms. However, over the last 5 years, the garment industry has suffered from reduced export earnings, continued factory closures, and rising unemployment.

This can be attributed to intense international and regional competition, exacerbated by the high costs of operations in Jamaica, including security costs to deter drug activity, as well as the relatively high cost of labor. The Government of Jamaica hopes to encourage economic activity through a combination of privatization, financial sector restructuring,

falling interest rates, and by boosting tourism and related production activities.

FOREIGN RELATIONS

Jamaica has diplomatic relations with most nations and is a member of the United Nations and the Organization of American States. It was an active participant in the April 2001 Quebec Summit of the Americas. Jamaica is an active member of the British Commonwealth, the Non-Aligned Movement, the G-15, and the G-77. Jamaica is a beneficiary of the Cotonou Conventions, through which the European Union (EU) grants trade preferences to selected states in Asia, the Caribbean, and the Pacific.

Historically, Jamaica has had close ties with the U.K., but trade, financial, and cultural relations with the United States are now predominant. Jamaica is linked with the other countries of the English-speaking Caribbean through the Caribbean Community (CARICOM), and more broadly through the Association of Caribbean States (ACS). In December 2001, Jamaica completed its 2-year term on the United Nations Security Council.

U.S.-JAMAICAN RELATIONS

The United States maintains close and productive relations with the Government of Jamaica. Former Prime Minister Patterson visited Washington, DC, several times after assuming office in 1992. In April 2001, Prime Minister Patterson and other Caribbean leaders met with President Bush during the Summit of the Americas in Quebec, Canada, at which a "Third Border Initiative" was launched to deepen U.S. cooperation with Caribbean nations and enhance economic development and integration of the Caribbean nations. Then-Prime Minister Portia Simpson Miller attended the "Conference on the Caribbean—A 20/20 Vision" in Washington in June 2007. The United States is Jamaica's most important trading partner: bilateral trade in goods in 2005 was over $2 billion. Jamaica is a popular destination for American tourists; more than 1.2 million Americans visited in 2006. In addition, some 10,000 American citizens, including many dual-nationals born on the island, permanently reside in Jamaica.

The Government of Jamaica also seeks to attract U.S. investment and supports efforts to create a Free Trade Area of the Americans (FTAA). More than 80 U.S. firms have operations in Jamaica, and total U.S. investment is estimated at more than $3 billion. An office of the U.S. and Foreign Commercial Service, located in the embassy, actively assists American businesses seeking trade opportunities in Jamaica. The country is a beneficiary of the Caribbean Basin Trade Partner Act (CBTPA). The American Chamber of Commerce, which also is available to assist U.S. business in Jamaica, has offices in Kingston.

U.S. Agency for International Development (USAID) assistance to Jamaica since its independence in 1962 has contributed to reducing the population growth rate, the attainment of higher standards in a number of critical health indicators, and the diversification and expansion of Jamaica's export base. USAID's primary objective is promoting sustainable economic growth. Other key objectives are improved environmental quality and natural resource protection, strengthening democratic institutions and respect for the rule of law, as well as family planning. In fiscal year 2006, the USAID mission in Jamaica operated a program totaling more than $21 million in development assistance. The Peace Corps has been in Jamaica continuously since 1962. Since then, more than 3,300 volunteers have served in the country. Today, the Peace Corps works in the following projects: Youth-at-Risk, which includes adolescent reproductive health, HIV/AIDS education, and the needs of marginalized males; water sanitation, which includes rural waste water solutions and municipal waste water treatment; and environmental education, which helps address low levels of awareness and strengthens environmental nongovernmental organizations. The Peace Corps in Jamaica fields about 70 volunteers who work in every parish on the island, including some inner-city communities in Kingston.

Jamaica is a major transit point for cocaine en route to the United States and is also a key source of marijuana and marijuana derivative products for the Americas. During 2006, the Government of Jamaica seized narcotics destined for the United States, arrested key traffickers and criminal gang leaders, and dismantled their organizations. Jamaica remains the Caribbean's largest producer and exporter of marijuana. The efforts of the Jamaica Constabulary Force (JCF) and Jamaica Defense Force (JDF) enabled cannabis seizures to increase by over 200% in 2006. In 2006, the JCF arrested 5,409 persons on drug related charges, including 269 foreigners. Additionally, more than 20,000 kilograms of marijuana were seized, and 6,300,000 marijuana plants eradicated in 2006.

In August 2006, two priority targets associated with major cocaine trafficking organizations were arrested in Jamaica and await extradition to the United States where they are charged with conspiracy to import illegal drugs. Jeffrey and Gareth Lewis (father and son) allegedly transported cocaine shipments from Colombia to the United States. Operation Kingfish is a multinational task force (Jamaica, U.S., United Kingdom, and Canada) for coordinating investigations leading to the arrest of major criminals.

From its October 2004 inception through December 2006, Operation Kingfish launched 1,378 operations resulting in the seizure of 56 vehicles, 57 boats, one aircraft, 206 firearms, and two containers conveying drugs. Kingfish was also responsible for the seizure of over 13 metric tons of cocaine (mostly outside of Jamaica) and over 27,390 pounds of compressed marijuana.

In 2006 Operation Kingfish mounted 870 operations, compared to 607 in 2005. In 2006, through cargo scanning, the Jamaican Customs Contraband Enforcement Team seized over 3,000 pounds of marijuana, ten kg of cocaine, and approximately $500,000 at Jamaican air and seaports.

TRAVEL

Consular Information Sheet

November 25, 2008

Country Description: Jamaica is a developing nation of over 2.6 million people. Facilities for tourists are widely available. International airports are located in Kingston and Montego Bay.

Entry Requirements: All Americans traveling by air outside of the United States are required to present a passport or other valid travel document to enter or re-enter the United States. This requirement will be extended to sea travel (except closed loop cruises), including ferry service, by the summer of 2009. Until then, U.S. citizens traveling by sea must have government-issued photo identification and a document showing their U.S. citizenship (for example, a birth certificate or certificate of nationalization), or other WHTI compliant document such as a passport card for entry or re-entry to the U.S. Sea travelers should also check with their cruise line and countries of destination for any foreign entry requirements.

Applications for the new U.S. Passport Card are now being accepted and have been in full production since July 2008. The card may not be used to travel by air and is available only to U.S. citizens. Further information on the Passport Card is available at http://travel.state.gov/passport/ppt_card/ppt_card_3926.html and upcoming changes to U.S. passport policy can be found at http://travel.state.gov/travel/cbpmc/cbpmc_2223.html. We strongly encourage all American citizen travelers to apply for a U.S. passport well in advance of anticipated travel. American citizens can visit travel.state.gov or call 1-877-4USA-PPT (1-877-487-2778) for information on how to apply for their passports.

Visitors must have a return ticket and be able to show sufficient funds for their visit. U.S. citizens traveling to Jamaica for work or extended stays are required to have a current U.S. passport and visa issued by the Jamaican Embassy or a Jamaican Consulate. There is a departure tax for travelers, which is regularly included in airfare. For further information, travelers may contact the Embassy of Jamaica at 1520 New Hampshire Avenue NW, Washington, DC 20036, telephone (202) 452-0660; the Jamaican Consulate in Miami or New York; honorary consuls in Atlanta, Boston, Chicago, Houston, Seattle or Los Angeles. Visit the Embassy of Jamaica web site at www.embassyofjamaica.org for the most current visa information.

Safety and Security: Gang violence and shootings occur regularly in certain areas of Kingston and Montego Bay. These areas include Mountain View, Trench Town, Tivoli Gardens, and Arnett Gardens in Kingston, and Flankers in Montego Bay. Some neighborhoods are occasionally subject to curfews and police searches. Impromptu demonstrations can occur, during which demonstrators often construct roadblocks or otherwise block the streets. These events usually do not affect tourist areas, but travelers to Kingston should check with local authorities or the U.S. Embassy for current information prior to their trip.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime, including violent crime, is a serious problem in Jamaica, particularly in Kingston. While the vast majority of crimes occur in impoverished areas, the violence is not confined. The primary criminal concern of a tourist is being a victim of theft. In several cases, armed robberies of Americans have turned violent when the victims resisted handing over valuables. Crime is exacerbated by the fact that police are understaffed and ineffective. Therefore, tourists should take their own precautions and always pay extra attention to their surroundings when traveling, exercise care when walking outside after dark, and should always avoid areas known for high crime rates. As a general rule, valuables should not be left unattended, including in hotel rooms and on the beach. Care should be taken when carrying high value items such as cameras, or when wearing expensive jewelry on the street. Women's handbags should be zipped and held close to the body. Men should carry wallets in their front pants pocket. Large amounts of cash should always be handled discreetly.

The U.S. Embassy advises its staff to avoid inner-city areas of Kingston and other urban centers, such as those listed in the section on Safety and Security, whenever possible. Particular caution is advised after dark in downtown Kingston. The U.S. Embassy also cautions its staff not to use public buses, which are often overcrowded and are a frequent venue for crime.

To enhance security in the principal resort areas, the Government of Jamaica has taken a number of steps, including assignment of special police foot and bicycle patrols. Particular care is still called for, however, when staying at isolated villas and smaller establishments that may have fewer security arrangements. Some street vendors and taxi drivers in tourist areas are known to confront and harass tourists to buy their wares or employ their services. If a firm "No, thank you" does not solve the problem, visitors may wish to seek the assistance of a tourist police officer.

Drug use is prevalent in some tourist areas. American citizens should avoid buying, selling, holding, or taking illegal drugs under any circumstances. There is anecdotal evidence that the use of so-called date rape drugs, such as Ruhypnol, has become more common at clubs and private parties. Marijuana, cocaine, heroin and other illegal narcotics are especially potent in Jamaica, and their use may lead to severe or even disastrous health consequences.

In addition to a number of lottery and investment scams, relatives of U.S. citizens visiting Jamaica and U.S. citizens who are prisoners in Jamaica have received telephone calls from people claiming to be Jamaican police officers, other public officials, or medical professionals. The callers usually state that the visitor or prisoner has had trouble and needs financial help. In almost every case these claims are untrue. The caller insists that money should be sent to either themselves or a third party who will assist the visitor or prisoner, but when money is sent, it fails to reach the U.S. citizens in alleged need. U.S. citizens who receive calls such as these should never send money. They should contact the American Citizen Services Unit of the Embassy's Consular Section at telephone (876) 702-6000 for assistance in confirming the validity of the call.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Jamaica is: 119.

Medical Facilities and Health Information: Medical care is more limited than in the United States. Comprehensive emergency medical services are located only in Kingston and Montego Bay, and smaller public hospitals are located in each parish. Emergency medical and ambulance services, and the availability of prescription drugs, are limited in outlying parishes. Ambulance service is limited both in the quality of emergency care and in the availability of vehicles in remote parts of the country. Serious medical problems requiring hospitalization and/or medical evacuation to the United States can cost thousands of dollars or more. Doctors and hospitals often require cash payment prior to providing services. If a medical evacuation is required, the Embassy recommends you contact the American Citizen Services Unit at (876) 702-6000 for assistance.

Numerous cases of dengue fever, including two afflicting Americans, were reported in Jamaica in 2007, the first in many years. Americans are urged to read the Centers for Disease Control's Fact Sheet on dengue fever and particularly to follow the guidance on deterring mosquitoes at http://wwwn.cdc.gov/travel.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Jamaica.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be

obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Jamaica is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Drivers and pedestrians should remember that driving in Jamaica is on the left-hand side of the road. Breakdown assistance is quite limited in urban areas and virtually unavailable in rural areas. Nighttime driving is especially dangerous and should be avoided whenever possible. As noted above in the section on Crime, public buses are often overcrowded and they are frequently a venue of crime. Travelers who use taxicabs should take only licensed taxicabs having red-and-white PP license plates.

Drivers and passengers in the front seat are required to wear seat belts, and motorcycle riders are required to wear helmets. Extreme caution should be used in operating motor driven cycles. Several serious and fatal accidents take place each year involving American tourists riding in taxis without seat belts. All passengers are strongly encouraged to utilize vehicles equipped with seat belts. Drivers should make every effort to avoid areas of high crime and civil strife. Roadblocks are sometimes employed by residents as protests intended to draw attention to particular issues and require extreme caution by drivers.

The Embassy also advises its staff to always keep their windows up and doors locked when driving and to leave enough distance between themselves and the preceding car at intersections to allow a roll forward in case of harassment by pedestrian panhandlers. As a rule, drivers should always avoid contact with large groups of pedestrians.

Most roads are paved, but suffer from ill repair, inadequate signage and poor traffic control markings. City roads are often subject to poorly marked construction zones, pedestrians, bicyclists, and, occasionally, livestock. Street corners are frequented by peddlers, window washers, and beggars walking among stopped cars. Smaller roads are often narrow and they are frequently traveled at high speeds. Drivers should be aware of roundabouts, which are often poorly marked and require traffic to move in a clockwise direction. Motorists entering a roundabout must yield to those already in it. Failure to turn into the correct flow of traffic can result in a head on collision.

The A1, A2 and A3 highways are the primary links between the most important cities and tourist destinations on the island. These roads are not comparable to American highways, and road conditions may be hazardous due to poor repair, inadequate signage and poor traffic control markings. The B highways and other rural roads are often very narrow and frequented by large trucks, buses, pedestrians, bicyclists and open range livestock. Highways are traveled at high speeds, but they are not limited-access and are subject to the hazards outlined above.

For specific information concerning Jamaican drivers permits, vehicle inspection, road tax and mandatory insurance, please contact the Embassy of Jamaica's website: http://www.congenjamaica-ny.org or the Jamaica Tourist Board at: 1-800-JAMAICA or on line at http://www.jamaicatravel.com.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Jamaica's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Jamaica's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: In recent years, there has been a growth of Behavior Modification Facilities for the treatment of minors with drug/alcohol and discipline problems. Parents enroll their children in these facilities in the hope of improving their behavior. The Department of State is aware of such facilities in Jamaica and Mexico. There may be facilities in other countries that have not come to the attention of the U.S. government.

Parents considering enrolling their children in overseas Behavior Modification Facilities should visit the facility, if at all possible, and review the host country's rules regarding the facility and its employees. Parents may contact the U.S. Embassy/Consulate in the host country to inquire about the facility or speak to the country officer in the Office of American Citizen Services, Bureau of Consular Affairs at: (202) 647-5226. When such facilities are known to exist, consular officials conduct periodic site visits, sometimes in the company of host country government officials, to monitor the general well being of U.S. citizen enrollees and to check on specific individuals who have been the subject of welfare and whereabouts inquiries. Further information can be found on the Bureau of Consular Affairs Behavior Modification Facilities information flyer.

The Department of State warns U.S. citizens against taking any type of firearm or ammunition into Jamaica without authorization from the Ministry of National Security. Entering

Jamaica with a firearm or even a single round of ammunition is a serious crime that can result in a long prison sentence.

Fresh fruits, vegetables and uncooked meats are not permitted to be brought in or out of the country and may be confiscated by customs officials. Pets may not be brought into Jamaica, except for dogs from the United Kingdom that have not been vaccinated for rabies and only after six months quarantine.

It is advisable to contact the Embassy of Jamaica in Washington or one of the Jamaican consulates in the United States for specific information regarding customs requirements. Jamaica, like all Caribbean countries, can be affected by hurricanes. Hurricane season runs from June 1 to November 30 each year. The Office of Disaster Preparedness and Emergency Management (ODPEM) has put measures in place in the event of an emergency or disaster. General information is available on the subject via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offences.

Persons violating Jamaica's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Jamaica are severe, and convicted offenders can expect long jail sentences and heavy fines. Airport searches are thorough and people attempting to smuggle narcotics are often apprehended.

Prison conditions in Jamaica differ greatly from prison conditions in the United States. Prisoners are provided only the most basic meals and must rely upon family and friends to supplement their diets, provide clothing, and supply personal care items such as toothpaste and shampoo. Packages shipped from the United States to prisoners are subject to Jamaican import taxes and are undeliverable when the recipient lacks the funds to pay the duties. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States. Jamaican law contains specific prohibitions on certain sexual activities. These prohibitions have been used to target homosexuals and trans-gendered individuals. Violations can result in lengthy imprisonment.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Jamaica are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, and to obtain updated information on travel and security within Jamaica. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The Consular Section of the U.S. Embassy is located at 142 Old Hope Road in the Liguanea area of Kingston, tel. (876) 702-6000. Office hours are 7:15 a.m. to 4:00 p.m. with window services available Monday-Friday, 8:00 a.m. to 11:00 a.m., except local and U.S. holidays. For emergencies after hours, on weekends, and holidays, U.S. citizens are requested to call the U.S. Embassy duty officer through the main switchboard at (876) 702-6000.

The Consular Agency in Montego Bay is located at St. James Place, 2nd Floor, Gloucester Avenue, tel. (876) 952-0160. Office hours are Monday-Friday from 9:00 a.m. to 12:30. The U.S. Embassy also has consular responsibility for the Cayman Islands, a British dependent territory. The U.S. Consular Agency in the Cayman Islands is located at 222 Mirco Centre, Georgetown. Hours are M-W-F from 7:30 to 11:00 and T-Th from 12:00 to 3:30. The telephone number is (345) 945-8173 and the email is consagency@candw.ky. For additional information on travel conditions in the Cayman Islands, please refer to the Cayman Islands Country Specific Information.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Jamaica is not party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention).

There are two types of adoption in Jamaica–Adoption Licenses and Adoption Orders. An Adoption License allows a Jamaican citizen child to be taken to a "scheduled country" (in these cases, the United States) and adopted there. An Adoption Order provides for an orphan to be adopted in Jamaica. An Order legally supersedes a birth certificate, as it shows date of birth, (new) parentage, and (new) name. The child's Jamaican passport information may also be superseded by the new parentage and name.

Who Can Adopt? To bring an adopted child to United States from Jamaica, you must be found eligible to adopt by the United States Government.

In addition to the United States requirements for prospective adoptive parents, Jamaica also has the following eligibility requirements for prospective adoptive parents.

Residency Requirements: Prospective adoptive parents seeking an Adoption License can expect to have to travel to Jamaica at least twice (once to meet with the Child Development Agency (CDA) and again to apply for a visa), but are not required to reside in Jamaica. Prospective adoptive parents seeking an Adoption Order must reside in Jamaica during the pre-adoption placement and until the case appears before a Jamaican court (at least four months). The court may waive the pre-adoption placement requirement if the prospective adoptive parents are Jamaican nationals adopting a relative.

Age Requirements: Prospective adoptive parents who aren't related to the potential adopted child must be 25 years of age or older. If the child is a brother, sister, niece, or nephew of the prospective adoptive parent(s), at least one parent must be 18 years of age or older. There are no laws dictating the age difference between the adoptee and the prospective adoptive parent when they are related.

Marriage Requirements: Both single individuals and married couples can adopt.

Income Requirements: While there are no specific income requirements, prospective adoptive parents will have to provide documents relaying their financial status.

Other Requirements: While there are no specific medical ineligibilities, each potential adoption is evaluated on a case-by-case basis. Prospective adoptive parents' medical conditions may factor into that evaluation.

Who Can Be Adopted? Jamaica has specific requirements that a child must meet in order to be eligible for adoption. You cannot adopt a child in Jamaica unless he or she meets the requirements. In addition to these requirements, a child must meet the definition of an orphan under United States law for you to bring him or her home back to the United States.

Jamaica's Adoption Authority: Child Development Agency (CDA)

The Process: The first step in adopting a child from Jamaica is usually to select a licensed agency in the United States that can help with your adoption. Adoption service providers must be licensed by the United States state in which they operate. The CDA is the only agency legally authorized to provide adoption services in Jamaica. There are one or two private agencies operating in Jamaica, but they do so without government sanction.

To bring an adopted child from Jamaica to the United States, you must apply to be found eligible to adopt (Form I-600A) by the USCIS.

The CDA verifies the contents of the home study by writing to the home study agency. This verifies the home study authorship and obtains the home study agency's agreement to supervise the placement in the future.

If you are eligible to adopt, and a child is available for intercountry adoption, the CDA in Jamaica will provide you with a referral to a child.

The child must be eligible to be adopted according to Jamaica's requirements. The child must also meet the definition of an orphan under United States law. The CDA identifies children for adoption. It administers the public children's homes; however, the CDA places children from either public or private children's homes.

The process for finalizing the adoption (or gaining legal custody) in Jamaica generally includes the following.

Role of the Adoption Authority: The CDA approves the adoption and forwards the case to the court.

Role of the Court: In the Kingston, St. Andrew, Westmoreland, and St. James parishes, special Family Courts exercise jurisdiction over adoptions. In the remaining parishes, the local Resident Magistrate's Court supervises adoptions.

Role of Adoption Agencies: The CDA is the only agency legally authorized to provide adoption services in Jamaica. The one or two other agencies operating in Jamaica do so without the governments sanction or authorization.

Adoption Application: The prospective adoptive parents submit the adoption application to the CDA.

Time Frame: Most adoptions using the Adoption License process can be completed in four months. Those using the Adoption Order take longer to complete. The paperwork processing for the Adoption Order can take from two to three months to complete prior to the pre-adoption placement (unless the child is a relative). The pre-adoption placement generally lasts four months.

Adoption Fees: Jamaica does not charge any fees for adoptions. However, each child is required to have an extensive physical. Licensed pediatricians generally charge approximately $100 USD for this service. Adoptive parents may have legal representation at the court proceeding, but most do not hire an attorney. Attorney fees will vary.

Documents Required: The following documents are required to obtain an Adoption License:

- Application form (available from the CDA);
- Home Study—Certified original home study plus two additional copies to be sent directly to the Board by the Department of Health (in most cases, this can be the same home study conducted in the United States for the I-600A or I-600);
- Medical Examination (examination of both the prospective adoptive parents and the child);
- Letter of Undertaking–The agency that conducted the home study submits the letter agreeing to supervise the placement until the adoption is complete, and beyond, as determined on a case-by-case basis by the CDA;

- Bank Statement; and
- Letter(s) from Employer(s)–The letter(s) should indicate the annual income and the nature of employment.

The following documents are required to obtain an Adoption Order:

- Application form (available from the CDA);
- Home Study—certified original home study plus two additional copies to be sent directly to the Board by the Department of Health (can be the same home study conducted in the United States for the I-600A or I-600);
- Medical Examination (examination of both the prospective adoptive parents and the child);
- Income Statement;
- Personal References (two); and
- Letter of Undertaking–provided by the Jamaican agency that conducted the home study to supervise placement.

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: The Child Development Agency may, on case-by-case basis, require the agency that conducted the home study to submit reports to the CDA on a regular basis for up to two years after an Adoption License is issued. Post-adoption reporting is not mandated in cases that receive Adoption Orders.

Contact Information
United States Embassy in Jamaica

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Jamaica is not party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any other international or bilateral treaties in force between Jamaica and the United States dealing with international parental child abduction. American citizens who travel to Jamaica place themselves under the jurisdiction of local courts.

American citizens planning a trip to Jamaica with dual national children should bear this in mind.

Custody Disputes: In Jamaica, if parents are legally married they share the custody of their children. If they are not married, custody is granted by law to the mother unless there are known facts of inappropriate behavior mental or social problems. Foreign court orders are not automatically recognized.

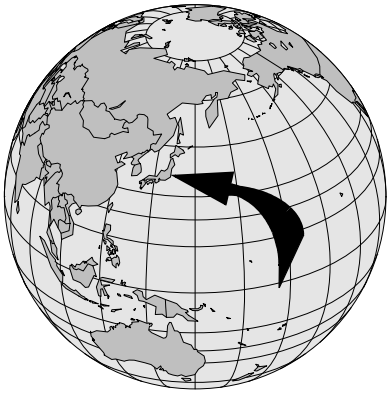
Enforcement of Foreign Judgments: Custody orders and judgments of foreign courts are not automatically enforced in Jamaica, but may be formally recognized by a Jamaican court.

Visitation Rights: In cases where one parent has been granted custody of a child, the other parent is usually granted visitation rights.

The American Embassy in Kingston has reported few problems for non-custodial parents exercising their visitation rights. If a custodial parent fails to allow visitation, the non-custodial parent may appeal to the court.

Dual Nationality: Dual nationality is recognized under Jamaican law.

Travel Restrictions: No exit visas are required to leave Jamaica. However, a child leaving the country with a person other than a parent needs written authorization from one parent. This authorization requires certification from the Jamaican immigration office before minors may exit the country.



Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation (FBI). Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp.ncjrs.org. Persons who wish to pursue a child custody claim in a Jamaican court should retain an attorney in Jamaica. The U.S. Embassy in Jamaica maintains a list of attorneys willing to represent American clients. A copy of this list may be obtained by accessing the internet address below or by requesting one from the Embassy at:

U.S. Embassy Kingston
Consular Section

2 Oxford Road, 3rd Floor
Kingston
Jamaica
Telephone: (876) 929-4850
Fax: [876] 935-6001
Web site: www.state.gov/kingston

Questions involving Jamaican law should be addressed to a Jamaican attorney or to the Embassy of Jamaica in the United States at:

Embassy of Jamaica
1520 New Hampshire Avenue N.W.
Washington, DC 20036
Telephone: (202) 452-0660

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

JAPAN

Compiled from the September 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Japan

PROFILE

Geography

Area: 377,864 sq. km. (145,902 sq. mi.); slightly smaller than California.

Cities: Capital—Tokyo. Other cities—Yokohama, Osaka, Nagoya, Sapporo, Kobe, Kyoto, Fukuoka.

Terrain: Rugged, mountainous islands.

Climate: Varies from subtropical to temperate.

People

Nationality: Noun and adjective—Japanese.

Population: (2008 est.) 127.3 million.

Population growth rate: (2007 est.) -0.139%.

Ethnic groups: Japanese; Korean (0.5%), Chinese (0.4%).

Religions: Shinto and Buddhist; Christian.

Languages: Japanese.

Education: Literacy—99%.

Health: (2008 est.) Infant mortality rate—2.8/1,000. Life expectancy—males 79 yrs., females 86 yrs.

Work force: (67 million, 2007 est.) services—67.7%; industry—27.8%; agriculture—4.5%.

Government

Type: Constitutional monarchy with a parliamentary government.

Constitution: May 3, 1947.

Government branches: Executive—prime minister (head of government). Legislative—bicameral Diet (House of Representatives and House of Councillors). Judicial—civil law system based on the model of Roman law.

Political subdivisions: 47 prefectures.

Political parties: Liberal Democratic Party (LDP), Democratic Party of Japan (DPJ), New Clean Government Party (Komeito), Japan Communist Party (JCP), Social Democratic Party (SDP).

Suffrage: Universal at 20.

Economy

GDP: (2007 est.) $4.384 trillion (official exchange rate); $4.29 trillion (PPP).

Real growth rate: (2007) 2.1%.

Per capita GDP: (2007 est. PPP) $33,600.

Natural resources: Fish and few mineral resources.

Agriculture: Products—rice, vegetables, fruit, milk, meat, silk.

Industry: Types—machinery and equipment, metals and metal products, textiles, autos, chemicals, electrical and electronic equipment.

GEOGRAPHY

Japan, a country of islands, extends along the eastern or Pacific coast of Asia. The four main islands, running from north to south, are Hokkaido, Honshu (or the mainland), Shikoku, and Kyushu. Okinawa Island is about 380 miles southwest of Kyushu. About 3,000 smaller islands are included in the archipelago. In total land area, Japan is slightly smaller than California. About 73% of the country is mountainous, with a chain running through each of the main islands. Japan's highest mountain is the world famous Mt. Fuji (12,385 feet). Since so little flat area exists, many hills and mountainsides are cultivated all the way to the summits. As Japan is situated in a volcanic zone along the Pacific depth, frequent low intensity earth tremors and occasional volcanic activity are felt throughout the islands. Destructive earthquakes occur several times a century. Hot springs are numerous and have been developed as resorts.

Temperature extremes are less pronounced than in the United States, but the climate varies considerably. Sapporo, on the northernmost main island, has warm summers and long, cold winters with heavy snowfall. Tokyo, Nagoya, Kyoto, Osaka, and Kobe, in central and western parts of the largest island of Honshu, experi-

ence relatively mild winters with little or no snowfall and hot, humid summers. Fukuoka, on the island of Kyushu, has a climate similar to that of Washington, DC, with mild winters and short summers. Okinawa is subtropical.

PEOPLE

Japan's population, currently some 128 million, has experienced a phenomenal growth rate during the past 100 years as a result of scientific, industrial, and sociological changes, but this has recently slowed because of falling birth rates. In 2005, Japan's population declined for the first time, two years earlier than predicted. High sanitary and health standards produce a life expectancy exceeding that of the United States.

Japan is an urban society with only about 4% of the labor force engaged in agriculture. Many farmers supplement their income with part-time jobs in nearby towns and cities. About 80 million of the urban population is heavily concentrated on the Pacific shore of Honshu and in northern Kyushu. Major population centers include: Metropolitan Tokyo with approximately 14 million; Yokohama with 3.3 million; Osaka with 2.6 million; Nagoya with 2.1 million; Sapporo with 1.6 million; Kyoto with 1.5 million; Kobe with 1.4 million; and Kitakyushu, Kawasaki, and Fukuoka with 1.2 million each. Japan faces the same problems that confront urban industrialized societies throughout the world: overcrowded cities, congested roads, air pollution, and rising juvenile delinquency.

Shintoism and Buddhism are Japan's two principal religions. Shintoism is founded on myths and legends emanating from the early animistic worship of natural phenomena. Since it was unconcerned with problems of afterlife which dominate Buddhist thought, and since Buddhism easily accommodated itself to local faiths, the two religions comfortably coexisted, and Shinto shrines and Buddhist temples often became administratively linked. Today many Japanese are adherents of both faiths. From the 16th to the 19th century Shintoism flourished.

Adopted by the leaders of the Meiji restoration, Shintoism received state support and was cultivated as a spur to patriotic and nationalistic feelings. Following World War II, state support was discontinued, and the emperor disavowed divinity. Today Shintoism plays a more peripheral role in the life of the Japanese people. The numerous shrines are visited regularly by a few believers and, if they are historically famous or known for natural beauty, by many sightseers. Many marriages are held in the shrines, and children are brought there after birth and on certain anniversary dates; special shrine days are celebrated for certain occasions, and numerous festivals are held throughout the year. Many homes have "god shelves" where offerings can be made to Shinto deities.

Buddhism first came to Japan in the 6th century and for the next 10 centuries exerted profound influence on its intellectual, artistic, social, and political life. Most funerals are conducted by Buddhist priests, and many Japanese visit family graves and Buddhist temples to pay respects to ancestors.

Confucianism arrived with the first great wave of Chinese influence into Japan between the 6th and 9th centuries. Overshadowed by Buddhism, it survived as an organized philosophy into the late 19th century and remains today as an important influence on Japanese thought and values.

Christianity, first introduced into Japan in 1549, was virtually stamped out by the government a century later; it was reintroduced in the late 1800s and has spread slowly. Today it has 3 million adherents, including a relatively high percentage of important figures in education and public affairs.

Beyond the three traditional religions, many Japanese today are turning to a great variety of popular religious movements normally lumped together under the name "new religions." These religions draw on the concept of Shinto, Buddhism, and folk superstition and have developed in part to meet the social needs of elements of the population. The officially recognized new religions number in the hundreds, and total membership is reportedly in the tens of millions.

HISTORY

Japanese legend maintains that Japan was founded in 600 BC by the Emperor Jimmu, a direct descendant of the sun goddess and ancestor of the present ruling imperial family. About AD 405, the Japanese court officially adopted the Chinese writing system. Together with the introduction of Buddhism in the sixth century, these two events revolutionized Japanese culture and marked the beginning of a long period of Chinese cultural influence. From the establishment of the first fixed capital at Nara in 710 until 1867, the emperors of the Yamato dynasty were the nominal rulers, but actual power was usually held by powerful court nobles, regents, or "shoguns" (military governors).

Contact With the West

The first recorded contact with the West occurred about 1542, when a Portuguese ship, blown off its course to China, landed in Japan. During the next century, traders from Portugal, the Netherlands, England, and Spain arrived, as did Jesuit, Dominican, and Franciscan missionaries. During the early part of the 17th century, Japan's shogunate suspected that the traders and missionaries were actually forerunners of a military conquest by European powers. This caused the shogunate to place foreigners under progressively tighter restrictions. Ultimately, Japan forced all foreigners to leave and barred all relations with the outside world except for severely restricted commercial contacts with Dutch and Chinese merchants at Nagasaki. This isolation lasted for 200 years, until Commodore Matthew Perry of the U.S. Navy negotiated the opening of Japan to the West with the Convention of Kanagawa in 1854.

Within several years, renewed contact with the West profoundly altered Japanese society. The shogunate resigned, and the emperor was restored to power. The "Meiji restoration" of 1868 initiated many reforms. The feudal system was abolished, and numerous Western institutions were adopted, including a Western legal and educational system and constitutional government along parliamentary lines. In 1898, the last of the "unequal treaties" with Western powers was removed, signaling Japan's new status among the nations of the world. In a few decades, by creating modern social, educational, economic, military, and industrial systems, the Emperor Meiji's "controlled revolution" had transformed a feudal and isolated state into a world power.

Wars With China and Russia

Japanese leaders of the late 19th century regarded the Korean Peninsula

as a potential threat to Japan. It was over Korea that Japan became involved in war with the Chinese Empire in 1894-95 and with Russia in 1904-05. The war with China established Japan's domination of Korea, while also giving it the Pescadores Islands and Formosa (now Taiwan). After Japan defeated Russia in 1905, the resulting Treaty of Portsmouth awarded Japan certain rights in Manchuria and in southern Sakhalin, which Russia had received in 1875 in exchange for the Kurile Islands. Both wars gave Japan a free hand in Korea, which it formally annexed in 1910.

World War I to 1952

World War I permitted Japan, which fought on the side of the victorious Allies, to expand its influence in Asia and its territorial holdings in the Pacific. The postwar era brought Japan unprecedented prosperity. Japan went to the peace conference at Versailles in 1919 as one of the great military and industrial powers of the world and received official recognition as one of the "Big Five" of the new international order. It joined the League of Nations and received a mandate over Pacific islands north of the Equator formerly held by Germany.

During the 1920s, Japan progressed toward a democratic system of government. However, parliamentary government was not rooted deeply enough to withstand the economic and political pressures of the 1930s, during which military leaders became increasingly influential.

Japan invaded Manchuria in 1931 and set up the puppet state of Manchukuo. In 1933, Japan resigned from the League of Nations. The Japanese invasion of China in 1937 followed Japan's signing of the "anti-Comintern pact" with Nazi Germany the previous year and was part of a chain of developments culminating in the Japanese attack on the United States at Pearl Harbor, Hawaii, on December 7, 1941.

After years of war, resulting in the loss of 3 million Japanese lives and the atomic bombings of Hiroshima and Nagasaki, Japan signed an instrument of surrender on the U.S.S. Missouri in Tokyo Harbor on September 2, 1945. As a result of World War II, Japan lost all of its overseas possessions and retained only the home islands. Manchukuo was dissolved, and Manchuria was returned to China; Japan renounced all claims to Formosa; Korea was occupied and divided by the U.S. and the U.S.S.R.; southern Sakhalin and the Kuriles were occupied by the U.S.S.R.; and the U.S. became the sole administering authority of the Ryukyu, Bonin, and Volcano Islands. The 1972 reversion of Okinawa completed the U.S. return of control of these islands to Japan.

After the war, Japan was placed under international control of the Allies through the Supreme Commander, Gen. Douglas MacArthur. U.S. objectives were to ensure that Japan would become a peaceful nation and to establish democratic self-government supported by the freely expressed will of the people. Political, economic, and social reforms were introduced, such as a freely elected Japanese Diet (legislature) and universal adult suffrage. The country's constitution took effect on May 3, 1947. The United States and 45 other Allied nations signed the Treaty of Peace with Japan in September 1951. The U.S. Senate ratified the treaty in March 1952, and under the terms of the treaty, Japan regained full sovereignty on April 28, 1952.

GOVERNMENT AND POLITICAL CONDITIONS

Japan is a constitutional monarchy with a parliamentary government. There is universal adult suffrage with a secret ballot for all elective offices. Sovereignty, previously embodied in the emperor, is vested in the Japanese people, and the Emperor is defined as the symbol of the state.

Japan's Government is a parliamentary democracy, with a House of Representatives and a House of Councillors. Executive power is vested in a cabinet composed of a prime minister and ministers of state, all of whom must be civilians. The prime minister must be a member of the Diet and is designated by his colleagues. The prime minister has the power to appoint and remove ministers, a majority of whom must be Diet members. The judiciary is independent.

The five major political parties represented in the National Diet are the Liberal Democratic Party (LDP), the Democratic Party of Japan (DPJ), the New Clean Government Party (Komeito), the Japan Communist Party (JCP), and the Social Democratic Party (SDP).

Japan's judicial system, drawn from customary law, civil law, and Anglo-American common law, consists of several levels of courts, with the Supreme Court as the final judicial authority. The Japanese constitution includes a bill of rights similar to the U.S. Bill of Rights, and the Supreme Court has the right of judicial review. Japanese courts do not use a jury system, and there are no administrative courts or claims courts. Because of the judicial system's basis, court decisions are made in accordance with legal statutes. Only Supreme Court decisions have any direct effect on later interpretation of the law.

Japan does not have a federal system, and its 47 prefectures are not sovereign entities in the sense that U.S. states are. Most depend on the central government for subsidies. Governors of prefectures, mayors of municipalities, and prefectural and municipal assembly members are popularly elected to 4-year terms.

Recent Political Developments

The post-World War II years saw tremendous economic growth in Japan, with the political system dominated by the Liberal Democratic Party (LDP). That total domination lasted until the Diet lower house elections in

July 1993, in which the LDP failed for the first time to win a majority. The LDP returned to power in 1994, with majorities in both houses of the Diet. In elections in July 2007, the LDP lost its majority in the upper house, with the DPJ now holding the largest number of seats but with no party possessing a clear majority. Currently, the LDP maintains a majority in the lower house.

Shinzo Abe was elected Prime Minister in a Diet vote in September 2006. Abe was the first prime minister to be born after World War II and the youngest prime minister since the war. However, Abe resigned abruptly on September 12, 2007, not long after the LDP lost control of the upper house in the July 2007 elections in which the LDP's handing of domestic issues was a leading issue. Yasuo Fukuda of the LDP was elected Prime Minister by the Diet on September 25, 2007 to replace Abe. Fukuda, who suffered from low approval ratings, resigned suddenly on September 1, 2008. Former Foreign Minister Taro Aso was the victor in the subsequent LDP presidential election held on September 22, 2008, and was designated by the Diet and formally appointed by the Emperor as Japan's Prime Minister on September 24, 2008.

Principal Government Officials

Last Updated: 11/12/08

Emperor: **AKIHITO**
Prime Min.: **Taro ASO**
Chief Cabinet Sec.: **Takeo KAWAMURA**
Min. of Agriculture, Forestry, & Fisheries: **Shigeru ISHIBA**

Chmn., National Public Safety Commission: **Tsutomu SATO**
Governor, Bank of Japan: **Masaaki SHIRAKAWA**
Ambassador to the US: **Ichiro FUJISAKI**
Permanent Representative to the UN, New York: **Yukio TAKASU**

Japan maintains an embassy in the United States at 2520 Massachusetts Avenue NW, Washington, DC 20008 (tel: 202-238-6700; fax: 202-328-2187).

ECONOMY

Japan's industrialized, free market economy is the second-largest in the world. Its economy is highly efficient and competitive in areas linked to international trade, but productivity is far lower in protected areas such as agriculture, distribution, and services. After achieving one of the highest economic growth rates in the world from the 1960s through the 1980s, the Japanese economy slowed dramatically in the early 1990s, when the "bubble economy" collapsed, marked by plummeting stock and real estate prices.

Japan's reservoir of industrial leadership and technicians, well-educated and industrious work force, high savings and investment rates, and intensive promotion of industrial development and foreign trade produced a mature industrial economy. Japan has few natural resources, and trade helps it earn the foreign exchange needed to purchase raw materials for its economy. Japan's long-term economic prospects are considered good, and it has largely recovered from its worst period of economic stagnation since World War II. Real GDP in Japan grew at an average of roughly 1% yearly in the 1990s, compared to growth in the 1980s of about 4% per year. After sustaining several consecutive years of growth, the Japanese economy began to slow last year in line with global economic conditions. Real growth was 2.1% in 2007.

Agriculture, Energy, and Minerals

Only 15% of Japan's land is arable. The agricultural economy is highly subsidized and protected. With per hectare crop yields among the highest in the world, Japan maintains an overall agricultural self-sufficiency rate of about 40% on fewer than 5.6 million cultivated hectares (14 million acres). Japan normally produces a slight surplus of rice but imports large quantities of wheat, corn, sorghum, and soybeans, primarily from the United States. Japan is the largest market for U.S. agricultural exports.

Given its heavy dependence on imported energy, Japan has aimed to diversify its sources and maintain high levels of energy efficiency. Since the oil shocks of the 1970s, Japan has reduced dependence on petroleum as a source of energy from more than 75% in 1973 to about 52% in 2000. Other important energy sources are coal, liquefied natural gas, nuclear power, and hydropower. Today Japan enjoys one of the most energy-efficient developed economies in the world.

Deposits of gold, magnesium, and silver meet current industrial demands, but Japan is dependent on foreign sources for many of the minerals essential to modern industry. Iron ore, coke, copper, and bauxite must be imported, as must many forest products.

Labor

Japan's labor force consists of some 66.69 million workers, 40% of whom are women. Labor union membership was estimated to be about 10 million in 2006.

FOREIGN RELATIONS

Japan is the world's second-largest economy and a major economic power both in Asia and globally. Japan has diplomatic relations with nearly all independent nations and has been an active member of the United Nations since 1956. Japanese foreign policy has aimed to promote peace and prosperity for the Japanese people by working closely with the West and supporting the United Nations.

In recent years, the Japanese public has shown a substantially greater awareness of security issues and increasing support for the Self Defense Forces. This is in part due to the Self Defense Forces' success in disaster relief efforts at home, and its participation in peacekeeping operations such as in Cambodia in the early 1990s and Iraq in 2005-2006. However, there are still significant political and psychological constraints on strengthening Japan's security profile. Although a military role for Japan in international affairs is highly constrained by its constitution and government policy, Japanese cooperation with the United States through the 1960 U.S.-Japan Security Treaty has been important to the peace and stability of East Asia. Currently, there are domestic discussions about possible reinterpretation or revision of Article 9 of the Japanese constitution. Prime Minister Abe made revising or reinterpreting the Japanese constitution a priority of his administration. All postwar Japanese governments have relied on a close relationship with the United States as the foundation of their foreign policy and have depended on the Mutual Security Treaty for strategic protection.

While maintaining its relationship with the United States, Japan has diversified and expanded its ties with other nations. Good relations with its neighbors continue to be of vital interest. After the signing of a peace and friendship treaty with China in 1978, ties between the two countries developed rapidly. Japan extended significant economic assistance to the Chinese in various modernization projects and supported Chinese membership in the World Trade Organization (WTO). Japan's economic assistance to China is now declining. In recent years, however, Chinese exploitation of gas fields in the East China Sea has raised Japanese concerns given disagreement over the demarcation of their maritime boundary. Prime Minister Abe's October 2006 visits to Beijing and Seoul helped improve relations with China and South Korea that had been strained following Prime Minister Koizumi's visits to Yasukuni Shrine. At the same time, Japan maintains economic and cultural but not diplomatic relations with Taiwan, with which a strong bilateral trade relationship thrives.

Historical differences, including territorial disputes involving the Liancourt Rocks, resurfaced in 2008, complicating Japan's political relations with South Korea despite growing economic and cultural ties.

A surprise visit by Prime Minister Koizumi to Pyongyang, North Korea on September 17, 2002, resulted in renewed discussions on contentious bilateral issues—especially that of abductions to North Korea of Japanese citizens—and Japan's agreement to resume normalization talks in the near future. In October 2002, five abductees returned to Japan, but soon after negotiations reached a stalemate over the fate of abductees' families in North Korea. Japan's economic and commercial ties with North Korea plummeted following Kim Jong-il's 2002 admission that D.P.R.K. agents abducted Japanese citizens. Japan strongly supported the United States in its efforts to encourage Pyongyang to abide by the nuclear Non-Proliferation Treaty and its agreements with the International Atomic Energy Agency (IAEA). In 2006, Japan responded to North Korea's July missile launches and October nuclear test by imposing sanctions and working with the United Nations Security Council. The U.S., Japan, and South Korea closely coordinate and consult trilaterally on policy toward North Korea, and Japan participates in the Six-Party Talks to end North Korea's nuclear arms ambitions. Tokyo, however, refuses to provide assistance called for under the February 13, 2007 Six-Party Talks agreement until North Korea takes satisfactory steps to resolve the abduction issue. Japan and North Korea reached an agreement in August 2008 in which Pyongyang promised to reinvestigate abduction cases. However, the D.P.R.K. announced later that they would wait until a new Japanese administration was in place before taking concrete action on the cases.

Japan's relations with Russia are hampered by the two sides' inability to resolve their territorial dispute over the islands that make up the Northern Territories (Southern Kuriles) seized by the U.S.S.R. at the end of World War II. The stalemate over territorial issues has prevented conclusion of a peace treaty formally ending the war between Japan and Russia. The United States supports Japan on the Northern Territories issue and recognizes Japanese sovereignty over the islands. Russian Coast Guard boats sometimes seize Japanese fishing vessels operating in waters surrounding the disputed area. In August 2006, a Russian patrol shot at a Japanese fishing vessel, claiming the vessel was in Russian waters, killing one crewmember and taking three seamen into custody. In October 2007, Russia raised objections to U.S.-Japan cooperation on missile defense, and in February 2008, Tokyo protested the incursion into Japanese airspace of a Russian bomber. Despite the lack of progress in resolving the Northern Territories and other disputes, however, Japan and Russia continue to develop other aspects of the overall relationship, including two large, multi-billion dollar oil-natural gas consortium projects on Sakhalin Island. Japan has pursued a more active foreign policy in recent years, recognizing the responsibility that accompanies its

economic strength. It has expanded ties with the Middle East, which provides most of its oil, and has been the second-largest assistance donor (behind the U.S.) to Iraq and Afghanistan. In 2006, Japan's Ground Self Defense Force completed a successful two-year mission in Iraq, and the Diet extended the Anti-Terrorism Special Measures Law which allowed for Japan's Maritime Self Defense Force refueling activities in support of Operation Enduring Freedom in the Indian Ocean. On July 10, 2007 the Japanese Government decided to extend the Air Self-Defense Force's (ASDF) airlift support mission in Iraq to July 31, 2008. Under the Iraq Special Measures Law a wing of the ASDF's C-130 transport planes, based in Kuwait, will continue to carry personnel and supplies for the U.S.-led multinational forces and the United Nations in Iraq until the end of 2008, when that mission will formally end.

Japan increasingly is active in Africa and Latin America—recently concluding negotiations with Mexico and Chile on an Economic Partnership Agreement (EPA)—and has extended significant support to development projects in both regions. A Japanese-conceived peace plan became the foundation for nationwide elections in Cambodia in 1998. Japan's economic engagement with its neighbors is increasing, as evidenced by the conclusion of an EPA with Singapore and the Philippines, and its ongoing negotiations for EPAs with Thailand and Malaysia.

In May 2007, just prior to the G8 Summit in Heiligendamm, Prime Minister Abe announced an initiative to address greenhouse gas emissions and seek to mitigate the impact of energy consumption on climate. At the January 2008 World Economic Forum in Davos, Switzerland, Prime Minister Fukuda reiterated his commitment to this plan. As host of the G8 Summit in July 2008, Japan focused on four themes: environment and climate change, development and Africa, the world economy, and political issues including non-proliferation.

U.S.-JAPAN RELATIONS

The U.S.-Japan alliance is the cornerstone of U.S. security interests in Asia and is fundamental to regional stability and prosperity. Despite the changes in the post-Cold War strategic landscape, the U.S.-Japan alliance continues to be based on shared vital interests and values. These include stability in the Asia-Pacific region, the preservation and promotion of political and economic freedoms, support for human rights and democratic institutions, and securing of prosperity for the people of both countries and the international community as a whole.

Japan provides bases and financial and material support to U.S. forward-deployed forces, which are essential for maintaining stability in the region. Under the U.S.-Japan Treaty of Mutual Cooperation and Security, Japan hosts a carrier battle group, the III Marine Expeditionary Force, the 5th Air Force, and elements of the Army's I Corps. The United States currently maintains approximately 50,000 troops in Japan, about half of whom are stationed in Okinawa.

Over the past decade the alliance has been strengthened through revised Defense Guidelines, which expand Japan's noncombatant role in a regional contingency, the renewal of our agreement on Host Nation Support of U.S. forces stationed in Japan, and an ongoing process called the Defense Policy Review Initiative (DPRI). The DPRI redefines roles, missions, and capabilities of alliance forces and outlines key realignment and transformation initiatives, including reducing the number of troops stationed in Okinawa, enhancing interoperability and communication between our respective commands, and broadening our cooperation in the area of ballistic missile defense.

Implementation of these agreements will strengthen our capabilities and make our alliance more sustainable. After the tragic events of September 11, 2001, Japan has participated significantly with the global war on terrorism by providing major logistical support for U.S. and coalition forces in the Indian Ocean.

Because of the two countries' combined economic and technological impact on the world, the U.S.-Japan relationship has become global in scope.

The United States and Japan cooperate on a broad range of global issues, including development assistance, combating communicable disease such as the spread of HIV/AIDS and avian influenza, and protecting the environment and natural resources. Both countries also collaborate in science and technology in such areas as mapping the human genome, research on aging, and international space exploration.

As one of Asia's most successful democracies and its largest economy, Japan contributes irreplaceable political, financial, and moral support to U.S.-Japan diplomatic efforts.

The United States consults closely with Japan and the Republic of Korea on policy regarding North Korea. In Southeast Asia, U.S.-Japan cooperation is vital for stability and for political and economic reform. Outside Asia, Japanese political and financial support has substantially strengthened the U.S. position on a variety of global geopolitical problems, including the Gulf, Middle East peace efforts, and the Balkans. Japan is an indispensable partner on UN reform and the second largest contributor to the UN budget.

Japan broadly supports the United States on nonproliferation and nuclear issues. The U.S. supports Japan's aspiration to become a permanent member of the United Nations Security Council.

Economic Relations

U.S. economic policy toward Japan is aimed at increasing access to Japan's markets and two-way investment, stimulating domestic demand-led economic growth, promoting eco-

nomic restructuring, improving the climate for U.S. investors, and raising the standard of living in both the United States and Japan. The U.S.-Japan bilateral economic relationship—based on enormous flows of trade, investment, and finance—is strong, mature, and increasingly interdependent. Further, it is firmly rooted in the shared interest and responsibility of the United States and Japan to promote global growth, open markets, and a vital world trading system. In addition to bilateral economic ties, the U.S. and Japan cooperate closely in multilateral fora such as the WTO, Organization for Economic Cooperation and Development, the World Bank, and the International Monetary Fund, and regionally in the Asia-Pacific Economic Cooperation forum (APEC).

Japan is a major market for many U.S. products, including chemicals, pharmaceuticals, films and music, commercial aircraft, nonferrous metals, plastics, and medical and scientific supplies.

Japan also is the largest foreign market for U.S. agricultural products, with total agricultural exports valued at $10.1 billion in 2007, a 20% increase over the $8.39 billion in agricultural exports recorded by the U.S. Department of Agriculture in 2006. Revenues from Japanese tourism to the United States reached nearly $13 billion in 2005.

Trade between the United States and Japan remained strong in 2006. Total trade grew about 0.2% year-on-year. U.S. exports to Japan reached $62.7 billion in 2007, up from $59.6 billion in 2006. U.S. imports from Japan totaled $145.5 billion in 2007 ($148.1 billion in 2006).

U.S. foreign direct investment in Japan reached $91.8 billion in 2006, up from $79.3 billion in 2005, according to data compiled by the U.S. Department of Commerce's Bureau of Economic Analysis. New U.S. investment was especially significant in financial services, Internet services, and software, generating new export opportunities for U.S. firms and employment for U.S. workers.

TRAVEL

Consular Information Sheet

July 18, 2008

Country Description: Japan is a stable, highly developed parliamentary democracy with a modern economy. Tourist facilities are widely available. Find information quickly and easily on consular services for all of Japan, including registration, passport renewal, legal matters and safety and security, using convenient, alphabetized links at http://japan.usembassy.gov/acs.

Entry Requirements: A valid passport and, for tourist/business "visa free" stays up to 90 days, an onward/return ticket are required. Passports must be valid for the intended period of stay in Japan. A visa is not required for tourist/business stays up to 90 days. Americans cannot work on a 90-day "visa free" entry. As a general rule, "visa free" entry status may not be changed to another visa status without departing and then re-entering Japan with the appropriate visa such as a spouse, work or study visa. All foreign nationals entering Japan, with the exemption of certain categories listed below, are required to provide fingerprint scans and be photographed at the port of entry. This requirement does not replace any existing visa or passport requirements. Foreign nationals exempt from this new requirement include special permanent residents, persons under 16 years of age, holders of diplomatic or official visas, and persons invited by the head of a national administrative organization. U.S. travelers on official business must have a diplomatic or official visa specifying the nature of travel as "As Diplomat," "As Official," or "In Transit" to be exempt from biometric collection. All other visa holders, including those with diplomatic and official visas stating "As Temporary Visitor," are subject to this requirement. SOFA personnel are exempt from the new biometrics entry requirements under SOFA Article 9 (2).

U.S. citizens entering or transiting Japan should ensure that their passports and visas are up to date before leaving the United States. Airlines have mistakenly boarded U.S. citizens coming to Japan, even though their passports had already expired. The U.S. Embassy or our consulates cannot "vouch for" a U.S. citizen without a valid passport, and passport services are not available at the airport. In some instances, travelers have been returned immediately to the U.S., while in other cases, they have been issued 24-hour "shore passes" and were required to return the next day to Japanese Immigration for lengthy processing.

Airlines in Japan will deny boarding to Americans who seek to transit Japan without the required travel documents for their final destinations in Asia. Many Asian countries require that travelers hold passports valid for a minimum of six months. It is not usually possible to obtain a new U.S. passport and foreign visa during a brief stopover while transiting Japan, as tourist passport processing in Japan can take approximately two weeks.

Airlines in Japan will deny boarding to Americans for onward flights to China if the U.S. passport holder does not have a Chinese visa. Transit visas in China are required for any stop (even if the traveler does not exit the plane or train). Without preplanning the entire trip, the traveler is faced with having to obtain a Chinese visa in Japan, which can be a lengthy and complex process. The Chinese Embassy requires at least one full, blank page to be available in the passport. The U.S. Embassy and Consulates cannot assist in obtaining Chinese visas.

Military/SOFA Travelers: While active-duty U.S. military personnel may enter Japan under the Status of Forces Agreement (SOFA) with proper Department of Defense (DOD) identification and travel orders, all SOFA family members, civilian employees and contractors must have a valid passport and, in some cases, a SOFA visa to enter Japan. Active-duty military personnel should obtain a tourist passport prior to leaving the United States to accommodate off-duty travel elsewhere in Asia as obtaining one while in Japan can take several weeks. Personnel whose duties will include official travel should also obtain an Official Passport before coming to Japan to avoid delays of up to two months, as these overseas applications must be referred to a special office in Washington, adding to processing times. DOD travelers should consult the DOD Foreign Clearance Guide, DOD 4500.54 before leaving the United States.

New Long Term Residency Requirements: Japan recently modified its Immigration Control and Refugee Recognition Act. The law now requires that certain long-term residents who obtained their status by being of Japanese descent (Nikkei or sansei, etc) provide satisfactory evidence that they do not have a criminal record in their home country when renewing their resident card. However, because Japanese requirements do not appear to be a clear-cut, the Embassy highly recommends that residents consult with their local immigration office before starting the process of obtaining their U.S. criminal record. For more details about the Japanese requirements, check with the nearest immigration office in Japan, http://www.moj.go.jp/ENGLISH/information/ib-09.html. U.S. citizens with long-term resident status in Japan who are required to provide evidence that they do not have criminal records should contact the Federal Bureau of Investigation

(FBI) and provide it with a copy of their fingerprints. To request such service, please follow the guidance listed at http://www.fbi.gov/hq/cjisd/fprequest.htm.

Also, it is important to remember that "Long Term Resident" (Teijusha) and "Permanent Resident" (Eijusha) are different and are subject to different requirements.

For more information about the Japanese visa waiver for tourists, Japan's strict rules on work visas, special visas to take depositions, and other visa issues, travelers should consult the Consular Section of the Embassy of Japan at 2520 Massachusetts Avenue NW, Washington, DC 20008, tel. (202) 238-6800, or the nearest Japanese consulate. Our posts in Japan cannot assist in obtaining visas for Japan.

Safety and Security: The events of September 11, 2001, serve as a reminder of the continuing threat from terrorists and extremist groups to Americans and American interests worldwide. There have been no major terrorist incidents in Japan since 1995; however, since terrorists can strike at any time and at any place, U.S. citizens should be aware of the potential risks and take these into consideration when making travel plans. The security situation in Japan remains the same with no new credible threat information. The Government of Japan has maintained heightened security measures at key facilities and ports of entry, as counter terrorism precautions linked to the increased tensions in the Middle East.

Our offices in Japan disseminate threat information through our nationwide email warden system and post current threat information on the U.S. Embassy's American Citizens Services (ACS) web site at http://japan.usembassy.gov/acs. The Department of State will continue to develop information about potential threats to U.S. citizens overseas, and to share threat information through its consular information program documents, available from the Bureau of Consular Affairs home page. The government of Japan is vigilant in tracking terrorist threat indicators and remains at a high state of alert. Local police substations (Koban) and police emergency dispatchers (tel. 110) should be contacted to report suspicious activity.

For the latest security information, Americans traveling abroad should regularly monitor the Department's web site, where the current Worldwide Caution Public Announcement, Travel Warnings and Public Announcements can be found. Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the United States and Canada, or, for callers outside the United States and Canada, a regular toll line at 1-202-501-4444. The Department of State urges U.S. citizens to take responsibility for their own personal security while traveling overseas.

Crime: Crimes against U.S. citizens in Japan usually only involve personal disputes, theft or vandalism. The general crime rate in Japan is at levels well below the U.S. national average. Violent crime is rare, but does exist. Incidents of pick pocketing of foreigners in crowded shopping areas, on trains and at airports have been a sporadic concern. Every year, a number of Americans report their passports lost or stolen at Narita Airport, especially passports being carried in pockets. Some Americans report that Japanese police procedures appear to be less sensitive and responsive to a victim's concerns than would be the case in the United States, particularly in cases involving domestic violence, sexual assault, and when both the victim and the perpetrator are foreigners. Few victim's assistance resources or battered women's shelters exist in major urban areas, and are generally unavailable in rural areas. Investigations of sexual assault crimes are often conducted without women police officers present and typically involve inquiries into the victim's sexual history and previous relationships. Quality of translations can vary significantly, and has proven unsettling to some American victims.

Concerns Regarding Roppongi, Tokyo: The majority of crimes reported by Americans have occurred in Roppongi, an entertainment district that caters to foreign clientele. Incidents involving U.S. Citizens since spring 2004 include murder, assault, overdoses on heroin allegedly purchased in Roppongi, theft of purses and wallets at bars in clubs, exorbitant bar tabs and drugs allegedly slipped into drinks. A number of Americans have also been arrested over the past year in Roppongi for various offenses. You can read about these reported incidents in our monthly newsletter by subscribing to it or by reading it on http://japan.usembassy.gov/acs. Please be aware that Roppongi has also been the scene of recent violence between criminal syndicates. Americans are urged to keep these incidents in mind and exercise caution should they choose to visit Roppongi.

Police can be summoned throughout Japan by dialing 110. Fire and ambulance services can be summoned by dialing 119. These numbers may not work from cell phones, however, and English-speaking dispatchers may not be available. Advice on how to call for an ambulance in Japan is available at http://japan.usembassy.gov/e/acs/tacs-call.html. Persons seeking assistance should be able to describe their address/location in Japanese or enlist a friend who can do so, as few police officers speak English.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney, if needed.

Except for emergencies, a replacement passport takes two to three weeks to process. Travelers will then need to contact Japanese Immigration to have their Japanese visas reissued. "Lost" passports will not disguise an over-stay of one's 90-day entry, as Japanese Immigration records are computerized. Information on replacing a lost passport, included the necessary forms, is available at http://japan.usembassy.gov/e/acs/tacs-7130e.html.

There are two local equivalents to the "911" emergency line in Japan. Please dial 119 to call an ambulance and 110 to call the police. For more information, please see http://japan.usembassy.gov/e/acs/tacs-call.html.

Medical Facilities and Health Information: While medical care in Japan is good, English-speaking physicians and medical facilities that cater to Americans' expectations are expensive and not widespread. Japan has a national health insurance system, which is available only to those foreigners with long-term visas for Japan. National health insurance does not pay for medical evacuation or medical care outside of Japan. Medical caregivers in Japan require payment in full at the time of treatment or concrete proof of ability to pay before treating a foreigner who is not a member of the national health insurance plan.

U.S.-style and standard psychiatric care can be difficult to locate in major urban centers in Japan, and generally is not available outside of Japan's major cities. Extended psychiatric care for foreigners in Japan is difficult to obtain at any price; see http://japan.usembassy.gov/e/acs/tacs-psychadmissions.html for more information. U.S. prescriptions are not honored in Japan, so travelers with ongoing prescription-medicine needs should arrive with a sufficient supply to see them through their stay in Japan, or enough until they are able to see a local care provider. Certain medications, including some commonly prescribed for depression and Attention Deficient Disorder (ADD), are not widely available. Please see the section below entitled, "Confiscation of Prescription Drugs and Other Medication," regarding the importation of medicine into Japan. More information on importing medicines into Japan is also available at http://japan.usembassy.gov/e/acs/tacs-medimport.html. A list of English-speaking medical facilities throughout Japan is available on our web site.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747); or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Japan.

Medical Insurance: U.S. medical insurance is not always valid outside the United States. U.S. Medicare and Medicaid programs do not provide payment for medical services outside the United States. It can be both difficult and expensive for foreigners not insured in Japan to receive medical care. Serious medical problems requiring hospitalization and/or medical evacuation can cost anywhere from $30,000 to $120,000. Private U.S. citizens are ineligible for treatment at U.S. military hospitals in Japan or U.S. military medical evacuation to the U.S. Access to military facilities is controlled solely by the military; veterans with service-connected disabilities should contact the appropriate U.S. military hospital before traveling to Japan. In the event of death, the cost of preparation and shipment of remains to the U.S is over $15,000. Almost no health care providers accept U.S.-based health insurance "up front"; patients pay in cash and then seek reimbursement from their insurance company once they return home. Most small clinics and some large hospitals do not accept credit/debit cards. No facility accepts checks drawn on U.S. bank accounts.

The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and if it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Japan is provided for general reference only, and it may not be totally accurate in a particular location or circumstance.

Driving in Japan is quite complicated and expensive. Those who cannot read the language will have trouble understanding road signs. Highway tolls are assessed at about $1 (U.S.) per mile. City traffic is often very congested. A 20-mile trip in the Tokyo area may take two hours. There is virtually no legal roadside parking. In mountainous areas, roads are often closed during the winter, and cars should be equipped with tire chains.

Roads in Japan are much narrower than those in the United States. Japanese compulsory insurance (JCI) is mandatory for all automobile owners and drivers in Japan. Most short-term visitors choose not to drive in Japan. Vehicular traffic moves on the left. Turns at red lights are forbidden, unless specifically authorized.

Japanese law provides that all persons who drive in Japan are held liable in the event of an accident, and assesses fault in an accident on all parties. Drivers stopped for driving under the influence of intoxicants will have their licenses confiscated. Persons found guilty of "drunken, speeding or blatantly careless driving resulting in injury" are subject to up to 15 years in prison. The National Police Agency (NPA) oversees the administration and enforcement of traffic laws. Further information in

English is available on the NPA's web site at http://www.npa.go.jp/english/index.htm.

Emergency Assistance: Within Japan, please dial 110 for police, and 119 for ambulance. For roadside assistance, please contact JAF (Japan Automobile Federation) at 03-5730-0111 in Tokyo, 072-645-0111 in Osaka, 011-857-8139 in Sapporo, 092-841-5000 in Fukuoka, or 098-877-9163 in Okinawa.

For specific information concerning Japanese driving permits, vehicle inspection, road tax and mandatory insurance, please contact the Japan National Tourist Organization offices in Chicago, Los Angeles, New York or San Francisco via the Internet at http://www.jnto.go.jp. In addition, information about roadside assistance, rules of the road and obtaining a Japanese driver's license is available in English from the Japan Automobile Federation (JAF) web site at http://www.jaf.or.jp/e/index.htm.

International Driving Permits (IDP): An international driving permit issued in the United States by the American Automobile Association (AAA) or the American Automobile Touring Alliance (AATA) is required of short-term visitors who drive in Japan. International driving permits are not issued by the U.S. Embassy or by its Consulates and must be obtained prior to arriving in Japan. IDPs issued via the Internet and/or by other organizations are not considered valid in Japan. IDPs issued to Americans in third countries where they are not resident are often considered invalid, or are subject to close scrutiny.

"Residents" are expected to convert to or obtain a Japanese drivers license. Persons using an international driver's license who are resident in Japan can be subject to fines or arrest. The exact boundary between "resident" and "non-resident" is unclear. In practice it seems to involve more than simply visa status or length of stay in Japan and is determined by the police. In short, an international license is not a permanent or expedient substitute for a valid Japanese license. You can learn more at http://japan.usembassy.gov/e/acs/tacs-drive.html.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Japan's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Japan's air carrier operations. For further information, travelers may visit the FAA web site at http://www.faa.gov.

Customs Regulations: Japan has very strict laws regarding the importation and possession of firearms and other weapons. Persons bringing a firearm or sword into Japan (including target and trophy pistols, air guns, some pocket knives and Japanese-origin swords) may have these items confiscated by Japanese customs authorities, and may be arrested, prosecuted and deported or jailed. Some prescription medications, as well as some over-the-counter medications, cannot be imported into Japan. Please contact the Japanese Embassy or nearest Japanese Consulate in the United States, or visit the Japan Customs web site in English online at http://www.customs.go.jp for specific information regarding import restrictions and customs requirements.

Japanese customs authorities encourage the use of an ATA (Admission Temporaire/Temporary Admission) Carnet for the temporary importation into Japan of professional equipment, commercial samples and/or goods for exhibitions and trade fairs. ATA Carnet Headquarters located at the U.S. Council for International Business, 1212 Avenue of the Americas, New York, NY 10036 issues and guarantees the ATA Carnet in the United States. For additional information, please call (212) 354-4480, or send an email to atacarnet@uscib.org, or visit http://www. uscib.org for details.

Confiscation of Prescription Drugs and Other Medication: Decisions on what medications may be imported legally into Japan are made by the Japanese Government, and unfortunately the limited information available at the American Embassy and Consulate does not include comprehensive lists of specific medications or ingredients.

It is illegal to bring into Japan some over-the-counter medicines commonly used in the United States, including inhalers and some allergy and sinus medications. Specifically, products that contain stimulants (medicines that contain pseudoephedrine such as Actifed, Sudafed, and Vicks inhalers) or codeine are prohibited. Up to a two-month supply of allowable over-the-counter medication and up to a four-month supply of allowable vitamins can be brought into Japan duty-free. Some U.S. prescription medications cannot be imported into Japan, even when accompanied by a customs declaration and a copy of the prescription. Generally, up to one month's supply of allowable prescription medicine can be brought into Japan. Travelers must bring a copy of their doctor's prescription as well as a letter stating the purpose of the drug. Travelers should not mail prescription medicine including insulin and injectors without obtaining an import certification called "Yakkan-Syoumei" from the Ministry of Health, Labor and Welfare. More information on importing medicines into Japan is also available at http://japan.usembassy.gov/e/acs/tacs-medimport.html.

Japanese physicians can often prescribe similar, but not identical, substitutes to medicines available in the United States. A Japanese doctor, consulted by phone in advance, is also a good source of information on medications available and/or permitted in Japan. A list of English-speaking medical facilities throughout Japan is available on our web site at http://japan.usembassy.gov. Some popular medications legal in the U.S., such as Prozac and Viagra, are sold illegally in Japan on the black market. You are subject to arrest and imprisonment if you purchase such drugs illegally while in Japan. Persons traveling to Japan carrying prescription and non-prescription medications should consult the Japanese Embassy, or a

Japanese Consulate, in the United States before leaving the U.S. to confirm whether they will be allowed to bring the particular medication into Japan. A full listing of phone numbers and email addresses is available at www.us.emb-japan.go.jp/jicc/consulat.htm.

Pets: The Japanese Animal Quarantine Service (AQS) http://www.maff-aqs.go.jp/english/index.htm has radically revised its procedures for importing pets. In most instances, the process will take at least seven (7) months from the date of the first rabies vaccination before a pet may enter Japan, so advance planning is critical. More information about importing a pet into Japan is available at http://japan.usembassy.gov/e/acs/tacs-petsi.html. More information about exporting a pet from Japan is available at http://japan.usembassy.gov/e/acs/tacs-petse.html.

Consular Access: U.S. citizens must carry their U.S. passports or Japanese alien registration cards with them at all times so that, if questioned by local officials, the U.S. citizen can establish proof of identity and citizenship. Under Japanese law, the police may stop any person on the street at any time and demand to see an ID. If a foreigner does not have with him/her either a passport or valid Japanese Alien Registration Card, s/he is subject to arrest. Due to recent crackdowns by the police, such random stops for ID are becoming increasingly more common, especially in areas frequented by foreigners. In accordance with the U.S.-Japan Consular Convention, U.S. consular officers are generally notified within 24 hours of the arrest of a U.S. citizen, if the U.S. citizen requests consular notification.

Conditions at Prisons and Detention Facilities: Japanese prisons and detention facilities maintain internal order through a regime of very strict discipline. American-citizen prisoners often complain of stark, austere living conditions and psychological isolation. A prisoner can become eligible for parole only after serving about 60-70% of his/her sentence. Early parole is not allowed for any reason—humanitarian, medical or otherwise. Access to competent interpreters is not required at all times under Japanese criminal law. More information is available at http://japan.usembassy.gov/e/acs/tacs-7110a.html. Japan acceded to the Council of Europe Convention on the Transfer of Sentenced Persons on June 1, 2003.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking Japanese law can be more severe than in the United States for similar offenses. Persons violating Japanese law, even unknowingly, may be expelled, arrested or imprisoned. Persons arrested in Japan, even for a minor offense, may be held in detention without bail for two to three months during the investigation and legal proceedings. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States. A list of English-speaking lawyers throughout Japan is available on our web site at http://japan.usembassy.gov.

Illegal Drugs: Penalties for possession or use of, or trafficking in illegal drugs, including marijuana, in Japan are strict, and convicted offenders can expect long jail sentences and fines. In most drug cases, suspects are detained incommunicado, which bars them from receiving visitors or corresponding with anyone other than a lawyer or U.S. consular officer until after indictment, which may take several months. Solitary confinement is common.

People can be convicted of drug use based on positive blood or urine tests alone, and multiple Americans are now serving time in Japanese prisons as the result of sting operations and the use of informants. The Japanese police routinely share information on drug arrests with Interpol, assuring that notice of the arrest will reach U.S. law enforcement agencies. About half of all Americans now in prison in Japan are incarcerated for drug-related crimes.

Japanese authorities aggressively pursue drug smugglers with sophisticated detection equipment, "sniffing" dogs and other methods. Travelers and their luggage entering Japan are screened at ports of entry; incoming and outgoing mail, as well as international packages sent via DHL or FEDEX, is also checked carefully. The Japanese police make arrests for even the smallest amounts of illegal drugs. Several Americans are now in custody after having mailed illegal drugs to themselves from other countries. Other Americans are serving time for having tried to bring drugs into Japan as paid couriers working out of Southeast Asia or Europe.

Immigration Penalties: Japanese work visas are issued outside of Japan for a specific job with a specific employer at a specific place of employment, and are not transferable. It is illegal for U.S. citizens to work in Japan while in tourist or visa-waiver status. Japanese authorities do not allow foreigners to change their immigration status from visa-waiver status to work status while in Japan. Japanese immigration officers may deny entry to travelers who appear to them to have no visible means of support. Please contact the Japanese Embassy or nearest Japanese Consulate in the United States for guidance on what constitutes adequate financial support for a specific period of time. A U.S. citizen who works in Japan without a work visa may be subject to arrest, which can involve several weeks or months of incarceration, followed by conviction and imprisonment or deportation. The deportee must bear the cost of deportation, including legal expenses and airfare.

Due to recent changes in the law, penalties for overstaying one's visa or working illegally have toughened substantially. Fines can run into thousands of dollars, and in some cases re-entry bans can be as long as ten years or indefinite for drug offenders.

Employment Issues: Although the Japanese economy is emerging slowly from a prolonged recession, U.S. citizens are advised against coming to work in Japan without the proper working visa arranged ahead of time, or in the hopes of earning a large salary. Teaching English, even with private students, and serving as a hostess, are both considered "work" in Japan and are illegal without the proper visa.

Some U.S.-based employment agencies and Japanese employers do not fully discuss, or correctly represent, the true nature of employment terms and conditions. U.S. consular officers in Japan receive numerous complaints from U.S. citizens who come to Japan to work as English teachers, carpenters, models, actors, entertainers, exotic dancers and bar hostesses. These complaints include contract violations, non-payment of salary for months at a time, sexual harassment, intimidation and threats of arrest, deportation and physical assault.

A minimum requirement for effectively seeking the protection of Japanese labor law is a written and signed work contract. Without such a contract, Japanese authorities do not intervene on behalf of foreign workers. It is prudent for U.S. citizens coming to work in Japan to carefully review their contracts and the bona fides of their Japanese employer before traveling to Japan. U.S. consular officers generally are unable to confirm the bona fides of prospective Japanese employers, although they may be familiar with organizations about which they have received complaints in the past. If asked to do something they find troubling, U.S. citizens may wish to reassess their reason for being in Japan and consider terminating their employment and returning to the United States. Complaints against U.S.-based employment agencies or recruiters may be directed to the Better Business Bureau at http://welcome.bbb.org or the Office of the Attorney General of the state in question.

Living Expenses: Japan's cost of living is one of the highest in the world. The use of credit/debit cards is not widespread, particularly outside major cities. While there are ATMs in Japan, most are not open 24 hours a day or do not accept a U.S.-based card. ATMs at major airports, foreign bank branches and Japanese Post Offices are more likely to accept foreign cards than other locations.

Taxi fares from airports to downtown Osaka and Tokyo can cost hundreds of dollars; bus fare can run US$25 or more. The airport departure fee is generally included in the ticket prices of flights departing from both Narita (Tokyo) International Airport and Kansai (Osaka) International Airport.

English Help And Information Lines: Tourists and foreign residents in Japan have access to valuable information, including professional counseling, via help and information telephone hotlines. The Tokyo English Lifeline (http://www.telljp.com) provides English-speaking counseling and referrals at 03-5774-0992. The Japan Help Line provides similar assistance nationwide at 0570-000-911 (domestic), 813-3435-8017 (international) (http://www.jhelp.com/).

Disaster Preparedness: Japan is faced with the ever-present danger of deadly earthquakes and typhoons. Japan is one of the most seismically active locations in the world; minor tremors are felt regularly throughout the islands. While responsibility for caring for disaster victims, including foreigners, rests with the Japanese authorities, one of the first things a traveler should do upon arriving in Japan is to learn about earthquake and disaster preparedness from hotel or local government officials.

Additional details on self-preparedness are available via the Internet at http://japan.usembassy.gov/acs and on the U.S. Federal Emergency Management Agency (FEMA) home page at http://www.fema.gov.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov. Japan is not a Hague Convention signatory, and U.S. court custody decisions are not enforceable in Japan. Almost all children born to a Japanese parent since the 1980s are Japanese citizens and may travel on Japanese passports issued in the U.S. even if the left-behind parent in the U.S. does not agree to the issuance of a U.S. passport. The Embassy and our Consulates do not have access to Japanese Immigration records and cannot confirm that a child has entered or departed Japan. The Japanese government will not refuse entry to one of its citizens, even if that citizen is a dual-national child subject to a U.S. court-based custody decision. The Embassy and our Consulates cannot serve process, appear in court on a U.S.-based parent's behalf or carry out U.S.-based arrest warrants. Parents who attempt to re-abduct their children may be subject to kidnapping charges.

Registration and Embassy Locations: Americans living in or visiting Japan are encouraged to register through the State Department's travel registration web site or through the Embassy's web site at http://japan.usembassy.gov/acs where they may also obtain updated information on travel and security within Japan. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, U.S. citizens make it easier for the Embassy or Consulate to contact them in case of emergency. U.S. citizens resident in or visiting Japan are encouraged to sign up for an e-mail newsletter at http://japan.usembassy.gov/acs. Alien registration formalities required under Japanese immigration law are separate from U.S. citizen registration. In accordance with the Privacy Act, information on your welfare or whereabouts may not be released to inquirers without your expressed written authorization. All consular information for Japan is available at http://japan.usembassy.gov.

A full list of our holiday closings is available at http://japan.usembassy.gov/e/acs/tacs-holidays.html. Subscribers to our monthly email newsletter (available from http://

japan.usembassy.gov/e/tacs-main.html#newsletter) receive regular updates on holiday closings.

The U.S. Embassy in Tokyo is located at 1-10-5 Akasaka, Minato-ku, Tokyo 107-8420 Japan; telephone 81-3-3224-5000; fax 81-3-3505-1862; American Citizen Services fax81-3-3224-5856. The Visa Information Service, operated by TeleTech Government Solutions, LLC in partnership with Computer Science Corporation (CSC), provides an operator-assisted service between 8:00 and 18:00, Monday through Friday (except on American and Japanese holidays). Please note that this service is a user-pays service. You will need to have a valid credit card ready before you use this service. The fee is $18.35 per call/email. For more details, please read http://japan.usembassy.gov/e/tvisanivcontact.html.

The U.S. Consulate General in Osaka-Kobe is located at 2-11-5 Nishitenma, Kita-ku, Osaka 530-8543; telephone 81-6-6315-5900; fax 81-6-6315-5914. Recorded information for U.S. citizens concerning U.S. passports, notarials and other American citizen services is available 24 hours at 81-6-6315-5900.

The U.S. Consulate General in Naha is located at 2-1-1 Toyama, Urasoe, Okinawa 901-2104; telephone 81-98-876-4211; fax 81-98-876-4243.

The U.S. Consulate General in Sapporo is located at Kita 1-Jo Nishi 28-chome, Chuo-ku, Sapporo 064-0821; telephone 81-11-641-1115, fax 81-11-643-1283.

The U.S. Consulate in Fukuoka is located at 2-5-26 Ohori, Chuo-ku, Fukuoka 810-0052; telephone 81-92-751-9331; fax 81-92-713-9222.

The U.S. Consulate in Nagoya is located at Nagoya International Center Bldg. 6th floor, 1-47-1 Nagono, Nakamura-ku, Nagoya 450-0001; telephone 81-52-581-4501; fax 81-52-581-3190.

The U.S. Consulate in Nagoya offers limited emergency consular services for U.S. citizens. Consular officers from Osaka also travel to Nagoya on the second Wednesday of each month to provide Americans with notarial services, passport renewals, and report of birth and passport applications for newborn children on an appointment basis.

To schedule an appointment for these American Citizen Services, contact Consulate General Osaka-Kobe at AOK@state.gov, fax 06-6315-5914, or call 06-6315-5912 between 9:00 a.m. and 4:30 p.m.

Maps to all our offices in Japan, along with directions on using public transportation to reach us, are available at http://japan.usembassy.gov/e/acs/tacs-7123.html.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Japan is not party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention).

Who Can Adopt? There are two types of adoptions in Japan–regular and special. Regular adoptions do not sever the ties between the child and his/her birth family. As a result, these types of adoptions may not be eligible for a United States immigrant visa. Japan introduced "special" adoptions in an effort to make Japanese adoptions more compatible with intercountry adoptions and to give more protection to adopted children under six years of age. To bring an adopted child to United States from Japan, you must be found eligible to adopt by the United States Government. In addition to the United States requirements for adoptive parents, Japan also has the following requirements for adoptive parents.

Residency Requirements: The Japanese courts will not accept an adoption application by prospective adoptive parents who are in Japan on a visitor's visa. At least one parent must provide evidence of long term residence in Japan. When the adoption is finalized at least one parent must be present at court. Proxy adoptions are not permitted.

Age Requirements: In special adoptions, prospective adoptive parents must be over 25 years of age. In regular adoptions, prospective adoptive parents must be at least 20 years of age.

Marriage Requirements: Depending on the United States State law, the Family Court may allow a single parent to adopt (case by case basis).

Income Requirements: While there are no specific income requirements for intercountry adoption from Japan, the prospective adoptive parents will have to provide documentation on their income and finances.

Who Can Be Adopted? Normally a child must meet the definition of an orphan under United States law for you to bring him or her home back to the United States. In addition to these requirements, Japan has specific requirements that a child must meet in order to be eligible for adoption.

Japanese law does not define "orphan." Japanese law defines a "child who requires attention" as:

- Born out of wedlock;
- Abandoned infant;
- Parent(s) deceased or disappeared;
- Parents are incapable of providing support; or
- Abused.

There are two types of adoptions in Japan–regular and special. Regular adoptions do not sever the ties between the child and his/her birth family. As a result, these types of

adoptions may not be eligible for a United States immigrant visa. Japan introduced "special" adoptions in an effort to make Japanese adoptions more compatible with intercountry adoptions and to give more protection to adopted children under six years of age.

Japan's Adoption Authority: Family Court and the Child Guidance Center (CGC)

The Process: The first step in adopting a child from Japan is usually to select a licensed agency in the United States that can help with your adoption. Adoption service providers must be licensed by the United States state in which they operate.

Neither adoption agencies nor attorneys are required to process an intercountry adoption in Japan. However, Japanese attorneys specializing in adoptions do exist, and the Japanese Government does maintain a list of recommended adoption agencies. All adoption agencies in Japan are privately operated.

American prospective adoptive parents who would like to contact adoption agencies in Japan can obtain a list of adoption agencies on the United States Embassy's website at http://japan.usembassy.gov/e/acs/tacs-adopt.html.

To bring an adopted child from Japan to the United States, you must apply to be found eligible to adopt (Form I-600A) by the USCIS. If you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority in Japan will provide you with a referral to a child.

Role of the Adoption Authority: The CGC is the local government authority responsible for determining whether a child requires protection. The CGC will not issue a certificate if the child is to be adopted abroad or if the child will benefit from a privately arranged adoption.

Role of the Court: The Family Court reviews the adoption application. In reviewing the application, the Court examines the law governing intercountry adoptions in the prospective adoptive parents' state of legal domicile. the Court informs the prospective adoptive parents of their court hearing date.

This first hearing date generally occurs at the end of the trial six-month period. Approximately two to three weeks after the final hearing, the judge will decide whether or not to approve the adoption. If the judge approves the petition, the Court issues a certificate allowing "Permission to adopt" (yoshi to suru koto o kyoka-suru). If the biological parents or any interested parties do not object within two weeks of the parents' registering the adoption, it is considered final.

Role of Adoption Agencies: Neither adoption agencies nor attorneys are necessary to complete an intercountry adoption in Japan.

Adoption Application: The prospective adoptive parents submit their adoption application to the Family Court with jurisdiction over the child's residence.

Time Frame: Intercountry adoptions through the Family Court require at least nine months and sometimes longer. The Family Court does not mandate a time limit on when an adoption must be completed.

Adoption Fees: The costs for intercountry adoptions from Japan vary widely; however, the average total cost is approximately $20,000 USD.

This includes fees for the Family Court, adoption agency, immigration processing, airfare, lodging, and document translations and authentications.

It should be noted that adoption agency fees can range from $2,000 to $60,000 USD, so the overall cost of adoption depends on the agency the prospective adoptive parents select. Prospective adoptive parents may incur additional fees when adopting a child(ren) with medical conditions.

In the adoption services contract that you sign at the beginning of the adoption process, your agency will itemize the fees and estimated expenses related to your adoption process.

Documents Required: The following is a list of documents required for an intercountry adoption from Japan:

- Birth certificate and/or family register of all parties;
- Copy of passport, Japanese visa, and Alien Registration card;
- Copy of United States military ID (where applicable);
- Marriage, divorce, and death certificates (where applicable);
- Medical examination certificates;
- Certificate of foster parent registration (where applicable);
- Certificate of good conduct/no criminal record for each adoptive parent (issued by their home city or state police department);
- Certificate of legal address, employment, and income;
- Copy of any property ownership deeds and/or bank statements;
- Biographic history of all parties;
- Statement of consent to adopt by the child's biological parent(s) or guardian;
- Statement of prospective parent(s)' intent to adopt the identified child;
- Pictures of all parties, preferably of parents with the child;
- Home Study (approved by an authorized and licensed adoption agency); and
- Two character references;

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Japan does not have any post-adoption requirements.

International Parental Child Abduction
November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel. Japan is not a party to the 1980 Hague Convention on the Civil Aspects of International Child Abduction.

Japanese civil law stresses that in cases where custody cannot be reached by agreement between the parents, the Japanese Family Court will resolve the issue based on the best interests of the child. However, compliance with Family Court rulings is essentially voluntary, which renders any ruling unenforceable unless both parents agree. The Civil Affairs Bureau of the Japanese Ministry of Justice states that, in general, redress in child custody cases is sought through habeas corpus proceedings in the court. There is no preferential treatment based on nationality or gender. Although visitation rights for non-custodial parents are not expressly stipulated in the Japanese Civil Code, court judgments often provide visitation rights for non-custodial parents. In practical terms, however, in cases of international parental child abduction, foreign parents are greatly disadvantaged in Japanese courts, both in terms of obtaining the return of children to the United States, and in achieving any kind of enforceable visitation rights in Japan. The Department of State is not aware of any case in which a child taken from the United States by one parent has been ordered returned to the United States by Japanese courts, even when the left-behind parent has a United States custody decree. In the past, Japanese police have been reluctant to get involved in custody disputes or to enforce custody decrees issued by Japanese courts. In order to bring a custody issue before the Family Court, the left-behind parent will require the assistance of a Japanese attorney. A parent holding a custody decree issued in U.S. courts must retain local Japanese counsel to apply to the Japanese courts for recognition and enforcement of the U.S. decree.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation. Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention, at http://www.ojjdp.ncjrs.org. Contact the country officer in the Office of Children's Issues for specific information. For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

JORDAN

Compiled from the March 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Hashemite Kingdom of Jordan

PROFILE

Geography

Area: 89,342 sq. km. (34,495 sq. mi.).

Cities: Capital—Amman (pop. 1.9 million). Other cities—Irbid (272,681), Az-Zarqa (472,830).

People

Nationality: Noun and adjective—Jordanian(s).

Population: (2007 est.) 6.05 million.

Religions: (2001 est.) Sunni Muslim 92%, Christian 6%, other 2%.

Languages: Arabic (official), English.

Education: (2006, according to Jordan's Department of Statistics) Literacy—90.9%.

Health: (2003) Infant mortality rate—16/1,000. Life expectancy—78 yrs.

Ethnic groups: Mostly Arab but small communities of Circassians, Armenians, and Kurds.

Work force: (1.3 million, of which 260 thousand are registered guest workers) public sector 17%, services 36%, manufacturing 20%, education 12%, health and social services 10%, primary industries 5%.

Unemployment rate: (2007) 13% of economically active Jordanians.

Government

Type: Constitutional monarchy.

Independence: May 25, 1946.

Constitution: January 8, 1952.

Government branches: Executive—King (chief of state), Prime Minister (head of government), Council of Ministers (cabinet). Legislative—bicameral National Assembly (appointed Senate, elected Chamber of Deputies). Judicial—civil, religious, special courts.

Political parties: Wide spectrum of parties legalized in 1992.

Suffrage: Universal at 18.

Political subdivisions: Twelve governorates—Irbid, Jarash, Ajloun, al-'Aqaba, Madaba, al-Mafraq, al-Zarqa, Amman, al-Balqa, al-Karak, al-Tafilah, and Ma'an.

Economy

Nominal GDP: (2007) $13.55 billion.

Annual real growth rate: (2007) 5.7%.

Per capita GDP: (2007) $4,700.

Natural resources: Phosphate, potash.

Agriculture: Products—fruits, vegetables, wheat, olive oil, barley, olives. Land—10% arable; 5% cultivated.

Industry: (26.5% of GDP in 2006) Types—phosphate mining, manufacturing, electricity and water; cement and petroleum production, and construction.

Trade: Exports (2007 est.)—$5.708 billion: garments, pharmaceutical products, fertilizers, vegetables, phosphates, and potash. Major markets—U.S., Iraq, India, Saudi Arabia, U.A.E., Syria, Israel, Kuwait. Imports (2007 est.)—$13.5 billion: crude petroleum and derivatives, fabrics and textiles, machinery and equipment, manufactured goods, iron, and cereals. Major suppliers—Saudi Arabia (mainly crude oil and derivatives), EU, China, U.S., Egypt, South Korea, Japan, Turkey.

Note: From 1949 to 1967, Jordan administered the West Bank. Since the 1967 war, when Israel took control of this territory, the United States has considered the West Bank to be territory occupied by Israel. The United States believes that the final status of the West Bank can be determined only through negotiations among the concerned parties based on UN Security Council Resolutions 242 and 338.

PEOPLE

Jordanians are Arabs, except for a few small communities of Circassians, Armenians, and Kurds who have adapted to Arab culture. The official language is Arabic, but English is used widely in commerce and government. About 70% of Jordan's population is urban; less than

6% of the rural population is nomadic or semi-nomadic. Most of the population lives where rainfall can support agriculture. Approximately 1.7 million registered Palestinian refugees and other displaced persons reside in Jordan, many as citizens.

HISTORY

The land that became Jordan is part of the richly historical Fertile Crescent region. Around 2000 B.C., Semitic Amorites settled around the Jordan River in the area called Canaan. Subsequent invaders and settlers included Hittites, Egyptians, Israelites, Assyrians, Babylonians, Persians, Greeks, Romans, Arab Muslims, Christian Crusaders, Mameluks, Ottoman Turks, and, finally, the British. At the end of World War I, the League of Nations awarded the territory now comprising Israel, Jordan, the West Bank, Gaza, and Jerusalem to the United Kingdom as the mandate for Palestine and Transjordan. In 1922, the British divided the mandate by establishing the semiautonomous Emirate of Transjordan, ruled by the Hashemite Prince Abdullah, while continuing the administration of Palestine under a British High Commissioner. The mandate over Transjordan ended on May 22, 1946; on May 25, the country became the independent Hashemite Kingdom of Transjordan. It ended its special defense treaty relationship with the United Kingdom in 1957. Transjordan was one of the Arab states which moved to assist Palestinian nationalists opposed to the creation of Israel in May 1948, and took part in the warfare between the Arab states and the newly founded State of Israel. The armistice agreements of April 3, 1949 left Jordan in control of the West Bank and provided that the armistice demarcation lines were without prejudice to future territorial settlements or boundary lines.

In 1950, the country was renamed the Hashemite Kingdom of Jordan to include those portions of Palestine annexed by King Abdullah I. While recognizing Jordanian administration over the West Bank, the United States maintained the position that ultimate sovereignty was subject to future agreement. Jordan signed a mutual defense pact in May 1967 with Egypt, and it participated in the June 1967 war between Israel and the Arab states of Syria, Egypt, and Iraq. During the war, Israel gained control of the West Bank and all of Jerusalem. In 1988, Jordan renounced all claims to the West Bank but retained an administrative role pending a final settlement, and its 1994 treaty with Israel allowed for a continuing Jordanian role in Muslim holy places in Jerusalem. The U.S. Government considers the West Bank to be territory occupied by Israel and believes that its final status should be determined through direct negotiations among the parties concerned on the basis of UN Security Council Resolutions 242 and 338.

The 1967 war led to a dramatic increase in the number of Palestinians living in Jordan. Its Palestinian refugee population—700,000 in 1966—grew by another 300,000 from the West Bank. The period following the 1967 war saw an upsurge in the power and importance of Palestinian resistance elements (fedayeen) in Jordan. The heavily armed fedayeen constituted a growing threat to the sovereignty and security of the Hashemite state, and open fighting erupted in June 1970. No fighting occurred along the 1967 Jordan River cease-fire line during the October 1973 Arab-Israeli war, but Jordan sent a brigade to Syria to fight Israeli units on Syrian territory. Jordan did not participate in the Gulf war of 1990-91. In 1991, Jordan agreed, along with Syria, Lebanon, and Palestinian representatives, to participate in direct peace negotiations with Israel sponsored by the U.S. and Russia. It negotiated an end to hostilities with Israel and signed a peace treaty in 1994. Jordan has since sought to remain at peace with all of its neighbors.

GOVERNMENT

Jordan is a constitutional monarchy based on the constitution promulgated on January 8, 1952. Executive authority is vested in the King and his Council of Ministers. The King signs and executes all laws. His veto power may be overridden by a two-thirds vote of both houses of the National Assembly. He appoints and may dismiss all judges by decree, approves amendments to the constitution, declares war, and commands the armed forces. Cabinet decisions, court judgments, and the national currency are issued in his name. The King, who may dismiss other cabinet members at the prime minister's request, appoints the council of ministers, led by a prime minister. The cabinet is responsible to the Chamber of Deputies on matters of general policy and can be forced to resign by a two-thirds vote of "no confidence" by that body.

Legislative power rests in the bicameral National Assembly. The number of deputies in the current Chamber of Deputies is 110, with a number of seats reserved for various religions, ethnicities, and women. The Chamber, elected by universal suffrage to a 4-year term, is subject to dissolution by the King. The King appoints the 55-member Senate for a 4-year term. Elections for municipal councils and mayors were held in July 2007; 20% of the council seats were reserved by quota for women. Parliamentary elections were held in November 2007, with the majority of seats going to independent, pro-government candidates. Eight seats in the parliament are reserved by quota for women, and a ninth woman won a seat outside the quota.

The constitution provides for three categories of courts—civil, religious, and special. Administratively, Jordan is divided into 12 governorates, each headed by a governor appointed by the King. They are the sole authorities for all government departments and development projects in their respective areas.

Principal Government Officials

Last Updated: 11/12/08

King: **ABDALLAH II**
Prime Min.: **Nader al-DAHABI**
Min. of Agriculture: **Muzahim al-MUHAISIN**
Min. of Awqaf & Islamic Affairs: **Abdul Fatah SALAH**
Min. of Culture: **Nancy BAKIR**
Min. of Defense: **Nader al-DAHABI**
Min. of Education: **Taysir al-NUEIMI**
Min. of Energy & Mineral Resources: **Khaldoun QUTEISHAT**
Min. of the Environment: **Khalid Al IRANI**
Min. of Finance: **Hamad al-KASASBEH**
Min. of Foreign Affairs: **Salah Eddin BASHIR**
Min. of Health: **Salah al-MAWAJDEH**
Min. of Higher Education & Scientific Research: **Umar SHUDEIFAT**
Min. of Information & Communication Technology: **Bassem al-ROUSSAN**
Min. of Industry & Trade: **Amir al-HADIDI**
Min. of Interior: **Eid Al FAYEZ**
Min. of Justice: **Ayman AWDEH**
Min. of Labor: **Bassem al-SALEM**
Min. of Municipal Affairs: **Shihadeh ABU HUDEIB**
Min. of Planning & Intl. Cooperation: **Suhair Al ALI**
Min. of Political Development & Judicial Affairs: **Kamal NASSER**
Min. of Public Sector Reform: **Maher al-MADADHA**
Min. of Public Works & Housing: **Sahel al-MAJALI**
Min. of Social Development: **Hala LATOUF**
Min. of Tourism & Antiquities: **Maha al-KHATIB**
Min. of Transportation: **Alaa al-BATAYNAH**
Min. of Water & Irrigation: **Raed ABU SAUD**

Min. of State for Media Affairs & Communication: **Nasser JUDEH**
Min. of State for Parliamentary Affairs: **Abdul Rahim al-OKOUR**
Min. of State for Prime-Ministerial Affairs: **Thuqan al-QUDAH**
Governor, Central Bank of Jordan: **Umayya TOUKAN**
Ambassador to the US: **ZEID Ra'ad Zeid al-Hussein, Prince**
Permanent Representative to the UN, New York: **Muhammad Al-ALLAF**

Jordan maintains an embassy in the United States at 3504 International Drive NW, Washington, DC 20008 (tel. 202-966-2664).

POLITICAL CONDITIONS

King Hussein ruled Jordan from 1953 to 1999, surviving a number of challenges to his rule, drawing on the loyalty of his military, and serving as a symbol of unity and stability for both the East Bank and Palestinian communities in Jordan. In 1989 and 1993, Jordan held free and fair parliamentary elections. Controversial changes in the election law led Islamist parties to boycott the 1997 elections. King Hussein ended martial law in 1991 and legalized political parties in 1992.

King Abdullah II succeeded his father Hussein following the latter's death in February 1999. Abdullah moved quickly to reaffirm Jordan's peace treaty with Israel and its relations with the U.S., and has since focused the government's agenda on economic reform, political development, and poverty alleviation.

Jordan's continuing structural economic difficulties, burgeoning population, and more open political environment have led to the emergence of a variety of small political parties. Moving toward greater independence, Jordan's parliament has investigated corruption charges against several regime figures and has become the major forum in which differing political views, including those of political Islamists, are expressed. Parliamentary elections were most recently held in November 2007. The Islamist opposition lost many of the seats it had gained in 2003, with the vast majority of seats being won by independent, pro-government candidates. Following the elections, in December 2007, the King appointed the current cabinet with a clear mandate to push forward economic reform and job creation.

ECONOMY

Jordan is a small country with limited natural resources. It is among the four most water-poor countries in the world. The country is currently exploring ways to expand its limited water supply and use its existing water resources more efficiently, including through regional cooperation. Jordan also depends on external sources for the majority of its energy requirements. During the 1990s, its crude petroleum needs were met through imports from neighboring Iraq, often at concessionary prices. Since early 2003, Jordan has imported oil primarily from Saudi Arabia at concessionary and market prices. In addition, a natural gas pipeline from Egypt to Jordan through the southern port city of Aqaba is now operational. The pipeline has reached northern Jordan and construction to connect it to Syria and beyond is underway. Jordan developed a new energy strategy in 2007 that aims to develop more indigenous and renewable energy sources, including oil shale, nuclear energy, wind, and solar power.

Under King Abdullah, Jordan has undertaken a program of economic reform. The government has taken the initiative for the phased elimination of fuel subsidies, passed legislation targeting corruption, and begun tax reform. It has also worked to liberalize trade, joining the World Trade Organization (WTO) in 2000, signing an Association Agreement with the European Union (EU) in 2001, and signing the first bilateral Free Trade Agreement (FTA) between the U.S. and an Arab country in 2001 (www.jordanusfta.com). The U.S.-Jordan FTA will phase out duties on nearly all goods and services by 2010. The agreement also provides for more open markets in communications, construction, finance, health, transportation, and services, as well as strict application of international standards for the protection of intellectual property. In 1996, the U.S. Congress created Qualifying Industrial Zones (QIZ) to support the peace process. QIZ goods, which must contain a certain percentage of Israeli input and enter the United States tariff- and quota-free, have also driven economic growth, particularly in the export of light manufactured products such as garments. Jordan exported $6.9 million in goods to the U.S. in 1997, when two-way trade was $395 million; according to the U.S. International Trade Commission, it exported $1.33 billion in 2007, with two-way trade at $2.19 billion. In 2007, Jordan's economy continued to grow but was hurt by high oil prices, leading to an unexpectedly high budget deficit. Fuel subsidies were eliminated in 2008, and barley subsidies are scheduled to be replaced by a program that offsets livestock rather than feed costs.

In 1996, Jordan and the United States signed a civil aviation agreement that provides for "open skies" between the two countries, and a U.S.-Jordan Bilateral Investment Treaty (BIT) for the protection and encouragement of bilateral investment entered into force in 2003. The United States and Jordan also signed in 2007 a Science and Technology Cooperation Agreement to facilitate and strengthen scientific cooperation between the two countries, as well as a memorandum of understanding on nuclear energy cooperation. Such agreements bolster efforts to help diversify Jordan's economy and promote growth, and at the same time lessen reliance on exports of phosphates, potash, and recently textiles; overseas remittances; and foreign aid. The government has emphasized the information technology (IT) and tourism sectors as other promising growth sectors. The low tax and low regulation Aqaba Special Economic Zone (ASEZ) is considered a model of a government-provided framework for private sector-led economic

growth. Jordan is classified by the World Bank as a "lower middle income country." The per capita GDP is $4,700. According to Jordan's Department of Statistics, 13% of the economically active Jordanian population residing in Jordan was unemployed in 2007, although unofficial estimates cite a 30% unemployment rate. Education and literacy rates and measures of social well-being are relatively high compared to other countries with similar incomes. Jordan's population growth rate has declined in recent years and is currently 2.3% as reported by the Jordanian government. One of the most important factors in the government's efforts to improve the well-being of its citizens is the macroeconomic stability that has been achieved since the 1990s. The rate of inflation in 2007 was 5.7%; the currency has been stable with an exchange rate fixed to the U.S. dollar since 1995 at JD 0.708-0.710 to the dollar. In 2007, Jordan negotiated a Paris Club debt buyback agreement to retire at least $2 billion. This buyback will reduce the percentage of external debt to GDP from 46% to 32%.

While pursuing economic reform and increased trade, Jordan's economy will continue to be vulnerable to external shocks and regional unrest. Without calm in the region, economic growth seems destined to stay below its potential.

FOREIGN RELATIONS

Jordan has consistently followed a pro-Western foreign policy and traditionally has had close relations with the United States. These relations were damaged by support in Jordan for Iraq during the first Gulf war. Although the Government of Jordan stated its opposition to the Iraqi occupation of Kuwait, popular support for Iraq was driven by Jordan's Palestinian community, which favored Saddam as a champion against Western supporters of Israel.

Following the first Gulf war, Jordan largely restored its relations with Western countries through its participation in the Middle East peace process and enforcement of UN sanctions against Iraq. Relations between Jordan and the Gulf countries improved substantially after King Hussein's death. Since the 2003 fall of the Iraqi regime, Jordan has played a pivotal role in supporting the restoration of stability and security to Iraq.

The Government of Jordan has facilitated the training of over 50,000 Iraqi police cadets and corrections officers at a Jordanian facility near Amman. Jordan also plays host to several hundred thousand Iraqi refugees and has worked closely with donor agencies and the international community to address their humanitarian needs.

Jordan signed a nonbelligerency agreement with Israel (the Washington Declaration) in Washington, DC, on July 25, 1994. Jordan and Israel signed a historic peace treaty on October 26, 1994, witnessed by President Clinton, accompanied by Secretary Christopher. The U.S. has participated with Jordan and Israel in trilateral development discussions in which key issues have been water-sharing and security; cooperation on Jordan Rift Valley development; infrastructure projects; and trade, finance, and banking issues. Jordan also participates in multilateral peace talks. Jordan belongs to the UN and several of its specialized and related agencies, including the World Trade Organization (WTO), the International Meteorological Organization (IMO), Food and Agriculture Organization (FAO), International Atomic Energy Agency (IAEA), and World Health Organization (WHO). Jordan also is a member of the World Bank, International Monetary Fund (IMF), Organization of the Islamic Conference (OIC), Nonaligned Movement, and Arab League.

Since the outbreak of the second Intifada in September 2000, Jordan has worked to maintain lines of communication between the Israelis and the Palestinians to counsel moderation and to return the parties to negotiations of outstanding permanent status issues. These efforts bore fruit with the resumption of Israeli-Palestinian peace negotiations at the November 2007 Annapolis conference.

U.S.-JORDANIAN RELATIONS

Relations between the U.S. and Jordan have been close for six decades, with 2009 marking the 60th anniversary of U.S.-Jordan ties. A primary objective of U.S. policy has been the achievement of a comprehensive, just, and lasting peace in the Middle East.

U.S. policy seeks to reinforce Jordan's commitment to peace, stability, and moderation. The peace process and Jordan's opposition to terrorism parallel and indirectly assist wider U.S. interests. Accordingly, through economic and military assistance and through close political cooperation, the United States has helped Jordan maintain its stability and prosperity.

Since 1952 the United States has worked closely with Jordan to improve the lives of Jordanian citizens. Total development assistance exceeds $5 billion and has funded a range of projects: health care, education, construction to increase water availability, and support for microeconomic policy shifts toward a more completely free market system. Additionally, the U.S. has provided both grants and loans for the acquisition of U.S. agriculture commodities. These programs have been successful and have contributed to Jordanian stability while strengthening the bilateral relationship. A strong U.S. military assistance program is designed to meet Jordan's legitimate defense needs, including preservation of border integrity and regional stability through the provision of materiel and training. Jordan signed a Threshold Agreement with the Millennium Challenge Corporation (MCC) in October 2006, and was subsequently deemed by the MCC to be eligible for a Compact Agreement in recognition of the country's progress on economic, social, and political reform indicators.

TRAVEL

Consular Information Sheet

October 14, 2008

Country Description: The Hashemite Kingdom of Jordan is a constitutional monarchy with a developing economy and a modern infrastructure. Western culture features prominently in the lives of many Jordanians; however, at the same time, Islamic ideals and beliefs provide the conservative foundation for the country's customs, laws and practices. Tourist facilities are widely available, although quality may vary depending on price and location.

Entry Requirements: A passport and a visa are required. Jordan issues visas for a fee at most international ports of entry upon arrival, and at most international border crossings, except at the crossing known in Jordan as the King Hussein Bridge (this same crossing is known in Israel as the Allenby Bridge). To cross into Jordan at the King Hussein/Allenby Bridge, U.S. citizens must already have either a visa for Jordan in their passports or have an entry permit from the Ministry of Interior.

Foreigners who wish to stay thirty days or more in Jordan must register at a Jordanian police station by their thirtieth day in the country. For stays of six months or more police will require that an AIDS test be performed at a government medical facility. Failure to properly register subjects the traveler to a fine of 1.5 Jordanian dinar (approximately $2.10) per day of overstay. This fine is usually assessed at departure.

HIV/AIDS entry restrictions exist for visitors to Jordan and foreign residents. Jordan does not permit entry or residency for foreign nationals with HIV/AIDS. Travelers known to have HIV are denied entry at ports of entry, including land border crossings. Travelers seeking residency beyond one-year are required to have an AIDS test performed at a government medical facility. Those who fail to submit to the test or who test positive for HIV are deported. Please verify the latest information for travelers with HIV/AIDS at http://www.jordanembassyus.org.

Travelers are urged to check the Country Specific Information and any existing Travel Warnings and Travel Alerts at travel.state.gov for all countries they plan to visit during their travel to the region. Border crossing requirements may change and borders may be closed during periods of heightened security. For further information travelers may contact the Embassy of the Hashemite Kingdom of Jordan at 3504 International Drive NW, Washington, DC 20008, by telephone at (202) 966-2664, or by internet at http://www.jordanembassyus.org. Jordan also maintains Honorary Consulates in Detroit, MI, Chicago, IL, and San Francisco, CA.

Safety and Security: The threat of terrorism remains high in Jordan. Transnational terrorist groups, as well as less sophisticated local elements, have demonstrated the capability to pose threats in Jordan. The Al-Qaida in Iraq network in particular continues terrorist activities against U.S. and Government of Jordan (GOJ) targets in Jordan. The Al-Qaida in Iraq network claimed responsibility for the November 9, 2005 bombings of three international hotels in Amman which killed 60 people and injured over 100. Pedestrian suicide bombers wearing explosive vests carried the bombs into the hotels. Al-Qaida in Iraq also claimed responsibility for the Aqaba rocket attacks on August 19, 2005 targeting a U.S. naval ship, which killed one Jordanian soldier and wounded another. The assassination of American diplomat Larry Foley outside his west Amman residence on October 28, 2002 was also attributed to the Al-Qaida in Iraq network. Numerous other terror plots have been foiled in recent years.

Terrorists often do not distinguish between U.S. government personnel and private citizens. Terrorists may target areas frequented by Westerners, such as tourist sites, hotels, restaurants, bars, nightclubs, liquor stores, shopping malls, transportation hubs, places of worship, expatriate residential areas, and schools. In light of these security concerns, U.S. citizens are urged to maintain a high level of vigilance, to be aware of their surroundings, and to take appropriate steps to increase their security awareness. It is especially important for travelers to be unpredictable in their movements by varying their times and routes and maintaining a low profile. Moreover, U.S. citizens are urged to avoid contact with any suspicious or unfamiliar objects and to immediately report the presence of

such objects to local authorities. U.S. government personnel overseas have been advised to take the same precautions.

Anti-American and anti-Western sentiments exist in Jordan and intensify following important events in the region, particularly those related to Israeli/Palestinian issues, conflicts in Lebanon, and, to a lesser extent, Iraq. This may lead to random acts of violence against Westerners. On July 16, 2008 a gunman fired on foreigners leaving a public concert in downtown Amman, injuring eight foreigners before turning the gun on himself. On September 4, 2006, a gunman fired on foreigners at a popular tourist site in central Amman, killing one and injuring six. Travelers are advised to avoid any demonstrations or large gatherings of people. Many demonstrations occur near mosques after Friday prayers. Consequently, special sensitivity and caution should be exercised when visiting or traveling near mosques and religious sites during holy days and the Friday Muslim Sabbath. Demonstrations may also take place at universities and refugee camps.

U.S. citizens are advised to increase their vigilance as they approach the border area with Iraq. In October 2006, July 2005, and December 2004, Iraq-based terrorists targeted the Jordan/Iraq border crossing with vehicle bombs. The Department of State advises against travel into Iraq. Please see the Travel Warning and Country Specific Information for Iraq for further information.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affair's internet site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert and the Middle East and North Africa Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Crime is generally not a serious problem for travelers in Jordan; however, host country and local media sources have reported a slight increase in petty crime. In the narrow streets of the older parts of the city center, crowded conditions invite pickpockets and other petty criminals. Travelers are urged to be more guarded in these areas so that they do not present easy opportunities for criminals. In central and west Amman there have been reports of thieves snatching pedestrians' purses from moving vehicles and then driving off. In some instances victims were injured because they were unable to free themselves from their purses as perpetrators drove off. When carrying a purse it is wise to conceal it, if possible, and to avoid walking near the road within reach of passing vehicles. Walking against the flow of traffic can also reduce your visibility as a target.

Jordanian police have warned the public to exercise vigilance when leaving banks or ATMs, as thieves have reportedly preyed upon persons soon after using these services.

Western women, both visiting and residing in Jordan, report sexual harassment, stalking, and unwelcome advances of a sexual nature. There have also been isolated reports of sexual assault. In particular, the embassy has received increasing reports of harassment and assault involving taxis and taxi drivers. Many of the incidents have involved verbal sexual harassment, staring, or following the victim after exiting the taxi. A few more troubling incidents have included indecent exposure, touching, and abduction. There was one violent sexual assault against a foreigner involving a taxi driver in 2007.

Women are advised to take reasonable precautions including dressing conservatively, not traveling alone, and avoiding travel at night to unfamiliar areas. Women should never sit in the front seat of a taxi and should carry a cell phone. Please see the Embassy's website for a list of radio controlled taxis.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and to the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting it to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and to explain how funds may be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Jordan is 191.

Medical Facilities and Health Information: Basic modern medical care and medicines are available in the principal cities of Jordan, but not necessarily in outlying areas. Most hospitals in Jordan, especially in Amman, are privately owned. Doctors and hospitals often expect immediate cash payment for services. Because serious medical problems requiring hospitalization and/or medical evacuation to the United States could cost over $150,000 U.S. dollars, we advise travelers to have medical evacuation insurance.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical

insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Avian Influenza: The Government of Jordan confirmed four cases of H5N1 Avian Influenza in poultry on March 24, 2006 on a small farm near Ajloun. An Egyptian who entered Jordan via ferry at Aqaba on March 27, 2006 was confirmed to have H5N1. The World Health Organization declared Jordan to be free of avian flu in May 2006. There have been no confirmed cases of avian flu in people or birds in Jordan since the summer of 2006. Further cases of avian flu in both people and birds in Jordan remain possible. Travelers should patronize restaurants having high standards for food safety and hygiene and ask that poultry and egg products be cooked thoroughly. Travelers to Jordan and other countries affected by the virus are cautioned to avoid poultry farms, contact with animals in live food markets, and any surfaces that appear to be contaminated with feces from poultry or other animals. For the most current information and links on avian influenza in Jordan, see the State Department's Avian Influenza Fact Sheet or visit the web site of the U.S. Embassy in Jordan.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Jordan is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Jordanian Public Safety officials estimate that on a daily basis, an average of two people are killed and fifty people are injured in 145 road accidents throughout the Kingdom. Roads are particularly treacherous during the rainy season—from December to March. Drivers and passengers are required to wear seatbelts and all cars must have a fire extinguisher and warning triangle in the vehicle. Child car seats are not required by law. Violators of speed limits may be assessed fines up to $140. Police routinely pull over reckless drivers as well as those driving under the influence of drugs or alcohol. Licensed drivers must carry local third party insurance with sufficient coverage for accidents resulting in injury or death.

Poor lighting and road conditions prevail, so extra caution must be exercised at all times, especially when driving at night. Highways are more crowded around the Muslim holidays when many Jordanian expatriates return to Jordan for family visits. City driving in Amman is also more hazardous in the summer months when Jordan experiences an influx of tourists and visitors from other countries in the region. There are no driving restrictions on women and it is not unusual for women to drive alone.

The desert highway outside Aqaba, a popular tourist destination, is particularly dangerous because it is narrow, winding, steep, and crowded with trucks. This area should be avoided at night, if possible. When driving in both urban and rural areas, motorists should beware of livestock, including camels, sheep, and goats. Collisions between livestock and automobiles are common.

Landmines are often located within two miles of military installations and borders, including the popular Dead Sea area. Minefields are usually fenced off and marked with skull-and-crossbones notices, but the fences and signs may be in poor repair or hard to see. Avoiding these areas reduces the risk of accidentally setting off a mine.

Jordan has abundant bus and taxi services. Please see the Crime section of this notice for more information about incidents of sexual harassment and assault involving taxi drivers and important safety tips when using public or private transportation in Jordan. Visitors are encouraged to arrange for their transportation needs via their hotel and should request that drivers not pick up additional passengers en route to their destinations. Other forms of public transportation are not recommended. Jordanian security authorities often establish checkpoints, especially on roads leading to popular tourist destinations, where drivers are expected to stop and present their identity documents. All drivers should stop when directed to do so and comply with the instructions provided to them by the authorities.

Emergencies should be referred to the Civil Defense Department at telephone number 199. Please refer to our Road Safety page for more information. Visit the website of Jordan's national tourist office at http://www.tourism.jo. For information on driving regulations please contact the Embassy of the Hashemite Kingdom of Jordan at 3504 International Drive NW, Washington, DC 20008, by telephone at (202) 966-2664, or by internet at http://www.jordanembassyus.org

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Jordan's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Jordan's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Under Jordanian law any man may prevent a female or child relative from leaving Jordan by registering a hold on their travel with the Jordanian authorities. This is possible even if the child or woman's sole nationality is American. Jordanian authorities consider disputes surrounding travel holds as private family matters and the Embassy is limited in its ability to intervene. Please see the section in this notice on Children's Issues.

American citizens are subject to Jordanian laws while in Jordan. American citizens who also possess Jordanian nationality may also be subject to laws that impose special obligations on Jordanians. For example, all Jordanian men under the age of 37 are required to register for service in the Jordanian military. Those subject to registration may be prevented from leaving Jordan until exit

permission is obtained from appropriate Jordanian authorities. This permission is often granted to U.S. citizens, but may take some time to obtain and may be limited to a single exit.

The Government of Jordan considers U.S.-Jordanian dual nationals as Jordanian citizens. Local authorities may not always notify the Embassy of arrests, detentions, or accidents involving dual-nationals. For this reason dual-nationals in particular are encouraged to carry a copy of their U.S. passports with them at all times, making evidence of their identity and U.S. citizenship readily available for local authorities. For additional information, see our Dual Nationality Flyer.

Islam is the state religion of Jordan. The Jordanian government does not interfere with public worship by the country's Christian minority. Although the majority of Christians are allowed to practice their faith freely, activities such as proselytizing or encouraging conversion to the Christian faith are prohibited. American citizens have been deported, detained, and arrested for discussing or trying to engage Jordanians in debate about Christianity.

Jordanian customs authorities may enforce strict regulations concerning temporary importation into or export from Jordan of items such as drugs, firearms, poisons, chemicals, explosives and pornographic materials, among other items. It is advisable to contact the Embassy of Jordan in Washington, D.C., or one of the Jordanian consulates in the United States, for specific information regarding customs requirements.

The United States Government is committed to providing the full range of consular services to all American citizens. Article 36 of the Vienna Convention on Consular Relations, to which Jordan is a party, provides that competent authorities in the host country must notify a consular post of the arrest of one of its citizens without delay. However, Jordanian officials often do not notify the U.S. Embassy when an American citizen is arrested or detained. The local workweek for Jordanian government offices and most businesses is Sunday through Thursday.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.

Persons violating Jordan's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Jordan are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling abroad are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Jordan. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy in Amman is located on Al-Umayyaween Street, Abdoun, PO Box 354, Amman 11118. The telephone number is [962] (6) 590-6000 and the fax number is [962] (6) 592-4102. The after-hours emergency telephone number is [962] (6) 590-6000. The Internet web site is http://amman.usembassy.gov. The U.S. Embassy is open Sunday through Thursday.

Intercountry Adoption

January 2007

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Jordanian law stipulates that all prospective adopting parents MUST be Muslim, married for five or more years and certified as infertile in order to adopt in Jordan.

In addition, Jordanian law does not allow for full adoptions of Jordanian children. Americans considering adoption of Jordanian children must obtain guardianship from a Jordanian court and subsequently adopt the child in the United States. Prospective American guardians may also want to review our Shari'a Adoption Flyer on Guardianship in Islamic Countries.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: Adoption in Jordan falls under the purview of the Ministry of Social Development (MSD).

Ministry of Social Development
(MSD)
Family and Childhood Section/
Fostering Program
P.O. Box 925379
Jabal Al Hussein

Amman, Jordan
Fax 962-6-569-4953 or
962-6-569-4346

Eligibility Requirements for Adoptive Parents: By law, all adoptive parents must be Muslim and married for five or more years. The husband must be between 35 and 55 years of age and the wife must be between 30 and 50 years of age. Parents must be medically certified as infertile. They may have up to two children total, including adopted children. If the parents have one child already, then the adopted Jordanian child must be of the same sex. Parents who have previously adopted in Jordan must wait a minimum of two years before adopting another child of the same sex from Jordan. Single people cannot adopt children in Jordan.

Residency Requirements: There are no Jordanian residency requirements for prospective adoptive parents.

Time Frame: The MSD reports that adoptive parents can expect to wait an average of three months from the time they initiate contact with the MSD to when they are given custody of a child.

Adoption Agencies and Attorneys: Prospective adoptive parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services. For U.S.-based agencies, it is suggested that prospective adoptive parents contact the Better Business Bureau and/or the licensing office of the appropriate state government agency in the U.S. state where the agency is located or licensed. There are no adoption agencies in Jordan. The Embassy maintains a list of numerous attorneys practicing in Jordan, which can be found at http://amman.usembassy.gov.

Adoption Fees: MSD does not charge any fees. However, adoptive parents can expect to pay fees for the baby's birth certificate, passport, and family book issuance. (A "Family Book" is a document issued by the Jordanian government to families, which contains biographical information about each member of the family.) The fees for obtaining a Jordanian passport for children (under 16) is 10 JD; for the birth certificate is 1 JD; and, for the Jordanian family book is 2 JD. More details about current fees and required documents can be found at the MSD website at www.cspd.gov. jo.

Adoption Procedures: Regardless of nationality, all couples are required to apply to the MSD to qualify to become foster parents. The pre-qualification process is similar to those in most U.S. states. To begin this process, prospective adoptive parents are asked to submit a fostering request to the MSD. This request should include the following information: name, age, profession, and religion of both parents. Contact information, including full mailing address, must be provided. Once the MSD has received and processed the request, it will direct the Jordanian Embassy in Washington (through the Foreign Ministry) to request additional documentation from the prospective foster parents.

Once received, an MSD committee reviews the request to foster a child. If all conditions are met, the Minister of Social Development issues his/her approval or denial. Foster parents are notified by mail that they are approved and invited to travel to Jordan to locate a child. Couples who are approved will then be escorted to a government-run orphanage to choose from children whose parents are unknown.

There are no court proceedings involved with adoption in Jordan. MSD is the only entity that grants adoption According to the precepts of Islam and the laws of Jordan governing the adoption of infants of unknown parentage, the adoptive parents are permitted to choose the first name of the child. The Ministry of Interior, Department of Civil Status chooses fictitious names for the unknown mother and father, which along with the child's first name are placed on the Jordanian birth certificate. These fictitious parents' names, which are chosen at random and do not identify with any common Jordanian family or tribal names, are required for issuance of a Jordanian birth certificate.

The child, per Jordanian law, will carry the names of the fictitious father. Once a birth certificate has been issued, the child is also issued a Jordanian "Family Book" and a Jordanian passport. At this point, the adoptive parents may petition for an immigrant visa for their child at the U.S. Embassy in Amman, Jordan.

After the child has immigrated to the United States, adoptive parents are required to inform the nearest Jordanian embassy or consulate of any change in address. This facilitates the follow up that the MSD performs for all adopted Jordanian children abroad.

Documentary Requirements: The following documents are required:

- Copies of the marriage certificate;
- Copies of each parent's valid passport;
- "Social study" (forms will be provided through the Jordanian Embassy);
- Employment letters;
- Original health reports of both parents, including medical proof of the parents' infertility; and
- If applicable, copy of the conversion certificate to Islam.

All of these documents must be translated into Arabic and certified by the Jordanian Embassy in Washington, which will forward them to the MSD (through the Foreign Ministry).

Embassy of the Hashemite Kingdom of Jordan, Washington, D.C.

Additional Information: Specific questions about adoption in Jordan may be addressed to the U.S. Embassy in Amman.

General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

KAZAKHSTAN

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Kazakhstan

PROFILE

Geography

Area: 2.7 million sq. km. (1.05 million sq. mi.); ninth-largest nation in the world; the size of Western Europe.

Cities: Astana (capital, June 1998), Almaty (former capital), Karaganda, and Shymkent.

Terrain: Extends east to west from the Caspian Sea to the Altay Mountains and north to south from the plains of Western Siberia to the oasis and desert of Central Asia.

Climate: Continental, cold winters and hot summers; arid and semiarid.

Border lengths: Russia 6,846 km., Uzbekistan 2,203 km., China 1,533 km., Kyrgyzstan 1,051 km., and Turkmenistan 379 km.

People

Nationality: Kazakhstani.

Population: (January 2008 est.) 15.6 million—down from 16.2 million in 1989; second most-populated country in Central Asia. Large-scale emigration of ethnic Russians, Germans, and Ukrainians accounts for most of the population decrease since 1989.

Population growth rate: (2007 est.) 1.08%.

Population distribution: 52.8 % of population lives in urban areas. The largest cities include Astana (capital) with a population of 602,480, Almaty (former capital) 1.3 million, Karaganda 453,400, Shymkent 545,400, Taraz 340,000, Ust-Kamenogorsk 310,000, Pavlodar 300,000.

Population density: 14.5 people per sq. mi. (U.S. density 2000: 79.6 people per sq. mi.).

Ethnic groups: (2002) Kazakh 55.8%, Russian 28.3%, Ukrainian 3.3%, Uzbek 2.6%, German 1.8%, Uyghur 1.5%, other 5.0%.

Religions: Sunni Muslim 47%, Russian Orthodox 44%, Protestant 2%, other 7%.

Languages: Kazakhstan is a bilingual country. Kazakh language has the status of the "state" language, while Russian is declared the "official" language. Russian is used routinely in business; 64.4% of population speaks the Kazakh language.

Health: (2007 est.) Infant mortality rate—27.4/1,000. Life expectancy—67.22 years (male 61.9 yrs.; female 72.84 yrs.). Health care (2005 est.)—30.3 doctors and 68.2 hospital beds per 10,000 persons.

Education: Mandatory universal secondary education. School system consists of kindergarten, primary school (grades 1-4), secondary school (grades 5-9), and high school (grades 10-11). Literacy rate—98.4%.

Work force: (2007 est., 8.16 million) Industry and construction—18.1%; agriculture and fishing—32.9%; services—49%.

Government

Type: Republic.

Independence: December 16, 1991 (from the Soviet Union).

Declaration of sovereignty: October 25, 1990.

Constitution: August 30, 1995 constitution adopted by referendum replaced a 1993 constitution.

Government branches: Executive—president, prime minister, Council of Ministers. Legislative—Senate and Mazhilis. Judicial—Supreme Court.

Political subdivisions: 14 oblasts plus 2 cities—Almaty, the former capital, and Astana, the current capital; and the territory of Baykonur, which contains the space launch center that the Russians built and now lease.

Political parties: Ten political parties are registered: Nur Otan ("The Light of Fatherland" in Kazakh), Azat ("Free"; formerly known as True Ak Zhol), the National Social Democratic Party, Ak Zhol (Bright Path), Auyl (Farm), the Communist Party of Kazakhstan, the Communist People's Party, Party of Patriots, Adilet (Justice), and Rukhaniyat (Spirituality).

Suffrage: Universal, 18 years of age.

Economy

GDP: (2007) $102.5 billion. **Exchange rate:** (Period average) 122.55 KZT/1 US$ in 2007.

GDP growth rate: 9.5% (2002); 9.2% (2003); 9.6% (2004 est.); 9.7% (2005 est.); 10.7% (2006); 8.5% (2007).

GDP per capita: (2007) Purchasing power parity—$11,100.

Inflation rate: 6.6% (2002); 6.8% (2003); 6.7% (2004 est.); 7.5% (2005); 8.4% (2006); 18.8% (2007 year-over-year); 10.8% (2007 average).

Trade: Exports (2007 est.)—$44.88 billion. Imports (2007 est.)—$29.91 billion.

Gross external debt: $18.2 billion (2002); $22.9 billion (2003); $32.71 billion (2004); $43.40 billion (2005); $73.46 billion (2006); $96.37 billion (2007).

Central Bank's foreign exchange reserves: $4.96 billion (2003); $7.07 billion (2005 est.); $19.04 billion (Feb. 2008).

National (oil) fund reserves: $3.6 billion (2003); $5.1 billion (2004); $10.1 billion (2006); $22.6 billion (Feb. 2008).

Unemployment rate: (Officially recognized) 8.7% (2003); 8.4% (2004 est.); 8.1% (2005 est.); 7.4% (2006 est.); 7.1% (2007 est.). Population below poverty line: 13.8% (2007).

PEOPLE AND HISTORY

Kazakhstan is very ethnically diverse, with only a slight majority of Kazakhstanis being ethnic Kazakh. Other ethnic groups include Russian, Ukrainian, Uzbek, German, and Uyghur. Religions are Sunni Muslim, Russian Orthodox, Protestant, and other. Kazakhstan is a bilingual country. The Kazakh language has the status of the state" language, while Russian is declared the "official" language. Russian is used routinely in business; 64.4% of the population speaks the Kazakh language. Education is universal and mandatory through the secondary level, and the literacy rate is 98.4%.

Nomadic tribes have been living in the region that is now Kazakhstan since the first century BC, although the land has been inhabited at least as far back as the Stone Age. From the fourth century AD through the beginning of the 13th century, the territory of Kazakhstan was ruled by a series of nomadic nations. Following the Mongolian invasion in the early 13th century, administrative districts were established under the Mongol Empire, which eventually became the territories of the Kazakh Khanate. The major medieval cities of Taraz and Turkestan were founded along the northern route of the Great Silk Road during this period.

Traditional nomadic life on the vast steppe and semi-desert lands was characterized by a constant search for new pasture to support the livestock-based economy. The Kazakhs emerged from a mixture of tribes living in the region in about the 15th century and by the middle of the 16th century had developed a common language, culture, and economy. In the early 1600s, the Kazakh Khanate separated into the Great, Middle and Little (or Small) Hordes—confederations based on extended family networks. Political disunion, competition among the hordes, and a lack of an internal market weakened the Kazakh Khanate. The beginning of the 18th century marked the zenith of the Kazakh Khanate. The following 150 years saw the gradual colonization of the Kazakh-controlled territories by tsarist Russia.

The process of colonization was a combination of voluntary integration into the Russian Empire and outright seizure. The Little Horde and part of the Middle Horde signed treaties of protection with Russia in the 1730s and 1740s. Major parts of the northeast and central Kazakh territories were incorporated into the Russian Empire by 1840. With the Russian seizure of territories belonging to the Senior Horde in the 1860s, the tsars effectively ruled over most of the territory belonging to what is now the Republic of Kazakhstan.

The Russian Empire introduced a system of administration and built military garrisons in its effort to establish a presence in Central Asia in the so-called "Great Game" between it and Great Britain. Russian efforts to impose its system aroused the resentment of the Kazakh people, and by the 1860s, most Kazakhs resisted Russia's annexation largely because of the disruption it wrought upon the traditional nomadic lifestyle and livestock-based economy. The Kazakh national movement, which began in the late 1800s, sought to preserve the Kazakh language and identity. There were uprisings against colonial rule during the final years of tsarist Russia, with the most serious occurring in 1916. The destruction of the nomadic life, prior to and during the Communist period, created a Kazakh diaspora in neighboring countries, especially western China. Since independence in 1991, the government has encouraged the return of ethnic Kazakhs by offering subsidies for returnees.

Although there was a brief period of autonomy during the tumultuous period following the collapse of the Russian Empire, the Kazakhs eventually succumbed to Soviet rule. In 1920, the area of present-day Kazakhstan became an autonomous republic within Russia and, in 1936, a Soviet republic.

Soviet repression of the traditional elites, along with forced collectivization in late 1920s-1930s, brought about mass hunger and led to unrest. Soviet rule, however, took hold, and a communist apparatus steadily worked to fully integrate Kazakhstan into the Soviet system. Kazakhstan experienced population inflows of thousands exiled from other parts of the Soviet Union during the 1930s and later became home for hundreds of thousands evacuated from the Second World War battlefields. The Kazakh Soviet Socialist Republic (SSR) contributed five national divisions to the Soviet Union's World War II effort.

The period of the Second World War marked an increase in industrialization and increased mineral extraction in support of the war effort. At the

time of Soviet leader Josif Stalin's death, however, Kazakhstan still had an overwhelmingly agricultural-based economy. In 1953, Soviet leader Nikita Khrushchev initiated the ambitious "Virgin Lands" program to turn the traditional pasturelands of Kazakhstan into a major grain-producing region for the Soviet Union. The Virgin Lands policy, along with later modernizations under Soviet leader Leonid Brezhnev, sped up the development of the agricultural sector, which to this day remains the source of livelihood for a large percentage of Kazakhstan's population.

Growing tensions within Soviet society led to a demand for political and economic reforms, which came to a head in the 1980s. In December 1986, mass demonstrations by young ethnic Kazakhs took place in Almaty to protest Moscow's installment of a non-Kazakhstani First Secretary as leader. Soviet troops suppressed the unrest, and dozens of demonstrators were jailed. In the waning days of Soviet rule, discontent continued to grow and find expression under Soviet leader Mikhail Gorbachev's policy of glasnost.

Caught up in the groundswell of Soviet republics seeking greater autonomy, Kazakhstan declared its sovereignty as a republic within the Union of Soviet Socialist Republics (U.S.S.R.) in October 1990. Following the August 1991 abortive coup attempt in Moscow and the subsequent dissolution of the Soviet Union, Kazakhstan declared independence on December 16, 1991. The years following independence have been marked by significant reforms to the Soviet command-economy and political monopoly on power. Under Nursultan Nazarbayev, who initially came to power in 1989 as the head of the Kazakh Communist Party and was eventually elected President in 1991, Kazakhstan has made significant progress toward developing a market economy, for which it was recognized by the United States in 2002. The country has enjoyed significant economic growth since 2000, partly due to its large oil, gas, and mineral reserves.

GOVERNMENT AND POLITICAL CONDITIONS

Kazakhstan is a constitutional republic with a strong presidency. It is divided into 14 oblasts and the two municipal districts of Almaty and Astana. Each is headed by an akim (provincial governor) appointed by the president. Municipal akims are appointed by oblast akims. The Government of Kazakhstan transferred its capital from Almaty to Astana on June 10, 1998.

The president is the head of state. The president also is the commander in chief of the armed forces and may veto legislation that has been passed by the Parliament. President Nursultan Nazarbayev has been in office since Kazakhstan became independent. In 1995, President Nazarbayev called for a referendum that expanded his presidential powers: only he can initiate constitutional amendments, appoint and dismiss the government, dissolve Parliament, call referenda, and appoint administrative heads of regions and cities.

The prime minister, who serves at the pleasure of the president, chairs the Cabinet of Ministers and serves as Kazakhstan's head of government. There are three deputy prime ministers and 17 ministers in the Cabinet.

In December 2005, President Nazarbayev won a new 7-year term in an election that the Organization for Security and Cooperation in Europe said fell short of international standards. Official results gave the president 91% of the vote, although independent exit polls found this figure to be somewhat inflated. Opposition candidates Zharmakhan Tuyakbay (For a Just Kazakhstan) and Alikhan Baymenov (Ak Zhol) were able to compete freely in this election.

Kazakhstan has a bicameral Parliament, comprised of a lower house (the Mazhilis) and upper house (the Senate). Ninety-eight members of the Mazhilis are elected by a party-list vote. Nine members of the Mazhilis are elected by the Assembly of Peoples of Kazakhstan. The Senate has 47 members. Two senators are selected by each of the elected assemblies (Maslikhats) of Kazakhstan's 16 principal administrative divisions (14 regions, or oblasts, plus the cities of Astana and Almaty). The president appoints the remaining fifteen senators. Mazhilis deputies, the government, and the president have the right of legislative initiative, though the government proposes most legislation considered by the Parliament.

President Nazarbayev's Nur Otan party won the August 2007 elections to the Mazhilis. None of the remaining political parties won a seat during the elections, which the Organization for Security and Cooperation in Europe said fell short of international standards.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Nursultan NAZARBAYEV**
Prime Min.: **Karim MASIMOV**
Dep. Prime Min.: **Yerbol ORYNBAYEV**
Dep. Prime Min.: **Umirzak SHUKEYEV**

Chmn., National Security Ctte. (KNB): **Amangeldy SHABDARBAYEV**
Sec., Security Council: **Kairbek SULEYMENOV**
Ambassador to the US: **Yerlan IDRISOV**
Permanent Representative to the UN, New York: **Byrganym AITIMOVA**

ECONOMY

Kazakhstan's economy grew by 8.5% in 2007. Gross domestic product (GDP) grew 10.7% in 2006, 9.7% in 2005, 9.6% in 2004, 9.2% in 2003, and 9.5% in 2002.

Kazakhstan's monetary policy has been largely well managed. However, in 2007, rapid increases in global commodity prices helped push inflation rates as high as 18.8%. Prior to this, inflation had remained relatively steady at 9.5%, up from 8.4% in 2006. Inflation from 2002-2004 was 6.6%, 6.8%, and 6.7%, respectively. Because of its strong macroeconomic performance and financial health, Kazakhstan became the first former Soviet republic to repay all of its debt to the International Monetary Fund (IMF) in 2000, 7 years ahead of schedule. In March 2002, the U.S. Department of Commerce graduated Kazakhstan to market economy status under U.S. trade law. The change in status recognized substantive market economy reforms in the areas of currency convertibility, wage rate determination, openness to foreign investment, and government control over the means of production and allocation of resources.

In September 2002, Kazakhstan became the first country in the former Soviet Union to receive an investment-grade credit rating from a major international credit rating agency. Estimated level of external debt in 2006 was $73.46 billion. In 2005, Kazakhstan's gross foreign debt was about $43.40 billion. Kazakhstan has been successful in reducing the ratio of government debt to GDP in recent years. In 2007, total governmental debt was $5.7 billion, which amounts to 5.5% of GDP. In 2000, total government debt equaled

21.7% of GDP. While government debt has continued to decrease, several years of aggressive private-sector borrowing and lending practices contributed to a liquidity and credit crunch in 2007. Total external debt (public and private) increased dramatically from $73.46 billion (2006) to $96.37 billion (2007), now equivalent to 94.4% of GDP. An upturn in economic growth, combined with the results of earlier tax and financial sector reforms, dramatically improved government finances from the 1999 budget deficit level of 3.5% of GDP to a deficit of 0.5% of GDP in 2005. However, the budget deficit level in 2007 was $1.8 billion, or approximately 1.7% of GDP. Government revenues grew from 19.8% of GDP in 1999 to 22.6% of GDP in 2001 to 25.7% of GDP in 2005. Government revenues in 2007, like other sectors of the economy, declined slightly to 22.7% of GDP. In 2000, Kazakhstan adopted a new tax code in an effort to consolidate these gains. On November 29, 2003 the Law on Changes to Tax Code was adopted, which reduced the value added tax (from 16% to 13%), the social tax (from 21% to 13%), and the personal income tax (from 20% to 10%). Kazakhstan furthered its reforms by adopting a new land code on June 20, 2003 and a customs code on April 5, 2003. Further revisions to the customs code are expected to be adopted in 2008.

Oil and gas is the leading economic sector. Production of oil and gas condensate in Kazakhstan amounted to 67.2 million tons in 2007, an increase from 64.5 million tons in 2006. Kazakhstan exported 60.2 million tons of oil and gas condensate in 2007. Natural gas production in Kazakhstan in 2007 amounted to 16.6 billion cubic meters. Kazakhstan holds about 4 billion tons of proven recoverable oil reserves and 3 trillion cubic meters of gas. Industry analysts believe that planned expansion of oil production, coupled with the development of new fields, will enable the country to produce as much as 3 million barrels per day by 2015, lifting Kazakhstan into the ranks of the world's top 10 oil-producing nations. Kazakhstan's 2005 oil exports were valued at $17.4 billion, representing over 70% of overall exports. Major oil and gas fields and their recoverable oil reserves are Tengiz (7 billion barrels); Karachaganak (8 billion barrels and 1,350 billion cubic meters of natural gas); and Kashagan (7-9 billion barrels). Starting in 2004, the Government of Kazakhstan increased its take of oil deals by increasing taxation of new oil projects. In 2007, the government amended the "Law on Subsoil and Subsoil Use."

The amendments give the government the right to annul or amend subsoil contracts if the contracts pose a danger to the country's national economic security interests. The government insisted it would not use the amendments retroactively to annul existing contracts.

Kazakhstan instituted an ambitious pension reform program in 1998. There are 14 saving pension funds, one of which is state controlled. The National Bank oversees and regulates the pension funds. The pension funds' growing demand for quality investment outlets triggered rapid development of the debt securities market. Pension fund capital is being invested almost exclusively in corporate and government bonds, including Government of Kazakhstan Eurobonds. The Kazakhstani banking system is developing rapidly. Its capitalization now exceeds $1 billion. The National Bank has introduced deposit insurance in its campaign to strengthen the banking sector. Several major foreign banks have branches in Kazakhstan, including ABN-AMRO, Citibank, and HSBC.

Agriculture

Agriculture accounted for 5.82% of Kazakhstan's GDP in 2007. Grain (Kazakhstan is the seventh-largest producer of wheat in the world) and livestock are the most important agricultural commodities. Agricultural land occupies more than 220 million hectares, about 68% of which consists of pasture and hay land. Chief livestock products are dairy goods, leather, meat, and wool. The country's major crops include wheat, barley, cotton, and rice. Wheat is the leading agricultural commodity in Kazakhstan's export trade. Kazakhstan harvests 14-15 million tons of wheat per year.

Natural Resources

Oil, gas, and mineral exports are key to Kazakhstan's economic success. Since 1993, Kazakhstan's extractive industries have attracted $30.7 billion in foreign investment, which represents almost 76% of the total foreign direct investment in Kazakhstan for that period. Kazakhstan has significant deposits of coal, iron ore, copper, zinc, uranium, and gold.

FOREIGN RELATIONS

Kazakhstan has stable relationships with all of its neighbors. Kazakhstan is a member of the United Nations, Organization for Security and Cooperation in Europe, and North Atlantic Cooperation Council. It also is an active participant in the North Atlantic Treaty Organization's (NATO) Partnership for Peace program. Kazakhstan also is a member of the Commonwealth of Independent States and the Shanghai Cooperation Organization along with Russia, China, Kyrgyzstan, Tajikistan, and Uzbekistan. Kazakhstan, Russia, Belarus, Kyrgyzstan, and Tajikistan established the Eurasian Economic Community in 2000 to re-energize earlier efforts at harmonizing trade tariffs and the creation of a free trade zone under a customs union. Kazakhstan is the founding member of the Conference for Interaction and Confidence in Asia. Kazakhstan also engages in regional security dialogue with ASEAN (Association of South East Asian Nations).

U.S.-KAZAKHSTAN RELATIONS

The United States was the first country to recognize Kazakhstan, on December 25, 1991, and opened its Embassy in Almaty in January 1992. In the years since Kazakhstan's independence, the two countries have developed a wide-ranging bilateral

relationship. The current Ambassador is John Ordway, who assumed his post in September 2004.

U.S.-Kazakhstani cooperation in security and non-proliferation has been a cornerstone of the relationship. Kazakhstan showed leadership when it renounced nuclear weapons in 1993. The United States has assisted Kazakhstan in the removal of nuclear warheads, weapons-grade materials, and their supporting infrastructure. In 1994, Kazakhstan transferred more than a half-ton of weapons-grade uranium to the United States. In 1995 Kazakhstan removed its last nuclear warheads and, with U.S. assistance, completed the sealing of 181 nuclear test tunnels in May 2000. Kazakhstan has signed the Conventional Armed Forces in Europe Treaty (1992), the START Treaty (1992), the nuclear Non-Proliferation Treaty (1993), the Chemical Weapons Convention, and the Comprehensive Test Ban Treaty (2001). Under the Cooperative Threat Reduction program, the United States has spent $240 million to assist Kazakhstan in eliminating weapons of mass destruction and weapons of mass destruction-related infrastructure.

Economic Relations

U.S. foreign direct investment (FDI) was 24.6% of total FDI in Kazakhstan in the first half of 2007. American companies have invested about $14.3 billion in Kazakhstan since 1993. These companies are concentrated in the oil and gas, business services, telecommunications, and electrical energy sectors. Kazakhstan has made progress in creating a favorable investment climate although serious problems, including arbitrary enforcement of laws, remain. A U.S.-Kazakhstan Bilateral Investment Treaty and a Treaty on the Avoidance of Dual Taxation have been in place since 1994 and 1996, respectively. In 2001, Kazakhstan and the United States established the U.S.-Kazakhstan Energy Partnership.

Sections 402 and 409 of the United States 1974 Trade Act require that the President submit semi-annually a report to Congress on continued compliance with the Act's freedom of emigration provisions by those countries, including Kazakhstan, that fall under the Trade Act's Jackson-Vanik Amendment. Bilateral trade in 2005 was valued at $1.64 billion, a 91% increase from 2004.

U.S. Assistance

Between 1992 and 2005, the United States provided roughly $1.205 billion in technical assistance and investment support in Kazakhstan. The programs were designed to promote market reform, to establish a foundation for an open, prosperous, and democratic society, and to address security issues.

Since 1993, the U.S. Agency for International Development (USAID) has administered technical assistance programs to support Kazakhstan's transition to a market economy, fully integrated into the world trade system. These programs include cooperation in privatization, fiscal, and financial policy; commercial law; energy; health care; and environmental protection.

In 2006, Kazakhstan became the first country to share directly in the cost of a U.S. Government's foreign assistance program. Through 2009, the Government of Kazakhstan will contribute over $15 million to a $40 million USAID economic development project aimed at strengthening Kazakhstan's capacity to achieve its development goals.

The U.S. Commercial Service provides U.S. business internships for Kazakhstanis, supports Kazakhstani businesses through a matchmaker program and disseminates information on U.S. goods and services.

Additional information is available on its website: www.buyusa.gov/kazakhstan/en. The Peace Corps has about 120 volunteers working throughout Kazakhstan in business education, English teaching, and the development of environmental nongovernmental organizations. Since 2001 and the advent of the war on terror, the U.S. has assisted Kazakhstan to combat illegal narcotics, improve border security, and, more recently combat money laundering and trafficking in persons.

The United States supports increased citizen participation in the public arena through support for non-governmental organizations (NGOs). Dozens of grants have been provided to support NGOs that promote an independent media, legal reform, women's rights, civic education, and legislative oversight. USAID also has provided training courses for leaders and professionals.

Military Cooperation

Kazakhstan's military participates in the U.S.'s International Military Education and Training program, Foreign Military Financing, as well as NATO's Partnership for Peace program. In 2005, U.S. Central Command conducted approximately 45 bilateral, military cooperation events with the Ministry of Defense of Kazakhstan and other agencies, an increase of more than 100% since 2002. Events vary in size and scope, ranging from information exchanges to military exercises.

Environmental Issues

Kazakhstan has identified a number of major ecological problems within its borders—desiccation of the Aral Sea, protection of the fragile Caspian ecosystem, remediation of the Semipalatinsk nuclear testing range, cleanup of the Baykonur launching facility, extremely polluted cities, desertification, and development of mechanisms for regional transboundary water management.

To address the water management problem of the Syr Darya River, Kazakhstan and other basin states, with technical assistance from USAID/Central Asia, established the 1998 Framework Agreement on the Use of Water and Energy Resources of the Syr Darya Basin. Kazakhstan became a signatory to the Convention on International Trade in Endangered Species (CITES) in 1999.

The United States and the European Union worked together with the Ministry of Environmental Protection to establish an independent, nonprofit, and nonpolitical Regional Environmental Center (REC) in Almaty in 2001. The mission of the REC is to strengthen civil society and support sustainable development by promoting public awareness and participation in environmental decision-making among the countries of Central Asia. In 2002, the U.S. Environmental Protection Agency, U.S. Embassy, and Ministry of Environmental Protection signed a memorandum of understanding to provide the REC with funding for its grants program.

Business Customs

In terms of business customs, Kazakhstan is more European than Asian. It is customary to shake hands and call people by their first names at business meetings, as well as at informal get-togethers. However, men generally do not shake women's hands in company. Business attire is generally a suit and tie for men and a suit or business dress for women. Small gifts—pens, company logo pins, memo, and books—are frequently given at the end of an initial meeting as a token of appreciation. Business cards are the norm, often in both Russian and English.

Kazakhstani business people are generally less direct than American business people, and what can be accomplished in a few meetings in the United States might take more in Kazakhstan, requiring patience and discipline on the part of the U.S. business people. An experienced and competent interpreter can add invaluable context to your business meetings. It is common in Kazakhstan to have dinner with business contacts, but usually only after establishing business contacts in a more formal setting. Business attire is worn. Usually diners share a bottle of vodka or cognac and offer toasts, stating their desire for a fruitful business relationship and warm personal relations between partners. After-hours informal meetings, dinners and toasts, as well as weekend hunting and barbecues can be very important to forge business relations.

TRAVEL

Consular Information Sheet

October 2, 2008

Country Description: Kazakhstan is a constitutional republic with a strong presidency and a market economy. Kazakhstan's tourist facilities are not highly developed; the availability of goods and services is better than in most neighboring countries, but not up to the standards found in North America and Western Europe. Internal travel and travel to neighboring countries, by air and land, can be subject to delays due to infrastructure shortcomings and winter weather.

Entry Requirements: A valid passport and visa are required. The Embassy of Kazakhstan in Washington, D.C. and the Consulate of Kazakhstan in New York issue visas. The Embassy of Kazakhstan is located at 1401 16th Street NW, Washington, DC 20036, telephone (202) 232-5488 or 550-9617, fax (202) 232-5845 and the Consulate at 866 United Nations Plaza, Suite 586 A, New York, N.Y. 10017, telephone (212) 230-1900 or 230-1192, fax (212) 230-1172. An invitation is not required for single-entry business and tourist visas, but multiple-entry visas require an invitation from an individual or organizational sponsor in Kazakhstan. The U.S. Embassy in Astana and the U.S. Embassy Branch Office in Almaty do not issue letters of invitation to citizens interested in private travel to Kazakhstan. All travelers, even those simply transiting Kazakhstan, must obtain a Kazakhstani visa before entering the country. Travelers should be aware that overstaying the validity period of a visa will result in fines and delays upon exit. Travelers may be asked to provide proof at the border of their subsequent travel arrangements. Travelers transiting through Kazakhstan are reminded to check that their visas allow for a sufficient number of entries to cover each transit trip and to check the length of validity of the visa. Crossing the land border to and from the neighboring Kyrgyz Republic can result in delays or demands from border officials to pay fines.

Tourist visas cannot be extended in Kazakhstan. Business visas can be extended for up to 6 months total validity upon submission of a contract with a sponsoring Kazakhstani organization. Work visas can be

extended in Kazakhstan up to the expiration date of the holder's work permit, a separate document issued only in Kazakhstan.

NOTE: Due to changes in the labor law, foreigners who work in Kazakhstan for registered non-profit organizations and NGOs, other than designated Chief Representatives of those organizations, are no longer exempt from work permit regulations.

Travel to certain areas bordering China and cities in close proximity to military installations require prior permission from the Kazakhstani government. In 2001, the government declared the following areas closed to foreigners: Gvardeyskiy village, Rossavel village, and Kulzhabashy railway station in Zhambyl Oblast; Bokeyorda and Zhangaly districts in Western Kazakhstan Oblast; the town of Priozersk and Gulshad village in Karaganda Oblast; and Baykonur, Karmakshy, and Kazakly districts in Kyzylorda Oblast. Americans traveling within Kazakhstan have on occasion reported local officials demanding documentation authorizing travel within their area of jurisdiction, even though they received permission from the Department of Migration Police (formerly OVIR), currently part of the Ministry of Internal Affairs. Americans should report any trouble with local authorities to the U.S. Embassy in Astana or the U.S. Embassy Branch Office in Almaty.

Registration of American passports is conducted at the same time as the issuance of the visa in one of Kazakhstan's embassies and consulates abroad or at the time of a border crossing. Americans are not required to register in Kazakhstan upon arrival at a local office of the Department of Migration Police. All registrations are valid for three months, regardless of where they are issued. To extend your registration beyond three months, please contact your local office of the Department of Migration Police. However, if you are not sure if you have been properly registered at the time of visa issuance or border crossing, please contact your local office of the Department of Migration Police. Visitors to Kazakhstan engaging in missionary work or other religious activities must register with the Department of Justice office in the region (Akimat) where the activities will take place. This applies even if the religious activities are not the primary purpose of the visit. Attendance at a religious service does not itself require registration, however participation in the delivery of the service may. Americans have been fined and deported from Kazakhstan for addressing a congregation, leading prayers, and performing religious music without proper religious worker registration. In addition, representatives of faith-based non-governmental organizations are often considered subject to the registration requirement even if their activities are not religious in nature. If in doubt whether registration is required, visitors should contact the Department of Justice office responsible for the area of Kazakhstan where they intend to engage in religious activities and request a written decision. Religious worker registration is only valid for the locality where it is granted and visitors must register in each jurisdiction where they wish to engage in religious activities.

In an effort to prevent international child abduction, many governments have initiated procedures at entry/exit points. These often include requiring documentary evidence of relationship and permission for the child's travel from the parent(s) or legal guardian if not present. Having such documentation on hand, even if not required, may facilitate entry/departure. All children adopted in Kazakhstan after May 2003 must obtain exit stamps from both the Ministry of the Interior and Ministry of Foreign Affairs before departing the country.

Visit the Embassy of Kazakhstan's web site at http://www.kazakhembus.com for the most current visa information.

Safety and Security: Supporters of extremist groups such as the Islamic Jihad Union, the Islamic Movement of Uzbekistan, al-Qaeda, and the Eastern Turkistan Islamic Movement remain active in Central Asia. These groups have expressed anti-U.S. sentiments and may attempt to target U.S. Government or private interests in the region, including in Kazakhstan.

Attacks against foreign interests in Central Asia have occurred and new tactics, including the use of suicide bombers, have been employed by extremists in neighboring Uzbekistan.

Terrorists do not distinguish between official and civilian targets. Because of increased security at official U.S. facilities, terrorists are also targeting "soft" civilian targets such as residential areas, clubs and restaurants, places of worship, hotels, schools, outdoor recreation events, resorts, beaches, maritime facilities, and aircraft.

Kazakhstani security personnel may at times place foreign visitors under surveillance. Hotel rooms, telephones and fax machines may be monitored, and personal possessions in hotel rooms may be searched.

Taking photographs of anything that could be perceived as being of military or security interest may result in problems with authorities.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Travelers in Kazakhstan should exercise the same precautions concerning personal safety and protection of valuables as they would in any major U.S. city. Using good judgment and avoiding high-risk areas can reduce the crime threat. The

most common crimes foreign tourists encounter are purse snatching, pick pocketing, assaults, and robberies. Pick pocketing or robberies occur most frequently in the vicinity of Western hotels, transportation sites, and at open-air markets, including the central open-air market in Almaty (known locally as the "green market"). Americans are advised to exercise caution in the vicinity of hotels, bus or train stations, and when shopping. The U.S. Embassy strongly recommends that Americans do not carry large sums of money on the street.

Identification checks by the police are common practice. U.S. visitors must produce either a passport or an Embassy-certified copy thereof upon request. Police are not required to demonstrate probable cause or reasonable suspicion to initiate ID checks. Given concerns with crime, the U.S. Embassy has made arrangements with the Kazakhstani Government to allow Americans in the Almaty Oblast to carry a certified copy of their passport and visa rather than the original. These copies can be obtained from either the U.S. Embassy's Consular Section in Astana or the Branch Office in Almaty during business hours Monday to Friday, 9:00 a.m. to 5:00 p.m.

Be wary of persons representing themselves as police or other local officials. It is not uncommon for Americans to become victims of harassment and extortion by imposters, genuine law enforcement and other officials. A genuine police official should always present his own credentials when approaching someone on the street. If the officer cannot produce identification, he is most likely an imposter. Never voluntarily hand over your wallet to a police officer. If pressured, tell the officer that you will report his behavior to the U.S. Embassy and his supervisors. Authorities are concerned about these incidents and have cooperated in investigating such cases. Try to obtain the officer's name, badge number, and license plate number, and note where the incident happened because this information assists local officials in identifying the perpetrators. Report crimes committed against you by persons presenting themselves as police or other governmental authorities to a police station and the U.S. Embassy.

The "lost wallet" scam continues to be common in Kazakhstan. One version of this swindle involves the discovery of a lost wallet in your presence. A first person will discover the wallet and offer to divide its contents with you. Then, a second person will appear, claim to be the owner of the wallet, and demand compensation for the missing money. A second version involves a person looking for a lost wallet, asking you if have seen it. The person asks you to reveal the contents of your pockets or bag to prove that you do not have the missing wallet. The wallet seeker will then surreptitiously steal your exposed valuables. When initially approached by the "finder" or "seeker" of the lost wallet, simply walk away.

The embassy highly discourages taking private gypsy cabs in lieu of licensed taxicabs while in Kazakhstan. This applies especially to travel from the airport to the city upon arrival, where men posing as "meet and greet" airport facilitators have lured foreigners into cars purportedly to take them to their hotels. However, the driver then takes the passengers to a secluded destination and demands approximately $100 for gas to take the foreigner back to the city. All travelers should make prior arrangements with their contacts in Almaty for concrete identification upon arrival at the airport. Americans should not leave with anyone who does not show pre-arranged identification, even if the person is holding a sign with the traveler's name.

The Embassy has received reports from American residents and visitors being victims of violent, late-night muggings. Americans are advised to travel in groups or pairs. Lone individuals often make easy targets for muggers. At night, try to remain in well-lit, populated areas. Visitors are encouraged to leave restaurants or bars if fights break out.

Corruption by public officials, including law enforcement, has been reported frequently, especially at the airport in Almaty. Some foreigners have been told by customs or border guard officials that they must pay a $50-$500 fine for violating an undisclosed local regulation, despite the fact that the foreign citizen has fully complied with local laws. Some Americans have reportedly been asked to pay a large fine upon exiting Kazakhstan. When encountering such irregularities, U.S. citizens are advised to seek clarification from supervisory airport officials or contact the U.S. Embassy before paying.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance.

The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends, and explain how funds could be transferred.

Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency line in Kazakhstan is: 03.

Medical Facilities and Health Information: Medical care in Kazakhstan is limited and well below North American and Western European standards. The U.S. Embassy maintains a list of English-speaking physicians. Basic medical supplies, including disposable needles, anesthetics, and antibiotics can be in short supply. Elderly travelers and those with pre-existing health problems may be at risk due to inadequate medical facilities. Most resident Americans travel to Western Europe for serious medical treatment. Such travel can be extremely

expensive if undertaken under emergency conditions. Travelers requiring prescription medications or specific brand-name medicines should bring sufficient supplies of medications and not rely on local availability.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel.

For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Tuberculosis is an increasingly serious health concern in Kazakhstan. For further information, please consult the CDC's Travel Notice on TB at http://wwwn.cdc.gov/travel.

Some HIV/AIDS restrictions exist for foreign residents of Kazakhstan. Visitors applying for a work or residency permit, required for Americans who wish to spend more than 6 months in Kazakhstan, must submit negative HIV test results with their application to the Migration Police in the city where they intend to work or reside. The results must be less than three months old. The city HIV clinic in the place of registration can conduct the test or may certify test results performed abroad. If the original test results are in a language other than Russian or Kazakh, they must be accompanied by an official translation. If a foreigner tests positive for HIV in Kazakhstan, he or she must depart the country. Please verify this information with the Kazakhstani sponsoring organization that can provide more information on the specific HIV testing procedures in the region of Kazakhstan where you intend to reside.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Kazakhstan is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Roads in Kazakhstan are in poor repair, especially in rural areas. Street lighting, especially on side streets, may be turned off at night. Drivers often ignore lane markings. Potholes are common, and are often dangerously deep.

Pedestrians frequently dart out in front of cars. Visitors should drive defensively at all times as many local drivers do not follow traffic laws. Special caution should particularly be taken if driving at night. Road rage can be a problem, especially in and around Almaty, and a non-confrontational response to such behavior is strongly recommended.

Accidents involving severe injury and/or death are common. Traffic police have reportedly stopped cars to extort bribes on main city streets and at periodic checkpoints on major highways.

The road between Almaty and Bishkek, Kyrgyzstan, is especially treacherous at night or during poor weather. Americans and other travelers have been killed in traffic accidents on that road, and travel at night should be undertaken with great caution or avoided.

Travelers should be particularly careful when using public transportation and taxis. Buses tend to be very crowded and can be unsafe and unreliable. Due to the danger of theft or assault, travelers should be selective regarding which taxi they contract and always avoid entering a cab that already contains persons other than the driver. Americans wishing to drive in Kazakhstan should possess a valid international driver's license. For specific information, travelers may contact the Embassy of the Republic of Kazakhstan at 140 1 1 6th Street NW, Washington, DC 20036, telephone (202) 232-5488.

Visit the web site of Kazakhstan's national tourist office and national authority responsible for road safety at http://www.kazakhembus.com.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Kazakhstan, the U.S. Federal Aviation Administration (FAA) has not assessed Kazakhstan's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Kazakhstan remains largely a cash economy. Traveler's checks and credit cards are not widely accepted, except at large hotels and restaurants catering to international visitors.

U.S. dollars can easily be exchanged for the local currency (Tenge) at local and authorized currency exchanges, but all denominations of U.S. currency except $1 bills must be new series (large portraits) and all must have been issued after 2000 and be in good condition (not worn or torn and without any writing or marks).

Kazakhstan, especially in the mountainous southeast region, is an earthquake-prone country. The U.S. Department of State has ranked the earthquake threat level within Almaty as a Level 4 (the highest level assigned).

Building practices within Kazakhstan do not generally meet U.S. seismic standards. In addition, local authorities do not have sufficient resources to respond to a large-scale disaster.

American citizens traveling to Kazakhstan are encouraged to register

with either the U.S. Embassy or the U.S. Embassy's Branch Office's Consular Section to facilitate contact in the event of an emergency. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www. fema.gov.

Kazakhstani customs authorities may enforce strict regulations concerning export from Kazakhstan of items such as antiquities. Foreigners must complete a customs declaration upon entering Kazakhstan and may face fines upon departure if unable to produce certificates verifying legal conversion of foreign currency.

Travelers are strongly encouraged to declare all valuables, including computers, video cameras, and mobile telephones, upon entry in order to avoid paying duty on those items upon departure. Tenge, Kazakhstan's currency, can be exported by residents of Kazakhstan (including foreigners) in amounts up to $3,000 without declaration and without written certification of the origin of funds.

Residents exporting between $3,000 and $10,000 must complete a customs declaration and prove the origin of the funds (e.g. proof of locally-paid salary). Travelers visiting Kazakhstan for short periods of time may not leave the country with more currency than they declared when entering Kazakhstan. For legal requirements on the export of Tenge, travelers should consult with local Customs officials.

In practice, however, travelers should be wary of such officials at the airport, as visitors have been erroneously charged duty on Tenge exports or asked to surrender Tenge in the past. It is advisable to contact the Embassy of the Republic of Kazakhstan in Washington, D.C. for specific information at 140116th Street NW, Washington, DC 20036, telephone (202) 232-5488.

Foreigners are required to carry a valid passport while in Kazakhstan. American citizens are strongly urged to have a certified copy of their U.S. passport made at the either the U.S. Embassy's Consular Section in Astana or the Branch Office in Almaty. Having a certified copy in their possession satisfies the local requirement to carry a passport and reduces the chances of a passport being lost or stolen.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses.

Persons violating Kazakhstan's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Kazakhstan are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Kazakhstan are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Kazakhstan. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency.

The U.S. Embassy in Astana and the U.S. Embassy Branch Office in Almaty are 11 hours ahead of U.S. Eastern Standard Time. The U.S. Embassy in Astana is located at Akbulak-4, St. 22-23, Building 3, 010010, Astana, tel. 7-7172-70-21-00, fax 7-7172-70-22-80, e-mail USAKZ@state.gov, or web site http://kazakhstan.usembassy.gov.

The U.S. Embassy Branch Office in Almaty is located at 97 Zholdasbekov St., Samal-2, Almaty 050059, tel. 7-727- 250-49-00, 250-49-01, fax 7-727-250-48-84, e-mail USAKZ@state.gov.

OVIR registration. There are local Kazakhstani registration requirements. All U.S. citizens arriving in Kazakhstan through 12 international airports and the railway point of Dostyk (Druzhba) are registered at the moment of the border crossing and, as proof, receive a migration card with entry and registration marks from the Border Service of Committee of National Security of the Republic of Kazakhstan. Registration of U.S. citizens is also done at automobile checkpoints in Khorgos, Dostyk, Bakhty, Maikapchagai, Kordai and Kolzhat, and the seaports of Aktau and Bautino. The registration upon arrival is valid for 3 months. For stays longer than 90 days, travelers should register with the Migration Police.

However, if for any reason, a U.S. citizen was not registered in the Kazakhstan Embassy or immediately upon arrival in Kazakhstan, the traveler should register with the Office of Visas and Registration (OVIR) within 5 calendar days. Visitors who do not register may have to pay fines upon departure and their departure may be delayed.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Kazakhstan is not a member of The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague

Adoption Convention). Adoption agencies are not recognized in Kazakhstan. Current Kazakhstani law does not recognize any intermediaries that would represent the parents and act between prospective adoptive parents and children. However, foreign prospective adoptive parents can have assistants, such as interpreters or lawyers, who help them through the adoption process.

In March 2008, the Department of State was informed that the Embassy of Kazakhstan is conducting a review of intercountry adoption procedures. Until completed, this review affects the processing of new adoption dossiers.

Although initial indications were that no new cases would be processed during the review, we have learned that some new cases may have been accepted. We have offered to assist the Embassy with its efforts to ensure that adoptions from Kazakhstan to the United States are conducted in a transparent, serious and honest process. It is not known at this time how long this review will require.

Who Can Adopt? To bring an adopted child to United States from Kazakhstan, you must be found eligible to adopt by the United States Government. In addition to the United States requirements for adoptive parents, Kazakhstan also has the following requirements for adoptive parents.

Residency Requirements: The prospective adoptive parents must reside with the child at the child's habitual residence for a minimum of 14 days prior to the adoption. This pre-adoption bonding period cannot be waived.

Age Requirements: There are no age requirements other than an unmarried prospective adoptive parent must be at least 16 years older than the child. Prospective adoptive parents over 60 years of age have found it difficult to adopt.

Marriage Requirements: Prospective adoptive parents can be single or married, however, some unmarried prospective parents have found it difficult to adopt.

Income Requirements: While there are no official income requirements, the prospective adoptive parents are required to show proof of their ability to support the adopted child.

Who Can Be Adopted? Kazakhstan has specific requirements that a child must meet in order to be eligible for adoption. In addition to these requirements, a child must meet the definition of an orphan under United States law for you to bring him or her home back to the United States.

Relinquishment Requirements: Kazakhstani law requires that orphans be registered with the Ministry of Education Committee of Guardianship and Care for at last six months before they are eligible for adoption.

Sibling Requirements: It is difficult for foreigners to adopt two or more biologically unrelated children at the same time. Prospective adoptive parents wishing to adopt two or more non-siblings on the same trip are urged to question their adoption agencies carefully prior to visiting the children to ascertain whether this is possible in the city where they plan to adopt.

Kazakhstan's Adoption Authority: The Ministry of Education

The Process: The first step in adopting a child from Kazakhstan is usually to select a licensed agency in the United States that can help with your adoption. Adoption service providers must be licensed by the United States state in which they operate.

To bring an adopted child from Kazakhstan to the United States, you must apply to be found eligible to adopt (Form I-600A) by the USCIS. Once the prospective adoptive parents have been cleared for adoption from their home state and have completed the initial processing requirements of the United States Citizenship and Immigration Services, they must register with the Ministry of Foreign Affairs (MFA) to indicate their intention to adopt a Kazakhstani orphan.

The Kazakhstani Embassy or Consulate transfers the dossier to the MFA in Astana for processing. The MFA forwards it to the Ministry of Education for review. The dossier is forwarded to the Guardianship Body in the town where the prospective adoptive parents wish to adopt. The length of time for dossier processing is unpredictable.

After the dossier has been processed, the Guardianship Body issues a letter inviting the parents to travel to Kazakhstan to apply for adoption. This letter is necessary for the parents to obtain a Kazakhstani visa. Also, some cities, such as Almaty and Pavoldar delay issuance of invitation letters for indefinite periods.

After obtaining a visa, the prospective adoptive parents are free to travel to Kazakhstan to select their child and proceed with their petition for adoption.

There is no such thing as a "referral" or "pre-identification" in Kazakhstan. Even though the prospective adoptive parents may wish to adopt a particular child, the Government of Kazakhstan does not match a child to the parents or in any way "assign" them a child until they arrive in Kazakhstan, select a child in person, and apply to the court to adopt the child.

Information about medical histories of the child and other pertinent information will be made available only at the orphanage during selection of the child. Prospective adoptive parents have a minimum of 14 days of personal contact with the orphan before formally submitting an adoption application. This means that prospective adoptive parents must stay in the town where the orphan is living and visit the orphan on a regular basis during this two-week period. Nearly all Kazakhstani jurisdictions require that in the case of married petitioners, BOTH parents be present for the entire 14-day bonding period.Once all legal requirements

are fulfilled, prospective adoptive parents may submit their adoption application to the civil court that will decide whether to grant the adoption.

Role of the Adoption Authority: Adoption agents are encouraged to contact the Ministry of Education to notify the Ministry of their intention to provide adoption services.

Role of Adoption Agencies: Under Kazakhstani law, prospective adoptive parents may work with any agency or individuals they choose. Please note that adoption agencies are not recognized in Kazakhstan.

The current Kazakhstani law does not assume any intermediaries that would be represent the parents and act between prospective adoptive parents and children eligible for adoption. However the regulation admits that adoptive parents as foreigners can have assistants, such as interpreters or lawyers, who would help them to go through the process of adoption.

Adoption Application: The adoption application to the Kazakhstani court should include, but not necessarily limited to, the documents listed in the Documents Required section below.

Time Frame: The prospective adoptive parents can expect to stay in Kazakhstan for a minimum of 60 days to complete the adoption procedures. This period includes the residency requirements listed in the WHO section, as well as the time to complete all post-adoption and United States immigration paperwork.

Adoption Fees: The total cost for adoptions from Kazakhstan (including fees for services charged by United States-based agencies) averages approximately $18,000 USD to $25,000 USD per child. This amount includes the following official fees:

- Application to court—$4 USD
- New birth certificate—$17 USD
- Adoption certification—$17 USD
- Exit stamp from Migration Police of Kazakhstan
- Registration of the child with the Ministry of Foreign Affairs of Kazakhstan—$84 USD
- Expedited passport issuance is an option available at $80 USD. Normal passport issuance takes 1 month.

Documents Required:

- Letter of Intent to adopt a child.
- Commitment from the Family to uphold Kazakhstan Adoption Law; Prospective adoptive parents must commit to maintain the child's Kazakhstani citizenship, submit post-placement reports annually, and allow Kazakhstani officials to visit the child up to twice a year.
- Home Study–A licensed home study agent/agency in the prospective parents' state of residence must perform the home study.
- Home Study Agency Post-Placement Commitment prepared by a Home Study Agency Worker.
- Home Study Agency Letter of Recommendation–The agency provides a separate notarized Letter of Favorable Recommendation.
- Adoption Agency Certificate of Approval of home study.
- Adoption Agency License.
- Commitment from the Family to Register the Child with the Kazakhstani Ministry of Foreign Affairs.
- Notarized Copies of each Prospective Adoptive Parent's Passport.
- Notarized copy of marriage certificate, if applicable.
- FBI Background Checks–Each prospective adoptive parent must obtain a background check.
- Medical Forms–Each prospective adoptive parent's physician must copy the medical form (http://kazakhembus.com/Medical_Form.doc) onto their letterhead and complete it.
- Verification of Employment Letters, including salary information. Self-employed prospective adoptive parents must have their business accountant attest to the business's financial stability.
- Financial Statements (Affidavits).
- Bank Letter–Notarized letter from the prospective adoptive parents' bank
- Home Ownership Verification.
- Notification from USCIS of Petition Approval–Either the I-171H or the I-179C form.
- Powers of Attorney–The United States adoption agency will provide a form for the parents to consent to having someone act on their behalf in Kazakhstan.
- Pictures of the prospective adoptive parents.
- Divorce Decree–Notarized copies of all divorce decrees, if applicable. Kazakhstan only allows prospective adoptive parents to have had two divorces.
- Single Parents must submit a notarized copy of their birth certificate, letters naming the person who will be appointed guardian if the adoptive parent can no longer care for the child, and an acceptance letter from the appointed guardian.

Once the court makes a decision on your adoption, there is a 15-day waiting period before the decision is final. In some cases, the judge can waive this "appeal period," but such waivers are rare and prospective adoptive parents should assume the 15-day waiting period will not be waived. In some cases, it may be possible for one or both prospective parents to leave Kazakhstan and return for the child,

or have someone else complete processing and escort the child to the United States. After the court's decision is finalized, the parents may apply for the adoption certificate, the child's new Kazakhstani birth certificate, based on the court decree.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Kazakhstan has a requirement that all adopted children must have a Post Placement Report (PPR) filed for them each year until the adopted child turns 18. This is extremely important, and a failure by adoptive parents to comply with this requirement could have a negative effect on the ability of future families to adopt from Kazakhstan.

The PPR should be done in the United States state where the child and family reside, preferable by a licensed social worker and include up to 5 photos of the child. The PPR should be translated into Russian or Kazakh and sent to the Department of Education of the city or region from where the child was adopted.

KENYA

Compiled from the June 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Kenya

PROFILE

Geography

Area: 582,646 sq. km. (224,960 sq mi.); slightly smaller than Texas.

Cities: Capital—Nairobi (pop. 2.9 million; 2007 est.). Other cities—Mombasa (828,500; 2006 est.), Kisumu (322,000; 1999), Nakuru (219,366; 1999), Eldoret (193,830; 1999).

Terrain: Kenya rises from a low coastal plain on the Indian Ocean in a series of mountain ridges and plateaus which stand above 3,000 meters (9,000 ft.) in the center of the country. The Rift Valley bisects the country above Nairobi, opening up to a broad arid plain in the north. Highlands cover the south before descending to the shores of Lake Victoria in the west.

Climate: Tropical in south, west, and central regions; arid and semi-arid in the north and the northeast.

People

Nationality: Noun and adjective—Kenyan(s).

Population: (June 2007 est.) 37.9 million.

Ethnic groups: Kikuyu 22%, Luyia 14%, Luo 14%, Kalenjin 11%, Kamba 11%, Kisii 6%, Meru 5%.

Religions: Christian 80%, Muslim 10%, traditional African religions 9%, Hindu/Sikh/Baha'i/Jewish 1%.

Languages: English (official), Swahili (national), over 40 other languages from the Bantu, Nilotic, and Cushitic linguistic groups.

Education: First 8 years of primary school are provided free by the government. Attendance—92% for primary grades. Adult literacy rate—85.1%.

Health: Infant mortality rate—57.4/1,000. Life expectancy—55.3 yrs (2007 est.).

Work force: (1.95 million wage earners) public sector 30%; private sector 70%. Informal sector workers—6.4 million. Services—45%; industry and commerce—35%; agriculture—20%.

Government

Type: Republic.

Independence: December 12, 1963.

Constitution: 1963.

Government branches: Executive—president (chief of state, head of government, commander in chief of armed forces). Legislative—unicameral National Assembly (parliament). Judicial—Court of Appeal, High Court, various lower and special courts, includes Kadhi (Sharia) courts.

Political subdivisions: 69 districts, joined to form 7 rural provinces. Nairobi area has special provincial status. The government has gazetted 37 more districts, whose ratification was still in process as of October 2007.

Political parties: Over 100 registered political parties. Two coalitions, the Party of National Unity (PNU) and the Orange Democratic Movement (ODM), dominate the political party scene. PNU membership is filled by parties representing Kikuyu and closely related ethnic groups; ODM membership ranks are filled by parties representing nearly everybody else. PNU and ODM agreed in February 2008 to form a grand coalition government in a power-sharing arrangement that ended the political crisis erupting after highly controversial national elections in December 2007.

Suffrage: Universal at 18.

Economy

GDP: (2007 est.) $29.3 billion.

Annual growth rate: (2006) 6.1%.

Gross national income per capita: (2006) $455.

Natural resources: Wildlife, land.

Agriculture: Products—tea, coffee, sugarcane, horticultural products, corn, wheat, rice, sisal, pineapples, pyrethrum, dairy products, meat and meat products, hides, skins. Arable land—5%.

Industry: Types—petroleum products, grain and sugar milling, cement, beer, soft drinks, textiles, vehicle assembly, paper and light manufacturing.

Trade: (2006) Exports—$3.1 billion: tea, coffee, horticultural products, petroleum products, cement, pyre-

thrum, soda ash, sisal, hides and skins, fluorspar. Major markets—Uganda, Tanzania, United Kingdom, Germany, Netherlands, Ethiopia, Rwanda, Egypt, South Africa, United States. Imports—$7.2 billion: machinery, vehicles, crude petroleum, iron and steel, resins and plastic materials, refined petroleum products, pharmaceuticals, paper and paper products, fertilizers, wheat. Major suppliers—U.K., Japan, South Africa, Germany, United Arab Emirates, Italy, India, France, United States, Saudi Arabia.

PEOPLE

Kenya has a very diverse population that includes three of Africa's major sociolinguistic groups: Bantu (67%), Nilotic (30%), and Cushitic (3%). Kenyans are deeply religious. About 80% of Kenyans are Christian, 10% Muslim, and 10% follow traditional African religions or other faiths. Most city residents retain links with their rural, extended families and leave the city periodically to help work on the family farm. About 75% of the work force is engaged in agriculture, mainly as subsistence farmers. The national motto of Kenya is Harambee, meaning "pull together." In that spirit, volunteers in hundreds of communities build schools, clinics, and other facilities each year and collect funds to send students abroad. The six state universities enroll about 45,000 students, representing some 25% of the Kenyan students who qualify for admission. There are six private universities.

HISTORY

Fossils found in East Africa suggest that protohumans roamed the area more than 20 million years ago. Recent finds near Kenya's Lake Turkana indicate that hominids lived in the area 2.6 million years ago.

Cushitic-speaking people from what is now Sudan and Ethiopia moved into the area that is now Kenya beginning around 2000 BC. Arab traders began frequenting the Kenya coast around the first century AD. Kenya's proximity to the Arabian Peninsula invited colonization, and Arab and Persian settlements sprouted along the coast by the eighth century.

During the first millennium AD, Nilotic and Bantu peoples moved into the region, and the latter now comprise two thirds of Kenya's population. The Swahili language, a Bantu language with significant Arabic vocabulary, developed as a trade language for the region.

Arab dominance on the coast was interrupted for about 150 years following the arrival of the Portuguese in 1498. British exploration of East Africa in the mid-1800s eventually led to the establishment of Britain's East African Protectorate in 1895. The Protectorate promoted settlement of the fertile central highlands by Europeans, dispossessing the Kikuyu and others of their land. Some fertile and well watered parts of the Rift Valley inhabited by the Maasai and the western highlands inhabited by the Kalenjin were also handed over to European settlers. For other Kenyan communities, the British presence was slight, especially in the arid northern half of the country. The settlers were allowed a voice in government even before Kenya was officially made a British colony in 1920, but Africans were prohibited from direct political participation until 1944 when a few appointed (but not elected) African representatives were permitted to sit in the legislature.

From 1952 to 1959, Kenya was under a state of emergency arising from the "Mau Mau" insurgency against British colonial rule in general and its land policies in particular. This rebellion took place almost exclusively in the highlands of central Kenya among the Kikuyu people. Tens of thousands of Kikuyu died in the fighting or in the detention camps and restricted villages. British losses were about 650. During this period, African participation in the political process increased rapidly. The first direct elections for Africans to the Legislative Council took place in 1957. Kenya became independent on December 12, 1963, and the next year joined the Commonwealth. Jomo Kenyatta, an ethnic Kikuyu and head of the Kenya African National Union (KANU), became Kenya's first President. The minority party, Kenya African Democratic Union (KADU), representing a coalition of small ethnic groups that had feared dominance by larger ones, dissolved itself in 1964 and joined KANU.

A small but significant leftist opposition party, the Kenya People's Union (KPU), was formed in 1966, led by Jaramogi Oginga Odinga, a former Vice President and Luo elder. The KPU was banned shortly thereafter, however, and its leader detained. KANU became Kenya's sole political party.

At Kenyatta's death in August 1978, Vice President Daniel arap Moi, a Kalenjin from Rift Valley province, became interim President. By October of that year, Moi became President formally after he was elected head of KANU and designated its sole nominee for the presidential election.

In June 1982, the National Assembly amended the constitution, making Kenya officially a one-party state. Two months later, young military officers in league with some opposition elements attempted to overthrow the government in a violent but ultimately unsuccessful coup. In response to street protests and donor pressure, Parliament repealed the one-party section of the constitution in December 1991. In 1992, independent Kenya's first multiparty elections were held.

Divisions in the opposition contributed to Moi's retention of the presidency in 1992 and again in the 1997 election. Following the 1997 election Kenya experienced its first coalition government as KANU was forced to cobble together a majority by bringing into government a few minor par-

ties. In October 2002, a coalition of opposition parties formed the National Rainbow Coalition (NARC). In December 2002, the NARC candidate, Mwai Kibaki, was elected the country's third President. President Kibaki received 62% of the vote, and NARC also won 59% of the parliamentary seats. Kibaki, a Kikuyu from Central province, had served as a member of parliament since Kenya's independence in 1963. He served in senior posts in both the Kenyatta and Moi governments, including Vice President and Finance Minister. In 2003, internal conflicts disrupted the NARC government. These conflicts came into the open when the government put its draft constitution to a public referendum. Key government ministers organized the opposition to the draft constitution, which was defeated soundly. Two principal leaders of the movement to defeat the draft constitution, Raila Odinga and Kalonzo Musyoka—both former Kibaki allies—were presidential can-

didates for the Orange Democratic Movement (ODM) party and the Orange Democratic Movement-Kenya (ODM-K) party, respectively. In September 2007, President Kibaki and his allies formed the coalition Party of National Unity (PNU). KANU joined the PNU coalition, although it served in parliament as the official opposition party.

On December 27, 2007, Kenya held presidential, parliamentary, and local government elections. While the parliamentary and local government elections were largely credible, the presidential election was seriously flawed, with irregularities in the vote tabulation process as well as turnout in excess of 100% in some constituencies. On December 30, the chairman of the Electoral Commission of Kenya declared incumbent Mwai Kibaki as the winner of the presidential election. Violence erupted in different parts of Kenya as supporters of opposition candidate Raila Odinga and supporters of Kibaki clashed with police and each other. The post-election crisis left more than 1,000 Kenyans dead and about 600,000 people became refugees or were internally displaced. In order to resolve the crisis, negotiation teams representing PNU and ODM began talks under the auspices of former UN Secretary General Kofi Annan and the Panel of Eminent African Persons (Benjamin Mkapa of Tanzania and Graca Machel of Mozambique). On February 28, 2008, President Kibaki and Raila Odinga signed a power-sharing agreement, which provided for the establishment of a prime minister position (to be filled by Odinga) and two deputy prime minister positions, as well as the division of cabinet posts according to the parties' proportional representation in parliament. On March 18, 2008, the Kenyan parliament amended the constitution and adopted legislation to give legal force to the agreement. On April 17, 2008 the new coalition cabinet and Prime Minister Odinga were sworn in. Negotiations are ongoing regarding longer-term reform issues, including constitutional reform, land tenure reform, judicial reform, and the need to address poverty and inequality.

GOVERNMENT

The unicameral National Assembly consists of 210 members elected to a term of 5 years from single-member constituencies, plus 12 members nominated by political parties on a proportional representation basis. The president appoints the vice president and cabinet members from among those elected to the assembly. The attorney general and the speaker are ex-officio members of the National Assembly.

The judiciary is headed by a High Court, consisting of a Chief Justice and High Court judges and judges of Kenya's Court of Appeal, all appointed by the president.

Local administration is divided among 69 rural districts, each headed by a commissioner appointed by the president. The government has proposed 37 more districts, but these are not yet ratified by Parliament. The districts are joined to form seven rural provinces. Nairobi has special provincial status. The Ministry of State in charge of Provincial Administration and Internal Security supervises the administration of districts and provinces.

Principal Government Officials

Last Updated: 11/12/08

Pres.: **Mwai KIBAKI**
Vice Pres.: **Stephene Kalonzo MUSYOKA**
Prime Min.: **Raila Amolo ODINGA**

Kenya maintains an embassy in the United States at 2249 R Street NW, Washington, DC 20008 (tel. 202-387-6101, website: www.kenyaembassy.com) and consulates in Los Angeles and New York.

POLITICAL CONDITIONS

Until post-election political unrest struck in early 2008, Kenya had, since independence, maintained remarkable stability despite changes in its political system and crises in neighboring countries. This had been particularly true since the re-emergence of multiparty democracy and the accompanying increase in freedom (including freedom of speech, the press, and assembly).

In December 2002, Kenyans held democratic and open elections, which were judged free and fair by international observers. The 2002 elections marked an important turning point in Kenya's democratic evolution as the presidency and the parliamentary majority passed from the party that had ruled Kenya since independence to a coalition of new political parties. The government lost a referendum over its draft constitution in November 2005. This vote too was widely accepted as free, fair, and credible.

Under the first presidency of Mwai Kibaki, the NARC coalition promised to focus its efforts on generating economic growth, improving and expanding education, combating corruption, and rewriting the constitution. The first two goals were largely met, but progress toward the second two goals was limited. President Kibaki's cabinet from 2002-2005 consisted of members of parliament from allied parties and others recruited from opposition parties who joined the cabinet without the approval of their party leaderships.

In early 2006, revelations from investigative reports of two major government-linked corruption scandals rocked Kenya and led to resignations, including three ministers (one of whom was later re-appointed). In March 2006, another major scandal was uncovered involving money laundering and tax evasion in the Kenyan banking system. The government's March 2006 raid on the Standard Group media house conducted by masked Kenyan police was internationally condemned and was met with outrage by Kenya media and civil society. The government did not provide a sufficient explanation. No one has been held accountable.

The December 2007 elections were marred by serious irregularities, and set off a wave of violence throughout Kenya. Following the February 2008 signing of a power-sharing agreement between President Kibaki and the opposition, a new coalition cabinet was sworn in April 2008, headed by Prime Minister Odinga. The 42-member cabinet is the largest in Kenya's history and includes new ministries for cooperative development, Northern Kenya development, and Nairobi metropolitan development. Several ministries were also subdivided, creating a number of new cabinet positions.

With the creation of the coalition government, the Kenyan Government will focus its attention on achieving its ambitious reform agenda, aimed at avoiding a repeat of early 2008's post-election political and tribal violence. The government also plans to draft a new constitution by April 2009, specifically to address land rights issues and to restructure the government by strengthening institutions to create a more effective system of checks and balances.

ECONOMY

After independence, Kenya promoted rapid economic growth through public investment, encouragement of smallholder agricultural production, and incentives for private (often foreign) industrial investment. Gross domestic product (GDP) grew at an annual average of 6.6% from 1963 to 1973. Agricultural production grew by 4.7% annually during the same period, stimulated by redistributing estates, diffusing new crop strains, and opening new areas to cultivation. After experiencing moderately high growth rates during the 1960s and 1970s, Kenya's economic performance during the last two decades has been far below its potential. The economy grew by an annual average of only 1.5% between 1997 and 2002, which was below the population growth estimated at 2.5% per annum, leading to a decline in per capita incomes. The decline in economic performance in the last two decades was largely due to inappropriate agricultural policies, inadequate credit, and poor international terms of trade contributing to the decline in agriculture. Kenya's inward-looking policy of import substitution and rising oil prices made Kenya's manufacturing sector uncompetitive. The government began a massive intrusion in the private sector. Lack of export incentives, tight import controls, and foreign exchange controls made the domestic environment for investment even less attractive.

From 1991 to 1993, Kenya had its worst economic performance since independence. Growth in GDP stagnated, and agricultural production shrank at an annual rate of 3.9%. Inflation reached a record 100% in August 1993, and the government's budget deficit was over 10% of GDP. As a result of these combined problems, bilateral and multilateral donors suspended program aid to Kenya in 1991. In the 1990s, the government implemented economic reform measures to stabilize the economy and restore sustainable growth. In 1994, nearly all administrative controls on producer and retail prices, imports, foreign exchange and grain marketing were removed. The Government of Kenya privatized a range of publicly owned companies, reduced the number of civil servants, and introduced conservative fiscal and monetary policies. By the mid-1990s, the government lifted price controls on petroleum products. In 1995, foreigners were allowed to invest in the Nairobi Stock Exchange (NSE). In July 1997, the Government of Kenya refused to meet commitments made earlier to

the International Monetary Fund (IMF) on governance reforms. As a result, the IMF suspended lending for 3 years, and the World Bank also put a $90-million structural adjustment credit on hold.

The Government of Kenya took some positive steps on reform, including the establishment of the Kenyan Anti-Corruption Authority in 1999, and the adoption of measures to improve the transparency of government procurements and reduce the government payroll. In July 2000, the IMF signed a $150 million Poverty Reduction and Growth Facility (PRGF), and the World Bank followed suit shortly after with a $157 million Economic and Public Sector Reform credit. The Anti-Corruption Authority was declared unconstitutional in December 2000, and other parts of the reform effort faltered in 2001. The IMF and World Bank again suspended their programs.

Net foreign direct investment (FDI) was negative from 2000-2003, but started trickling back in 2004, as demonstrated by an increase in the number of enterprises operating in Export Processing Zones (EPZs) from 66 to 74 between 2003 and 2004. The value of total investments increased from Ksh18.7 billion (U.S. $247.3 million) in 2005 to Ksh20.1 billion (over U.S. $278.3 million) in 2006. Following the end of the Multifiber Arrangement (MFA) textile agreement in January 2005, several textile and apparel factories closed, leaving 68 EPZ enterprises. In 2006, this number increased to 70 EPZ enterprises. According to the World Bank's Migrations and Remittances Factbook 2008, remittances rose from U.S. $338.3 million in 2004 to U.S. $1.3 billion in 2007, equivalent to 5.3% of the GDP.

The economy began to recover after 2002, registering 2.8% growth in 2003, 4.3% in 2004, 5.8% in 2005, 6.1% in 2006, and 7.0% in 2007. However, the violence that broke out after the December 27, 2007 general election paralyzed the economy in January and early February 2008 and closed the Northern Corridor in Rift Valley province, cutting off vital shipments of fuel and other goods to Uganda, Rwanda, Burundi, eastern Democratic Republic of the Congo and South Sudan. Tourists fled, and agricultural production in the breadbasket Rift Valley region was crippled. The manufacturing sector had to cut back operations by 70%, as unsafe roads prevented movement of workers, inputs, or products, and congestion at the Port of Mombasa slowed imports and exports. The signing of a reconciliation agreement on February 28 put the economy back on track, but the damage in the first quarter to agriculture, tourism, consumption, investment, and the financial, transport, and construction sectors is expected to shave 2008 economic growth from the 8% forecast to the 4%-6% level. Governments in major source countries for tourists to Kenya have lifted their travel advisories, and the Kenyan Government and tourism industry will make strenuous efforts to bring tourists back, but revenues will be a small fraction of the approximately $1 billion earned in 2007.

During President Kibaki's first term in office (2003-2007), the Government of Kenya began an ambitious economic reform program and resumed its cooperation with the World Bank and the IMF. The National Rainbow Coalition (NARC) government enacted the Anti-Corruption and Economic Crimes Act and Public Officers Ethics Act in May 2003 aimed at fighting graft in public offices. There was some movement to reduce corruption in 2003, but the government did not sustain that momentum. Other reforms, especially in the judiciary, public procurement, etc., led to the unlocking of donor aid and a renewed hope of economic revival.

In November 2003, following the signing into law of key anti-corruption legislation and other reforms by the Kibaki government, donors reengaged as the IMF approved a three-year $250 million Poverty Reduction and Growth Facility (PRGF) and donors committed $4.2 billion in support over 4 years. In December 2004, the IMF approved Kenya's Poverty Reduction and Growth Facility arrangement equivalent to U.S. $252.8 million to support the government's economic and governance reforms. However, the government's ability to stimulate economic demand through fiscal and monetary policy remains fairly limited, while the pace at which the government is pursuing reforms in other key areas remains slow. The Privatization Law was enacted in 2005, but only became operational as of January 1, 2008. Parastatals Kenya Electricity Generating Company (KenGen), Kenya Railways, Telkom Kenya, and Kenya Re-Insurance have been privatized, and the government sold 25% of Safaricom (10 billion shares) in 2008, reducing its share to 35%. Accelerating growth to achieve Kenya's potential and reduce the poverty that afflicts about 46% of its population will require continued de-regulation of business, improved delivery of government services, addressing structural reforms, massive investment in new infrastructure (especially roads), reduction of chronic insecurity caused by crime, and improved economic governance generally. The government's Vision 2030 plan calls for these reforms, but implementation will be delayed by the reconstruction effort, coalition politics, and line ministries' limited capacity. In June 2008, the government introduced a revised but still ambitious Vision 2030 plan that seeks to address the economic challenges stemming from the political crisis while still striving to meet growth benchmarks.

Economic expansion is fairly broad-based and is built on a stable macro-environment fostered by government, and the resilience, resourcefulness, and improved confidence of the private sector. Despite the post-election crisis, Nairobi continues to be the primary communication and financial hub of East Africa. It enjoys the region's best transportation linkages, communications infrastructure, and trained personnel, although these advantages are less prominent than in past years. On January 31, 2007, the government signed a $2.7 million contract with Tyco Telecommunications to perform an undersea survey for the construction of a fiber-optic cable to Fujairah in the United Arab Emirates (U.A.E.) called the East

African Marine Systems (TEAMS). Two other fiber-optic cables projects are being pursued to link Kenya to the rest of East Africa and India. Once TEAMS and the domestic fiber-optic cables planned by the government are completed, the economy is expected to benefit significantly from reduced internet access prices and improved capacity. A wide range of foreign firms maintain regional branches or representative offices in the city. In March 1996, the Presidents of Kenya, Tanzania, and Uganda re-established the East African Community (EAC). The EAC's objectives include harmonizing tariffs and customs regimes, free movement of people, and improving regional infrastructures.

In March 2004, the three East African countries signed a Customs Union Agreement paving the way for a common market. The Customs Union and a Common External Tariff were established on January 1, 2005, but the EAC countries are still working out exceptions to the tariff. Rwanda and Burundi joined the community in July 2007. In May 2007, during a Common Market for Eastern and Southern Africa (COMESA) Summit, 13 heads of state endorsed a move to adopt a COMESA customs union and set December 8, 2008 as the target date for its adoption.

In 2007, horticulture exports rose 65% to U.S. $1.12 billion, surpassing tourism as the largest foreign exchange earner. Tourism earned Kenya U.S. $972 million in 2007, up from U.S. $803 million in 2006, followed by tea exports of U.S. $638.9 million. Africa is Kenya's largest export market, followed by the European Union (EU). Kenya benefits significantly from the African Growth and Opportunity Act (AGOA), but the apparel industry is struggling to hold its ground against Asian competition. Ninety-eight percent of AGOA exports are garments, and Kenya's AGOA exports fell from U.S. $265 million in 2006 to U.S. $250 million in 2007.

Kenya faces profound environmental challenges brought on by high population growth, deforestation, shifting climate patterns, and the overgrazing of cattle in marginal areas in the north and west of the country. Significant portions of the population will continue to require emergency food assistance in the coming years.

Media

The key independent print media in Kenya are the Nation Media Group, the Standard Group, People Limited, and the Times Media Group. The Nation Media Group publications, which include the Daily Nation, the Sunday Nation, the Business Daily, the weekly East African, and the only Swahili publications, Taifa Leo and Taifa Jumapili, have the largest circulations. The Standard and the Sunday Standard, published by the Standard Group, are also popular newspapers, although with smaller circulations. Approximately 120 foreign correspondents representing 100 media organizations report from Nairobi. There is no government-owned or controlled newspaper.

Major independent radio and television media are the Kenya Television Network (KTN), the broadcast media arm of the Standard Group; Nation Radio/TV, owned by the Nation Media Group; and Citizen Radio/Television, owned by Royal Media Services. The government owns and controls the Kenya Broadcasting Corporation (KBC) and its subsidiaries. KBC is the only national radio and television network.

Kenya also has hundreds of FM radio stations, some broadcasting in Swahili or in local languages. Radio has a wide reach in Kenya, especially in rural areas. Some major international broadcasters, including British Broadcasting Corporation (BBC), Voice of America (VOA) and Radio France Internationale (RFI), rebroadcast their programming in Kenya.

FOREIGN RELATIONS

Despite internal tensions in Sudan and Ethiopia, Kenya has maintained good relations with its northern neighbors. Recent relations with Uganda and Tanzania have improved as the three countries work for mutual economic benefit.

Kenya has hosted and played an active role in the negotiations to resolve the civil war in Sudan and to reinstate a central government authority in Somalia. The Sudan peace negotiations have made major progress, resulting in the signing in Kenya of agreements between the Khartoum Government and the southern Sudan rebels to put an end to the two-decade-long war. On January 9, 2005 a Sudan North-South Comprehensive Peace Accord was signed in Nairobi. Negotiations in the Somali National Reconciliation Conference resulted at the end of 2004 in the establishing of Somali Transitional Federal Institutions (Assembly, President, Prime Minister, and Government). Until early 2005, Kenya served as a major host both for these institutions and for refugees from Somalia as well as Sudan. Between May and June 2005, members of the Somalia Transitional Federal Institutions relocated to Somalia. Kenya maintains a moderate profile in Third World politics. Kenya's relations with Western countries are generally friendly, although current political and economic instabilities are sometimes blamed on Western pressures.

U.S.-KENYAN RELATIONS

The United States and Kenya have enjoyed cordial relations since Kenya's independence. Relations became even closer after Kenya's democratic transition of 2002 and subsequent improvements in human rights.

More than 9,000 U.S. citizens are registered with the U.S. Embassy as residents of Kenya. In 2006 a record 86,528 Americans visited Kenya, up 17.6% from 2005. About two-thirds of resident Americans are missionaries and their families. U.S. business investment is estimated to be more than $285 million, primarily in com-

merce, light manufacturing, and the tourism industry. Al Qaeda terrorists bombed the U.S. Embassy in Nairobi on August 7, 1998, taking hundreds of lives and maiming thousands more. Since that event, the Kenyan and U.S. Governments have intensified cooperation to address all forms of insecurity in Kenya, including terrorism. The United States provides equipment and training to Kenyan security forces, both civilian and military. In its dialog with the Kenyan Government, the United States urges effective action against corruption and insecurity as the two greatest impediments to Kenya achieving sustained, rapid economic growth.

U.S. assistance to Kenya is substantial. It promotes broad-based economic development as the basis for continued progress in political, social, and related areas of national life. The U.S. assistance strategy is built around five broad objectives: Fighting disease and improving healthcare; fighting poverty and promoting private sector-led prosperity; advancing shared democratic values, human rights, and good governance; cooperating to fight insecurity and terrorism; and collaborating to foster peace and stability in East Africa. The Peace Corps, which usually has 150 volunteers in Kenya, is integral to the overall U.S. assistance strategy in Kenya. Peace Corps volunteers were withdrawn from Kenya due to instability and civil unrest in early 2008, but the program resumed Kenya operations within a few months.

TRAVEL

Consular Information Sheet

March 12, 2008

Country Description: Kenya is a developing East African country known for its wildlife and national parks. The capital city is Nairobi. The second largest city is Mombasa, located on the southeast coast. Tourist facilities are widely available in Nairobi, the game parks, the reserves, and on the coast.

Entry Requirements: A passport and visa are required. Visas should be obtained in advance, although airport visas are available. Travelers who opt to obtain an airport visa should expect delays upon arrival. There is a fee for the visa, whether obtained in advance or at the airport. Evidence of yellow fever immunization may be requested. Travelers to Kenya and neighboring African countries should ensure that the validity of their passports is at least six months, and that their passport contains sufficient blank pages for visas and immigration stamps.

Travelers may obtain the latest information on visas as well as any additional details regarding entry requirements from the Embassy of Kenya, 2249 R Street, N.W., Washington, DC 20008, telephone (202) 387-6101, or the Kenyan Consulates General in Los Angeles and New York City. Persons outside the United States should contact the nearest Kenyan embassy or consulate. Visit the Embassy of Kenya web site at http://www.kenyaembassy.com for the most current visa information.

Safety and Security: On August 7, 1998, al-Qaida bombed the U.S. Embassy in Nairobi, killing 225 people and injuring over 5,000 around the Embassy. The U.S. Embassy subsequently relocated outside of the city-center. On November 28, 2002, al- Qaida launched a bomb attack on a hotel in Kikambala, Kenya, (near Mombasa) in which 15 people were killed. A near simultaneous attempt to shoot down an Israeli charter plane departing Mombasa was unsuccessful. These incidents have highlighted the continuing threat posed by terrorism in East Africa and the capacity of terrorist groups to carry out attacks. U.S. citizens should be aware of the risk of indiscriminate attacks on civilian targets in public places, including tourist sites and other sites where Westerners are known to congregate.

Presidential and parliamentary elections were held on December 27, 2007. In the wake of the announcement by the Electoral Commission of Kenya on December 30 declaring the incumbent candidate Mwai Kibaki as the presidential winner, violence erupted in strongholds of the opposition party. The violence, which appeared to be ethnically and politically based, was concentrated in Nyanza, Rift Valley, and Western provinces, as well as Nairobi and

parts of Coast province. At least 1,000 people have died as a result of the post-electoral civil unrest and more than 300,000 have been internally displaced. Additionally, disruptions in public transportation services have occurred as a result of political violence, strikes, or work stoppages. There continues to be the potential for spontaneous violence due to simmering political grievances caused by the disputed election.

Political demonstrations can occur sporadically throughout Kenya. Travelers should maintain security awareness at all times and avoid public gatherings and street demonstrations. Violence, including gunfire exchange, has occurred at demonstrations in the past. Demonstrations tend to occur near government buildings, university campuses, or gathering places such as public parks. Police are generally unable to properly manage large demonstrations and they often resort to excessive force to break up large crowds. Most major tourist attractions, particularly outside Nairobi, are not generally affected by protests. However, tribal conflict in rural areas has been known to erupt into violence.

Cross-border violence occurs periodically. The area near Kenya's border with Somalia has been the site of a number of incidents of violent criminal activity, including kidnappings. In September 2007, the U.S. Embassy issued a warning that Islamic extremists in Southern Somalia may be planning kidnapping operations inside of Kenya, targeting Westerners, especially Americans, in the Kiwayu Island tourist area and other beach sites on the northeast coast near Somalia. U.S. citizens who decide to visit the area should be aware that they could encounter criminal activity.

Reports of violence continue in the North Eastern Province near the Somali border and the Northern Rift Valley over disputes involving land, cattle, and water. A number of deaths were reported in the violent clashes. Northern Kenya border areas continue to be plagued by cross-border inter-clan and intra-clan clashes. While foreigners are generally not targets of this type of violence, insecurity in these areas during such times usually increases, placing constraints on travel and threatening safety and security of travelers in the immediate area.

Some sparsely populated rural areas of Kenya, principally in the North, experience recurrent, localized incidents of violent cattle rustling, counter-raids, ethnic conflict, tribal or clan rivalry, and armed banditry. During the past several years, incidents have occurred in the Keiro Valley, Northern Rift Valley sections of Laikipia and Nakuru Districts, and other areas north of Mount Kenya. A number of incidents have also occurred near the game parks or lodges north of Mwingi, Meru, and Isiolo, which are frequented by tourists. The precise areas tend to shift over time. Recent cattle rustling incidents have involved firefights between hundreds of members of rival tribal groups and the theft of thousands of head of cattle at a time. For these reasons, U.S. citizens who plan to visit Kenya are urged to take basic security precautions to maximize their safety. Travel to northern Kenya should be undertaken with at least two vehicles to ensure a backup in the case of a breakdown or other emergency.

Villagers in rural areas are sometimes suspicious of strangers. There have been several incidents of violence against Kenyan and foreign adults in rural areas who are suspected of stealing children. U.S. visitors to rural areas should be aware that close contact with children, including taking their pictures or giving them candy, can be viewed with deep alarm and may provoke panic and violence. Adoptive parents traveling with their adopted child should exercise particular caution and are urged to carry complete copies of their adoption paperwork with them at all times.

Travelers should keep informed of local developments by following local press, radio, and television reports prior to their visits. Visitors should also consult their hosts, including U.S. and Kenyan business contacts, hotels, tour guides, and travel organizers.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: There is a high rate of crime in all regions of Kenya, particularly Nairobi, Mombasa, Kisumu, and at coastal beach resorts. There are regular reports of attacks against tourists by groups of armed assailants. Pickpockets and thieves carry out "snatch and run" crimes on city streets and near crowds. Visitors have found it safer not to carry valuables, but rather to store them in hotel safety deposit boxes or safe rooms. However, there have been reports of safes being stolen from hotel rooms and hotel desk staff being forced to open safes. Walking alone or at night, especially in downtown areas, public parks, along footpaths, on beaches, and in poorly lit areas, is dangerous and discouraged.

Violent criminal attacks, including armed carjacking and home invasions/burglary, can occur at any time and in any location, and are becoming increasingly frequent, brazen, vicious, and often fatal. In early 2007, two American citizens were killed and one critically injured in two separate carjacking incidents. Nairobi averages about ten vehicle hijackings per day and Kenyan authorities have limited capacity to deter and investigate such acts. Matatus (public transportation) tend to be targeted since they carry up to 14 passengers. Although these attacks are often violent, victims are generally not injured if they do not resist. There is also a high incidence of residential breakins and occupants should take additional security measures to protect their property. Thieves and con art-

ists have been known to impersonate police officers, thus Americans are strongly encouraged to ask for identification if approached by individuals identifying themselves as police officials, uniformed or not.

Thieves routinely snatch jewelry and other objects from open vehicle windows while motorists are either stopped at traffic lights or in heavy traffic. Vehicle windows should be up and doors locked regardless of the time of day or weather. Thieves on matatus, buses and trains may steal valuables from inattentive passengers. Americans should guard their backpacks or hand luggage and ensure these items are not left unattended. Purchasing items from street vendors is strongly discouraged—visitors should only use reputable stores or businesses. Many scams, perpetrated against unsuspecting tourists, are prevalent in and around the city of Nairobi. Many of these involve people impersonating police officers and using fake police ID badges and other credentials. Nevertheless, police checkpoints are common in Kenya and all vehicles are required to stop if directed to do so.

Highway banditry is common in much of North Eastern Province, Eastern Province, the northern part of Coast Province, and the northern part of the Rift Valley Province. These areas are remote and sparsely populated. Incidents also occur occasionally on Kenya's main highways, particularly after dark. Due to increased bandit activity, air travel is the recommended means of transportation when visiting any of the coastal resorts north of Malindi. Travelers to North Eastern Kenya and the North Rift Valley Region should travel with the police escorts or convoys organized by the government of Kenya.

There has been an increase in armed banditry in or near many of Kenya's national parks and game reserves, particularly the Samburu, Leshaba, and Masai Mara game reserves. In response, the Kenya Wildlife Service and police have taken some steps to strengthen security in the affected areas, but the problem has not been eliminated. Travelers who do not use the services of reputable travel firms or knowledgeable guides or drivers are especially at risk. Safaris are best undertaken with a minimum of two vehicles so that there is a backup in case of mechanical failure or other emergency. Solo camping is always risky.

The Kenyan mail system can be unreliable and monetary instruments (credit cards, checks, etc.) are frequently stolen. International couriers provide the safest means of shipping envelopes and packages, although anything of value should be insured

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Adequate medical services are available in Nairobi. Frequent outbreaks of cholera and malaria are endemic in Kenya outside Nairobi. In addition, diseases such as Ebola, Rift Valley Fever, and anthrax from handling sheep skins are concerns, have potential and do occur periodically. Travelers who become ill with a fever or flu-like illness while traveling in a malaria-risk area and up to one year after returning home should seek prompt medical attention and tell the physician their travel history and what antimalarials they have been taking. For additional information on malaria, protection from insect bites, and antimalarial drugs, please visit the CDC Travelers' Health web site at http://www.cdc.gov/malaria.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel/default.aspx. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. One of the greatest threats to travelers in Kenya is road safety. The information below concerning Kenya is provided for general reference only and may not be totally accurate in a particular location or circumstance.

In Kenya, one drives on the left side of the road, which can be very disorienting to those not accustomed to it. Excessive speed, unpredictable local driving habits and manners, poor vehicle maintenance, bumpy, potholed and unpaved roads, and the lack of basic safety equipment on many vehicles are daily hazards on Kenyan roads. When there is a heavy traffic jam either due to rush hour or because of an accident, drivers will drive across the median strip and drive directly toward oncoming traffic. There are often fatal accidents involving long-distance, inter-city buses, or local buses called "matatus." Matatus are known to be the greatest danger to other vehicles or pedestrians on the road. They are typically driven too fast and erratically. Since early 2003, several American citizens

have been killed or seriously injured in motor vehicle-related accidents. Also, vehicle travel outside major cities at night should be avoided due to the poor road and street light conditions, and the threat of banditry.

During the rainy season, many unpaved roads are impassable even with four-wheel drive vehicles with high clearance. Severe storms and heavy rains in late 1997 and early 1998 led to extensive flooding and critical damage to roads and bridges, making travel and communications difficult in many parts of the country. Kenya appears to be experiencing similar weather patterns in 2006, which have resulted in large scale flooding and infrastructure damage. Although the government repairs many of the damaged roads and bridges, some remain impassable. Travelers are urged to consult with the U.S. Embassy in Nairobi and local officials regarding road conditions.

For specific information concerning Kenyan driving permits, vehicle inspection, road tax and mandatory insurance, contact the commercial attaché at the Kenyan Embassy in Washington, D.C. via telephone at (202) 387-6101 or via email at info@kenyaembassy.com. Visitors contemplating adventure tours should contact the Kenya Tourist Board Offices in Minneapolis, Minnesota via the internet at http://www.magicalkenya.com, via telephone at 1-866-44-KENYA, or via email at infousa@magicalkenya.com.

For specific information concerning Kenyan driving permits, vehicle inspection, road tax and mandatory insurance, contact the Kenyan National Tourist Organization offices in New York at telephone 212-486-1300 or in California at telephone 310-274-6635.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Kenya, the U.S. Federal Aviation Administration (FAA) has not assessed Kenya's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's internet website at http://www.faa.gov.

Special Circumstances: Kenya customs authorities may enforce strict regulations concerning temporary importation into or export from Kenya of items such as firearms, religious materials, antiquities, medications, business equipment, currency restrictions, ivory, etc. It is advisable to contact the Embassy of Kenya in Washington, D.C. or one of Kenya's consulates in the United States for specific information regarding customs requirements. In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products are illegal and bringing them back to the United States may result in forfeitures and/or fines. A current list of those countries with serious problems in this regard can be found at the United States Trade Representative's web site.

U.S. citizens are encouraged to carry a copy of their U.S. passport with them at all times, so that proof of identity and U.S. citizenship is readily available if questioned by local officials.

Kenya is a signatory to the Vienna Convention on Consular Relations (VCCR), and is required by the VCCR to ask any detained American citizen if he/she would like the U.S. Embassy to be notified and to notify the U.S. Embassy if the detained American citizen requests it. Kenya is making strides towards compliance with its VCCR obligation. Any American citizen who is detained should request U.S. Embassy notification if he/she would like consular assistance.

Up to 100,000 Kenyan shillings may be taken out of the country. Destruction of Kenyan currency, even in small amounts, is illegal, and almost always results in arrest and a fine. Visitors to Kenya carrying U.S. Dollars should ensure that the bills are relatively new, as banks in Kenya have been known not to accept older U.S. currency.

Use of firearms is strictly forbidden in wildlife reserves and national parks. Permission to carry firearms must be obtained from local authorities prior to entry.

Local tap water is not potable. Sealed bottled water is safe to drink and can be purchased in hotels, restaurants, and grocery stores. Kenya Telephone and Telegraph has discontinued its "collect call" facility. 1-800 numbers cannot be accessed from Kenya. Use of international long-distance calling cards is very limited in Kenya. International long-distance costs from Kenya are significantly higher than corresponding long-distance rates in the United States. Several local companies offer computer Internet access, including on an hourly rate basis. Many hotels have fax machines but often limit access to guests; some fax services are also available at office supply shops. Travelers are urged to consider their method of maintaining contact with family and friends when making their travel preparations. Kenya does not officially recognize dual nationality. In addition to being subject to all Kenyan laws affecting U.S. citizens, dual nationals may also be subject to other laws that impose special obligations on Kenyan citizens.

Travel via passenger train in Kenya is considered unsafe, particularly during rainy seasons, because of the lack of routine maintenance and safety checks. Over the past several years there have been accidents, including a passenger train derailment between Nairobi and Mombasa, which resulted in the deaths of 32 people, including one foreign tourist. Several trains derailed in 2000. The Kenya Railway service has been reduced from seven days to three days per week. The service from Nairobi to Malaba is now only a cargo service and is no longer a passenger service.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual

under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Kenyan laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Kenya are severe, and convicted offenders can expect long jail sentences and heavy fines. There are frequent cases of "mob justice" in Kenya in which suspected criminals are lynched by private citizens before the police arrive to intervene. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Kenya are encouraged to register with the U.S. Embassy through the State Department's travel registration website and to obtain updated information on travel and security within Kenya. Americans without Internet access may register directly with the U.S. Embassy. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. The U.S Embassy is located on United Nations Avenue, Gigiri, Nairobi, Kenya; telephone (254) (20) 363-6000; fax (254)(20) 363-6410. In the event of an after-hours emergency, the Embassy duty officer may be contacted at (254) (20) 363-6170. The Embassy's international mailing address is P.O. Box 606, Village Market 00621, Nairobi, Kenya. Mail using U.S. domestic postage may be addressed to Unit 64100, APO AE 09831. The Embassy home page is http://kenya.usembassy.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Kenya is not party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention).

Who Can Adopt? Kenyan courts are not institutionally biased against foreigners seeking to adopt children in Kenya, although race still remains an issue. The courts are beginning to take a more liberal view of racial differences between prospective adoptive parents and the adoptive child. Kenyan courts view the welfare of the child as paramount in reviewing an adoption case.

To bring an adopted child to United States from Kenya, you must be found eligible to adopt by the United States Government. In addition to the United States requirements for prospective adoptive parents, Kenya also has the following eligibility requirements for prospective adoptive parents.

Residency Requirements: Prospective adoptive parents must reside with the child in Kenya for at least three months before legal procedures begin. Although some legal adoption steps can be initiated before the three months period has been completed, most of the legal work will only begin after the three month "home stay" with the child is finished.

Age Requirements: At least one of the prospective adoptive parents must be over 25 years of age but less than 65 years of age. Additionally, they must be more than 21 years older than the child.

Marriage Requirements: Prospective adoptive parents must be married.

Income Requirements: Prospective adoptive parents must be financially stable and capable.

Other Requirements: The following are not permitted to adopt in Kenya:

- Gay and lesbian individuals or couples;
- individuals (one or both) not of sound mind (as defined by the Kenyan Mental Health Act);
- Joint applicants not married to each other; and
- Applicants charged and convicted by a court of competent jurisdiction for any offense against children under Kenyan law.

Who Can Be Adopted? Kenya has specific requirements that a child must meet in order to be eligible for adoption. In addition to these requirements, a child must meet the definition of an orphan under United States law for you to bring him or her home back to the United States.

Relinquishment Requirements: Consent to the adoption must be received from the following:

- Parents or guardian(s) of the mother of the child in a case where the mother is a minor;
- Existing parents, guardians, or anyone else contributing to the maintenance of the child under any agreement or order; and
- Step-father who has acquired parental responsibility

Age Requirements: The child must be at least 6 weeks old and declared free for adoption by a registered adoption society. Children over the age of 14 years must consent to adoption.

Kenya's Adoption Authority: High Courts and the Department of Children's Services

The Process: The first step in adopting a child from Kenya is usually to select a licensed agency in the United States that can help with your adoption. Adoption service providers must be licensed by the United States state

in which they operate. Foreigners interested in adopting a child in Kenya may wish to employ legal representation that is familiar with Kenya's legal system, as the Kenyan Department of Children's Services and the Kenyan Regional High Court's interpretation of adoption laws can vary widely, depending on the case. Families can contact Kenyan Department of Children's Services at Tel: (254) (20) 228-411 for a list of registered Kenyan adoption agencies.

It is illegal to publish an advertisement indicating that a parent or guardian desires to place a child for adoption, that a person wishes to adopt a child, or that a person (who is not an adoption society) is willing to facilitate the adoption of a child.

To bring an adopted child from Kenya to the United States, you must apply to be found eligible to adopt (Form I-600A) by the USCIS. If you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority in Kenya will provide you with a referral to a child.

Role of the Adoption Authority: The Department of Children's Services will provide a list of currently registered adoption societies. It also publishes the official adoption regulations. The Department of Children's Services is the initial point of contact for prospective adoptive parents. It reviews the adoption application.

Role of the Court: The court will appoint a guardian ad litem for the child pending the hearing and determination of the adoption application. The guardian ad litem will:

- Safeguard the interests of the child pending the determination of the adoption proceedings;
- Investigate and appraise the court about circumstances pertinent to the adoption of the child in the prescribed manner;
- Make recommendations as to the priority of making any interim orders or an adoption order in respect of the child;
- Intervene on behalf of the child and arrange for the care of the child in the event of the withdrawal of any consent; and
- Undertake such duties as the court may direct.

Role of the Adoption Agencies: Kenyan adoption agencies will assist with identifying a suitable child for adoption and can sometimes assist in some of the legal proceedings.

Adoption Application: The adoption application is submitted to the Kenyan Department of Children's Services.

Time Frame: The average length of time for completing an adoption is six months. This includes the three month residency requirement.

Adoption Fees: Kenyan law prohibits financial transactions between individuals involved in an adoption proceeding.

Some payments are permitted, for example, to an adoption society for maintenance of the child, or to an attorney who acts for any of the parties or in connection with an application for an adoption order.

Any payment or reward made by a prospective adoptive parent or guardian of a child or a third party facilitating the adoption for the purpose of making an adoption order is considered illegal.

Documents Required:

The following documents must be included in the Home Study:

- Social status and family background;
- Description of home including the number of bedrooms and whether it can comfortably accommodate the child;
- Standard of living as it appears in the home;
- Current relationship between husband and wife;
- Current relationship between the parents and children (if any children);
- Development of previously adopted children (if any);
- Current relationship between the couple and the members of each other's family;
- Employment status of the couple;
- Health details such as clinical tests, past illnesses etc., (medical certificates);
- Economic status of the couple;
- Accommodation for the child;
- Schooling facilities;
- Amenities in the home;
- Reasons for wanting to adopt a Kenyan child;
- Attitudes of relatives towards adoption;
- Anticipated plans for the adoptive child; and
- Legal status of the prospective adoptive parents.

The following is a list of documents required for adoption in Kenya:

- Recent photographs of the adoptive family;
- Marriage certificate of adoptive parent;
- Declaration concerning health of adoptive parents;
- Certificate of medical fitness of adoptive parents duly certified by a medical doctor (The approved I-600A or I-600 has been accepted as proof of medical fitness in the past.);
- Declaration regarding financial status of foreign adoptive parents along with supporting documents including employers' certificate, where applicable;

- Employment certificate of adoptive parents, where applicable;
- Income tax records of adoptive parents;
- Bank references;
- Particulars of property owned by the adoptive parents;
- Declaration from adoptive parents stating willingness to adopt the child;
- Undertaking from the social or child welfare enlisted agency sponsoring the foreigner to the effect that the child would be legally recognized as a citizen of the adoptive parent's country without any form of discrimination and that the child would be entitled to the same rights as citizens of that country;
- Undertaking from the adoptive parents that the adopted child would be provided necessary education and upbringing according to the status of the adoptive parents;
- Undertaking from the social and child welfare enlisted agency that a report relating to progress of the child, along with his/her recent photograph, will be sent to Child Welfare Society of Kenya every three months during first two years, and every six months for the next three years, for a total of five years;
- Power of Attorney from the adoptive parents in favor of Child Welfare Society of Kenya which will be required to process the case and such Power of Attorney should authorize the Attorney to handle the cases on behalf of the foreigner in case the foreigner is not in a position to come to Kenya during the initial stages of the adoption; and
- Certificate from the enlisted social or child welfare agency sponsoring the application of the foreigner to the effect that the prospective adoptive parents are permitted to adopt a child according to the laws of their country.

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa.

For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: Kenya's post-adoption regulations require adoptive parents to submit post adoption reports on the child's welfare (with pictures) for five years, every three months for the first two years immediately following the adoption and then every six months for the last three years.

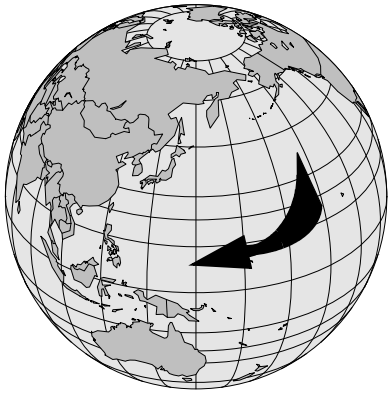
Travel Warning

November 14, 2008

The U.S. Department of State warns U.S. citizens of the risks of travel to Kenya. American citizens in Kenya and those considering travel to Kenya should evaluate their personal security situation in light of continuing threats from terrorism and the high rate of violent crime. This replaces the Travel Warning of August 22, 2008, to note increased security concerns in northeast Kenya near the Somali border.

The U.S. Government continues to receive indications of potential terrorist threats aimed at American,



Western, and Kenyan interests in Kenya. Terrorist acts could include suicide operations, bombings, kidnappings, attacks on civil aviation, and attacks on maritime vessels in or near Kenyan ports. Many of those responsible for the attacks on the U.S. Embassy in 1998 and on a hotel in Mombasa in 2002 remain at large and continue to operate in the region. In November 2008, armed groups based in Somalia crossed into Kenya near the town of El Wak and kidnapped two Westerners. Travel by U.S. Embassy personnel to border areas of Kenya northeast of the town of Wajir has been restricted until further notice.

Violent and sometimes fatal criminal attacks, including armed carjackings and home invasions/burglaries, can occur at any time and in any location, particularly in Nairobi. As recently as June 2008, U.S. Embassy personnel were victims of carjackings. In the short-term, the continued displacement of thousands of people by the recent civil unrest combined with endemic poverty and the availability of weapons could result in an increase in crime, both petty and violent. Kenyan authorities have limited capacity to deter or investigate such acts or prosecute perpetrators.

American citizens in Kenya should be extremely vigilant, particularly in public places frequented by foreigners such as clubs, hotels, resorts, upscale shopping centers, restaurants, and places of worship. Americans should also remain alert in residential areas, schools, and at outdoor recreational events, and should avoid demonstrations and large crowds.

Americans who travel to or reside in Kenya are encouraged to register through the State Department's travel registration website, https://travelregistration.state.gov. By registering, American citizens make it easier for the Embassy to contact them in case of emergency. Americans without Internet access may register directly with the U.S. Embassy in Nairobi. The U.S. Embassy is located on United Nations Avenue, Gigiri, Nairobi, Kenya; telephone (254) (20) 363-6000; fax (254) (20) 363-6410. In the event of an after-hours emergency, the Embassy duty officer may be contacted at (254) (20) 363-6170. The Embassy home page is http://kenya.usembassy.gov.

Updated information on travel and security in Kenya may be obtained from the Department of State by calling 1-888-407-4747 toll free in the United States and Canada, or for callers outside the United States and Canada, a regular toll line at 1-202-501-4444. For further information, please consult the Country Specific Information for Kenya and the Worldwide Caution, which are available on the Bureau of Consular Affairs Internet website at http://travel.state.gov.

KIRIBATI

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Kiribati

PROFILE

Geography

Area: 719 sq. km (266 sq. mi.) on 32 atolls and one island.
Cities: Capital—Tarawa (pop. 30,000).
Terrain: Archipelagos of low-lying coral atolls surrounded by extensive reefs.
Climate: Maritime equatorial or tropical.

People

Nationality: Noun and adjective—I-Kiribati (for both singular and plural, pronounced "ee-keer-ah-bhass").
Population: (2006) 93,706. Age structure (2006 est.)—36.5% under 15; 3.48% over 65.
Population growth rate: (2006-2010 est.) 1.9%
Ethnic groups: Micronesian 99%.
Religions: Roman Catholic 55%, Kiribati Protestant 36%, other 9%.
Languages: English (official), Gilbertese/I-Kiribati (de facto).
Education (2000): Literacy—95%
Health: (2005) Life expectancy—62.82. Infant mortality rate (2005)—48/1,000.
Work force: (2000) Majority engaged in subsistence activities; subsistence workers 30,712, cash workers 9,197.

Government

Type: Republic.
Independence (from United Kingdom) July 12, 1979.
Constitution: July 12, 1979.
Government branches: Executive—president (head of state and government), vice president, cabinet. Legislative—unicameral House of Assembly. Judicial—High Court, Court of Appeal, magistrates' courts.
Political parties: Parties are only very loosely organized—Boutokanto Koaava (Pillars of Truth), Maneaban Te Mauri (Protect the Maneaba), Maurin Kiribati Pati.

Economy (all figures in U.S. $)

GDP: (2006, estimate) $61.68 million.
GDP per capita: (2006) $655.12.
GDP composition by sector: (2006) Services 73.8%, agriculture 6.0%, industry 5.5%.
Industry: Types—tourism, copra, fish.
Trade: (2006) Exports—$6.306 million: fish, seaweed, shark fins. Export markets—Japan, Malaysia, Taiwan, United States, Australia, Belgium, Denmark. Imports—$63.42 million: food, manufactured goods, machinery and transport equipment. Import sources—Australia, Fiji, Japan, France, New Zealand, United States, Korea, China, Thailand.
Currency: Australian dollar (A$).

GEOGRAPHY AND PEOPLE

Kiribati (pronounced "keer-ah-bhass") consists of 32 low-lying atolls and one raised island scattered over an expanse of ocean equivalent in size to the continental United States. The islands straddle the Equator and lie roughly halfway between Hawaii and Australia. The three main groupings are the Gilbert Islands, Phoenix Islands, and Line Islands. In 1995 Kiribati unilaterally moved the International Date Line to include its easternmost islands, making it the same day throughout the country.

Kiribati includes Kiritimati (Christmas Island), the largest coral atoll in the world, and Banaba (Ocean Island), one of the three great phosphate islands in the Pacific. Except on Banaba, very little land is more than three meters above sea level.

The original inhabitants of Kiribati are Gilbertese, a Micronesian people. Approximately 90% of the population of Kiribati lives on the atolls of the Gilbert Islands. Although the Line

Islands are about 2,000 miles east of the Gilbert Islands, most inhabitants of the Line Islands are also Gilbertese. Owing to severe overcrowding in the capital on South Tarawa, in the 1990s a program of directed migration moved nearly 5,000 inhabitants to outlying atolls, mainly in the Line Islands. The Phoenix Islands have never had any significant permanent population. A British effort to settle Gilbertese there in the 1930s lasted until the 1960s when it was determined the inhabitants could not be self-sustaining.

HISTORY

The I-Kiribati people settled what would become known as the Gilbert Islands between 1000 and 1300 AD. Subsequent invasions by Fijians and Tongans introduced Melanesian and Polynesian elements to the Micronesian culture, but extensive intermarriage has produced a population reasonably homogeneous in appearance and traditions.

European contact began in the 16th century. Whalers, slave traders, and merchant vessels arrived in great numbers in the 1800s, fomenting local tribal conflicts and introducing often-fatal European diseases. In an effort to restore a measure of order, the Gilbert and Ellice Islands (the Ellice Islands are now the independent country of Tuvalu) consented to becoming British protectorates in 1892. Banaba (Ocean Island) was annexed in 1900 after the discovery of phosphate-rich guano deposits, and the entire group was made a British colony in 1916. The Line and Phoenix Islands were incorporated piecemeal over the next 20 years.

Japan seized some of the islands during World War II. In November 1943, U.S. forces assaulted heavily fortified Japanese positions on Tarawa Atoll in the Gilberts, resulting in some of the bloodiest fighting of the Pacific campaign. The battle was a turning point for the war in the Central Pacific.

Britain began expanding self-government in the islands during the 1960s. In 1975 the Ellice Islands separated from the colony and in 1978 declared their independence. The Gilberts obtained internal self-government in 1977, and became an independent nation on July 12, 1979, under the name of Kiribati.

Post-independence politics were initially dominated by Ieremia Tabai, Kiribati's first President, who served from 1979 to 1991, stepping down due to Kiribati's three-term limit for presidents. The tenure of Teburoro Tito, Kiribati's second-longest serving President, was from 1994 to 2003. His third term lasted only a matter of months before he lost a no confidence motion in Parliament. (See the next section for an explanation of Kiribati's unique presidential system.) In July 2003, Anote Tong defeated his elder brother, Harry Tong, who was backed by former President Tito and his allies. Tong was re-elected for a second term as president in October 2007.

GOVERNMENT

The constitution promulgated at independence establishes Kiribati as a sovereign democratic republic and guarantees the fundamental rights of its citizens.

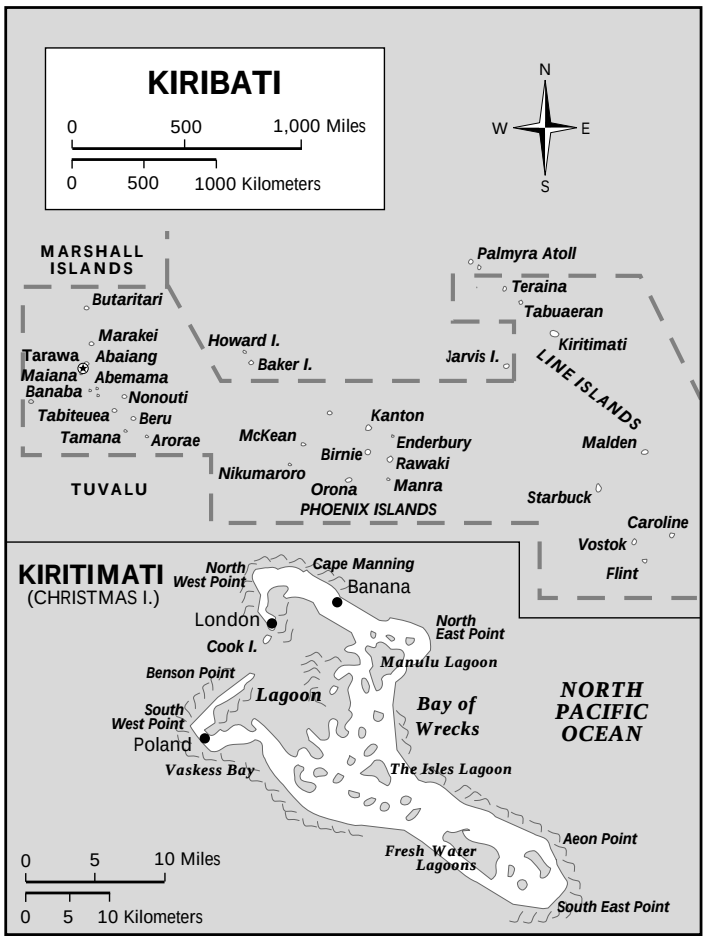
The unicameral House of Assembly (Maneaba) has 45 members: 43 elected representatives, one appointed member by the Banaban community on Rabi Island in Fiji, and the Attorney General on an ex officio basis. All of the members of the Maneaba serve 4-year terms. The speaker for the legislature is elected by the Maneaba from outside of its membership and is not a voting member of Parliament.

After each general election, the new Maneaba nominates at least three but not more than four of its members to stand as candidates for president. The voting public then elects the president from among these candidates. The president appoints a cabinet of up to 10 members from among the members of the Maneaba. Although popularly elected, the president can be deposed by a majority vote in Parliament. If a no confidence motion passes, a new election for President must be held. An individual can serve as president for only three terms, no matter how short each term is. As a result of this provision, former Presidents Tabai and Tito are constitutionally forbidden from serving as president again.

The judicial system consists of the High Court, a court of appeal, and magistrates' courts. The president makes all judicial appointments.

Principal Government Officials

Last Updated: 11/12/08



Pres.: **Anote TONG**
Vice Pres.: **Teima ONORIO**
Min. for Commerce, Industry, & Cooperatives: **Ioteba REDFERN**
Min. for Communications, Transport, & Tourism Development: **Naatan TEEWE**
Min. for Education, Youth, & Sport Development: **Teima ONORIO**
Min. for Environment, Lands, & Agricultural Development: **Martin TOFINGA**
Min. for Finance & Economic Development: **Nabuti MWEMWENIKARAWA**
Min. for Foreign Affairs & Immigration: **Anote TONG**
Min. for Health & Medical Services: **Natanera KIRATA**
Min. for Human Resources Development: **Bauro TONGAAI**
Min. for Internal Affairs & Social Development: **Amberoti NIKORA**
Min. for the Line and Phoenix Islands: **Tawita TEMOKU**
Min. for Natural Resources Development: **Tetabo NAKARA**
Min. for Public Works & Utilities: **James TAOM**

POLITICAL CONDITIONS

Political parties exist but are more similar to informal coalitions in behavior. Parties do not have official platforms or party structures. Most candidates formally present them-

selves as independents. Campaigning is by word of mouth and informal gatherings in traditional meeting-houses.

President Anote Tong won re-election by a comfortable margin in late 2007 and enjoys a comfortable majority in Parliament. The biggest political issue today is employment opportunities for a crowded and growing population.

ECONOMY

Kiribati's per capita GDP of less than U.S. $700 is one of the lowest in the world. Only 20% of the workforce participates in the formal wage economy and over 60% of all formal jobs are in South Tarawa. The monetary economy of Kiribati is dominated by the services sector, representing a GDP share of over 80%, and the public sector which provides 80% of monetary remuneration.

The end of phosphate revenue from Banaba in 1979 had a devastating impact on the economy. Receipts from phosphates had accounted for roughly 80% of export earnings and 50% of government revenue. Per capita GDP was more than cut in half between 1979 and 1981. The Revenue Equalization Reserve Fund, a trust fund financed by phosphate earnings over the years, is still an important part of the government's assets and contained more than U.S. $554 million in 2006. Kiribati has prudently managed the reserve fund, which is vital for the long-term welfare of the country.

In one form or another, Kiribati gets a large portion of its income from abroad. Examples include fishing licenses, development assistance, tourism, and worker remittances. External sources of financing are crucial to Kiribati, given the limited domestic production ability and the need to import nearly all essential foodstuffs and manufactured items. Historically, the I-Kiribati were notable seafarers, and today about 1,400 I-Kiribati are trained, certified, and active as seafarers. Remittances from seafarers are a major source of income for families in the country, and there is a steady annual uptake of young I-Kiribati men to the Kiribati Maritime Training Institute.

Fishing fleets from South Korea, Japan, China, Taiwan, and the United States pay licensing fees to operate in Kiribati's territorial waters. These licenses produce revenue worth U.S. $20 million to $35 million annually. Kiribati's exclusive economic zone comprises more than 3.55 million square kilometers (1.37 million square miles) and is very difficult to police given Kiribati's small land mass and limited means. Kiribati probably loses millions of dollars per year from illegal, unlicensed, and unreported fishing in its exclusive economic zone.

Official development assistance amounts to between U.S. $30 million and $40 million per year. The largest donors are Japan, the EC, Australia, New Zealand, and Taiwan. U.S. assistance is provided through multilateral institutions. Remittances from Kiribati workers living abroad provide more than $11 million annually.

Tourism is a relatively small, but important domestic sector. Attractions include World War II battle sites, game fishing, ecotourism, and the Millennium Islands, situated just inside the International Date Line and the first place on earth to celebrate New Year. The vast majority of American tourists only visit Christmas Island in the Line Islands on fishing and diving vacations.

Most islanders engage in subsistence activities such as fishing and growing of food crops like bananas, breadfruit, and papaya. The leading export is the coconut product, copra, which accounts for about two-thirds of export revenue. Currently, copra is exported to Bangladesh for processing. Other exports include pet fish,

shark fins, and seaweed. Kiribati's principal trading partners are Australia and Japan.

Transportation and communications are a challenge for Kiribati. Air Pacific and Air Marshall Islands provide international air links to the capital of Tarawa. Air Kiribati provides service to most of the populated atolls in the Gilberts using small planes flying from Tarawa. Small ships serve outlying islands, including in the Line Islands, with irregular schedules. A joint venture between Air Pacific and the government of Kiribati operates a flight linking Christmas Island to Fiji and Honolulu. However, Air Pacific suspended this service in September 2008.

Telecommunications are expensive, and service is mediocre.

FOREIGN RELATIONS

Kiribati maintains friendly relations with most countries and has particularly close ties to its Pacific neighbors—Japan, Australia, New Zealand, and Fiji. Australia, Taiwan, New Zealand, and Cuba maintain resident diplomatic missions in Kiribati.

U.S.-KIRIBATI RELATIONS

Relations between Kiribati and the United States are excellent. Kiribati signed a treaty of friendship with the United States after independence in 1979. The United States has no consular or diplomatic facilities in the country. Officers of the American Embassy in Suva, Fiji, are concurrently accredited to Kiribati and make periodic visits. The U.S. Peace Corps maintained a program in Kiribati from 1967 until mid-2008.

Kiribati became a member of the United Nations in 1999, and in September 2003, President Tong requested authority from Parliament to establish a UN mission. Currently, however, Kiribati does not maintain a resident ambassador in New York, and its vote is typically cast by New Zealand in a proxy arrangement. Kiribati also is a member of the Pacific Islands Forum, Asian Development Bank, the Commonwealth, International Monetary Fund, the Pacific Community, and the World Bank. Kiribati is particularly active in the Pacific Islands Forum. The only Kiribati diplomatic missions overseas are a high commission in Fiji and an honorary consulate in Honolulu.

TRAVEL

Consular Information Sheet

July 9, 2008

Country Description: The Republic of Kiribati (pronounced kir-ree-bas) is an island group in the Western Pacific Ocean. It consists of an archipelago of some 33 low-lying coral atolls surrounded by extensive reefs, with a total land area of 800 square kilometers. Kiribati gained independence from the United Kingdom in 1979. Kiribati has an elected President and a legislative assembly. The capital city of Kiribati is Tarawa. Kiribati has few natural resources, and its economy is very small. Tourist facilities are not widely available.

Entry Requirements: A valid passport with a minimum of six months validity until expiration date and a visa are required. Kiribati strictly enforces its immigration/visa requirements. Westerners, including American citizens, have been detained for visa violations. For information on entry requirements, please contact the Consulate of the Republic of Kiribati, 95 Nakolo Place, Rm. 265, Honolulu, Hawaii 96819, tel. (808) 834-6775, fax (808) 834-7604, or via e-mail kiribaticonsul@aol.com.

Safety and Security: For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Worldwide Caution Travel Alert, Travel Warnings and Travel Alerts can be found. Up-to-date information on security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or, for callers outside the U.S. and Canada, a regular toll line at 1-202-501-4444.

Crime: Although the crime rate in Kiribati is low, visitors should not be complacent regarding personal safety or the protection of valuables.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, to contact family members or friends and explain how funds could be transferred.

Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to

understand the local criminal justice process and to find an attorney, if needed.

Medical Facilities And Health Information: Health care facilities in Kiribati are adequate for routine medical care, but extremely limited in availability and quality. Serious medical conditions requiring hospitalization or evacuation to the United States or elsewhere may cost thousands of dollars. All water should be regarded as a potential health risk. Visitors should therefore refrain from drinking any water that is not bottled, boiled or otherwise sterilized. Vegetables should be cooked and fruit should be peeled before it is eaten.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747); or via the CDC's Internet site at http://www.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and if it will cover emergency expenses such as a medical evacuation.

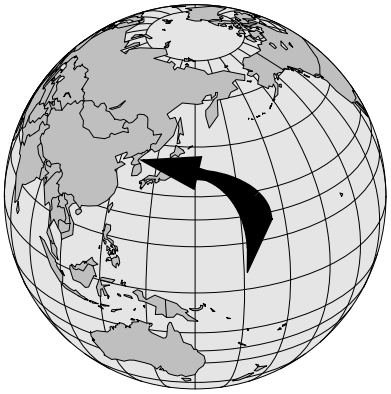
Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Kiribati is provided for general reference only, and it may not be totally accurate in a particular location or circumstance.

Traffic moves on the left side of the road in Kiribati. Roads in urban Tarawa and Christmas Island, while satisfactory in some areas, are generally in need of repair. After heavy rains, some road sections experience temporary flooding. Vehicle traffic proceeds at a relatively slow rate. Drinking and driving is a common practice, especially on the weekends. Since visibility is poor with no streetlights, drivers should be careful when driving at night. For specific information concerning Kiribati drivers' permits, vehicle inspection, road tax and mandatory insurance, please contact the Consulate of the Republic of Kiribati in Honolulu, HI.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed Kiribati's Civil Aviation Authority as not being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of Kiribati's air carrier operations. For further information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Kiribati's customs authorities strictly prohibit the importation of firearms, ammunition, explosives and indecent publications. Strict quarantine laws govern the import of any part of plants, fruits or vegetables, as well as soil, animals and animal products. Visitors are not allowed to export human remains, artifacts that are 30 or more years old, traditional fighting swords, traditional tools, dancing ornaments or suits of armor. For more information, please contact the Consulate of the Republic of Kiribati in Honolulu, HI.

The Australian dollar is the legal currency in Kiribati. Traveler's checks and all major currencies are accepted by banks and may also be exchanged for local currency at some local hotels. Visa and MasterCard are accepted at most hotels.



Kiribati is located in an area of high seismic and tropical cyclone activity. Strong winds are common, especially during the rainy season from November to April. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under the U.S. law. Penalties for breaking the law can be more severe than those in the United States for similar offenses. Persons violating Kiribati's laws, even unknowingly, may be expelled, arrested, or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Kiribati are strict, and convicted offenders can expect jail sentences and heavy fines.

Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: There is no U.S. Embassy in Kiribati. Americans living or traveling to Kiribati are encouraged to register with the U.S. Embassy in Suva, Fiji, or through the State Department's travel registration website, and to obtain up-to-date information on travel and security within Kiribati. Americans without Internet access may register directly with the nearest Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy in Fiji is located at 31 Loftus Street in the capital city of Suva; telephone (679) 331-4-466; fax (679) 330-2?267. Information may also be obtained by visiting the Embassy's home page at http://www.amembassy-fiji.gov.

KOREA (NORTH)

Compiled from the August 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Democratic People's Republic of Korea

PROFILE

Geography

Area: 1122,762 sq. km. (47,918 sq. mi.), about the size of Mississippi.

Cities: Capital—Pyongyang. Other cities—Hamhung, Chongjin, Wonsan, Nampo, and Kaesong.

Terrain: About 80% of land area is moderately high mountains separated by deep, narrow valleys and small, cultivated plains. The remainder is lowland plains covering small, scattered areas.

Climate: Long, cold, dry winters; short, hot, humid, summers.

People*

Nationality: Noun and adjective—Korean(s).

Population: (2008) 23.5 million.

Annual growth rate: About +0.98%.

Ethnic groups: Korean; small ethnic Chinese and Japanese populations.

Religions: Buddhism, Confucianism, Shamanism, Chongdogyo, Christian; autonomous religious activities have been virtually nonexistent since 1945.

Languages: Korean.

Education: Years compulsory—11. Attendance—3 million (primary, 1.5 million; secondary, 1.2 million; tertiary, 0.3 million). Literacy—99%.

Health: (1998) Medical treatment is free; one doctor for every 700 inhabitants; one hospital bed for every 350; there are severe shortages of medicines and medical equipment. Infant mortality rate—21.86 /1,000 (2008 est.). Life expectancy—males 69 yrs., females 75 yrs. (2008 est.).

Government

Type: Highly centralized communist state.

Independence: August 15, 1945—Korean liberation from Japan; September 9, 1948—establishment of the Republic of Korea (R.O.K., or South Korea), marking its separation from North Korea (Democratic People's Republic of Korea, or D.P.R.K.).

Constitution: 1948; 1972, revised in 1992 and 1998.

Government branches: Executive—President of the Presidium of the Supreme People's Assembly (chief of state); Chairman of the National Defense Commission (head of government). Legislative—Supreme People's Assembly. Judicial—Central Court; provincial, city, county, and military courts.

Political subdivisions: Nine provinces; four province-level municipalities (Pyongyang, Kaesong, Chongjin, Nampo); one free trade zone (Najin-Sonbong FTZ).

Political parties: Korean Workers' Party (communist).

Suffrage: Universal at 17.

Economy*

GNI: (2006 estimate) $25.6 billion; 23.3% in agriculture and fishery, 10.2% in mining, 19.5% in manufacturing, 4.5% in electricity, gas and tap water output, 9.0% in construction, and 33.6% in services (2006).

Per capita GNI (2006): $1,108.

Agriculture: Products—rice, potatoes, soybeans, cattle, pigs, pork and eggs.

Mining and manufacturing: Types—military products; machine building; chemicals; mining (gold, coal, iron ore, limestone, magnesite, etc.); metallurgy; textiles; food processing; tourism.

Trade: (2007) Exports—$1.684 billion: minerals, non-ferrous metals, garments, chemicals/plastics, machinery/electric and electronic products, animal products, wood products, vegetable products, and precious metals. The D.P.R.K. is also thought to earn hundreds of millions of dollars from the unreported sale of missiles, narcotics, and counterfeit cigarettes, and other illicit activities. Imports—$3.055 billion: minerals, petroleum, machinery/electronics, vegetable products, textiles, chemicals, non-ferrous metals, plastics, vehicles, and animal products. Major trading partners (2007): (1) China,

(2) R.O.K., (3) Thailand, (4) Russia, and (5) India.

*In most cases, the figures used above are estimates based upon incomplete data and projections.

HISTORICAL AND CULTURAL HIGHLIGHTS

The Korean Peninsula was first populated by peoples of a Tungusic branch of the Ural-Altaic language family, who migrated from the northwestern regions of Asia. Some of these peoples also populated parts of northeast China (Manchuria); Koreans and Manchurians still show physical similarities. Koreans are racially and linguistically homogeneous. Although there are no indigenous minorities in North Korea, there is a small Chinese community (about 50,000) and some 1,800 Japanese wives who accompanied the roughly 93,000 Koreans returning to the North from Japan between 1959 and 1962. Although dialects exist, the Korean spoken throughout the peninsula is mutually comprehensible. In North Korea, the Korean alphabet (hangul) is used exclusively.

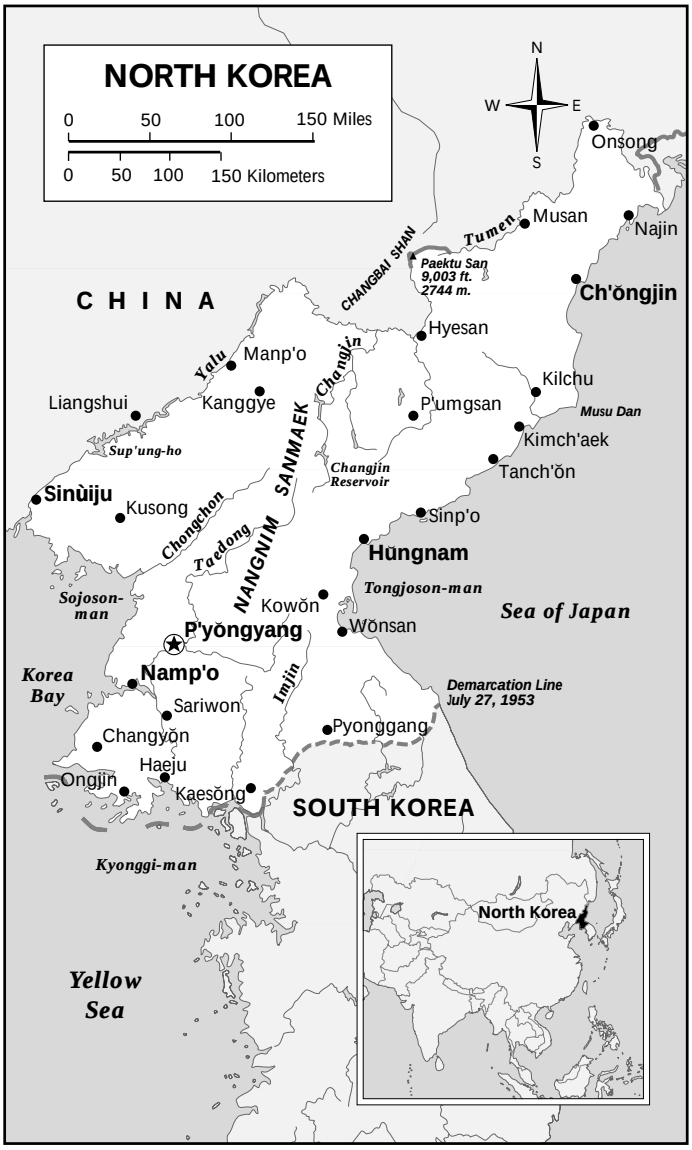
Korea's traditional religions are Buddhism and Shamanism. Christian missionaries arrived as early as the 16th century, but it was not until the 19th century that major missionary activity began. Pyongyang was a center of missionary activity, and there was a relatively large Christian population in the north before 1945. Although religious groups exist in North Korea today, the government severely restricts religious activity.

By the first century AD, the Korean Peninsula was divided into the kingdoms of Shilla, Koguryo, and Paekche. In 668 AD, the Shilla kingdom unified the peninsula. The Koryo dynasty—from which Portuguese missionaries in the 16th century derived the Western name "Korea"—succeeded the Shilla kingdom in 935. The Choson dynasty, ruled by members of the Yi clan, supplanted Koryo in 1392 and lasted until Japan annexed Korea in 1910. Throughout its history, Korea has been invaded, influenced, and fought over by its larger neighbors. Korea was under Mongolian occupation from 1231 until the early 14th century. The unifier of Japan, Hideyoshi Toyotomi, launched major invasions of Korea in 1592 and 1597. When Western powers focused "gunboat" diplomacy on Korea in the mid-19th century, Korea's rulers adopted a closed-door policy, earning Korea the title of "Hermit Kingdom." Though the Choson dynasty recognized China's hegemony in East Asia, Korea was independent until the late 19th century. At that time, China sought to block growing Japanese influence on the Korean Peninsula and Russian pressure for commercial gains there. The competition produced the Sino-Japanese War of 1894-95 and the Russo-Japanese War of 1904-05. Japan emerged victorious from both wars and in 1910 annexed Korea as part of the growing Japanese empire.

Japanese colonial administration was characterized by tight control from Tokyo and ruthless efforts to supplant Korean language and culture. Organized Korean resistance during the colonial era was generally unsuccessful, and Japan remained firmly in control of the Peninsula until the end of World War II in 1945. The surrender of Japan in August 1945 led to the immediate division of Korea into two occupation zones, with the United States administering the southern half of the peninsula and the U.S.S.R. taking over the area to the north of the 38th parallel. This division was meant to be temporary until the United States, U.K., Soviet Union, and China could arrange a trusteeship administration.

In December 1945, a conference was convened in Moscow to discuss the future of Korea. A five-year trusteeship was discussed, and a joint Soviet-American commission was established.

The commission met intermittently in Seoul but deadlocked over the issue of establishing a national government. In September 1947, with no solution in sight, the United States submitted the Korean question to the UN General Assembly. Initial hopes for a unified, independent Korea quickly evaporated as the politics of the Cold War and domestic opposition to the trusteeship plan resulted in the 1948 establishment of two separate nations with diametrically opposed political, economic, and social systems.



Elections were held in the South under UN observation, and on August 15, 1948, the Republic of Korea (R.O.K.) was established in the South. Syngman Rhee, a nationalist leader, became the Republic's first president. On September 9, 1948, the North established the Democratic People's Republic of Korea (D.P.R.K.) headed by then-Premier Kim Il-sung, who had been cultivated and supported by the U.S.S.R.

Korean War of 1950-53

Almost immediately after establishment of the D.P.R.K., guerrilla warfare, border clashes, and naval battles erupted between the two Koreas. North Korean forces launched a massive surprise attack and invaded South Korea on June 25, 1950.

The United Nations, in accordance with the terms of its Charter, engaged in its first collective action and established the UN Command (UNC), to which 16 member nations sent troops and assistance. Next to South Korea, the United States contributed the largest contingent of forces to this international effort. The battle line fluctuated north and south, and after large numbers of Chinese "People's Volunteers" intervened to assist the North, the battle line stabilized north of Seoul near the 38th parallel.

Armistice negotiations began in July 1951, but hostilities continued until July 27, 1953. On that date, at Panmunjom, the military commanders of the North Korean People's Army, the Chinese People's Volunteers, and the UNC signed an armistice agreement. Neither the United States nor South Korea is a signatory to the armistice

per se, although both adhere to it through the UNC. No comprehensive peace agreement has replaced the 1953 armistice pact.

GOVERNMENT AND POLITICAL CONDITIONS

North Korea has a centralized government under the rigid control of the communist Korean Workers' Party (KWP), to which all government officials belong. A few minor political parties are allowed to exist in name only. Kim Il-sung ruled North Korea from 1948 until his death in July 1994. Kim served both as Secretary General of the KWP and as President of North Korea.

Little is known about the actual lines of power and authority in the North Korean Government despite the formal structure set forth in the constitution. Following the death of Kim Il-sung, his son—Kim Jong-il—inherited supreme power. Kim Jong-il was named General Secretary of the KWP in October 1997, and in September 1998, the Supreme People's Assembly (SPA) reconfirmed Kim Jong-il as Chairman of the National Defense Commission and declared that position as the "highest office of state." However, the President of the Presidium of the Supreme People's Assembly, Kim Yong-nam, serves as the nominal head of state. North Korea's 1972 constitution was amended in late 1992 and in September 1998. The constitution designates the Central People's Committee (CPC) as the government's top policymaking body. The CPC makes policy decisions and supervises the cabinet, or State Administration Council (SAC). The SAC is headed by a premier and is the dominant administrative and executive agency.

Officially, the legislature, the SPA, is the highest organ of state power. Its members are elected every four years. Usually only two meetings are held annually, each lasting a few days. A standing committee elected by the SPA performs legislative functions when the Assembly is not in session. In reality, the Assembly serves only to ratify decisions made by the ruling KWP.

North Korea's judiciary is "accountable" to the SPA and the president. The SPA's standing committee also appoints judges to the highest court for four-year terms that are concurrent with those of the Assembly.

Administratively, North Korea is divided into nine provinces and two provincial-level municipalities—Pyongyang and Nasun, or Najin-Sonbong. It also appears to be divided into nine military districts.

Principal Government Officials

Min. of People's Armed Forces (not subordinate to the cabinet): **KIM Il Chol, VMar.**
Pres., Central Bank: **KIM Wan Su**
Permanent Representative to the UN, New York: **SIN Son Ho**

DEFENSE AND MILITARY ISSUES

North Korea now has the fourth-largest army in the world. It has an estimated 1.21 million armed personnel, compared to about 680,000 in the South. Military spending is estimated at as much as a quarter of GNP, with about 20% of men ages 17-54 in the regular armed forces. North Korean forces have a substantial numerical advantage over the South (between 2 and 3 to 1) in several key categories of offensive weapons—tanks, long-range artillery, and armored personnel carriers. The North has perhaps the world's second-largest special operations force, designed for insertion behind the lines in wartime. While the North has a relatively impressive fleet of submarines, its surface fleet has a very limited capability. Its air force has twice the number of aircraft as the South, but, except for a few advanced fighters, the North's air force is obsolete. The North deploys the bulk of its forces well forward, along the demilitarized zone (DMZ). Several North Korean military tunnels under the DMZ were discovered in the 1970s. Over the course of several years, North Korea realigned its forces and moved some rear-echelon troops to hardened bunkers closer to the DMZ. Given the proximity of Seoul to the DMZ (some 25 miles), South Korean and U.S. forces are likely to have little warning of any attack. The United States and South Korea continue to believe that the U.S. troop presence in South Korea remains an effective deterrent. North Korea's nuclear weapons program has also been a source of international tension (see below, Reunification Efforts Since 1971; Denuclearization of the Korean Peninsula).

In 1953, the Military Armistice Commission (MAC) was created to oversee and enforce the terms of the armistice. Over the past decade, North Korea has sought to dismantle the MAC in a push for a new "peace mechanism" on the peninsula. In April 1994, it declared the MAC void and withdrew its representatives.

FOREIGN RELATIONS

North Korea's relationship with the South has determined much of its post-World War II history and still undergirds much of its foreign policy. North and South Korea have had a difficult and acrimonious relationship from the Korean War. In recent years, North Korea has pursued a mixed policy—seeking to develop economic relations with South Korea and to win the support of the South Korean public for greater North-South engagement while at the same time continuing to denounce the R.O.K.'s security relationship with the United States and maintaining a threatening conventional force posture on the DMZ and in adjacent waters.

The military demarcation line (MDL) of separation between the belligerent sides at the close of the Korean War divides North Korea from South Korea. A demilitarized zone (DMZ) extends for 2,000 meters (just over 1 mile) on either side of the MDL. Both the North and South Korean governments hold that the MDL is only a temporary administrative line, not a permanent border. During the post-

war period, both Korean governments have repeatedly affirmed their desire to reunify the Korean Peninsula, but until 1971 the two governments had no direct, official communications or other contact.

Reunification Efforts Since 1971

In August 1971, North and South Korea held talks through their respective Red Cross societies with the aim of reuniting the many Korean families separated following the division of Korea and the Korean War. In July 1972, the two sides agreed to work toward peaceful reunification and an end to the hostile atmosphere prevailing on the peninsula. Officials exchanged visits, and regular communications were established through a North-South coordinating committee and the Red Cross. These initial contacts broke down in 1973 following South Korean President Park Chung-hee's announcement that the South would seek separate entry into the United Nations, and after the kidnapping of South Korean opposition leader Kim Dae-jung—perceived as friendly to unified entry into the UN—by South Korean intelligence services. There was no other significant contact between North and South Korea until 1984.

Dialogue was renewed in September 1984, when South Korea accepted the North's offer to provide relief goods to victims of severe flooding in South Korea. Red Cross talks to address the plight of separated families resumed, as did talks on economic and trade issues and parliamentary-level discussions. However, the North then unilaterally suspended all talks in January 1986, arguing that the annual U.S.-ROK "Team Spirit" military exercise was inconsistent with dialogue. There was a brief flurry of negotiations that year on co-hosting the upcoming 1988 Seoul Olympics, which ended in failure and was followed by the 1987 bombing of a South Korean commercial aircraft (KAL 858) by North Korean agents. In July 1988, South Korean President Roh Tae-woo called for new efforts to promote North-South exchanges, family reunification, inter-Korean trade, and contact in international forums. Roh followed up this initiative in a UN General Assembly speech in which South Korea offered for the first time to discuss security matters with the North. Initial meetings that grew out of Roh's proposals started in September 1989. In September 1990, the first of eight prime minister-level meetings between North Korean and South Korean officials took place in Seoul. The prime ministerial talks resulted in two major agreements: the Agreement on Reconciliation, Nonaggression, Exchanges, and Cooperation (the "Basic Agreement") and the Declaration on the Denuclearization of the Korean Peninsula (the "Joint Declaration").

The Basic Agreement, signed on December 13, 1991, called for reconciliation and nonaggression and established four joint commissions. These commissions—on South-North reconciliation, South-North military affairs, South-North economic exchanges and cooperation, and South-North social and cultural exchange—were to work out the specifics for implementing the basic agreement. Subcommittees to examine specific issues were created, and liaison offices were established in Panmunjom, but in the fall of 1992 the process came to a halt because of rising tension over North Korea's nuclear program.

The Joint Declaration on denuclearization was initialed on December 31, 1991. It forbade both sides from testing, manufacturing, producing, receiving, possessing, storing, deploying, or using nuclear weapons and forbade the possession of nuclear reprocessing and uranium enrichment facilities. A procedure for inter-Korean inspection was to be organized and a North-South Joint Nuclear Control Commission (JNCC) was mandated to verify the denuclearization of the peninsula.

On January 30, 1992, the D.P.R.K. finally signed a nuclear safeguards agreement with the International Atomic Energy Agency (IAEA), as it had pledged to do in 1985 when it acceded to the Nuclear Non-Proliferation Treaty (NPT). This safeguards agreement allowed IAEA inspections to begin in June 1992. In March 1992, the JNCC was established in accordance with the Joint Declaration, but subsequent meetings failed to reach agreement on the main issue of establishing a bilateral inspection regime.

As the 1990s progressed, concern over the North's nuclear program became a major issue in North-South relations and between North Korea and the United States. The lack of progress on implementation of the Joint Declaration's provision for an inter-Korean nuclear inspection regime led to reinstatement of the U.S.-R.O.K. Team Spirit military exercise for 1993. The situation worsened rapidly when North Korea, in January 1993, refused IAEA access to two suspected nuclear waste sites and then announced in March 1993 its intent to withdraw from the NPT. During the next two years, the United States held direct talks with the D.P.R.K. that resulted in a series of agreements on nuclear matters, including the 1994 Agreed Framework (which broke down in 2002 when North Korea was discovered to be pursuing a uranium enrichment program for nuclear weapons—see below, Denuclearization of the Korean Peninsula).

At his inauguration in February 1998, R.O.K. President Kim Dae-jung enunciated a new policy of engagement with the D.P.R.K., dubbed "the Sunshine Policy." The policy had three fundamental principles: no tolerance of provocations from the North, no intention to absorb the North, and the separation of political cooperation from economic cooperation. Private sector overtures would be based on commercial and humanitarian considerations. The use of government resources would entail reciprocity. This policy set the stage for the first inter-Korean summit, held in Pyongyang June 13-15, 2000.

R.O.K. President Roh Moo-hyun, following his inauguration in February 2003, continued his predecessor's policy of engagement with the North, though he abandoned the name "Sunshine Policy." The R.O.K. and

D.P.R.K. held a second inter-Korean summit October 2-4, 2007 in Pyongyang. Inter-Korean relations have declined since the inauguration of R.O.K. President Lee Myung-bak in February 2008, as the D.P.R.K. has criticized Lee's policy of seeking greater reciprocity in inter-Korean relations.

The United States supports engagement and North-South dialogue and cooperation. Major economic reunification projects have included a tourism development in Mt. Geumgang, the re-establishment of road and rail links across the demilitarized zone (DMZ) and a joint North-South industrial park near the North Korean city of Kaesong.

Relations Outside the Peninsula

Throughout the Cold War, North Korea balanced its relations with China and the Soviet Union to extract the maximum benefit from the relationships at minimum political cost. In the 1970s and early 1980s, the establishment of diplomatic relations between the United States and China, the Soviet-backed Vietnamese occupation of Cambodia, and the Soviet occupation of Afghanistan created strains between China and the Soviet Union and, in turn, in North Korea's relations with its two major communist allies. North Korea tried to avoid becoming embroiled in the Sino-Soviet split, obtaining aid from both the Soviet Union and China and trying to avoid dependence on either. Following Kim Il-sung's 1984 visit to Moscow, there was an improvement in Soviet-D.P.R.K. relations, resulting in renewed deliveries of Soviet weaponry to North Korea and increases in economic aid.

The establishment of diplomatic relations by South Korea with the Soviet Union in 1990 and with China in 1992 seriously strained relations between North Korea and its traditional allies. Moreover, the fall of communism in eastern Europe in 1989 and the disintegration of the Soviet Union in 1991 resulted in a significant drop in communist aid to North Korea. Despite these changes and its past reliance on this military and economic assistance, North Korea continued to proclaim a militantly independent stance in its foreign policy in accordance with its official ideology of "juche," or self-reliance.

Both North and South Korea became parties to the Biological Weapons Convention in 1987. (North Korea is not a member of the Chemical Weapons Convention, nor is it a member of the Missile Technology Control Regime, or MTCR.)

North Korea has maintained membership in some multilateral organizations. It became a member of the UN in September 1991. North Korea also belongs to the Food and Agriculture Organization; the International Civil Aviation Organization; the International Postal Union; the UN Conference on Trade and Development; the International Telecommunications Union; the UN Development Program; the UN Educational, Scientific, and Cultural Organization; the World Health Organization; the World Intellectual Property Organization; the World Meteorological Organization; the International Maritime Organization; the International Committee of the Red Cross; and the Nonaligned Movement.

In the mid-1990s, when the economic situation worsened dramatically and following the death of D.P.R.K. founder Kim Il-sung, the North abandoned some of the more extreme manifestations of its "self reliance" ideology to accept foreign humanitarian relief and create the possibility, as noted below, for foreign investment in the North. In subsequent years, the D.P.R.K. has continued to pursue a tightly restricted policy of opening to the world in search of economic aid and development assistance. However, this has been matched by an increased determination to counter perceived external and internal threats by a self-proclaimed "military first" ("Songun") policy.

During the present period of limited, extremely cautious opening, North Korea has sought to broaden its formal diplomatic relationships. In July 2000, North Korea began participating in the ASEAN Regional Forum (ARF), with Foreign Minister Paek Nam-sun attending the ARF ministerial meeting in Bangkok. The D.P.R.K. also expanded its bilateral diplomatic ties in that year, establishing diplomatic relations with Italy, Australia, the Philippines, Australia, Canada, the U.K., Germany, and many other European countries.

In the September 19, 2005 Joint Statement issued at the end of the fourth round of Six-Party Talks, the United States and the D.P.R.K. committed to undertake steps to normalize relations. The D.P.R.K. and Japan also agreed to take steps to normalize relations and to discuss outstanding issues of concern, such as abductions. The February 13, 2007 Initial Actions agreement established U.S.-D.P.R.K. and Japan-D.P.R.K. bilateral working groups on normalization of relations, which have both met several times since their creation (see below, Denuclearization of the Korean Peninsula).

Terrorism

The D.P.R.K. is not known to have sponsored terrorist acts since the 1987 bombing of KAL flight 858. Pyongyang continues to provide sanctuary to members of the Japanese Communist League-Red Army Faction (JRA) who participated in the hijacking of a Japan Airlines flight to North Korea in 1970.

The D.P.R.K. has made several statements condemning terrorism. In October 2000, the United States and the D.P.R.K. issued a joint statement on terrorism in which "the two sides agreed that international terrorism poses an unacceptable threat to global security and peace, and that terrorism should be opposed in all its forms." The United States and the D.P.R.K. agreed to support the international legal regime combating international terrorism and to cooperate with each other to fight terrorism. The D.P.R.K. became a signatory to the Convention for the Suppression of Financing of Terrorism and a party to the Convention Against the

Taking of Hostages in November 2001. In June 2008, the D.P.R.K. Foreign Ministry issued an authoritative statement providing assurances that the D.P.R.K. supports international efforts to combat terrorism and opposes all forms of terrorism.

In the February 13, 2007 Initial Actions agreement, the United States agreed to begin the process of removing the designation of the D.P.R.K. as a state sponsor of terrorism. In the October 3, 2007 Second-Phase Actions, the United States agreed to fulfill its commitments to the D.P.R.K. in parallel with the D.P.R.K.'s actions on disablement and declaration. On June 26, 2008, following the D.P.R.K.'s submission of its nuclear declaration and progress on disablement, President Bush announced his intention to rescind North Korea's designation as a state sponsor of terrorism (see U.S. POLICY TOWARD NORTH KOREA: Denuclearization of the Korean Peninsula).

Abductions

In the past, the D.P.R.K. has also been involved in the abduction of foreign citizens. In 2002, Kim Jong-il acknowledged to Japanese Prime Minister Koizumi the involvement of D.P.R.K. "special institutions" in the kidnapping of Japanese citizens between 1977 and 1983 and said that those responsible had been punished. While five surviving victims and their families were allowed to leave the D.P.R.K. and resettle in Japan in October 2002, 12 other cases remain unresolved and continue to be a major issue in D.P.R.K.-Japanese relations. In October 2005, the D.P.R.K. acknowledged for the first time having kidnapped R.O.K. citizens in previous decades, claiming that several abductees, as well as several POWs from the Korean War, were still alive. In June 2006, North Korea allowed Kim Young-nam, a South Korean abducted by the North in 1978, to participate in a family reunion. In June 2008, the D.P.R.K. agreed to reopen the investigation into the abduction issue. In August 2008, the D.P.R.K. and Japan agreed to a plan for proceeding with the abduction investigation. The United States has continued to press the D.P.R.K. to address Japan's concerns about the abduction issue.

U.S. POLICY TOWARD NORTH KOREA

U.S. Support for North-South Dialogue and Reunification

The United States supports the peaceful reunification of Korea on terms acceptable to the Korean people and recognizes that the future of the Korean Peninsula is primarily a matter for them to decide. The United States believes that a constructive and serious dialogue between the authorities of North and South Korea is necessary to resolve outstanding problems, including the North's nuclear program and human rights abuses, and to encourage the North's integration with the rest of the international community.

Denuclearization of the Korean Peninsula

North Korea joined the Nuclear Non-Proliferation Treaty (NPT) as a non-nuclear weapons state in 1985. North and South Korean talks begun in 1990 resulted in the 1992 Joint Declaration for a Non-Nuclear Korean Peninsula (see, under Foreign Relations, Reunification Efforts Since 1971). However, the international standoff over the North's failure to implement an agreement with the International Atomic Energy Agency for the inspection of the North's nuclear facilities led Pyongyang to announce in March 1993 its intention to withdraw from the NPT. A UN Security Council Resolution in May 1993 urged the D.P.R.K. to cooperate with the IAEA and to implement the 1992 North-South Denuclearization Statement. It also urged all UN Member States to encourage the D.P.R.K. to respond positively to this resolution and to facilitate a solution to the nuclear issue. The United States opened talks with the D.P.R.K. in June 1993 and eventually reached agreement in October 1994 on a diplomatic roadmap, known as the Agreed Framework, for the denuclearization of the Korean Peninsula. The Agreed Framework called for the following steps:

- North Korea agreed to freeze its existing nuclear program and allow monitoring by the IAEA.
- Both sides agreed to cooperate to replace the D.P.R.K.'s graphite-moderated reactors with light-water reactor (LWR) power plants, by a target date of 2003, to be financed and supplied by an international consortium (later identified as the Korean Peninsula Energy Development Organization or KEDO).
- As an interim measure, the United States agreed to provide North Korea with 500,000 tons of heavy fuel oil annually until the first reactor was built.
- The United States and D.P.R.K. agreed to work together to store safely the spent fuel from the five-megawatt reactor and dispose of it in a safe manner that did not involve reprocessing in the D.P.R.K.
- The two sides agreed to move toward full normalization of political and economic relations.
- The two sides agreed to work together for peace and security on a nuclear-free Korean Peninsula.
- The two sides agreed to work together to strengthen the international nuclear non-proliferation regime.

In accordance with the terms of the Agreed Framework, in January 1995 the U.S. Government eased economic sanctions against North Korea in response to North Korea's freezing its graphite-moderated nuclear program under United States and IAEA verification. North Korea agreed to accept the decisions of KEDO, the financier and supplier of the LWRs, with respect to provision of the reactors.

KEDO subsequently identified Sinpo as the LWR project site and held a groundbreaking ceremony in August 1997. In December 1999, KEDO and the (South) Korea Electric Power Corporation (KEPCO) signed the Turnkey Contract (TKC), permitting full-scale construction of the LWRs.

In January 1995, as called for in the 1994 Agreed Framework, the United States and D.P.R.K. negotiated a method to store safely the spent fuel from the D.P.R.K.'s five-megawatt nuclear reactor. Under this method, United States and D.P.R.K. operators worked together to can the spent fuel and store the canisters in a spent fuel pond; canning began in 1995. In April 2000, canning of all accessible spent fuel rods and rod fragments was completed.

In 1998, the United States identified an underground site in Kumchang-ni, North Korea, which it suspected of being nuclear-related. In March 1999, after several rounds of negotiations, the United States and D.P.R.K. agreed that the United States would be granted "satisfactory access" to the underground site at Kumchang-ni. In October 2000, during D.P.R.K. Special Envoy Marshal Jo Myong-rok's visit to Washington, and after two visits to the site by teams of U.S. experts, the United States announced in a Joint Communiqué with the D.P.R.K. that U.S. concerns about the site had been resolved.

As called for in former Defense Secretary William Perry's official review of U.S. policy toward North Korea, the United States and the D.P.R.K. launched Agreed Framework Implementation Talks in May 2000 The United States and the D.P.R.K. also began negotiations for a comprehensive missile agreement, pursuant to the Perry recommendations.

In January 2001, the Bush Administration discontinued nuclear and missile talks, specifying that it intended to review the United States' North Korea policy. The Administration announced on June 6, 2001, that it was prepared to resume dialogue with North Korea on a broader agenda of issues—including North Korea's conventional force posture, missile development and export programs, human rights practices, and humanitarian issues.

In October 2002, a U.S. delegation confronted North Korea with the assessment that the D.P.R.K. was pursuing a uranium enrichment program, in violation of North Korea's obligations under the NPT and its commitments in the 1992 North-South Joint Declaration on Denuclearization of the Korean Peninsula and the Agreed Framework. North Korean officials asserted to the U.S. delegation, headed by then-Assistant Secretary of State for East Asian and Pacific Affairs James A. Kelly, the D.P.R.K.'s "right" to a uranium enrichment program and indicated that that it had such a program. The U.S. side stated that North Korea would have to terminate the program before any further progress could be made in U.S.-D.P.R.K. relations. The United States also made clear that if this program were verifiably eliminated, it would be prepared to work with North Korea on the development of a fundamentally new relationship. Subsequently, the D.P.R.K. has denied the existence of a uranium enrichment program. In November 2002, the member countries of KEDO's Executive Board agreed to suspend heavy fuel oil shipments to North Korea pending a resolution of the nuclear dispute.

In late 2002 and early 2003, North Korea terminated the freeze on its existing plutonium-based nuclear facilities at Yongbyon, expelled IAEA inspectors, removed seals and monitoring equipment at Yongbyon, announced its withdrawal from the NPT, and resumed reprocessing of spent nuclear fuel to extract plutonium for weapons purposes. North Korea announced that it was taking these steps to provide itself with a deterrent force in the face of U.S. threats and U.S. "hostile policy." Beginning in mid-2003, the North repeatedly claimed to have completed reprocessing of the spent fuel rods previously frozen at Yongbyon and publicly said that the resulting fissile material would be used to bolster its "nuclear deterrent force." There is no independent confirmation of North Korea's claims. The KEDO Executive Board suspended work on the LWR Project beginning December 1, 2003.

President Bush has made clear that the United States has no intention to invade or attack North Korea. The President has also stressed that the United States seeks a peaceful end to North Korea's nuclear program in cooperation with North Korea's neighbors, who are directly affected by the threat the nuclear program poses to regional stability and security.

In early 2003, the United States proposed multilateral talks on the North Korean nuclear issue. North Korea initially opposed such a process, maintaining that the nuclear dispute was purely a bilateral matter between the United States and the D.P.R.K. However, under pressure from its neighbors and with the active involvement of China, North Korea agreed to three-party talks with China and the United States in Beijing in April 2003 and to Six-Party Talks with the United States, China, R.O.K., Japan and Russia in August 2003, also in Beijing. During the August 2003 round of Six-Party Talks, North Korea agreed to the eventual elimination of its nuclear programs if the United States were first willing to sign a bilateral "non-aggression treaty" and meet various other conditions, including the provision of substantial amounts of aid and normalization of relations. The North Korean proposal was unacceptable to the United States, which insisted on a multilateral resolution to the issue and opposed provision of benefits before the D.P.R.K.'s complete denuclearization. In October 2003, President Bush said he would consider a multilateral written security guarantee in the context of North Korea's complete, verifiable, and irreversible elimination of its nuclear weapons program.

China hosted a second round of Six-Party Talks in Beijing in February 2004. The United States saw the results as positive, including the announced intention of all parties to hold a third round by the end of June

and to form a working group to maintain momentum between plenary sessions.

At the third round of Six-Party Talks in Beijing, in June 2004, the United States tabled a comprehensive and substantive proposal aimed at resolving the nuclear issue. All parties agreed to hold a fourth round of talks by the end of September 2004. Despite its commitment, the D.P.R.K. refused to return to the table, and in the months that followed issued a series of provocative statements. In a February 10, 2005, Foreign Ministry statement, the D.P.R.K. declared that it had "manufactured nuclear weapons" and was "indefinitely suspending" its participation in the Six-Party Talks. In Foreign Ministry statements in March, the D.P.R.K. said it would no longer be bound by its voluntary moratorium on ballistic missile launches, and declared itself a nuclear weapons state.

Following intense diplomatic efforts by the United States and other parties, the fourth round of Six-Party Talks were held in Beijing over a period of 20 days from July-September 2005, with a recess period in August. Discussions resulted in all parties agreeing to a Joint Statement of Principles. In the September 19, 2005 Joint Statement, the six parties unanimously reaffirmed the goal of verifiable denuclearization of the Korean Peninsula in a peaceful manner. The D.P.R.K. for the first time committed to abandon all nuclear weapons and existing nuclear programs and to return, at an early date, to the NPT and to IAEA safeguards. The other parties agreed to provide economic cooperation and energy assistance. The United States and the D.P.R.K. agreed to take steps to normalize relations subject to bilateral policies, which for the United States includes our concerns over North Korea's ballistic missile programs and deplorable human rights conditions. While the Joint Statement provides a vision of the endpoint of the Six-Party process, much work lies ahead to implement the elements of the agreement. A fifth round of talks began in November 2005, but ended inconclusively as the D.P.R.K. began a boycott of the Six-Party Talks, citing the "U.S.' hostile policy" and specifically U.S. law enforcement action that had led in September to a freeze of North Korean accounts in Macau's Banco Delta Asia (BDA). The United States held discussions in Kuala Lumpur (July 2006) and New York in (September 2006) with other Six-Party partners, except North Korea, along with representatives from other regional powers in the Asia-Pacific region, to discuss Northeast Asian security issues, including North Korea. On July 4-5, 2006 (local Korea time), the D.P.R.K. launched seven ballistic missiles, including six short- and medium-range missiles and one of possible intercontinental range. In response, the UN Security Council unanimously adopted Resolution 1695 on July 15, which demands that the D.P.R.K. suspend all activities related to its ballistic missile program and reestablish existing commitments to a moratorium on missile launching. The resolution also requires all UN Member States, in accordance with their national legal authorities and consistent with international law, to exercise vigilance and prevent missile and missile-related items, materials, goods and technology from being transferred to the D.P.R.K.'s missile or weapons of mass destruction (WMD) programs, prevent the procurement of missiles or related items, materials, goods and services from the D.P.R.K., and the transfer of any financial resources in relation to the D.P.R.K.'s missile or WMD programs. The D.P.R.K. immediately rejected the resolution.

On October 9, 2006, North Korea announced the successful test of a nuclear explosive device, verified by the United States on October 11. In response, the United Nations Security Council, citing Chapter VII of the UN Charter, unanimously passed Resolution 1718, condemning North Korea and imposing sanctions on certain luxury goods and trade of military units, WMD and missile-related parts, and technology transfers.

The Six-Party Talks resumed in December 2006 after a 13-month hiatus. Following a bilateral meeting between the United States and D.P.R.K. in Berlin in January 2007, another round of Six-Party Talks was held in February 2007. On February 13, 2007, the parties reached an agreement on "Initial Actions for the Implementation of the Joint Statement" in which North Korea agreed to shut down and seal its Yongbyon nuclear facility, including the reprocessing facility and to invite back IAEA personnel to conduct all necessary monitoring and verification of these actions as agreed between the IAEA and the D.P.R.K. The other five parties agreed to provide emergency energy assistance to North Korea in the amount of 50,000 tons of heavy fuel oil (HFO) in the initial phase and the equivalent of 950,000 tons of HFO in the next phase of North Korea's denuclearization. The six parties also established five working groups to form specific plans for implementing the Joint Statement in the following areas: denuclearization of the Korean Peninsula, normalization of D.P.R.K.-U.S. relations, normalization of D.P.R.K.-Japan relations, economic and energy cooperation, and a Northeast Asia peace and security mechanism. All parties agreed that the working groups would meet within 30 days of the agreement, which they did. The agreement also envisions the directly-related parties negotiating a permanent peace regime on the Korean Peninsula at an appropriate separate forum.

The sixth round of Six-Party Talks took place on March 19-23, 2007. The parties reported on the first meetings of the five working groups. At the invitation of the D.P.R.K., Assistant Secretary of State Christopher Hill visited Pyongyang in June 2007 as part of ongoing consultations with the six parties on implementation of the Initial Actions agreement. In July 2007, the D.P.R.K. shut down the Yongbyon nuclear facility, as well as an uncompleted reactor at Taechon, and IAEA personnel returned to the D.P.R.K. to monitor and verify the shut-down and to seal the facility. Concurrently, the R.O.K. delivered 50,000 metric tons of HFO in August 2007. All five working groups met in August and September to discuss detailed plans for implementation of

the next phase of the Initial Actions agreement, and the D.P.R.K. invited a team of experts from the United States, China, and Russia to visit the Yongbyon nuclear facility in September 2007 to discuss specific steps that could be taken to disable the facility.

The subsequent September 27-30 Six-Party plenary meeting resulted in the October 3, 2007 agreement on "Second-Phase Actions for the Implementation of the Joint Statement." Under the terms of the October 3 agreement, the D.P.R.K. agreed to disable all existing nuclear facilities subject to abandonment under the September 2005 Joint Statement and the February 13 agreement. The Parties agreed to complete by December 31, 2007 a set of disablement actions for the three core facilities at Yongbyon—the 5-MW(e) Experimental Reactor, the Radiochemical Laboratory (Reprocessing Plant), and the Fresh Fuel Fabrication Plant—with oversight from a team of U.S. experts, The D.P.R.K. also agreed to provide a complete and correct declaration of all its nuclear programs in accordance with the February 13 agreement by December 31, 2007 and reaffirmed its commitment not to transfer nuclear materials, technology, or know-how. The U.S., R.O.K., China, and Russia have continued to provide HFO and HFO-equivalent energy assistance to the D.P.R.K., to fulfill the commitment of one million tons in the initial and second phases, in parallel with the D.P.R.K.'s actions on disablement and declaration.

In November 2007, the D.P.R.K. began to disable the three core facilities at Yongbyon, and U.S. experts have been present at the site to oversee the disablement actions. Assistant Secretary of State Christopher Hill visited Pyongyang again in December 2007 as part of ongoing consultations on the implementation of Second-Phase Actions and carried with him a letter from the President of the United States to Kim Jong-il. While the D.P.R.K. missed the December 31 deadline to provide a complete and correct declaration, it provided its declaration to the Chinese, chair of the Six-Party Talks, on June 26, 2008. The D.P.R.K. also imploded the cooling tower at the Yongbyon facility in late June 2008 before international media. Following the D.P.R.K's progress on disablement and provision of a declaration, President Bush announced the lifting of the application of the Trading with the Enemy Act (TWEA) with respect to the D.P.R.K. and notified Congress of his intent to rescind North Korea's designation as a state sponsor of terrorism. President Bush made clear that the United States needs to have a strong regime in place to verify the D.P.R.K.'s declaration before it removes the D.P.R.K. from the list of state sponsors of terrorism. As of August 2008, the United States continued to work with its Six-Party partners to establish such a verification regime, and remained prepared to move forward with taking the D.P.R.K. off of the state sponsors of terrorism list once a verification regime was in place.

ECONOMY

North Korea's economy declined sharply in the 1990s with the end of communism in Eastern Europe, the disintegration of the Soviet Union and the dissolution of bloc-trading with the countries of the former socialist bloc. Gross national income per capita is estimated to have fallen by about one-third between 1990 and 2002. The economy has since stabilized and shown some modest growth in recent years, which may be reflective of increased inter-Korean economic cooperation. Output and living standards, however, remain far below 1990 levels. Other centrally-planned economies in similar situations opted for domestic economic reform and liberalization of trade and investment. North Korea formalized some modest wage and price reforms in 2002, and has increasingly tolerated markets and a small private sector as the state-run distribution system has deteriorated. The regime, however, seems determined to maintain control. In October 2005, emboldened by an improved harvest and increased food donations from South Korea, the North Korean Government banned private grain sales and announced a return to centralized food rationing. Reports indicate this effort to reassert state control and to control inflation has been largely ineffective. Another factor contributing to the economy's poor performance is the disproportionately large share of GDP (thought to be about one-fourth) that North Korea devotes to its military.

North Korean industry is operating at only a small fraction of capacity due to lack of fuel, spare parts, and other inputs. Agriculture is now 23% of GDP, even though agricultural output has not recovered to early 1990 levels. The infrastructure is generally poor and outdated, and the energy sector has collapsed. About 80% of North Korea's terrain consists of moderately high mountain ranges and partially forested mountains and hills separated by deep, narrow valleys and small, cultivated plains. The most rugged areas are the north and east coasts. Good harbors are found on the eastern coast. Pyongyang, the capital, near the country's west coast, is located on the Taedong River.

North Korea experienced a severe famine following record floods in the summer of 1995 and continues to suffer from chronic food shortages and malnutrition. The United Nations World Food Program (WFP) provided substantial emergency food assistance beginning in 1995 (2 million tons of which came from the United States), but the North Korean Government suspended the WFP emergency program at the end of 2005 and permitted only a greatly reduced WFP program through a protracted relief and recovery operation. While China and the R.O.K. had provided most of the D.P.R.K.'s food aid in the past, the D.P.R.K. has refused to accept food aid from the R.O.K. since Lee Myung-bak's inauguration. The United States began providing food assistance to the D.P.R.K. in June 2008 after establishing a strong framework to ensure that the food will reach those most in need. The United States intends to provide up to 400,000 tons of food through WFP and 100,000 tons through U.S. nongovernmental organizations (NGOs). The United States also assisted U.S.

NGOs in providing aid to fight the outbreak of infectious diseases following August 2007 floods, and is working with U.S. NGOs to improve the supply of electricity at provincial hospitals in North Korea.

Development Policy

In 1991, following the collapse of the Soviet Union and termination of subsidized trade arrangements with Russia, other former Communist states, and China, North Korea announced the creation of a Special Economic Zone (SEZ) in the northeast regions of Najin (sometime rendered "Rajin"), Chongjin, and Sonbong. Problems with infrastructure, bureaucracy, and uncertainties about investment security and viability have hindered growth and development of this SEZ. The government announced in 2002 plans to establish a Special Administrative Region (SAR) in Sinuiju, at the western end of the North Korea-China border. However, the government has taken few concrete steps to establish the Sinuiju SAR, and its future is uncertain. In addition, North Korea and South Korea have established a special economic zone near the city of Kaesong, where about 20 South Korean companies operate manufacturing facilities employing North Korean workers (see further information under North-South Economic Ties).

North Korea implemented limited micro- and macroeconomic reforms in 2002, including increases in prices and wages, changes in foreign investment laws, a steep currency devaluation, and reforms in industry and management. Though the changes have failed to stimulate recovery of the industrial sector, there are reports of changed economic behavior at the enterprise and individual level. One unintended consequence of the 2002 changes has been severe inflation. An increasing number of North Koreans now try to work in the informal sector to cope with growing hardship and reduced government support.

North-South Economic Ties

Two-way trade between North and South Korea, legalized in 1988, had risen to more than $1.8 billion in 2007, much of it related to out-processing or assembly work undertaken by South Korean firms in the Kaesong Industrial Complex (KIC). A significant portion of the total also includes donated goods provided to the North as humanitarian assistance or as part of inter-Korean cooperation projects. Although business-based and processing-on-commission transactions continued to grow, the bulk of South Korean exports to North Korea in 2007 was still non-commercial.

Since the June 2000 North-South summit, North and South Korea have reconnected their east and west coast railroads and roads where they cross the DMZ and are working to improve these transportation routes. North and South Korea conducted tests of the east and west coast railroads on May 17, 2007 and began cross-border freight service between Kaesong in the D.P.R.K. and Munsan in the R.O.K. in December 2007. Much of the work done in North Korea has been funded by South Korea. The west coast rail and road are complete as far north as the KIC (six miles north of the DMZ), but little work is being done north of Kaesong. On the east coast, the road is complete but the rail line is far from operational. Since 2003, tour groups have been using the east coast road to travel from South Korea to Mt. Geumgang in North Korea, where cruise ship-based tours had been permitted since 1998.

As of August 2008, 72 South Korean firms were manufacturing goods in the KIC, employing more than 30,000 North Korean workers. Most of the goods are sold in South Korea; a small quantity, about 20% of the KIC products, is being exported to foreign markets. Ground was broken on the complex in June 2003, and the first products were shipped from the KIC in December 2004. Plans envision 250 firms employing 350,000 workers by 2012.

R.O.K.-organized tours to Mt. Kumgang in North Korea began in 1998. Since then, more than a million visitors have traveled to Mt. Kumgang. The R.O.K. suspended tours to Mt. Kumgang in July 2008, however, following the shooting death of a South Korean tourist at the resort by a D.P.R.K. soldier.

Economic Interaction with the United States

The United States imposed a near total economic embargo on North Korea in June 1950 when North Korea attacked the South. Sanctions were eased in stages beginning in 1989 and following the Agreed Framework on North Korea's nuclear programs in 1994. In June 2000, a new series of regulations authorized most transactions between U.S. and North Korean persons. Among other things, these regulations allowed most products, other than those specifically controlled for military, nonproliferation, or anti-terrorism purposes, to be exported to North Korea without an export license (although the export licensing requirement was subsequently reimposed in order to comply with UN Security Council Resolution 1718). Restrictions on U.S. investments in North Korea and travel of U.S. citizens to North Korea were also eased, and U.S. ships and aircraft were allowed to call at North Korean ports. On June 26, 2008, the President announced the termination of the application of the Trading with the Enemy Act with respect to the D.P.R.K. To date, however, U.S. economic interaction with North Korea remains minimal, and North Korean assets frozen since 1950 remained frozen. In January 2007, pursuant to UN Security Council Resolution 1718, the U.S. Department of Commerce issued new regulations prohibiting the export of luxury goods to North Korea. Many statutory sanctions on North Korea, including those affecting trade in military, dual-use, and missile-related items and those based on multilateral arrangements, remain in place. Most forms of U.S. economic assistance, other than purely humanitarian assistance, are prohibited. North Korea does not enjoy "Normal Trade Relations" with

the United States, so any goods manufactured in North Korea are subject to a higher tariff upon entry to the United States.

Points of Contact for U.S. regulations concerning economic activity with North Korea:

- Treasury—Office of Foreign Assets Control, Tel. (202) 622-2490, http://www.treas.gov/ofac;
- Commerce—Foreign Policy Controls Division, Bureau of Industry and Security, Tel. (202) 482-0171;
- Transportation—Office of the Assistant General Counsel for International Law, Tel. (202) 366-9183.

TRAVEL

Consular Information Sheet

April 29, 2008

Prior to departing the United States, U.S. citizens planning to transit China on their visit to North Korea are encouraged to register on line with the U.S. Embassy in Beijing; U. S. citizens transiting South Korea to take the Mount Kumgang or Kaesong City tours should register with the U.S. Embassy in Seoul. U. S. citizens visiting North Korea should also register with the Swedish Embassy in Pyongyang (U.S. Protective Power).

Country Description: The Democratic People's Republic of Korea (North Korea or the DPRK) is a highly militaristic Communist state located on the Korean Peninsula between northeast China and the Republic of Korea (South Korea or ROK), with land borders with China, Russia and South Korea. The DPRK is one of the world's most isolated countries. The continuing dispute over North Korea's development of nuclear programs and nuclear weapons has resulted in tensions in the region and between the United States and the DPRK. North Korea limits trade and transportation links with other countries and tightly restricts the circumstances under which foreigners may enter the country and interact with local citizens. Telephone and fax communications are unavailable in many areas of the country and foreigners can expect their communications to be monitored by DPRK officials. In the past few years, North Korea has experienced famine, flooding, fuel and electricity shortages, and outbreaks of disease. Many countries, including the United States, have contributed to international relief efforts to assist the people of North Korea.

Foreign tourists are a means for North Korea to earn much needed foreign currency, but an underdeveloped service sector, inadequate infrastructure, and political tensions with surrounding countries have stymied any significant tourist flow. North Korean efforts to expand tourism have focused primarily on group tours from China, as well as from South Korea primarily to the Mount Kumgang tourist area and the city of Kaesong.

The United States does not maintain diplomatic or consular relations with the DPRK. The Swedish Embassy located in Pyongyang acts as the United States' interim consular protective power and provides basic consular services to U.S. citizens traveling in North Korea. Please refer to Special Circumstances for additional information.

Entry Requirements: North Korean visas are required for entry. The U.S. Government does not issue letters to private Americans seeking North Korean visas, even though in the past such letters have sometimes been requested by DPRK embassies. Prospective travelers entering and departing North Korea through China must also obtain a two-entry visa for China as a valid Chinese visa is essential for departing North Korea at the conclusion of a visit or in an emergency. While the ROK government is attempting to open direct travel routes to the DPRK, routine travel from the ROK to the DPRK is currently prohibited. Travel across the demilitarized zone (DMZ) is allowed only infrequently for official and government-authorized cultural and economic exchanges, or aid shipments. There are no regularly operating direct commercial flights from South Korea to North Korea at this time. U.S. citizens who arrive in North Korea without a valid U.S. passport and North Korean visa may be detained, arrested, fined or denied entry. Individuals traveling to North Korea report that fees for local travel costs (taxi, tolls, permits and the cost for security personnel assigned to escort foreigner visitors) can be high and arbitrary.

Where to obtain a North Korean visa: There is no DPRK embassy in the United States. U.S. citizens and residents planning travel to North Korea must obtain DPRK visas in third countries, for example in Beijing, China. For information about entry requirements and restricted areas, contact the DPRK Mission to the United Nations in New York. Address inquiries to:

The Permanent Representative of the Democratic People's Republic of Korea to the United Nations
820 Second Avenue
New York, NY 10017
Tel: (212) 972-3105
Fax: (212) 972-3154

Americans living abroad can contact the DPRK Embassy, if any, in their country of residence. U.S. citizens traveling to North Korea may obtain their visas at the DPRK Embassy in Beijing, China, which will issue visas only after receiving authorization from the DPRK Foreign Ministry in Pyongyang. Prior to traveling to the region, travelers may wish to confirm that authorization to issue their visa has been received from Pyongyang. Americans can call the North Korean Embassy in Beijing prior to their travel by telephone at (86-10) 6532-1186 or (86-10) 6532-1189 (fax: (86-10) 6532-6056).

Safety and Security: DPRK government security personnel closely monitor the activities and conversations of foreigners in North Korea. Hotel rooms, telephones and fax machines

may be monitored, and personal possessions in hotel rooms may be searched. Photographing roads, bridges, airports, rail stations, or anything other than designated public tourist sites can be perceived as espionage and may result in confiscation of cameras and film or even detention. DPRK border officials routinely confiscate visitors' cell phones upon arrival, returning the phone only upon departure. Foreign visitors to North Korea may be arrested, detained or expelled for activities that would not be considered criminal outside the DPRK, including involvement in unsanctioned religious and political activities, engaging in unauthorized travel, or interaction with the local population.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site at where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on worldwide security can also be obtained by calling 1-888-407-4747 toll free in the United States and Canada, or for callers outside the United States and Canada, a regular toll line at 1-202-501-4444.

Crime: The North Korean government does not release statistics on crime. Violent crime is very rare and street crime is uncommon in Pyongyang. Petty thefts have been reported, especially at the airport in Pyongyang.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and to the Swedish Embassy. If you are a victim of any crime while in North Korea, in addition to reporting to local police, please contact the Swedish Embassy for assistance (address and phone number below).

Medical Facilities and Health Information: Persons with medical problems should not travel to North Korea. For decades, medical facilities in the DPRK have suffered from a lack of resources and electricity, as well as inadequate and often outdated skills among the medical staff. Hospitals in Pyongyang can perform basic examinations and lifesaving measures but functioning x-ray facilities are not generally available. Surgery should be avoided. For accidents outside Pyongyang, transport back to the capital can be a lengthy trip without medical assistance. Persons requiring regular medication are encouraged to bring sufficient stocks of drugs for personal use since most drugs are impossible to obtain locally. Hospitals will expect immediate U.S. dollar cash payment for medical treatment. Credit cards and checks have not been honored in the past, according to diplomatic personnel stationed in the DPRK. Local DPRK hosts are often not aware of available evacuation options and might claim that no such options exist. In case of serious medical problems, it is important to insist on immediate contact with the Swedish Embassy. The Swedish Embassy can arrange a medical evacuation to Beijing within approximately 5-10 hours.

All necessary vaccinations should be received prior to traveling to North Korea. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC web site at http://wwwn.cdc.gov/travel/default.aspx. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en. Travelers with special dietary requirements are advised to bring food with them to North Korea, as the restaurants available to foreigners may have limited menus that lack variety and nutritional adequacy.

In the case of a critical illness or accident, the Swedish Embassy will attempt to arrange flight clearances for air ambulances performing emergency medical evacuations. Medical air evacuation costs vary, but average approximately $40,000 to $50,000 for medical, personnel, aircraft and clearance costs. Clearances can usually be arranged within one week. Medical evacuation by regularly scheduled airlines can be arranged, but is limited to the very few flights that operate from Pyongyang to Beijing, Dalian, Shenyang and Macau. Chinese visas for injured foreigners and any escorts must be obtained prior to the evacuation from North Korea in order to transit China. Even in the case of a medical emergency, transit visas may take several days to arrange. Evacuation across the DMZ to South Korea is not allowed.

If an American citizen falls ill or is injured while traveling in the DPRK, accompanying travelers or family members should immediately contact the Swedish Embassy using the phone numbers listed below.

The Embassy of Sweden,
Munsu-Dong District,
Pyongyang, DPRK

Telephone and fax numbers for the Swedish Embassy (U.S. Protective Power) are:

Tel: (850-2) 3817 485 (Reception)
(850-2) 3817 904, 907 (First Secretary)
(850-2) 3817 908, 905 (Ambassador)
Fax: (850-2) 3817 663
Email:
ambassaden.pyongyang@foreign.ministry.se

Notification also should be made to the U.S. Embassy's American Citizen Services (ACS) Unit in Beijing, China, using the phone numbers listed below:

U.S. Embassy, Beijing
American Citizen Services
Number 2 Xiushui Dong Jie
Beijing, China 100600
Telephone: (86-10) 6532-3431
Fax: (86-10) 6532-4153

After hours, please call (86-10) 6532-1910 and ask for the Embassy duty officer. Americans who wish to contact U.S. consular officials in China can e-mail questions to: amcitbeijing

@state.gov. Companies that may be able to arrange evacuation services include, but are not limited to those listed below. Travelers may wish to contact these or other emergency medical assistance providers for information about their ability to provide medical evacuation insurance and/or assistance for travelers to North Korea.

SOS International (www.intsos.com)

Global Doctor
(www.globaldoctor.com)
China telephone: (86-10) 83151914)
(86-24) 24330678 in Shenyang, Liaoning Province

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and if it will cover emergency expenses such as medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning North Korea is provided for general reference only, and may not be totally accurate in a particular location or situation. Foreigners not holding a valid DPRK driver's license are not allowed to drive in North Korea. Foreigners generally are not allowed to use public buses or the subway. North Korea has a functioning rail transport system; however delays occur often, sometimes for days. On occasion, service may be totally interrupted before reaching the final destination. Bicycles are unavailable for rental or purchase.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and North Korea, the U.S. Federal Aviation Administration (FAA) has not assessed North Korea's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Interim Consular Protecting Power: The United States does not maintain diplomatic or consular relations with the DPRK. The U.S. Government therefore cannot provide normal consular protective services to U.S. citizens in North Korea. On September 20, 1995, a consular protecting power arrangement was implemented, allowing the Swedish Embassy in the DPRK capital of Pyongyang to provide basic consular protective services to U.S. citizens traveling in North Korea who are ill, injured, arrested or who have died while there.

Consular Access: There is no United States diplomatic or consular presence in the DPRK. Americans traveling in the DPRK may receive limited consular services from the Swedish Embassy in Pyongyang. Please see section above on "Medical Insurance" for address and contact information for the Swedish Embassy in Pyongyang. U.S. citizens are encouraged to carry photocopies of their passport data and photo pages with them at all times so that, if questioned by DPRK officials, evidence of their U.S. citizenship is readily available. The U.S.- DPRK Interim Consular Agreement provides that North Korea will notify the Swedish Embassy within four days of an arrest or detention of an American citizen and will allow consular visits within two days after a request is made by the Swedish Embassy. However, consular access has not been readily granted in cases where American citizens have been reported as being detained or held against their will by DPRK officials. Moreover, delegations with ethnic Korean individuals, or delegations representing Korean-affiliated organizations in the U.S., are handled by DPRK structures that are well beyond the reach of diplomatic missions in Pyongyang. Hence, in case of a situation requiring consular assistance, the Embassy's access is even more limited.

Customs Regulations: DPRK authorities may seize documents, literature, audio and videotapes, compact discs and letters deemed by North Korean officials to be pornographic, political or intended for religious proselytizing. Persons seeking to enter North Korea with religious materials in a quantity deemed to be greater than that needed for personal use can be detained, fined and expelled. It is advisable to contact the DPRK Mission to the United Nations or a DPRK embassy or a DPRK consulate in a third country for specific information regarding customs requirements.

Dual Nationality: The DPRK does not recognize dual nationality. U.S. citizens of Korean heritage may be subject to military obligations and taxes on foreign source income. Additional questions on dual nationality may be directed to Overseas Citizens Services, SA-29, 4th Floor, 2201 C Street NW, Washington, DC 20520 or by telephone at 1-888-407-4747.

U.S. Government Economic Sanctions Against North Korea: At this time, goods of North Korean origin may not be imported into the United States either directly or indirectly without prior notification to and approval of the U.S. Treasury Department's Office of Foreign Assets Control (OFAC). Exports to North Korea may be subject to licensing requirements. Check with the Commerce Department's Bureau of Industry and Security. Most financial transactions between U.S. and North Korean citizens are authorized, provided they meet the criteria outlined in the June 19, 2000, and subsequent amendments to OFAC regulations. All transactions ordinarily incident to travel to, from and within North Korea and to maintenance within North Korea are authorized, and U.S. travel service providers are allowed to organize group travel to North Korea. Commercial U.S. ships and

aircraft carrying U.S. goods are allowed to call at North Korean ports with prior clearance. In May 2006, OFAC began prohibiting U.S. persons from "owning, leasing, operating or insuring any vessel flagged by North Korea." Full text of the regulation can be found in the Federal Register at http://www.fas.usda.gov/info/fr/2000/061900-a.txt.

The U.S. maintains various export controls and other sanctions on North Korea for counter- terrorism, nonproliferation and other reasons. Exports of military and sensitive dual-use items are prohibited, as are most types of U.S. economic assistance. The U.S. also abides by multilateral restrictions and sanctions with respect to North Korea, including those contained in recent United Nations Security Council Resolutions in response to the North Korean missile launches and nuclear test in July and October 2006.

For additional information, consult the U.S. Department of the Treasury, Office of Foreign Assets Control (OFAC) home page on the Internet at http://www.treasury.gov/offices/enforcement/ofac.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States. Local laws also may not afford the protections available to U.S. citizens under U.S. law. Penalties for breaking local laws can be more severe than in the United States for similar offenses.

Persons violating the law, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use or trafficking in illegal drugs are strict, and convicted offenders often face long jail sentences and heavy fines. North Korean security personnel may view unescorted travel by Americans inside North Korea without explicit official authorization as espionage, especially in cases where the U.S. citizens are originally from South Korea or are thought to understand the Korean language. Security personnel may also view any attempt to engage in unauthorized conversations with a North Korean citizen as espionage.

Foreigners are subject to fines or arrest for unauthorized currency transactions or for shopping at stores not designated for foreigners. It is a criminal act in North Korea to show disrespect to the country's current and former leaders, Kim Jong-Il and Kim Il-Sung, respectively. Foreign journalists have been threatened when questioning the policies or public statements of the DPRK or the actions of the current leadership.

Engaging in illicit sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States. Please see additional information on Criminal Penalties.

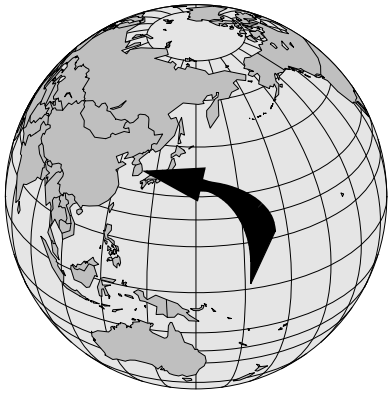
Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Embassy Locations And Registration: There is no U.S. Embassy or Consulate in North Korea. U.S. citizens planning to visit North Korea are encouraged to register prior to departing the United States with the U.S. Embassy in Beijing if entering North Korea from China. U.S. citizens planning to visit the Mount Kumgang tourism area or Kaesong from South Korea should register with the U.S. Embassy in Seoul. Registration can be done on line through the State Department's travel registration web site or in person, by telephone or fax, at the U.S. Embassy. Americans who have a medical or consular emergency and who wish to contact the Swedish Embassy are reminded first to communicate this need to their North Korean escorts or guides. Do not attempt to travel to the Swedish Embassy unescorted. The Swedish Embassy (U.S. Protective Power) is located at Munsu-Dong District, Pyongyang. The telephone and fax numbers for the Swedish Embassy (U.S. Protective Power) are:

Tel: (850-2) 3817 485 (reception)

Tel: (850-2) 3817 904, (850-2) 3817 907 (First Secretary)

Tel: (850-2) 3817 908, (850-2) 3817 905 (Ambassador)



Fax: (850-2) 3817 663

The American Citizen Services Unit of the U.S. Embassy in Beijing, China, is located at: 2 Xiushui Dong Jie, Beijing. The Embassy is located near Ritan Park. Telephone: (86-10) 6532-3431. Fax: (86-10) 6532-4153. Email: amcitbeijing@state.gov. The Embassy Beijing web site is http://beijing. usembassy-china.org.cn.

For after-hours emergencies please call (86-10)6532-3431 and ask for the Embassy duty officer.

The American Citizen Services Unit of the U.S. Embassy in Seoul, South Korea, is located at: 32 Sejong-no, Jongno-gu, Seoul. The Embassy is located across the street from Sejong Cultural Center and next to the Ministry of Information and Communication/KT Building. Telephone: (82-2) 397-4114. Fax: (82-2) 2-397-4101. E-mail: seoul_acs@state.gov. The Embassy Seoul web site is http://seoul.usembassy.gov.

For after-hours emergencies please call (82-2) 721-4114 and ask for the Embassy duty officer.

KOREA (SOUTH)

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Korea

PROFILE

Geography

Area: 98,480 sq. km. (38,023 sq. mi.); slightly larger than Indiana.
Cities: (2005) Capital—Seoul (10.3 million). Other major cities—Busan (3.7 million), Daegu (2.5 million), Inchon (2.6 million), Gwangju (1.4 million), Daejeon (1.5 million), Ulsan (1.0 million).
Terrain: Partially forested mountain ranges separated by deep, narrow valleys; cultivated plains along the coasts, particularly in the west and south.
Climate: Temperate.

People

Nationality: Noun and adjective—Korean(s).
Population: (2008) 48,379,392.
Population annual growth rate: (2008) 0.269%.
Ethnic groups: Korean; small Chinese minority (about 20,000).
Religions: Christianity, Buddhism, Shamanism, Confucianism, Chondogyo.
Languages: Korean.
Education: Years compulsory—9. Enrollment—11.5 million. Attendance—middle school 99%, high school 95%. Literacy—98%.
Health: (2008) Infant mortality rate—4.29/1,000. Life expectancy—78.64 yrs (men 75.34 yrs.; women 82.17 yrs).
Work force: (2007) 24.22 million. Services—75.2%; industry—17.3%; agriculture—7.5%

Government

Type: Republic with powers shared between the president, the legislature, and the courts.
Liberation: August 15, 1945.
Constitution: July 17, 1948; last revised 1987.
Government branches: Executive—President (chief of state); Prime Minister (head of government). Legislative—unicameral National Assembly. Judicial—Supreme Court and appellate courts; Constitutional Court.
Political subdivisions: Nine provinces, seven administratively separate cities (Seoul, Busan, Incheon, Daegu, Gwangju, Daejeon, Ulsan).
Political parties: Grand National Party (GNP); Democratic Party (DP), formerly known as United Democratic Party (UDP); Liberal Forward Party (LFP); Democratic Labor Party (DLP); Creative Korea Party (CKP)
Suffrage: Universal at 19.
Budget: (2007) Expenditures—$256.6 billion.
Defense: (2007) 2.7% of GDP.

Economy

GDP: (purchasing power parity in 2007) $1.201 trillion.
GDP growth rate: 2004, 4.7%; 2005, 4.2%; 2006, 5.1%; 2007, 5.0%.
Per capita GNI: (2007) $20,045.
Consumer price index: 2004, 3.6%; 2005, 2.8%; 2006, 2.2%; 2007, 2.5%.
Natural resources: Limited coal, tungsten, iron ore, limestone, kaolinite, and graphite.
Agriculture: (including forestry and fisheries) Products—rice, vegetables, fruit, root crops, barley; cattle, pigs, chickens, milk, eggs, fish. Arable land—17% of land area.
Industry: Types—Electronics and electrical products, telecommunications, motor vehicles, shipbuilding, mining and manufacturing, petrochemicals, industrial machinery, steel.
Trade: (2007) Exports—$379 billion f.o.b.: electronic products (semiconductors, cellular phones and equipment, computers), automobiles, machinery and equipment, steel, ships, petrochemicals. Imports—$349.6 billion f.o.b.: crude oil, food, machinery and transportation equipment, chemicals and chemical products, base metals and articles. Major markets (2007)—China (25.7%), U.S. (12.3%), Japan (6.8%), Hong Kong (4.5%). Major suppliers (2007)—China (16.7%), Japan (16.4%), U.S. (10.5%), Saudi Arabia (6.3%), U.A.E. (4.2%).

PEOPLE

Population

Korea's population is one of the most ethnically and linguistically homogenous in the world. Except for a small Chinese community (about 20,000), virtually all Koreans share a common cultural and linguistic heritage. With 48.85 million people, South Korea has one of the world's highest population densities. Major population centers are located in the northwest, southeast, and in the plains south of the Seoul-Incheon area. Korea has experienced one of the largest rates of emigration, with ethnic Koreans residing primarily in China (2.4 million), the United States (2.1 million), Japan (600,000), and the countries of the former Soviet Union (532,000).

Language

The Korean language is related to Japanese and Mongolian. Although it differs grammatically from Chinese and does not use tones, a large number of Chinese cognates exist in Korean. Chinese ideograms are believed to have been brought into Korea sometime before the second century BC. The learned class spoke Korean, but read and wrote Chinese. A phonetic writing system ("hangul") was invented in the 15th century by King Sejong to provide a writing system for commoners who could not read classical Chinese. Modern Korean uses hangul almost exclusively with Chinese characters in limited use for word clarification. Approximately 1,300 Chinese characters are used in modern Korean. English is taught as a second language in most primary and secondary schools. Chinese and Japanese are widely taught at secondary schools.

Religion

Half of the population actively practices religion. Among this group, Christianity (49%) and Buddhism (47%) comprise Korea's two dominant religions. Though only 3% identified themselves as Confucianists, Korean society remains highly imbued with Confucian values and beliefs. The remaining 1% of the population practice Shamanism (traditional spirit worship) and Chondogyo ("Heavenly Way"), a traditional religion.

HISTORY

The myth of Korea's foundation by the god-king Tangun in BC 2333 embodies the homogeneity and self-sufficiency valued by the Korean people. Korea experienced many invasions by its larger neighbors in its 2,000 years of recorded history. The country repelled numerous foreign invasions despite domestic strife, in part due to its protected status in the Sino-centric regional political model during Korea's Chosun dynasty (1392-1910). Historical antipathies to foreign influence earned Korea the title of "Hermit Kingdom" in the 19th century.

With declining Chinese power and a weakened domestic posture at the end of the 19th century, Korea was open to Western and Japanese encroachment. In 1910, Japan began a 35-year period of colonial rule over Korea. As a result of Japan's efforts to supplant the Korean language and aspects of Korean culture, memories of Japanese annexation still recall fierce animosity and resentment, especially among older Koreans. Nevertheless, import restrictions on Japanese movies, popular music, fashion, and the like have been lifted, and many Koreans, especially the younger generations, eagerly follow Japanese pop culture. Aspects of Korean culture, including television shows and movies, have also become popular in Japan.

Japan's surrender to the Allied Powers in 1945, signaling the end of World War II, only further embroiled Korea in foreign rivalries. Division at the 38th parallel marked the beginning of Soviet and U.S. trusteeship over the North and South, respectively. On August 15, 1948 the Republic of Korea (R.O.K.) was established, with Syngman Rhee as the first President. On September 9, 1948 the Democratic People's Republic of Korea (D.P.R.K.) was established under Kim Il Sung. On June 25, 1950, North Korean forces invaded South Korea. Led by the U.S., a 16-member coalition undertook the first collective action under United Nations Command (UNC). Following China's entry on behalf of North Korea later that year, a stalemate ensued for the final two years of the conflict. Armistice negotiations, initiated in July 1951, were ultimately concluded on July 27, 1953 at Panmunjom, in what is now the Demilitarized Zone (DMZ). The Armistice Agreement was signed by representatives of the Korean People's Army, the Chinese People's Volunteers, and the U.S.-led United Nations Command (UNC). Though the R.O.K. supported the UNC, it refused to sign the Armistice Agreement. A peace treaty has never been signed. The war left almost three million Koreans dead or wounded and millions of others homeless and separated from their families.

In the following decades, South Korea experienced political turmoil under autocratic leadership. President Syngman Rhee was forced to resign in April 1960 following a student-led uprising. The Second Republic under the leadership of Chang Myon ended after only one year, when Major General Park Chung-hee led a military coup. Park's rule, which resulted in tremendous economic growth and development but increasingly restricted political freedoms, ended with his assassination in 1979. Subsequently, a powerful group of military officers, led by Lieutenant General Chun Doo Hwan, declared martial law and took power.

Throughout the Park and Chun eras, South Korea developed a vocal civil society that led to strong protests against authoritarian rule. Composed primarily of students and labor union activists, protest movements reached a climax after Chun's 1979 coup and declaration of martial law. A confrontation in Gwangju in 1980 left at least 200 civilians dead. Thereafter, pro-democracy activities intensified even more, ultimately forcing political concessions by the government in 1987, including the restoration of direct presidential elections.

In 1987, Roh Tae-woo, a former general, was elected president, but additional democratic advances during his tenure resulted in the 1992 election of a long-time pro-democracy activist, Kim Young-sam. Kim became Korea's first civilian elected president in 32 years. The 1997 presidential election and peaceful transition of power marked another step forward in Korea's democratization when Kim Dae-jung, a life-long democracy and human rights activist, was elected from a major opposition party. The transition to an open, democratic system was further consolidated in 2002, when self-educated human rights lawyer, Roh Moo-hyun, won the presidential election on a "participatory government" platform. South Koreans voted for a new president in December 2007. Former business executive and Mayor of Seoul Lee Myung-bak's 5-year term began with his inauguration on February 25, 2008.

GOVERNMENT AND POLITICAL CONDITIONS

The Republic of Korea (commonly known as "South Korea") is a republic with powers nominally shared among the presidency, the legislature, and the judiciary, but traditionally dominated by the president. The president is chief of state and is elected for a single term of 5 years. The 299 members of the unicameral National Assembly are elected to 4-year terms; elections for the assembly were held on April 9, 2008. South Korea's judicial system comprises a Supreme Court, appellate courts, and a Constitutional Court. The judiciary is independent under the constitution. The country has nine provinces and seven administratively separate cities—the capital of Seoul, along with Busan, Daegu, Daejeon, Gwangju, Incheon and Ulsan. Political parties include the Grand National Party (GNP), Democratic Party (DP), Liberal Forward Party (LFP), Creative Korea Party (CKP), and Democratic Labor Party (DLP). Suffrage is universal at age 19 (lowered from 20 in 2005).

Principal Government Officials

Last Updated: 11/12/08

The spellings of names of South Korean officials have been changed to reflect widely recognized spellings.

Pres.: **LEE Myung-bak**
Prime Min.: **HAN Seung-soo**
Chief Sec.: **CHO Jung-pyo**
Min. of Culture, Sports, & Tourism: **YU In-chon**
Min. of Education, Science, & Technology: **AHN Byong-man**
Min. of Environment: **LEE Maan-ee**
Min. for Food, Agriculture, Forestry, & Fisheries: **JANG Tae-pyung**
Min. of Foreign Affairs & Trade: **YU Myung-hwan**
Min. of Gender Equality: **BYUN Do-yoon**
Min. for Health, Welfare, & Family Affairs: **JEON Jae-hee**
Min. of Justice: **KIM Kyung-han**
Min. of Knowledge Economy: **LEE Youn-ho**
Min. of Labor: **LEE Young-hui**
Min. of Land, Transport, & Maritime Affairs: **CHUNG Jong-hwan**
Min. of National Defense: **LEE Sang-hee**

Min. of Public Admin. & Security: **WON Sei-hoon**
Min. of Strategy & Finance: **KANG Man-soo**
Min. of Unification: **KIM Ha-joong**
Chmn., Board of Audit & Inspection:
Chmn., Civil Rights Commission: **YANG Gun**
Chmn., Civil Service Commission: **KWON Oh-ryong**
Chmn., Fair Trade Commission: **BAEK Yong-ho**
Chmn., Financial Services Commission: **JUN Kwang-woo**
Chmn., Korean Broadcasting & Communications Commission: **CHOI See-jung**
Chmn., National Competitive Council: **SA-KONG Il**
Pres., National Human Rights Commission: **AHN Kyong-whan**
Chief of Staff, Office of the Pres.: **CHUNG Chung-kil**
Senior Presidential Sec. for Foreign Affairs & Security Policy, Office of the Pres.: **KIM Sung-hwan**
Dir., National Intelligence Service: **KIM Sung-ho**
Governor, Bank of Korea: **LEE Seong-tae**
Ambassador to the US: **LEE Tae-sik**
Permanent Representative to the UN, New York: **PARK In-kook**

Korea maintains an embassy in the United States at 2450 Massachusetts Avenue NW, Washington, DC 20008 (tel. 202-939-5600). Consulates General are located in Atlanta, Boston, Chicago, Honolulu, Houston, Los Angeles, New York, San Francisco, Seattle, and Hagatna (Agana) in Guam.

ECONOMY

The Republic of Korea's economic growth over the past several decades has been spectacular. Per capita GNP, only $100 in 1963, is over $20,000. South Korea is now the United States' seventh-largest trading partner and is the 13th-largest economy in the world.

In the early 1960s, the government of Park Chung Hee instituted sweeping economic policy changes emphasizing exports and labor-intensive light industries, leading to rapid debt-financed industrial expansion. The government carried out a currency reform, strengthened financial institutions, and introduced flexible economic planning. In the 1970s Korea began directing fiscal and financial policies toward promoting heavy and chemical industries, consumer electronics, and automobiles. Manufacturing continued to grow rapidly in the 1980s and early 1990s.

In recent years, Korea's economy moved away from the centrally planned, government-directed investment model toward a more market-oriented one. Korea bounced back from the 1997-98 Asian financial crisis with some International Monetary Fund (IMF) assistance, but based largely on extensive financial reforms that restored stability to markets. These economic reforms, pushed by President Kim Dae-jung, helped Korea return to growth, with growth rates of 10% in 1999 and 9% in 2000. The slowing global economy and falling exports slowed growth to 3.3% in 2001, prompting consumer stimulus measures that led to 7.0% growth in 2002. Consumer over-shopping and rising household debt, along with external factors, slowed growth to near 3% again in 2003. Economic performance in 2004 improved to 4.6% due to an increase in exports, and remained at or above 4% in 2005, 2006, and 2007.

Economists are concerned that South Korea's economic growth potential has fallen because of a rapidly aging population and structural problems that are becoming increasingly apparent. Foremost among these structural concerns are the rigidity of South Korea's labor regulations, the need for more constructive relations between management and workers, the country's underdeveloped financial markets, and a general lack of regulatory transparency. Korean policy makers are increasingly worried about diversion of corporate investment to China and other lower wage countries, and by Korea's falling foreign direct investment (FDI). President Lee Myung-bak was elected in December 2007 on a platform that promised to boost Korea's economic growth rate through deregulation, tax reform, increased FDI, labor reform, and free trade agreements (FTAs) with major markets.

North-South Economic Ties

Two-way trade between North and South Korea, legalized in 1988, hit almost $1.8 billion in 2007, much of it related to out-processing or assembly work undertaken by South Korean firms in the Kaesong Industrial Complex (KIC). A significant portion of the total also includes donated goods provided to the North as humanitarian assistance or as part of inter-Korean cooperation projects. According to R.O.K. figures, about 60% of the total trade consisted of commercial transactions, much of that based on processing-on-commission arrangements. The R.O.K. is North Korea's second-largest trading partner.

Since the June 2000 North-South summit, North and South Korea have reconnected their east and west coast railroads and roads where they cross the DMZ and are working to improve these transportation routes. North and South Korea conducted tests of the east and west coast railroads on May 17, 2007 and began cross-border freight service between Kaesong in the D.P.R.K. and Munsan in the R.O.K. in December 2007. Much of the work done in North Korea has been funded by South Korea. The west coast rail and road are complete as far north as the KIC (six miles north of the DMZ), but little work is being done north of Kaesong. On the east coast, the road is complete but the rail line is far from operational. Since 2003, tour groups have been using the east coast road to travel from South Korea to Mt. Geumgang in North Korea, where cruise ship-based tours had been permitted since 1998.

As of September 2008, 79 South Korean firms including apartment-type factories were manufacturing goods in the KIC, employing more than 33,000 North Korean workers. Most of the goods are sold in South Korea; a small quantity is being exported to foreign markets. Ground was broken on the complex in June 2003, and the first products were shipped from the KIC in December 2004. Plans envision 1,500 firms

employing 350,000 workers by 2012. R.O.K.-organized tours to Mt. Geumgang in North Korea began in 1998. Since then, more than a million visitors have traveled to Mt. Geumgang. The R.O.K. suspended tours to Mt. Geumgang in July 2008, however, following the shooting death of a South Korean tourist at the resort by a D.P.R.K. soldier.

FOREIGN RELATIONS

In August 1991, South Korea joined the United Nations along with North Korea and is active in most UN specialized agencies and many international forums. The Republic of Korea also hosted major international events such as the 1988 Summer Olympics, the 2002 World Cup Soccer Tournament (co-hosted with Japan), and the 2002 Second Ministerial Conference of the Community of Democracies.

Economic considerations have a high priority in Korean foreign policy. The R.O.K. seeks to build on its economic accomplishments to increase its regional and global role. It is a founding member of the Asia-Pacific Economic Cooperation (APEC) forum and chaired the organization in 2005.

The Republic of Korea maintains diplomatic relations with more than 170 countries and a broad network of trading relationships. The United States and Korea are allied by the 1953 Mutual Defense Treaty. Korea and Japan coordinate closely on numerous issues. This includes consultations with the United States on North Korea policy.

Korean Peninsula: Reunification and Recent Developments

For almost 20 years after the 1950-53 Korean War, relations between North and South Korea were minimal and very strained. Official contact did not occur until 1971, beginning with Red Cross contacts and family reunification projects in 1985. In the early 1990s, relations between the two countries improved with the 1991 South-North Basic Agreement, which acknowledged that reunification was the goal of both governments, and the 1992 Joint Declaration of Denuclearization. However, divergent positions on the process of reunification and North Korean weapons programs, compounded by South Korea's tumultuous domestic politics and the 1994 death of North Korean leader Kim Il-sung, contributed to a cycle of warming and cooling of relations.

Relations improved again following the 1997 election of Kim Dae-jung. His "Sunshine Policy" of engagement with the D.P.R.K. set the stage for the historic June 2000 inter-Korean summit between President Kim and North Korean leader Kim Jong Il. President Kim was awarded the Nobel Peace Prize in 2000 for the policy, but the prize was somewhat tarnished by revelations of a $500 million dollar "payoff" to North Korea that immediately preceded the summit.

Relations again became tense following the October 2002 North Korean acknowledgement of a covert program to enrich uranium for nuclear weapons. Following this acknowledgement, the United States, along with the People's Republic of China, proposed multilateral talks among the concerned parties to deal with this issue. At the urging of China and its neighbors, the D.P.R.K. agreed to meet with China and the United States in April 2003. In August of that year, the D.P.R.K. agreed to attend Six-Party Talks aimed at ending the North's pursuit of nuclear weapons that added the Republic of Korea, Japan, and Russia to the table. Two more rounds of Six-Party Talks between the United States, the Republic of Korea, Japan, China, and the D.P.R.K. were held in February and June of 2004. At the third round, the United States put forward a comprehensive proposal aimed at completely, verifiably, and irreversibly eliminating North Korea's nuclear weapons programs.

A fourth round of talks was held in two sessions spanning a period of 20 days between July and September 2005. All parties agreed to a Joint Statement of Principles on September 19, 2005, in which, among other things, the D.P.R.K. committed to "abandoning all nuclear weapons and existing nuclear programs and returning, at an early date, to the Treaty on the Non-Proliferation of Nuclear Weapons and to IAEA safeguards." The Joint Statement also committed the United States and other parties to certain actions as the D.P.R.K. denuclearized. The United States offered a security assurance, specifying that it had no nuclear weapons on R.O.K. territory and no intention to attack or invade the D.P.R.K. with nuclear or other weapons. Finally, the United States and the D.P.R.K., as well as the D.P.R.K. and Japan, agreed to undertake steps to normalize relations, subject to their respective bilateral policies. On October 9, 2006, North Korea announced a successful nuclear test, verified by the United States on October 11. In response, the United Nations Security Council, citing Chapter VII of the UN Charter, unanimously adopted Resolution 1718, condemning North Korea's action and imposing sanctions on certain luxury goods and trade of military units, weapons of mass destruction (WMD)-related parts, and technology transfers. The Six-Party Talks resumed in December 2006 after a 13-month hiatus. Following a bilateral meeting between the United States and D.P.R.K. in Berlin in January 2007, another round of Six-Party Talks was held in February 2007. On February 13, 2007, the parties reached an agreement on "Initial Actions for the Implementation of the Joint Statement" in which North Korea agreed to shut down and seal its Yongbyon nuclear facility, including the reprocessing facility, and to invite back International Atomic Energy Agency (IAEA) personnel to conduct all necessary monitoring and verification of these actions. The other five parties agreed to provide emergency energy assistance to North Korea in the amount of 50,000 tons of heavy fuel oil (HFO) in the initial phase (within 60 days) and the equivalent of up to 950,000 tons of HFO in the next phase of North Korea's denuclearization. The six parties also established five working groups to form specific

plans for implementing the Joint Statement in the following areas: denuclearization of the Korean Peninsula, normalization of D.P.R.K.-U.S. relations, normalization of D.P.R.K.-Japan relations, economic and energy cooperation, and a Northeast Asia peace and security mechanism. All parties agreed that the working groups would meet within 30 days of the agreement, which they did. The agreement also envisions the directly-related parties negotiating a permanent peace regime on the Korean Peninsula at an appropriate separate forum. As part of the initial actions, North Korea invited IAEA Director General ElBaradei to Pyongyang in early March for preliminary discussions on the return of the IAEA to the D.P.R.K. The sixth round of Six-Party Talks took place on March 19-23, 2007. The parties reported on the first meetings of the five working groups. At the invitation of the D.P.R.K., Assistant Secretary of State Christopher Hill visited Pyongyang in June 2007 as part of ongoing consultations with the six parties on implementation of the Initial Actions agreement. In July 2007, the D.P.R.K. shut down the Yongbyon nuclear facility, as well as an uncompleted reactor at Taechon, and IAEA personnel returned to the D.P.R.K. to monitor and verify the shut-down and to seal the facility. Concurrently, the R.O.K., China, United States, and Russia initiated deliveries of approximately 50,000 metric tons of HFO per month, with the R.O.K. completing delivery of the first tranche of 50,000 metric tons in August, China the second in September, the United States the third in November, and Russia the fourth in January. These four parties are expected to continue to provide monthly shipments of HFO as the D.P.R.K. continues to implement denuclearization steps. All five working groups met in August and September to discuss detailed plans for implementation of the next phase of the Initial Actions agreement, and the D.P.R.K. invited a team of experts from the United States, China, and Russia to visit the Yongbyon nuclear facility in September 2007 to discuss specific steps that could be taken to disable the facility. The subsequent September 27-30 Six-Party plenary meeting resulted in the October 3, 2007 agreement on "Second-Phase Actions for the Implementation of the Joint Statement."

Under the terms of the October 3 agreement, the D.P.R.K. agreed to disable all existing nuclear facilities subject to abandonment under the September 2005 Joint Statement and the February 13 agreement. The parties agreed to complete by December 31, 2007 a set of disablement actions for the three core facilities at Yongbyon—the 5-MW(e) Experimental Reactor, the Radiochemical Laboratory (Reprocessing Plant), and the Fresh Fuel Fabrication Plant—with oversight from a team of U.S. experts, The D.P.R.K. also agreed to provide a complete and correct declaration of all its nuclear programs in accordance with the February 13 agreement by December 31, 2007 and reaffirmed its commitment not to transfer nuclear materials, technology, or know-how.

In November 2007, the D.P.R.K. began to disable the three core facilities at Yongbyon and complete most of the agreed disablement actions by the end of the year. Due to health and safety concerns, disablement activities at the 5-MW(e) reactor continued beyond December 31, 2007. Assistant Secretary of State Christopher Hill visited Pyongyang again in December 2007 as part of ongoing consultations on the implementation of Second-Phase actions and carried with him a letter from the President of the United States to Kim Jong-il. The D.P.R.K. missed the December 31 deadline to provide a complete and correct declaration, but efforts to secure a declaration continued into January 2008. While the D.P.R.K. missed the December 31 deadline to provide a complete and correct declaration, it provided its declaration to the Chinese, chair of the Six-Party Talks, on June 26, 2008. The D.P.R.K. also imploded the cooling tower at the Yongbyon facility in late June 2008 before international media. Following the D.P.R.K's progress on disablement and provision of a declaration, President Bush announced the lifting of the application of the Trading with the Enemy Act (TWEA) with respect to the D.P.R.K. and notified Congress of his intent to rescind North Korea's designation as a state sponsor of terrorism. President Bush made clear that the United States needs to have a strong regime in place to verify the D.P.R.K.'s declaration before it removes the D.P.R.K. from the list of state sponsors of terrorism. As of August 2008, the United States continued to work with its Six-Party partners to establish such a verification regime, and remained prepared to move forward with taking the D.P.R.K. off of the state sponsors of terrorism list once a verification regime was in place.

U.S.-KOREAN RELATIONS

The United States believes that the question of peace and security on the Korean Peninsula is, first and foremost, a matter for the Korean people to decide.

Under the 1953 U.S.-R.O.K. Mutual Defense Treaty, the United States agreed to help the Republic of Korea defend itself against external aggression. Since that time in support of this commitment, the United States has maintained military personnel in Korea, including the Army's Second Infantry Division and several Air Force tactical squadrons.

To coordinate operations between these units and the over 680,000-strong Korean armed forces, a Combined Forces Command (CFC) was established in 1978. The head of the CFC also serves as Commander of the United Nations Command (UNC) and U.S. Forces Korea (USFK). The current commander is General Burwell Baxter "B.B." Bell.

Several aspects of the security relationship are changing as the U.S. moves from a leading to a supporting role. In 2004, agreement was reached on the return of the Yongsan base in Seoul—as well as a number of other U.S. bases—to the R.O.K. and the eventual relocation of all U.S. forces to south of the Han River. In addition,

the U.S. and R.O.K. agreed to move 12,500 of the 37,500 U.S. troops out of Korea by 2008. At the same time U.S. troops are being redeployed from Korea, the U.S. will bolster combined U.S./R.O.K. deterrent and defense capabilities by providing $11 billion in force enhancements in Korea and at regional facilities over the next four years. As Korea's economy has developed, trade and investment ties have become an increasingly important aspect of the U.S.-R.O.K. relationship. Korea is the United States' seventh-largest trading partner (ranking ahead of larger economies such as France, Italy, and India), and there are significant flows of manufactured goods, agricultural products, services and technology between the two countries. Major American firms have long been major investors in Korea, while Korea's leading firms have begun to make significant investments in the United States.

The implementation of structural reforms contained in the IMF's 1998 program for Korea improved access to the Korean market and improved trade relations between the United States and Korea. Building on that improvement, the United States and Korea launched negotiations on the U.S.-Korea Free Trade Agreement (KORUS FTA) on February 2, 2006. The KORUS FTA was signed by U.S. Trade Representative Susan Schwab and South Korean Trade Minister Kim Hyun-chong on June 30, 2007 and is currently awaiting ratification in the U.S. Congress and the Korean National Assembly. The KORUS FTA is a comprehensive FTA that eliminates virtually all barriers to trade and investment between the two countries. Tariffs on 95% of trade between the two countries will be eliminated within three years of implementation, with virtually all the remaining tariffs being removed within ten years of implementation; the FTA also contains chapters that address non-tariff measures in investment, intellectual property, services, competition policy, and other areas. The KORUS FTA is the largest free trade agreement Korea has ever signed, and the largest free trade agreement for the United States since the North American Free Trade Agreement (NAFTA) in 1992. Economists have projected the FTA will generate billions of dollars in increased trade and investment between the United States and the Republic of Korea, and boost economic growth and job creation in both countries.

TRAVEL

Consular Information Sheet

January 2, 2009

Country Description: The Republic of Korea (South Korea or ROK) is a highly developed, stable, democratic republic with powers shared between the president and the legislature. It has a modern economy, and tourist facilities are widely available. English is often not spoken outside the main tourist and business centers.

The Korea National Tourism Organization (KNTO) can be reached from American and Canada by calling 1-800-868-7567 and has a useful website in English at http://www.tour2korea.com. The KNTO also operates a telephone information service in the Republic of Korea, which traveling or resident Americans in Korea can reach by calling 1330 (02-1330 from cell phones) anywhere in the country. The telephone service has English speakers and is available 24 hours every day throughout the year. The Seoul Help Center (SHC) assists foreigners with an English-speaking help line at (02) 731-6800 or 731-6802. The SHC is located in the Seoul City Hall and is open from 9:30 a.m.–12:30 p.m. and 2:30 -5:30 p.m.

Entry Requirements: A passport is required. U.S. passport holders may enter the Republic of Korea without a visa for a stay of up to 90 days for tourism or business. When staying for more than 90 days or for any purpose other than tourism or business, the U.S. passport holder must obtain a visa prior to entry. Americans visiting Korea for employment or profit-making purposes, teaching English, or planning to stay more than 90 days must obtain a visa at a Korean embassy or consulate abroad. Generally, individuals staying in Korea for longer than 90 days must also apply for an Alien Registration Card, once in Korea. Individuals who desire to stay longer than their authorized period of stay must apply to Korean Immigration for an extension in advance of the expiration of their authorized period of stay. Individuals who stay in Korea longer than the period authorized by Korean Immigration without applying for an extension are subject to fines and may be required to pay the fines before departing the country. Changes of status from one type of visa to another (from tourism to teaching, for example) are normally not granted in the Republic of Korea and must be obtained at a Korean embassy or consulate in another country after departing Korea.

Active-duty U.S. military personnel may enter the Republic of Korea under the Status of Forces Agreement (SOFA) with proper Department of Defense (DOD) identification and travel orders. Every civilian accompanying the force (including DOD civilian employees, invited contractors, and family members) must have a valid passport to enter Korea and should obtain an A-3 SOFA visa prior to arrival in Korea.

Active duty military personnel should obtain a tourist passport prior to leaving the U.S. to accommodate off-duty travel elsewhere in Asia. DOD travelers should consult the DOD Foreign Clearance Guide before leaving the United States.

Exit permits are not required to leave Korea. However, if a parent requests through the Korea Immigration Service that a travel restriction be placed on a child, the child is likely to be prevented from departing Korea.

For the most current visa information, contact the Consular Section of the Embassy of the Republic of Korea at 2320 Massachusetts Avenue N.W., Washington, D.C. 20008, telephone (202) 939-5660, or see the Korean Embassy website at http://www.koreaembassyusa.org. Republic of Korea consulates are also located in Atlanta, Boston, Chicago, Guam, Honolulu, Houston, Los Angeles, New York City, San Francisco, and Seattle. The Korean Ministry of Foreign Affairs and Trade has a website directory of all Korean diplomatic missions worldwide in Korean and in English at http://www.mofat.go.kr/index.jsp.

Safety and Security: U.S. citizens in the Republic of Korea should review their own personal security practices, be alert to any unusual activity around their homes or businesses, and report any significant incidents to local police (tel: 112; from a cell phone: 02-112).

Demonstrations, protests, and vigils occur frequently, with participants often protesting major Korean social issues such as the following: the presence of U.S. military forces in Korea; U.S. military base relocations in Korea; labor accords; discussions regarding a Free Trade Agreement between Korea and the United States; U.S. involvement in the war in Iraq; and the Republic of Korea's decision to maintain troops in Iraq; and, more recently, the opening of the Korean market to U.S. beef. While the majority of the political, labor, and student demonstrations and marches are non-violent, some have on occasion become confrontational. Even demonstrations intended to be peaceful can escalate into violence. U.S. citizens are therefore urged to avoid areas near demonstrations and to exercise caution if within the vicinity of any protests.

For the latest security information, Americans traveling abroad should regularly monitor the State Department's Internet web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the United States and Canada, or for callers outside the United States and Canada, a regular toll-line at 202-501-4444.

Crime: Although the crime rate in the Republic of Korea is low, there is a higher incidence of pick-pocketing, purse snatching, assault, hotel room and residential burglary, and residential crime in major metropolitan areas, such as Seoul and Busan, than elsewhere in Korea. U.S. citizens are

more likely to be targeted in known tourist areas, such as Itaewon (near the U.S. Army Garrison in the Yongsan area) and large market areas downtown. Incidents of rape have been reported in popular nightlife districts in Seoul, as well as in the victims' residences.

Bar and street fights as well as occasional harassment of Westerners have also been reported in nightlife districts in Seoul. Travelers should exercise caution when traveling alone at night and should use only legitimate taxis or public transportation. Travelers may reduce the likelihood of becoming a crime victim by exercising the same type of security precautions they would take when visiting any large city in the United States.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm and at http://www.ustr.gov.

Information for Victims of Crime: The emergency number to reach the police anywhere in the Republic of Korea, the local equivalent to the U.S. "911" emergency line, is 112 (02-112 from a cell phone). Foreigners who do not speak Korean can be connected to an English-speaking interpreter on a 24-hour, seven-day-a-week basis.

If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the U.S. Embassy for assistance. The Embassy staff can assist you to find appropriate medical care, to contact family members or friends, and to get funds transferred.

Although the investigation and prosecution of the crime are solely the responsibility of local authorities, consular officers can help you understand the local criminal justice process and provide a list of attorneys, if needed.

The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the U.S. Embassy.

Medical Facilities and Health Information: Hospitals in Korea are generally well-equipped with state-of-the-art diagnostic and therapeutic equipment. High quality general and specialty dental care is available in Seoul. Western-style medical facilities are available in major urban areas of Seoul, Busan, Daegu, and a few other large cities. However, not all doctors and staff in these major urban areas are proficient in English. Most clinics in rural areas do not have an English-speaking doctor. A list of hospitals and medical specialists who speak English is available at the U.S. Embassy in Seoul or on the Embassy's web site at http://korea.usembassy.gov/health.html.

Pharmacies are first-rate and most prescribed medications, except psychotropic medications, can be obtained with a prescription. Travelers taking any psychotropic or controlled medications should bring a sufficient supply as well as a copy of the prescription for Korean customs clearance at the airport.

Korean ambulances do not carry sophisticated medical equipment and the ambulance personnel do not have the same level of emergency medical training as in the United States. However, ambulances operated by the fire department (dial 119) will respond very quickly and take patients to the nearest hospital. For medical evacuation to points outside Korea, SOS International is located in Seoul (tel: 02- 3140-1902, web site: www.internationalsos.com.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad, consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Korea does not have a written policy regarding entry to Korea for foreigners with HIV/AIDS. However, Section 11 of the Korean Immigration law stipulates that an immigration officer has the right to deny entry to those who may have communicable diseases.

Also, E-6 visa applicants such as singers, dancers, or other entertainment workers have to submit HIV/AIDS test results in order to be eligible for that visa category.

Medical Insurance: Korean hospitals generally do not accept foreign medical insurance and expect advance payment for services in the form of cash or credit cards from foreigners. The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and if it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: The Republic of Korea's roads are well paved, traffic lights are functional, and most drivers comply with basic traffic laws. However, Korea has a significantly higher traffic fatality rate than does the United States. Causes of accidents include excessive speed, frequent lane changes, running of red lights, aggressive bus drivers, and weaving motorcyclists. Pedestrians should be aware that motorcyclists sometimes drive on the sidewalks and drivers of all types of vehicles do not always yield to pedestrians in marked crosswalks. It is safer to use pedestrian underpasses and overpasses where available.

Traffic laws in the Republic of Korea differ from traffic laws in the United States in some respects. Left-hand turns are generally prohibited except where a green arrow indicates otherwise. Drivers may turn right on a red light after coming to a complete stop.

Seat belts are mandatory. Children riding in the front seat of vehicles must wear a seat belt or use an appropriate child car seat. Passengers on motorcycles must wear protective helmets. An international driving permit issued in the U.S. by the American Automobile Association (AAA) or the American Automobile Touring Alliance (AATA) is required of short-term visitors who drive in Korea. Otherwise, drivers must have a Korean driver's license.

In all accidents involving an automobile and a pedestrian or motorcycle, the driver of the automobile, regardless of citizenship, is presumed to be at fault. Police investigations of traffic accidents usually involve long waits at police stations. Police may request to hold the passport of a foreigner involved in a traffic accident if there is any personal injury or a dispute about the cause of the accident. Criminal charges and heavy penalties are common in accidents involving injury, even if negligence is not proven.

Persons arrested in accidents involving serious injury or death may be detained until the conclusion of the police investigation and legal process. Driving under the influence of alcohol is a serious offense. Drivers in the Republic of Korea may wish to carry a disposable camera to document any traffic accidents, even minor ones.

For specific information concerning Korean driver's permits, vehicle inspection, road tax, and mandatory insurance, please contact the Korea National Tourism Organization office in Fort Lee, N.J., (telephone 1-800-868-7567) or check http://www.tour2korea.com.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of the Republic of Korea's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for oversight of the Republic of Korea's air carrier operations. For more information, visit the FAA's web site at http://www.faa.gov.

Dual Nationality: The Government of the Republic of Korea does not recognize dual citizenship. An individual is a citizen of the Republic of Korea if his or her name appears on the Korean Family Census Register. The Korean Government requires persons with a claim to dual citizenship to choose or reject Korean nationality by December 31 of the year the individual turns 21 years old.A person's name is not automatically removed from the Korean Family Census Register simply because he or she is an American citizen.

It is the obligation of an American citizen to inform the Korean government of his or her American citizenship for the purposes of removing his or her name from the Korean Family Census Register. Any male whose name appears on the Korean Family Census Register must fulfill his two-year military obligation unless he has surrendered his Korean nationality before March 30 of the year he turns 18 years old.

An American male in this situation must notify Korean authorities of his parents' immigration status, renounce his Korean citizenship, and remove his name from the Korean Family Census Register. If an American male fails to remove his name from the Korean Family Census Register, Korean authorities may require that he serve in the Korean military if he lives in Korea or visits Korea during conscription age (18 to 35 years of age).

Under a law that went into effect on May 26, 2005, men who have dual citizenship may be required to serve in the military before they can give up their Korean citizenship. Women are not required to serve in the military.

The 2005 law affects male U.S. citizens of Korean descent in different ways.

- A Korean male born in Korea who emigrates to the U.S. and becomes a naturalized American citizen loses his Korean citizenship and therefore has no military obligations in Korea.
- A male who was born in the U.S. whose Korean parents were U.S. citizens at the time of his birth does not have Korean military obligations.
- A male who was born in the U.S. whose name is on the Korean Family Census Register and whose parents were not American citizens at the time of his birth but immigrated to and live in the U.S. is not obligated to serve in the Korean military if he renounces his Korean citizenship prior to March 30 of the year he turns 18 years of age.
- A male who was born in the U.S. and is on the Korean Family Census Register, whose Korean citizen parents lived only temporarily outside Korea, may not renounce his Korean citizenship until he completes his service in the Korean military.
- A U.S. citizen male who was born in and lives in Korea and is on the Korean Family Census Register may not renounce his Korean citizenship until he serves in the Korean military.

After fulfilling his military service, a dual national has two years to choose his nationality before he loses his Korean citizenship.

There have been several instances in which young American men of Korean descent—who were born in and lived all of their lives in the United States—arrived in Korea as tourists only to be drafted into the Republic of Korea army. At least two of these cases involved individuals whose names had been recorded on the Korean Family Census Register without their knowledge.

U.S. military members should contact the U.S. Forces Korea (USFK) Legal Office prior to making plans to travel to Korea, whether for official or personal purposes. Direct contact is Mr. Hyun S. Kim, DSN (315) 738-7175, commercial (82-2) 7918-7175, e-mail hyun.s.kim1@korea.army.mil.

Customs Regulations: Persons traveling to/from Korea or transiting Korea to/from other countries should be aware that the Republic of Korea's customs authorities may enforce strict regulations concerning the temporary importation into or export from Korea of items such as firearms, ammunition, explosives, narcotics and prescription drugs, non-prescription health supplements, radio equipment, and gold, as well as books, other printed material, and videos or audio recordings that might be considered subversive to national security, obscene, or in any way harmful to the public interest and cultural property.

Furthermore, the Republic of Korea has customs laws and regulations to prevent the spread of livestock diseases, such as hoof-and-mouth disease, avian influenza, etc. The following products must be declared to Korean customs officials upon arrival: live animals, such as dogs, cats, pet birds, etc.; animal products, such as antlers, bone, blood meal, etc.; beef, pork, mutton, chicken meat and processed meat products, such as sausages, ham, meat jerky, boiled meat, canned products, boiled eggs, etc.; processed dairy products, such as milk, cheese, butter, etc.; processed egg products, such as egg, egg white, egg powder, etc. For further inquires, please send an email to nvrqs@nvrqs.go.kr.

U.S. Customs and Border Protection lists items whose entry into the Unites States is prohibited or restricted at http://www.cbp.gov. For additional information please see the section above on Crime.

Passport Seizures, Exit Bans, And Commercial Disputes: The Government of the Republic of Korea sometimes seizes the passports and blocks departure from Korea of foreigners involved in commercial disputes. While the U.S. Government may reissue a passport to a U.S. citizen who applies for one in such circumstances, the Korean exit ban remains in effect, thereby preventing departure.

Working In The Republic Of Korea: Americans going to the Republic of Korea to teach, model, or work for a company (part-time or full-time, paid or unpaid) must enter Korea using the appropriate work visa. Changes of status from any other visa status to a work visa are not granted within the country. Any foreigner who begins work without the appropriate visa is subject to arrest, costly fines, and deportation. Persons working without a valid work permit and who have a contractual dispute with their employers have little or no entitlement to legal recourse under Korean law.

Teaching English: The government of the Republic of Korea changed its immigration policies effective December 15, 2007, to require that criminal records checks and a health certificate be submitted with E-2 English teaching visa applications or extensions. The U.S. Embassy in South Korea does not provide a records check or fingerprinting service, nor can the Embassy authenticate records checks or health certificates. If you have further questions, please contact the Korea Immigration Service, Border Control Division, at (within Korea) 500-9116, 500-9117, or 500-9118, or consult their website: http://seoul.immigration.go.kr/HP/IMM80/index.do. More detailed information on the procedure is also available on the U.S. Embassy Seoul consular website, at www.asktheconsul.org.

The U.S. Embassy in Seoul receives many complaints from U.S. citizens who enter the Republic of Korea to teach English at private language schools ("hagwons"). The most frequent complaints are that the schools and/or employment agencies misrepresent salaries, working conditions, living arrangements, and other benefits, including health insurance, even in the written contracts. There have also been some complaints of physical assault, threats of arrest/deportation, and sexual harassment. Some U.S.-based employment agencies have been known to misrepresent contract terms, employment conditions, or the need for an appropriate work visa. Since 2005, Korean police have investigated a number of foreign teachers for document fraud. Several Americans have been arrested and charged with possession of fraudulent university diplomas that were used to obtain employment in Korea. Please see our comprehensive website section on Teaching English in Korea at http://seoul.usembassy.gov.

Disaster Preparedness: Legally, the Democratic People's Republic of Korea (North Korea—the DPRK) and the Republic of Korea remain in a state of war. Peace has been maintained on the Korean peninsula under an armistice for more than 50 years. In the last few years, political, economic, and social contacts between the Democratic People's Republic of Korea and the Republic of Korea have increased significantly. However, the possibility of military hostilities that could necessitate the evacuation of U.S. citizens from the Republic of Korea cannot be excluded.

The U.S. Government has developed a Non-combatant Evacuation Operation (NEO) plan for the evacuation of U.S. citizens from Korea in an emergency. A guide for U.S. citizens about the NEO plan is available online at http://korea.usembassy.gov/emergency_evacuation.html, or at the U.S. Embassy in Seoul.

The U.S. Government does not provide protective equipment to private American citizens in the Republic of Korea. As always, U.S. citizens should review their own personal security practices and make their own decisions with regard to those precautions that they might take to avoid danger. Those who may wish to acquire protective equipment for personal use should contact commercial vendors who may be able to provide such equipment.

If the Department of State becomes aware of any specific and credible threat to the safety and security of U.S. citizens, that information will be provided to the American public at large. During the monsoon season (June-August) and the typhoon (hurricane) season (May-November), there may be heavy rains and flood-

ing in Korea. General information about natural disaster preparedness is available from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offences. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Persons violating Korean laws, even unknowingly, may be expelled, arrested, or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in the Republic of Korea are severe, and convicted offenders can expect long jail sentences and heavy fines. American citizens in Korea have been arrested for past use of illegal drugs based on urine tests, hair samples, or other tests. Korean authorities frequently arrest Americans on drug charges by scanning suspicious packages sent through the mail system and by using information provided by other persons charged with drug possession or use.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living in or visiting the Republic of Korea are encouraged to register through the State Department's travel registration web site and obtain updated information on travel and security within the Republic of Korea. American citizens may also sign up for warden messages and monthly newsletters by providing their email address at http://seoul.usembassy.gov.

The U.S. Embassy street address is 32 Sejong-no, Jongno-gu, Seoul, Republic of Korea, 110-710. The APO address is Unit 15550, APO AP 96205-5550. Telephone (82-2) 397-4114 (from a cell phone in Korea: 02-397-4114); fax (82-2) 397-4101. Please visit the U.S. Embassy Seoul's consular web site at http://seoul.usembassy.gov.

Intercountry Adoption

August 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: South Korea's special adoption law No. 2977, Section 9 (A), requires the use of an adoption agency for overseas adoption of Korean orphans, and Section 10 (A) provides that such agencies must be authorized by the Ministry of Health and Social Affairs.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority: The government office responsible for adoptions in South Korea is the Ministry of Health and Social Welfare. The address is as follows:

Population & Children's Policy
Anyang Construction Tower 3rd Fl.
1112-1 Dalan Dong,
Tongan Gu, Anyang
Tel: +82-31-440-9654

Eligibility Requirements for Adoptive Parents: South Korean authorities have advised the U.S. Embassy in Seoul of the following criteria for selecting adoptive parents. These criteria have been established by the Ministry of Health and Social Welfare. They are administrative policy guidelines and not legal requirements, but local adoption agencies can be expected to follow them:

- The adoptive parents must be eligible to adopt under the laws of their country or state of residence.
- Single parents are not eligible.
- The couple should be married for at least three years and be between the ages of 25 and 44. Korean authorities usually require that both adoptive parents in overseas adoptions be younger than 45 years old; however, they may make exceptions in some cases. The following three factors, while unofficial and applied differently from case to case, may be considered when making exceptions to the age limit: 1. At least one parent is under 45; 2. The adoptive parents have previously adopted a Korean orphan; 3. The parents are willing to adopt an orphan with serious medical problems.
- The adoptive couple should have no more than five children. This number includes the child or children to be adopted.
- The couple should not have an age difference of more than 15 years.
- The income of the adoptive couple should be higher than the national average of their country and sufficient to raise the child.

Residency Requirements: Parents living in US don't need residency in Korea to adopt a child from Korea. They only need to contact one of US adoption agencies affiliated with Korean adoption agencies authorized by Korean government.

Time Frame: The period of time between when a couple begins pre-adoption processing and when the child arrives in the United States is anywhere between one and four years. This time frame includes the total timing for processing in the U.S. and in Korea. In the U.S., the adoptive parents should have an Application for Advance Processing of Orphan Petiton (I-600A) filed and approved by the Department of Homeland Security. Following approval of the I-600A, processing time in Korea will be about 5 to 6 months.

Effective January 1, 2007, Korean law will require a five-month waiting period before an infant orphan can be considered for intercountry adoption. This new requirement, however, is not expected to lengthen adoptive parents' overall waiting time.

Adoption Fees: According to the Korean Ministry of Health and Social Welfare and Korean adoption agencies, the total cost is between $9,500 and $10,000. This includes:

- Child care fees (including payment for foster mother)
- Medical expenses
- Legal processing fees
- Administrative fees
- Social worker payment and counseling fees
- Post adoption service fee

Adoption Agencies and Attorneys: The Korean government requires prospective adoptive families to work with agencies that have been approved by the Korean government. Please review current reports online at http://travel.state.gov/family for a list of agencies.

Adoption Procedures: Korean adoption is always conducted through one of the aforementioned authorized adoption agencies. Accordingly, the first step for couples who wish to adopt a Korean child would be to contact the adoption agency.

The procedure with the adoption agency is generally the following:

- Pre-adoption counseling
- Submission of application for adoption
- A home study
- Child assignment
- Application for child's overseas adoption to the Korean government
- Applications for child's passport and visa
- Fly to the adoptive parents

Documentary Requirements: Most of the documents required by the Korean government will be prepared by the adoption agencies. Adoption agencies will require from the would-be parents the following documents:

- Home study report
- Affidavit of support (Form I-864)
- Adoptive parents' birth certificates
- Notice of petition approval (Form I-797)

Embassy of Korea
Consular Section
2450 Massachusetts Ave., NW
Washington, DC 20008
Tel: 202-939-5600
Web address:
http://www.koreaemb.org

Korea also has Consulates in Agana (Guam), Anchorage, Atlanta, Boston, Chicago, Cleveland, Denver, Detroit, Evanston (Illinois), Ft. Lauderdale, Honolulu, Houston, Kansas City (Kansas), Los Angeles, Minneapolis, Mobile, New Orleans, New York, Oklahoma City, Philadelphia, Phoenix, Portland (Oregon), San Francisco, San Juan, Seattle and St. Louis.

U.S. Immigration Requirements: Prospective adopting parents are strongly encouraged to consult USCIS publication M-249, *The Immigration of Adopted and Prospective Adoptive Children*, as well as the Department of State publication, *Intercountry Adoptions*. Please see the *Intercountry Adoption* section of this book for more details and review current reports online at http://adoption.state.gov.

U.S. Embassy
32 Sejong-Ro, Jongno-gu
Seoul, Korea
Tel: 011-82-2-397-4114
Fax: 011-82-2-738-8845
Web:
http://usembassy.state.gov/seoul
Mailing Address
U.S. Embassy
Unit 15550
APO AP 96205-5550

Doctors: In addition to the designated panel physicians who must be consulted as part of the U.S. immigrant visa process, the U.S. Embassy in Seoul maintains current lists of doctors and sources for medicines, should either a prospective parent or prospective adoptive child experience health problems while in Korea.

Additional Information: Specific questions about adoption in South Korea may be addressed to the U.S. Embassy in Seoul. General questions regarding intercountry adoption may be addressed to the Office of Children's Issues, U.S. Department of State, CA/OCS/CI, SA-29, 4th Floor, 2201 C Street, NW, Washington, D.C. 20520-4818, toll-free Tel: 1-888-407-4747.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: South Korea is not a party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between South Korea and the United States dealing with international parental child abduction. American citizens who travel to South Korea place themselves under the jurisdiction of local courts. American citizens planning a trip to South Korea with dual national children should bear this in mind.

Custody Disputes: In South Korea, parents who are legally married share the custody of their children. If they are not married, custody is normally granted to the mother unless there are known facts of inappropriate behavior, or mental or social problems.

Enforcement of Foreign Judgments: Custody orders and judgments of foreign courts are not enforceable directly under Korean law. However, under Article 203 of the Criminal Code, an applicant can request recognition of foreign court orders.

Visitation Rights: In cases where legal custody has been granted and the judgment has been rendered, the non-custodial parent can petition the court for visitation rights within the court ordered decision or come to an oral agreement with the custodial parent.

Dual Nationality: Dual U.S.-Korean nationality is recognized under Korean law until the age of 22, when the dual national must choose either Korean or U.S. citizenship. Dual-national males are subject to mandatory military service in South Korea if they do not make a decision on their nationality before the age 18.

Passports for Minors and the Children's Passport Issuance Alert Program: For more information on these topics, see the *International Parental Child Abduction* section of this publication and review current reports from the U.S. Department of State at www.travel.state.gov/childabduction.

Travel Restrictions: No exit visas are required to leave Korea. However, if a parent requests through the Korean Immigration Office that a travel restriction be placed on a child, the child may be prevented from departing Korea.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation (FBI). Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp.ncjrs.org. Persons who wish to pursue a child custody claim in a Korean court should retain an attorney in Korea. The American Embassy in Korea maintains a list of attorneys willing to represent American clients. A copy of this list may be obtained by requesting one from the Embassy at:

U.S. Embassy in Seoul
Consular Section
82 Sejong-ro, Chongro-ku
Seoul 110-710
Republic of Korea
Telephone: 011-82-2-397-4114
Fax: 011-82-2-397-4101
Web site:
http://www.asktheconsul.org

The workweek for the Embassy is Monday, Tuesday, Thursday and Friday from 9:30AM to 11:30AM and 1:30PM to 3:30PM. The Embassy is closed on Wednesdays.

Questions involving Korean law should be addressed to a Korean attorney or to the Embassy of the Republic of Korea in the United States at:

Embassy of the Republic of Korea
2320 Massachusetts Avenue, NW
Washington, DC 20008
Telephone: (202) 939-5663/60

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at (202) 736-9090 or visit its web site on the Internet at http://travel.state.gov.

KOSOVO

Compiled from the July 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Kosovo

PROFILE

Geography

Area: 10,887 square kilometers (4,203 square miles), slightly smaller than Connecticut.

Capital: Pristina.

Terrain: Varied.

Climate: Temperate.

People

Nationality: Adjective—Kosovo national.

Population (2000 est.): 2.1 million.

Ethnic groups: 90% ethnic Albanians, 6% ethnic Serbs, 2% Bosniaks, Gorani, 1.5% Roma, Ashkali, Egyptians, 1% Turks.

Religion: The majority ethnic Albanian population, as well as the Bosniak, Gorani, and Turkish communities, and some of the Roma/Ashkalia/Egyptian communities are adherents of Islam. The ethnic Serb population is largely Serb Orthodox. Approximately 3% of ethnic Albanians are Roman Catholic.

Languages: Albanian (official), Serbian (official), Roma, Turkish (official only in municipality of Prizren), Bosniak, English.

Education: Adult literacy rates (2004 est.): 94.12% (men 97.30%, women 91.30%). Enrollment (2003 est.)—96% of children ages 7-15 enrolled in primary school.

Health: Infant mortality rate—23.7/1000. Total fertility rate, births per woman (2000 est.)—2.7. Life expectancy (2003 est.)—75 years.

Government

Type: Republic.

Constitution: The Kosovo Assembly approved a new constitution on April 9, 2008. It came into force on June 15, 2008.

Branches: Executive—president (head of state); prime minister (head of government). Legislative—unicameral Assembly (120 seats, 4-year terms; 100 seats generally elected, 10 seats reserved for ethnic Serbs, 10 seats reserved for other ethnic minorities). Judicial—Supreme Court.

Subdivisions: 30 municipalities (names given in Albanian, then Serbian)—Leposaviq (Leposavic), Novo Brdo (Novobërdë), Podujevo (Podujevë), Istog (Istok), Kamenice (Kamenicë), Deçan (Decani), Gllogovc (Glogovac), Ferizaj (Uroševac), Fushë Kosovë (Kosovo Polje), Gjakovë (Đakovica), Gjilan (Gnjilane), Kaçanik (Kacanik), Obiliq (Obilic), Klinë (Klina), Lipjan (Lipljan), Malishevë (Mališevo), Mitrovicë (Mitrovica), Pejë (Pec), Prishtinë (Priština), Prizren (Prizren), Rahovec (Orahovac), Skenderaj (Srbica), Dragash (Dragaš), Shtërpcë (Štrpce), Shtime (Štimlje), Suharekë (Suva Reka), Viti (Vitina), Vushtrri (Vucitrn), Zubin Potok (Zubin Potok), Zvecan (Zveçan).

Political parties: Albanian Christian Democratic Party of Kosovo (PShDK) [Mark KRASNIQI]; Alliance for the Future of Kosovo (AAK) [Ramush HARADINAJ]; Alliance of Independent Social Democrats of Kososvo and Metohija (SDSKIM) [Ljubisa Zivic]; Autonomous Liberal Party (SLS) [Slobodan PETROVIC]; Bosniak Vakat Coalition (DSV) [Sadik Idrizi]; Citizens' Initiative of Gora (GIG) [Murselj HALJILJI]; Democratic League of Dardania (LDD) [Nexhat DACI]; Democratic League of Kosovo (LDK) [Fatmir SEJDIU]; Democratic Party of Ashkali of Kosovo (PDAK) [Sabit RAHMANI]; Democratic Party of Kosovo (PDK) [Hashim THACI]; Kosovo Democratic Turkish Party (KDTP) [Mahir YAGCILAR]; New Democratic Initiative of Kosovo (IRDK) [Xhevdet NEZIRAJ]; New Democratic Party (ND) [Branislav GRBIC]; New Kosovo Alliance (AKR) [Behxhet PACOLLI]; Popular Movement of Kosovo (LPK) [Emrush XHEMAJLI]; Reform Party Ora [Teuta SAHATQIJA]; Serb National Party (SNS) [Mihailo SCEPANOVIC]; Serbian Kosovo and Metohija Party (SKMS) [Dragisa MIRIC]; United Roma Party of Kosovo (PREBK) [Haxhi Zylfi MERXHA]; Democratic Action Party (SDA) [Numan BALIC]; Serbian List for Kosovo and Metohija [Oliver IVANOVIC]; Serbian National Council of Northern Kosovo and Metohija (SNV) [Milan IVANOVIC]; Democratic Party of Bosniaks [Dzezair MURATI]; Ser-

bian Democratic Party of Kosovo and Metohija (SDS KiM) [Slavisa PETKOVIC].
Suffrage: Universal at age 18.

Economy

GDP (2007 est.): $4 billion.
Per capita GDP at PPP (2007 est.): $1,755.
GDP composition by sector: Agriculture 25%, industry 20%, services 55%.
Agriculture: Products—Fruits and vegetables (potatoes, berries), wheat, corn, wine, beef.
Industry: Mineral mining, energy, telecommunications, forestry, agriculture, metal processing, construction materials, base metals, leather, machinery, appliances.
Income and employment (2001 est.): 53% of the Kosovo labor force is unemployed; 50.3% of Kosovo's citizens live below the poverty line, and 12% live in extreme poverty.

HISTORY

Kosovo has been inhabited since the Neolithic Era. During the medieval period, Kosovo became home to many important Serb religious sites, including many architecturally significant Serbian Orthodox monasteries. It was the site of a 14th-century battle in which invading Ottoman Turks defeated an army led by a Serbian Prince named Lazar.

The Ottomans ruled Kosovo for more than four centuries, until Serbia acquired the territory during the First Balkan War in 1912-13. First partitioned in 1913 between Serbia and Montenegro, Kosovo was then incorporated into the Kingdom of the Serbs, Croats, and Slovenes (later named Yugoslavia) after World War I. During World War II, parts of Kosovo were absorbed into Italian-occupied Albania. After the Italian capitulation, Nazi Germany assumed control over Kosovo until Tito's Yugoslav Partisans entered at the end of the war.

After World War II, Kosovo became an autonomous province of Serbia in the Socialist Federal Republic of Yugoslavia (S.F.R.Y.). The 1974 Yugoslav Constitution gave Kosovo (along with Vojvodina) the status of a Socialist Autonomous Province within Serbia. As such, it possessed nearly equal rights as the six constituent Socialist Republics of the S.F.R.Y. In 1981, riots broke out and were violently suppressed after Kosovo Albanians demonstrated to demand that Kosovo be granted full Republic status.

The Kosovo Conflict and NATO Intervention

In the late 1980s, Slobodan Milosevic propelled himself to power in Belgrade by exploiting the fears of the Serbian minority in Kosovo. In 1989, he eliminated Kosovo's autonomy and imposed direct rule from Belgrade. Belgrade ordered the firing of most ethnic Albanian state employees, whose jobs were then assumed by Serbs.

In response, Kosovo Albanian leaders began a peaceful resistance movement in the early 1990s, led by Ibrahim Rugova. They established a parallel government funded mainly by the Albanian diaspora. When this movement failed to yield results, an armed resistance emerged in 1997 in the form of the Kosovo Liberation Army (KLA). The KLA's main goal was to secure the independence of Kosovo.

In late 1998, Milosevic unleashed a brutal police and military campaign against the KLA, which included widespread atrocities against civilians. As Milosevic's ethnic cleansing campaign progressed, over 800,000 ethnic Albanians were forced from their homes in Kosovo. Intense international mediation efforts led to the Rambouillet Accords, which called for Kosovo autonomy and the insertion of NATO troops to preserve the peace. Milosevic's failure to agree to the Rambouillet Accords triggered a NATO military campaign to halt the violence in Kosovo. This campaign consisted primarily of aerial bombing of the Federal Republic of Yugoslavia (F.R.Y.), including Belgrade, and continued from March through June 1999. After 78 days of bombing, Milosevic capitulated. Shortly thereafter, the UN Security Council adopted Resolution 1244 (1999), which suspended Belgrade's governance over Kosovo, and under which Kosovo was placed under the administration of the United Nations Interim Administration Mission in Kosovo (UNMIK), and which authorized a NATO peacekeeping force. Resolution 1244 also envisioned a political process designed to determine Kosovo's future status.

As ethnic Albanians returned to their homes, elements of the KLA conducted reprisal killings and abductions of ethnic Serbs and Roma in Kosovo. Thousands of ethnic Serbs, Roma, and other minorities fled from their homes during the latter half of 1999, and many remain displaced.

Kosovo Under UN Administration

The UN established the UN Interim Administration Mission in Kosovo (UNMIK), under the control of a Special Representative of the Secretary General (SRSG). In 2001, UNMIK promulgated a Constitutional Framework that provided for the establishment of Provisional Institutions of Self-Government (PISG).

Under UNMIK's guidance, Kosovo established new institutions (both at the municipal and central levels), held free elections, and established a multi-ethnic Kosovo Police Service (KPS). The KLA was demobilized, with many of its members incorporated into the Kosovo Protection Corps (KPC), a civilian emergency services organization. UNMIK gradually turned over more governing competences to local authorities.

In March 2004, Kosovo experienced its worst inter-ethnic violence since the Kosovo war. The unrest in 2004 was sparked by a series of minor events that soon cascaded into large-scale riots. Kosovo Serb communities and Serbian Orthodox churches were targeted in the violence.

After many years of international administration, Kosovo Albanian authorities continued to press the

international community to begin a process to define Kosovo's future status. In October 2004, Kosovo held elections for the second 3-year term of the Kosovo Assembly. For the first time, Kosovo's own Central Election Commission administered these elections, under Organization for Security and Cooperation in Europe (OSCE) guidance. The main ethnic Albanian political parties were the same as in the 2001 elections, but with the addition of the new party ORA, led by Veton Surroi, and two new Kosovo Serb parties: the Serbian List for Kosovo and Metohija (SLKM) led by Oliver Ivanovic, and the Citizens Initiative of Serbia led by Slav-

isa Petkovic. In contrast to the previous Kosovo Government, this election produced a "narrow" coalition of two parties, the LDK and AAK. The December 3, 2004 inaugural session of the Kosovo Assembly re-elected Ibrahim Rugova as President and Ramush Haradinaj as Prime Minister.

In March 2005, Haradinaj resigned as Prime Minister after he was indicted for war crimes by the International Criminal Tribunal for the former Yugoslavia (ICTY); Haradinaj voluntarily surrendered to authorities and traveled to The Hague to face charges. (Haradinaj was acquitted of all charges on April 3, 2008.) The Kosovo Assembly subsequently elected Bajram Kosumi (AAK) as Prime Minister; Kosumi's resignation in March 2006 led to his replacement with Agim Ceku. After President Rugova's death in January 2006, he was replaced by Fatmir Sejdiu.

Kosovo's Status Process

In 2005, a UN envoy, Norwegian diplomat Kai Eide, was appointed to review progress in Kosovo. Eide reported uneven progress on many key issues, especially with respect to promoting multi-ethnicity in Kosovo, but said that there was no advantage to be gained by further delaying a future status process.

In November 2005, the Contact Group (France, Germany, Italy, Russia, the United Kingdom, and the United States) produced a set of "Guiding Principles" for the resolution of Kosovo's future status. Some key principles included: no return to the situation prior to 1999, no changes in Kosovo's borders, and no partition or union of Kosovo with a neighboring state. The Contact Group later said that Kosovo's future status had to be acceptable to the people of Kosovo.

The Ahtisaari Process

In November 2005, United Nations Secretary General Kofi Annan appointed Martti Ahtisaari, former president of Finland, to lead a future status process. Special Envoy Ahtisaari's diplomatic efforts addressed a broad range of issues important to Kosovo's future, including decentralization of local government, protecting Kosovo's cultural and religious heritage in Kosovo, economic issues, and safeguarding the rights of minorities. Over the course of 2006 and early 2007, Ahtisaari brought together officials from Belgrade and Pristina to discuss these practical issues and the question of status itself.

Ahtisaari subsequently developed a comprehensive proposal for Kosovo's future status, which set forth a series of recommendations on Kosovo's democratic governance and substantial protections for minorities. Ahtisaari also recommended that Kosovo become independent, subject to a period of international supervision. He proposed that a new International Civilian Office (ICO) be established to supervise Kosovo's implementation of its obligations under the Ahtisaari Plan. A European Union (EU)-led rule of law mission (subsequently named EULEX) would also be deployed to focus on the police and justice sector, while a NATO-led stabilization force would continue to provide for a safe and secure environment. Pristina accepted the Ahtisaari recommendations, but Belgrade rejected them.

On April 3, 2007, Ahtisaari presented his plan to the UN Security Council. Due to Russian opposition, the Security Council could not reach agreement on a new Security Council resolution that would pave the way for the implementation of the Ahtisaari recommendations.

After several months of inconclusive discussions in the Security Council, the Contact Group agreed to support a new period of intensive engagement to try to find an agreement between Belgrade and Pristina on Kosovo's status. A "Troika" of representatives from the European Union, the Russian Federation, and the United States, began this effort in August 2007. UN Secretary General Ban Ki-moon asked them to report on their efforts no later than December 10, 2007. The German ambassador to the United Kingdom, Wolfgang Ischinger, represented the EU; Alexander Botsan-Kharchenko represented the Russian Federation; and Ambassador Frank Wisner represented the United States.

After an intense series of Troika-led negotiations, including a high-level conference in Baden, Austria, the Troika's mandate ended in December without an agreement between the parties. In its final report, the Troika explained that it explored with the parties every realistic option for an agreement, but it was not possible to find a mutually acceptable outcome.

Independence

Kosovo declared its independence from Serbia on February 17, 2008. In its declaration of independence, Kosovo committed to fulfilling its obligations under the Ahtisaari Plan, to embrace multi-ethnicity as a fundamental principle of good governance, and to welcome a period of international supervision.

The United States formally recognized Kosovo as a sovereign and independent state on February 18. To date, Kosovo has been recognized by a robust majority of European states, the United States, Japan, and Canada, and by other states from the Americas, Africa, and Asia. Shortly after independence, a number of states established an International Steering Group (ISG) for Kosovo that appointed Dutch diplomat Pieter Feith as Kosovo's first International Civilian Representative (ICR).

As part of its commitment to the Ahtisaari Plan, the Kosovo Government rapidly enacted after independence laws on minority protection, decentralization, special protection zones for Serb cultural and religious sites, local self-government, and municipal boundaries.

The Kosovo Assembly approved a constitution in April, and it entered into force on June 15, 2008. ICR Feith certified that the constitution was in accordance with the Ahtisaari Plan. At the time of certification, ICR Feith also congratulated Kosovo on a modern constitution that "provides com-

prehensive rights for members of communities as well as effective guarantees for the protection of the national, linguistic and religious identity of all communities." More information on the role of the ICO in post-status Kosovo can be found at: http://www.ico-kos.org/en.

GOVERNMENT AND POLITICAL CONDITIONS

In 2001, UNMIK promulgated a Constitutional Framework that established Provisional Institutions of Self-Government (PISG) for Kosovo. Under the Constitutional Framework, the President of Kosovo is the head of state and serves a term of 5 years with the right to one re-election. The Prime Minister is the head of government and is elected by the Kosovo Assembly.

The unicameral Kosovo Assembly consists of 120 seats, 10 seats of which are reserved for ethnic Serbs, and 10 seats for other minorities (4 seats for the Roma, Ashkali and Egyptian communities (RAE), 3 seats for the Bosniak community, 2 seats for the Turkish community, and 1 seat for the Gorani community). Three of the remaining 100 seats are also held by minority members (for a total of 13). All members serve 4-year terms. Jakup Krasniqi (PDK party) is President of the Assembly.

These arrangements were superseded by Kosovo's new constitution, which entered into force on June 15, 2008. Under the new constitution, which enshrines the relevant provisions of the Ahtisaari Plan, Kosovo will undergo a comprehensive shift in governance from the Constitutional Framework of 2001 to a legal charter based upon its new status as an independent state.

The main political parties in Kosovo include the Democratic League of Kosovo (LDK), formerly led by Ibrahim Rugova and now led by Kosovo President Fatmir Sejdiu; Democratic Party of Kosovo (PDK), led by former KLA political chief Hashim Thaci; and the Alliance for the Future of Kosovo (AAK), led by former KLA commander Ramush Haradinaj. Kosovo held its first parliamentary elections in November 2001. After significant political wrangling, politicians agreed to establish a coalition government in March 2002, with Bajram Rexhepi (PDK) as Prime Minister and Ibrahim Rugova (LDK) as President. In the same year, the Kosovo Assembly began to function and pass its first laws. Beginning in 2003, UNMIK began transferring governing competencies to these ministries.

On November 17, 2007, Kosovo held parliamentary and municipal elections. These elections were deemed free and fair by international observers. The PDK gained 34.3% of the vote, the LDK gained 22.6%, the New Kosovo Alliance (AKR) won 12.3%, the Democratic League of Dardania (LDD) won 10%, and the AAK won 9.6%. Smaller minority parties also made some small gains. These elections led to a coalition between the LDK and the PDK and to the elevation of Hashim Thaci as Prime Minister of Kosovo. At the behest of Serbian leaders in Belgrade, virtually all Kosovo Serbs again boycotted the vote.

In June 2008, UN Secretary General Ban decided to "reconfigure" UNMIK and reduce the size of the UN presence in Kosovo, effectively ending the UN's role as administrator of Kosovo and welcoming EU deployment of its Rule of Law Mission (EULEX). As Ban stated in his report to the Security Council, "UNMIK will no longer be able to perform effectively the vast majority of its tasks as an international administration." The EU will gradually assume increasing responsibility in the areas of policing, justice, and customs throughout Kosovo.

The Kosovo judicial system started adapting to the new legal charter on June 15, 2008. Supreme Court judges and prosecutors, district court judges, and municipal courts judges already appointed by the SRSG will continue to serve in their posts until the expiry of their appointment. After the transfer of rule of law functions to the Government of Kosovo, the Kosovo Judicial Council (KJC) will propose to the President of Kosovo candidates for appointment or reappointment as judges and prosecutors.

Min. of Transport & Telecommunication: **Fatmir LIMAJ**
Managing Dir., Central Banking Authority of Kosovo: **Michel SVETCHINE**

ECONOMY

Kosovo's economy has shown significant progress since the conflict of the 1990s; it is, however, still significantly dependent on the international community and the diaspora for financial and technical assistance. Remittances from the diaspora, located mainly in Germany and Switzerland, account for about 30% of GDP.

Kosovo's citizens are the poorest in Europe, with an average annual per capita income of approximately $1,800, about one-third the level of neighboring Albania. Most of Kosovo's population lives in rural towns

outside of the capital, Pristina. Inefficient, near-subsistence farming is common, the result of small plots, limited mechanization, and lack of technical expertise.

As a result of international assistance, Kosovo has been able to privatize 50% of its state-owned enterprises (SOE) by number, and over 90% of SOEs by value. Privatized companies have been able to increase sales sevenfold and attract more than 450,000 Euros (approximately $688,500) in new investment. Technical assistance to the Kosovo Electricity Corporation (KEK) has helped improve procedures for billings and collections, increased revenues, strengthened internal accounting procedures and controls, and rationalized budgeting and investment planning. The installation of bulk meters at the sub-station level is facilitating greater accountability for collection performance at the district level. The U.S. Government has cooperated with the World Bank to prepare a commercial tender for the development of new generation and mining capacity. The capacity of KEK's workforce was bolstered by continuing on-the-job training provided to 325 employees.

Economic growth is largely driven by the private sector, mostly small-scale retail businesses. The official currency of Kosovo is the Euro, but the Serbian dinar is also used in Northern Kosovo and other areas where ethnic Serbs predominate. Kosovo's use of the Euro has helped keep inflation low. Kosovo has maintained a budget surplus as a result of efficient tax collection and inefficient budget execution. In order to help integrate Kosovo into regional economic structures, UNMIK signed (on behalf of Kosovo) its accession to the Central Europe Free Trade Area (CEFTA) in 2006. In February 2008, UNMIK also represented Kosovo at the newly established Regional Cooperation Council (RCC).

Some of the commodities that Kosovo exports are: mineral products, base metals, leather products, machinery, and appliances. Its main export partners are countries that are members of CEFTA. Some of the products that it imports include: live animals and animal products, fruit and vegetable products, minerals, food products, base materials, machinery, appliances and electrical equipment, textiles and related products, wood and wood products, stone, ceramic and glass products, and chemical products. Its main import partners are the EU, Macedonia, Serbia, Turkey, and Albania.

Trade and Industry

Kosovo has been laying the foundations of a market-oriented economy for the past eight years but is still struggling to develop viable and productive domestic industries. Kosovo has one of the lowest export/import rates in the region. In 2007, Kosovo imported $2.3 billion in goods and services and exported only $151 million, resulting in a trade deficit close to 65% of Kosovo's GDP. This deficit is largely financed through foreign assistance and remittances from Kosovo's diaspora. Kosovo's leading industries are mining, energy, and telecommunications.

Agriculture

Agricultural land comprises 53% of Kosovo's total land area and forests 41%. According to data from the Food and Agriculture Organization, 741,316 acres of land are under cultivation and 444,789 acres are upland pasture. The majority of agricultural land is privately owned (80%), providing subsistence farming for individual households. Although Kosovo's agricultural sector is generally characterized by small farms, low productivity, and the absence of advisory services, agriculture contributes around 25% of Kosovo's overall GDP.

Agriculture is the largest employment sector in Kosovo, providing jobs for 25% to 35% of the population, primarily on an informal basis. The agricultural sector also accounts for 16% of total export value and remains an important creator of national wealth, although Kosovo is still an importer of many agricultural products, which accounted for 24% of overall imports ($448.7 million) in 2005. Forestry in Kosovo is minimal; wood-processing and wood products (flooring and furniture) are industry contributors, although not yet in significant numbers.

FOREIGN RELATIONS

In March 2008, Kosovo passed legislation to establish a foreign ministry. This legislation went into effect on June 15, 2008. The Government of Kosovo appointed Skender Hyseni as its first foreign minister. The Government of Kosovo has not yet established diplomatic missions overseas but is expected to do so soon.

U.S.-KOSOVO RELATIONS

The United States and Kosovo established diplomatic relations on February 18, 2008. The strong bilateral ties the United States shares with Kosovo are maintained through the U.S. Embassy in Pristina, which was opened on April 8, 2008 by then-Charge d'Affaires ad interim Tina Kaidanow. Prior to independence, the United States maintained U.S. Office Pristina (USOP), with a chief of mission.

The U.S. also continues to contribute troops to the Kosovo Force (KFOR), and will be providing staff to the ICO and EULEX missions.

During a European Commission-hosted international Donors' Conference on July 11, 2008 the United States pledged $400 million for 2008-2009 to support, among many other things, helping relieve debt Kosovo may inherit. U.S. assistance in Kosovo continues to support good governance through strengthening civil society and political processes, especially targeting minority communities, and will strengthen economic institutions and help private enterprise grow.

TRAVEL

Consular Information Sheet

March 12, 2008

Description: Kosovo declared independence from Serbia on February 17, 2008, and the United States recognized Kosovo as an independent state on February 18, 2008. The UN Interim Administration Mission in Kosovo (UNMIK), pursuant to U.N. Security Council Resolution 1244, continues to provide support during the transition period, as the International Civilian Office, European Rule of Law Mission (EULEX), and NATO (KFOR) prepare to supervise Kosovo's independence. At this time, some civilian institutions, including the criminal justice system, are not functioning at a level consistent with Western standards. Kosovo is a cash economy. The currency used throughout Kosovo is the euro.

Entry and Exit Requirements: U.S. citizens citizens need a passport to enter Kosovo. No visa is required, but visitors may be required to produce documentation to demonstrate the purpose of their visit. Generally, visitors allowed to enter Kosovo will be permitted to stay for up to 90 days. Persons who wish to prolong their stay beyond 90 days will need to register at the Office for Registration of Foreigners, located in the Main Police Headquarters in Pristina.

Entry to Serbia from Kosovo should not be attempted without a valid Serbian visa and entry stamp from a Serbia border crossing post. Serbia does not recognize entry stamps by Kosovo border authorities at Kosovar ports of entry, including Pristina Airport, as valid. For more information on current regulations on the movement of people, see http://www.unmikonline.org.

Safety and Security: The NATO-led Kosovo Force (KFOR) along with international and local police, are responsible for security and stability in Kosovo. Although the overall security situation has improved, inter-ethnic tensions and sporadic incidents of violence continue to occur. Following the February declaration of independence, violent incidents occurred at border crossings between the Republic of Kosovo and Serbia. Per standing security instructions, U.S. Government officials may only travel to parts of northern Kosovo for official business and these restrictions remain in place.

Americans should avoid demonstrations and other sites, such as roadblocks, where large crowds are gathered, particularly those involving political/ethnic causes. Even demonstrations intended to be peaceful have the potential to turn into confrontational situations and possibly escalate into violence.

While de-mining programs have proven effective, unexploded ordnance and mines remain in some areas. The reliability of telecommunications, electric and water systems remains unpredictable.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found.

Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444. These numbers are available from 8:00 a.m. to 8:00 p.m. Eastern Time, Monday through Friday (except U.S. federal holidays).

Crime: High unemployment and other economic factors have encouraged criminal activity. Street crimes, in particular theft and purse snatchings, are serious problems in Kosovo, especially Pristina. It is not unusual for criminals to commit crimes while armed, especially with handguns. Foreigners can be targets for crime, as they are assumed to carry cash. Likewise, foreigners' homes, vehicles and international non-governmental organization (NGO) offices have been subject to burglaries. The loss or theft of a U.S. passport should be reported immediately to the nearest police station and to U.S. Embassy Pristina. While U.S. Embassy Pristina does not have the ability to issue new passports at this time, it will assist with arrangements for applying for a new passport at the U.S. Embassy in Skopje, Macedonia. Emergency numbers in Pristina are Police: 92; Fire Department: 93; and Ambulance: 94. For information on other areas contact U.S. Embassy Pristina.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the

crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The civilian police force is a contingent of international officers who are working alongside local officers to carry out most normal police functions. The judicial system is still developing under the oversight of the civilian mission, UNMIK.

Medical Facilities: Health facilities are limited, and medications are in short supply. KFOR cannot provide basic health care to non-military personnel, nor can they provide medical evacuation out of Kosovo.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel/default.aspx. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Kosovo is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Road conditions can be extremely hazardous because roads are narrow, crowded, and used by a variety of vehicles, from KFOR armored personnel carriers to horse-drawn carts. Many vehicles are old and lack standard front or rear lights. Mountain roads can be narrow, poorly marked, and lack guardrails. They quickly become dangerous in inclement weather.

The use of seat belts is mandatory. A driver with a blood alcohol level higher than 0.05 is considered intoxicated. Travelers entering Kosovo by road should be aware that the purchase of local third-party insurance is required.

Aviation Safety Oversight: Since Kosovo's recent independence, the U.S. Federal Aviation Administration (FAA) has not separately assessed the Government of Kosovo's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. However, the FAA earlier assessed the Governments of Serbia and Montenegro's Civil Aviation Authority as not being in compliance with ICAO standards for oversight of Serbia and Montenegro's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov/safety/programs_initiatives/oversight/iasa.

Special Circumstances: Banking services are available in Pristina and other major towns, although they are not fully developed. There are now a number of banks with international ties that offer limited banking services, including Automated Teller Machines (ATMs), in Pristina and other major towns. If it becomes necessary to receive emergency funds from abroad, Western Union has offices throughout Kosovo.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Kosovo laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Kosovo are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy and Consulate Locations: Americans living in or traveling in Kosovo are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site, and to obtain updated information on travel and security within Kosovo. Americans without Internet access may register directly with the nearest U.S. Embassy, Consulate, or Office. By registering, American citizens make it easier for the Embassy, Consulate, or Office to contact them in case of emergency. U.S. citizens are encouraged to register with U.S. Embassy Pristina and obtain updated information on travel and security in Kosovo. At this time U.S. Embassy Pristina provides only emergency services to American citizens. U.S. Embassy Skopje, Macedonia, provides all routine consular services such as passport and visa processing.

The Embassy is located at 30 Nazim Hikmet St. in the Dragodan area of Pristina. The telephone number is (381) 38-5959-3000, e-mail: consular-pristina@state.gov. The web site is http://pristina.usmission.gov.

Intercountry Adoption

March 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry*

Adoption section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Please Note: Kosovo remains part of Serbia and Montenegro but is governed by the UN Mission in Kosovo. (Kosovo also has local provisional institutions of government that fall under the ultimate authority of the UN.) The United States has an office in Pristina that provides limited services to U.S. citizens in Kosovo. Immigrant visa applications for Kosovars are processed at the U.S. Embassy in Skopje, Macedonia.

Patterns of Immigration: Please review current reports online at http://adoption.state.gov.

Adoption Authority:
Adoption Coordinator
Social Services Division
Ministry of Labor and Social Welfare
011-038-504-604-4680 (Monday—Thursday; callers must speak Albanian)

Adoptive parents may also contact the Centers for Social Work in the municipality from where they are adopting after first establishing contact with the adoption coordinator in Pristina.

Eligibility Requirements for Adoptive Parents: Prospective adoptive parents must first be approved to adopt by their home countries. For U.S. citizens, this means obtaining an approved I-600A from the local office of U.S. Citizenship and Immigration Services (USCIS) covering their U.S. residence.

At this time, Kosovo has not established any age or civil status requirements although it is preferred that at least one of the prospective adoptive parents be not older than 55 years. Kosovo authorities have not identified any medical ineligibilities that would disqualify prospective adoptive parents.

Residency Requirements: There are no residency requirements for intercountry adoption.

Time Frame: As the U.S. Government is unaware of any completed intercountry adoptions from Kosovo, it is not possible to estimate how long such an adoption would take.

Adoption Agencies and Attorneys: There are no known U.S. adoption agencies that are allowed to operate in Kosovo. Adoptive parents must work directly with the Adoption Coordinator.

Prospective adoptive parents are advised to fully research any adoption agency or facilitator they plan to use for adoption services. For U.S.-based agencies, it is suggested that prospective adoptive parents contact the Better Business Bureau and state adoption licensing/accrediting office in the state where the agency is located.

Adoption Fees: Authorities in Kosovo have not established any fees related to adoption services.

Adoption Procedures: The Center for Social Welfare (CSW) in each municipality actively searches for a Kosovar family permanently residing in Kosovo to adopt a child in need of a family. The CSW tries to find a family with the same ethnic, cultural, religious and linguistic background as the child. After efforts to locate a family in each of the 31 municipalities are exhausted, the child is then referred to the Intercountry Adoption Board for approval for the child to be adopted internationally.

Prospective adoptive parents must submit all documentation to the Social Services Division at the Ministry of Labor and Social Welfare, where they will be entered into a database.

Parents and children are matched based on the needs of the child. After an initial match is made, the prospective adoptive parents can communicate with their prospective adoptive child. If the match is successful, it will be reviewed and approved by the Adoption Board. After receiving Adoption Board approval, the CSW will complete adoption requirements and issue an adoption decree.

Adoptive parents are required to travel to Kosovo to complete adoption requirements such as signing documents and applying for birth certificates, etc.

Required Documents:

- Written request for adoption—signed by both spouses;
- Marriage certificate;
- Birth certificate for each spouse;
- Identification document (true copy of ID and passport, issued by State or Federal government agency) for both spouses;
- Proof of Nationality;
- Medical certificate regarding health condition and adoption capability—for both spouses, i.e. general health, illnesses that might impact on ones ability to care for a child;
- Evidence of economic condition (i.e. property ownership, bank statements);
- Letter of employment and with salary or income information (for both spouses, if applicable);
- Statement from local police authorities that applicants have no criminal record;
- Certificate from a competent authority certifying that parental rights have never been taken away from either spouse;
- Home Study by competent adoption authority in the parents' place of residence.

Note: All documents must be translated into Albanian or Serbian depending on the child's nationality.

KUWAIT

Compiled from the June 2007 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
State of Kuwait

PROFILE

Geography

Area: 17,820 sq. km. (6,880 sq. mi.); approximately the size of the State of New Jersey.

Cities: Capital—Kuwait City.

Terrain: Almost entirely flat desert plain (highest elevation point—306 m).

Climate: Summers are intensely hot and dry with average highs ranging from 42º-49ºC (108º-120ºF); winters are short (Dec.-Feb.) and cool, averaging 10º-30ºC (50º-80ºF), with limited rain.

People

Nationality: Noun and adjective—Kuwaiti(s).

Population: (Dec. 2006 est.) 3,182,960, including approximately 1 million Kuwaiti citizens and 2 million non-Kuwaiti citizens.

Annual growth rate: (2006 est.) 3.52%.

Ethnic groups: Kuwaiti 35%, other Arab 22%, non-Arab (primarily Asian) 39%, stateless Arabs (bidoon) 4%.

Religions: Muslim estimated 80% (Sunni 70%, Shi'a 30% among Kuwaitis), with sizable Hindu, Christian, Buddhist, and Sikh communities.

Languages: Arabic (official), English is widely spoken.

Education: Compulsory from ages 6-14; free at all levels for Kuwaitis, including higher education. Adult literacy (age 15 and over)—83.5% for the overall population (male 85.1%, female 81.7%), 91.2% for Kuwaitis (male 91.4%, female 90.8%).

Health: Infant mortality rate (2006 est.)—9.71 deaths/1,000 live births. Life expectancy (2006 est.)—76.13 yrs. male, 78.31 yrs. female.

Work force: (official figures as of December 31, 2006) 1.963 million (76% male; 24% female; 17% Kuwaiti citizens).

Government

Type: Constitutional hereditary emirate.

Independence: June 19, 1961 (from U.K.).

Constitution: Approved and promulgated November 11, 1962.

Government branches: Executive—Amir (head of state); prime minister (head of government); Council of Ministers (cabinet) is appointed by prime minister and approved by the Amir. Legislative—unicameral National Assembly (Majlis al-'Umma) of 50 elected members who serve 4-year terms plus all ministers, who serve as ex officio members. Judicial—High Court of Appeal.

Political subdivisions: Six governorates (muhafazat) Al 'Asimah, Hawalli, Al Ahmadi, Al Jahra', Mubarak Al-Kebir, and Al Farwaniyah.

Political parties: None; formal political parties have no legal status, although de facto political blocs exist.

Elections: There are no executive branch elections; the Amir is hereditary; prime minister and crown prince are appointed by the Amir. Legislative branch elections were last held June 29, 2006. Municipal Council elections were held on April 4, 2006.

Suffrage: Adult males and since May 16, 2005, adult females who are 21, have been citizens for 20 years, and are not in the security forces. In June 2006, women participated as voters and candidates in parliamentary elections for the first time.

Economy

GDP: (2005 est.) $74.6 billion.

Real GDP growth rate: (2005) 8.5%.

Natural resources: Oil, natural gas, fish.

Agriculture: (about 0.5% of GDP) With the exception of fish, most food is imported. Cultivated land—1%.

Industry: (about 48% of GDP) Types—petroleum extraction and refining, fertilizer, chemicals, desalination, construction materials.

Services: (about 52% of GDP) public administration, finance, real estate, trade, hotels and restaurants.

Trade: (2005 est.) Exports —$46.87 billion: oil (93%). Major markets—Japan 17%, South Korea 13%, U.S. 11%, Singapore 10%, Pakistan 3%. Imports—$15.67 billion: food, construction materials, vehicles and parts, clothing. Major suppliers—U.S. 13%, Germany 13%, Japan 8%, China 6%, United Kingdom 6%.

PEOPLE

Over 90% of the population lives within a 500-square kilometer area surrounding Kuwait City and its harbor. Although the majority of people residing in the State of Kuwait are of Arab origin, fewer than half are originally from the Arabian Peninsula. The discovery of oil in 1938 drew many Arabs from nearby states. Following the liberation of Kuwait from Iraqi occupation in 1991, the Kuwaiti Government undertook a serious effort to reduce the expatriate population by specifically limiting the entry of workers from nations whose leaders had supported Iraq during the Gulf War. Kuwait later abandoned this policy, and it currently has a sizable foreign labor force (approximately 68% of the total population is non-Kuwaiti).

Of the country's total population of 3.1 million, approximately 80% are Muslims, including nearly all of its1.023 million citizens. While the national census does not distinguish between Sunni and Shi'a adherents, approximately 70-75 % of citizens, including the ruling family, belong to the Sunni branch of Islam. The remaining Kuwaiti citizens, with the exception of about 100-200 Christians and a few Baha'is, are Shi'a. The expatriate Christian population is estimated to be more than 400,000 residents. There also are communities of Hindus, Buddhists, and Sikhs.

Kuwait's 83.5% literacy rate, one of the Arab world's highest, is the result of extensive government support for the education system. Public school education, including Kuwait University, is free, but access is restricted for foreign residents. The government sponsors the foreign study of qualified students abroad for degrees not offered at Kuwait University. In 2004, approximately 1,720 Kuwaitis were enrolled in U.S. universities, down 6.8% from the previous year.

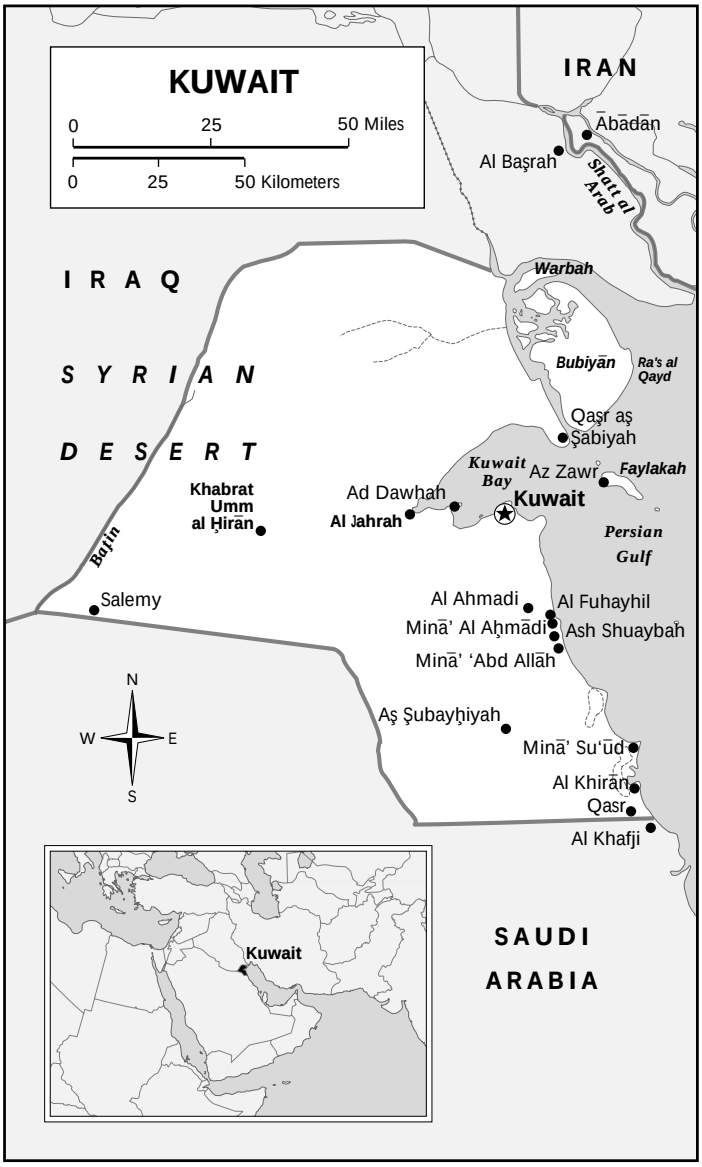
HISTORY

Archaeological finds on Failaka, the largest of Kuwait's nine islands, suggest that Failaka was a trading post at the time of the ancient Sumerians. Failaka appears to have continued to serve as a market for approximately 2,000 years, and was known to the ancient Greeks. Despite its long history as a market and sanctuary for traders, Failaka appears to have been abandoned as a permanent settlement in the 1st century A.D. Kuwait's modern history began in the 18th century with the founding of the city of Kuwait by the Uteiba, a subsection of the Anaiza tribe, who are believed to have traveled north from Qatar.

Threatened in the 19th century by the Ottoman Turks and various powerful Arabian Peninsula groups, Kuwait sought the same treaty relationship Britain had already signed with the Trucial States (UAE) and Bahrain. In January 1899, the ruler Sheikh Mubarak Al Sabah—"the Great"—signed an agreement with the British Government that pledged himself and his successors neither to cede any territory, nor to receive agents or representatives of any foreign power without the British Government's consent, in exchange for protection and an annual subsidy. When Mubarak died in 1915, the population of Kuwait of about 35,000 was heavily dependent on shipbuilding (using wood imported from India) and pearl diving.

Mubarak was succeeded as ruler by his sons Jabir (1915-17) and Salim (1917-21). Kuwait's subsequent rulers have descended from these two brothers. Sheikh Ahmed al-Jabir Al Sabah ruled Kuwait from 1921 until his death in 1950, a period in which oil was discovered and in which the government attempted to establish the first internationally recognized boundaries; the 1922 Treaty of Uqair set Kuwait's border with Saudi Arabia and also established the Kuwait-Saudi Arabia Neutral Zone, an area of about 5,180 sq. km. (2,000 sq. mi.) adjoining Kuwait's southern border.

Kuwait achieved independence from the British under Sheikh Ahmed's successor, Sheikh Abdullah al-Salim Al Sabah. By early 1961, the British had already withdrawn their special court system, which handled the cases of foreigners resident in Kuwait, and the Kuwaiti Government began to exercise legal jurisdiction under new laws drawn up by an Egyptian jurist. On June 19, 1961, Kuwait became fully independent following an exchange of notes with the United Kingdom.



Kuwait enjoyed an unprecedented period of prosperity under Amir Sabah al-Salim Al Sabah, who died in 1977 after ruling for 12 years. Under his rule, Kuwait and Saudi Arabia signed an agreement dividing the Neutral Zone (now called the Divided Zone) and demarcating a new international boundary. Both countries share equally the Divided Zone's petroleum, onshore and offshore. The country was transformed into a highly developed welfare state with a free market economy.

In August 1990, Iraq attacked and invaded Kuwait. Kuwait's northern border with Iraq dates from an agreement reached with Turkey in 1913. Iraq accepted this claim in 1932 upon its independence from Turkey. However, following Kuwait's independence in 1961, Iraq claimed Kuwait, arguing that Kuwait had been part of the Ottoman Empire subject to Iraqi suzerainty. In 1963, Iraq reaffirmed its acceptance of Kuwaiti sovereignty and the boundary it agreed to in 1913 and 1932, in the "Agreed Minutes between the State of Kuwait and the Republic of Iraq Regarding the Restoration of Friendly Relations, Recognition, and Related Matters."

Following several weeks of aerial bombardment, a UN-mandated coalition led by the United States began a ground assault in February 1991 that liberated Kuwait. During the 7-month occupation by Iraq, the Amir,

the Government of Kuwait, and many Kuwaitis took refuge in Saudi Arabia and other nations. The Amir and the government successfully managed Kuwaiti affairs from Saudi Arabia, London, and elsewhere during the period, relying on substantial Kuwaiti investments available outside Kuwait for funding and war-related expenses.

Following liberation, the UN, under Security Council Resolution 687, demarcated the Iraq-Kuwait boundary on the basis of the 1932 and the 1963 agreements between the two states. In November 1994, Iraq formally accepted the UN-demarcated border with Kuwait, which had been further spelled out in UN Security Council Resolutions 773 and 883.

GOVERNMENT AND POLITICAL CONDITIONS

Kuwait is a constitutional, hereditary emirate ruled by princes (Amirs) who have been drawn from the Al Sabah family since the middle of the 18th century. The 1962 constitution provides for an elected National Assembly and details the powers of the branches of government and the rights of citizens. Under the Constitution, the National Assembly has a limited role in approving the Amir's choice of the Crown Prince, who succeeds the Amir upon his death. If the National Assembly rejects his nominee, the Amir then submits three names of qualified candidates from among the direct descendants of Mubarak the Great, the founder of modern Kuwait, from which the Assembly must choose the new Crown Prince. Successions have been orderly since independence. In January 2006, the National Assembly played a symbolically important role in the succession process, which was seen as an assertion of parliament's constitutional powers.

For almost 40 years, the Amir appointed the Crown Prince as Kuwait's Prime Minister. However, in July 2003, the Amir formally separated the two positions and appointed a different ruling family member as Prime Minister.

Kuwait's first National Assembly was elected in 1963, with follow-on elections held in 1967, 1971, and 1975. From 1976 to 1981, the National Assembly was suspended. Following elections in 1981 and 1985, the National Assembly was again dissolved. Fulfilling a promise made during the period of Iraqi occupation, the Amir held new elections for the National Assembly in 1992. In May 1999 and once again in May 2006, the Amir dissolved the National Assembly, but complied with the constitution by holding new elections within 60 days. The most recent general election, held in June 2006, was considered free and fair and was marked by the participation of women for the first time as voters and candidates who introduced social and educational issues to the political debate. In July 2006 the newly elected legislature passed a law to reduce the number of electoral districts from 25 to 5 in a move that reformers hoped would increase the transparency of the democratic process by increasing the number of votes necessary to win a seat in parliament.

The government does not officially recognize political parties; however, de facto political blocs, typically organized along ideological lines, exist and are active in the National Assembly. Although the Amir maintains the final word on most government policies, the National Assembly plays a real role in decision-making, with powers to initiate legislation, question ("grill") cabinet ministers, and express lack of confidence in individual ministers. For example, in May 1999, the Amir issued several landmark decrees dealing with women's suffrage, economic liberalization, and nationality. The National Assembly later rejected all of these decrees as a matter of principle and then reintroduced most of them as parliamentary legislation. In May 2005, the National Assembly approved legislation granting women full political rights. Subsequently the Prime Minister appointed Kuwait's first female minister, Dr. Masouma Al-Mubarak, as Planning Minister and Minister of State for Administrative Development Affairs, and the government appointed two women to Kuwait's Municipal Council. Following the March 2007 resignation of the cabinet, Dr. Masouma was joined by a second woman, Nouriya Subih, in the cabinet.

Principal Government Officials

Last Updated: 11/12/08

Amir: **SABAH al-Ahmad al-Jabir al-Sabah**
Prime Min.: **NASIR al-MUHAMMAD al-Ahmad al-Sabah**
First Dep. Prime Min.: **JABIR al-MUBARAK al-Hamad al-Sabah**
Dep. Prime Min.: **MUHAMMAD al-Sabah al-Salim al-Sabah**
Dep. Prime Min.: **Faysal al-HAJJI**
Min. of Commerce & Industry: **Ahmad Abdallah al-BAQR**
Min. of Communications: **Abd al-Rahman al-GHUNAYM**
Min. of Defense: **JABIR al-MUBARAK al-Hamad al-Sabah**
Min. of Education & Higher Education: **Nuriya al-SUBAYH**
Min. of Electricity & Water: **Muhammad al-ULAYM**
Min. of Finance: **Mustafa al-Jassim al-SHIMMALI**
Min. of Foreign Affairs: **MUHAMMAD al-Sabah al-Salim al-Sabah**
Min. of Health: **Ali Muhammad al-BARRAK**
Min. of Information: **SABAH al-KHALID al-Hamad al-Sabah**
Min. of Interior: **JABIR al-KHALID al-Jabir al-Sabah**
Min. of Justice: **Husayn al-HURAYTI**
Min. of Oil: **Muhammad al-ULAYM**
Min. of Public Works: **Fadhil Safar Ali SAFAR**
Min. of Religious Endowment & Islamic Affairs: **Husayn al-HURAYTI**
Min. of Social Affairs & Labor: **Badr al-DUWAYLAH**
Min. of State for Amiri Diwan Affairs: **NASIR al-SABAH al-Ahmad al-Sabah**
Min. of State for Cabinet Affairs: **Faysal al-HAJJI**
Min. of State for Housing Affairs: **Mudhi al-HAMUD**
Min. of State for Municipality Affairs: **Fadhil Safar Ali SAFAR**
Min. of State for National Assembly Affairs: **Ahmad Abdallah al-BAQR**
Pres., National Security Bureau: **AHMAD al-FAHD al-Ahmad al-Jabir al-Sabah**
Governor, Central Bank: **SALIM al-Abd al-Aziz al-Saud al-Sabah**
Ambassador to the US: **SALIM al-Abdallah al-Jabir al-Sabah**
Permanent Representative to the UN, New York: **Abdallah Ahmad Muhammad al-MURAD**

Kuwait maintains an embassy in the United States at 2940 Tilden Street NW, Washington, DC 20008 (tel. [1] (202)-966-0702).

ECONOMY

Kuwait has a small, relatively open economy dominated by the oil industry and government sector. Approximately 90% of the Kuwaiti citizen labor force works in the public sector, and 90% of private sector workers are non-Kuwaitis. Kuwait's proven crude oil reserves of about 101.5 billion barrels—9% of world reserves—account for nearly 60% of GDP, 95% of export revenues, and 80-90% of government income. During the 1970s, Kuwait benefited from the dramatic rise in oil prices, which Kuwait actively promoted through its membership in the Organization of Petroleum Exporting Countries (OPEC). The economy suffered from the triple shock of a 1982 securities market crash, the mid-1980s drop in oil prices, and the 1990 Iraqi invasion and occupation. The Kuwaiti Government-in-exile depended upon its $100 billion in overseas investments during the Iraqi occupation to help pay for the reconstruction. Thus, by 1993, this balance was cut to less than half of its pre-invasion level. The wealth of Kuwait is based primarily on oil and capital reserves, and the Iraqi occupation severely damaged both, although both have been restored as reconstruction has proceeded and world oil prices have risen. Kuwait enjoyed an economic boom following Operation Iraqi Freedom as many companies working in Iraq established offices in Kuwait and procured goods through Kuwaiti companies. The banking, financial services, logistics, telecommunications, and construction sectors, in particular, have grown in the last two years. The sustained high oil prices also provided the Kuwaiti Government with windfall revenues in 2005 and 2006.

In the closing hours of the Gulf War in February 1991, the Iraqi occupation forces set ablaze or damaged 749 of Kuwait's oil wells. Kuwait spent more than $5 billion to repair oil infrastructure damage. Oil production was 1.5 million barrels per day (bpd) by the end of 1992, and pre-war capacity was restored in 1993. Kuwait's current production capacity is estimated to be 2.5 million bpd. Kuwait plans to increase its capacity to 3.5 million bpd by 2015 and 4.0 million bpd by 2020.

Oil

In 1934, the ruler of Kuwait granted an oil concession to the Kuwait Oil Company (KOC), jointly owned by the British Petroleum Company and Gulf Oil Corporation. In 1976, the Kuwaiti Government nationalized KOC. The following year, Kuwait took over part of onshore production in the Divided Zone between Kuwait and Saudi Arabia. Kuwait Gulf Oil Company (KGOC) produces jointly there with Saudi Arabian Chevron, which, by its 1984 purchase of Getty Oil Company, acquired the Saudi Arabian onshore concession in the Divided Zone. Saudi

Arabian Chevron's concession is due to expire in February 2009. Offshore in the Divided Zone, the Arabian Oil Company (AOC)—80% owned by Japanese interests and 10% each by the Kuwaiti and Saudi Governments—produced on behalf of both countries from 1961 until 2000, when its concession in the Saudi zone expired. AOC gave up its drilling rights in the Kuwaiti sector 3 years later. KGOC has assumed AOC's offshore operations. Aramco Gulf Oil Company (AGOC) manages the Saudi portion of the offshore Divided Zone.

Kuwait Petroleum Corporation (KPC), an integrated, state-owned oil company, is the parent company of the government's operating companies in the petroleum sector, and includes Kuwait Oil Company, which produces oil and gas; Kuwait National Petroleum Company, which manages refining and domestic sales; Petrochemical Industries Company, which produces ammonia, urea, ethylene, propylene, and styrene and participates in a number of successful joint ventures with Dow Chemical within Kuwait and abroad; Kuwait Foreign Petroleum Exploration Company, which is responsible for exploration and upstream production outside Kuwait (in several developing countries and Australia); Kuwait Oil Tanker Company.; Kuwait Gulf Oil Company, responsible for exploration and production in the Kuwait portions of the offshore and onshore Divided Zone; and Kuwait Petroleum International, which manages refining and retail operations outside Kuwait (in Europe and East Asia).

KPC purchased from Gulf Oil Co. refineries in the Netherlands and Italy and service stations in the Benelux nations, Italy, and Scandinavia. In 1987, KPC bought a 19% share in British Petroleum, which was later reduced to 10%. KPC markets its products in Europe under the brand name Q8. In 2006, KPC announced plans to participate in a joint venture to build and operate a refinery and associated petrochemical plant in China. The Government of Kuwait also signed a memorandum of agreement with the State of Louisiana in 2006 to explore the feasibility of building a refinery in the United States. According to official OPEC figures, Kuwait has about 101.5 billion barrels of proven oil reserves, including the Kuwaiti share of proven reserves in the Divided Zone. This gives Kuwait the fifth-largest oil reserves in the world after Saudi Arabia, Canada, Iran, and Iraq. Estimated capacity before the occupation was about 2.4 million bpd. During the Iraqi occupation, Kuwait's oil-producing capacity was severely reduced. However, tremendous recovery and improvements have been made. Oil production was 1.5 million bpd by the end of 1992, and pre-war capacity was restored in 1993. Kuwait's production capacity is estimated to be 2.5 million bpd. Kuwait plans to increase its capacity to 3.5 million bpd by 2015 and 4.0 million bpd by 2020. Oil revenues comprise about 95% of exports and 90% of total government revenues. Kuwaiti export crude averaged about $58/barrel in 2006.

Social Benefits

The government has sponsored many social welfare, public works, and development plans financed with oil and investment revenues. Among the benefits for Kuwaiti citizens are retirement income, marriage bonuses, housing loans, virtually guaranteed employment, free medical services, and education at all levels. By Amiri decree, the government occasionally disburses a portion of its budget surplus as a grant to all Kuwaiti citizens. In September 2006, an Amiri grant of 200 Kuwaiti dinars (approximately $700) was paid to every citizen who applied. Foreign nationals residing in Kuwait do not have access to these welfare services. The right to own stock in publicly traded companies, real estate, and banks or a majority interest in a business is limited to Kuwaiti citizens, and citizens of Gulf Cooperation Council (GCC) states under limited circumstances.

Industry and Development

Industry in Kuwait consists of several large export-oriented petrochemical units, oil refineries, and a range of small manufacturers. It also includes large water desalinization, ammonia, desulphurization, fertilizer, brick, block, and cement plants. During the invasion, the Iraqis looted nearly all movable equipment of value, especially high-technology items and small machinery. Much of this has been replaced with newer equipment. The Kuwaiti Government has promoted the Trade and Investment Framework (TIFA) agreement, signed with the U.S. in 2004, as a means to attract additional foreign investment into Kuwaiti industries and enhance the country's diversification from a purely oil-based economy.

Agriculture

Agriculture is limited by the lack of water and arable land. The government has experimented in growing food through hydroponics and carefully managed farms. However, most of the soil which was suitable for farming in south central Kuwait was destroyed when Iraqi troops set fire to oil wells in the area and created vast "oil lakes." Fish and shrimp are plentiful in territorial waters, and large-scale commercial fishing has been undertaken locally and in the Indian Ocean.

Shipping

The Kuwait Oil Tanker Company has 24 crude oil, liquefied petroleum gas, and refined product carriers and is the largest tanker company in an OPEC country. Kuwait also is a member of the United Arab Shipping Company.

Trade, Finance, and Aid

The Kuwaiti dinar is a strong currency which was pegged from 2003 until May 2007 to the U.S. dollar. The dinar is now pegged to a basket of currencies, of which the dollar is a majority. Kuwait ordinarily runs a current account surplus, estimated at $40 billion for 2006 (about 45% of GDP). Government revenues are dependent on oil revenues. In 2006, Kuwait's fiscal surplus was estimated to be about 20% of GDP, despite a

16% rise in government expenditure. The government's two reserve funds—the Fund for Future Generations and the General Reserve Fund—which totaled nearly $100 billion prior to the invasion in 1990, were the primary source of capital for the Kuwaiti Government during the war. While these funds were depleted to $40-$50 billion after the war, total external assets, including the two reserve funds and the Public Fund for Social Security, are currently estimated to be around $160 billion. The bulk of this is invested in the United States, Germany, the United Kingdom, France, Japan, and Southeast Asia. In order of importance, foreign assets are believed to be invested in stocks and bonds, fixed yield instruments (mostly short term), and real estate. Kuwait follows a generally conservative investment policy.

Kuwait has been a major source of foreign economic assistance to other states through the Kuwait Fund for Arab Economic Development (KFAED), an autonomous state institution created in 1961 on the pattern of Western and international development agencies and chaired by the Foreign Minister.

In 1974, the fund's lending mandate was expanded to include all non-Arab, developing countries. According to the most recent statistics available, the Fund's paid-up capital amounts to $7 billion. Total loan disbursement extended is $37 billion. The Fund has granted 595 loans since its inception and extended technical assistance on 196 occasions to different countries and organizations in Africa, Asia, Europe, and Latin America. KFAED is responsible for administering the disbursal of at least $500 million in concessionary loans to Iraq in support of reconstruction efforts.

Over the years Kuwait has provided aid to Egypt, Syria, and Jordan, as well as the Palestinian Authority. During the Iran-Iraq war, Kuwait also gave significant aid to the Iraqis. The Kuwait fund issued loans and technical assistance grants totaling over $419 million during its fiscal year ending March 31, 2003. Kuwaiti provided unparalleled assistance during Operation Iraqi Freedom by establishing and operating the Humanitarian Operations Center for Iraq. Following the Israel-Lebanon conflict in 2006, Kuwait pledged $300 million for humanitarian aid and deposited $500 million in the Lebanese Central Bank.

At the 2003 Madrid Conference, the Government of Kuwait pledged $1.5 billion in assistance to Iraq. KFAED is responsible for disbursing and overseeing as much as $560 million of that assistance through grants. In 2005, KFAED contributed $50 million to Pakistan earthquake relief, contributed $50 million for Hurricane Katrina relief, and made significant contributions to tsunami relief efforts. Kuwaiti has also supported the establishment of the International Compact for Iraq.

FOREIGN RELATIONS

Following independence in June 1961, Kuwait faced its first major foreign policy problem arising from Iraqi claims to Kuwait's territory. The Iraqis threatened invasion but were dissuaded by the U.K.'s ready response to the Amir's request for assistance. Kuwait presented its case before the United Nations and preserved its sovereignty. U.K. forces were later withdrawn and replaced by troops from Arab League nations, which were withdrawn in 1963 at Kuwait's request.

On August 2, 1990, Iraq invaded and occupied Kuwait. Through U.S. efforts, a multinational coalition was assembled, and, under UN auspices, initiated military action against Iraq to liberate Kuwait. Arab states, especially the other five members of the Gulf Cooperation Council (Saudi Arabia, Bahrain, Qatar, Oman, and the United Arab Emirates), Egypt, and Syria, supported Kuwait by sending troops to fight with the coalition. Many European and East Asian states sent troops, equipment, and/or financial support.

After liberation, Kuwait concentrated its foreign policy efforts on development of ties to states which had participated in the multinational coalition. Notably, these states were given the lead role in Kuwait's reconstruction. Kuwait's relations with those nations that supported Iraq, among them Jordan, Sudan, Yemen, and Cuba, were slow to recover. Palestine Liberation Organization (PLO) Chairman Yasir Arafat's support for Saddam Hussein during the war also affected Kuwait's attitudes toward the PLO though Kuwait supports the Arab-Israeli peace process.

The Government of Kuwait has abandoned its previous policy of limiting the entry of workers from nations whose leaders had supported Iraq during the Gulf War. In August 2001, the Interior Minister announced that there were no longer any special restrictions or permits required for Palestinian workers wishing to return to the country. At the end of 2002, there were approximately 30,000 to 40,000 Palestinians, 30,000 to 40,000 Jordanians, and 5,000 Yemenis resident in Kuwait.

Since liberation from Iraq, Kuwait has made efforts to secure allies throughout the world, particularly UN Security Council members. In addition to the United States, defense arrangements have been concluded with the United Kingdom, Russia, and France. Ties to other key Arab members of the Gulf War coalition—Egypt and Syria—also have been sustained.

During the 2002-03 buildup to and execution of Operation Iraqi Freedom (OIF), Kuwait was a vital coalition partner, reserving a full 60% of its total land mass for use by coalition forces and donating significant assistance in kind to the effort. Kuwait continues to provide generous assistance in kind to ongoing coalition operations in Iraq. Kuwait has been consistently involved in reconstruction efforts in Iraq, pledging $1.5 billion at the October 2003 international donors' conference in Madrid, and consulting closely with Iraqi officials, including former Prime Minister Ibrahim Jaffari, who visited Kuwait

in late October 2005, and Prime Minister Nuri al-Maliki, who visited in July 2006 and again in April 2007. Kuwait has been an active and vocal public supporter of the political process in Iraq, welcoming the January 2005 elections and praising Iraq's October 2005 successful constitutional referendum. Iraqi President Talibani visited Kuwait in September 2006.

Kuwait is a member of the UN and some of its specialized and related agencies, including the World Bank (IBRD), International Monetary Fund (IMF), World Trade Organization (WTO), General Agreement on Tariffs and Trade (GATT); African Development Bank (AFDB), Arab Fund for Economic and Social Development (AFESD), Arab League, Arab Monetary Fund (AMF), Council of Arab Economic Unity (CAEU), Economic and Social Commission for Western Asia (ESCWA), Group of 77 (G-77), Gulf Cooperation Council (GCC), INMARSAT, International Development Association (IDA), International Finance Corporation, International Fund for Agricultural Development, International Labor Organization (ILO), International Maritime Organization, Interpol, IOC, Islamic Development Bank (IDB), International Federation of Red Cross and Red Crescent Societies, Non-Aligned Movement, Organization of Arab Petroleum Exporting Countries (OAPEC), Organization of the Islamic Conference (OIC), Organization of Petroleum Exporting Countries (OPEC), and the International Atomic Energy Agency (IAEA).

DEFENSE

Before the Gulf War, Kuwait maintained a small military force consisting of army, navy, and air force units. The majority of equipment for the military was supplied by the United Kingdom. Aside from the few units that were able to escape to Saudi Arabia, including a majority of the air force, all of this equipment was either destroyed or taken by the Iraqis. Much of the property returned by Iraq after the Gulf War was damaged beyond repair. Iraq retained a substantial amount of captured Kuwaiti military equipment in violation of UN resolutions.

Since liberation, Kuwait, with the help of the United States and other allies, has made significant efforts to increase the size and modernity of its armed forces. These efforts are succeeding. The government also continues to improve defense arrangements with other Arab states, as well as UN Security Council members. During Operation Iraqi Freedom, in 2003, Kuwaiti military elements successfully operated missile defense systems.

A separately organized National Guard maintains internal security. The police constitute a single national force under the purview of civilian authorities of the Ministry of Interior.

U.S.-KUWAITI RELATIONS

The United States opened a consulate in Kuwait in October 1951, which was elevated to embassy status at the time of Kuwait's independence 10 years later. The United States supports Kuwait's sovereignty, security, and independence, as well as its multilateral diplomatic efforts to build greater cooperation among the GCC countries.

Strategic cooperation between the United States and Kuwait increased in 1987 with the implementation of a maritime protection regime that ensured the freedom of navigation through the Gulf for 11 Kuwaiti tankers that were reflagged with U.S. markings.

The U.S.-Kuwaiti strategic partnership intensified dramatically again after Iraq's invasion of Kuwait. The United States spearheaded UN Security Council demands that Iraq withdraw from Kuwait and its authorization of the use of force, if necessary, to remove Iraqi forces from the occupied country. The United States also played a dominant role in the development of the multinational military operations Desert Shield and Desert Storm that liberated Kuwait. The U.S.-Kuwaiti relationship has remained strong in the post-Gulf War period. Kuwait and the United States worked on a daily basis to monitor and to enforce Iraq's compliance with UN Security Council resolutions, and Kuwait has also provided the main platform for Operation Iraqi Freedom since 2003.

Since Kuwait's liberation, the United States has provided military and defense technical assistance to Kuwait from both foreign military sales (FMS) and commercial sources. The U.S. Office of Military Cooperation in Kuwait is attached to the American embassy and manages the FMS program.

There are currently over 100 open FMS contracts between the U.S. military and the Kuwait Ministry of Defense totaling $8.1 billion. Principal U.S. military systems currently purchased by the Kuwait Defense Forces are Patriot Missile systems, F-18 Hornet fighters, the M1A2 main battle tank, AH-64D Apache helicopter, and a major recapitalization of Kuwait's Navy with U.S. boats.

Kuwaiti attitudes toward American products have been favorable since the Gulf War. In 1993, Kuwait publicly announced abandonment of the secondary and tertiary aspects of the Arab boycott of Israel (those aspects affecting U.S. firms).

The United States is currently Kuwait's largest supplier of goods and services, and Kuwait is the fifth-largest market in the Middle East. U.S. exports to Kuwait totaled $2.14 billion million in 2006. Provided their prices are reasonable, U.S. firms have a competitive advantage in many areas requiring advanced technology, such as oil field equipment and services, electric power generation and distribution equipment, telecommunications gear, consumer goods, and military equipment. Kuwait also is an important partner in the ongoing U.S.-led campaign against international terrorism, providing assistance

in the military, diplomatic, and intelligence arenas and also supporting efforts to block financing of terrorist groups.

In January 2005, Kuwait Security Services forces engaged in gun battles with local extremists, resulting in fatalities on both sides in the first such incident in Kuwait's history.

TRAVEL

Consular Information Sheet

September 2, 2008

Country Description: Kuwait is a small, oil-rich constitutional monarchy with 10% of proven world oil reserves. Foreign workers constitute approximately 90% of the labor force. Kuwaiti citizens constitute only 34% of the country's population of three million, and enjoy the benefits of a generous social welfare system that guarantees employment, housing, education and medical care. Facilities for travelers are widely available.

Entry Requirements: Passports and visas are required for U.S. citizens traveling to Kuwait. U.S. citizens can obtain visitor visas for a fee at the port of entry in Kuwait. Travelers who overstay their visas may be required to pay large fines before leaving Kuwait. Travelers who leave Kuwait without completing Kuwaiti exit procedures may also be required to pay large fines if they return to and attempt to depart from Kuwait. This includes travelers proceeding via Kuwait to and from Iraq. Effective May 15, 2007, the Government of Kuwait no longer admits travelers with a contractor identification card. All contractors entering or transiting the State of Kuwait should have a valid passport. Visas can be obtained upon arrival in Kuwait for a fee of 3 Kuwaiti Dinar (KD). For further information on entry and exit requirements, travelers may contact the Embassy of Kuwait at 2940 Tilden Street NW, Washington, DC 20008, telephone (202) 966-0702, or the Kuwaiti Consulate in New York City, telephone (212) 973-4318.

Kuwaiti officials are extremely sensitive about travel to Iraq. There have been instances in which Americans, especially those of Iraqi descent, have been detained for questioning at ports of entry/exit. Americans seeking to travel to Iraq through Kuwait have also on occasion been turned around and/or detained. On a number of occasions the border between Iraq and Kuwait has been closed without notice, stranding Americans on either side of the border.

Kuwaitis and non-Kuwaitis, including Americans, charged with criminal offenses, placed under investigation, or involved in unresolved financial disputes with local business partners, are subject to travel bans. These bans, which are rigidly enforced, prevent the individual from leaving Kuwait for any reason until the matter is resolved. Travel bans can be initiated by any person for almost any reason and may remain in place for a substantial period of time while the case is being investigated. Expatriates have been detained in Kuwait for cases with seemingly little or no evidence or legal merit. A person with influence with the Kuwaiti government can ensure that a travel ban remains in place even if a judge or government official states the ban should be lifted. In the case of purely financial disputes, it may be possible to depart the country if a local sponsor pledges funds equal to the amount in dispute. Once such legal orders are in place, the U.S. Embassy can assist American citizens in obtaining legal representation, but cannot overcome the ban on exit from the country until the matter is resolved.

Safety and Security: Americans in Kuwait should exercise a high level of security awareness. The Department of State remains concerned about the possibility of further terrorist actions against U.S. citizens and interests abroad, specifically in the Middle East, including the Persian Gulf and Arabian Peninsula. Americans considering travel to Kuwait should review the Worldwide Caution.

All U.S. citizens in Kuwait should exercise caution, maintain a low profile, and avoid areas where Westerners are known to congregate. Heightened security awareness should be exercised at all hotels and residential complexes, as terrorists in the past have specifically targeted hotel chains perceived as Western and a variety of Western housing facilities. Military members, as well as civilians and contractors related to military interests, are also potential targets.

Terrorists do not distinguish between official and civilian targets. Terrorist actions may include bombings, hijackings, hostage taking, kidnappings and assassinations. Increased security at official U.S. facilities may lead terrorists and their sympathiz-

ers to seek softer targets such as public transportation, residential areas and apartment complexes, schools and places of worship, oil-related facilities and personnel, and public areas where people congregate including restaurants, hotels, clubs, and shopping areas. U.S. citizens are advised to immediately report any unusual or suspicious activity in Kuwait to the Kuwaiti police or to the U.S. Embassy.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

The U.S. Embassy in Kuwait has an active warden program and records warden notices in both English and Arabic for audio playback. The English-language notices can be heard by calling +965-259-1048 and the Arabic-language notices are available at +965-259-1049.

Crime: The crime threat in Kuwait is assessed as low. Violent crimes against expatriates are rare, but do occur. The U.S. Embassy advises all U.S. citizens to take the same security precautions in Kuwait that one would practice in the United States or any other large city abroad. Physical and verbal harassment of women are continuing problems. The Kuwaiti police accept crime reports at the police station with jurisdiction where the crime occurred. If filing a crime report, it is advisable that an American citizen be accompanied by a person who speaks Arabic or a local attorney. The Embassy's List of Attorneys is available on the Embassy web site at http://kuwait.usembassy.gov/attorneys.html. Filing a crime report can take several hours as a police investigator will take the victim's statement orally while composing his investigative report. In all cases of abuse, the victim must obtain a medical report from a Kuwaiti hospital in order to file a police report.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products may be illegal under local law. In addition, bringing them back to the United States may result in forfeitures and/or fines. More information on this serious problem is available at http://www.cybercrime.gov/18usc2320.htm.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent of the "911" emergency line in Kuwait is "777" and can be reached 24 hours a day, seven days a week. The quality and range of services provided by the emergency line are not equivalent to those provided in the U.S. and response times may vary greatly depending on the time of day and the location of the emergency.

Medical Facilities and Health Information: The health care system continues to develop, with many government and private medical facilities available in Kuwait. Medical care at government-run clinics and hospitals is provided at low cost to residents of Kuwait. Private physicians and hospitals charge fees for services, and some do not accept local health insurance. Many hospital and clinic services do not compare to U.S. standards, and staff often have no U.S. experience or training. For information on avian influenza (bird flu), please refer to the Department of State's Avian Influenza Fact Sheet.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's web site at http://wwwn.cdc.gov/travel/default.aspx. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

The government of Kuwait has strict regulations regarding certain diseases such as HIV/AIDS and Hepatitis. Medical examinations are required for all residency applications and any applicants who are found positive for these restricted diseases will be asked to leave the country immediately and will be permanently barred from re-entry. Please inquire directly with the Embassy of Kuwait at http://www.embassy.org/embassies/kw.html before you travel.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Kuwait is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Driving in Kuwait is hazardous. Although Kuwait has an extensive and modern system of well-lit roads, excessive speeding on both primary and secondary roads, coupled with

lax enforcement of traffic regulations and a high density of vehicles (one vehicle for every 2.8 residents), leads to frequent and often fatal accidents. In 2006, reported vehicular accidents were 40,000 with 460 deaths, an increase over the previous year. The average age of death was between 21 and 30 years. There are now over one million motor vehicles registered in Kuwait. Incidents of road rage, inattention and distraction on the part of drivers, poor driving skills, and highway brinksmanship are common in Kuwait, and can be unsettling to Western drivers in Kuwait who are accustomed to more rigid adherence to traffic laws.

The government-owned Kuwait Public Transportation Company operates bus services throughout the Kuwait City metropolitan area on 50 different routes, which are widely used by the low-income expatriate labor force. Call taxis are available at major hotels and pick up passengers at other locations upon telephonic request. Unaccompanied women should not use taxis after dark. It is now possible to hail taxis on streets. Taxis have meters, but fares are more commonly negotiated.

Visitors can use international driving permits issued by their respective countries within the time limit of their visas; however, the visitor must also have liability insurance. It is illegal to drive in Kuwait without a license and car registration documents. If you are stopped and cannot produce them, you may be taken to a police station and held until they are presented on your behalf. The Government of Kuwait may provide American citizens with a Kuwaiti driver's license if their valid American driver's license is first certified by the American Embassy. This service costs 9 KD and is available from the American Citizens Services Unit of the Consular Section. The Embassy's certification must be authenticated by the Ministry of Foreign Affairs and the American permit must be translated by an approved translation service.

If you are in an accident, Kuwaiti law mandates that you must remain at the scene until the police arrive. The use of front seat belts is mandatory in Kuwait. Driving is on the right side of the road. Speed limits are posted. Making a right turn on a red light is not permitted unless there is a special lane to do so with a yield sign. Parking is not allowed where the curb is painted black and yellow. Digital cameras for registering traffic violations, including speeding, are in use on Kuwaiti roads.

Driving while under the influence of alcohol (possession and consumption of alcohol is illegal in Kuwait) is a serious offense, which may result in fines, imprisonment, and/or deportation. Repeat traffic violations or violations of a serious nature may also result in the deportation of an expatriate offender. When a driver flashes his/her high beams in Kuwait, it is meant as a request to move your car into a slower lane to allow the driver with the flashing beams to proceed ahead.

Kuwait has one of the highest per capita rates of cellular telephone ownership in the world and using a cellular telephone while driving remains legal. Local emergency service organizations may be contacted by dialing 777. Ambulance crews do not respond as quickly as in the United States and do not often include trained paramedics.

Visit the website of the Kuwaiti Ministry of Interior at www.moi.gov.kw for information and statistics in Arabic about traffic safety and road conditions in Kuwait.

Aviation Safety Oversight: The U.S. Federal Aviation Administration (FAA) has assessed the Government of Kuwait's Civil Aviation Authority as being in compliance with International Civil Aviation Organization (ICAO) aviation safety standards for the oversight of Kuwait's air carrier operations. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: The workweek in Kuwait is Sunday through Thursday for most businesses, government offices and commercial banks. Kuwaiti customs authorities may enforce strict regulations concerning temporary importation into or export from Kuwait of items such as firearms, religious material, pornography, and alcohol. Alcohol, pork products, and pornography are illegal in Kuwait. Travelers with prescription medications should carry them in their original packaging or bottle, as dispensed, and carry a copy of their prescription in case customs authorities question their importation into Kuwait.

Kuwaiti customs authorities screen the baggage of all travelers entering Kuwait. It is advisable to contact the Embassy of Kuwait in Washington, D.C. or Kuwait's Consulate in New York for specific information regarding customs requirements.

Photographing government and public buildings, military installations, and economic infrastructure, particularly that related to the oil industry, is against the law and can result in arrest, investigation, and prosecution. Also, some traditionally-dressed women find being photographed to be offensive and may complain to the local police. If photographing public scenes or persons, visitors should take care to ask permission beforehand and not to inadvertently cause offense that could lead to an official complaint to the authorities.

Humiliating a person, including a police officer or a public official, is a crime in Kuwait similar to disorderly conduct or harassment in the United States. A person charged with humiliating another is subject to police investigation and possible prosecution. Persons under investigation can be prevented from departing Kuwait. Proselytizing is prohibited for all religions except Islam.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar

offenses. Persons violating Kuwaiti laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in Kuwait are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Kuwait are encouraged to register with the nearest U.S. Embassy or Consulate through theState Department's travel registration web site so that they can obtain updated information on travel and security within Kuwait. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy in Kuwait is located at Al-Masjid Al-Aqsa Street, Block 6, Plot 14, Bayan, Kuwait. The mailing address is PO Box 77, Safat 13001, Kuwait. The primary telephone numbers are 965-259-1001 or 259-1002. The fax number is 965-259-1438 or 538-0282. The after-hours number is 965-538-2097. Additional information may also be obtained through the Embassy's web site at http://kuwait.usembassy.gov.

International Parental Child Abduction

November 2008

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *International Child Abduction* section of this book and review current reports online at www.travel.state.gov/childabduction.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is provided for general information only. Questions involving interpretation of specific foreign laws should be addressed to foreign legal counsel.

General Information: Kuwait is not a party to the Hague Convention on the Civil Aspects of International Child Abduction, nor are there any international or bilateral treaties in force between Kuwait and the United States dealing with international parental child abduction. American citizens who travel to Kuwait are subject to the jurisdiction of Kuwait courts, as well as to the country's laws and regulations. American citizens planning a trip to Kuwait with dual national children should bear this in mind.

Custody Disputes: Cases involving divorce and the custody of minor children are adjudicated in religious courts. If the marriage partners are Muslim, disputes will be resolved before an Islamic Sharia court which will apply principles of the Islamic sect (Shia or Sunni or mixed) of the parties involved. A Sharia court would also hear a dispute between a Muslim husband and non-Muslim wife. Marriage between a Muslim woman and non-Muslim man is prohibited in Kuwait. In the case of Christians, the court will be an Ecclesiastical Court composed of clergymen from the appropriate religious community, who will refer to the principles governing family status in the Greek Orthodox Church, Roman Catholic Church or other Christian denomination.

In both theory and practice, Muslim and Christian courts in Kuwait differ very little in how they resolve disputes over the custody of children of divorced or separated parents. The relevant laws all give priority for custodianship to the mother as long as certain restrictive conditions are met. However, once the children reach adolescence, the father can appeal for custody, except in the Sunni sect where the daughter stays with her mother until marriage. If a court finds the mother not fit to have custody, a maternal grandmother living in Kuwait or a paternal grandmother (if the maternal grandmother is not living in Kuwait) will be given custody until the children reach the age at which the father may appeal for custody.

In actual practice, the conditions placed on the mother's primary right to custody often enable the father to maintain a great deal of influence over the rearing of the children, even though he may not have legal custody. For example, the mother must seek his approval to depart Kuwait with the children. Frequently, the father is actually able to assume legal custody against the wishes of the mother when she is unable or unwilling to meet the conditions set by law for her to maintain her custodial rights. A mother can lose her primary right to custody of a child in a number of ways. The court can determine that she is incapable of safeguarding the child or of bringing the child up in accordance with the appropriate religious standards. The mother can void her right to custody by re-marrying a party considered "unmarriageable," or by residing in a home with people who might be "strangers" to the child. The mother may not deny visitation rights to the father or the paternal grandfather and may not travel outside Kuwait with the child without the father's approval and the approval of the court. In general, a Kuwaiti man divorcing his non-Kuwaiti wife may be awarded legal custody of their children if the court determines that any of the above conditions have not been met.

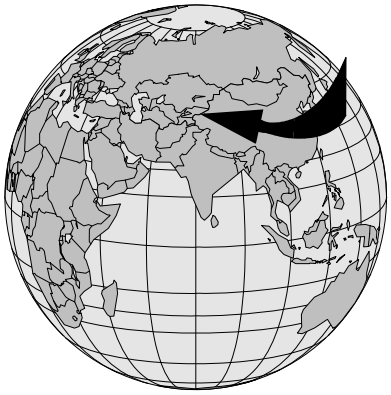
Under Sharia law, if a mother removes a child from the father thus denying him access, the mother's custody rights can be severed. An attempt to remove children from Kuwait without permission from the father is considered a criminal act in Kuwait. The U.S. Embassy cannot prevent the Kuwaiti government from arresting and either deporting or prosecuting an American citizen who violates Kuwaiti law.

A Kuwaiti father can remove his children from Kuwait without approval from the mother. A mother can seek a

travel ban to prevent the father from taking the children out of Kuwait. Persons who wish to pursue a child custody claim in a Kuwaiti court should retain an attorney in Kuwait. The U.S. State Department and the U.S. Embassy in Kuwait maintain a list of attorneys willing to represent American clients. A copy of this list may be obtained by contacting either office.

U.S. Embassy Kuwait
P.O. Box 77 Safat
13001 Safat
Kuwait
Phone: [965] 539-5307/5308
After hours emergency phone number: [965] 538-2097/2098
Fax: [965] 539-2484
Workweek: Saturday through Wednesday

Enforcement of Foreign Judgments: Custody orders and judgments of foreign courts are not enforceable in Kuwait if they potentially contradict or violate local laws and practices. For example, an order from a U.S. court granting custody to a parent will not be honored in Kuwait if the parent intends to take the child to live outside Kuwait. Nor will Kuwaiti courts enforce U.S. court decrees ordering a parent in Kuwait to pay child support. However, a court hearing a custody case in Kuwait may take into consideration the law of the country of the father's nationality. An American father with a U.S. court order granting him custody might find that order helpful (though not binding) in a custody proceeding in Kuwait.



Visitation Rights: In cases where the father has custody of a child, the mother is guaranteed visitation rights. It has been the experience of the U.S. Embassy in Kuwait that the father and the paternal grandparents of the child are generally very open and accommodating in facilitating the right of the mother to visit and maintain contact with the child.

Dual Nationality: Dual nationality is not recognized under Kuwaiti law. Children of Kuwaiti fathers automatically acquire Kuwaiti citizenship at birth, regardless of where the child was born. Women cannot transmit citizenship. Kuwaiti citizens must enter and exit the country on Kuwaiti passports.

Travel Restrictions: Exit visas are not required to leave Kuwait. However, a mother may face serious legal difficulties if she attempts to take her children out of Kuwait without the permission of the father. Immigration officials at the airport or border often ask to see permission from the father in writing before allowing children to exit, and have even been known to confirm a written request by contacting the father. If a woman has not placed a travel ban preventing a father from removing children from Kuwait, a father will usually be permitted to exit Kuwait with his children without difficulty.

Criminal Remedies: For information on possible criminal remedies, please contact your local law enforcement authorities or the nearest office of the Federal Bureau of Investigation (FBI). Information is also available on the Internet at the web site of the U.S. Department of Justice, Office of Juvenile Justice and Delinquency Prevention (OJJDP) at http://www.ojjdp.ncjrs.org.

For further information on international parental child abduction, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://travel.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

KYRGYZSTAN

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Kyrgyz Republic

PROFILE

Geography

Area: 77,181 sq. mi.

Cities: Bishkek (capital), Osh, Cholpon Ata, Karakol.

Terrain: 90% mountainous, with some desert regions. Elevation extremes—lowest point: Kulundy village in the Batken province 401 m; highest point: Jengish Chokusu (Pik Pobedy) 7,439 m.

People

Nationality: Kyrgyzstani.

Population: (July 2008) 5,356,869.

Annual growth rate: (2008) 1.38%.

Ethnic groups: (2007) Kyrgyz 68.9%; Russian 9.1%; Uzbek 14.4%; Dungan (ethnic Chinese Muslims) 1%; Uighurs 1%; Tajik 0.9%, Kazakh 0.8%, Tatars 0.7%; Korean 0.4%, German 0.3%.

Religions: Islam; Russian Orthodox.

Languages: State—Kyrgyz; official (2001)—Russian.

Education: Nine years compulsory. Literacy—98.7%.

Health: (2006) Infant mortality rate—29.2 deaths/1,000 live births. Life expectancy—67.7 years.

Population distribution: (2006) Urban 64.7%; rural 35.3%.

Government

Type: Republic.

Independence: August 31, 1991 (from the Soviet Union).

Constitution: May 5, 1993; amended in 1996, 1998, 2003, 2006, and 2007.

Government branches: Executive—president, prime minister. Legislative—parliament. Judicial—Supreme Court, Constitutional Court, local courts, Procurator-General.

Political subdivisions: Seven oblasts and the municipality of Bishkek.

Political parties: Ak Jol People's Party, no formal leader, but this is the party of President Bakiyev; Social Democratic Party of Kyrgyzstan, Deputy Almazbek Atambayev; Party of Communists of Kyrgyzstan, Deputy Iskhak Masaliev; Ar Namys (Dignity) Party, Feliks Kulov; Ata-Meken (Fatherland) Party, Omurbek Tekebaev; Jany Kyrgyzstan Party, Presidential Advisor Usen Sydykov; Erkindik (Freedom) Party, Shamshibek Utebaev; Zamandash Party, Muktarbek Omurakunov; Ak Shumkar Party, Temir Sariyev.

Economy

GDP: 2007, $3.75 billion; 2006, $2.8 billion; 2003, $1.9 billion.

GDP growth rate: (2007) 8.2%.

Inflation rate: (2007) 10.2%.

GDP per capita: (2006 est.) $536.

Unemployment rate: (as of the end of 2006) 17.7%.

Natural resources: Abundant hydropower; significant deposits of gold and rare earth metals; locally exploitable coal, oil, and natural gas; other deposits of iron, bauxite, copper, tin, molybdenum, mercury, and antimony.

Agriculture: Products—tobacco, cotton, wheat, vegetables (potatoes, sugar beets, beans), fruits (apples, apricots, peaches, grapes), berries; sheep, goats, cattle; wool.

Industry: Types—small machinery (electric motors, transformers), light industry (cotton and wool processing, textiles, food processing), construction materials (cement, glass, slate), shoes, furniture, mining, energy.

Trade: Exports (2007)—$1.34 billion: cotton, wool, meat, tobacco, gold, mercury, uranium, hydropower, machinery, shoes. Partners—Russia 20.7%, Switzerland 19.9%, Kazakhstan 18.0%, Afghanistan 10.4%. Imports—$2.64 billion: oil and gas, machinery and equipment, foodstuffs. Partners—Russia 40.5%, China 14.7%, Kazakhstan 12.9%, Uzbekistan 5%. Total external debt mid-2008 was $3.16 billion, of which $2.19 billion was public debt.

PEOPLE AND HISTORY

According to recent findings of Kyrgyz and Chinese historians, Kyrgyz history dates back to 201 B.C. The earliest descendents of the Kyrgyz people, who are believed to be of Turkic descent, lived in the northeastern part of what is currently Mongolia. Later, some of their tribes migrated to the region that is currently southern Siberia and settled along the Yenisey River, where they lived from the 6th until the 8th centuries. They spread across what is now the Tuva region of the Russian Federation, remaining in that area until the rise of the Mongol Empire in the 13th century, when the Kyrgyz began migrating south. In the 12th century, Islam became the predominant religion in the region. Most Kyrgyz are Sunni Muslims of the Hanafi school.

During the 15th-16th centuries, the Kyrgyz people settled in the territory currently known as the Kyrgyz Republic. In the early 19th century, the southern territory of the Kyrgyz Republic came under the control of the Khanate of Kokand, and the territory was formally incorporated into the Russian Empire in 1876. The Russian takeover instigated numerous revolts against tsarist authority, and many Kyrgyz opted to move into the Pamir mountains or to Afghanistan. The suppression of the 1916 rebellion in Central Asia caused many Kyrgyz to migrate to China.

Soviet power was initially established in the region in 1918, and in 1924, the Kara-Kyrgyz Autonomous Oblast was created within the Russian Federal Socialist Republic. (The term Kara-Kyrgyz was used until the mid-1920s by the Russians to distinguish them from the Kazakhs, who were also referred to as Kyrgyz.) In 1926, it became the Kyrgyz Autonomous Soviet Socialist Republic. On December 5, 1936, the Kyrgyz Soviet Socialist Republic (SSR) was established as a full Union Republic of the U.S.S.R. During the 1920s, the Kyrgyz Republic saw considerable cultural, educational, and social change. Economic and social development also was notable. Literacy increased, and a standard literary language was introduced. The Kyrgyz language belongs to the Southern Turkic group of languages. In 1924, an Arabic-based Kyrgyz alphabet was introduced, which was replaced by Latin script in 1928. In 1941 Cyrillic script was adopted. Many aspects of the Kyrgyz national culture were retained despite suppression of nationalist activity under Joseph Stalin, who controlled the Soviet Union from the late 1920's until 1953.

The early years of glasnost in the late 1980s had little effect on the political climate in the Kyrgyz Republic. However, the republic's press was permitted to adopt a more liberal stance and to establish a new publication, Literaturny Kirghizstan, by the Union of Writers. Unofficial political groups were forbidden, but several groups that emerged in 1989 to deal with an acute housing crisis were permitted to function.

In June 1990, ethnic tensions between Uzbeks and Kyrgyz surfaced in an area of the Osh Oblast, where Uzbeks form a majority of the population. Violent confrontations ensued, and a state of emergency and curfew were introduced. Order was not restored until August 1990.

The early 1990s brought measurable change to the Kyrgyz Republic. The Kyrgyzstan Democratic Movement (KDM) had developed into a significant political force with support in parliament. In an upset victory, Askar Akayev, the president of the Kyrgyz Academy of Sciences, was elected to the presidency in October 1990. The following January, Akayev introduced new government structures and appointed a new government comprised mainly of younger, reform-oriented politicians. In December 1990, the Supreme Soviet voted to change the republic's name to the Republic of Kyrgyzstan. (In 1993, it became the Kyrgyz Republic.) In February 1991, the name of the capital, Frunze, was changed back to its pre-revolutionary name—Bishkek.

Despite these moves toward independence, economic realities seemed to work against secession from the U.S.S.R. In a referendum on the preservation of the U.S.S.R. in March 1991, 88.7% of the voters approved a proposal to retain the U.S.S.R. as a "renewed federation."

On August 19, 1991, when the State Committee for the State of Emergency (SCSE) assumed power in Moscow, there was an attempt to depose Akayev in Kyrgyzstan. After the coup collapsed the following week, Akayev and Vice President German Kuznetsov announced their resignations from the Communist Party of the Soviet Union (CPSU), and the entire politburo and secretariat resigned. This was followed by the Supreme Soviet vote declaring independence from the U.S.S.R. on August 31, 1991. Kyrgyz was announced as the state language in September 1991. (In December 2001, through a constitutional amendment, the Russian language was given official status.)

In October 1991, Akayev ran unopposed and was elected President of the new independent republic by direct ballot, receiving 95% of the votes cast. Together with the representatives of seven other republics, he signed the Treaty of the New Economic Community that same month. On December 21, 1991, the Kyrgyz Republic formally entered the new Commonwealth of Independent States (CIS).

In 1993, allegations of corruption against Akayev's closest political associates blossomed into a major scandal. One of those accused of improprieties was Prime Minister Chyngyshev, who was dismissed for ethical reasons in December. Following Chyngyshev's dismissal, Akayev dismissed the government and called upon the last communist premier, Apas Djumagulov, to form a new one. In January 1994, Akayev initiated a referendum asking for a renewed mandate to complete his term of office. He received 96.2% of the vote. A new constitution was passed by the parliament in May 1993. In 1994, however, the parliament failed to produce a quorum for its last scheduled

session prior to the expiration of its term in February 1995. President Akayev was widely accused of having manipulated a boycott by a majority of the parliamentarians. Akayev, in turn, asserted that the communists had caused a political crisis by preventing the legislature from fulfilling its role. Akayev scheduled an October 1994 referendum, overwhelmingly approved by voters, which proposed two amendments to the constitution—one that would allow the constitution to be amended by means of a referendum, and the other creating a new bicameral parliament called the Jogorku Kenesh.

Elections for the two legislative chambers—a 35-seat full-time assembly and a 70-seat part-time assembly—were held in February 1995 after campaigns considered remarkably free and open by most international observers, although the election-day proceedings were marred by widespread irregularities. Independent candidates won most of the seats, suggesting that personalities prevailed over ideologies. The new parliament convened its initial session in March 1995. One of its first orders of business was the approval of the precise constitutional language on the role of the legislature.

On December 24, 1995, President Akayev was reelected for another 5-year term with wide support (75% of vote) over two opposing candidates. President Akayev used government resources and state-owned media to carry out his campaign. Three (out of six) candidates were de-registered shortly before the election.

A February 1996 referendum—in violation of the constitution and the law on referendums—amended the constitution to give President Akayev more power. Although the changes gave the president the power to dissolve parliament, it also more clearly defined the parliament's powers. Since that time, the parliament has demonstrated real independence from the executive branch. An October 1998 referendum approved constitutional changes, including increasing the number of deputies in the lower house, reducing the number of deputies in the upper house, providing for 25% of lower house deputies to be elected by party lists, rolling back parliamentary immunity, introducing private property, prohibiting adoption of laws restricting freedom of speech and mass media, and reforming the state budget.

Two rounds of parliamentary elections were held on February 20, 2000 and March 12, 2000. With the full backing of the United States, the Organization for Security and Cooperation in Europe (OSCE) reported that the elections failed to comply with commitments to free and fair elections and hence were invalid. Questionable judicial proceedings against opposition candidates and parties limited the choice of candidates available to Kyrgyz voters, while state-controlled media only reported favorably on official candidates. Government officials put pressure on independent media outlets that favored the opposition. The presidential election that followed later in 2000 also was marred by irregulari-

ties and was not declared free and fair by international observers. March 2002 events in the southern district of Aksy, where six people protesting the arbitrary arrest of an opposition politician were shot dead by police, engendered nationwide protests. President Akayev initiated a constitutional reform process, which initially included the participation of a broad range of government, civil, and social representatives in an open dialogue. The reform process resulted in a February 2003 referendum, which was marred by voting irregularities. The amendments to the constitution approved by the referendum resulted in further control by the president and weakened the parliament and the Constitutional Court. Under the new constitution, the previously bicameral parliament became a 75-seat unicameral legislature following the 2005 parliamentary elections.

Parliamentary elections were held February 27 and March 13, 2005. The United States agreed with the findings of the OSCE that while the elections failed to comply with commitments to free and fair elections, there were improvements over the 2000 elections, notably the use of indelible ink, transparent ballot boxes, and generally good access by election observers.

Sporadic protests against widespread fraud during the parliamentary runoff elections in March 2005 erupted into calls for the government to resign. By March 24, 15,000 pro-opposition demonstrators called for the resignation of the president and his regime in Bishkek. Some injuries were reported when opposition demonstrators were attacked by police and pro-government thugs. Protestors seized the presidential administration building, after which President Akayev left the country for Kazakhstan, and then Russia. Looting broke out in parts of Bishkek on the evening of March 24, causing an estimated $100 million in damage. Opposition leaders, caught by surprise by developments, moved to form a broadly inclusive "Committee of National Unity." Opposition leader Kurmanbek Bakiyev was named acting President and Prime Minister. Bakiyev formed an alliance with primary rival Feliks Kulov whereby Kulov agreed to drop out of the presidential race if Bakiyev appointed him Prime Minister upon winning the elections.

Bakiyev easily won the July 10, 2005 presidential elections with over 88% of the vote. An unprecedented number of domestic and international observers monitored the elections and noted significant improvements in the electoral process over the parliamentary elections, although there were some reports of irregularities.

Opposition groups held a series of demonstrations in 2006, including the entire first week of November, to protest the lack of progress on reform, in particular of the constitution, promised by President Bakiyev in 2005. The Kyrgyz parliament adopted amendments to the constitution and President Bakiyev signed the amended constitution on November 9, 2006, which limited the powers of the president and increased the role of parliament. After the government resigned on December 19, the Kyrgyz parliament voted on December 30 to adopt new amendments restoring some of the presidential powers lost in November. President Bakiyev signed the changes into law January 15, 2007.

In March 2007, President Bakiyev appointed opposition leader Almaz Atambayev as Prime Minister. A week-long opposition protest in April 2007 ended when police cleared the main Ala-Too Square in Bishkek.

In September 2007, the Constitutional Court invalidated the November 2006 and December 2006 versions of the constitution. President Bakiyev then called a snap national referendum on a new version of the constitution, which strengthened the powers of the president and provided for a parliament elected by party lists. The new constitution was approved in an October 2007 referendum that was marked by serious irregularities, including massive inflation of turnout figures. President Bakiyev then dissolved the parliament, calling for new elections. The December 2007 elections were deeply flawed, with the new pro-presidential Ak Jol party gaining 71 out of 90 seats. The largest opposition party, Ata Meken, did not gain any seats, despite probably receiving enough votes to meet the regional thresholds required to enter parliament. Following the elections, a new government was formed, headed by the former energy minister, Igor Chudinov, as Prime Minister.

GOVERNMENT AND POLITICAL CONDITIONS

The 1993 constitution defines the form of government as a democratic republic. The executive branch includes a president and prime minister. The judicial branch comprises a Supreme Court, a Constitutional Court, local courts, and a Procurator-General.

President Bakiyev made constitutional reform a key element of his campaign in 2005, and the November 2006 protests stemmed in part from members of parliament's demands for action on that reform. Following parliamentary elections in December 2007, President Bakiyev announced that political reform was complete and that the new government would focus on economic growth and privatization.

ECONOMY

Despite the backing of major Western donors, including the International Monetary Fund (IMF), the Kyrgyz Republic has had economic difficulties following independence. Initially, these were a result of the breakup of the Soviet trading bloc and resulting loss of markets, which impeded the republic's transition to a free market economy. The government has reduced expenditures, ended most price subsidies, and introduced a value-added tax. Overall, the government appears committed to the transition to a market economy. Through economic stabilization and reform, the government seeks to establish a pattern of long-term consistent growth. Reforms led to the Kyrgyz Republic's accession to the World Trade Organization (WTO) on December 20, 1998.

The Kyrgyz Republic's economy was severely affected by the collapse of the Soviet Union and the resulting loss of its vast market. In 1990, some 98% of Kyrgyz exports went to other parts of the Soviet Union. Thus, the nation's economic performance in the early 1990s was worse than any other former Soviet republic except war-torn Armenia, Azerbaijan, and Tajikistan. While economic performance has improved in the last few years, difficulties remain in securing adequate fiscal revenues and providing a sufficient social safety net.

Agriculture is an important sector of the economy in the Kyrgyz Republic. By the early 1990s, the private agricultural sector provided between one-third and one-half of some harvests. In 2002 agriculture accounted for 35.6% of GDP and about half of employment. The Kyrgyz Republic's terrain is mountainous, which accommodates livestock raising, the largest agricultural activity. Main crops include wheat, sugar beets, cotton, tobacco, vegetables, and fruit. Wool, meat, and dairy products also are major commodities.

Agricultural processing is a key component of the industrial economy, as well as one of the most attractive sectors for foreign investment. The Kyrgyz Republic is rich in mineral resources but has negligible petroleum and natural gas reserves; it imports petroleum and gas. Among its mineral reserves are substantial deposits of coal, gold, uranium, antimony, and other rare-earth metals. Metallurgy is an important industry, and the government hopes to attract foreign investment in this field. The government has actively encouraged foreign involvement in extracting and processing gold. The Kyrgyz Republic's plentiful water resources and mountainous terrain enable it to produce and export large quantities of hydroelectric energy.

The Kyrgyz Republic's principal exports are nonferrous metals and minerals, woolen goods and other agricultural products, electric energy, and certain engineering goods. Its imports include petroleum and natural gas, ferrous metals, chemicals, most machinery, wood and paper products, some foods, and some construction materials. Its leading trade partners include Germany, Russia, China, and neighboring Kazakhstan and Uzbekistan.

The Kyrgyz Republic exports antimony, mercury, rare-earth metals, and chemical products to the United States. It imports grain, medicine and medical equipment, vegetable oil, paper products, rice, machinery, agricultural equipment, and meat from the United States. In 2007 Kyrgyz exports to the U.S. totaled $1.73 million; 2007 Kyrgyz imports from the U.S. totaled $48.6 million, much of which was equipment, food products, and commodities provided by assistance programs.

FOREIGN RELATIONS

The Kyrgyz Republic maintains close relations with other former Soviet countries, particularly with Kazakhstan and Russia. Recognizing Russia's concerns about the Russian-speaking minority in the Kyrgyz Republic, President Akayev was sensitive to potential perceptions of discrimination. For example, although the 1993 constitution designates Kyrgyz as the state language, an amendment to the constitution in 2001 granted official status to the Russian language. The amended December 30, 2006 constitution reaffirmed the status of the two languages.

While the Kyrgyz Republic initially remained in the ruble zone, stringent conditions set by the Russian Government prompted the Kyrgyz Republic to introduce its own currency, the som, in May 1993. Withdrawal from the ruble zone was done with little prior notification and initially caused tensions in the region. Both Kazakhstan and Uzbekistan temporarily suspended trade, and Uzbekistan even introduced restrictions tantamount to economic sanctions. Both nations feared an influx of rubles and an increase in inflation. Uzbekistan and Kazakhstan's hostility toward the Kyrgyz Republic was short-lived, and the three nations signed an

agreement in January 1994 creating an economic union. Economic cooperation within the region, though, is still hampered by unilateral barriers created by the Kyrgyz Republic's neighbors. The Kyrgyz Republic has been active in furthering regional cooperation, such as joint military exercises with Uzbek and Kazakh troops.

Turkey has sought to capitalize on its cultural and ethnic links to the region and has found the Kyrgyz Republic receptive to cultivating bilateral relations. The Kyrgyz Republic is a member of the OSCE, the CIS, the Shanghai Cooperation Organization (SCO), the WTO, and the United Nations.

Since December 2001, the Kyrgyz Republic has hosted Manas Air Base, an important logistical hub for the Coalition effort in Afghanistan.

U.S.-KYRGYZ RELATIONS

The U.S. Government provides humanitarian assistance, non-lethal military assistance, and assistance to support economic and political reforms. It also has supported the Kyrgyz Republic's requests for assistance from international organizations. The United States helped the Kyrgyz Republic accede to the WTO in December 1998. U.S. assistance aids the Kyrgyz Republic in implementing necessary economic, health sector, and educational reforms, and supports economic development and conflict resolution in the Ferghana Valley.

TRAVEL

Consular Information Sheet

August 29, 2008

Country Description: The Kyrgyz Republic, a mountainous country of five million people, is undergoing political and economic change. Tourist facilities are not highly developed, and many of the goods and services taken for granted in other countries are not yet widely available.

Entry Requirements: A passport and visa are required. American citizens can obtain a one-month single-entry, non-extendable tourist visa upon arrival at the "Manas" International Airport outside Bishkek for a $36 fee without invitation or sponsorship. Newly enacted legislation requires that all foreigners present in the Kyrgyz Republic for more than sixty days register with the Kyrgyz Department of Visa and Passport Control. Failure to do so may cause difficulties when exiting the country. Individuals traveling to Kyrgyzstan to perform religious work or work in affiliation with any religious organization in any capacity are required by Kyrgyz law to declare so on their visa applications. Failure to do so may lead to difficulties with local law enforcement as it is considered a violation of Kyrgyz law to engage in activities not matching the purpose of travel indicated on an individual's visa. In general, travelers should apply for the correct category of visa for their purpose of travel. Travelers cannot obtain a tourist visa at land borders or other airports. American citizens visiting the Kyrgyz Republic are not required to register with the Office of Visas and Registration. The Embassy recommends that Americans traveling in the Kyrgyz Republic also obtain Kazakh visas, as commercial air travel out of the Kyrgyz Republic is limited and Americans may need to travel through Kazakhstan to return to the United States. For further information regarding entry/exit requirements, contact the Embassy of the Kyrgyz Republic at 2630 Massachusetts Avenue, NW, Washington, DC 20008, telephone: (202) 338-5141, fax: (202) 742 6501. Visit the Embassy of the Kyrgyz Republic web site at http://www.kgembassy.org for the most current visa information.

Safety and Security: The Department of State urges U.S. citizens to avoid all travel to rural areas along the Kyrgyz-Uzbek and Kyrgyz-Tajik borders, and all areas to the south and west of the provincial capital of Osh. Security conditions in these parts of the southern Kyrgyz Republic differ from security conditions in the north, and the threat of violence against foreigners in the southern Kyrgyz Republic continues. Hostage-taking incidents involving foreigners occurred during the summers of 1999 and 2000, including one incident in the summer of 2000 involving American citizens. In 2007, there were reports of attempted "bride-kidnappings" in rural areas. While foreigners are not believed to be intentional targets, an American female was held against her will for several days in one reported incident. In 2006, suspected Islamic militants attacked a border post on the Kyrgyz-Tajik border, and ensuing skirmishes took place between the militants and Kyr-

gyz military forces throughout the southern Batken region. Land mines in Batken Oblast and near the Kyrgyz-Tajik border continue to be a concern. There are currently restrictions for U.S. Government employees traveling to areas of the Kyrgyz Republic south and west of Osh and in rural areas along the Kyrgyz-Uzbek border because of the volatile security situation in these areas.

Supporters of extremist groups such as the Islamic Movement of Uzbekistan (IMU), the Islamic Jihad Union (IJU), al-Qaeda, and the Eastern Turkistan Islamic Movement remain active in Central Asia. These groups have expressed anti-U.S. sentiments and may attempt to target U.S. Government or private interests in the region, including in the Kyrgyz Republic. Terrorist attacks involving the use of suicide bombers have previously taken place in neighboring Uzbekistan. Terrorists do not distinguish between official and civilian targets. Because of increased security at official U.S. facilities, terrorists are seeking softer civilian targets such as residential areas, clubs and restaurants, places of worship, hotels, schools, outdoor recreation events, resorts, beaches, maritime facilities, airports and aircraft.

In the past year, demonstrations and protests have occurred frequently throughout the Kyrgyz Republic. Many demonstrations in Bishkek occur in front of the Presidential Administration building (White House) and on Alatoo Square in the city center. These demonstrations often happen without warning, and the Embassy does not always have advance information about them. Therefore, all Americans are urged to avoid the vicinity of all protests, because even protests that are intended to be peaceful can turn confrontational and possibly escalate into violence.

For the latest security information, Americans traveling abroad should regularly monitor the Department of State, Bureau of Consular Affairs' web site at http://travel.state.gov, where the current Travel Warnings and Travel Alerts, as well as the Worldwide Caution, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S. and Canada, or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: The U.S. Embassy advises U.S. citizens to exercise caution in urban areas of the Kyrgyz Republic due to the high rate of violent crime against foreigners. Travelers arriving at Manas International Airport should arrange their transportation from the airport in advance. Foreign travelers have been the victims of extortion by airport taxi drivers, who appeared in some cases to be colluding with airport personnel to identify their victims. Travelers should not take public transportation or walk after dark, and should be extremely cautious in or near hotels, bars, parks and all places that attract an expatriate clientele.

The Kyrgyz Republic has a high rate of violent crime due to unemployment and a large number of organized gangs. Muggings often occur after dark and can be quite violent, leaving the victim severely injured. Other common crimes include auto theft, mugging, and pick pocketing in crowded places such as markets, Internet cafes and on public transportation. U.S. citizens have been the victims of such crimes as rape, assault, kidnapping and robbery while in urban and rural parts of Kyrgyzstan, and there have been reports of U.S. citizens who were robbed by groups of young men who had followed them back to their residences from hotels and bars.

Police officers rarely speak English and no victims' assistance programs are available. Medical and psychiatric care for victims is limited.

Harassment and extortion by people who purport to be Kyrgyz police officers are common. According to Kyrgyz law, any person claiming to be a police officer must show identifying documents on demand. U.S. citizens should not act upon requests by people, whether in civilian dress or in police uniform, if they have no official identification. Also U.S. citizens should not get into cars with someone they do not know, even if the person claims to be a police officer.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

The local equivalent to the "911" emergency lines in Kyrgyzstan are: 101 for fire; 102 for police; 103 for first aid ambulance (state-funded); 151 (from landline), 0 312 684466 (from landline or cellphone); and 161 for rescue service (under the Ministry of emergency situations).

Medical Facilities and Health Information: Medical services in the Kyrgyz Republic are extremely limited. Elderly travelers and those with existing health problems may be at risk due to inadequate medical facilities. The U.S. Embassy strongly recommends that travelers to the Kyrgyz Republic carry medical evacuation insurance in case of emergency. The Consular Section of the U.S. Embassy in Bishkek maintains a list of foreign-trained and local physicians who have agreed to give medical assistance to Americans. This list is available on the Embassy web site at http://bishkek.usembassy.gov.

Some HIV/AIDS entry restrictions exist for visitors to and foreign residents of Kyrgyzstan. There is no legal requirement for HIV/AIDS testing during the visa application or registration process. Kyrgyz law does state that if a foreign citizen refuses to submit to HIV/AIDS testing when

requested while in Kyrgyzstan, that person could be deported. Please verify this information with the Embassy of Kyrgyzstan at http://www.kgembassy.org before you travel.

Tuberculosis is an increasingly serious health concern in Kyrgyzstan. For further information, please consult the CDC's Travel Notice on TB available at http://wwwn.cdc.gov/travel. Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's website at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) web site at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith/en.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning the Kyrgyz Republic is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

Most of the Kyrgyz Republic's road infrastructure consists of two-lane roads, which are all in various states of disrepair, and are poorly marked and lit. Many local drivers tend to disobey fundamental traffic laws—such as stopping at red lights. As a result, driving can be very dangerous. Accidents involving severe injury and/or death are not uncommon.

Drivers must exercise particular caution to avoid uneven pavement, potholes, open drains and manholes. Night driving should be avoided, as roads are inadequately lit. In winter, roads are seldom plowed and ice and snow make the poor driving conditions even more hazardous. Pedestrians routinely walk in the road, often wearing dark clothes at night, necessitating even greater caution for drivers. Mountain roads in the Kyrgyz Republic are often narrow and treacherous, and may close without notice due to snow, ice or rockslides. Guardrails and barriers preventing falling rocks are often missing. The Kyrgyz Republic does not have a roadside assistance infrastructure. Towing companies do not exist. Although mechanics are available in cities there is little organized oversight or certification of their practices or abilities. Rest areas are infrequent and very primitive. Service stations are generally available in and near cities, but the fuel they provide may be adulterated or of poor quality.

The road between Almaty, Kazakhstan and Bishkek, Kyrgyz Republic, is especially treacherous at night or during poor weather. Americans and other travelers have been killed in traffic accidents on that road, and travel at night is not recommended.

Generally, speed limits are 60 km per hour in the cities and 90 km per hour in rural areas. Kyrgyz law mandates that all automobile passengers wear seat belts and that motorcycle riders wear helmets. International driving permits are recognized in the Kyrgyz Republic.

Drivers may face harassment by traffic police, who have been known to demand payment for arbitrary "fines" for purported infractions. The Kyrgyz Republic has a "zero tolerance" policy for driving under the influence of alcohol.

Public transportation in the Kyrgyz Republic is limited to buses, taxis, and very few intercity trains. Travelers should be particularly careful when using public transportation. Buses tend to be very crowded and can be unsafe and unreliable. Taxis too can be dangerous. Due to the danger of theft or assault, travelers should avoid entering a cab that already contains passengers. Taxis are seldom metered, and travelers should negotiate a fare prior to entering a cab and be aware that cab drivers often try to charge foreigners a high fare. Drivers of vehicles that are not taxis are often willing to drive people for fares. However, U.S. citizens should avoid using any of these "private taxis" and unmarked taxis.

Aviation Safety Oversight: As there is no direct commercial air service between the United States and the Kyrgyz Republic, the U.S. Federal Aviation Administration (FAA) has not assessed the Kyrgyz Republic's Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's web site at http://www.faa.gov.

Special Circumstances: Kyrgyz customs authorities may enforce strict regulations concerning temporary importation into or export from the Kyrgyz Republic of items such as antiquities or hunting trophies. It is advisable to contact the Embassy of the Kyrgyz Republic in Washington at 2360 Massachusetts Avenue NW, Washington, DC 20008, telephone: (202) 338-5141, fax: (202) 386-7550, or on the Internet at http://www.kgembassy.org for specific information regarding customs requirements.

The Kyrgyz Republic is a cash-only economy. The banking system is not well developed. ATMs are available, but the security of these machines remains untested. A hotel or bank may, on occasion, accept traveler's checks or credit cards, but the fees can be as high as 20 percent for traveler's checks.

U.S. citizens are encouraged to carry a copy of their U.S. passport with them at all times, so that, if questioned by local officials, proof of identity and citizenship are readily available.

In accordance with the Vienna Convention on Consular Relations and

certain bilateral treaties, a consular officer from the U.S. Embassy must be given access to any U.S. citizen arrested in the Kyrgyz Republic. U.S. citizens who are arrested or detained should ask that the U.S. Embassy be contacted immediately. This is generally recognized, though there can be a sizeable delay in notification times depending on the local authorities' interpretation of the case's legal status.

The Kyrgyz Republic is an earthquake-prone country. General information about natural disaster preparedness is available via the Internet from the U.S. Federal Emergency Management Agency (FEMA) at http://www.fema.gov.

Hunting and trekking are popular sports for locals and tourists in the Kyrgyz Republic; however, American citizens traveling to the Kyrgyz Republic should know that hunting in the Kyrgyz Republic without proper licenses is illegal. It is illegal to import or own firearms in the Kyrgyz Republic without a permit issued by the Kyrgyz government. Foreign hunters who do not have official permission to hunt or take trophies out of the country may face criminal and civil charges. Both hunting and trekking infrastructures are underdeveloped with limited services, especially in the high mountainous regions popular with trekkers and hunters. Avalanches and landslides are common in these mountainous regions, often cutting off villages for weeks at a time. These villages and hunting areas are in isolated, rugged, mountainous areas inaccessible by the limited rescue services available in the Kyrgyz Republic. Americans traveling to the Kyrgyz Republic to hunt or trek need to be aware of the risks involved. The Embassy recommends that all Americans register with the Embassy in Bishkek for the duration of their stay in the country.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating the Kyrgyz Republic's laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession, use, or trafficking in illegal drugs in The Kyrgyz Republic are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in the Kyrgyz Republic are encouraged to register with the nearest U.S. Embassy or Consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within the Kyrgyz Republic. Americans without Internet access may register directly with the nearest U.S. Embassy or Consulate. By registering, American citizens make it easier for the Embassy or Consulate to contact them in case of emergency. The U.S. Embassy in Bishkek is located at 171 Prospect Mira, 720016 Bishkek, Kyrgyz Republic. The phone number is 996-312-551-241, fax: 996-517-777-202, and website: http://bishkek.usembassy.gov.

Intercountry Adoption

November 2008

The information in this section has been edited from a report available through the U.S. Department of State Office of Children's Issues. For more information detailed, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Kyrgyzstan is not party to The Hague Convention on Protection of Children and Co-operation in Respect of Intercountry Adoption (Hague Adoption Convention).

Who Can Adopt? To bring an adopted child to United States from Kyrgyzstan, you must be found eligible to adopt by the United States Government. In addition to the United States requirements for adoptive parents, Kyrgyzstan also has the following requirements for adoptive parents.

Residency Requirements: Prior to the adoption, prospective adoptive parents must reside with the child for a minimum of one week at the child's habitual place of residence in the Kyrgyzstan. During this pre-adoption bonding period, a psychologist from the Ministry of Education monitors the interaction between the prospective adoptive parent(s) and the child, and reports to the Ministry of Education. This prior visit requirement may be waived by the Ministry of Education if the adopting parents submit a statement of hardship in accommodating the two-trip requirement. This cannot be waived, however, in cases where the child suffers from serious mental or physical disorders.

Age Requirements: Under Kyrgyz law, prospective adoptive parents must be at least 18 years old.

Marriage Requirements: Both married and single people may adopt Kyrgyz children; however, two people who are not married to each other cannot adopt a child together.

Other Requirements: Kyrgyz law prevents homosexual individuals or couples from adoption. Single parents may be required to present a sworn statement that they are not homosexual.

Who Can Be Adopted? Kyrgyzstan has specific requirements that a child must meet in order to be eligible for adoption. In addition to these requirements, a child must meet the definition of an orphan under United States law for you to bring him or her home back to the United States.

Kyrgyz Adoption Authority: Ministry of Education, Department for Extracurricular Education and Protection of Children's Rights (DEEPCR)

The Process: The first step in adopting a child is usually to select a licensed agency in the United States that can help with your adoption. Adoption service providers must be licensed by the United States state in which they operate.

Under Kyrgyz law, adoption agencies are not recognized in Kyrgyzstan. Adoption service providers have to work either as independent facilitators or with legal firms or non-profit organizations. The current Kyrgyz law is ambiguous about the use of intermediaries between prospective adoptive parents and children eligible for adoption. Since 2005, due to the expressed wish of the Kyrgyz authorities to have control over the future welfare of the adopted children, the Ministry of Education started working with United States-based adoption agencies. These accredited agencies are responsible for reporting about the welfare of the adopted children to the Kyrgyz Government on a regular basis. Currently the Ministry of Education of the Kyrgyzstan has agreements with five United States-based adoption agencies to facilitate adoptions from Kyrgyzstan. Please contact the adoption specialist at the Ministry of Education or the United States Embassy in Bishkek for contact information for these agencies (the list is not available on-line at this time). United States citizens who have lived in the Kyrgyzstan for several years and plan to remain in the Kyrgyzstan for an extended period of time following the adoption do not have to use an agency.

To bring an adopted child from Kyrgyzstan to the United States, you must apply to be found eligible to adopt (Form I-600A) by the USCIS.

Once prospective adoptive parents obtain a home study from their state of residence and an I-600A from USCIS, the adoption agency representing the prospective parents then forwards the "intent to adopt" statement and completed home study to the Ministry of Education in Kyrgyzstan.

In addition to meeting the United States requirements for adoptive parents, you need to meet the requirements of Kyrgyzstan.

The Ministry of Education's Department for Extracurricular Education and Protection of Children's Rights (DEEPCR), reviews the dossier. Please note that the length of time required for dossier processing is unpredictable. If you are eligible to adopt, and a child is available for intercountry adoption, the central adoption authority in Kyrgyzstan will provide you with a referral to a child.

Based on the expressed preferences of the prospective adoptive parents, DEEPCR selects three children from its database of children eligible for intercountry adoption. DEEPCR, the Custody and Guardianship Committee of the local administration in the region where the orphanage is located, and the local adoption agency coordinator select one appropriate candidate for adoption. The adoption agency will notify the parents of the decision. The parents then decide if they will accept the child they have been offered. Once the parents agree to adopt the child and the parents' complete dossier is submitted to DEEPCR, the prospective parents are free to travel to the Kyrgyzstan and proceed with their petition for adoption.

Role of the Adoption Authority: Kyrgyzstan, prospective parents are required to have a minimum of seven days of personal contact with the orphan they chose. This means that prospective adoptive parents must stay in the town where the orphan is living and visit the orphan on a regular basis during a one-week period. A Ministry of Education psychologist will monitor this interaction and report to DEEPCR whether the prospective parents and child appear to be a good match.

Role of the Court: Based on the psychologist's recommendation, as well as its own review of the family's file, the Custody and Guardianship Committee of the local administration in the region where the orphanage is located makes its own assessment and then refers the case to the district civil court having jurisdiction over the child's place of residence in the Kyrgyzstan.

Documents Required: The adoption application for the DEEPCR of the Kyrgyz Ministry of Education should include all of the documents listed below. It is important to note, however, that this is not necessarily an exhaustive list and that Kyrgyz authorities involved in various stages of the adoption process may request additional documentation.

- A written statement of the prospective adoptive parents' intent to adopt a child or children. The statement should include the prospective parents' full names and address, as well as any preferences they may have with regard to the child's gender, age, health/medical condition, etc. The statement should include the prospective parent's pledge to provide adequate living conditions for the child and to register the child with the Kyrgyz Embassy in the Washington, D.C. within one month after arriving in the United States; translated and notarized;

- Copies of the parents' passports, translated and notarized;

- A home study report, drafted by a licensed social worker, attesting to the prospective parents' living conditions and ability to provide for the child (must be legalized);

- Copy of the parents' marriage certificate (must be legalized);

- Prospective parents' mental and physical examination report from a doctor in the United States (can be included in the home study). The report should state that no adverse information impacting on their suitability to raise a child has been found, translated and notarized;

- Reference letter from parents' place of employment and parents' current bank statement (must be legalized);
- A statement certifying that the prospective parents have not previously had their parental rights terminated or limited by the courts for any reason. (This is normally included as part of the home study report.) (legalized within the home study);
- A statement of no criminal record by the police authorities where the parents' live (must be legalized);
- Written statement from the Kyrgyz district administration's guardianship body where the child resides stating that it has no objection to the adoption of the child by the prospective adoptive family;
- A letter of guarantee stating that the child will go to school and will be covered by health insurance;
- A letter from parents' family doctor, stating that the child will be treated by him/her when child enters the United States (must be legalized);
- A statement of guarantee from the adoption agency stating its commitment to submit information about the child's living conditions, family situation and health during the post-adoption period (until the child turns 14). This information must be submitted to the Kyrgyz Ministry of Education twice a year; and
- Proof that the United States Government will allow the child to enter and reside permanently in the United States. (The Kyrgyz Government will accept the approved I-600A form for this purpose.).

For updates on document requirements and information on how to authenticate documents, visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Bringing Your Child Home: Once your adoption is complete (or you have obtained legal custody of the child), there are a few more steps to take before you can head home. Specifically, you need to apply for several documents for your child before he or she can travel to the United States, such as a birth certificate, a passport or travel document for your child from the country in which he or she was born, and a U.S. Immigration Visa. For detailed and updated information on how to obtain these documents, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

Child Citizenship Act: For adoptions finalized abroad: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when he or she enters the United States as lawful permanent residents. For adoptions finalized in the United States: The Child Citizenship Act of 2000 allows your new child to acquire American citizenship automatically when the court in the United States issues the final adoption decree. To learn more, review the *Intercountry Adoption* section on this publication and visit the USCIS Intercountry Adoption website at http://adoption.state.gov.

After Adoption: The Kyrgyzstan requires post placement reports twice a year until the child is fourteen years old. Adoptive families must submit their reports through their adoption agencies to be forwarded to the Kyrgyz Ministry of Education.

LAOS

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Lao People's Democratic Republic

PROFILE

Geography

Area: 236,800 sq. km. (91,430 sq. mi.); slightly larger than Utah.
Cities: Capital—Vientiane (2006 pop. est. 711,919). Other principal towns—Savannakhet, Luang Prabang, Pakse, Thakhek.
Terrain: Rugged mountains, plateaus, alluvial plains.
Climate: Tropical monsoon; rainy season (May to November); dry season (November to April).

People

Nationality: Noun and adjective—Lao (sing. and pl.).
Population: (2008 est.) 6.7 million.
Annual growth rate: (2008) 2.3%.
Ethnic groups: Tai-Kadai language family (6 ethnic groups)—66.2%; Austro-Asiatic (Mon-Khmer and Viet-Muong) language family (30 ethnic groups)—22.8%; Hmong-Yao (2 ethnic groups)—7.4%; Tibeto-Burman (8 ethnic groups)—2.7%; other ethnic groups (including Vietnamese and Chinese)—0.9%.
Religions: Buddhism—65%; Christianity—1.3%; others (including animism, Ba'hai, and Islam)-33.7%.
Languages: Lao (official), French, English, and various ethnic languages.
Education: Literacy—69%.
Health: (2008) Infant mortality rate-79.6/1,000. Life expectancy—56 years.
Work force: (2.1 million, 2006) Agriculture—78.5%; industry and services—21.5% (2006).

Government

Type: Communist state.
Government branches: Executive—President (head of state); Chairman, Council of Ministers (prime minister and head of government); 11-member Politburo; 55-member Central Committee. Legislative—115-seat National Assembly. Judicial—district, provincial, and a national Supreme Court.
Political parties: Lao People's Revolutionary Party (LPRP)—only legal party.
Political subdivisions: 16 provinces, and Vientiane prefecture.

Economy

GDP: (2007 est.) $4.2 billion.
Per capita income: (2007 est.) $710.
GDP growth rate: (2007 est.) 7%.
Natural resources: Hydroelectric power, timber, and minerals.
Agriculture: (41.3% of GDP, 2007 est.): Primary products—glutinous rice, coffee, corn, sugarcane, vegetables, tobacco, ginger, water buffalo, pigs, cattle, poultry, sweet potatoes, cotton, tea, and peanuts.
Industry: (32.2% of GDP, 2007 est.): Primary types—garment manufacturing, electricity production, copper, gold, gypsum, and tin mining, wood and wood processing, cement manufacturing, agricultural processing, and tourism.
Industrial growth rate: (2007 est.) 12%.
Services: (2007 est.) 26.5% of GDP.
Trade: Exports (2007 est.)—$970 million: garments, gold and copper, electricity, wood and wood products, coffee and other agricultural products, rattan, and tin. Major markets—Thailand, Vietnam, France, and Germany. Imports (2007 est.)—$1.376 billion. Major imports—fuel, food, consumer, goods, machinery and equipment, vehicles and spare parts. Major suppliers—Thailand, China, Vietnam, Singapore.

PEOPLE

Laos' population was estimated at 6.7 million in mid-2008, dispersed unevenly across the country. Most people live in valleys of the Mekong River and its tributaries. Vientiane prefecture, the capital and largest city, had about 711,919 residents in 2006. The country's population density was 27/sq. km.

About half the country's people are ethnic Lao, the principal lowland

inhabitants as well as the politically and culturally dominant group. The Lao are descended from the Tai people who began migrating southward from China in the first millennium A.D. Mountain tribes of Hmong-Yao, and Tibeto-Burman (Kor and Phounoy) as well as Tai ethno-linguistic heritage are found in northern Laos. Until recently, they were known as Lao Sung or highland Lao. In the central and southern mountains, Austro Asiatic (Mon-Khmer and Viet-Muong) tribes, formerly known as Lao Theung or mid-slope Lao, predominate. Some Vietnamese and Chinese minorities remain, particularly in the towns, but many left in two waves-after partial independence in the late 1940s and again after 1975.

The predominant religion is Theravada Buddhism. Animism is common among the mountain tribes. Buddhism and spirit worship coexist easily. There also are small numbers of Christians and Muslims.

The official and dominant language is Lao, a tonal language of the Tai linguistic group. Minorities speak an assortment of Mon-Khmer, Hmong-Yao, and Tibeto-Burman languages. French, once common in government and commerce, has declined in usage, while knowledge of English—the language of the Association of Southeast Asian Nations (ASEAN)—has increased in recent years. The government is encouraging officials and students to learn English. High school students are required to take either French or English; the majority today choose English. The government plans to introduce English at the primary school level by 2010.

HISTORY

Laos traces its first recorded history and its origins as a unified state to the emergence of the Kingdom of Lan Xang (literally, "million elephants") in 1353. Under the rule of King Fa Ngum, this powerful and wealthy kingdom covered much of what today is Thailand and Laos. His successors, especially King Setthathirat in the 16th century, helped establish Buddhism as the predominant religion of the country. By the 17th century, the kingdom of Lan Xang entered a period of decline marked by dynastic struggle and conflicts with its neighbors. In the late 18th century, the Siamese (Thai) established suzerainty over much of what is now Laos. The region was divided into principalities centered on Luang Prabang in the north, Vientiane in the center, and Champassak in the south. Following their colonization of Vietnam, the French supplanted the Siamese and began to integrate all of Laos into the French empire. The Franco-Siamese treaty of 1907 defined the present Lao boundary with Thailand.

During World War II, the Japanese occupied French Indochina, including Laos. King Sisavang Vong of Luang Prabang was induced to declare independence from France in 1945, just prior to Japan's surrender. During this period, nationalist sentiment grew. In September 1945, Vientiane and Champassak united with Luang Prabang to form an independent government under the Free Laos (Lao Issara) banner. The movement, however, was short-lived. By early 1946, French troops reoccupied the country and conferred limited autonomy on Laos following elections for a constituent assembly.

During the first Indochina war between France and the communist movement in Vietnam, Prince Souphanouvong formed the Pathet Lao (Land of Laos) resistance organization committed to the communist struggle against colonialism. Laos was not granted full sovereignty until the French defeat by the Vietnamese and the subsequent Geneva peace conference in 1954. Elections were held in 1955, and the first coalition government, led by Prince Souvanna Phouma, was formed in 1957. The coalition government collapsed in 1958, amidst increased polarization of the political process. Rightist forces took over the government.

In 1960, Kong Le, a paratroop captain, seized Vientiane in a coup and demanded the formation of a neutralist government to end the fighting. The neutralist government, once again led by Souvanna Phouma, was not successful in holding power. Rightist forces under Gen. Phoumi Nosavan supplanted it later that same year. Subsequently, the neutralists allied themselves with the communist insurgents and began to receive support from the Soviet Union. Phoumi Nosavan's rightist regime received support from the United States.

A second Geneva conference, held in 1961-62, provided for the independence and neutrality of Laos. Soon after accord was reached, the signatories accused each other of violating the terms of the agreement, and with superpower support on both sides, the civil war soon resumed. Although Laos was to be neutral, a growing American and North Vietnamese military presence in the country increasingly drew Laos into the second Indochina war (1954-75). For nearly a decade, Laos was subjected to extremely heavy bombing as the U.S. sought to interdict the portion of the Ho Chi Minh Trail that passed through eastern Laos. Unexploded ordnance, particularly cluster munitions, remains a major problem.

In 1972, the communist People's Party renamed itself the Lao People's Revolutionary Party (LPRP). It joined a new coalition government in Laos soon after the Vientiane cease-fire agreement in 1973. Nonetheless, the political struggle among communists, neutralists, and rightists continued. The fall of Saigon and Phnom Penh to communist forces in April 1975 hastened the decline of the coalition in Laos. Several months after these communist victories, the Pathet Lao entered Vientiane. On December 2, 1975, the king abdicated his throne and the communist Lao People's Democratic Republic (LPDR) was established.

The new communist government imposed centralized economic decision-making and broad security measures, including control of the media and the arrest and incarceration of many members of the previous government and military in "re-education camps." These draconian policies and deteriorating economic condi-

tions, along with government efforts to enforce political control, prompted an exodus of lowland Lao and ethnic Hmong from Laos. About 10% of the Lao population sought refugee status after 1975, many of whom resettled in third countries, including the United States. From 1975 to 1996, the U.S. resettled some 250,000 Lao refugees from Thailand, including 130,000 Hmong. The last major resettlement to the United States of about 15,000 Hmong from the Wat Tham Krabok camp was in 2004.

Over time, the Lao Government closed the re-education camps and released most political prisoners. By the end of 1999, more than 28,900 Hmong and lowland Lao had voluntarily repatriated to Laos—3,500 from China and the rest from Thailand. The Office of the United Nations High Commissioner for Refugees (UNHCR) monitored returnees for a number of years and reported no evidence of systemic persecution or discrimination against returnees per se. UNHCR closed its Laos office at the end of 2001.

GOVERNMENT AND POLITICAL CONDITIONS

The only legal political party is the Lao People's Revolutionary Party (LPRP). The head of state is President Choummaly Sayasone. The head of government is Prime Minister Bouasone Bouphavanh. Government policies are determined by the party through the all-powerful eleven-member Politburo and the 55-member Central Committee. Important government decisions are vetted by the Politburo. Laos adopted its Constitution in 1991, amending it most recently in 2003. The National Assembly, which has added seats at every election, approves all new laws, although the executive branch retains the authority to issue binding decrees. The most recent elections took place in June 2006, when the National Assembly was expanded to 115 members. Laos has enacted a number of new laws in recent years, but the country is still governed largely through the issuance of decrees.

Since the end of the Indochina conflict, a low-level insurgency against the regime has continued. Incidents have included a series of bombings in Vientiane during the summer of 2000 and renewed spikes of violence in 2003 and 2004 against various types of land transportation and public markets. There were reports of continued fighting in 2005 and 2007. In late 2006 and 2007, several hundred former fighters and family members surrendered to Lao authorities. The United States does not endorse or support violent activities carried out against the Lao Government.

Principal Government Officials

Last Updated: 11/12/08

Lao officials are addressed by the first element in their names.

Pres.: **CHOUMMALI Saignason, Lt. Gen.**
Vice Pres.: **BOUN-GNANG Volachit**
Prime Min.: **BOUASONE Bouphavanh**
Dep. Prime Min.: **ASANG Laoli, Maj. Gen.**
Dep. Prime Min.: **DOUANGCHAI Phichit**
Dep. Prime Min.: **SOMSAVAT Lengsavat**
Dep. Prime Min.: **THONGLOUN Sisoulit**
Min. of Agriculture & Forestry: **SITAHENG Latsaphone**
Min. of Commerce: **SOULIVONG Daravong**
Min. of Communications, Transport, Posts, & Construction: **SOMMATH Pholsena**
Min. of Education: **SOMKOT Mangnormek**

Min. of Energy & Mining:
Min. of Finance: **SOMDY Douangdy**
Min. of Foreign Affairs: **THONGLOUN Sisoulit**
Min. of Industry & Commerce: **NAM Vignaket**
Min. of Information & Culture: **MOUNKEO Olaboun**
Min. of Justice: **CHALEUAN Yapaoher**
Min. of Labor & Social Welfare: **ONECHANH Thammavong**
Min. of National Defense: **DOUANGCHAI Phichit, Maj. Gen.**
Min. of Public Health: **PONMEK Dalaloi, Dr.**
Min. of Public Security: **THONGBANH Sengaphone**
Min. to the Prime Min.'s Office & Head of Public Admin. & Civil Authority: **BOUNPHENG Mounphosay**
Min. to the Prime Min.'s Office: **BOUASY Lovansay**
Min. to the Prime Min.'s Office: **KHAMOUANE Bouppha**
Min. to the Prime Min.'s Office: **ONNEUA Phommachanh**
Min. to the Prime Min.'s Office: **SAISENGLI Tengbliachu**
Min. & Chmn. of National Mekong Ctte.: **KHAMLOUAD Sitlakone**
Min. & Chmn. of National Tourism Authority: **SOMPHONG Mongkhonvilay**
Min. & Head of Cabinet, Pres.'s Office: **SOUBANH Sritthirath**
Min. & Head of Govt. Secretariats: **CHEUANG Sombounkhanh**
Min. & Head of Science, Technology, & Environment Agency: **BOUNTIEM Phitsamay**
Chmn. Planning & Investment Ctte.: **SOULIVONG Dalavong**
Chmn. State Control Commission: **ASANG Laoli, Maj. Gen.**
Governor, Bank of Lao PDR: **PHOUPHET Khamphounvong**
Ambassador to the US: **PHIANE Philakone**
Permanent Representative to the UN, New York: **KANIKA Phommachanh**

Laos maintains an embassy in the United States at 2222 S Street NW, Washington, D.C. 20009 (tel: 202-332-6416).

ECONOMY

Laos is a poor, landlocked country with an inadequate infrastructure and a largely unskilled work force. The country's per capita income in 2007 was estimated to be $710. Agriculture, mostly subsistence rice farming, dominates the economy, employing an estimated 78% of the population and producing 41.3% of GDP. Domestic savings are low, forcing Laos to rely heavily on foreign assistance and concessional loans as investment sources for economic development. In 2006, donor-funded programs accounted for 13% of GDP and 70% of the capital budget. In 2007, the country's foreign debt was estimated at $4.47 billion.

Following its accession to power in 1975, the communist government imposed a harsh, Soviet-style command economy system, replacing the private sector with state enterprises and cooperatives; centralizing investment, production, trade, and pricing; and creating barriers to internal and foreign trade. Within a few years, the Lao Government realized its economic policies were preventing, rather than stimulating, growth and development. No substantive reform was introduced, however, until 1986 when the government announced its "new economic mechanism" (NEM). Initially small in scale, the NEM was expanded to include a range of reforms designed to create conditions conducive to private sector activity.

Prices set by market forces replaced government-determined prices. Farmers were permitted to own land and sell crops on the open market. State firms were granted increased decision-making authority and lost most of their subsidies and pricing advantages. The government set the exchange rate close to real market levels, lifted trade barriers, replaced import barriers with tariffs, and gave private sector firms direct access to imports and credit.

In 1989, the Lao Government reached agreement with the World Bank and the International Monetary Fund on additional reforms. The government agreed to expand fiscal and monetary reform, promote private enterprise and foreign investment, privatize or close state firms, and strengthen banking. In addition, it agreed to maintain a market exchange rate, reduce tariffs, and eliminate unneeded trade regulations. A liberal foreign investment code was enacted and appears to be slowly making a positive impact in the market. The process of economic reform continues. These reforms led to increased availability of goods and economic growth that has continued since the early 1990's, despite short-term economic setbacks resulting from the 1997 Asian financial crisis. The economy continues to be dominated by an unproductive agricultural sector operating largely outside the money economy, and the public sector continues to play an important role. Tourism is a growing industry and important source of foreign exchange. The Government of Laos is promoting infrastructure development, especially in the hydropower and mining sectors. Several large hydropower projects currently under construction are expected to increase national revenue significantly once completed.

International indices rate Laos poorly on transparency and ease of doing business. Corruption continues to hamper economic development. Laos has begun the World Trade Organization accession process, with the intention of joining that organization by 2010.

FOREIGN RELATIONS

The government that assumed power in December 1975 aligned itself with the Soviet bloc and adopted a hostile posture toward the West. In ensuing decades, Laos maintained close ties with the former Soviet Union and its eastern bloc allies, and depended heavily on the Soviet Union for most of its foreign assistance. With the collapse of the Soviet Union, Laos has sought to improve relations with its regional neighbors. Laos was admitted into the Association of Southeast Asian Nations (ASEAN) in July 1997 and applied to join the World Trade Organization (WTO) in 1998. The government hopes to accede to the WTO by 2010. Currently, Laos' foreign policy concentrates on its immediate neighbors. Laos generally maintains a low profile in the larger international arena, although it has been playing an increasing role in activities of the Non-Aligned Move-

ment. Laos maintains a "special relationship" with Vietnam and formalized a 1977 treaty of friendship and cooperation that created tensions with China. Although the two were allies during the Vietnam War, the China-Vietnam conflict in 1979 led to a sharp deterioration in Sino-Lao relations. These relations began to improve in the late 1980s. In 1989 Sino-Lao relations were normalized. Today China is becoming a major player in Laos; Chinese investment in Laos is increasing at a rapid rate, bringing with it a growing number of Chinese workers. Thailand remains the largest single foreign investor in Laos. In 2003, Laos and Thailand signed agreements to cooperate on cross-border, labor, and counternarcotics issues. Laos and Thailand signed a joint communique in March 2007, the first in 20 years, covering infrastructure development, avian influenza, border control, and Hmong migration issues.

Laos is a member of the following international organizations: Agency for Cultural and Technical Cooperation (ACCT), Association of Southeast Asian Nations (ASEAN), ASEAN Free Trade Area (AFTA), ASEAN Regional Forum, Asian Development Bank, Colombo Plan, Economic and Social Commission for Asia and Pacific (ESCAP), Food and Agriculture Organization (FAO), G-77, International Bank for Reconstruction and Development (World Bank), International Civil Aviation Organization (ICAO), International Development Association (IDA), International Fund for Agricultural Development (IFAD), International Finance Corporation (IFC), International Federation of Red Cross and Red Crescent Societies, International Labor Organization (ILO), International Monetary Fund (IMF), Interpol, International Olympic Commission (IOC), International Telecommunications Union (ITU), Mekong River Commission (MRC), Non-Aligned Movement (NAM), Permanent Court of Arbitration (PCA), UN, United Nations Convention on Trade and Development (UNCTAD), United Nations Educational, Social and Cultural Organization (UNESCO), United Nations Industrial Development Organization (UNIDO), Universal Postal Union (UPU), World Federation of Trade Unions, World Health Organization (WHO), World Intellectual Property Organization (WIPO), World Meteorological Organization (WMO), World Tourism Organization, and World Trade Organization (observer).

U.S.-LAO RELATIONS

The United States opened a legation in Laos in 1950. Although diplomatic relations were never severed, U.S.-Lao relations deteriorated during in the post-Indochina War period after 1975. The relationship remained cool until 1982 when efforts at improvement began. Full diplomatic relations were restored in 1992 with a return to ambassadorial-level representation. Accounting for Americans missing in Laos from the Vietnam War has been a special focus of our bilateral relationship. Since the late 1980s, joint U.S. and Lao teams have conducted a series of excavations and investigations of sites related to cases of Americans missing in Laos.

Counternarcotics activities are also an important part of the bilateral relationship. The United States and Laos cooperate closely on opium crop control projects that have helped to bring about a 96% decline in poppy cultivation, from 42,000 hectares in 1989 to 1700 hectares in 2006. Laos, however, remains on the U.S. list of major opium producers. U.S.-sponsored demand reduction programs have increased Laos' capacity to treat both narcotic and amphetamine addiction. The U.S. also provides law enforcement assistance to help contend with the rapid growth in meth-amphetamine abuse and crime that has occurred in Laos since 2003. The U.S. Government provided more than $11 million in foreign assistance to Laos in FY 2007, in areas including unexploded ordnance clearance and removal, counternarcotics, health and avian influenza, education, economic development, and governance.

In December 2004, the President signed into law a bill extending normal trade relations to Laos; in February 2005, a Bilateral Trade Agreement between the United States and Laos entered into force. There has been a consequent rise in Lao exports to the U.S., although the volume of trade remains small in absolute terms. Bilateral trade reached $25.4 million in 2007, compared with $15.7 million in 2006. The Lao Government is working to implement the provisions of the Bilateral Trade Agreement while simultaneously seeking to join the World Trade Organization.

TRAVEL

Consular Information Sheet

November 17, 2008

Country Description: The Lao People's Democratic Republic (Laos) is a poor, developing country ruled by an

authoritarian, Communist, one-party government. Political power is centralized in the Lao People's Revolutionary Party. Services and facilities for tourists are adequate in the capital, Vientiane, and the UNESCO World Heritage town of Luang Prabang, but are extremely limited in other parts of the country.

Entry Requirements: A passport and visa are required. The Lao Ministry of Foreign Affairs states that visas can be issued upon arrival in Laos to U.S. citizen tourists with two passport-size photographs and $35 at the following ports of entry: Wattay Airport, Vientiane; Pakse and Luang Prabang Airports; Friendship Bridge, Vientiane and Savannakhet; and land-border crossings at Boten-Bohan and Vangtao-Chong Mek. Persons who have obtained an entry visa prior to their arrival in Laos may also enter at the following international entry points: Chiang Saen-Huaixay, Khammouane-Nakhonphanom, Savannakhet-Mukdahan, Daensayanh-Laobao, Namphao-Kaopae, and Namkan. Foreign tourists are generally admitted to Laos for 30 days. U.S. citizens born in Laos may be admitted for 60 days or longer. The Department of Immigration in Vientiane will extend 30-day tourist visas up to an additional 60 days for a fee of $2 per day. Foreigners who overstay their visas in Laos risk arrest and upon departure will be fined $10 for each day of overstay. The Lao government requires payment of visa fees and fines in U.S. dollars. Thai baht and Lao kip may sometimes be accepted for the fees, but at unfavorable exchange rates. Foreign tourists who wish to obtain a visa in advance may contact a Lao embassy or consulate. In the United States, visas and further information about Lao entry requirements can be obtained directly from the Embassy of the Lao People's Democratic Republic, 2222 S St. NW, Washington DC 20008, tel: 202-332-6416, fax: 202-332-4923, http://www.laoembassy.com.

Business visas can only be arranged in advance; a company or individual "sponsor" must contact the Lao Ministry of Foreign Affairs (MFA) in Vientiane and request a visa for the traveler by offering a "guarantee." Once this request is approved by the MFA, the approval will be communicated to the Lao Embassy in Washington, DC, and the U.S. traveler may then apply for the business visa. This process normally takes 1-3 months. After the traveler's arrival, these visas can usually be extended for one month.

U.S. citizens should not attempt to enter Laos without valid travel documents or outside of official ports of entry. Travelers should not cross the border between Laos and Thailand along the Mekong River except at official immigration check crossings. Persons attempting to enter Laos outside of official ports of entry risk arrest or other serious consequences.

Immigration offices at some of the less-used land border crossing points are not well marked. Travelers should make sure that they complete immigration and customs formalities when they enter or depart Laos. Travelers who enter Laos without completing these formalities may be subject to fine, detention, imprisonment, and/or deportation.

In an effort to prevent international child abduction, many governments have initiated procedures at entry/exit points. These often include requiring documentary evidence of relationship, such as the child's birth certificate, and permission for the child's travel from the parent(s) or legal guardian not present. Having such documentation on hand, even if not required, may facilitate entry/departure.

At Wattay Airport (Vientiane), Pakse Airport and the Luang Prabang Airport, there is an international airport departure tax of US$10. This tax may be included in the price of the airline ticket, depending on the carrier. At the Friendship Bridge (Vientiane, Laos-Nong Khai, Thailand border crossing) there is an overtime fee after 4:00 pm weekdays and during weekends. Visit http://www.laoembassy.com for the more visa information.

Safety and Security: There have been reports in the past of violent incidents carried out by anti-government forces, including reports in 2007 of isolated clashes between Lao Government forces and unidentified opponents in the area of Vang Vieng in northern Vientiane Province, and in Bokeo Province. The Department of State recommends that U.S. citizens traveling to or residing in Laos exercise caution and be alert to their surroundings at all times.

The Lao Government security forces often stop and check all transport on main roads. Travelers should comply with requests to stop at checkpoints and roadblocks. U.S. citizens, especially those considering travel outside urban centers, are advised to contact relevant Lao government offices, such as Lao Immigration Police Headquarters in Vientiane, the Lao Tourist Police, local police and customs offices, or contact the U.S. Embassy for the most current security information. To avoid trouble with the authorities, U.S. citizens traveling outside of normal tourist areas or contemplating any unusual activity (including, but not limited to, engaging in business, extensive photography, or scientific research of any kind) should consider seeking advance permission from the Village Chief, District Head, Provincial Governor, or National Tourism Authority, as appropriate.

More than 100 casualties per year are caused by the large amount of unexploded ordnance (UXO) in Laos left over from the Indochina War. Some parts of Savannakhet, Xieng Khouang, Saravane, Khammouane, Sekong, Champassak, Houaphan, Attapeu, Luang Prabang and Vientiane Provinces are contaminated by UXO. In addition, numerous mine fields are left over from the war, including mine fields along Route 7 (from Route 13 to the Vietnam border), Route 9 (Savannakhet to the Vietnam border), and Route 20 (Pakse to Saravane). Travelers in Laos should never pick up unknown metal objects and should avoid traveling off of well-used roads, tracks and paths.

U.S. citizens are advised to exercise caution in remote areas along the Lao border with Burma. Bandits, drug traffickers, and other people pursuing illegal activities operate in these border areas, as do armed insurgent groups opposed to the government of Burma.

From 2004 to 2006, seven Lao-American and Hmong-American citizens were murdered in northern and northeastern Thailand near the border with Laos. During the same period, a number of non-Americans with ties to Laos were also murdered in this region of Thailand. In addition, in March 2006 a Hmong-American disappeared from his residence in Chiang Mai along with seven other individuals. In most of these cases, no arrests have been made. If U.S. citizens, particularly Lao-Americans or Hmong-Americans, travel to these areas, they should exercise caution and remain vigilant with regard to their personal security. It is also recommended that persons wishing to travel to border areas check first with the Thai Police and the U.S. Consulate General in Chiang Mai or the U.S. Embassy in Bangkok or the U.S. Embassy in Vientiane.

For the latest security information, Americans traveling abroad should regularly monitor the Department's Internet web site where the current Travel Warnings and Travel Alerts, including the Worldwide Caution Travel Alert, can be found. Up-to-date information on safety and security can also be obtained by calling 1-888-407-4747 toll free in the U.S., or for callers outside the U.S. and Canada, a regular toll-line at 1-202-501-4444.

Crime: Laos generally has a low rate of violent crime, but travelers should remain aware of their surroundings and exercise appropriate security precautions. With the introduction of methamphetamines and other illicit drugs, thefts and assaults in Vientiane have increased and some have turned violent. Bag-snatching has increased and sexual assaults have also occurred. Residential burglary is commonplace. Expatriates attempting to report burglaries in progress to the police often find that police telephones are not answered or they are informed that the police are not authorized to respond to criminal activity at night or that they have no transportation. U.S. citizens who move to Vientiane are encouraged to contact the U.S. Embassy for security advice.

Travelers in Vientiane should exercise caution, particularly after dark, at roadside restaurants and stalls near the banks of the Mekong River. Foreigners are often the victims of purse snatchings while sitting down to eat or while riding bicycles or motorcycles in this area. To help ensure the security of valuables and documents carried on their person, travelers should carry them in bags that cannot be easily stolen. U.S. citizens traveling to Vang Vieng should be aware that some tourists have been robbed and assaulted while walking alone to the caves on the far side of the Nam Song River. Camping at night anywhere except in authorized campgrounds in national parks is dangerous. Many restaurants in popular tourist locations in the Vang Vieng area offer menu items, particularly "pizzas," "shakes" or "teas" which may contain unknown substances or opiates. These products are often advertised as "happy" or "special" items. These unknown foods and drinks can be dangerous, causing illness and death.

Over the last year, several foreigners, including U.S. citizens, died in Laos after using illegal drugs, such as methamphetamines, opium, or heroin. The potency of some of these drugs can be several times that of similar substances found in the U.S.

Information for Victims of Crime: The loss or theft abroad of a U.S. passport should be reported immediately to the local police and the nearest U.S. Embassy or Consulate. If you are the victim of a crime while overseas, in addition to reporting to local police, please contact the nearest U.S. Embassy or Consulate for assistance. The Embassy/Consulate staff can, for example, assist you to find appropriate medical care, contact family members or friends and explain how funds could be transferred. Although the investigation and prosecution of the crime is solely the responsibility of local authorities, consular officers can help you to understand the local criminal justice process and to find an attorney if needed.

Medical Facilities and Health Information: Medical facilities and services in Laos are limited and do not meet Western standards. In Vientiane, U.S. citizens may wish to contact the Primary Care Center, also known as the Centre medical de L'Ambassade de France (CMAF), which is supported by the French Embassy. The CMAF is located on Khou Vieng Road across the street from the Green Park Hotel, Tel. +856-21-214-150, or +856-20-558-4617, email: cmafloa@gmail.com. U.S. citizens in Laos often seek medical care in Thailand. The Friendship Bridge linking Vientiane, Laos, to Nong Khai, Thailand, is open daily 6:00 a.m. to 10:00 p.m. Officials generally will allow travelers to cross after hours in cases of medical emergency. AEK International Hospital (tel: 66-42-342-555) and North Eastern Wattana General Hospital, both in Udorn, Thailand (tel: 66-1-833-4262) have English-speaking staff accustomed to dealing with foreign patients. Nong Khai Wattana Hospital in Nong Khai, Thailand (tel: 66-1-833-4262) can handle most simple medical procedures. Ambulances for both AEK International Hospital and Nong Khai Wattana Hospital have permission to cross the Friendship Bridge to collect patients from Vientiane. In Vientiane, the Setthatirat Hospital ambulance (tel: 021-413-720) can take patients to Thailand. The Department of State assumes no responsibility for the professional ability or reputation of these hospitals.

Avian Influenza: The Centers for Disease Control (CDC), the World Health Organization (WHO), and Lao authorities have confirmed the presence in Laos of the H5N1 strain of avian influenza, commonly known as "bird flu." In 2007, two Lao nationals died after contracting the H4N1 virus. Travelers to Laos and other countries affected by the virus are

cautioned to avoid poultry farms, contact with animals in live food markets, and any surfaces that appear to be contaminated with feces from poultry or other animals. In addition, the CDC and WHO recommend eating only fully cooked poultry and eggs. The Lao government's avian influenza hotline may be reached by calling 166 from anywhere in Laos. This hotline may be used to report suspected cases of avian influenza in animals or humans, or to obtain information on areas in Laos where avian influenza may have been recently detected. Operators speak Lao and English. For the most current information and links on avian influenza in Laos, see the State Department's Avian Influenza Fact Sheet or visit the website of the U.S. Embassy in Laos.

There is a problem with counterfeit pharmaceuticals throughout Southeast Asia. American citizens should be aware of this problem and purchase pharmaceuticals only through the most reputable pharmacies with a physician's prescription.

The U.S. Department of State is unaware of any HIV/AIDS entry restrictions for visitors to or foreign residents of Laos.

Information on vaccinations and other health precautions, such as safe food and water precautions and insect bite protection, may be obtained from the Centers for Disease Control and Prevention's hotline for international travelers at 1-877-FYI-TRIP (1-877-394-8747) or via the CDC's Internet site at http://wwwn.cdc.gov/travel. For information about outbreaks of infectious diseases abroad consult the World Health Organization's (WHO) website at http://www.who.int/en. Further health information for travelers is available at http://www.who.int/ith.

Medical Insurance: The Department of State strongly urges Americans to consult with their medical insurance company prior to traveling abroad to confirm whether their policy applies overseas and whether it will cover emergency expenses such as a medical evacuation.

Traffic Safety and Road Conditions: While in a foreign country, U.S. citizens may encounter road conditions that differ significantly from those in the United States. The information below concerning Laos is provided for general reference only, and may not be totally accurate in a particular location or circumstance.

The number of road accidents and fatalities in Laos has risen sharply in the last decade as the number of motor vehicles has increased. U.S. citizens involved in traffic accidents have been barred from leaving Laos before paying compensation for property damage or injuries, regardless of who was at fault. A driver involved in a traffic accident should remain at the scene and attempt to contact the police or wait for them to arrive to prepare an accident report. If renting a car or motorcycle, contact the rental company and its insurance agent. If there is major damage, injury or death, contact the Consular Section or the Duty Officer at the U.S. Embassy.

Traffic in Laos is chaotic and road conditions are very rough. Few roads have lane markings. Where lane markings, road signs, and stoplights do exist, they are widely ignored. Many drivers are unlicensed, inexperienced and uninsured. Driving under the influence of alcohol or illegal drugs is not uncommon, and penalties for such offenses may not be enforced. Theoretically, traffic moves on the right, but vehicles use all parts of the road. Motorcyclists pay little or no heed to cars. Motorcycles carry as many as five people, greatly impeding the drivers' ability to react to traffic. The evening hours are particularly dangerous. Road construction sites are poorly marked, appear with no advance warning, and can be difficult to see at night. Roads are poorly lit, many vehicles have no operating lights, few bicycles have reflectors, and trucks without reflectors commonly park on unlit roads.

Travelers are also advised to be cautious when traveling the roads of Laos and to check with local authorities, transport companies, other travelers, and/or the Embassy regarding any recent developments prior to travel. Road obstacles such as changes in surface conditions due to the weather occur frequently.

Public transportation is unreliable and is limited after sunset. The most common form of public transport is three-wheeled, open-sided taxis called "tuk-tuks." Automobile taxis or cars for hire are available at the airport, the Friendship Bridge, and most major hotels, and near the Morning Market in Vientiane. Tuk-tuks and taxis are frequently in poor repair, and drivers generally speak little or no English. Inter-city transport is provided by buses, vans, pickups, and trucks, which are also often in poor repair.

Emergency services in Laos are either unreliable or non-existent. Lao road traffic regulations require any driver coming upon a road accident to assist in transporting injured persons to a hospital. Emergency telephone numbers in Vientiane are Fire: 190, Ambulance: 195 or 021-413-720, Traffic Police: 191, Tourist Police: 021-251-128 (only for incidents involving tourists).

Aviation Safety Oversight: As there is no direct commercial air service between the United States and Laos, the U.S. Federal Aviation Administration (FAA) has not assessed the Lao Civil Aviation Authority for compliance with International Civil Aviation Organization (ICAO) aviation safety standards. For more information, travelers may visit the FAA's Internet web site at http://www.faa.gov.

Travel Of Foreigners Within Laos: The Lao tourist police have informed foreign tourists that a licensed Lao tour guide must accompany any group of more than 5 foreign tourists; however, this regulation does not appear to be strictly enforced. The authorities may restrict travel in rural areas outside of popular tourist destinations. Restricted areas may not be marked or even widely known by local citizens. If traveling without a reputable tour guide who is aware of local conditions, travelers should consult with

local authorities before entering remote areas away from obvious tourist destinations. Lao citizens who wish to have a foreign citizen—including a family member—stay in their home must obtain prior approval from the village chief. The foreigner may be held responsible if the Lao host has not secured prior permission for the visit. American citizens are strongly advised to ensure that such permission has been granted before accepting offers to stay in Lao homes. Security personnel may at times place foreign visitors under surveillance. Hotel rooms, telephones and fax machines may be monitored, and personal possessions in hotel rooms may be searched. Taking photographs of anything that could be perceived as being of military or security interest may result in problems with the local authorities.

Relationships With Lao Citizens: The Lao Government prohibits sexual contact between foreign citizens and Lao nationals except when the two parties have been married in accordance with Lao Family Law. Any foreigner who enters into a sexual relationship with a Lao national may be interrogated, detained, arrested, or jailed. Lao police have confiscated passports and imposed fines of up to $5000 on foreigners who enter into disapproved sexual relationships. The Lao party to the relationship may also be jailed without trial. Foreigners are not permitted to invite Lao nationals of the opposite sex to their hotel rooms; police may raid hotel rooms without notice or consent.

Foreign citizens intending to marry Lao nationals are required by Lao law to obtain prior permission from the Lao Government. The formal application process can take as long as a year. American citizens may obtain information about these requirements from the U.S. Embassy in Vientiane. The Lao Government will not issue a marriage certificate unless the correct procedures are followed. Any attempt to circumvent Lao regulations may result in arrest, imprisonment, a fine of $500-$5000, and deportation. Foreigners who cohabit with or enter into a close relationship with Lao nationals may be accused by Lao authorities of entering into an illegal marriage and be subject to these same penalties. Foreign citizens who wish to become engaged to a Lao national are required to obtain prior permission from the chief of the village where the Lao national resides. Failure to obtain prior permission can result in a fine of $500-$5000. Lao police frequently impose large fines on foreign citizens a few days after they hold an engagement ceremony with a Lao citizen based on the suspicion that the couple subsequently had sexual relations out of wedlock.

Marriage: A Lao Prime Ministerial decree requires that marriages of Lao citizens abroad be registered with Lao embassies in order to be legal in Laos. If an American citizen marries a Lao citizen in the U.S. and then the couple comes to Laos, the American could be subject to penalties under the Lao law governing sexual relationships (above) if the marriage has not been registered beforehand with a Lao Embassy.

Religious Workers: Religious proselytizing or distributing religious material is strictly prohibited. Foreigners caught distributing religious material may be arrested or deported. The Government of Laos restricts the importation of religious texts and artifacts. While Lao law allows freedom of religion, the Government registers and controls all associations, including religious groups. Meetings, even in private homes, must be registered and those held outside of established locations may be broken up and the participants arrested.

Travel: U.S. citizens considering travel by air, road or river within Laos are advised to carefully evaluate the relative risks of the three modes of transport (see sections on Aviation Safety Oversight, Traffic Safety, and River Travel below). Travelers should also exercise caution if contemplating swimming in rivers in Laos. Currents can be deceptie and strong.

River travel is common in Laos, but safety conditions do not conform to U.S. standards. In particular, travel by speedboat (local term “fast boat”) is dangerous and should be avoided, particularly during the dry season. Travel on or across the Mekong River along the Thai border should be avoided at night. Lao militia forces have shot at boats on the Mekong after dark.

Photography and Other Restrictions: Taking photographs of anything that could be perceived as being of military or security interest—including bridges, airfields, military installations, government buildings, or government vehicles—may result in problems with authorities, including detention or arrest and confiscation of the camera. Tourists should be cautious when traveling near military bases and strictly observe signs delineating the military base areas. Military personnel have detained and questioned foreigners who have unknowingly passed by unmarked military facilities. Because of the prohibition on religious proselytizing, travelers should use caution when taking photographs or videotaping non-Buddhist religious services. If attending public services or religious gatherings, foreigners should ask permission from the local police and civil authorities to photograph or videotape. See section above on Religious Workers. Local police may suspect persons using any kind of sophisticated still or video camera equipment of being professional photographers or possibly photojournalists, which may lead to questioning, detention, arrest or deportation by the police.

Financial Transactions: There are network-connected ATMs in Vientiane, including those operated by the Foreign Commercial Bank of Laos, also know as the Banque Pour le Commerce Exterieur de Laos (BCEL). BCEL also has network-connected ATMS in Vang Vieng, and the Provincial capital cities, or “Muang,” of Luangnamtha, Oudomxay, Luangprabang, Khammouan, Savannakhet, and Champasak Provinces. These machines are generally limited to withdrawals of the equivalent of about $100.00 in Lao kip only. Credit cards are accepted at major hotels

and tourist-oriented businesses. Credit card cash advances and/or Western Union money transfers are available at banks in most provincial capitals and other tourist centers. While the government requires that prices be quoted in Lao kip, prices are often given in U.S. dollars or Thai baht, especially in tourist areas or at markets. The Lao Government requires payment in U.S. dollars for some taxes and fees, including visa fees and the airport departure tax.

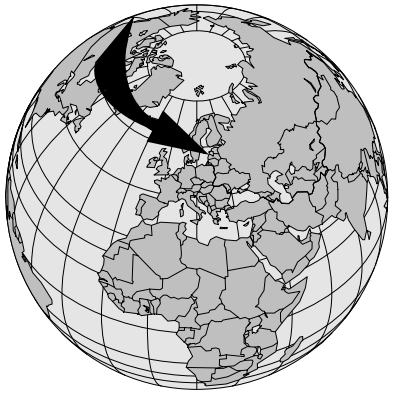
Customs and Currency Regulations: Lao customs authorities may enforce strict regulations concerning temporary importation into or export from Laos of items such as firearms, religious materials, antiquities, foreign currency, cameras and other items. It is advisable to contact the Embassy of the Lao People's Democratic Republic in Washington for specific information regarding customs requirements. (Please also see section on "Religious Workers" above). There are prohibitions against importing or exporting more than $2500 (U.S. dollar equivalent) of currency without authorization. Contact the Lao Embassy or Lao customs authorities for more details.

In many countries around the world, counterfeit and pirated goods are widely available. Transactions involving such products are illegal and bringing them back to the United States may result in forfeitures and/or fines.

Criminal Penalties: While in a foreign country, a U.S. citizen is subject to that country's laws and regulations, which sometimes differ significantly from those in the United States and may not afford the protections available to the individual under U.S. law. Penalties for breaking the law can be more severe than in the United States for similar offenses. Persons violating Lao laws, even unknowingly, may be expelled, arrested or imprisoned. Penalties for possession of, use of, or trafficking in illegal drugs in Laos are severe, and convicted offenders can expect long jail sentences and heavy fines. Engaging in sexual conduct with children or using or disseminating child pornography in a foreign country is a crime, prosecutable in the United States.

Children's Issues: For information on intercountry adoption of children and international parental child abduction, see the Office of Children's Issues website at http://travel.state.gov.

Registration and Embassy Locations: Americans living or traveling in Laos are encouraged to register with the nearest U.S. embassy or consulate through the State Department's travel registration web site so that they can obtain updated information on travel and security within Laos. Americans without Internet access may register directly with the nearest U.S. embassy or consulate. By registering, American citizens make it easier for the embassy or consulate to contact them in case of emergency. The U.S. Embassy is located on Rue Bartholonie (near Tat Dam), in Vientiane; from the U.S., mail may be addressed to U.S. Embassy Vientiane, Unit 8165, Box V, APO AP 96546; Telephone (856-21) 267-000, recorded emergency information for American citizens (856-21) 267-111; duty officer emergency cellular telephone (856-20) 550-2016; Embassy-wide fax number (856-21) 267-190; Consular Section e-mail: CONSLAO@state.gov, Embassy web site: http://laos.usembassy.gov.



Intercountry Adoption

February 2006

The information in this section has been edited from a report of the State Department Bureau of Consular Affairs, Office of Overseas Citizens Services. For more information, please read the *Intercountry Adoption* section of this book and review current reports online at http://adoption.state.gov.

Disclaimer: The information in this flyer relating to the legal requirements of specific foreign countries is based on public sources and current understanding. Questions involving foreign and U.S. immigration laws and legal interpretation should be addressed respectively to qualified foreign or U.S. legal counsel.

Suspension of Foreign Adoptions: Prospective adopting American citizen parents should be aware that the Lao government has currently suspended all adoptions of Lao children by foreigners. Some exceptions have been granted by the Office of the Prime Minister, which is the only Lao government authority which can grant exceptions to the ban. Prospective adopting American citizen parents must obtain written authorization from the Office of the Prime Minister prior to having the United States Citizen and Immigration Service (USCIS) approve a petition for an orphan. For further information on intercountry adoption, contact the Office of Children's Issues, U.S. Department of State at 1-888-407-4747 or visit its web site on the Internet at http://adoption.state.gov. You may also direct inquiries to: Office of Children's Issues, U.S. Department of State, Washington, DC 20520-4811; Phone: (202) 736-9090; Fax: (202) 312-9743.

LATVIA

Compiled from the October 2008 Background Note and supplemented with additional information from the State Department and the editors of this volume. See the introduction to this set for explanatory notes.

Official Name:
Republic of Latvia

PROFILE

Geography

Area: 64,589 sq. km. (24,938 sq. mi.); slightly larger than West Virginia.

Cities: (2008) Capital—Riga (717,371). Other cities—Daugavpils (105,958); Liepaja (85,050); Jelgava (65,635); Jurmala (55,580); Ventspils (43,299); Rezekne (35,883).

Terrain: Fertile low-lying plains predominate in central Latvia, highlands in Vidzeme and Latgale to the east, and hilly moraine in the western Kurzeme region. Forests cover one-third of the country, with over 3,000 small lakes and numerous bogs. Although there are more than 12,000 rivers in the country, the only major waterways are the Daugava (Dvina) River, which flows through the center of the country and empties into the Gulf of Rîga, and the Gauja River, which rises in the Vidzeme Upland.

Land use: 20% arable land, 8% meadows and pastures, 45% forest and woodland, 27% other.

Climate: Temperate, maritime, with four seasons of almost equal length. Average temperatures in January range from -2.8°C (26.6°F) in the western, coastal town of Liepaja, to -6.6°C (20.1°F) in the inland town of Daugavpils. Mean temperatures for July range from 16.7°C (62.1°F) in Liepaja to 17.6°C (63.7°F) in Daugavpils. Annual precipitation averages 57 centimeters (23 in.).

People

Nationality: Noun and adjective—Latvian(s).

Population: (2008) 2,270,894.

Annual growth rate: (2007) -0.5%. Birth rate—10,2/1,000. Death rate—14,5/1,000. Migration rate—3541 immigrants, 4183 emigrants (2007). Net migration rate (2007): -642 migrants.

Population density: (2008) 35.2/1 sq. km (this figure is far lower in the rural parts of Latvia). Urban dwellers—67,9%.

Ethnic groups: (2008) Latvians 59,2%, Russians 28.0%, Belarusians 3.7%, Ukrainians 2.5%, Poles 2.4%.

Religions: (2003) Lutheran (23.8%), Roman Catholic (18.4%), Russian Orthodox (15.0%).

Languages: Latvian (Lettish). Russian also is spoken by most people.

Education: Years compulsory—9. By 1989, 60% of the adult populace had finished high school, and 12% had completed college. Enrollment (2007/2008)—382,073 students in 1,648 schools (including pre-school establishments and vocational education institutions) and 127,760 university students. Literacy—99.8%.

Health: Infant mortality rate—8.7/1,000 (2007). Life expectancy (2007)—65.8 yrs. male, 76.5 yrs. female.

Work force: (2007) (1,075 Mil. people): Industry—17.2%; trade—16,5%; construction—11.2%; agriculture/forestry—9.6%;; transport/communications—9.3%; public administration/defense—7.5%; education—7.3%; real estate industry—6,6%; health care/social welfare—4.5%.

Government

Type: Parliamentary democracy.

Constitution: The law "On the Republic of Latvia Status as a State," passed by Parliament on August 21, 1991, provided for the reinstatement of the 1922 constitution.

Government branches: Executive—President (head of state), elected by Parliament every 4 years; Prime Minister (head of government). Legislative—Saeima (100-member parliament). Judicial—Supreme Court; Constitutional Court; civil law system.

Political subdivisions: 26 "rural" districts and 6 districts in Riga.

Political parties: People's Party—21 seats, Alliance of Political Organizations (Harmony Center)—18 seats, Greens and Farmers—17 seats, New Era—14 Seats,, Latvia's First Party and Latvia's Way Union—10 seats, Civic Union—6 seats, Fatherland and Freedom—5 seats, For Human Rights in United Latvia—5 seats, independent—4 seats.

Suffrage: universal adult (18 years of age).
National holidays: (2008) 1 January (New Year's Day); 23-24 March (Easter); 1 May (Labor Day); 23-24 June (Midsummer Festival); 18 November (National Day, proclamation of the Republic); 25-26 December (Christmas); 31 December (New Year's Eve).

Economy

GDP: (2007) $17.09 billion.
Annual growth rate: (2007) 10.3%.
Annual inflation rate: (2007) 14.1%.
Unemployment rate: (2007) 6%.
Per capita income: (Nominal GDP per capita) (2007) $12,000.
Natural resources: Peat, limestone, dolomite, gypsum, timber.
Agriculture/forestry: (3.2% of 2007 GDP): Products—cattle, dairy foods, cereals, potatoes, timber. Land—2.36 million hectares, of which 73.3% is arable, 25.7% meadow and pasture, and 1.0% orchards.
Industry: (13.6% of 2007 GDP): Metalworking, machinery and tools, light electrical equipment and fittings, textiles and footwear, technological instruments, construction materials, processed foods.
Major sectors of the economy: (2007) retail and wholesale trade, repair of motor vehicles, motorcycles and personal and household goods 20.3%; real estate, renting and business activities 15.8%; manufacturing 10.8%; transport and communications 10.8%; construction 8.4%; financial intermediation 7.7%; public administration and defense, compulsory social security 6.7%
Trade: (2007) Exports—$7.92 billion: wood, wood products 22.5%; basic metals, fabricated metal products 14.6%, machinery, equipment 11%; food products, beverages (incl. alcoholic), tobacco 7.8%; chemicals, chemical products 7.4%; textiles and textile products 6.7%. Major markets—Lithuania 15.8%, Estonia 14.4%, Russia 9.6%, Germany 8.7%, Sweden 7.7%, U.K. 6.9%. Imports—$15.26 billion: machinery and equipment 20.8%; motor vehicles 14.6%; mineral products 11.5%; basic metals and fabricated metal products 9.6%; chemicals and chemical products 8.1%; food products, beverages (incl. alcoholic), tobacco 6.1%; rubber and plastic products 4.8%; textiles and textile products 4.3% Partners—Germany 15.2%, Lithuania 13.9%, Russia 8.4%, Estonia 8.1%, Poland 7%, Finland 5.1%, Sweden 4.9%.

PEOPLE

The behavior of most Latvians reflects the strong cultural and religious influences of centuries-long Germanic and Scandinavian colonization and settlement. They are viewed as self-reliant, independent, persistent, and reserved. Eastern Latvia (Latgale), however, retains a strong Polish and Russian cultural and linguistic influence. This highly literate society places strong emphasis upon education, which is free and compulsory until age 16. The majority of Latvians belong to the Evangelical Lutheran Church; a sizable minority is Russian Orthodox, and Eastern Latvia is predominantly Roman Catholic.

Historically, Latvia has always had fairly large Russian, Jewish, German, and Polish minorities, but traumatic wartime events, postwar emigration, deportations, and Soviet Russification policies from 1939 to 1989 reduced the percentage of ethnic Latvians in Latvia from 73% to 52%. In an attempt to preserve the Latvian language and prevent ethnic Latvians from becoming a minority in their own country, Latvia enacted language, education, and citizenship laws which require a working proficiency in the Latvian language in order to become a citizen. Such legislation has caused concern among many non-citizen resident Russians, despite Latvian legal guarantees of universal human and civil rights regardless of citizenship.

Written with the Latin alphabet, Latvian is the language of the Latvian people and the official language of the country. It is an inflective language with several analytical forms, three dialects, and German syntactical influence. The oldest known examples of written Latvian are from a 1585 catechism. Latvians and Lithuanians are the only surviving direct descendents of the Baltic peoples who speak languages of the Indo-European family. While Latvia was a member of the U.S.S.R, Russian was the official language, so many Latvians also speak Russian, and the resident Slavic populace generally speaks Russian as a first language.

HISTORY

By the 10th century, the area that is today Latvia was inhabited by several Baltic tribes who had formed their own local governments. In 1054, German sailors who shipwrecked on the Daugava River inhabited the area, which initiated a period of increasing Germanic influence. The Germans named the territory Livonia. In 1201, Riga, the current capital of Latvia, was founded by the Germanic Bishop Alberth of Livonia; the city joined the Hanseatic League in 1285 and began to form important cultural and economic relationships with the rest of Europe. However, the new German nobility enserfed the indigenous people and accorded them only limited trading and property rights.

Subsequent wars and treaties led to Livonia's partition and colonization for centuries. In 1721 Russia took control over the Latvian territories as a result of its victory over Sweden in the Great Northern War. During this time there was little sense of a Latvian national identity, as both serfdom and institutional controls to migration and social mobility limited the boundaries of the indigenous people's intellectual and social geography. However, in the 1860's, the Young Latvian Movement was formed in order to promote the indigenous language against Russification policies and to publicize and counteract the socioeconomic oppression of Latvians, 60% of whom belonged to the landless, urban class. This growing proletariat became fertile ground for the ideas of western European socialism and supported the creation in 1903 of the Latvian Social Demo-

cratic Union (LSDU), which continued to champion national interests and Latvia's national self-determination, especially during the failed 1905 Revolution in Russia.

The onset of World War I brought German occupation of the western coastal province of Kurzeme, which Latvians heroically countered with several regiments of riflemen commanded by Czarist generals. The military campaign generally increased Latvian and LSDU support for the Bolsheviks' successful October Revolution in 1917, in the hopes of a "free Latvia within free Russia." These circumstances led to the formation of the Soviet "Iskolat Republic" in the unoccupied section of Latvia. In opposition to this government and to the landed barons' German sympathies stood the Latvian Provisional National Council and the Riga Democratic Bloc. These and other political parties formed the Latvian People's Council, which on November 18, 1918 declared Latvia's independence and formed an army. The new Latvian Army won a decisive battle over the combined German-Red Army forces and consolidated that success on the eastern Latgale front. These developments led to the dissolution of the Soviet Latvian government on January 13, 1920 and to a peace treaty between Latvia and Soviet Russia on August 11 later that year. On September 22, 1921, an independent Latvia was admitted to the League of Nations.

The government, headed by Prime Minister Ulmanis, declared a democratic, parliamentary republic. It recognized Latvian as the official language, granted cultural autonomy to the country's sizeable minorities, and introduced an electoral system into the Latvian constitution, which was adopted in 1922. The ensuing decade witnessed sweeping economic reform, as the war had devastated Latvian agriculture, and most Russian factories had been evacuated to Russia. However, economic depression heightened political turmoil, and, on May 15, 1934, the Prime Minister dismissed the Parliament, banned outspoken and left-wing political parties, and tightened authoritarian state control over Latvian social life and the economy.

The German-Soviet Nonaggression Pact of 1939 steadily forced Latvia under Soviet influence, culminating in Latvia's annexation by the Soviet Union on August 5, 1940. On June 14

of the following year, 15,000 Latvian citizens were forcibly deported and a large number of army officers shot. The subsequent German occupation witnessed the mobilization of many Latvians into Waffen SS legions, while some Latvians joined the Red Army and formed resistance groups, and others fled to the West and East.

An estimated 70,000, or 89.5%, of Latvian Jews were killed in Latvia under Nazi occupation. Up to one-third of Latvia's pre-war population (approximately 630,000 residents) was lost between 1940 and 1954 due to the Holocaust and the Soviet and Nazi occupations.

After World War II, the U.S.S.R. subjected the Latvian republic to a social and economic reorganization which rapidly changed the rural economy to one based on heavy industry, transformed the predominantly Latvian population into a more multiethnic populace, and converted the peasant class into a fully urbanized industrial worker class. As part of the goal to more fully integrate Latvia into the Soviet Union, Stalin deported another 42,000 Latvians and continued to promote the policy of encouraging Soviet immigration to Latvia.

In July 1989, following the dramatic events in East Germany, the Latvian Supreme Soviet adopted a "Declaration of Sovereignty" and amended the Constitution to assert the supremacy of its laws over those of the U.S.S.R. Candidates from the pro-independence party Latvian Popular Front gained a two-thirds majority in the Supreme Council in the March 1990 democratic elections. On May 4, the Council declared its intention to restore full Latvian independence after a "transitional" period; three days later, a Latvian was chosen Prime Minister. Soviet political and military forces tried unsuccessfully to overthrow the Latvian Government. On August 21, 1991, Latvia claimed de facto independence. International recognition, including that of the U.S.S.R., followed. The United States, which had never recognized Latvia's forcible annexation by the U.S.S.R. and continued to accredit a Latvian Ambassador in Washington, recognized Latvia's renewed independence on September 2. In 2007, the United States and Latvia celebrated 85 years of continuous diplomatic relations. Since regaining its independence, Latvia has rapidly moved away from the political-economic structures and socio-cultural patterns which underlay the Soviet Union. Through a U.S. initiative, on April 30, 1994, Latvia and Russia signed a troop withdrawal agreement; Russia withdrew the bulk of its troops by August 31 of that year. Except for some large state-owned utilities, Latvia has privatized most sectors of its economy, which enjoyed years of rapid development before slowing down in 2007. By the end of 2008, Latvian economy was facing the risk of recession. Latvia has also maintained and strengthened the democratic, parliamentary republic that it revived in 1990.
